SCWK995601**The Dialectics of Social and Behavioral Theory****Salas-Wright, Christopher****Spring 2025**

In this course, students will read selected original publications of classical and contemporary theorists in psychology, sociology, political science, urban planning and community development, and economics. They will consider how theories which are foundational to different disciplines in the social and behavioral sciences can inform their studies and predict empirical findings. The theories selected for examination in the course will include: theories of identity and stigma, social integration theories, exchange theory, conflict theories, theories of social integration; critical race theory, role theories, rational choice theory, life course theories, role theories, social justice theories, theories of social change and, and epidemiology. The students will use the assumptions of different theories to prepare three papers, each of which will examine a single issue from a different perspective.

SCWK996001

Regression Analysis for Social and Behavioral Sciences

Saran, Indrani

Spring 2025

Required for all Doctoral Students. This course assumes knowledge of basic statistical concepts used in social research including centrality and dispersion, correlation and association, probability and hypothesis testing, as well as experience of using common statistical package such as SPSS, SAS or STATA. The course will focus on regression-based methods for analyzing quantitative social and behavioral science data using STATA. The topics include multiple regression analysis, major regression diagnostics, and logistic regression analysis for categorical dependent variables.

SCWK997101

Doctoral Group Independent Study

Teixeira, Samantha

Spring 2025

This elective offers students the opportunity for an in-depth examination of a substantive topic that is not comprehensively addressed by other required or elective doctoral courses. The topic is considered from either a theoretical, policy and/or research perspective. The topic area should have direct and substantial relevance to social work research, social work education, evidence-based practice, and/or social policy analysis. A course syllabus should be submitted to the Doctoral Program Director prior to registration.

Area Statement

Pineros Leano, Maria F

Spring 2025

Individualized writing project for doctoral students to develop an Area Statement under faculty supervision, enabling the student to demonstrate mastery of knowledge in a research area. Mastery is demonstrated by the integration, synthesis, and application of research, theory, policy, and practice. The Area Statement should help students develop their dissertation research questions. The Area Statement process requires: (1) a proposal, (2) a written paper, and (3) an oral defense of the paper.

SCWK998201

Research grant writing for the health and behavioral sciences

Davison, Kirsten K

Spring 2025

In this applied learning course, students will progress through the steps of preparing a research grant application in the health and behavioral sciences. Target sponsors include, but are not limited to, federal funding agencies (e.g., National Institutes of Health, Centers for Disease Control) and research foundations (e.g., Robert Wood Johnson Foundation, Gates Foundation). Through the course sequence, the grant writing process and the sections of a research grant application will be reviewed. Rigorous research methods, innovative science, and compelling communication strategies will be emphasized throughout. All course assignments will focus on elements of the final deliverable, which is a 6-10 page grant application for a designated sponsor. Students are strongly encouraged to submit their application by the end of the semester or the following summer. In many instances, the resulting deliverable could also form the basis of a dissertation proposal. The course is co-taught by faculty in the School of Social Work and the Connell School of Nursing to foster a strong interdisciplinary perspective in research and grant writing.

Accounting Courses: Summer 2024

ACCT102101

Financial Accounting

Taylor, Edward

Summer 2024

This course develops an understanding of the basic elements of financial accounting and its role in commerce and capital markets. Accounting helps entities measure and communicate their performance to others. Accounting is primarily a language; the language of business. The understanding of this language allows users from different fields analyze financial transactions, evaluate companies and financial products, and understand financial and macroeconomic events. In this spirit, the course's primary objective is to help students get familiar with this language, and to provide them with a deeper understanding of capital markets and the economic transactions they will encounter both as students and professionals.

Communication Skills for Managers

Rice, Jocelyn L

Summer 2024

This course focuses on specific practical applications of business communication required of MSA students and future managers. Writing assignments include memos, analytic reports, proposals, and a variety of business correspondence. Students also write collaboratively. This course is offered asynchronously, but students also meet with the instructor for personalized communications guidance. Students will not earn credit for both ACCT8810 and BCOM6688. Students should not take this course if they have taken or plan to take BCOM6688.

Accounting helps entities measure and communicate their performance to others. Accounting is primarily a language; the language of business. The understanding of this language allows users from different fields analyze financial transactions, evaluate companies and financial products, and understand financial and macroeconomic events. In this spirit, the course's primary objective is to help students get familiar with this language, and to provide them with a deeper understanding of capital markets and the economic transactions they will encounter both as students and professionals.

Intermediate Accounting for Finance and Consulting

Whalen, Thomas F

Fall 2024

This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

ACCT333001

ESG Reporting and Analysis: Accounting for a Changing World

Carter, Mary Ellen

Fall 2024

As concerns around sustainability grow, firms' reporting on Environmental, Social and Governance (ESG) information is increasingly prevalent and demanded by shareholders and other stakeholders. This course will introduce students to the current reporting landscape and the various ESG reporting frameworks used by firms, exploring these frameworks by comparing and contrasting companies' sustainability reports. We will study proposed regulations to standardize ESG reporting and consider how these disclosures complement what firms already report in their financial statements (e.g. 10-Ks). After understanding how firms report on ESG, we will examine how stakeholders use this information, considering questions such as how to assess the reliability of these disclosures (e.g. is this just "greenwashing"), how these disclosures relate to commercial ESG ratings, and how these disclosures tie to the firms' sustainability strategies (e.g. tying executive compensation to ESG metrics). Since the regulatory environment is evolving, this course will be fluid; topics we cover may change during the semester as current events dictate.

Forensic Accounting

George, David C

Fall 2024

Forensic Accounting is a growing area of practice in which the knowledge, skills and abilities of accounting are combined with investigative expertise and applied to legal problems. Forensic accountants are often asked to provide litigation support where they are called on to give expert testimony about financial data and accounting activities. In other more proactive engagements, they probe situations using special investigative accounting skills and techniques. Some even see forensic accounting as practiced by skilled accounting specialists becoming part and parcel of most financial audits, an extra quality control step in the auditing process that will help reduce financial statement fraud. Accounting helps entities measure and communicate their performance to others. Accounting is primarily a language; the language of business. The understanding of this language allows users from different fields analyze financial transactions, evaluate companies and financial products, and understand financial and macroeconomic events. In this spirit, the course's primary objective is to help students get familiar with this language, and to provide them with a deeper understanding of capital markets and the economic transactions they will encounter both as students and professionals.

Intermediate Accounting for Finance and Consulting

Crowley, Mark D

Spring 2025

This intermediate financial accounting course builds on ACCT1021 to provide, in greater depth, a comprehensive understanding of financial accounting topics important to assessing firm performance. The course is designed to teach users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of the underlying business. The goal of the course is to provide a better understanding of financial reporting and accounting information as an input to evaluating a firm. With hands-on use of cases and SEC filings, this course is beneficial for students seeking careers that require the use of financial statement information as an input to decision-making.

AI Applications in Business: Insights from Corporate Data

Liu, Miao

Spring 2025

This new course is designed to uncover the transformative role of AI in today's business landscape. Drawing from real-world interactions with industry leaders from FinTech startups to hedge funds, the course highlights the growing integration of AI tools into business operations and the critical demand for professionals adept in these technologies. Students will engage with a vast array of corporate data, including financial statements, annual reports, stock prices, media articles, and entrepreneurial pitches. The course covers AI techniques such as machine learning, natural language processing, and large language models such as ChatGPT, demonstrating their application to practical business scenarios. Participants will learn to evaluate firms' climate change exposure, predict market attention shifts, assess systematic market risk, forecast entrepreneurial success, and more, using AI to turn complex data into actionable business insights. This journey equips students with the skills to harness AI's potential in the ever-evolving business world.

Spring 2025

This course examines the technical and strategic tools used in managerial planning and control systems, with an emphasis on decision usefulness and the impact of accounting information on the organization. Attention is directed to improving existing limitations of traditional accounting systems with respect to global competition. Ethical dimensions of managerial decision making are also discussed.

Financial Statement Analysis

Shu, Susan

Spring 2025

This course covers techniques and applications of financial statement analysis. It exposes students to the contemporary financial reporting environment and current reporting practices of U.S. companies. It analyzes real-life cases to foster an understanding of the economic and strategic information conveyed in financial reports. STEM-designated

AI Applications in Business: Insights from Corporate Data

Liu, Miao

Spring 2025

This new course is designed to uncover the transformative role of AI in today's business landscape. Drawing from real-world interactions with industry leaders from FinTech startups to hedge funds, the course highlights the growing integration of AI tools into business operations and the critical demand for professionals adept in these technologies. Students will engage with a vast array of corporate data, including financial statements, annual reports, stock prices, media articles, and entrepreneurial pitches. The course covers AI techniques such as machine learning, natural language processing, and large language models such as ChatGPT, demonstrating their application to practical business scenarios. Participants will learn to evaluate firms' climate change exposure, predict market attention shifts, assess systematic market risk, forecast entrepreneurial success, and more, using AI to turn complex data into actionable business insights. This journey equips students with the skills to harness AI's potential in the ever-evolving business world.

Empirical Topics in Accounting III

Lo, Kin Y;Yost, Benjamin P

Spring 2025

The objective of this course is to provide students with a sound framework for understanding and assessing the quality of empirical archival research in accounting. The course has two objectives. Part of the course is aimed at facilitating a deeper understanding of the econometric issues facing empirical archival research. This part of the course will survey the common problems and potential solutions. The other part of the course will survey the empirical research on accounting and contracting. Topics will include the role of accounting information in evaluating managers and setting executive compensation, earnings management induced by the use of accounting in contracting, and the relation between accounting and corporate governance.

Business Analytics Courses: Summer 2024

BZAN102101

Operations Management

Parker, Delvon B

Summer 2024

This course is an introduction to operations management. Operations, like accounting, finance, marketing, and human resources, is one of the primary functions of every organization. Operations managers transform human, physical, and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm. A strong emphasis will be placed on the development and use of quantitative models to assist decision making.

Data Analytics 1: Model Building

VanderWerf, Pieter A

Summer 2024

Machine Learning, big data, data mining, predictive analytics. These are what the course covers. They consist of the creation and use of mathematical computer models to predict important quantities and events with uncanny accuracy. As one book put it, "Who clicks, who buys, and who dies." The course teaches both the principles and the details of the major methods of making and applying these models to actual business problems. To produce models on the computer, students also learn the R coding language. This is the preferred high-level software for Machine Learning and statistical applications.STEM-designated

Coding for Business

Sterpe, Peter J

Summer 2024

This is an introductory course in computer programming based on Python (a language suitable for all business and analytics programs). The course emphasizes coding literacy and teaches coding skills that are relevant for business decision makers. MBA DA3 is a prerequisite. This course will give students the knowledge and confidence to apply coding to a business problem, and the ability to go from a problem statement to a repeatable set of steps for solving the problem in a general way. It will enable students who might not code professionally to work effectively with colleagues who do, and it will equip interested students to develop significant programs of their own.STEM-Designated.

Statistical Analysis

Wei, Lai

Fall 2024

This course provides an introduction to statistics with a focus on the analytical tools that are applicable to management practice and decision making. Statistical topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression. Data handling and management skills are developed through extensive use of modern statistical programming tools and real data sets. Students will gain an understanding of statistical methods, the ability to formulate business questions as statistical models to test, and critical thinking skills to evaluate the results of those models.

BZAN202201**SQL Module****Jernigan, Stephanie A****Fall 2024**

This self-paced course covers the basics of Structured Query Language to retrieve data from a database. The course is designed only for those students placing out of BZAN 2021 because they've taken CSCI 1101.

Credits: 0**Room and Schedule:** By Arrangement**Satisfies Core Requirement:** None**Prerequisites:** Permission of Department**Corequisites:** None**Cross-listed with:** None**Frequency:** null**Student Level:** Undergraduate**Comments:** None**Status:** Offered**BZAN216501****Intro to Programming using Swift for iOS App Development****Gallaugh, John M****Fall 2024**

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). The course assumes no programming background, but students with some experience will likely have an easier time. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course was formerly numbered: ISYS2160.

BZAN217501

Physical Computing - Interactive Art, Robotics, and Tech for Good

Gallaugh, John M

Fall 2024

Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates. This course was formerly numbered: ISYS2170.

Managing Projects

Coakley, Charles E

Fall 2024

This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

Machine Learning and Artificial Intelligence

Ransbotham, Samuel, III

Fall 2024

Machine Learning and Artificial Intelligence won't replace managers in the near term, but managers who use ML and AI well will replace those who don't. Organizations now have too much data and insufficient time for managers to consume data only in spreadsheets. Instead, the future of work involves managers designing models that, for example, segment customers, forecast sales, schedule preventative maintenance, or predict markets. This course addresses both the technical and managerial aspects of these applications. Technically, students use Python to create, evaluate, and tune multiple practical models (e.g., classifiers, trees, neural networks) in supervised and unsupervised machine learning contexts. Managerially, this course examines how organizations create value through AI applications.

Credits: 3

Sports Analytics

Neale, John J

Fall 2024

This course will introduce you to the field of sports analytics. We will apply quantitative methods from statistics and management science in a sports context. Our focus will be on-field analysis including player and team evaluation and game strategy. We will cover baseball, football, and basketball in depth with occasional references to other sports. We will also discuss concepts from behavioral economics and psychology that help explain the actions of players, coaches, and referees.

Credits: 3

Room and Schedule: Fulton Hall 150 W 04:30PM-06:50PM

Satisfies Core Requirement: None

Prerequisites: A previous course in statistics (BZAN1135 OR BZAN1137), management science (BZAN2235 or BZAN6604), and Excel (BZAN1037 or ISYS1021) plus familiarity with the rules of baseball, football, and basketball.

Operations Strategy and Consulting

Field, Joy M

Fall 2024

This course examines concepts, principles, and techniques for formulating, implementing, and evaluating operations strategy. It links strategic and tactical operational decisions to creation of a competitive advantage. Topics include operations strategy content and process, service operations, capacity and facilities strategy, supply chain management, process design and technology choice, and quality and productivity improvement. Case studies are used to illustrate concepts covered in the course. In collaboration with a consulting firm, students also learn how to develop and deliver a consulting presentation. These skills are applied to a mock consulting project.

Systems Analysis and Design

Wyner, George M

Fall 2024

This course is required for Information Systems concentrators. The course studies information systems (IS) development including requirements, analysis, design and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (BZAN3257/CSCI1157) must be completed prior to taking this course. This course was formerly numbered: ISYS4258.

Management Science

Neale, John J

Fall 2024

This course provides an overview of the concepts and methods of management science. Sometimes referred to as prescriptive analytics or decision analytics, management science is a subset of the larger field of business analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.STEM-designated.

Supply Chain Management

Alev, Isil

Fall 2024

A supply chain consists of all parties involved in fulfilling a customer request, including suppliers, manufacturers, distributors, and retailers. Over the last decade, firms have started focusing on supply chain management as a source of competitive advantage. There's a realization that no company can do better than its supply chain. This course will provide students with an overview of the concepts, models, and methods that are important for the design and operation of modern, global supply chains. Classes are hands-on, with many opportunities to analyze cases and play simulation games.STEM-designated.

Introduction to Blockchain and its Business Applications

Cathcart, Graham T

Fall 2024

The objective of this course is to introduce the business of blockchain--a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space.STEM-designated. Data Analytics 2: Data Management for Analytics

Evenchik, Leonard N

Fall 2024

Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology. The on-campus section of this course (BZAN7707) will meet weekly on campus. Please note that the online asynchronous section of this course will also include two or three synchronous web conferences during the semester. Please review the course syllabus for the schedule for these web conferences, or contact the instructor. STEM-designated This course was formerly numbered: ISYS7700

Data Analytics 3: In Practice

Beebe, Jonathan R

Fall 2024

Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models. BZAN806701

Machine Learning & Artificial Intelligence

VanderWerf, Pieter A

Fall 2024

This course builds on Data Analytics 1 to provide students with advanced tools and skills for Machine learning (ML) in business practice. On the technical side, the course content extends to a wider range of algorithms as well as advanced methods for data sampling and model building and evaluation. More depth in application comes from student reports on current events in Machine Learning, and a course project that involves complete model construction and analysis for an actual business problem with an actual corporate data set. The course assumes the student has experience with the basic machine learning algorithms and the R coding language. STEM-designated.

Intro to Programming using Swift for iOS App Development

Gallaugh, John M

Fall 2024

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). The course assumes no programming background, but students with some experience will likely have an easier time. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course was formerly numbered: ISYS2160.

Physical Computing - Interactive Art, Robotics, and Tech for Good

Gallaugh, John M

Fall 2024

Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates. This course was formerly numbered: ISYS2170.

Business Analysis Survival Guide

Sterpe, Peter J

Fall 2024

This course teaches the why and how of "business analysis" those activities an organization performs to ensure the success of an IT/software project. Students will learn how to consider the build-or-buy decision. We'll explore effective ways to capture and communicate requirements, including how to construct a visually appealing wireframe prototype. We'll cherry pick the most useful techniques from the Unified Modeling Language (UML), we'll demystify Agile and Scrum, we'll explore at a high level how applications are constructed, and we'll equip you to set any IT/software project on a successful path. This is not a coding course, and no coding experience is required. STEM-Designated.

Excel for Business Analytics

Beebe, Jonathan R

Spring 2025

This course provides an introduction to the use of Excel in business analytics. Topics include spreadsheet formatting, charts, basic and logical functions, and more advanced Excel tools like vlookups and pivot tables. In addition to learning how to use Excel as an analytical tool, the course will also discuss ways in which Excel can be used to effectively communicate business results and insights.

Statistical Analysis

Boardman Liu, Linda

Spring 2025

This course provides an introduction to statistics with a focus on the analytical tools that are applicable to management practice and decision making. Statistical topics include descriptive statistics, probability, random variables, sampling distributions, estimation of parameters, hypothesis testing, and regression. Data handling and management skills are developed through extensive use of modern statistical programming tools and real data sets. Students will gain an understanding of statistical methods, the ability to formulate business questions as statistical models to test, and critical thinking skills to evaluate the results of those models.

BZAN202201**SQL Module****Jernigan, Stephanie A****Spring 2025**

This self-paced course covers the basics of Structured Query Language to retrieve data from a database. The course is designed only for those students placing out of BZAN 2021 because they've taken CSCI 1101.

Credits: 0**Room and Schedule:** By Arrangement**Satisfies Core Requirement:** None**Prerequisites:** Permission of Department**Corequisites:** None**Cross-listed with:** None**Frequency:** null**Student Level:** Undergraduate**Comments:** None**Status:** Offered**BZAN216501****Intro to Programming using Swift for iOS App Development****Gallaugh, John M****Spring 2025**

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). The course assumes no programming background, but students with some experience will likely have an easier time. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course was formerly numbered: ISYS2160.

Physical Computing - Interactive Art, Robotics, and Tech for Good

Gallaugh, John M

Spring 2025

Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates. This course was formerly numbered: ISYS2170.

Managing Projects

Coakley, Charles E

Spring 2025

This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk, and resource allocation. Microsoft Project will be used as to support the planning and monitoring phases of project management. The conceptual part of this course is framed with an eye to the behavioral realities a manager faces and the psychology of managing project teams.

Machine Learning and Artificial Intelligence

Kim, Do Yoon

Spring 2025

Machine Learning and Artificial Intelligence won't replace managers in the near term, but managers who use ML and AI well will replace those who don't. Organizations now have too much data and insufficient time for managers to consume data only in spreadsheets. Instead, the future of work involves managers designing models that, for example, segment customers, forecast sales, schedule preventative maintenance, or predict markets. This course addresses both the technical and managerial aspects of these applications. Technically, students use Python to create, evaluate, and tune multiple practical models (e.g., classifiers, trees, neural networks) in supervised and unsupervised machine learning contexts. Managerially, this course examines how organizations create value through AI applications.

Sports Analytics

Neale, John J

Spring 2025

This course will introduce you to the field of sports analytics. We will apply quantitative methods from statistics and management science in a sports context. Our focus will be on-field analysis including player and team evaluation and game strategy. We will cover baseball, football, and basketball in depth with occasional references to other sports. We will also discuss concepts from behavioral economics and psychology that help explain the actions of players, coaches, and referees.

Credits: 3

Room and Schedule: Fulton Hall 150 Tu 04:30PM-06:50PM

Satisfies Core Requirement: None

Prerequisites: A previous course in statistics (BZAN1135 OR BZAN1137), management science (BZAN2235 or BZAN6604), and Excel (BZAN1037 or ISYS1021) plus familiarity with the rules of baseball, football, and basketball.

Systems Analysis and Design

Sterpe, Peter J

Spring 2025

This course is required for Information Systems concentrators. The course studies information systems (IS) development including requirements, analysis, design and implementation phases and workflows. We investigate the roles of systems analysts; serving as intermediaries between users, managers, and implementers; and helping each to understand the needs and problems of others. The student will learn about major methods and tools used in the systems development process. Please note that Database Systems and Applications (BZAN3257/CSCI1157) must be completed prior to taking this course. This course was formerly numbered: ISYS4258.

BZAN660401

Management Science

Neale, John J

Spring 2025

This course provides an overview of the concepts and methods of management science. Sometimes referred to as prescriptive analytics or decision analytics, management science is a subset of the larger field of business analytics and focuses on the use of math models to make better business decisions. The primary goal of the course is to help you become a more skilled builder and consumer of models. The course will show you how to use Excel spreadsheets effectively for business analysis and introduce you to some of the more important analytic methods including optimization and simulation. These methods will be applied to problems arising in a variety of functional areas including operations, finance, and marketing.STEM-designated.

Credits: 3

Room and Schedule: Fulton Hall 150 W 01:30PM-04:00PM

Satisfies Core Requirement: None

Prerequisites: A previous course in statistics and familiarity with Excel.

Forecasting for Business Analytics

Ulusoy, Veysel

Spring 2025

The theory and practice of applied time series analysis will be explored. First the different segments (trend, seasonality, cyclical, and irregular) of a time series will be analyzed by examining the Autocorrelation functions (ACF) and Partial Autocorrelation functions (PACF). The various types of time series models include linear regression, panel regression, seasonal decomposition, exponential smoothing, and ARIMA modeling as well as combining models. In short, this course will equip you with tools necessary to construct forecasts to inform business decisions. As such, the focus of the course will not be only on tools, but also on how they are used in business. STEM-designated

BZAN665502

Introduction to Blockchain and its Business Applications

Evenchik, Leonard N

Spring 2025

The objective of this course is to introduce the business of blockchain--a technology that has the potential to drastically alter the way value is stored, exchanged, shared, and distributed. It is the backbone of the next iteration of the Internet: Web 3.0 or The Internet of Value. This course does not require any technical knowledge or prior knowledge of the subject, and is designed to give students a foundational knowledge of blockchain technology and a familiarity with the basic principles that govern blockchain protocols. Students will obtain a fluency in the terms and concepts required to understand how this powerful technology works. Most importantly, students will study real-world applications of the technology, which range far beyond blockchain's original use case (cryptocurrency) and hear from a number of influential guest speakers who are using or investing in blockchain technology at their companies today. Students who complete the course will understand blockchain and cryptocurrency's game-changing potential, be able to separate fact from hype, and be effective leaders in the space.STEM-designated. BZAN770002

Operations Management

Parker, Delvon B

Spring 2025

Operations, like accounting, finance and marketing, is one of the primary functions of every organization. Operations managers transform human, physical and technical resources into goods and services. Hence, it is vital that every organization manage this resource conversion effectively and efficiently. How effectively this is accomplished depends upon the linkages between operating decisions and top management (strategic) decisions. The focus of the course is decision-making at the operating level of the firm, converting broad policy directives into specific actions within the organization. Strong emphasis will be placed on the development and use of quantitative models to assist in decision making. STEM-Designated

Managerial Statistics

Boardman Liu, Linda

Spring 2025

This course teaches the tools and techniques of statistics most commonly used in business. The major topic areas include: populations, random variables, distributions, and sampling; parameter estimation; hypothesis testing; and simple and multiple regression. All topics are taught by application to actual business problems using original data. The course provides the tools students will need for their functional courses, such as finance and marketing, as well as for core courses in business analytics.STEM-designated

Data Analytics 1: Model Building

VanderWerf, Pieter A

Spring 2025

Machine Learning, big data, data mining, predictive analytics. These are what the course covers. They consist of the creation and use of mathematical computer models to predict important quantities and events with uncanny accuracy. As one book put it, "Who clicks, who buys, and who dies." The course teaches both the principles and the details of the major methods of making and applying these models to actual business problems. To produce models on the computer, students also learn the R coding language. This is the preferred high-level software for Machine Learning and statistical applications.STEM-designated

Data Analytics 2: Data Management for Analytics

Evenchik, Leonard N

Spring 2025

Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology. The on-campus section of this course (BZAN7707) will meet weekly on campus. Please note that the online asynchronous section of this course will also include two or three synchronous web conferences during the semester. Please review the course syllabus for the schedule for these web conferences, or contact the instructor. STEM-designated This course was formerly numbered: ISYS7700

Data Analytics 3: In Practice

Beebe, Jonathan R

Spring 2025

Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models. Coding for Business

Sterpe, Peter J

Spring 2025

This is an introductory course in computer programming based on Python (a language suitable for all business and analytics programs). The course emphasizes coding literacy and teaches coding skills that are relevant for business decision makers. MBA DA3 is a prerequisite. This course will give students the knowledge and confidence to apply coding to a business problem, and the ability to go from a problem statement to a repeatable set of steps for solving the problem in a general way. It will enable students who might not code professionally to work effectively with colleagues who do, and it will equip interested students to develop significant programs of their own.STEM-designated.

Managing Projects

Chirkova, Aza

Spring 2025

This course takes a holistic approach to planning, organizing, and controlling projects. It looks at how projects are uniquely suited to support an organization's strategy in a fast-paced business environment. Topics include project life cycle, algorithms and statistical concepts underlying network planning models, managing risk and resource allocation. It emphasizes the use of effective interpersonal and communication skills to organize, plan, and control the project team.

BZAN806701

Machine Learning & Artificial Intelligence

VanderWerf, Pieter A

Spring 2025

This course builds on Data Analytics 1 to provide students with advanced tools and skills for Machine learning (ML) in business practice. On the technical side, the course content extends to a wider range of algorithms as well as advanced methods for data sampling and model building and evaluation. More depth in application comes from student reports on current events in Machine Learning, and a course project that involves complete model construction and analysis for an actual business problem with an actual corporate data set. The course assumes the student has experience with the basic machine learning algorithms and the R coding language. STEM-designated.

BZAN816501

Intro to Programming using Swift for iOS App Development

Gallaugh, John M

Spring 2025

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). The course assumes no programming background, but students with some experience will likely have an easier time. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course was formerly numbered: ISYS2160.

Physical Computing - Interactive Art, Robotics, and Tech for Good

Gallaugh, John M

Spring 2025

Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates. This course was formerly numbered: ISYS2170.

Real Estate Fundamentals

Chazen, Edward

Fall 2024

This is as an introduction to the real estate industry, looking at it from multiple perspectives. Through lectures, case studies and guests speakers, we will explore the largest asset class in the world. We will learn industry terminology and how leases create property cash flow; how design and market research influences projects; how tenants make leasing decisions; and the role of the public sector and the community in approval and financing - often to advance public purposes - and the tension between the private developer and public sector; we will study affordable, low income and senior housing.

Introduction to Real Estate Law

Cella, Teresa L

Fall 2024

This course is an introduction to commercial real estate law. The course examines the process inherent in real estate transactions from a legal and functional viewpoint. It covers issues relating to acquisitions, dispositions, ownership, financing, and leasing of commercial properties. The course also examines the legal aspects of relationships involved in real estate transactions, including those between buyers and sellers, landlords and tenants, and borrowers and lenders. The course will follow a property acquisition and financing from the letter of intent stage through closing with an emphasis on the most commonly negotiated aspects of a purchase and sale agreement, the due diligence process (including an examination of title, survey, and zoning matters as well as lease review), real estate financing, and closing logistics. Taking a hands-on approach and with expertise shared by guest speakers, students will gain insight into how commercial real estate transactions come together.

Topics: Law and Economics

Wesner, Thomas L

Fall 2024

Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

The State of Affordable Housing in the States

Price, David W

Fall 2024

Course offered for Sophomores only.. How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

Real Estate Colloquium

McCullagh, Neil P;Perkins, Taylor A

Fall 2024

Real Estate Colloquium provides an overview of the field of Real Estate. Each session welcomes one or more Real Estate professionals to present on finance, investment, law, planning, and public policy. Real Estate Colloquium will offer insight into diverse topics such as Real Estate Investment Trusts (REITs), capital markets, leasing, brokerage, and development. Representatives from across the industry will lecture and provide a comprehensive view of the intricate world of Real Estate and the multiple disciplines that contribute to the industry. This course will give students an immersive experience beyond theoretical concepts and a view into the fundamentals of many different topics and career paths. The class meets once per week across the semester, and students must attend seven of fourteen sessions and host at least one session in partnership with a classmate.

Urban Design for Complexity and Sustainability

Littell, Matthew

Fall 2024

The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

Urban Action Lab

Perkins, Taylor A

Fall 2024

Urban Action Lab is a semester long class that provides students with first hand experience within the field of real estate and urban action, working on projects that advance affordable housing and access to opportunity. Students pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies and fellow students. The class will meet once per week and will occasionally require students to attend meetings off-campus.

Real Estate Transactions

Chazen, Edward;Herlihy, Joseph, Esq.

Fall 2024

Real Estate Transactions, is a new course that will examine real estate deals through a practitioner perspective that integrates the business and legal aspects of acquiring land and buildings; designing, developing and constructing buildings; financing and loan workouts; leasing and landlord/tenant rights; managing, operating and selling income property. The course will look at each step of the process in consummating a real estate transaction and the role of various parties - property owner; bank or other lender; investor and buyer of tax credits; tenant; attorneys for different parties; city agency; architect; general contractor and others integral to the success (or failure) of the transaction. The course will be team-taught by a CSOM business and law professor, each with many years of teaching and practical experience negotiating, documenting and closing real estate transactions. The format of the course will include lectures, many case studies, simulations of negotiating transactions and selected guest speakers to supplement the course work with real world experiences. The primary student learning goals are to understand the complexity of business and legal issues in a real estate transaction; how to document key aspects in term sheets, letters of intent and other steps in the process; and, develop sound and effective negotiating skills.

Community Development & the Evolution of Place-Making

Bennett, Kate

Fall 2024

What goes into neighborhood transformation? Community Development & the Evolution of Place-Making, immerses students in the multifaceted challenges of community development covering topics such as community mobilization, equity, organizing, sustainable development, and community empowerment. In Community Development & the Evolution of Place-Making, students explore positive social change by engaging with large-scale transformational housing projects. Through lectures, site visits, and case studies, students will see transformational projects and learn from a renowned expert in community transformation. The class emphasizes collaboration, cultural sensitivity, and involving community members in decision-making to ensure the development initiatives are contextually relevant and sustainable. Community Development & the Evolution of Place-Making is a gateway for students to develop knowledge and further explore community development related to community engagement, public policy, and real estate.

Law for the Entrepreneur

Kaiser, Emily Andrea

Fall 2024

An elective built to explore legal questions and challenges faced by entrepreneurs and those supporting the success of entrepreneurs. Structured as an experiential and collaborative course, students will have the opportunity to explore legal issues presented throughout a company lifestyle. Starting with the inception of an idea, students will survey the considerations and processes required for forming an entity, protecting intellectual property, structuring incentive compensation for founders and employees, drafting agreements for service providers, vendors and customers, and preparing for an investment round. With the assistance of guest speakers and evaluation of case studies, students will have the chance to inquire about and access industry-specific considerations. The final project will consist of a mock conversation with interested investors, requiring the delivery of due diligence of the company, a snapshot of the companies pre- and post-round capitalization, and a presentation of the expected use for the financing. Final assessment will place heavy weight on class participation and group work.

Chazen, Edward

Spring 2025

This course employs various teaching and learning methods: class lectures; videos of interviews with experts and about illustrative projects; case study discussion; guest lectures; team-based virtual tours of Boston neighborhoods that have been transformed by large-scale real estate development; and, a capstone project of teams preparing a development plan for an actual site in the Boston areas.. This course is focused on what real estate development is and what it means to be a real estate developer. Students will gain an understanding of the process of real estate development, including design and construction; how developers engage with the public sector and the surrounding community to obtain approval for a development; how projects are financed; and, other important elements that contribute to completing successful real estate projects. Also learn about the legal aspects of developments; the ways that development is a catalyst for neighborhood improvement and local economic growth; and, trends in sustainable development.

International Law

Scheufele, Ashly E

Spring 2025

The goal of this course is to provide students with an overview of how international law impacts global commerce. We start the semester by examining how companies do business globally and comparing aspects of foreign legal systems. Next, we work to answer the questions: what is international law, where does it come from, and how does it interact with national law? We study specific topics in international law relevant to global companies, including efforts to establish uniform rules for international contracting, methods for resolving international commercial disputes, cross-border investment protections and trade agreements, and corruption. Finally, we take an in-depth look at real world applications of international legal principles using case studies from around the world. Case topics will range from the legal fallout from industrial disasters to the consequences of bribing foreign officials to the regulation of international sports. By the end of the semester, students will be able to recognize legal problems in the context of global business and will feel comfortable applying appropriate principles of international and national law to move towards a solution. There are no prerequisites.

Labor and Employment Law

Hendler, Elizabeth S

Spring 2025

Considerations pertaining to organized labor in society are examined including the process of establishing collective bargaining, representation, and bargaining status under the Railway Labor Act and the National Labor Relations Act. Discussion of leading cases relevant to the legal controls that are applicable to intra-union relationships and the legal limitations on employer and union economic pressures. The law of arbitration, public sector collective bargaining, and employee safety and health law are studied. Topics including laws prohibiting discrimination based on race, color, religion, gender, national origin, age, and disability are examined, as well as the developing law of employee privacy.

Securities Regulation

Spooner, Rachel S

Spring 2025

Securities Regulation is the study of how the government regulates financial markets and their participants, whether a start-up seeking capital through a Kickstarter campaign, a multi-national public company disclosing news to its shareholders, or an investment banker advising a company in its IPO. The course focuses upon the key federal statutes that regulate securities and participants in the securities markets: Securities Act of 1933, Securities Exchange Act of 1934, Sarbanes-Oxley, Dodd-Frank Act of 2010, Foreign Corrupt Practices Act, and several criminal statutes. The students learn the role of the Securities and Exchange Commission and how the SEC will impact securities markets and their participants. The course covers the multitude of methods for raising capital within the confines of the Securities Act and the J.O.B.S. Act. Students learn how executives of public companies, and their auditors, lawyers, and bankers, decide when and how to make disclosures about the company. The course also examines financial scams and fraud, considering the ethical boundaries of the complex, fast-paced financial world. The class hosts guests ranging from SEC enforcement attorneys, to in-house counsel at a large bank, to defense counsel with specialties in insider trading and white-collar crime, Foreign Corrupt Practices Act, and the Bernie Madoff case. The class is intended for students interested in careers in finance, audit, leadership in public companies, or law.

BSLW118501**Topics: Law and Economics****Wesner, Thomas L****Spring 2025**

Can we be optimistic about our future as phrases such as "new normal" and "austerity measures" take hold of our national psyche? Is there reason for hope after the Great Recession has substantially altered the global economic landscape? Through this course, students will utilize an interdisciplinary approach to understanding important legal, business, and economic issues they will soon be called to address as leaders, policymakers, businesspersons, and citizens. Over the course of the semester, students will work to create politically and economically viable solutions to many of the most critical legal, economic, and policy issues facing our nation and world.

Real Estate Development in Practice is a focused, one-credit course designed to give students a practical understanding of real estate development. This course delves into the critical stages of development, from site selection and due diligence to project completion, ensuring students grasp the intricacies of bringing a real estate project to fruition. Emphasizing market analysis, the course provides students with exposure to the evaluation of market dynamics, trends, and economic factors that influence development decisions. Financial analysis is a core component, where students see how financial models, cash flow analysis, and investment potential are analyzed. Additionally, the course offers an in-depth exploration of local market knowledge, helping students understand specific regions' unique characteristics and regulatory environment. Real Estate Development in Practice is a gateway for students to develop knowledge and interest in development and is a springboard to other Real Estate Classes.

Real Estate Colloquium II

Perkins, Taylor A

Spring 2025

Real Estate Colloquium II - Innovation Field Study provides first-hand experience touring innovative projects, buildings, neighborhoods, and factories that define real estate's future. The course will explore critical debates within the industry by exploring the city and region with leaders and professionals working to change the face of our cities and communities. Students will explore how innovation strives to meet contemporary challenges. Topics will include office-to-residential conversion, retail and revitalization, climate crisis mitigation, modular construction, and infrastructure. This course offers students an immersive experience beyond theoretical concepts and a view into the fundamentals of many different topics and career paths. The course will feature six 3-hour field visits, with each student attending three. Field visits will include an orientation lecture, a group debrief, discussion, and reflection. Students will attend an opening and closing lecture in person at Boston College. They will also be required to submit written reflections after each field visit, and a final paper. The Corcoran Center will provide transportation to each field visit via minibus.

Urban Action Lab

Frechette, Edward K;McCullagh, Neil P

Spring 2025

Urban Action Lab is a semester long class that provides students with first hand experience within the field of real estate and urban action, working on projects that advance affordable housing and access to opportunity. Students pursue research projects in partnership with mission driven organizations from across the City of Boston. Each project is completed in collaboration with a partner organization and are selected based on their potential for high-impact contribution to the organization. Project components include research, evaluation, interviewing, and writing. Students will work in close collaboration with partner agencies and fellow students. The class will meet once per week and will occasionally require students to attend meetings off-campus.

Real Estate Field Projects

Chazen, Edward

Spring 2025

Each team will work under the supervision of the Instructor, with weekly team meetings to review the work plan, progress toward identified goals and practicing several presentations that form an important part of the learning experience. There will be three field projects planned. This course is a complement to in-class learning and provides an experiential learning component to the real estate education at CSOM. The course consists of teams of 4-5 students each working on a field project for a real estate/developer investor, not-for-profit organization or government agency. The field projects are "real world" real estate projects that involve extensive data collection/analysis, interviews with a range of experts and others that can influence the conclusions and recommendations of the team, and presentations to management of the sponsoring organization. The field projects typically include development proposals for a property; re-development plans for an existing property; and, real estate market research to assist an investor considering expansion into new geographic markets.

Real Estate Case Competitions

Pereira, Thomas A

Spring 2025

This course is for students interested in learning how to better prepare for real estate case competitions, with a particular focus on development, finance, and affordable housing. The course will meet weekly for seventy-five minutes to develop skills in the following areas: effectively analyzing a real estate development case, analyzing market conditions, crafting a proposal and slide deck, and preparing for judges' questions. This 10-week course will culminate with students submitting proposals in the Corcoran Center Case Competition, a national real estate competition sponsored by Boston College's Joseph E. Corcoran Center for Real Estate and Urban Action.

Our Regulated Health Care Industry

Abelman, David

Spring 2025

The U.S Health Care system (or some would argue the lack thereof) often dominates the political, legal, and social policy discussion space. This course is intended to provide a survey-style baseline for educated participation in the discussions and perhaps, ultimately, active participation in the industry solutions going forward. After reviewing the historical context - how did we get here - this course will delve into the current structure of the healthcare services industry and how the legal system has helped shape that structure. Thematically, we will examine equity in access to care, industry efficiency, and quality of care. Across these themes, where has the market failed, and what have legal system players and other market constituents done to address the failures? Topics will include the advent and growth of managed care; provider organization structures; Affordable Care Act and health care reform efforts and concepts; the triple aim of improved patient experience and much more.

Essential Business Communication

Stefanakos, Evangelia

Spring 2025

Essential Business Communication is a one-credit asynchronous course designed to support sophomores (and second-semester first-year students) transitioning from academic to business writing and preparing them for on-the-job communication. Students learn how to boost their business writing and presentation skills through various activities, including analyzing audiences, writing everyday business communication, collaborating, and presenting. Instructors and writing coaches provide individualized feedback to students in this online environment. The course is graded pass/fail. The course will be offered in one five-week term within a semester.

Business Writing and Communication Skills for Managers

Owens, Rita R

Spring 2025

Restricted to CSOM and GCSOM The course focuses on the types of communication done on the job, especially in corporations. Business assignments are used to illustrate appropriate writing and communication strategies, protocols, styles, and formats. Students work alone and in collaboration with others around various assignments and tools, including traditional reports, emails, chats, social media, and presentations. By the end of the semester, students will be proficient in producing business letters, instructions, reports, proposals, resumes, and presentation materials. NOTE:Students will not earn credit for both ACCT8810 and BCOM6688.

Public Speaking

Schwartz, Stacy M

Spring 2025

This course provides an introduction to basic concepts, theories, and principles of oral communications through the mode of public/in class speech performances. You will gain practical experience in exploring, discovering, and arranging ideas, using evidence and research to support claims, preparing organized outlines, and composing speeches while broadening your view of theoretical considerations in communications. This is an oral presentation class. Each student will present varied styles of public speaking to his/her peers. Our class will also include lectures, discussions, video analysis, and oral exercises to alleviate speech anxiety.

Individual Directed Study

Sadka, Ronnie

Summer 2024

This is an opportunity for students interested in independent study to engage in a one-to-one relationship with a faculty member of the Finance Department. This course is only available to students who have demonstrated (1) an extremely strong interest in a particular area of finance, and (2) a strong self-motivation and self-discipline in previous studies. Students are required to present their research results to a departmental faculty group towards the end of the semester. The permission of the department chairperson is to be obtained when the individual faculty member has agreed to direct the student's research project.

Introduction to the Investment Banking Industry

Cramer, Robert E

Summer 2024

This course provides an overview of investment banking. We will study the investment banking industry with a specific focus on the role of investment bankers in capital markets and recent regulatory changes. Provide both an institutional perspective on the investment banking industry and an opportunity to apply financial theories and models. Some of the specific topics that we will cover are stock underwriting and valuation, fixed-income securities underwriting, including junk bonds, asset securitization, merchant banking and private equity firms, money management and mutual funds, structuring deals, including mergers, acquisitions, and divestitures, global financial markets, securities regulations, and ethics.

Financial Policy

Holmes, Mansfield J**Summer 2024**

This course applies financial theories, techniques, and models to the study of corporate financial decisions. Aspects of corporate strategy, industry structure, and the functioning of capital markets are also addressed. Students are required to study an actual firm from the perspective of concepts and models developed in the course and present the study to the class.

Credits: 3**Room and Schedule:** 245 Beacon Street Room 229 MW 06:30PM-09:30PM**Satisfies Core Requirement:** None**Prerequisites:** MFIN8807 and MFIN8801**Corequisites:** None**Cross-listed with:** None**Frequency:** Every Fall,Every Spring,Every Summer**Student Level:** Graduate**Comments:** None**Status:** Offered**MFIN882001****Management of Financial Institutions****James, Robert F****Summer 2024**

This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

MFIN885001**Global Macro and the Financial System****Loh, Marvin****Summer 2024**

The course is designed for graduate students with interests in applied finance, economics, and history - especially students who are planning to work in financial markets, financial policy, or economic or financial research. Students should have an interest in current issues in international finance and policy, and enjoy empirical approaches - but no advanced quantitative background is required. This course focuses on a long-run view of the international financial system: we place the post-2008, post-pandemic financial environment in global macro, in asset markets, and in the banking system into very long-run context in order to assess current secular trends in markets and the macroeconomy, including trends and "cycles" in inflation, growth, asset valuations, and financial crises. Students will first be introduced to the general contours of the international financial system up to 2022 - before turning to the major trends in banking and sovereign crises, monetary policy, asset pricing, and globalization. We put specific emphasis on discussing international financial themes that currently occupy policymakers, practitioners, and academics in a global "high inflation, low interest rate regime", in the context of longer-run historical markets data. We also analyze a wide range of past "shocks" and "crises" in global macro and finance over time to learn how to evaluate risks. Among other issues, we will focus on the following current debates: 1914, 1981 - and 2022? Major turning points in asset markets. Long-run financial crisis patterns and interventions. Historical shifts in the global reserve currency. Long-run trends in inequality, globalization, and wealth distribution. STEM-designated (Students can only receive credit for either MFIN8850 or MFIN8855 - not both)

Credits: 3**Room and Schedule:** 245 Beacon Street Room 229 TuTh 06:30PM-09:30PM**Satisfies Core Requirement:** None**Prerequisites:** MFIN8801**Corequisites:** None**Cross-listed with:** None**Frequency:** null**Student Level:** Graduate**Comments:** None**Status:** Offered

MFIN886901**Fundamental Analysis****Argyrole, Christopher****Summer 2024**

This course will focus on cash-flow oriented models of the valuation of the firm. Wall Street-style analytical techniques will be utilized, including the production of quarterly earnings forecasts and the development of buy/sell/hold recommendations. Topics include enterprise value, free cash flow, economic value added, risk/reward analysis, and the art of the management interview. CGSOM students can earn credit for either MFIN6665 or MFIN8869, not both.

Corporate Financial Strategies

Hotchkiss, Edith

Fall 2024

This course examines how corporate financial managers create value for stakeholders through a broad range of financial transactions. We will first take an in-depth look at corporate valuation methodologies from both a theoretical and applied perspective. Then, using a combination of case studies, class presentations, and assigned readings, we will focus on applications of these methods in the context of various types of corporate restructurings. Specific applications will include capital structure and financing decisions, M&A and other asset restructuring decisions, and more complex financial transactions including buyouts and distressed restructurings.

Real Estate Finance

Chazen, Edward

Fall 2024

This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

Global Financial Markets

Basta, Karim M

Fall 2024

The focus of this course is on the fundamental drivers, functioning and inter-connectedness of global financial markets. Products covered will be interest rate markets (government bonds, money markets, swaps, interest rate derivatives, credit markets), equity indices, and foreign exchange markets. Tickers flash across TV screens detailing every move in interest rates, currencies and equity markets. Why do some events move markets sometimes and not at other times? What just happened in UK markets? We will explore the role of economic data, flow of funds analysis, central bank policy, and fiscal and other government policies from a macro perspective in assessing these questions. We will learn from historical episodes that still shape market structures and behavior today. We will approach these topics from a practitioner's perspective and two or three active portfolio managers will be guest lecturers over the course of the semester. Learning will be via a combination of classroom, reading research papers, and observing markets in real time. There will be weekly homework assignments related to required reading that include current events. A team based project and a mid-term project will tie together subjects covered to that point in the course. Discussions of the current market environment will take place over the period of the course, with the final project requiring each student to formulate and present an investment outlook that ties together the various disciplines learned over the semester. A curious and open mind are helpful attributes for students wishing to take this course.

Applied Fundamental Analysis

Navaratnam, Arvind

Fall 2024

The objective of the course is to provide hands-on experience in financial statement analysis in a real-world setting. Students will be exposed to general tools of financial analysis, theoretical concepts, and practical valuation issues. By the end of the course, students should develop a framework for evaluating an investment opportunity by using a firm's financial statements to draw an understanding of their performance and provide a basis for making reasonable valuation estimates, as well as have an understanding of the challenges investor face in determining the earnings power of a company. CGSOM students can earn credit for either MFIN6665 or MFIN8869, not both.

Renewable Energy and Sustainable Investments

Adamson, Seabron C;Raikar, Santosh G

Fall 2024

In this course we will examine how large scale renewable energy projects actually get financed and built, using the structures of modern non-recourse project finance. We will examine the economics of large-scale green power production, and how it fits into the U.S. and global energy industries. Through a mixture of lectures and real-life examples students will get to see how renewable energy project finance works in actual deals that mix finance, public policy, legal, engineering, and environmental issues. The skills developed in analyzing non-recourse cash flow-based finance will be generally applicable to students interested not just in green energy, but also more widely in private equity and infrastructure investing. The course is designed to introduce students to the theory and practice of project finance in the energy and renewables sector, complementing academic finance theory with the practical aspects of financing capital intensive energy projects.

Bogousslavsky, Vincent

Fall 2024

In a competitive market, investors allocate funds among financial securities in response to perceived values and subjective attitudes toward risk. This course addresses the issues that seem to determine the relative values of financial instruments and the techniques available to assist the investor in making risk/return tradeoff.

Management of Financial Institutions

James, Robert F

Fall 2024

This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

Corporate Valuation and Restructure

Hotchkiss, Edith

Fall 2024

This course exposes students to a broad range of financial restructuring techniques that can be applied to improve business performance. Case discussion and visitors are used to illustrate how various corporate restructuring approaches can be used to increase firm value and to highlight characteristics of potential candidates for different restructuring techniques. The case analysis provides opportunity to practice the application of standard corporate valuation methods.

AIM1: Applied Investment Management

Martens, David J

Fall 2024

This course provides an opportunity for students to utilize both theoretical and practical aspects of the investment management process by competing to actively manage a million dollar portfolio for the University. AIM1 teaches students about institutional portfolio management, asset allocation, risk assessment, investment manager evaluation, and fundamental equity analysis. Students are placed in investment teams to respond to a Request for Proposal (RFP) in which they develop a framework for identifying and evaluating equities and bonds and managing a diversified risk-adjusted portfolio. Winning teams will be selected based on final presentations to a board of professional institutional investors and given the opportunity to manage live accounts in AIM2 during the spring semester.

Global Financial Markets

Basta, Karim M

Fall 2024

The focus of this course is on the fundamental drivers, functioning and inter-connectedness of global financial markets. Products covered will be interest rate markets (government bonds, money markets, swaps, interest rate derivatives, credit markets), equity indices, and foreign exchange markets. Tickers flash across TV screens detailing every move in interest rates, currencies and equity markets. Why do some events move markets sometimes and not at other times? What just happened in UK markets? We will explore the role of economic data, flow of funds analysis, central bank policy, and fiscal and other government policies from a macro perspective in assessing these questions. We will learn from historical episodes that still shape market structures and behavior today. We will approach these topics from a practitioner's perspective and two or three active portfolio managers will be guest lecturers over the course of the semester. Learning will be via a combination of classroom, reading research papers, and observing markets in real time. There will be weekly homework assignments related to required reading that include current events. A team based project and a mid-term project will tie together subjects covered to that point in the course. Discussions of the current market environment will take place over the period of the course, with the final project requiring each student to formulate and present an investment outlook that ties together the various disciplines learned over the semester. A curious and open mind are helpful attributes for students wishing to take this course.

Ph.D. Seminar: Empirical Asset Pricing

Balduzzi, Pierluigi

Fall 2024

This course is for second year Ph.D. students of finance. The course is intended to generate enthusiastic, high quality intellectual activity around the course material. Focuses on the development of skills that will help students become conversant enough with basic theory and the current literature on asset pricing that would permit them to read critically and analyze papers in this area, develop enough expertise in selected empirical methods in finance that they will be able to use these techniques in their research, and to find potential thesis topics.

Derivatives and Risk Management

Jiang, Cheng

Spring 2025

This course is an introduction to derivative assets such as futures, forwards, swaps, and options, financial engineering, risk management, and mortgage and credit derivatives. We will cover the pricing of these derivative assets as well as securities that contain embedded options. We will consider risk management strategies such as static and dynamic hedging. Applications will be considered from equity, commodity, bond, and mortgage-backed markets.

Real Estate Finance

Chazen, Edward

Spring 2025

This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

Global Macro and the Financial System

Schmelzing, Paul

Spring 2025

The course is designed for both undergraduate and graduate students with interests in applied finance, economics, and history - especially students who are planning to work in financial markets, financial policy, or economic or financial research. Students should have an interest in current issues in international finance and policy, and enjoy empirical approaches - but no advanced quantitative background is required. This course focuses on a long-run view of the international financial system: we place the post-2008, post-pandemic financial environment in global macro, in asset markets, and in the banking system into very long-run context, in order to assess current secular trends in markets and the macroeconomy, including trends and "cycles" in inflation, growth, asset valuations, and financial crises. Students will first be introduced to the general contours of the international financial system up to 2022 - before turning to the major trends in banking and sovereign crises, monetary policy, asset pricing, and globalization. We put specific emphasis on discussing international financial themes that currently occupy policymakers, practitioners, and academics in a global "high inflation, low interest rate regime", in the context of longer-run historical markets data. We also analyze a wide range of past "shocks" and "crises" in global macro and finance over time, to learn how to evaluate risks. Among other issues, we will focus on the following current debates: 1914, 1981 - and 2022? Major turning points in asset markets. Long-run financial crisis patterns and interventions. Historical shifts in the global reserve currency. Long-run trends in inequality, globalization, and wealth distribution.

Active Portfolio Management

Leombroni, Matteo

Spring 2025

The course provides an introduction to portfolio management with focus on quantitative investment process and methods. The course balances theoretical foundations with practical applications. Primary topics include asset allocation, portfolio construction including optimization, risk modeling, and risk measurement and management. Instruction will combine lectures, case discussions, and workshops, providing opportunities for students to apply quantitative methods to real world problems in several of the explored areas. The course combines investment ideas with analytics, so prior study in any or all of the following areas will make the course more enjoyable: probability/statistics (e.g., normal distributions, regression analysis), linear algebra (e.g., matrix algebra), and introductory calculus (e.g., derivatives). In addition, workshops will include use of both Microsoft Excel and Python (e.g., Jupyter Notebooks). Basic competency in each is a minimum requirement, and of course, the greater your skills, the better.

Behavioral Finance

Hartzmark, Samuel

Spring 2025

This course explores how the market is influenced by the behavior of investors, attributable to psychology or institutional constraints. We will survey recent research on possible mispricing in these markets, investor behavior, the predictability of security returns, and the practical limits to arbitrage. Possible topics include earnings and price momentum, market anomalies, tactical asset allocation, under-reaction to news, security complexity and obfuscation, and socially responsible investing. Practical implications for portfolio management are developed and emphasis will be placed on data-driven analysis of financial markets. The course has 3 major goals. The first will be to take the view of a professional money manager to utilize knowledge of investor behavior to understand market movements and (hopefully) profit from opportunities that are available. The second will be to understand how data is used to uncover such opportunities. The third is to understand how individuals make decisions in order to make better personal investment decisions and avoid commonly exhibited biases when making financial decisions. Achieving these goals will require learning some theories, facts and statistical tools. The theories will allow for a common language in the discussion of returns and will include risk-based asset pricing, present value relations and cognitive psychology. The facts relate to risk and return, value vs. growth, momentum, market frictions and trading costs. Support for both of these will come from the data for which we will need the tools of portfolio analysis, multifactor models and forecasting regressions.

MFIN662501**Private Equity****Gasperoni, James H****Spring 2025**

This course is the study of Private Equity as an asset class and its various components. Private Equity involves the investment of capital into companies and assets that are not publicly traded on stock exchanges. The objective of the course is to provide a basic understanding of the Private Equity ecosystem: private equity companies, underlying investments in companies (or assets) and the investors that provide financing for deals. A primary focus of the class will be traditional buyout investments: an area of the capital markets that is growing in both size and opportunity as well as increasing in interest from investors. In addition, the course will consider the similarities and differences between typical buyouts and other private equity styles.

Quantitative Portfolio Management

Leombroni, Matteo

Spring 2025

This course provides a detailed introduction to quantitative portfolio management techniques. After a review of basic investment theory and statistical methods, we will concentrate our class discussion on the following issues: mean-variance portfolio construction methods in theory and in practice and the role for active quantitative portfolio managementSTEM-designated

MFIN880501**Digital Self-Defense with Python****Romer, Paul M****Spring 2025**

How to think like an economist about digital security. How do individuals make choices? What is the difference between private and social cost? How can naive reasoning about incentives backfire for an organization that tries to reconcile differences between private and social cost (for the organization)? For both individuals and groups, how to recognize the difference between moving to the efficiency frontier versus making tradeoffs along the frontier. What options does the government have to better protect citizens? **PREREQUISITE:** An introductory course or equivalent knowledge of Python.

Management of Financial Institutions

James, Robert F

Spring 2025

This course considers banks and other financial institutions as information and deal-making entities. This broad perspective is used to explain how and why changing information and contracting technologies are altering the structure of the financial services industry and financial regulation. Lectures explore the implications of these ongoing changes for the methods financial institution executives should use to measure and manage an institution's risk and return.

AIM2: Applied Portfolio Management

Martens, David J

Spring 2025

Students in AIM2 will actively manage a million dollar portfolio for the University during the spring semester. Teams will implement strategies that they formulated during the fall semester. Students are expected to fundamentally analyze stocks, develop buy/sell recommendations, and monitor company news that may result in material changes to target prices. This hands-on learning builds competency in the areas of portfolio management, investment research, sales and marketing, back-office operations, portfolio accounting, custody platforms, trading, and settlement procedures.

Real Estate Finance

Hurley, John F

Spring 2025

This course focuses on how capital is applied to debt and equity financing of income-producing real estate. The course content covers private debt and equity and public securities markets for real estate finance. The course format includes lectures, case study discussions, financial modeling exercises, guest speakers, REIT stock analysis, discussion of selected readings and simulation of negotiations. The course covers real estate finance from the perspective of the users of capital (developers and property owners) and the sources of capital (lenders and equity investors). The primary student outcomes are the ability to value commercial property; understand risks; how to structure a financing of commercial real estate; know the diverse sources of capital in the real estate industry and analyze, discuss and present a professional financing for debt and equity.

International Finance

Albuquerque, Rui

Spring 2025

This course introduces students to identifying and managing currency risk by providing a description of the international financial markets, their products, and applications. The course presents an overview of international money markets, bond markets, the foreign exchange spot and forward markets, and foreign exchange derivative markets. The course sets to identify nominal international risk factors that firms might be exposed to and discusses several of the recent international banking and currency crises. Students are introduced to a variety of financial tools or derivative products that can be used to hedge part or all of the exposure to these risk factors; foreign currency futures, options, forward contracts, and swaps.

MFIN885001

Global Macro and the Financial System

Schmelzing, Paul

Spring 2025

The course is designed for graduate students with interests in applied finance, economics, and history - especially students who are planning to work in financial markets, financial policy, or economic or financial research. Students should have an interest in current issues in international finance and policy, and enjoy empirical approaches - but no advanced quantitative background is required. This course focuses on a long-run view of the international financial system: we place the post-2008, post-pandemic financial environment in global macro, in asset markets, and in the banking system into very long-run context in order to assess current secular trends in markets and the macroeconomy, including trends and "cycles" in inflation, growth, asset valuations, and financial crises. Students will first be introduced to the general contours of the international financial system up to 2022 - before turning to the major trends in banking and sovereign crises, monetary policy, asset pricing, and globalization. We put specific emphasis on discussing international financial themes that currently occupy policymakers, practitioners, and academics in a global "high inflation, low interest rate regime", in the context of longer-run historical markets data. We also analyze a wide range of past "shocks" and "crises" in global macro and finance over time to learn how to evaluate risks. Among other issues, we will focus on the following current debates: 1914, 1981 - and 2022? Major turning points in asset markets. Long-run financial crisis patterns and interventions. Historical shifts in the global reserve currency. Long-run trends in inequality, globalization, and wealth distribution. STEM-designated (Students can only receive credit for either MFIN8850 or MFIN8855 - not both)

MFIN886501

Behavioral Finance

Hartzmark, Samuel

Spring 2025

This course explores how the market is influenced by the behavior of investors, attributable to psychology or institutional constraints. We will survey recent research on possible mispricing in these markets, investor behavior, the predictability of security returns, and the practical limits to arbitrage. Possible topics include earnings and price momentum, market anomalies, tactical asset allocation, under-reaction to news, security complexity and obfuscation, and socially responsible investing. Practical implications for portfolio management are developed and emphasis will be placed on data-driven analysis of financial markets. The course has 3 major goals. The first will be to take the view of a professional money manager to utilize knowledge of investor behavior to understand market movements and (hopefully) profit from opportunities that are available. The second will be to understand how data is used to uncover such opportunities. The third is to understand how individuals make decisions in order to make better personal investment decisions and avoid commonly exhibited biases when making financial decisions. Achieving these goals will require learning some theories, facts and statistical tools. The theories will allow for a common language in the discussion of returns and will include risk-based asset pricing, present value relations and cognitive psychology. The facts relate to risk and return, value vs. growth, momentum, market frictions and trading costs. Support for both of these will come from the data for which we will need the tools of portfolio analysis, multifactor models and forecasting regressions. STEM-designated

PhD Seminar: Research Topics in Behavioral Finance

Hartzmark, Samuel

Spring 2025

This PhD course will examine how psychological biases and non-standard preferences interact with traditional topics in corporate finance and asset pricing. We will survey recent research on biases in individual decision-making, the predictability of security returns, and the practical limits to arbitrage. The objective of the course is (1) to familiarize students with the foundations and recent developments of research in behavioral finance, and (2) to help students develop research ideas and quantitative skills, which can be used to write a successful PhD dissertation.

Data Analytics 2: Data Management for Analytics

Evenchik, Leonard N

Summer 2024

Information Technology (IT) and Data Analytics now permeate the strategy, structure, and operations of modern enterprises, and new business practices have led to an orders of magnitude increase in the amount of data available for analysis and decision-making. It is essential that managers develop a deep understanding of how data can be structured, captured, and queried in order to support operations, decision-making, and strategic insight. At the same time, managers must become fluent with IT so that they can promote innovative strategic initiatives that are increasingly data and IT dependent. In this course, students will develop an understanding of IT theory and practice, study key emerging technologies, and develop their ability to identify new opportunities made possible by IT. This course will also provide students with a deep understanding of data and analytics by exploring how business processes are analyzed, data is modeled (using entity relationship diagrams), databases are designed, and data is queried using SQL. This combination of theory and practice will allow students to develop their ability to identify and take advantage of the new opportunities now made possible by data analytics and Information Technology. The on-campus section of this course (ISYS7700) will meet weekly on campus. Please note that the online asynchronous section of this course will also include two or three synchronous web conferences during the semester. Please review the course syllabus for the schedule for these web conferences, or contact the instructor. STEM-designated

Data Analytics 3: In Practice

Beebe, Jonathan R

Summer 2024

Modern information systems now generate massive volumes of data. Organizations everywhere struggle to aggregate, analyze, and monetize the growing deluge of data. Business Analytics capitalizes on this data by combining statistical and quantitative analysis, explanatory and predictive modeling, and fact-based management. Managers can explore patterns, predict future trends and develop proactive, knowledge-driven decisions that affect all parts of modern organizations. This course provides students with a pragmatic familiarity with the capabilities and limitations of emerging analytics techniques, an introduction to Python, an overview of methods and tools, and a core understanding required to be an intelligent manager, designer, and consumer of analytics models.STEM-designated

TechTrek

Doyle, Jeremiah T

Fall 2024

The TechTrek course is a 1-credit professional development course that introduces students to the entrepreneurial mindset and is open to and intended for undergrads enrolled in any undergraduate program at BC (e.g. CSOM, MCAS, LSOE). An entrepreneurial mindset is a critical component for new ventures, innovation within large companies, starting social initiatives, and developing a rewarding and impactful career in an ever-changing world. The course combines 4 traditional classroom lectures with a series of meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. In the past year, students have met with senior leaders at companies like Google, Facebook, Airbnb, Uber, Salesforce, Goldman Sachs, Tesla, Dropbox, Fanatics, Twitter, numerous venture capital firms, and startups of all shapes and sizes. Course work and visits have an entrepreneurial focus, covering topics such as venture capital, entrepreneurial management, social media and platform strategies, and the social/ ethical implications of digital technologies. We spend class time reflecting on our visits with entrepreneurs, discussing what implications the visit has for our understanding of business strategy and our own careers. The class is intended to help students identify and explore their own interests and what these interests mean for their career trajectory. This class is required for students from the class of 2025 and forward who wish to co-concentrate in Entrepreneurship.

Managing Digital Innovation

Fichman, Robert

Fall 2024

The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

Managing Business in Society

Smith, Katherine V

Summer 2024

This course deals with the complexities of managing corporate sustainability and responsibility (new CSR) in today's dynamic and ever-more difficult world. Emphases include the integration of issues related to business in society, ethics, responsibility, accountability, transparency, governance, and ecological sustainability into corporate strategies and practices. We use a strategic management lens to learn the potential sources of strategic and competitive advantage that can derive from CSR, and explore some of the problems associated with poor responsibility practices.

Power and Influence

Arrowood, Rick Jay

Summer 2024

Power and Influence is a graduate level course that aims to provide students with a comprehensive understanding of the dynamics of power and influence within organizational and social contexts. The course will cover a range of theories and perspectives on power, including how power is acquired, maintained, and exercised in different settings. In addition to examining the theoretical foundations of power and influence, the course will also provide students with practical skills for analyzing and navigating power dynamics in their own lives and careers. This will include learning how to identify and challenge power imbalances, as well as how to effectively use power and influence to achieve desired outcomes.

MacDonald, John A

Summer 2024

To be competitive organizations need to drive innovation in their products and services. Organizations need to innovate rapidly and in some cases this involves reinventing the enterprise to compete in disruptive business environments. The course on Technological Innovation looks closely at the company value chain and where technology can be leveraged as a source of innovation. Company vision sets the context for the type of innovation necessary to achieve sustainable competitive growth. During the course we examine the process of building innovative capability across the company value chain, developing and implementing an innovation plan and creating the capacity for sustained innovation as a competitor or disruptor.

Management and Organization Courses: Fall 2024

MGMT102101

Organizational Behavior

Grubb, Anitza R

Fall 2024

Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students.. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Management of Human Capital and the Employee Experience

Gordon, Judith R

Fall 2024

This course addresses the challenges and opportunities organizations face in managing human capital and examines contemporary human resources issues and practices. With a focus on effective people operations and the employee experience, the course considers the selection, deployment, and management of talent in the context of globalization, a diverse workforce, increasing competition, and rapidly changing technology. Managers and employees need both an operational and strategic perspective, and they can benefit from having a toolbox of techniques that help ensure a competitive and high-performing workforce.

Leadership

Gordon, Judith R

Fall 2024

In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Managing Change

Leduc, Steven M

Fall 2024

What makes change agents effective? This course addresses this question with a focus on change leadership tools and approaches. This course helps prepare students to diagnose and implement successful change both when they are in charge and when they must work through others. Students will also understand the driving forces that organizations and consultants face in managing change and the challenges in responding to those forces. This course is designed to educate the students on the realities of change management in the workforce, provide practical application of change management strategies, engage in theoretical discussions on the subject, and provide a clearer understanding of the consultancy process as it relates to change management. Students are provided with hands-on experience in using tools and techniques involved in diagnosing and implementing change management. This course is particularly relevant for those wishing to develop their leadership and consultation capabilities.

Social Impact and Entrepreneurship

Frechette, Edward K

Fall 2024

Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

Power and Influence

Arrowood, Rick J

Fall 2024

Power and influence are crucial to understanding organizational dynamics, resolving conflict, navigating and promoting change, building cooperation, and developing professional skills in the workplace. The course aims to help students identify, diagnose, and analyze power as well as expose them to influence methods from an organizational, managerial, and professional skills perspective. The purpose of this course is to examine the different types of formal and personal power people use to influence others, explore ways power and influence are used for both good and bad, and develop students capabilities to create their own path to obtaining, managing, and sustaining power and influence.

MGMT214301

Idea Work: Making Things That Matter

Rouse, Elizabeth D

Fall 2024

Any change, innovation, or new thing begins with an idea. While one person might come up with an initial idea, the idea, and the thing it consequently turns into, has the potential to become better when built upon by other people. The purpose of this course is to learn how to effectively develop and work with ideas to innovate and enact change in the context of organizations and beyond. Building from research on organizational creativity, innovation, collaboration, and entrepreneurship, students will learn frameworks for understanding the influence of individuals, social processes, and context on creativity and innovation and apply these frameworks throughout the course. Students will practice the key skills of idea work--generating, connecting, communicating, evaluating, and reshaping ideas--so that they can make things that matter.

Entrepreneurial Management

Shaw, Douglas J

Fall 2024

This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate high uncertainty, rapid growth, ongoing change and limited resources. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analysis skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

Managerial Decision Making

Geletkanycz, Marta A

Fall 2024

The course examines decision making, one of the most prolific and consequential activities undertaken by managers, to improve students skills in exercising choice. It begins by exploring the psychology of judgment. The hidden brain, or subconscious biases and heuristics hard-wired into human cognitive processes, are examined along with pressures arising from group and broader social forces. Through hands-on exercises and case analyses, students will learn how and why decision making often goes awry, and strategies for avoiding prevalent traps. The course will also examine choice architecture. Students will learn and apply management tools and techniques that facilitate effective design of decision processes. The course is particularly apt for those seeking to enhance their decision skills and arrive at better outcomes, both personal and organizational.

MGMT217501

Thinking Strategically Integrative Strategy Simulation

Montes, Juan

Fall 2024

This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform calls "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

Credits: 3

Room and Schedule: Gasson Hall 306 Tu 12:00 Noon-02:30PM

Satisfies Core Requirement: None

Prerequisites: This course encourages interdisciplinary learning and is open to MCAS students. No prior management courses are required, but analytic skills (be fluent in Excel) are necessary to analyze markets and support decision-making in the simulation.

Globalization, Culture, and Ethics

Spinello, Richard

Fall 2024

This course helps students learn how to manage responsibly across different countries and cultures. The spread of capitalism and expansion of markets around the globe provoke challenging questions about socially responsible management. Managers must decide whether strategies and ethical principles that make sense in one culture can be applied to others. Central to the course will be the difficult choice between adapting to prevailing cultural norms or initiating a cultural/moral transformation. The course considers a number of cases set in different cultural contexts. There are selected readings about the beliefs, ideals, and values at the core of these different cultures.

Strategic Management

Montes, Juan

Fall 2024

This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Strategic Management

Potts, Jeremiah M

Fall 2024

This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

TechTrek

Doyle, Jeremiah T

Fall 2024

The TechTrek course is a 1-credit professional development course that introduces students to the entrepreneurial mindset and is open to and intended for undergrads enrolled in any undergraduate program at BC (e.g. CSOM, MCAS, LSOE). An entrepreneurial mindset is a critical component for new ventures, innovation within large companies, starting social initiatives, and developing a rewarding and impactful career in an ever-changing world. The course combines 4 traditional classroom lectures with a series of meetings with entrepreneurs, venture capitalists, and other executives throughout the semester. In the past year, students have met with senior leaders at companies like Google, Facebook, Airbnb, Uber, Salesforce, Goldman Sachs, Tesla, Dropbox, Fanatics, Twitter, numerous venture capital firms, and startups of all shapes and sizes. Course work and visits have an entrepreneurial focus, covering topics such as venture capital, entrepreneurial management, social media and platform strategies, and the social/ ethical implications of digital technologies. We spend class time reflecting on our visits with entrepreneurs, discussing what implications the visit has for our understanding of business strategy and our own careers. The class is intended to help students identify and explore their own interests and what these interests mean for their career trajectory. This class is required for students from the class of 2025 and forward who wish to co-concentrate in Entrepreneurship.

Managing Digital Innovation

Fichman, Robert

Fall 2024

The steady march of Moore's Law has accelerated the introduction of new products, processes, and business models enabled by digital technology. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. This course will provide students with the concepts and frameworks they will need to: (1) understand the nature of digital innovations and the factors affecting their emergence and diffusion, (2) identify and evaluate digital innovation opportunities (and threats), (3) manage the digital innovation process in organizations, and (4) evaluate the effects of digital innovation on business and society.

Capstone: Leadership and Mindfulness

Waddock, Sandra A

Fall 2024

Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. No matter what your major, you will participate in groups and organizations that will consistently ask or expect you to lead. The best leader is authentic, has integrity, is self- and other-aware, and acts with this awareness firmly in mind. Good leaders, that is, act mindfully with respect for the people and world around them. This course explores your development as a mindful focusing inward and outward, reflecting on where you have come from and where you are going, what type of world you want to live in, your relationships with others, and how you can be an effective leader.

Introduction to Strategic Management

Potts, Jeremiah M

Fall 2024

The course is designed to provide you with a general understanding of how firms formulate and implement strategies to create competitive advantage. Relying exclusively on the case method, it will expose you to some basic strategy concepts, which will lay the foundation for the strategic management core course that you will take later on. The cases chosen for this course will place you in diversity of managerial situationslarge multinational firms and small startups, manufacturing and service industries, growing and mature organizations, U.S. and non-U.S. settings. Discussion of these cases will enable you to learn different analytic techniques, and illustrate (1) the essence of strategy, (2) how to understand the external competitive environment, (3) ways to consider beyond the current business landscape, and (4) the role of top management in strategy implementation.

Managing People and Organizations

Leduc, Steven M

Fall 2024

This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

Strategic Management

Kierner, Agnieszka D

Fall 2024

The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

Leadership: A Personal Perspective.

Levenson, Robert A

Fall 2024

Explores the managerial process from the perspective of executives and managers at various levels and in diverse organizational settings. Draws on current behavior theory and research; examines the complex web of internal and external forces and contingencies acting on the manager in context. Uses a variety of teaching/learning methods, including the case method, situational exercises, and diagnostic instruments to illuminate managerial effectiveness in general as well as the student's particular style.

Strategy in Financial Services

Wilson-Byrne, Christopher

Fall 2024

This course introduces students to strategic management of financial institutions. However, it is a management course and not a finance course; as such, the aim is to provide students with an understanding of what is shaping the financial services landscape and how to compete effectively in this landscape. The course uses management frameworks to provide a high-level understanding of how financial services firms operate. Moreover, class discussions are largely rooted in use cases and case studies to bring to life the concepts and decisions that shape strategy in financial services.

MGMT811901**Managing Business in Society****Smith, Katherine V****Fall 2024**

This course deals with the complexities of managing corporate sustainability and responsibility (new CSR) in today's dynamic and ever-more difficult world. Emphases include the integration of issues related to business in society, ethics, responsibility, accountability, transparency, governance, and ecological sustainability into corporate strategies and practices. We use a strategic management lens to learn the potential sources of strategic and competitive advantage that can derive from CSR, and explore some of the problems associated with poor responsibility practices.

This course provides an overview of the various stages of the M&A process, and the key decision points which help guide it. This course is meant to be a survey class, covering a wide range of M&A topics. It is recommended for participants pursuing careers requiring the formulation of inorganic growth options for businesses (e.g., general management, business development, or consulting) or the assessment of business investment opportunities (e.g., investment banking, venture capital, or private equity). A broad overview of each typical stage in an M&A process will be discussed to include strategy, target identification, valuation, due diligence, financing, deal structure, negotiating an agreement, closing, and integration. Armed with an understanding of each stage of the M&A process, possible decision frameworks will be formulated and discussed.

Business Wars: Leading Through Change and Disruption

Kierner, Agnieszka D

Fall 2024

In a world where the average lifespan of a company has significantly decreased, leaders find themselves in constant change and disruption management. The development of AI, which undoubtedly replaces many repetitive tasks, adds an additional layer to an already challenging environment. Whether you run your own company or work in corporations, you must be able to create new things and sell them, including yourself. An innovative mindset is key to success! And this class is all about it: developing a new mindset and teaching your brain new habits. Each class will delve into the analysis of real stories from various industries, exploring what propels these companies, their leaders, investors, and employees to new heights or to ruin. We will examine and discuss the past, present, and actively generate ideas for the future. After completing the course, you will be able to shape your own perspective and behaviors, helping you and your firm thrive in our fast-paced world and foster innovation!

Corporate Innovation, Structures and Methods

Pacelle, Thomas

Fall 2024

Innovation is imperative in the dynamic landscape of contemporary corporations. Forward-thinking managers understand that a strategy for innovation must be an integral part of an organizations primary operation in order to remain competitive. This course examines the innovation function within corporations and the vital role that innovation plays in addressing a number of critical strategic objectives within an enterprise. The curriculum is segmented into two halves. The first half will focus on planning and will include innovation strategy, objectives, time horizons, stakeholders, process and metrics & reporting. The second half will focus on execution and will cover implementation options including research partnerships, startup ecosystem engagement, incubator & accelerator programs and direct investment through corporate venture capital. Finally, we will perform quantitative & financial analysis on all stages of corporate innovation planning and implementation. This will include development of quantitative models for market sizing, opportunity analysis, budgeting, pricing/margin analysis, revenue forecasting and return on investment (ROI). THIS IS A STEM-DESIGNATED COURSE

Management and Organization Courses: Spring 2025

MGMT102101

Organizational Behavior

Grubb, Anitza R

Spring 2025

Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students.. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Organizational Behavior

Rogers, Benjamin Alan

Spring 2025

Class restriction is only applicable to current Boston College students and does not apply to non-BC (transfer or exchange) students.. As an introduction to the study of human behavior in organizations, this course aims at increasing an awareness and understanding of individual, interpersonal, group, and organizational events, as well as increasing a student's ability to explain and influence such events. The course deals with concepts that are applicable to institutions of any type; a central thrust of these concepts concerns the way institutions can become more adaptive and effective. The course is designed to help the student understand and influence the groups and organizations to which he/she currently belongs and with which he/she will become involved in a later career. Note: Restrictions only apply to current Boston College students and do not apply to transfer or exchange students.

Ethical Leadership Skills

Nielsen, Richard P

Spring 2025

This course focuses on ethics leadership and engagement methods in different types of pre-modern, modern, and postmodern organizational and political-economic contexts. What are our visions of ethical leadership, relationships and organization? What were we doing when we were at our best in leading meaningful and effective change and problem resolution in our relationships with family and friends and in our work and citizenship lives? What have been the individual, organizational, and environmental obstacles that made it difficult for us to lead meaningfully and effectively? What are different types of methods in trying to intervene and lead ethical change?

Negotiation

Nielsen, Richard P

Spring 2025

Negotiating is a key process in leadership, conflict resolution, and change management at every level of internal and external management. The purpose of the course is to improve students' abilities to analyze, prepare for, and practice win-lose, win-win, dialogic, and third party negotiating methods as appropriate. Emphasis is on practical application and personal development. Teaching methods used are role playing, discussion of readings, discussion with practitioners, original student projects, and discussion of current events. Students are invited to reflect upon how negotiating and conflict resolution practices help them developmentally change themselves, their organizations, and the world.

Leadership

Ladge, Jamie J

Spring 2025

In today's world, there are many challenges that call for effective leadership. Corporate ethics scandals, an increasingly global and diverse work force, and the need for employees to experience renewed meaning and connection to their work are just a few examples. How we respond to these challenges can profoundly change the world in which we live and work. In this course, we learn about the challenges and opportunities of effective leadership and how leaders, including ourselves, can respond to them.

Leading High Performance Teams

Sala, Gabriel Robert

Spring 2025

This course examines the dynamics of groups--such as teams--within organizations. One of the key questions we will investigate is what makes some teams more effective than others. Students will learn and practice high performance team fundamentals, intervening to problem solve and understand the consequences of interpersonal conflicts. The course emphasizes a diagnostic and reflection approach within varied team settings and includes an independent field analysis project relating to an actual team within an organization.

Social Impact and Entrepreneurship

Frechette, Edward K

Spring 2025

Are you moved by a particular social injustice? It could be homelessness on the streets of Boston. It could be famine in Africa. It could be wage inequality across our country. It could be one of hundreds of issues, but one that is meaningful to you. Social Impact and Entrepreneurship explores the innovative ways government agencies, nonprofit groups, and for-profit organizations are addressing societal challenges. This course will focus on understanding the building blocks of a social venture--starting with the mission and working through the operational plan, the financials, and the evaluation criteria. Students, either individually or in small groups, will create a business plan for an enterprise, grounded in her/his passion for change in a given area. Multiple case studies will be used to illustrate various topics. Open to students from all majors.

Power and Influence

Arrowood, Rick J

Spring 2025

Power and influence are crucial to understanding organizational dynamics, resolving conflict, navigating and promoting change, building cooperation, and developing professional skills in the workplace. The course aims to help students identify, diagnose, and analyze power as well as expose them to influence methods from an organizational, managerial, and professional skills perspective. The purpose of this course is to examine the different types of formal and personal power people use to influence others, explore ways power and influence are used for both good and bad, and develop students capabilities to create their own path to obtaining, managing, and sustaining power and influence.

The Science of Thriving at Work: Individuals, Groups and Organizations

Clair, Judith

Spring 2025

In this comprehensive exploration, we will immerse ourselves in the growing domain of positive organizational scholarship (POS) and positive psychology, equipping students with research knowledge and practical skills to foster individual and collective flourishing in work settings. Flourishing is a multidimensional concept that captures the optimal state of functioning in individuals, groups, and organizations. It encompasses thriving, engagement, health, growth, creativity, and other markers of positive deviance. Throughout the course, we will delve into the core topics and foundational theories of positive psychology and POS to understand how human flourishing can be nurtured and sustained. Our journey will begin by understanding the historical roots of positive psychology, which emerged as a paradigm shift, challenging traditional psychology to explore the positive aspects of life and build on human strengths and capacities. We will also examine how flourishing extends beyond merely curing pathology, emphasizing the need to unlock and capitalize on potential resources at various levels, from individuals to teams, communities, and institutions. We will unravel the science of habit formation and how positive habits relate to flourishing. We study the science of happiness and general well-being, and explore how to identify and leverage individual strengths to foster personal growth and resilience. We will also build an understanding of research showing the power positive emotions have to shape well-being and performance. We will furthermore study positive Interventions - exploring evidence-based practices to cultivate flourishing in personal and professional contexts and strategies for building thriving workplaces that unleash the best in people. While we embrace the transformative potential of positivity, we also acknowledge the complexities and potential dark sides of this approach. We will critically discuss the challenges of maintaining a positive pathway, aiming for a nuanced understanding of positive psychology and its application in organizations. Our pedagogy will go beyond traditional lectures, actively involving you in individual and group experiential exercises, reflections, and discussions. Moreover, this course places emphasis on research exploration, and includes assignments asking you to design and conduct a research project to examine the effects of positive interventions. By the end of this course, you will have gained valuable insights into cultivating personal well-being and creating positive change within groups and organizations. Together, we will uncover the keys to unlocking human potential and fostering thriving - personally, professionally, in teams, and in organizations.

Entrepreneurial Management

Shaw, Douglas J

Spring 2025

This course focuses on the fundamentals of building a business either as a start-up or within a larger organization. Entrepreneurial Management introduces conceptual frameworks and tools that help students to identify, evaluate, launch and grow innovative ventures that have the potential to revolutionize markets. We will discuss cases set in a range of industries including car sharing, aviation, electronic publishing, fashion, file storage, streaming media, consulting, food services and education. Course goals include: Help you to understand the major issues entrepreneurs face when starting, growing and capturing the value of their ventures. Develop the analytical skills required for the environment in which entrepreneurs operate high uncertainty, rapid growth, ongoing change and limited resources. Be able to compare and contrast the major sources of capital available to entrepreneurs and the expectations of investors. Better understand the role that entrepreneurship will play in your career. Entrepreneurial Management requires strong qualitative and quantitative analysis skills. There are no official prerequisites. To evaluate the drivers of venture profitability and to analyze business models, you will need a basic understanding of income statements which will be reviewed during the initial classes.

Thinking Strategically Integrative Strategy Simulation

Montes, Juan

Spring 2025

This course prepares students to make executive-level decisions by participating and competing in business simulation. The course utilizes a sophisticated, market-leading simulation platform calls "Global DNA" to create a realistic, hands-on learning experience. The course allows students to manage a company and see the results of specific functional and team decisions, integrating all management areas: marketing, organizational behavior, operations, accounting, and finance. The course is based around the concept of experiential learning, and student teams have a high degree of freedom to follow different strategies. The competitive nature of the simulation shows and compares the results of each company in every round, with a high level of detail (i.e., sales and production reports, financial information), teaching teams to effectively analyze quantitative business information. Students learn to think strategically by incorporating the potential scenarios of what other teams can do during the simulation in their own decisions.

Credits: 3

Room and Schedule: 245 Beacon Street Room 214 Tu 04:30PM-06:50PM

Satisfies Core Requirement: None

Prerequisites: This course encourages interdisciplinary learning and is open to MCAS students. No prior management courses are required, but analytic skills (be fluent in Excel) are necessary to analyze markets and support decision-making in the simulation.

Leadership and Corporate Accountability

Spinello, Richard

Spring 2025

This course is designed to provide an overview of the economic, legal, and ethical responsibilities of companies and their leaders. Through a series of case studies, it will demonstrate the acute challenges of ensuring that a company's conduct conforms to those responsibilities. A major portion of the course will review the principal obligations of corporations to five primary stakeholder groups: investors and shareholders, customers, employees, suppliers, and the general public. Insider trading, fiduciary duties, disclosure of health risks, fairness in pricing, power asymmetries, affirmative action, international labor rights, market failures, privacy rights, environmental sustainability, and corporate citizenship represent some of the issues to be discussed in this segment of the course. A secondary theme is corporate governance. Several cases will explore the proper role of management, the Board of Directors, financial intermediaries, and external regulators.

Strategic Management

Montes, Juan

Spring 2025

This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Strategic Management

Wilson-Byrne, Christopher

Spring 2025

This is the senior integrative capstone course of the CSOM core. This course provides future leaders and strategists with an understanding of strategic management that will enable them to function effectively in a complex, global economy. Successful strategists need to define goals, analyze the organization and its environment, make choices, and take concerted actions to effect positive change in their organization and society. Using the conceptual tools and analytic frameworks of strategic management, this course provides a perspective that is integrative, yet analytical. This perspective helps students make sense of the global business and societal environments, understand the ambiguities and dilemmas of management, and learn how to take effective action.

Managing People and Organizations

Opazo, Maria P

Spring 2025

This course focuses on the analysis and diagnosis of organizational problems. It attempts to enable students to apply these concepts to real organizational and managerial problems. It also provides opportunities for participation in ongoing work teams while learning about team effectiveness. Finally, students can examine their own behavior and beliefs about organizations to compare, contrast, and integrate them with the theories and observations of others.

Strategic Management

Lowd, Nancy E

Spring 2025

The strategic management course deals with the overall general management of an organization. It stresses the role of the manager as strategist and coordinator whose function is to integrate the conflicting internal forces that arise from among the various organizational units while simultaneously adapting to the external pressures that originate from a changing environment. Drawing on the knowledge and skills developed in the core curriculum, this course serves as the integrating experience for the M.B.A. program.

Strategic Management

Yu, Tieying

Spring 2025

This course introduces you to a set of analytical frameworks that enable you to explain performance differences among firms and that provide a structure for strategic decisions to enhance firms future competitive positions. Building on the foundation laid by the Introduction to Strategic Management course that you took earlier, we will cover strategy both at the business level (introducing tools of industry analysis and competitive positioning) and at the corporate level (examining how decisions regarding corporate scope horizontal, vertical, and global create or destroy value in multibusiness firms). We will also study strategy implementation, focusing on the organizational structure, systems and processes that are put in place to manage the corporation. Throughout the course, our viewpoint will be that of the top management team who has responsibility for the long-term health of the entire organization.

Leadership: A Personal Perspective.

Levenson, Robert A

Spring 2025

Explores the managerial process from the perspective of executives and managers at various levels and in diverse organizational settings. Draws on current behavior theory and research; examines the complex web of internal and external forces and contingencies acting on the manager in context. Uses a variety of teaching/learning methods, including the case method, situational exercises, and diagnostic instruments to illuminate managerial effectiveness in general as well as the student's particular style.

Corporate Strategy

Potts, Jeremiah M

Spring 2025

The Strategic Management course focuses on the creation of long-term competitive advantage in companies with a single primary line of business. Corporate Strategy extends those principles to explore strategies of multi-business organizations. The course will take the perspective of the CEO and senior management team whose primary job is to create shareholder value, and addresses questions such as: which businesses should be part of our portfolio? How should we shape that portfolio through M&A and divestitures? How do balance sheet realities, private equity alternatives, and activist investors impact our strategic choices? How do we develop and implement strategy in multi-business companies.

Strategic HR

Kierner, Agnieszka D

Spring 2025

Whether leading a start-up or a team in a large organization, after this course you will have the skills needed to effectively design and execute strategies to manage people in such a way that they support long term business goals and outcomes. The course will help you think systematically about critical aspects of managing human assets and provide practical examples on how these strategies need to be implemented to achieve competitive advantage. Through a mix of lecture, case study analysis, in-class simulation and discussion we will take a journey around key issues leaders need to tackle: data driven HR, recruiting and onboarding, talent management, dealing with high and low performers, benefits and compensation, managing in diverse and multicultural environments. The course will draw upon personal experiences of the instructor from leading technology start-ups, advising and driving change in large organizations, as well recent literature on these topics.

Business Wars: Leading Through Change and Disruption

Kierner, Agnieszka D

Spring 2025

In a world where the average lifespan of a company has significantly decreased, leaders find themselves in constant change and disruption management. The development of AI, which undoubtedly replaces many repetitive tasks, adds an additional layer to an already challenging environment. Whether you run your own company or work in corporations, you must be able to create new things and sell them, including yourself. An innovative mindset is key to success! And this class is all about it: developing a new mindset and teaching your brain new habits. Each class will delve into the analysis of real stories from various industries, exploring what propels these companies, their leaders, investors, and employees to new heights or to ruin. We will examine and discuss the past, present, and actively generate ideas for the future. After completing the course, you will be able to shape your own perspective and behaviors, helping you and your firm thrive in our fast-paced world and foster innovation!

Entrepreneurial Management

Iyer, Priya

Spring 2025

Entrepreneurial opportunities often exist when industries are created or transformed by new technologies, new business models or new product categories. The pursuit of these opportunities, however, creates challenges for both start-ups and established firms. This course introduces a research-based set of conceptual frameworks and tools that help students to identify, evaluate, launch, and grow innovative ventures that revolutionize markets. We will discuss cases set in a range of industry contexts including: folding bicycles, online Indian art auctions, aviation (air taxis), electronic publishing, fashion, digital imaging, education, and clean energy.

Digital Innovation and Transformation

Fichman, Robert

Spring 2025

In the last two decades, innovative digital products, processes, and business models have become increasingly prevalent. These digital innovations are transforming how we live and work, how companies compete, and the structure of entire industries. As a result, it is essential for aspiring managers to have a strong grounding in digital innovation in order to effectively work in, manage, lead, and transform organizations that are increasingly dependent on innovative digital technologies. Through a combination of seminar-style discussions, brief lectures, case studies, in-class exercises, and guest speakers, students will learn about: (1) fundamental innovation concepts; (2) how digital technologies and platforms are different from non-digital technologies, and how these differences shape their evolution and impact; (3) how to implement effective organizational processes for digital innovation discovery, development, and diffusion; (4) how to evaluate the transformational impacts of digital innovation on businesses, individuals, and society; (5) how to nurture the innovative capabilities of individuals and the firm.

Diversity Equity And Inclusion In The Workplace

Clair, Judith

Spring 2025

This course is organized to understand cross-disciplinary research investigating complex issues surrounding diversity, equity and inclusion in the workplace and organizations. Familiarity with research in the domain of diversity, equity, and inclusion in workplaces and organizations provides a basis for understanding not only why progress has been made, but also why challenges persist in a globalized workplace and economy. We draw upon seminal and novel empirical and theory papers on diversity, equity, and inclusion topics, with an emphasis on theory building and new, cutting-edge research in psychology, sociology, organizational studies, and other fields. We spend some of our time exploring taboo topics that are less discussed in research and organizations. And, we seek to surface ideologies on diversity, equity and inclusion that influence workplace policies as well as scholarly research.

Marketing Courses: Summer 2024

MKTG102101

Marketing Principles

Nunziata, Peter C

Summer 2024

This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

Marketing for Digital Nomads

Nunziata, Peter C

Summer 2024

According to a McKinsey Partners report (2018), almost 60% of new marketing positions are in digital marketing. In this course you will learn how to create a holistic digital marketing strategy, to drive the success of your online search, ecommerce, and social media efforts. With a focus on Social Media Marketing, you will become familiar with the digital marketing tools to manage search engine optimization (SEO), social media campaigns, and to help you develop your personal brand. This will be a hands-on class using a combinations of case studies, simulation programs and SEO skills assessment leading to SEO Certification.

Marketing

Nunziata, Peter C

Summer 2024

This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

MKTG102105

Marketing Principles

Hagtvedt, Henrik, PHD

Fall 2024

This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

Consumer Behavior

Zhao, Min

Fall 2024

This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

Customer Research and Insights for Marketing Decisions

Salisbury, Linda

Fall 2024

Formerly titled Marketing Research. Information is vital for solving critical marketing problems and gaining competitive advantage. This course focuses on how to improve marketing decision-making through better research design and methods. Students learn how to identify managerial problems, develop relevant research hypotheses, determine appropriate methods for data collection and analysis, and develop recommendations for marketing solutions. Topics include foundational methods, such as focus groups, survey design, and marketing experiments. Students will gain the ability to identify, collect, and analyze essential marketing data and apply research results to become better marketing decision-makers.

Services Marketing

Samaras, Xanthe P

Fall 2024

The service sector of the economy is twice as large as the manufacturing sector. Nearly all new job growth in this country will be in services marketing. Service organizations differ from manufacturing businesses in many important respects and require a distinctive approach to marketing strategy development and execution. Some service businesses to be studied include entertainment, hospitality, travel, retail, telecom, car rental, healthcare, financial and professional services. Service providers include hotel, airline, theme park, car rental and retail personnel, customer service representatives, bankers, doctors, accountants, and lawyers.

Digital Marketing

Brasel, Stevan Adam

Fall 2024

In today's digital economy, successful companies must develop new ways to attract, connect with, and delight their customers. This has prompted a decisive shift away from traditional media strategies toward novel, digitally-enabled strategies that can help firms achieve their financial objectives. In this course you will learn about a number of different aspects of digital marketing including content marketing, website optimization, social media marketing, paid search, and search engine optimization. Perhaps more importantly, this course will help you develop a strong understanding of the digital marketing tools and platforms that companies use to differentiate themselves from their competition and will allow you to build a set of digital assets that you can use to demonstrate your digital marketing acumen to prospective employers.

Product Management

Bright, James P

Fall 2024

This course focuses on creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company or in starting their own business at some point. Whether a software, CPG, B2B, or B2C product, all product management starts with gathering customer insights, evaluating the competitive landscape, and creating a design brief from which a compelling, differentiated, and profitable product line can be built. From that foundation is built a go-to market, distribution, and communications strategy. This course employs case studies in both B2B and B2C businesses, includes guest speakers, and concludes with classes on sustainability strategy and innovation agendas, items that are critical for long term success in dynamic competitive environments. This course was formerly titled Product Planning & Strategy.

Strategic Brand Management

Fisher, John H

Fall 2024

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

Sports Marketing

Olesh, Evan S

Fall 2024

The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

Strategic Selling and Persuasion

Westman, John C

Fall 2024

Two fundamentals of business: someone must get the goods and services out the door, and someone must get the cash to come in the door. Sales is the function that does the latter. It, and its management, will be covered in this course. We will study the art of persuasion, modern day Rhetoric in actual practice. The discipline will be addressed biologically. We will dissect real industry practitioners when they visit class, and actual sales calls in the field as a research paper. Upon course completion, students will have a complete understanding of both the selling and sales management process.

Nunziata, Peter C

Fall 2024

This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Product Management

Andreliunas, John P

Fall 2024

This course focuses on creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company or in starting their own business at some point. Whether a software, CPG, B2B, or B2C product, all product management starts with gathering customer insights, evaluating the competitive landscape, and creating a design brief from which a compelling, differentiated, and profitable product line can be built. From that foundation is built a go-to market, distribution, and communications strategy. This course employs case studies in both B2B and B2C businesses, includes guest speakers, and concludes with classes on sustainability strategy and innovation agendas, items that are critical for long term success in dynamic competitive environments.

Consumer Behavior

Zhao, Min

Fall 2024

This course integrates marketing theory with insights from other fields of study, including social psychology, cognitive psychology, evolutionary psychology, and behavioral neuroscience. It analyzes consumer processes such as perception, learning, attitude formation, and decision making. These variables are broadly relevant to marketing challenges, given that the success of products and brands depends on their appeal to consumers. Discussion topics range from art and aesthetics to crisis behavior to new product development.

Marketing Strategy & Innovation

Cunningham, Kristy S

Fall 2024

This course builds on the principles covered in the core Marketing course by further developing and applying marketing strategy to different company lifestages (i.e. launch, geographic expansion, repositioning), industries (i.e. luxury, retail, e-commerce) and innovations (i.e. digital marketplaces, AI-driven solutions.) It takes a Marketing practitioners view of determining and owning the strategy and builds the link between strategy, activities, and outcomes. You will be exposed to problems and situations that will require you to assess, analyze and recommend actions within the context of marketing skills and organizational alignment. Extensive case analysis and financial and analytical tools are used to examine marketing growth strategies, target market strategies, external factors, marketing program development, the marketing organization, and implementation of marketing strategy. This course is appropriate for those considering marketing as a career, consultants helping to drive revenue generation, or general managers looking to build an external, customer-centric skillset to complement operational capabilities.

Strategic Pricing Management

Jackisch, Kirk

Fall 2024

This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

Entrepreneurial Marketing Strategy

Neeson, John J

Fall 2024

This course focuses on how to develop an integrated marketing plan for a new company. The class will teach techniques and skills for developing a marketing strategy for a startup, including prioritizing market segments, positioning and messaging approaches, sales model and capacity planning for marketing, and developing an integrated marketing model to help scale the new endeavor. Startups are unique, requiring an agile marketing approach, the ability to scale quickly, and the requirement to build a new category or quickly enter an existing one. Classes will incorporate a combination of lectures, projects, guest speakers, and the development of a marketing plan for a new or early stage startup.

Marketing Courses: Spring 2025

MKTG102101

Marketing Principles

Kerbs, Jon W

Spring 2025

This course is a prerequisite for all other marketing courses. Marketing is a dynamic, creative and challenging discipline that plays a leading role in the strategy and destiny of any company. Marketing is the business function with primary responsibility for generating revenue, defining the value proposition, and managing relationships with customers. Three broad areas will be explored including understanding markets and competitors, developing new products and organizing distribution, and implementing communications and promotions. A variety of examples in traditional industries and the digital sector will be discussed. Analysis and decision skills will be developed by practicing the use of tools and case studies. This course provides a foundational understanding of the marketing discipline, which is necessary for any role within business organizations.

Integrated Marketing Communications

Nenkov, Gergana Y

Spring 2025

This course concerns the communication function in marketing. It is designed to introduce students to integrated marketing communications (IMC). It aims at relating the elements of the marketing mix (4P's) to the various aspects of the communications that take place between the firm and its customers. The course builds on a base of strategic marketing planning and consumer behavior and then proceeds to examine the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, Internet and interactive marketing, publicity and public relations) in developing integrated marketing communications programs and helping organizations meet strategic marketing objectives.

Strategic Brand Management

Fisher, John H

Spring 2025

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

Sports Marketing

Olesh, Evan S

Spring 2025

The goal of this course is to provide an understanding of the business practices of the sports industry. Taking a practical approach, students will be asked to create business solutions for sports organizations. The attributes and failures of real examples will be discussed. Students will be expected to take the experience and apply it to creating specific campaigns, programs, and overall marketing plans for a specific sports application. Relationship architecture principles will be discussed at length and expected to be incorporated into the final project.

New Media Industries

McNealy, Paul-Jon

Spring 2025

This course is designed to introduce the changing business models of new media (video games, music, TV and film, and journalism) industries. This is achieved by examining in detail the technology enablers and disruptive forces in both the U.S. and around the world, consumer behaviors, as well as legal and regulatory concerns. A special emphasis will also be placed on media companies whose business models have been heavily influenced or altered by digital distribution. This class will be a combination of in-class and Zoom sessions during class time, and will have an emphasis on influential guest speakers from various industries.

Marketing

Kerbs, Jon W

Spring 2025

This course focuses on the managerial skills, tools, and concepts required to produce a mutually satisfying exchange between consumers and providers of goods, services, and ideas. The material is presented in a three-part sequence. Part one deals with understanding the marketplace. Part two deals with the individual parts of the marketing program such as pricing, promotion, product decisions, and distribution. Part three of the course deals with overall strategy formulation and control of the marketing function. Students in this course will come to understand the critical links between marketing and the other functional areas of management.

Product Management

Andreliunas, John P

Spring 2025

This course focuses on creating and launching new products and services. It is particularly appropriate for those who are interested in becoming a Product Manager within a larger company or in starting their own business at some point. Whether a software, CPG, B2B, or B2C product, all product management starts with gathering customer insights, evaluating the competitive landscape, and creating a design brief from which a compelling, differentiated, and profitable product line can be built. From that foundation is built a go-to market, distribution, and communications strategy. This course employs case studies in both B2B and B2C businesses, includes guest speakers, and concludes with classes on sustainability strategy and innovation agendas, items that are critical for long term success in dynamic competitive environments.

MKTG800501

Marketing Strategy & Innovation

Cunningham, Kristy S

Spring 2025

This course builds on the principles covered in the core Marketing course by further developing and applying marketing strategy to different company lifestages (i.e. launch, geographic expansion, repositioning), industries (i.e. luxury, retail, e-commerce) and innovations (i.e. digital marketplaces, AI-driven solutions.) It takes a Marketing practitioners view of determining and owning the strategy and builds the link between strategy, activities, and outcomes. You will be exposed to problems and situations that will require you to assess, analyze and recommend actions within the context of marketing skills and organizational alignment. Extensive case analysis and financial and analytical tools are used to examine marketing growth strategies, target market strategies, external factors, marketing program development, the marketing organization, and implementation of marketing strategy. This course is appropriate for those considering marketing as a career, consultants helping to drive revenue generation, or general managers looking to build an external, customer-centric skillset to complement operational capabilities.

MKTG800801

Marketing Communications in Today's Digital World

Hamlin, Pamela A

Spring 2025

Formerly titled "Integrated Marketing Communications" This course is focused on the integrated marketing communications (IMC) function in marketing. IMC has evolved significantly with the rise of digital technologies and platforms where today, the average person is exposed to over 5,000 advertising messages a day. This makes effective communication critical for brands striving to engage with consumers in an increasingly competitive environment. The course provides an in-depth exploration of brand building strategies designed to strategically integrate the traditional advertising channels and the digital landscape to develop effective integrated marketing communications programs. It builds on a base of strategic marketing planning and consumer behavior and then examines the role of the promotional mix (e.g., advertising, direct marketing, sales promotion, digital marketing, experiential marketing, and public relations). Through a combination of theory, case studies and real-world application, students will develop the knowledge and skills necessary to craft compelling brand narratives, and engage with audiences across all communications touchpoints, to meet strategic marketing objectives.

Strategic Pricing Management

Misra, Kanishka

Spring 2025

This course explores pricing strategy and shows how pricing can be managed to achieve profitability. The course is practical and hands-on. It examines current pricing practices used by many companies, and shows how they lead to distortions and problems. It suggests strategic principles that lead to more profitable pricing decisions, including methods for financial analysis that focus on pricing profitability. Other topics include value-based pricing, managing price competition, segmenting markets based on price sensitivity, segmentation pricing strategies, buyer psychology of pricing, and research methods for assessing price sensitivity.

Strategic Brand Management

Davey, James S

Spring 2025

This course teaches students fundamental and leading-edge concepts in brand management. Students learn to develop and articulate brand strategy, how to give strategic brand direction, and how to measure strategic brand progress. They learn how to manage key relationships and functions that surround the brand, e.g., advertising, promotion, public relations, licensing, and product and package design agencies. A capable brand manager has exceptional strategic, quantitative, interpersonal, and presentation skills and must be comfortable with decision-making and leadership. The course will focus on the development and application of these skills in brand management via in-class learning, case discussion, and project work.

PRT0240201

American Commerce and American Culture

Corbin, Ian M

Fall 2024

By any number of measures, the American social fabric is fraying. Long before the exacerbations of a global pandemic, polarization was increasing, trust was plummeting, deaths of despair were on the rise, civic participation was down, and we heard talk of a growing epidemic of loneliness. All this amidst a world-historical expansion of wealth, and falling rates of crime. What is going on? This course begins with the suspicion that American business plays a central, underappreciated role in the ongoing evolution of our social fabric. It aims to ask: how do the business community's deep assumptions, values and practices shape our sense of ourselves and each other? Our senses of safety and precarity? Our inclinations to creativity and conformity? This course will examine key documents from management theory, social science, philosophy and literature to explore some ways that American commerce and American culture shape one another, and how this relationship can be brought into healthier alignment.

PRT0330001

Senior Seminar in Business Ethics

Smith, Michael J

Fall 2024

The purpose of this course is to provide Portico Teaching Assistants a greater depth of understanding of the philosophical issues covered in Portico, and to offer an introduction to the core pedagogical techniques involved in teaching applied ethics. Participating TAs will study the course material on a second-order level by considering the evolution of their understanding of the course material over their undergraduate career, and by exploring pedagogical best-practices to improve teaching outcomes. The structure of the course will thus run concurrently with that of Portico. While primarily directed towards enriching the experience of the TAs, the course will simultaneously aim to facilitate the goals of Portico itself by providing TAs with additional tools and resources for engaging with their students and creating a more cohesive and impactful classroom community.

Undergraduate Management Courses: Fall 2024

UGMG101001

Perspectives on Management

Clavin, John C;Doyle, Jeremiah T

Fall 2024

This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors

Career Bridge

Barksdale, Andrew C

Fall 2024

UGMG1222 will equip first generation and low income students with: awareness of crucial resources, an understanding of cultural capital, and a supportive network to assist the transition to college and specifically the Carroll School of Management. This course will follow a discussion-based model with class participation being a main emphasis. We will explore themes relevant to first generation and low income students. By the end of the semester, students will gain a working community of peers and confidence in their ability to flourish at Boston College.

Case Competition Cohort

Xiong, Josephine D

Fall 2024

Reserved for Sophomores and Juniors in the Carroll SchoolThis course is for Sophomore and Juniors in the Carroll School of Management who are interested in learning how to better prepare for strategy and ethics case competitions. The class will meet weekly for one hour with the objective to develop skills in the following areas: be able to effectively analyze an ethics case and a strategy case, determine feasible alternatives, craft a recommendation, implement recommendations, and prepare for judges' questions. The course will also help students with a PowerPoint presentation for case competitions and oral tips for such a competition. The 10-week course will end with an internal case competition where winning groups will be chosen to attend competitions and represent the Carroll School nationally in the spring and subsequent fall (juniors who are abroad in the spring will not be eligible to take the course).

Victimology

Burgess, Ann W

Fall 2024

This course examines the wide range of victimization experiences from the perspective of the victim, their families and society. Crimes to be studied include robbery, burglary, carjacking, assault and battery, rape, domestic violence, stalking, homicide, arson, child sexual abuse and exploitation, child pornography crimes, federal crimes, identity theft, terrorism, and internet crimes. Emphasis will be given to exploring the etiology of trauma, motivational issues of offending, response patterns to victimization, secondary trauma effects of victimization, and community and media response. Class format will utilize cases from the forensic practice of the lecturers.

Forensic Science I

Burgess, Ann W

Fall 2024

Forensic science concepts and principles play a critical role in analyzing crime scene evidence. This course draws on scientific principles and examines cases where there has been a death, including suicide, accidental, and criminal; and cases where there is a survivor, in which there is a legal and/or ethical component. Specifically, the course applies a case method format to forensic science issues including forensic pathology, clinical forensics, crime victims, computer crime and equivocal death.

NURS121001

Public Health in a Global Society

Camp, Lindsey N;Hawkins, Summer S

Summer 2024

This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Advanced Practice Nursing Role

Tabloski, Patricia

Summer 2024

This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

Current Issues in Sexual Health Care Across the Life Span

Tappin, Ryan J

Summer 2024

Sexual health is a critical component of well-being across the lifespan. Current research reveals that gender and sexual health identity and orientation are key factors in understanding patterns of sexual health behaviors and risks, and experiences of health, wellness, and illness. This course examines current and emerging issues affecting sexual health and strategies to inform clinical practice, including: the nurse-patient relationship and its influence on sexual well-being; health disparities linked to societal stigmas, prejudices, and discrimination; and ways to improve access to quality health care for populations disproportionately at risk for or affected by STIs including HIV/AIDS.

Nurse Anesthesia Clinical Practice I

Emery, Susan A

Summer 2024

This course, the first in a 6-course sequence, introduces students to nurse anesthesia clinical practice. Through a combination of seminar, simulation and patient care, students are encouraged to think critically and integrate theoretical knowledge into a detailed plan of anesthesia care. By participating in the continuum of the perioperative experience, students learn to provide anesthesia care for healthy patients undergoing minimally invasive surgical procedures under the guidance of a clinical preceptor. The course also provides an opportunity for students to become socialized into the advanced practice role of the nurse anesthetist.

Chemistry, Biochemistry, and Physics for Nurse Anesthesia Practice

Emery, Susan A

Summer 2024

This course is an integrated study of chemistry, biochemistry, and physics underpinning nurse anesthesia practice. The chemical structure of compounds and chemical reactions are examined as they apply to pharmacokinetics and pharmacodynamics of anesthetic agents. Concepts of solubility, diffusion, and osmosis are described as well as the role of acid-base balance in maintaining the body's internal milieu. Metabolic pathways responsible for energy production are examined. Gas laws and other laws of physics as they pertain to nurse anesthesia practice are illustrated with specific examples. The emphasis is placed on integration of scientific theory into practice.

NURS121001**Public Health in a Global Society****Longacre, Ashley;van de Water, Brittney****Fall 2024**

This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Pathophysiology

Gasser, Raymond F;Hurley, Dorean L

Fall 2024

Pathophysiology offers an integrated approach to human disease. The course builds on the underlying concepts of normal function as they apply to the basic processes of pathogenesis. Biological variations of age, gender, and cultural differences are integrated into the course content where applicable. Common acute and chronic health problems are introduced to explore the interrelatedness of a variety of stressors that affect physiological function. Successful completion of Pathophysiology facilitates the student's transition into clinical nursing practice.

Nursing Assessment of Health Across the Life Span

Ahn, Soojung;Cho, Eunji

Fall 2024

This course introduces the concepts of health, health promotion, and growth and development across the lifespan. The interactions of underlying mechanisms such as environment, culture, ethnicity, family, genetics, and gender that are foundational to the development and individual health will be explored. Theories and principles that address physical, cognitive, and psychosocial growth and development will guide understanding of the complex healthy human, from birth to geriatrics and death. Principles and theories of health promotion will be analyzed and applied from a nursing perspective to support the individual's desire to increase personal and/or family health potential and well-being.

Comparing Health Care Systems through a Global Lens

Simonelli, Mary C

Fall 2024

Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world is emphasized.

Psychiatric Mental Health Nursing Theory

Dunne, Julie P;Pounds, Karen G

Fall 2024

This course builds upon the standards of practice from APNA-ISPAN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

NURS426001

Population Health Nursing Theory

Gasser, Raymond F

Fall 2024

This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

Population Health Practice in the Community

Cullinan, Donna L

Fall 2024

This course focuses on the application of population health, emphasizing public health nursing roles, that include the care of population members in community settings, such as a neighborhood, school, or non-profit organization, locally or globally. Students will gain experience in community engagement, community health assessment, screening, case management, health education, service and program evaluation, and advocacy. Emphasis is placed on the multiple determinants of health and on using interdisciplinary approaches in practice to implement evidence-based interventions aimed at health promotion, risk reduction, and disease prevention.

Nursing Synthesis Clinical Laboratory

McNutt-Clarke, Beth

Fall 2024

This course provides senior nursing students with an opportunity to synthesize, expand, and refine nursing concepts and clinical reasoning competencies. Through an intensive clinical experience completed in institutional and/or community settings, students focus on the healthcare needs of specific client populations, study in depth the interventions used to restore and/or optimize health, and utilize evidence-based research in practice. Emphasis will be placed on current quality and safety guidelines and standards of care for the specialty area in which the student is practicing.

NURS426401

Actualizing the Role of Professional Nurse

Cullinan, Donna L;Simonelli, Mary C

Fall 2024

Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

Global Healthcare: Meeting Challenges and Making Connections

Simonelli, Mary C

Fall 2024

This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

Direct Entry Adult Health Nursing Clinical

Hurley, Dorean L;McNutt-Clarke, Beth

Fall 2024

This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for adults and older adults with acute and chronic conditions and their families. Students will learn and practice advanced psychomotor skills in simulated settings. Through interprofessional collaboration, students implement evidence-based practice to provide high-quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision making to meet the biopsychosocial and cultural needs of adults and older adults from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care.

NURS871201**Healthcare Quality Management****Reid Ponte, Patricia A****Fall 2024**

The course explores applications of quality improvement measures to the healthcare environment. Topics covered include an understanding of high reliability organizations, utilization review, risk management in healthcare, quality management, the use of outcomes research in improving patient care efficacy and safety, and performance management through training. This course is consistent with Lean Six Sigma (Green Belt) competencies and can partly contribute to preparation for the certification exam.

Nursing Leadership in Complex Health Care Settings

Gennaro, Susan;Given, Sarah

Fall 2024

This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

Health Care Policy for Nursing Leaders

Milliken, Aimee

Fall 2024

This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

Epidemiology

Camp, Lindsey N

Fall 2024

Epidemiology is the study of the distribution and determinants of health-related states or events (including disease), and its methods are used in the control of diseases and other health problems in diverse populations. This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed. This course prepares advanced practice nurses to engage in inter-professional collaboration with the ultimate goal of improving population health.

Applied Health Statistics: Generalized Linear Modeling

Lee, Christopher S

Fall 2024

This course focuses on conceptual understanding and application of generalized linear modeling to health-related research questions and real-world health data. Students will develop skills in the performance and interpretation of techniques such as multivariate linear, logistic, gamma and negative binomial regression. This course also will cover common functions within generalized linear modeling such as tests of interaction, moderator and mediator, as well as multilevel modeling, handling of complex sampling designs and common approaches to model selection. Applying health statistics as part of a logical argument is emphasized in this course as opposed to detailed knowledge of the underlying mathematics.

Philosophical Inquiry for Knowledge Development in Nursing

Flanagan, Jane M

Fall 2024

Movements in the history and philosophy of science are reviewed for appreciating nursing's epistemological development. Contemporary understandings of philosophy and philosophy of science and their influences on knowledge development and nursing are examined. A focus is on understanding the relationship of the epistemological foundations of nursing to those of the health and social sciences. The course aims to develop scholars who can critically evaluate scientific initiatives and their relevance for nursing practice and emerging societal needs. Emphasis is on integrating knowledge of movements in philosophy of science and nursing epistemology with themes developed in Strategies for Knowledge Development in Nursing.

Bridge to Primary Care Advanced Practice Nursing

Conahan, Catherine;Croke, Bethany A

Fall 2024

This is the first in a series of clinical reasoning and decision-making courses required for all primary care DNP students. Building on the skills acquired in Advanced Health/Physical Assessment across the Lifespan, the course will focus on communication and clinical decision-making for DNP students. Specific consideration will be given to wellness and health promotion across the lifespan, screening procedures, ordering and interpretation of diagnostic tests, health behavior change interventions, as well as problems frequently encountered in primary care. The combination of didactic, clinical, and simulated learning experiences will prepare the student for subsequent specialty clinical course work and experiences.

Advanced Practice Nursing Role

Pounds, Karen G

Fall 2024

This course prepares students to transition into an advanced practice nursing role. Historical and contemporary influences leading to the development of this professional role are explored, along with anticipated future dimensions. The impact of the advanced practice nurse on patient, family, and population outcomes will be examined. The course incorporates discussions of relationship-based care, role implementation across practice settings, and advanced practice nursing competencies. It also provides a synthesis of legal, regulatory and scope of practice considerations. The course facilitates a comprehensive understanding of political, economic, social and professional issues relevant to advanced practice nursing.

Advanced Psychopharmacology Throughout the Lifespan

Petrecan, Victor G

Fall 2024

This course examines the legal, ethical, and therapeutic role of the psychiatric-mental health nurse practitioner (PMHNP) in prescribing psychotropic medications for individuals with psychiatric disorders across the lifespan. The neurobiology, action of medications that affect the central nervous system, and implications for ethno-psychopharmacology will be explored. Standardized tools to evaluate diagnostic criteria and treatment efficacy will be analyzed. Evidence-based practice principles, collaborative practice models, indications for referral, and monitoring to enhance treatment adherence will be integrated throughout the course.

Nurse Anesthesia Clinical Practice II

Vitale, Caitlin M

Fall 2024

This course, the second in a 6-course sequence, provides the nurse anesthesia student with the experience of caring for patients requiring increasingly complex and specialty surgical procedures. The course runs concurrently with NURS9852, Advanced Practice Principles for the Nurse Anesthetist I, such that didactic content presented during that course is applied to patient care through seminar, simulation and clinical practice. Students move from novice level to advanced beginner level as they adapt foundational principles of nurse anesthesia care to unique situations under the guidance of experienced nurse anesthesia preceptors.

NURS985501**Nurse Anesthesia Clinical Practice IV****Vitale, Caitlin M****Fall 2024**

This course provides continued preparation as students become more proficient in the role of the nurse anesthetist. Through mentored learning experiences by certified registered nurse anesthetists and anesthesiologists, students become more autonomous in anesthesia practice as case complexity allows. Selected experiences in a variety of clinical settings expand students abilities to provide patient care in tertiary and/or community hospitals. The course provides broad clinical experiences that align with standards set forth by the Council on Accreditation of Nurse Anesthesia Educational Programs. Clinical decision-making is the foundation for planning and evaluation of anesthesia care.

Nursing Courses: Spring 2025

NURS121001

Public Health in a Global Society

Stowell, Jennifer D;Straif, Kurt H

Spring 2025

This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Introduction to Professional Nursing

Hurley, Dorean L;Ross, Richard E, SJ;Uveges, Melissa K

Spring 2025

This course provides an introduction to professional nursing, exploring nursing's history and the development of nursing knowledge grounded in theory and evidenced-based practice. The course places the study of socially just nursing practice within the tradition of liberal arts education. Engaging in critical self-reflection, students apply new value-based self-awareness to culturally congruent nursing care. Ethical reasoning processes are applied, utilizing clinical and population-based case studies. Therapeutic communication with individuals across the lifespan is introduced. Nursing education, practice, and professional careers as well as the influence of current health care environmental factors on health and evidenced-based nursing practice are discussed.

Sophomore Formation Seminar

Simonelli, Mary C

Spring 2025

The SCRUBS weekend retreat fulfills the NURS2090 requirement. Attendance at the full retreat is mandatory and an expectation of all sophomore students. Any absences should be discussed as soon as possible with the Teacher of Record (the Associate Dean), who will make decisions regarding activities that will be required to earn credit. This course is required for sophomore undergraduate nursing students and will involve guided review and reflection to reinforce the inherent professional values of altruism, human dignity, integrity and social justice fundamental to the discipline of nursing. Activities in the weekend long retreat will be guided by the Ignatian formation principles and students values and beliefs as they relate to professional practice, development as individuals and as members of caregiving teams. The goal is to build a foundation for professional leadership as nursing students become aspiring members of the nursing profession and productive and committed citizens of society at large.

NURS223001

Adult Health Nursing Theory I

Bond, Stewart;Hurley, Dorean L

Spring 2025

This course focuses on the theoretical basis of the nursing care of adults across the life span with altered states of health. Emphasis is placed on beginning application of the clinical reasoning process with a focus on frequently occurring nursing diagnoses, interventions, and outcomes for adults, in particular older adults. Evidence-based practice and standards of care are integrated throughout the course. The role and responsibilities of the nurse in the acute care setting including those related to quality, safety, ethics, and legal issues are emphasized. Cultural awareness is incorporated throughout the course.

Comparing Health Care Systems through a Global Lens

Simonelli, Mary C

Spring 2025

Introduction to the concepts of global health and the critical links between public health and social and economic development. Determinants of health and patterns of disease and health outcomes across the globe are critically examined. The course reviews the determinants of health status in terms of biology, demography, epidemiology, culture, sociology, economics, and politics. Key concerns regarding reproductive health, child survival, nutrition, communicable diseases, and chronic diseases are examined. Health care delivery in developed vs. undeveloped regions of the world is emphasized.

Principles of Evidence-Based Nursing

Klarare, Anna-Helena

Spring 2025

This course seeks to develop an applied understanding of evidence-based practice as it relates to the science of nursing. Through exploring components of the research process, an appreciation of the various types of evidence used by nurses and an understanding of the importance of evidenced-based research to improve clinical practice will be fostered. The ethical considerations related to evidence-based practice will be discussed. At the conclusion of the course, students are prepared to be to be critical consumers of research used in evidence-based practice.

Adult Health Nursing Theory II

Delva, Sabianca

Spring 2025

This course builds on the concepts learned in previous courses including adult health and pharmacology and expands the knowledge base for planning and implementing care of adults with acute health problems and acute exacerbations of chronic health problems. Clinical case studies of acute care emergencies are used to discuss clinical judgment. Emphasis is placed on the selection of evidence-based interventions, evaluation of interventions, and use of evaluative data in refining a plan of care for the adult patient. Discussions focus on the role of the primary nurse in the acute care setting including collaboration, discharge planning, and health teaching.

Childbearing Nursing Theory

Capotosto, Melissa K

Spring 2025

The course focuses on concepts associated with the unique responses of families during the childbearing cycle, normal and high risk pregnancies, and normal and abnormal events in women's health. Current multidisciplinary research in women's health with a focus on the childbearing cycle, including genetics and cultural competence, is presented. Evidenced based nursing practice for the childbearing family is discussed. The nursing implications of attending to both the physiologic and the psychosocial needs of the childbearing family are reviewed. Emphasis will be placed on AWHONN and ACOG standards of care.

Child Health Nursing Theory

Haze, Nanci J

Spring 2025

This course builds on the published *Pediatric Nursing: Scope and Standards of Practice* to discuss the unique responses of children and their families to acute and chronic illness. Emphasis is placed on the child's growth and development in relation to wellness and illness. A family-centered approach is used to address the health teaching, promotion, restoration, and maintenance needs of children and their families.

Theoretical principles are presented, and creative, evidence-based nursing intervention strategies to meet the needs of children and their families across the health care continuum are discussed.

NURS425201

Psychiatric Mental Health Nursing Theory

Walker, Danielle T

Spring 2025

This course builds upon the standards of practice from APNA-ISPAN, AACN, and QSEN to discuss the legal, ethical, and therapeutic role of the psychiatric mental health nurse in caring for individuals with psychiatric disorders across the life span. Current interdisciplinary research on the genetic, neurobiological, and psychosocial theories of depression, psychosis, substance abuse, bipolar illness, eating, anxiety, personality, and cognitive disorders is analyzed. Evidence-based nursing practice, including psychopharmacology and psychosocial treatment modalities such as cognitive-behavioral, interpersonal, group, and milieu therapy is applied from a multicultural perspective. Nursing interventions for families and communities experiencing crisis, grief, and trauma are identified.

NURS425301

Psychiatric Mental Health Nursing Clinical Laboratory

Walker, Danielle T

Spring 2025

Therapeutic communication skills provide a foundation for implementing the nursing role based on the American Psychiatric Nurses Association standards of practice with psychiatric patients/clients in a variety of psychiatric treatment settings. In the clinical experience, students work collaboratively with multidisciplinary teams in applying evidenced-based practice based on current interdisciplinary research to the nursing process. In weekly supervision with clinical faculty, students are mentored to extend their skills in clinical reasoning to meet the psychological, social, cultural, biological, and spiritual needs of persons from varied backgrounds (economic, racial, ethnic, age and gender) who are in treatment for mental illness.

NURS426001

Population Health Nursing Theory

Crevecoeur, Thamarah;Gasser, Raymond F

Spring 2025

This course introduces the conceptual and scientific frameworks of population health, emphasizing public health nursing roles. The course integrates health promotion, risk reduction, and disease prevention across the life span in a range of local and global settings, using case examples that nurses, as part of interdisciplinary teams, will encounter. Community assessment and epidemiological methods are introduced. Health disparities and vulnerability are examined through an ecological lens together with traditional and emerging public health issues. Students will learn about bridging population health and clinical care in order to meet the prevention health needs of individuals, families, and populations.

Actualizing the Role of Professional Nurse

Milliken, Aimee; Ross, Richard E, SJ

Spring 2025

Prepares students to transition into the role of the professional nurse. Responsibilities associated with assuming the role of a professional are explored in relation to furthering individual and social good. Contemporary health care policies and economic pressures are examined for their influence on the delivery of quality patient care. Current ethical and legal standards are highlighted and students are encouraged to reflect on how biases and prejudices influence the provision of patient care. Focus is placed on recognizing and addressing injustices in health care access and quality, which is essential to actualizing the role of professional nurse.

Global Healthcare: Meeting Challenges and Making Connections

Simonelli, Mary C

Spring 2025

This course brings together students and faculty from around the world to discuss and synthesize perspectives on global health, specifically the challenges and common connections experienced across patient centered care, health education, healthcare systems and policy development. The participants will develop a deeper understanding of the particular needs of diverse and underserved populations. Emphasis will be placed on social justice and health of individuals, families, and populations. Through the lens of public health, this course explores assessment of healthcare needs, assurance of a quality healthcare infrastructure, and development of healthcare policy.

This course focuses on the formal process of developing nursing science, study design, and interpreting statistics to evaluate evidence that supports advanced nursing practice. Issues related to the intersection of bias, structural racism, and social determinants with healthcare inequities in research will be discussed. Quantitative and qualitative methods of inquiry are examined. Quality considerations of various research designs are explored. Levels of evidence are identified concerning existing research outcomes. The course emphasizes the evaluation of existing research outcomes as evidence to support clinical practice, demonstrate quality improvement (QI), and advance nursing knowledge.

Advanced Pathophysiology Across the Life Span

Connolly, Carol

Spring 2025

This course focuses on the processes that underlie diseases and dysfunctions that affect individuals across the lifespan. The emphasis is on central concepts of pathophysiology, including alterations in cellular communication, genetic mechanisms, homeostasis, cell growth regulation, metabolism, immunity, and inflammation. These concepts are then applied in a systematic survey of diseases within body systems. Current research, clinical examples, and application to advanced nursing practice are incorporated throughout the course.

NURS800701

Direct Entry Child Health Nursing Theory

Haze, Nanci J

Spring 2025

This course focuses on the nursing care of children with acute and chronic conditions and their families. The primary focus is on child growth and development in relation to wellness and illness. Relevant theories from nursing and other disciplines, research, and evidenced-based guidelines related to the care of children and families are examined. Person/family-centered approaches to promote, restore, and maintain health are emphasized. Biopsychosocial, cultural, legal, and ethical factors influencing the health and care of children and families are explored.

NURS800801

Direct Entry Child Health Nursing Clinical

Haze, Nanci J

Spring 2025

This clinical course focuses on the application of knowledge and implementation of professional nursing practice in caring for children and families. A primary focus is promoting wellness and family-centered care for children with acute illness and chronic conditions. Through interprofessional collaboration, students implement evidence-based practice to provide high quality, safe, cost-sensitive care. Students extend their skills in therapeutic communication, critical thinking, and clinical decision-making to meet the biopsychosocial and cultural needs of children and families from diverse backgrounds. Students demonstrate leadership in providing patient education, advocacy, and transitional care for children and families.

Nursing Leadership in Complex Health Care Settings

Gennaro, Susan; Given, Sarah

Spring 2025

This course prepares graduate nursing students to become leaders in health care. Self-reflection, self-assessment, and values clarification provide the groundwork for a nursing leadership self-development plan. Students will explore a broad range of evidence-based approaches, including leadership and organizational theories, to prepare them to lead in today's complex health care environment including practice, organization, system, academic, and policy arenas. Students will explicate the complexities of health care leadership through the examination of topics such as change management, partnership relationships, innovation, accountability models, organizational culture, diversity and inclusion, conflict management, power, creating trust and psychological safety within teams.

Health Care Policy for Nursing Leaders

Bowser, Diana M;Uveges, Melissa K

Spring 2025

This course prepares nurse leaders and scholars to influence health care and related policies in support of nursing's goals and social justice. The structure and financing of U.S. health care system and roles of government, insurers, providers, and consumers are examined. The relationships among health policy and the social and economic determinants of health are explored through analysis of key issues in health policy. Students engage in strategies to analyze and inform health policy. The course provides the foundation for leadership in interdisciplinary collaborative endeavors to address, through a nursing perspective, health policy issues at the local and national levels.

Methods of Advanced Scholarly Inquiry

Conahan, Catherine;Given, Sarah

Spring 2025

This is the second of four courses to prepare DNP students to conduct an organization approved, scholarly inquiry project to improve health services and patient outcomes. Students critically evaluate the literature and related information to address a health care problem. Scholarly inquiry approaches are presented to enable students to identify a problem, plan change to improve a process or outcome, or develop innovative solutions related to health care delivery. Upon course completion, there will be a faculty and organization approved DNP project charter, which includes the problem, processes, and expected outcomes.

Advanced Health/Physical Assessment across the LifeSpan

Gordon, Leah M;Marshall, Alison O

Spring 2025

This course uses a holistic approach and risk appraisal frameworks as a basis for health assessment across the lifespan. Building on knowledge of basic health assessment, the APRN student performs comprehensive health histories and physical and mental health examinations. Students will incorporate subjective and objective data to evaluate healthy individuals and those with acute and/or chronic disease. The course utilizes learning laboratory experiences, high-low fidelity simulation, and standardized patients to facilitate students' learning. Health promotion, health maintenance and harm reduction concepts are emphasized and applied, taking into consideration life circumstances and cultural, ethnic, and developmental variations.

Population Health Principles, Program Planning, and Evaluation

Sung, Jinhee Park

Spring 2025

The course focuses on care at the aggregate level and examines the multiple determinants of health. The principles of population health and population health management will be explored. Health promotion theories will be analyzed and evaluated. Building on these theories and epidemiologic principles, students will assess and identify health care needs at the population level. Students will design theory-driven, evidence-based interventions to improve population outcomes. Program planning and evaluation in partnership with community stakeholders will be emphasized.

Advanced Clinical Decision-Making in Pediatrics

White, Laura S

Spring 2025

This course builds on previous knowledge of diagnostic reasoning and clinical decision-making as it relates to an advanced understanding of human experiences and the complexities of contemporary pediatric primary care. Through faculty-facilitated simulations, seminars, and clinical cases, emphasis is on the process of clinical decision-making and on scholarly and reflective practice. Theories from nursing and other disciplines, research, and policy are synthesized and integrated into advanced pediatric practice. Principles associated with the delivery of safe and high quality care are critiqued. Ethical, legal, global, and social factors are analyzed in relation to current and developing healthcare policy.

Developmental-Behavioral and Mental Health in Pediatrics

White, Laura S

Spring 2025

This course features a case-based approach that emphasizes early problem identification, advanced evaluation, intervention, and collaborative care for children through young adults with developmental-behavioral or mental health (DBMH) concerns. A biopsychosocial, developmental, interdisciplinary approach is used as the foundation for explicating family-based psychotherapeutic interventions and indications for referral of patients with complex DBMH concerns. Students will build skills to identify and evaluate a variety of multidisciplinary resources to enhance quality DBHM services and promote optimal socioemotional development and functioning. Sociocultural influences are critically analyzed and considered as a basis for advocacy and policy development.

NURS983502

Pediatric Primary Care Advanced Practice Nursing III

St Pierre, Sherri B

Spring 2025

The final of three in the Pediatric Primary Care Advanced Practice Nursing series, this course focuses on theoretical, evidence-based, ethical, and cost-effective clinical approaches to the management of pediatric populations with complex medical, developmental, psychological, and social issues. Focus will be on the care of children and youth with special health care needs. Advanced clinical decision-making and increasing autonomy in practice are emphasized. Opportunities to demonstrate initiative and leadership in designing, implementing, and evaluating health management and health promotion initiatives are integrated throughout the course.

NURS983701

Psychiatric-Mental Health Advanced Practice Nursing Across the Lifespan I

Pounds, Karen G

Spring 2025

The first of three in the Psychiatric-Mental Health Advanced Practice Nursing series, this course focuses on promoting optimal mental health treatment for populations in diverse settings through practice, leadership, and advocacy that is evidence-based, reflective, and ethical. Students examine neurobiological, psychosocial, developmental, and nursing frameworks to conduct mental health evaluations and risk assessments; formulate diagnoses; and implement evidence-based, patient-centered care across the lifespan. Societal influences on mental health, such as race, ethnicity, gender, poverty and violence are explored; and factors related to mental health promotion and treatment are identified.

Individual Psychotherapy for Advanced Practice Nursing

Pounds, Karen G

Spring 2025

This course examines major approaches to individual psychotherapy, including psychodynamic, humanistic, interpersonal, behavioral, cognitive, dialectical behavioral, brief, and multicultural perspectives. Commonalities and differences among the processes and techniques are explored. Selected theorists and their approaches to psychotherapy will be evaluated as examples of major schools of thought concerning the nature of the psychotherapeutic relationship. Applications among diverse individuals and populations across the lifespan are critically examined.

Nurse Anesthesia Clinical Practice III

Vitale, Caitlin M

Spring 2025

This course, the third in a 6-course sequence, provides the nurse anesthesia student with experience in caring for patients requiring complex and specialty surgical procedures. Students gain experience with subspecialties and/or special populations. Didactic content presented during NURS9852, Advanced Practice Principles for Nurse Anesthesia II, is applied to patient care through seminar, simulation and clinical practice. Students transition from the advanced beginner to the competent nurse anesthetist level depending on patient complexity. Experienced nurse anesthetists and physician anesthesiologists function as mentors.

NURS986801

Cardiovascular Physiology and Pathophysiology for Nurse Anesthesia Practice

Emery, Susan A

Spring 2025

This course builds on basic concepts of the anatomy, physiology, and pathophysiology of the cardiovascular system. A detailed examination of the anatomy and physiology of the heart and circulatory system forms the basis for discussion of common and uncommon diseases of the cardiovascular system. Key components of the history and physical exam together with diagnostic testing inform pre-anesthesia assessment. Anesthetic implications for the patient with cardiovascular system co-morbidities form the basis for the development of an individualized plan of anesthesia care, including the need for specific monitoring modalities.

Palliative Care Courses: Summer 2024

HLTH770001

Serious Ill, Death, and Dying

Tabloski, Patricia

Summer 2024

This course provides an opportunity for examination of personal, professional, and societal beliefs and perspectives on serious illness, death, and dying across the lifespan. Students become aware of and sensitized to personal assumptions, biases, attitudes and reactions to serious illness, death, and dying. Philosophies, principles, and models of palliative and end-of-life care are discussed. Students develop an appreciation for individual and family coping processes throughout serious illness, death, dying, and bereavement. Students explore communication and bio-psycho-social-spiritual strategies that can be used to partner with individuals and families to maximize quality of life throughout serious illness, death, and dying.

Genomics in health care and society

Dwyer, Andrew A

Fall 2024

This course focuses on genomics in health care and the ethical, legal, and societal implications thereof. The emphasis is on developing foundational knowledge in genomics and genomic competencies for care across the lifespan. Central concepts include modes of inheritance, gene-environment interactions, genetic testing, pharmacogenetics, ethical considerations, and person-centered genomic health care. These concepts are then applied in active learning exercises. Current research, clinical examples, and application to advanced nursing and interprofessional practice are incorporated throughout the course.

Examining Diversity in Nursing and Health Care

Gordon, Leah M;Nguyen, Tam H

Fall 2024

This course is designed to help students develop foundational insights regarding diversity as an all-inclusive concept with complex intersections. It will focus on the professional nurse as a multifaceted cultural being with a network of identities and group affiliations that serve as both resources and barriers in the development of effective and meaningful patient/family-provider interactions. The primary goals of this course involve identifying sources of difference, deconstructing sociopolitical hierarchies, and recognizing the strengths and challenges inherent in diverse societies. The course will emphasize inclusive leadership strategies for transforming care delivery systems across multiple health care contexts.

Mental Illness: Social and Clinical Perspectives

Goodman, David M

Summer 2024

Provides overview of theoretical models and phenomenology currently defining the field of abnormal psychology, focusing particularly on socio-cultural contributions to conceptualizations of mental illness and distress. First half of course reviews and critiques current constructions of the nature of mental illness, as well as classification, assessment, and treatment of mental illness. Second half highlights specific forms of mental illness, with attention to the causes and subjective experience of psychopathology.

Introductory Statistics

Borowiec, Katrina

Summer 2024

This course provides an introduction to quantitative research, descriptive statistics, inferential statistics, and null hypothesis significance testing in the context of z tests for proportions, t tests for means, and simple linear regression. In each area, students learn how to apply statistical procedures, interpret concepts and results, effectively display data and models, and critically evaluate evidence and implications. Software instruction is provided for IBM SPSS Statistics, R, Stata, and G*Power.

Psychological Responses to Humanitarian Crises

Okunoren, Oladoyin C

Summer 2024

This course develops a critical framework for understanding the psychological and social effects of selected natural and unnatural disasters and current responses to them. Course goals include: the development of a critical understanding of gendered oppression in contexts of war and humanitarian crises; an analysis of selected psychosocial interventions in the context of development and humanitarian aid; a critical analysis of international human rights as potential resources; and, the formulation of programmatic responses for mental health and human rights workers seeking to creatively respond to women and child survivors in collaboration with community-based indigenous workers and advocates. This course was previously listed as APSY7471

Neurological and Biological Bases of Behavior

Trantham, Sidney M

Summer 2024

Health professionals work with many clients where biological and neurological factors play a role in influencing or exacerbating psychological problems. This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work

APSY741901**Applied Adolescent Development****Rich, Emma Highsmith****Summer 2024**

This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

Psychology of Trauma in Adulthood: Theory, Intervention, and Cultural and Social Justice Perspectives

Swaroop, Sujata R

Summer 2024

The focus of this course is on the biopsychosocial aspects of traumatic stress, including an exploration of the psychological sequelae of various types of trauma (e.g., physical abuse, sexual assault, political trauma) across diverse adult populations. Assessment and clinical and community-based interventions concerning traumatic stress will be discussed with attention to cultural and linguistic diversity. Social justice and human rights in the context of interpersonal and collective violence is also examined.

Counseling, Developmental, and Educational Psychology Courses: Fall 2024

APSY103001

Child Development

MacEvoy, Julie P

Fall 2024

This is one of two foundational courses (APSY 1030 & APSY 1031) focused on multiple dimensions of child development from the prenatal period through middle childhood, with a consideration of applications to educational and other applied settings. The course offers an overview of the array of research methods used in developmental psychology; normative trends in physical, social-emotional, and cognitive development; and factors and processes that affect developmental change and optimize child development. Key questions in the field of developmental psychology, such as "How do nature and nurture together shape development?" and "How do children become so different from one another?" will recur across topics to help students establish a coherent understanding of child development.

Credits: 3

Room and Schedule: 245 Beacon Street Room 107 TuTh 09:00AM-10:15AM

Satisfies Core Requirement: Social Science

Lewin-Bizan, Selva

Fall 2024

This is one of two foundational courses APSY1030-APSY1031 that introduce students to the multiple dimensions of child development, and the place of education in promoting healthy development for all children. This course considers the social and cultural contexts that shape developmental and educational processes. Focuses on understanding the nature of contemporary social problems including racism, sexism, ethnic prejudice, poverty, and violence, as they affect children, families, and schooling. Emphasizes the special role of education in linking community resources for an integrated approach to serving children and families.

APSY203201

Cognition and Learning

Vasilyeva, Marina

Fall 2024

This course will introduce students to what the fields of cognitive, developmental, and educational psychology have to say about how humans learn. This includes comparing and contrasting major theoretical approaches to the study of learning, examining the basic cognitive processes involved in learning (e.g., attention, memory, inhibitory control, problem-solving), and considering how social and biological factors affect these processes. The knowledge gained in this course can be used to maximize individual growth and achievement across a variety of real-life contexts. For instance, it can inform the design of classroom instructional practices, professional training seminars, parenting interventions, community programs, and health initiatives.

Adolescent Development

Currie, Charles W, III

Fall 2024

This course introduces the breadth of opportunities and challenges of human development across the adolescent years. It discusses biological, social, psychological, and cognitive changes that occur during adolescence; the role of autonomy, belonging, and motivation in adolescent development; how peers, adults, and technology influence adolescent development; and how adolescents race/ethnicity, gender, sexuality, and academic identities influence their development. Consideration will be given to variability in adolescent development across cultures and contexts, and to the impact of rapid cultural change on youth.

Applied Psychology Practicum: Pathways to Purposeful Work and Life

Trotman, Gracie A

Fall 2024

Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission form the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office , meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice.Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form [HERE](#) (scroll down to the Getting Started section).

Fall 2024

Provides an opportunity to learn a developmental and systems perspective on the nature of family and interpersonal relations. Examines both the nature of interpersonal relations and some of the conditions in contemporary life that are shaping the quality of these relationships. Gives particular emphasis to understanding the self, family life, emotions, and conflicts in field research. Views the concept of interpersonal relations from historical, multicultural, gender, and developmental perspectives.

Social Oppression and Transformation

Mc Intyre, Alice E

Fall 2024

Replacing APSY6348 Culture, Community, and Change This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations-- social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

Trauma and Healing through the Lens of Intimate Partner Violence

Goodman, Lisa A

Fall 2024

This course explores the topic of intimate partner violence (IPV), including physical, sexual, and psychological abuse, from ecological and intersectional perspectives. Drawing on IPV as a core example of interpersonal violence more broadly, five central questions of the course will be 1) What are the psychological consequences of trauma in general, and IPV in particular? 2) How do interpersonal, ideological, and institutional factors shape survivors experience of and responses to trauma 3) How have various systems developed to address the complex social problem of IPV, both for good and for ill? 4) How do intersecting identities, social and material contexts, and institutional structures facilitate and impede healing? 5) How do our own backgrounds and positionalities shape the way we understand IPV and the people who experience, perpetrate, or respond to it? Building empathy, mutual respect, and community both within and outside the classroom will be central concerns.

Counseling Theories

Tummala-Narra, Pratyusha

Fall 2024

The purpose of this course is to learn about the major counseling theories including basic concepts, advantages and limitations, techniques, and the counseling process. There is also a focus on personal exploration aimed at helping students adopt their own personal theory of counseling. Issues of multiculturalism and client diversity will be integrated into all course content.

Adult Development and Aging

Lerner, Jacqueline V

Fall 2024

Explores theories and research on development across early, middle, and late adulthood. Topics include physical, cognitive, social, and emotional development. Both the growth and decline across adulthood are discussed, with attention to prevention and a focus on successful aging. This course offers numerous opportunities for reflection on one's own development as an adult. The course also provides insights into application of adult development to real life situations and is especially helpful to those who wish to work with adult populations.

Health Psychology

Currie, Charles W, III

Fall 2024

Health psychology is the study of how psychology and health interact and influence: health promotion and health risk behaviors, the treatment individuals receive for medical problems, how people cope with stress and pain, and how people behave when they are ill. This course will review these issues across the life course, with special attention to approaches which influence health promoting behaviors and the treatment of illnesses.

Psychology of Work

Blustein, David L

Fall 2024

Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

APSY439702**Social Issues and Social Policy****Coley, Rebekah L****Fall 2024**

This seminar provides participants with a foundation of knowledge concerning current social policy issues involving children and families in the U.S., with a particular focus on issues related to poverty and disadvantage. Considers how research, politics, and advocacy play a role in the initiation, implementation, and evaluation of policy, and how social policies impact children and families. Seeks to help students explore scientific evidence and social perceptions, and think critically about central social issues and social policies.

Positive Youth Development

Lerner, Jacqueline V

Fall 2024

Applied Developmental Science (ADS) uses research about human development to inform programs and policies pertinent to topics of social importance. Students will integrate readings about and class discussions of ADS theory and research with information about community-based programs. The focus of this class will be a discussion and analysis of the role of developmental research and, in particular from longitudinal research (for example, the 4-H Study of Positive Youth Development), in framing applications (programs and policies) for promoting positive development among youth. In addition to an overview of the theoretical models that are the bases of the PYD perspective, the course will present the work of researchers who have conducted applied developmental studies of adolescents and their ecological settings in order to advance understanding of how individuals and context are involved across the adolescent years in providing a basis for both healthy and problematic development. Critical Perspectives on Research Methodology

Russell, Michael K

Fall 2024

This course explores foundational concepts that influence the methodologies and methods employed by social science researchers. Core topics explored include: the Enlightenment's influence on scientific inquiry; the influence of empiricism, positivism, and universalism on social science research; objectivity and subjectivity; verification and falsification; quantification and standardization; the construction of mental ability and intelligence. Also explored are: the influences White racial framing has and continues to have on the research questions posed, the methods embraced, interpretations made, and discourse produced by social science researchers; and the role critical theory and anti-colonization have begun to play in reorienting social science research to challenge various forms of oppression, with a specific focus on racialized oppression. Upon completion of the course, participants will be positioned to critically examine quantitative methods and measurement techniques commonly employed for educational research that are introduced in future coursework.

Foundations of Counseling: Integrated Behavioral Health I

Louis, Elizabeth F

Fall 2024

The purpose of this yearlong course is to introduce counseling students to an integrated behavioral health (IBH) framework that will help facilitate their learning and understanding of this model. Students will learn fundamental principles, clinical skills, and have the opportunity to expand upon their professional identity. Students will: a) learn to examine the multiple settings of IBH, b) learn to develop strong interdisciplinary relationships, c) gain practical knowledge, skills, and techniques needed to engage competently in professional practice working with patients from diverse backgrounds and within different healthcare systems, d) develop insight into ones cultural background and the influence of personal identities and values in their engagement with patients and professionals of the field, e) identify and understand social justice issues that intersect with the realities of patients and the ways they impact patients quality of life and the wellness of communities, f) foster an awareness of the role of ethical considerations, relevant professional development issues, the role of supervision, and self-care of the counselor. , and g) prepare for clinical internships available in the second year of the program. Through weekly lab experiences, students will engage in further discussion, practice their skills, and implement their knowledge of IBH.

IBH Practitioner Skills and Multidisciplinary Teamwork

Dauphinais, Emma L

Fall 2024

This course is intended to provide the learner with specialized skills necessary in delivering behavioral health assessment/intervention in an integrated medical setting. The course will focus on how to manage a caseload in an integrated care setting (e.g., maintaining open access, triage as necessary, determining who could benefit from targeted treatment) as well as how to conceptualize cases, formulate treatment plans, provide documentation appropriate for the setting and crisis intervention strategies. Additionally, we will discuss the importance of collaboration and information sharing with other team members, as well as how to provide consent for this communication and the potential ethical issues that can arise. We will discuss the nuanced role that an IBH clinician has in managing chronic disease, engaging health promotion, and assessing and treating special populations. Lastly, the role of an IBH practitioner extends beyond intervention in the clinic (e.g. telehealth), and thus we will also learn the importance of interdisciplinary consultation and referral as well as strategies for outreach to community resources and settings in order to support both clinic and patient in whole person health.

Applied Adolescent Development

Seider, Scott C

Fall 2024

This course is designed to provide students with an overview of the theoretical and empirical knowledge base concerning adolescent development. In particular, four broad areas will be considered: (1) psychological, biological, and cognitive transitions; (2) central developmental tasks of adolescence; (3) primary contextual influences; and (4) prevalent types of problematic functioning that emerge during adolescence. The overarching goals of the course are to provide a solid and broad understanding of how and why adolescents develop in the manner they do, and to extend this developmental understanding into research, application, and practice.

Theories of Counseling and Personality I

Mahalik, James R

Fall 2024

First part of a year-long sequence examining personality and counseling theories. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling. To introduce students to major theories of personality in the field of psychology and how theories are applied in constructing counseling and psychotherapy models. Students will focus on humanistic, behavioral, and cognitive personality theories and how they become operationalized in person-centered, behavioral, and cognitive counseling models, respectively. In addition to examining the theoretical foundations, client and counselor dimensions, techniques, and the active ingredients of change for these major models of personality and counseling, students examine how socio-cultural context contributes to client presenting concerns and may be addressed in counseling. Section .01 for Mental Health Counseling students ONLY Section .02 for Mental Health Counseling students ONLY

APSY750101

Urban Life and Mental Health Counseling I

Lewis Harris, Treniece

Fall 2024

This is a year-long course aimed at understanding the mental health counseling concerns of people who live in urban settings. In 2020 80% of the United States population lived within urban areas (U.S. Census, 2020). Given increasing urbanization across the globe, some research projects that by 2050 two thirds of the global population will live in urban areas. As such it is imperative for mental health counselors to understand the unique circumstances of urban life and how they impact lifespan development and mental wellbeing. This course will use the lenses of ecological, decolonial and liberation psychology theory to critically examine sources of mental distress, mental wellness as well as counseling approaches used to enhance the lives of urban dwellers. Lecture, reflective writing practices, and group discussions emphasizing critical consciousness will be used to foster learning. Moreover, students will engage in collaborative group work to learn the role of social justice advocacy in addressing structural problems impacting mental health outcomes.

This course reviews the theoretical and empirical literatures pertinent to the study of emotional and social development across the life span. Perspectives derived from the disciplines of biology, psychology, anthropology, sociology, and history are presented. The interrelations between social and affective processes, and their association with familial, societal, cultural, and historical context of development are discussed. Issues derived from social psychology, such as group processes, will also be discussed. Methodological problems present in these literatures and resultant conceptual and empirical challenges involved in developing a life span understanding of social and affective processes are reviewed.

Advanced Psychological Assessment

DeCandia, Carmela J

Fall 2024

Restricted to Ph.D. students in Counseling Psychology. Others by instructors permission. Provides an introduction to a variety of assessment tools commonly used to diagnose psychological disorders and inform treatment planning for children, adolescents, and adults. Assessment tools covered in this course include projective and personality tests, intelligence tests, tests of achievement, neuropsychological tests, and symptom checklists. Focus will be upon the theory, administration, scoring, and interpretation of these tools. Critical issues in the use of these measures, including ethical, psychometric, social, and legal concerns will be addressed. Students will complete and present integrated test batteries.

Cognitive-Affective Bases of Behavior

Miele, David B

Fall 2024

Ph.D. students only. All others must get instructor approval.. This course discusses theories of human development and examines empirical research on cognitive and affective processes underlying behavior. In addressing the cognitive bases of behavior, it explores key mental processes (e.g., attention, memory, problem solving) and constructs (e.g., schemas, heuristics) that have been instrumental in understanding everyday functioning. The socio-affective bases of behavior addressed in the course include emotions, temperament, and self-concept. The students in this course explore fundamental theoretical questions, such as the role of biology and environment in development, and consider practical applications of current theoretical and empirical knowledge concerning the bases of human behavior.

Quantitative Research Design in Counseling and Developmental Psychology

Pieterse, Alex

Fall 2024

Doctoral students in Counseling and Developmental Psychology. Others by instructor's permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

Seminar in Counseling Theory

Trantham, Sidney M

Fall 2024

Doctoral students in Counseling Psychology only. Deepens students' understanding of psychological theory, and facilitates a life-long journey of integrating theory with practice. Provides knowledge and understanding of traditional and contemporary theories of psychotherapy, and helps students develop a critical perspective that will enable them to evaluate the usefulness of these theories for their clinical work with clients. Class discussions cast a critical eye on the development of the discipline, including its philosophical and contextual roots, and analyze the values inherent in mainstream psychological practice. Considers strengths and limitations of each school, and uses case examples to gain expertise in applying theory to practice.

Counseling Psychology in Context: Social Action, Consultation, and Collaboration

Goodman, Lisa A

Fall 2024

For doctoral students in Counseling Psychology, and others by permission only. This is a year-long course, 1 credit in the fall, 2 credits in the spring. Accompanying the First Year Experience (FYE) practicum, exposes students to research and practice at the meso- (community, organizations) and macro (government, policy, social norms) levels, in addition to the more traditional micro (individual) level. Students discuss their personal experiences within their FYE placement and read and discuss a series of articles and chapters central to the developing fields of critical psychology, liberation psychology, or counseling with a social justice orientation.

Counseling, Developmental, and Educational Psychology Courses: Spring 2025

APSY103001**Child Development****MacEvoy, Julie P****Spring 2025**

This is one of two foundational courses (APSY 1030 & APSY 1031) focused on multiple dimensions of child development from the prenatal period through middle childhood, with a consideration of applications to educational and other applied settings. The course offers an overview of the array of research methods used in developmental psychology; normative trends in physical, social-emotional, and cognitive development; and factors and processes that affect developmental change and optimize child development. Key questions in the field of developmental psychology, such as "How do nature and nurture together shape development?" and "How do children become so different from one another?" will recur across topics to help students establish a coherent understanding of child development.

Cognition and Learning

Davidesco Klinger, Ido

Spring 2025

This course will introduce students to what the fields of cognitive, developmental, and educational psychology have to say about how humans learn. This includes comparing and contrasting major theoretical approaches to the study of learning, examining the basic cognitive processes involved in learning (e.g., attention, memory, inhibitory control, problem-solving), and considering how social and biological factors affect these processes. The knowledge gained in this course can be used to maximize individual growth and achievement across a variety of real-life contexts. For instance, it can inform the design of classroom instructional practices, professional training seminars, parenting interventions, community programs, and health initiatives.

Adolescent Development

Schmid-Callina, Kristina L

Spring 2025

This course introduces the breadth of opportunities and challenges of human development across the adolescent years. It discusses biological, social, psychological, and cognitive changes that occur during adolescence; the role of autonomy, belonging, and motivation in adolescent development; how peers, adults, and technology influence adolescent development; and how adolescents race/ethnicity, gender, sexuality, and academic identities influence their development. Consideration will be given to variability in adolescent development across cultures and contexts, and to the impact of rapid cultural change on youth.

Applied Psychology Practicum: Pathways to Purposeful Work and Life

Liang, Belle

Spring 2025

Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission form the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office , meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice.Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form [HERE](#) (scroll down to the Getting Started section).

Applied Psychology Practicum: Pathways to Purposeful Work and Life

Morelli, Gilda A

Spring 2025

Preference will be given to APSY majors who are Juniors and Seniors and have completed at least 12 APSY credit hours prior to the semester of Applied Psychology Practicum (APSY2152) enrollment. Sophomores and students who are minoring in Applied Psychology interested in taking the class may join with permission form the LSOEHD Undergraduate Associate Deans Office, if space is available. Lynch Undergraduate Associate Dean's office approval required Provides an introduction to the applications of psychological theory within various human and community service contexts. Readings and discussion contribute to critical analyses of how social issues and social problems are situated differently due to gender, race, social class and diversities of language, ability, sexuality, etc. Students volunteer for 8-12 hours per week at a site selected with the assistance of the Field Placement office , meet in a weekly seminar, keep a journal of their field experience, and complete reading and written assignments that integrate theory and practice. Early registration is strongly encouraged to ensure support finding a practicum placement. Students who do not secure a placement by the university add/drop date cannot continue in the course. Students should begin the process of determining a practicum placement by completing the Practicum Placement form [HERE](#) (scroll down to the Getting Started section).

Research Methods for Applied Psychology

Lewin-Bizan, Selva

Spring 2025

The course prepares professionals in the fields of human development, psychology, and education to understand and design research studies related to applied topics. Students are introduced to fundamental principles of research methodology and learn about different types of research, including quantitative, qualitative, and mixed-method studies. The emphasis is on developing skills that will enable students to comprehend common research procedures, critically evaluate existing research, develop studies to address specific research questions, and communicate the findings clearly and accurately.

APSY224301

Social Oppression and Transformation

Mc Intyre, Alice E

Spring 2025

Replacing APSY6348 Culture, Community, and Change This course engages the topic of social oppression and transformation from social and psychological perspectives. Using research, scholarship, and creative work from psychology, education, sociology, history, and popular culture, students will explore institutional, ideological, interpersonal, and individual aspects of oppression across four social locations-- social class, gender, race, and sexual orientation. For each location, students will start with their own stories of privilege and oppression; move to an empathic engagement with the stories of others; broaden to understand the way that structural dynamics shape those stories; and finally, dive into specific social issues, including family poverty, violence against women, mass incarceration, and LGBTQ homelessness. Throughout the course, students will have the opportunity to study and reflect on change and transformation, including ways in which to incorporate learning from this course into personal and professional lives.

Spirituality, Religion, and College Student Experience

James, Michael J

Spring 2025

Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

Adult Development and Aging

Lerner, Jacqueline V

Spring 2025

Explores theories and research on development across early, middle, and late adulthood. Topics include physical, cognitive, social, and emotional development. Both the growth and decline across adulthood are discussed, with attention to prevention and a focus on successful aging. This course offers numerous opportunities for reflection on one's own development as an adult. The course also provides insights into application of adult development to real life situations and is especially helpful to those who wish to work with adult populations.

Psychology of Gender

Mahalik, James R

Spring 2025

This course examines biological, social, and psychological factors that interact in contributing to men's and women's gender roles. Within the social domain, particular attention will be given to how culture affects the social construction of gender, and how factors such as racism and homophobia interact with societally prescribed norms for men and women. The second half of the class will focus on the effects of gender roles on mental and physical health, social problems like aggression, and issues in education, work, and relationships including family life.

Health Psychology

Keum, Tae Hyuk

Spring 2025

Health psychology is the study of how psychology and health interact and influence: health promotion and health risk behaviors, the treatment individuals receive for medical problems, how people cope with stress and pain, and how people behave when they are ill. This course will review these issues across the life course, with special attention to approaches which influence health promoting behaviors and the treatment of illnesses.

Psychology of Work

White, Paul Dennis

Spring 2025

Work is one of the central roles in life, encompassing much of our time, energy, and effort. Applied psychology has a deep foundation in the psychology of work, which represents a key context for people to interact socially and economically with their communities. In this course, students will learn how psychology can be used to enhance knowledge of the role of work in career development, organizational life in the private and public sectors, and within broader social and political contexts. Students will also explore the impact of the future of work on individuals and communities, and the ways in which the psychology of work can inform meaning, purpose, and social justice.

Prevention and Intervention Strategies for Children, Families, and Communities

Dearing, Eric, PHD

Spring 2025

This course is designed to provide an overview of key issues that arise in the development, implementation, evaluation, and scaling of prevention and intervention programs that intersect with the field of psychology. Key issues include the challenges and opportunities of research-practice partnerships, the critical role of theories of change, diverse perspectives on evidence, and unintended consequences of good intentions. A variety of exemplar prevention and intervention programs are used to illustrate and analyze these key issues using theoretical, conceptual, and empirical works from psychological science.

APSY641001**Introductory Statistics****Brown, Nathaniel****Spring 2025**

This course provides an introduction to quantitative research, descriptive statistics, inferential statistics, and null hypothesis significance testing in the context of z tests for proportions, t tests for means, and simple linear regression. In each area, students learn how to apply statistical procedures, interpret concepts and results, effectively display data and models, and critically evaluate evidence and implications. Software instruction is provided for IBM SPSS Statistics, R, Stata, and G*Power.

The science of learning has a tremendous potential for enhancing educational outcomes and job performance. Yet findings obtained in laboratory settings are not easily replicated, expanded, and integrated into applied settings. This course will consider key issues to consider in translating learning science into practice across diverse contexts. Students will consider examples of how findings from the science of learning have been applied either successfully or unsuccessfully to practice in fields such as education, counseling, design, and business.

Neurological and Biological Bases of Behavior

DeCandia, Carmela J

Spring 2025

Health professionals work with many clients where biological and neurological factors play a role in influencing or exacerbating psychological problems. This course will touch on a variety of topics in psychology from a biological perspective that will be helpful in clinical practice. Areas to be covered include the basic structure and function of neurons, basic neuroanatomy, cognitive functions, substance abuse, addictions, and psychopharmacology. Discussion of these topics will be approached from a biopsychosocial approach. Students are encouraged to ask questions throughout the lecture to both clarify material and to work toward application of the material to clinical work

Foundations of Counseling: Integrated Behavioral Health II

Louis, Elizabeth F

Spring 2025

The purpose of this yearlong course is to introduce counseling students to an integrated behavioral health (IBH) framework that will help facilitate their learning and understanding of this model. Students will learn fundamental principles, clinical skills, and have the opportunity to expand upon their professional identity. Students will: a) learn to examine the multiple settings of IBH, b) learn to develop strong interdisciplinary relationships, c) gain practical knowledge, skills, and techniques needed to engage competently in professional practice working with patients from diverse backgrounds and within different healthcare systems, d) develop insight into one's cultural background and the influence of personal identities and values in their engagement with patients and professionals of the field, e) identify and understand social justice issues that intersect with the realities of patients and the ways they impact patients' quality of life and the wellness of communities, f) foster an awareness of the role of ethical considerations, relevant professional development issues, the role of supervision, and self-care of the counselor, and g) prepare for clinical internships available in the second year of the program. Through weekly lab experiences, students will engage in further discussion, practice their skills, and implement their knowledge of IBH.

Short Term Therapies & Integrated Behavioral Healthcare

Clotet Vila, Laia

Spring 2025

This course is designed to provide in-depth training and skill development in evidence-based theoretical models of brief therapy within an Integrated Behavioral Health framework. Counseling students will develop an understanding of the fundamental principles of brief therapy models, including Solution Focused Brief Therapy; Focused Acceptance and Commitment Therapy; Motivational Interviewing (MI); and Brief Cognitive Behavioral Therapy. Other areas of emphasis will include crisis intervention, posttraumatic stress disorder management in integrated primary care; addressing substance use disorders in primary care; and trauma-informed integrated primary care. Students will also be given the opportunity to translate this understanding into practice of techniques and skills from these brief therapies.

APSY731401

Health Inequity

Pryor, Damon A

Spring 2025

This course provides an overview of disparities in health status and the delivery of healthcare in the US. Students will explore relationships among individual characteristics such as gender identification, education, income, literacy, race, ethnicity, culture, acculturation, disability, age, and sexual orientation; interpersonal factors such as communication with healthcare providers, family and social ties, and discrimination; and societal-level factors such as neighborhood and community context, healthcare organizations, economics, politics and policies and seek to understand how those factors shape health behaviors, access to health care services, unequal treatment, and health status. This course will underscore the importance of developing structural competency, which is a critical understanding for systems that influence health outcomes above individual interactions. Students will critically examine how to utilize these individual and systemic characteristics when engaging in case conceptualization and treatment planning and identify steps that practitioners and leaders can use to address disparities within their practice and community. Lastly, students will examine the importance of outreach to community resources, agencies, and settings (e.g., community centers, senior centers, churches, shelters) in order to support both clinic and patient in whole person health.

Issues in Counseling Men

Mahalik, James R

Spring 2025

Examines issues related to counseling men by examining the influence of socially constructed roles on men, their families, and broader society. Specifically examines how men's roles impact on their personal development through the life span as well as on men's health, roles as partners and fathers, and how men approach mental health services. Covers issues specific to counseling men from access to services to creating therapeutic environments for men. Uses case analysis of transcripts and videotapes.

Theories of Counseling and Personality II

Lewis Harris, Treniece

Spring 2025

Second part of a year-long sequence examining personality and counseling theories. Continues introduction to major theories of personality in the field of psychology and how those theories are applied in constructing counseling and psychotherapy models. Focuses on psychoanalytic personality and counseling models as well as critical theory as manifested in the psychology of gender and counseling models that integrate gender into working with clients. Specifically, for each model, students will examine the theoretical foundations developed in its theory of personality, relevant client and counselor dimensions, counseling techniques, and the active ingredients of change that each model uses in bringing about change.

APSY750201

Urban Life and Mental Health Counseling II

Lewis Harris, Treniece

Spring 2025

This is a year-long course aimed at understanding the mental health counseling concerns of people who live in urban settings. In 2020 80% of the United States population lived within urban areas (U.S. Census, 2020). Given increasing urbanization across the globe, some research projects that by 2050 two thirds of the global population will live in urban areas. As such it is imperative for mental health counselors to understand the unique circumstances of urban life and how they impact lifespan development and mental wellbeing. This course will use the lenses of ecological, decolonial and liberation psychology theory to critically examine sources of mental distress, mental wellness as well as counseling approaches used to enhance the lives of urban dwellers. Lecture, reflective writing practices, and group discussions emphasizing critical consciousness will be used to foster learning. Moreover, students will engage in collaborative group work to learn the role of social justice advocacy in addressing structural problems impacting mental health outcomes.

Issues in Short Term Counseling

Prosper, Vanessa

Spring 2025

This course is designed to introduce students to the techniques and issues related to the practice of short-term therapy. Special attention is given to current trends in health care delivery, including the managed care environment and how to adapt various models to this environment. Students will learn a number of coherent strategies to treat a variety of presentations and populations in a short-term model. They will also gain an understanding of the complexities of providing quality mental health care in today's clinical settings.

Multilevel Regression Models

O'Dwyer, Laura

Spring 2025

This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

APSY862001**Child and Family Social Policy****Coley, Rebekah L****Spring 2025**

Examines a range of social issues relevant to children and families and the social policies directed at such issues. Discusses policy creation, implementation and evaluation, and considers the roles of advocacy, research and politics. Addresses how current social policies impact children and families and compares U.S. policies to those in other industrialized countries. Likely topics include poverty, economic redistribution, work/family balance, early childhood education, educational reform, and other issues. The seminar aims to help students think critically about the political and empirical issues involved in assessing social issues and developing and evaluating social policies.

Advanced Topics in Cognition and Learning

Laski, Elida V

Spring 2025

For Ph.D. students in Applied Developmental Psychology, open to ADEP MA students and other doctoral students with instructor's permission.. This course will explore the basic processes underlying human cognition and the role of these processes in acquiring knowledge in key domains. Our main goal is to provide our students with a foundational framework in cognitive psychology that can be applied to better understand human behavior and learning. The first part of the course will focus on perception, attention, memory, categorization, and reasoning. The second part of the course will focus on learning in key domains of cognition, such as mathematics, science, and language.

Critical Race Theory and Intersectionality

Muniz Castro, Raquel

Spring 2025

This doctoral course explores the epistemological, methodological, and pedagogical uses of Critical Race Theory, Intersectionality (CRT/Int), and Settler Colonialism, in the examination and deconstruction of institutionalized and race-based disparities and inequalities in societal institutions, including, but not limited to, K-12 education, higher education, psychology, and the law. Course texts and student work will utilize both academic and popular culture texts. The course assumes and builds upon a foundational knowledge of social theories, and the ways in which self, institution and society are connected.

Quantitative Research Design in Counseling and Developmental Psychology

Pieterse, Alex

Spring 2025

Doctoral students in Counseling and Developmental Psychology. Others by instructor's permission. This is a year-long course, 1 credit in the fall, 2 credits in the spring. In this year-long seminar, students examine quantitative research designs and application employed in the Counseling and Developmental Psychology literatures, including randomized, nonrandomized, cross-sectional, and longitudinal designs. Students present and critique published research exemplifying specific designs, propose empirical studies that could advance counseling and developmental psychology, and present findings from their own empirical work.

Dissertation Seminar in Counseling/Developmental Psychology

Lerner, Jacqueline V

Spring 2025

This is a year-long course, 1 credit in the fall, 2 credit in the spring. This course is designed to assist students in the preparation of a formal doctoral dissertation intent. All aspects of dissertation development will be discussed. Students must present a series of draft proposals for faculty and student reaction. An acceptable dissertation intent is required for completion of the course.

Educational Leadership and Higher Education Courses: Summer 2024

ELHE683001

Interpretation and Evaluation of Research

Littenberg-Tobias, Joshua S

Summer 2024

This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Education Law and Public Policy

O'Sullivan, Erin

Summer 2024

Email elhe@bc.edu or department permission from the ELHE department. This course addresses the political and legal aspects of the role of education in our democratic society. Provides an introductory survey of public policy issues and laws governing preschool, elementary, secondary, and higher education. Included are such topics as religious freedom, free speech, and due process; the liability of educational institutions and educators; the legal distinctions between private and public institutions; student and parent privacy rights; disability rights; and the promotion of educational equity among all groups regardless of gender, sexual orientation, language, race, religion, ethnicity, or socioeconomic background.

Counseling Techniques in Higher Education

Walsh-Blair, Lynn Y

Summer 2024

Provides an introduction to theoretically-based counseling skills for professionals in higher education and other education and community settings. The areas of communications skills involving the use of role-playing, observation, and practice components are emphasized. Postsecondary case studies cover a range of counseling issues and are applicable to a wide range of settings involving late adolescents and adults.

*Please be aware if you have consulted with the instructor at University Counseling Services. If so, please contact the instructor or ELHE Department Chair to address any concerns about your confidentiality as a UCS client or your ability to register for this course.

Summer Institute WES-CIHE

Blanco, Gerardo L

Summer 2024

This annual symposium offered by World Education Services (WES) and the Center for International Higher Education (CIHE) offers a space for graduate students in international higher education to share their work and learn from more established mentors in the field. BC students are eligible to receive credit for attending the conference. Those wishing to earn credit for participation will be required to attend the entire event and submit a 1500-2000 word paper on a topic discussed at the conference. The event runs for two full days in person, and the paper will be due by the end of June.

Catholic Higher Ed Administration&Leadership

James, Michael J

Summer 2024

Please see website for more information on the Institute for Administrators in Catholic Higher Education: <http://www.bc.edu/schools/lsoe/cce/highered/iache.html>. This course explores contemporary issues, organizational and governance structures and distinct characteristics of successful Mission leadership for administrators at Catholic Colleges and Universities focusing on effective campus policy development, strategic planning, and assessment. Students will engage research, historical literature, Church documents, lectures and group exercises. A unique component to this course is participation in the Institute for Administrators in Catholic Higher Education (IACHE) - a four-day seminar for senior administrators and leaders in Catholic higher education where internationally recognized scholars and practitioners address the challenges and opportunities that Catholic higher education faces on a daily basis.

Credits: 3

Transforming the Field of Catholic Education

Miller, Andrew F

Summer 2024

This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

Applied Education Policy in the Community Context

Edwards, Earl J

Summer 2024

This course is designed to show students how they can leverage their education policy expertise to support children in their community. In the course, students will work directly with an educational organization that advocates for or creates policies that impact the access and quality of education for historically marginalized students. The readings, discussions, and assignments will deepen students knowledge of educational policy issues and the process for policy implementation. This course material will focus on school boards, community advocacy organizations, and state and local educational agencies.

ELHE770101

Introduction to Educational Leadership and Change

Gough, Bridget A

Summer 2024

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

Education Policy Analysis

Doss, Christopher J

Summer 2024

This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

Leadership for Social Justice

Taylor, Kris A

Summer 2024

This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Using Data and Evidence for School Improvement

Graves, Kenneth E

Summer 2024

This course prepares policy-, district-, and school-level leaders to manage initiatives involving continuous improvement and data-informed inquiry. These activities include: engaging with policy or program evaluations, leading faculty in data-informed cycles of inquiry, and evaluating commonplace data practices for issues of equity and social justice. By the end of this course, students should be able to develop a plan for data-informed improvement in a school or other organization. Access to a school or other organization is encouraged, but not required.

Organizational Theory

Cho, Vincent

Summer 2024

Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in how groups get things done (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information

Brunelle, Maryellen

Summer 2024

The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master's Comprehensive exam ELHE8100

Summer 2024

The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond

Educational Leadership and Higher Education Courses: Fall 2024

ELHE337601

Ed Leadership/Higher Ed

Hogan, Deborah V

Fall 2024

This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings

Interpretation and Evaluation of Research

Littenberg-Tobias, Joshua S

Fall 2024

This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Higher Education in American Society

James, Michael J

Fall 2024

An introduction to higher education in America, this course focuses on the complex relationships between colleges and universities, and the political and social systems of society. This analysis includes a historical perspective on the evolution of American higher education, and especially the development of the contemporary university since the beginning of the twentieth century. Attention is also paid to the impact of federal and state governments on higher education; the role of research in the university; issues of accountability, autonomy, and academic freedom; the academic profession, student politics and culture; affirmative action issues; and others.

Academic Writing for Education Leaders

Dept, Dept

Fall 2024

This course is designed to support ELHE Masters students in meeting the demands of written assignments included as part of their program of study. These written assignments may take a variety of forms, such as an observation write-up, an equity audit, a literature review, or an improvement plan, depending on the course. The pacing of the course is designed to align with the timeline and writing process in a typical Masters-level class. The course will focus on honing skills for analytic writing, including developing a line of inquiry; finding, evaluating, and synthesizing research; crafting a compelling argument; and enhancing clarity of writing. This course will include both synchronous and asynchronous components. Live Zoom sessions will be run workshop-style, with opportunities for students to get feedback from peers and from me on their writing.

Student Affairs Administration

DeVeau, Laura

Fall 2024

Student affairs professionals in post-secondary institutions contribute to student learning and personal development through a variety of programs and services. This course focuses on the design of campus environments that promote student development and contribute to the academic mission of higher education. Special attention will be given to the history, philosophy, and ethical standards of the student affairs profession, and to the relation of theory to contemporary student affairs practice. In addition, the course will examine how changing forces in the demographic, social, legal, and technological environment of higher education affect fundamental issues in professional practice.

Fall 2024

The purpose of this course is to introduce students to aspects of student affairs assessment including: 1) understanding different approaches to assessment, 2) choosing appropriate research designs and methods, and 3) following professional standards and guidelines. At the end of this course students will be able to read, interpret, and critique research and assessment in student affairs and higher education, and design appropriate assessments in the field of student affairs.

ELHE750501

Transforming the Field of Catholic Education

Miller, Andrew F

Fall 2024

This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

Special Topics in Higher Education: Faith & Formation in Higher Education

James, Michael J

Fall 2024

This course provides an in-depth exploration of spirituality, faith, and formation within the context of higher education, with a specific focus on Catholic institutions. Drawing from interdisciplinary perspectives, including theology, sociology, psychology, and education, students will examine the theoretical foundations and practical implications of integrating spirituality and faith into student development, institutional culture, leadership formation, and policy development.

Introduction to Educational Leadership and Change

Johnson, Lauri D

Fall 2024

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

Education Policy and Practice

Anderson, Daniel

Fall 2024

This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

Ethics and Equity in Education

Icin, Eylem B

Fall 2024

The course explores how schools are used as a vehicle of the state to de-culturalize various communities of people throughout the country's history. Students will explore how schools can more appropriately promote respect for valuing diversity as a generative source of the country's vitality and its relationship to the global village. The role of educators is not only to act ethically in the many individual situations of their daily professional lives, but more importantly to see that the institutional structures and processes of the school system are themselves reflections of a system of justice and care.

Leadership for Social Justice

Edwards, Earl J

Fall 2024

This course introduces students to the theory and practice of leadership for social justice at the school and district level. Definitions, approaches, and controversies in this emerging field will be examined. Readings, films, class discussions, and case studies related to the topics of race, ethnicity, culture, language, gender, social class, religion, sexual orientation, and disability will focus on how these issues affect educators, students and their families in today's K-12 schools. In particular, students will learn about leadership which is culturally and linguistically responsive; strengthens parent-community-school relationships; and formulates diversity policies to promote educational equity for students from diverse groups.

Using Data and Evidence for School Improvement

Graves, Kenneth E

Fall 2024

This course prepares policy-, district-, and school-level leaders to manage initiatives involving continuous improvement and data-informed inquiry. These activities include: engaging with policy or program evaluations, leading faculty in data-informed cycles of inquiry, and evaluating commonplace data practices for issues of equity and social justice. By the end of this course, students should be able to develop a plan for data-informed improvement in a school or other organization. Access to a school or other organization is encouraged, but not required.

Organizational Theory

Driscoll, William

Fall 2024

Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in how groups get things done (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Reflection on Leadership Seminar Information

Johnson, Lauri D

Fall 2024

The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master's Comprehensive exam ELHE8100

Foundations of Social Justice in Higher Education

Lala, Erika Tai

Fall 2024

Students explore how higher education functions in relation to societal needs and social stratification. Through intergroup dialogue, students share diverse perspectives and lived experiences to examine how institutions structure educational access and opportunity. Students analyze institutional responses to social justice imperatives, including historical reckonings, contemporary initiatives, and methods for assessing institutional progress. The course emphasizes both critical analysis and practical application through collaborative discourse on pressing challenges in U.S. and international higher education.

Executive Doctoral Seminar I

Glass, Christopher R

Fall 2024

This course is designed to build on the learning outcomes from the Data Literacy and Data-Driven Decision Making as students complete their Executive Doctoral Dossier (EDD) projects in their third year of the program. In this two-semester seminar, students integrate knowledge and skills in alignment with the programs learning outcomes and commitment to whole-person executive formation. The seminar challenges students to develop skills as practitioner-scholars in addressing a complex problem of practice in higher education as they complete their projects. The Executive Ed.D. in Higher Education is designed with a curriculum designed to develop academic leaders capable of navigating an era of rapid change in higher education. This emphasis influences the nature of the program's culminating product the Executive Doctoral Dossier (EDD) which is designed to be valuable for executive-level leaders and the organizations they serve now and in the future. The dossier aligns with the principles of the Carnegie Project on the Education Doctorate (CPED) as a scholarly project that demonstrates a synthesis of the students abilities, lays the groundwork for future practice scholarship, and demonstrates mastery of ability to frame and critically inquire into a significant educational problem of practice. It also aligns with BCs commitment to whole-person education that invites the whole person and involves our whole community to see leading and learning as two sides of the same transformative coin. In the Executive Doctoral Dossier project, students address a real-world problem of practice (PoP). They focus on significant, high-leverage questions centered on real-world issues, leadership challenges, and complex problems faced by leaders and organizations. They integrate academic (e.g., empirical research, data, and frameworks) and practice-based (e.g., policy reports, etc.) and use multiple data sources in an applied data-driven project. The project emphasizes research-based, data-informed insights and their implications for higher education institutions, policies, and practices. It is designed to advance professional knowledge and increase their impact as an executive-level leader in an era of rapid change. It invites doctoral students into communities to serve with and for othersto use their talents to address critical issues in higher education.

Executive Formation

Vasquez, Alejandro E

Fall 2024

The Executive Ed.D. program at BC offers a doctoral journey that focuses on developing multi-dimensional, integrated, and authentic leaders. This course is designed to be a transformative experience for participants, inviting them to explore four dimensions of their lives wellness, voice, management, and mission with the goal of enhancing their executive leadership skills. Through a community-oriented approach, participants will have the opportunity to learn from one another and develop a lifelong commitment to leadership development. Our goal is to help you grow as a person and to thrive as a leader. Decades of scientific research prove that personal growth has a significant impact on leadership and professional success. In keeping with the Jesuit tradition, this course poses questions, creates spaces, and encourages practices where students and their cohort uncover, analyze, and strengthen the qualities that enable individual and collective leadership. Students and their cohort will practice the art of asking questions of themselves and each other as part of an ongoing leadership journey. The holistic approach to leadership development in this course focuses on how cura apostolica (care for the work) is integrally related to the better-known idea of cura personalis (care for the whole person). The course focuses on executive leadership development that involves but goes beyond individuals to encompass the whole community that belongs to each other. The course invites doctoral students into communities to serve with and for others to use their talents to address the worlds greatest needs.

Educational Leadership and Higher Education Courses: Spring 2025

ELHE229601

Spirituality, Religion, and College Student Experience

James, Michael J

Spring 2025

Faith, religion, and spirituality have become topics of increasing interest for scholars and practitioners in higher education and student personnel development. This semester-long, upper-level, undergraduate course explores the historic, developmental, sociological, and philosophical dimensions of the college student experience at the intersection of faith life, spirituality, and academic culture. This course approaches themes and readings from an ecumenical and interreligious set of perspectives. Students will engage several major texts as well as articles from scholarly journals and narratives from institutional models that attempt to integrate faith life and spirituality into the prevailing academic and student development culture.

Ed Leadership/Higher Ed

Hogan, Deborah V

Spring 2025

This course will be designed to provide undergraduate students with an overview of numerous leadership concepts and theories in order to impart an understanding of how leadership is expressed within organizational contexts, specifically higher educational settings. Furthermore, students will also develop an in-depth understanding of their own personal leadership aptitudes and preferences, providing them with the knowledge and tools to further their leadership abilities as they pursue their careers within specific educational and community settings

Financial Management in Higher Education

Zona, John J

Spring 2025

This course gives students a unique perspective into the crucial financial aspects of managing large higher educational institutions. The course is appropriate for those students considering higher education careers, consulting related to higher education, or those who want to understand how higher education institutions and their strategies integrate topics associated with financial asset management. In this course, you will be exposed to a range of topics including risk/reward trade-off related to decision making in higher education as applied to endowment and other investments, capital project planning/financing, long-range institutional planning, resource allocation, and balance sheet management

College Student Experience: Access, Choice, and Persistence

Rohn, Katherine C

Spring 2025

This course explores the ways in which the higher education community has addressed three basic questions: Who goes to college? What sorts of experiences do students have in college? And, as a consequence of their experiences, who do they become by graduation? The course will familiarize students with the nature and characteristics of the college student population in American higher education, the variety of research methods used to study college students, and some of the many effects and outcomes of college student experiences.

Internationalization of Higher Education

Blanco, Gerardo L

Spring 2025

Higher education around the world today is increasingly affected by the forces of internationalization. Professionals working in postsecondary education in the United States and elsewhere must have a clear understanding of the range of opportunities and challenges presented by the evolution of this phenomenon. This course has two main objectives. The first is to introduce students to the central issues relevant to the international dimension of higher education in different national contexts. The second objective is to promote students' understanding of the practical implications of internationalization for their own work in higher education administration and/or policy-making contexts

Applied Education Policy in the Community Context

Edwards, Earl J

Spring 2025

This course is designed to show students how they can leverage their education policy expertise to support children in their community. In the course, students will work directly with an educational organization that advocates for or creates policies that impact the access and quality of education for historically marginalized students. The readings, discussions, and assignments will deepen students knowledge of educational policy issues and the process for policy implementation. This course material will focus on school boards, community advocacy organizations, and state and local educational agencies.

ELHE770101

Introduction to Educational Leadership and Change

Johnson, Lauri D

Spring 2025

Brings a foundational focus to the work of educational administration, centering on the core work of teaching and learning and exploring how that central work is supported by the cultural, technical, political, and ethical systems of the school. That work is deepened as administrators support learning as meaning making, as involving a learning and civil community, and as involving the search for excellence. Students are asked to research the realities at their work sites using the concepts and metaphors developed in the course and, through discussion and the utilization of case studies, to propose improvements to those realities.

ELHE770201

Education Policy and Practice

Anderson, Daniel

Spring 2025

This course provides an overview of educational policy as it plays out in local practice. Throughout the course, students will develop an understanding of foundational approaches to policy making, interpretation, and implementation as it plays out in education settings. In addition to providing an overview to the field of educational policy, the course investigates the relationship between policy and practice through attention to: (1) policymaking including policy mechanisms, framing, and policy actors; (2) processes of policy interpretation and implementation; and (3) policy as practice and the role of local leaders in developing policy. Throughout the course, we will examine how context shapes the relationship between policy and practice by focusing on sociocultural, organizational, and political influences. The course integrates critical perspectives as well as foundational concepts in our study of policy, highlighting how systems of oppression and power dynamics influence the policy process. During the course, students will have opportunities to apply theories and concepts to their own contexts, engaging in policy analysis and creation through hands-on assignments. The course approaches educational policy as incorporating both formal and informal policies, positioning practitioners as interpreters and implementers of local, state, and federal policies, as well as simultaneously designing and creating policies themselves.

Education Policy Analysis

Doss, Christopher J

Spring 2025

This course provides a foundation for engaging in analysis of educational policy by developing students' knowledge of and experience with tools, data sources, and frameworks that form the toolkit of policy analysts. The course engages with major theories and concepts that guide public policy analysis and provides opportunity to produce novel policy analysis and critique the framing, clarity, and concreteness of published policy analyses and proposed policy tools and solutions. Students will engage with current discourse and considerations in education policy throughout the course, with a particular focus on analyzing policy for equity. By the conclusion of the course, students will be able to engage in public policy analysis and communicate policy issues and analysis that draws on their professional expertise.

Using Data and Evidence for School Improvement

Graves, Kenneth E

Spring 2025

This course prepares policy-, district-, and school-level leaders to manage initiatives involving continuous improvement and data-informed inquiry. These activities include: engaging with policy or program evaluations, leading faculty in data-informed cycles of inquiry, and evaluating commonplace data practices for issues of equity and social justice. By the end of this course, students should be able to develop a plan for data-informed improvement in a school or other organization. Access to a school or other organization is encouraged, but not required.

Organizational Theory

Miller, Andrew F

Spring 2025

Rather than focusing on traits of the individual leader, this course focuses on the dimensions of organizations and teams that both facilitate and complicate leadership. Examples include managing conflict, developing a shared vision, and differentiating between technical and adaptive change. Students will apply various organizational theories in order to understand group- and system-level patterns in how groups get things done (e.g., structures and resources, symbols and values, power and politics). Ultimately, students leave the course better able to plan and evaluate school improvement through the lenses of organizational theory.

Lowenhaupt, Rebecca J

Spring 2025

The primary purpose of the Reflection on Leadership Seminar is for students to synthesize their learning across their course of studies and prepare to apply this as they continue on their career and vocational journey. The course will be conducted in a seminar format, with students sharing in the leadership of the course discussions and activities. Students will: describe how they have experienced the signature pedagogies across their program of study; provide clear evidence of their level of mastery of the key behaviors for educational leadership; articulate how they envision continuing to grow and innovate as a research-informed practitioner. This course also fulfills the requirements for the Master's Comprehensive exam ELHE8100

Seminar on Education Reform

Scanlan, Martin K

Spring 2025

This course is for PSAP students only This interdisciplinary seminar addresses the role of law in education reform and the relationship between law and social science in efforts to promote educational attainment in the nations elementary and secondary schools. The primary focus will be contemporary education reform issues, including educator quality, access to meaningful opportunity to learn, curriculum control, and student, teacher, administrator, and parental rights. The focus of the course will be inquiry on the role of law in school reform, the limits of law-based education reform, and the consequences of statutory requirements for scientific evidence-based approaches to education programs.

PSAP Cohort

Cho, Vincent

Spring 2025

The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The program was developed by Boston College more than three decades ago to provide an opportunity for full-time school administrators to pursue doctoral study. The Lynch School of Education at Boston College partners with the Massachusetts Association of School Superintendents (MASS) and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. Boston College's Ed.D. program is an active member of the Carnegie Project on the Education Doctorate, a national effort by 55 institutions to reform and strengthen the education doctorate. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Through a cohort model that emphasizes collaborative learning and support, PSAP aims to create a powerful network of district-level leaders throughout the Commonwealth of Massachusetts and beyond

Global Perspectives on Academic Affairs in Higher Education

Schendel, Rebecca

Spring 2025

This course provides a comparative analysis of the academic functions of universities. There is a special emphasis on the study of teaching and learning in postsecondary settings, but other equally important aspects of the academic experience will be covered. These include curriculum design, curricular policies, the design and monitoring of student learning outcomes, online delivery, academic advising and student success, academic career pathways, and good practices for faculty development. The course content is covered from a global perspective with special attention to Global South contexts. In addition to providing a comparative view of these issues, critical perspectives that center social justice and inclusion are central to this course, which can be completed fully online or in a hybrid format.

Advanced Field Experience in Higher Education

DeVeau, Laura

Spring 2025

Restricted to M.A. students in the Higher Education program. As a continuation of Field Experience in Higher Education, this course is a guided practicum for students enrolled in higher education programs. The advanced field experience requires supervised field work (graduate assistantship or internship) in a higher education institution or agency and participation in a six-week internship seminar. Advanced field work is overseen by program faculty and supervised by a professional administrator at the graduate assistantship or internship site. The Advanced Field Work in Higher Education seminar requires demonstrated knowledge of the Higher Education program core competencies as they are practiced in a particular area of administrative expertise and demonstrated knowledge of professional skills development related to theory and research in higher education.

Practicum in School Principalship

Ito, Mark T

Spring 2025

A 500-hour, field-based experience designed to enable the student to develop the competencies required to be an effective assistant principal/principal. The practicum is supervised jointly by a University representative and a cooperating practitioner. The student is expected to engage in a variety of experiences defined in the state standards for certification and to provide leadership to a major administrative project. The student will maintain a reflective journal of experiences and develop a portfolio that demonstrates the learning and insights gained during the practicum.

Executive Doctoral Seminar II

Glass, Christopher R

Spring 2025

This course is designed to build on the learning outcomes from the Data Literacy and Data-Driven Decision Making as students complete their Executive Doctoral Dossier (EDD) projects in their third year of the program. In this two-semester seminar, students integrate knowledge and skills in alignment with the programs learning outcomes and commitment to whole-person executive formation. The seminar challenges students to develop skills as practitioner-scholars in addressing a complex problem of practice in higher education as they complete their projects. The Executive Ed.D. in Higher Education is designed with a curriculum designed to develop academic leaders capable of navigating an era of rapid change in higher education. This emphasis influences the nature of the program's culminating product the Executive Doctoral Dossier (EDD) which is designed to be valuable for executive-level leaders and the organizations they serve now and in the future. The dossier aligns with the principles of the Carnegie Project on the Education Doctorate (CPED) as a scholarly project that demonstrates a synthesis of the students abilities, lays the groundwork for future practice scholarship, and demonstrates mastery of ability to frame and critically inquire into a significant educational problem of practice. It also aligns with BCs commitment to whole-person education that invites the whole person and involves our whole community to see leading and learning as two sides of the same transformative coin. In the Executive Doctoral Dossier project, students address a real-world problem of practice (PoP). They focus on significant, high-leverage questions centered on real-world issues, leadership challenges, and complex problems faced by leaders and organizations. They integrate academic (e.g., empirical research, data, and frameworks) and practice-based (e.g., policy reports, etc.) and use multiple data sources in an applied data-driven project. The project emphasizes research-based, data-informed insights and their implications for higher education institutions, policies, and practices. It is designed to advance professional knowledge and increase their impact as an executive-level leader in an era of rapid change. It invites doctoral students into communities to serve with and for others to use their talents to address critical issues in higher education.

Research Design II

Cho, Vincent; Miller, Andrew F

Spring 2025

This course is for PSAP students only. In this course, students will learn about the design of research studies. Building on an introduction to methods presented in Research I, this course will walk students through the proposal writing process. Students will learn about a range of research designs, the ethics of human subjects research, and the initial stages of data collection. In addition to drafting their dissertation proposal during the course of the semester, students will learn about the IRB process, negotiating entry to a research site, and approaches to data collection. They will continue to develop skills in multiple methods, including quantitative, qualitative, and mixed-methods designs.

Critical Race Theory and Intersectionality

Muniz Castro, Raquel

Spring 2025

This doctoral course explores the epistemological, methodological, and pedagogical uses of Critical Race Theory, Intersectionality (CRT/Int), and Settler Colonialism, in the examination and deconstruction of institutionalized and race-based disparities and inequalities in societal institutions, including, but not limited to, K-12 education, higher education, psychology, and the law. Course texts and student work will utilize both academic and popular culture texts. The course assumes and builds upon a foundational knowledge of social theories, and the ways in which self, institution and society are connected.

Experience, Reflection, Action Courses: Summer 2024

ERAL410101

Cybersecurity: Innovation, Technology, and Formative Development

Whitcavitch-Devoy, Julia

Summer 2024

This course presents key formative development frameworks and examines their application to current innovations and technologies. Cyberstrategic impacts upon individuals, educational and community settings, future of work, and across key industries are considered. Students use examples and case material from health and biotechnology, environmental and energy, information sciences and social media, and human-centric applied psychology approaches to better understand and gain experience applying models; engaging a constellation of varied stakeholders; fostering a culture of continuous formation and discernment within and across incorporeal cyberspaces; overseeing and facilitating best practices and behaviors; and appropriately responding to cyber trends and cyber trajectories.

Experience, Reflection, Action Courses: Fall 2024

ERAL110001

First Year Experience, Reflection, and Action

Whitcavitch-Devoy, Julia

Fall 2024

First Year Experience, Reflection, and Action (ERA) is a full-year program whereby students develop attention to the needs of others, respect for context, and an appreciation for their own individual gifts and insights. Through key content material, speakers, design-thinking workshops, applied action projects, presentations, small group discussions, and community engagement work, the year-long LSEHD ERA program facilitates students growth across developmental domains. The ERA program connects first-year LSEHD students directly to mentors, including faculty, graduate students, other junior and senior undergraduates, and their undergraduate dean. ERAs model ensures information about opportunities at BC, as well as, externally, fairly reaches all students, while also providing a sound underpinning of student formation, robust academics, and the occasion for explorations of future and possible selves.

Restorative Justice and Prison Reform in Global Contexts

Whitcavitch-Devoy, Julia

Fall 2024

First Year Experience, Reflection, and Action is a seminar designed to help first year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to LSOE and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

First Year Experience, Reflection, and Action

Whitcavitch-Devoy, Julia

Spring 2025

Continued from Fall First Year Experience, Reflection, and Action (ERA) is a full-year program whereby students develop attention to the needs of others, respect for context, and an appreciation for their own individual gifts and insights. Through key content material, speakers, design-thinking workshops, applied action projects, presentations, small group discussions, and community engagement work, the year-long LSEHD ERA program facilitates students growth across developmental domains. The ERA program connects first-year LSEHD students directly to mentors, including faculty, graduate students, other junior and senior undergraduates, and their undergraduate dean. ERAs model ensures information about opportunities at BC, as well as, externally, fairly reaches all students, while also providing a sound underpinning of student formation, robust academics, and the occasion for explorations of future and possible selves.

Restorative Justice and Prison Reform in Global Contexts

Whitcavitch-Devoy, Julia

Spring 2025

First Year Experience, Reflection, and Action is a seminar designed to help first year students negotiate the rigors and dilemmas of college life and become more critical citizens. Readings, discussions, and panel presentations will address moral-cognitive decision-making, vocational discernment in the context of Ignatian Pedagogy, local, state, and national trends in Applied Psychology and Human Development and Teacher Education and expose students to LSOE and university faculty and student research. Participants will read and critique current research about college student issues and learn to self-reflect critically in order to make more informed choices and decisions.

Special Topics in Formative Education: Stylized Facts - Evidence-Based Policy and Epistemic (Ir)responsibility

Higgins, Christopher R;Katz, Claire Elise

Summer 2024

This interdisciplinary seminar (public policy; history and philosophy of education; economics and sociology; philosophy of social science), critically examines the major currents in educational research practices, funding, and applications since the 2002 passage of the Education Sciences Reform Act. In addition to covering the explicit and implicit hierarchy of study designs and research methods, the course will focus on the ideal and actual uses of research findings in guiding educational practices. What do our official views of good research tell us about whom we should trust, which knowledge claims carry weight, and how the governance of educational institutions ought to work? Getting into these questions will require thinking about the differences and similarities between fact-checking and truth-telling, the public roles of determinative and aesthetic judgment, testimonial in/justice, and the place of value pluralism in what Michael Lynch calls epistemically responsible communities, and more.

The Educational Conversation

Higgins, Christopher R

Fall 2024

What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

Reimagining School and Society

Saraydarian, Garo William

Fall 2024

As products of schooling, we find it natural, invisible, inevitable. And yet, modern mass schooling is a relatively recent and-with a little distance-rather strange invention. To defamiliarize this peculiar institution, this course weighs the affordances and limitations of formal and informal education, considers the historical forces that led to the rise of compulsory schooling, and explores the felt experience of being schooled. Through reading and discussion of primary texts in the social sciences and humanities, we examine the official purposes and hidden curriculum of schools, asking questions such as: Does schooling aim to socialize or to individualize? How can it serve both liberal and vocational aims? How do schools shape character and social interaction? What sort of knowledge is valorized in school? Who sets the curriculum in pluralistic society? and, Is schooling a force for social change or social reproduction? We will consider how schools might be reimagined to deal with the great educational challenges of the day. What civic education is needed to deal with entrenched inequality, surging, xenophobia, fraying democracy, and the post-truth condition? How does the heedless embrace of deformative technologies set new challenges and tasks for schooling? How must education evolve in light of the climate emergency? As students, you need to understand the institution that shaped you. As citizens, you need to think about how we can reimagine school and society.

Transformative Teaching and Learning

Seider, Scott C

Fall 2024

What distinguishes transformative education from status quo teaching and learning? What are the practices by which we effect intellectual, personal, and social transformation?This course investigates transformative education at the level of classrooms, schools, and school systems, considering approaches focused on deeper learning (mastery, identity, and creativity), character development (moral, performance, civic, and intellectual), and social transformation (purpose, vocation, and justice).

FORM225201

Forms of Language and Life

Zuckerman, Charles

Fall 2024

This course considers how language broadly understood forms our lives. Studies of the sign systems of the world show that we constantly transform language by using it in situated interactions, online or in a classroom, at a writing desk or in a public square. But here we ask more: When does language use transform what is being communicated about? When does it transform the speaker? Drawing primarily from linguistic anthropology but also education, linguistics, sociology, philosophy, and psychology our topic requires use to come to methodological terms with the basic principles of sign systems and the dynamics of everyday interactions, suffuse as they are with power and the politics of description. In a series of assignments, students will learn to explore these issues where they live, so to speak, by gathering and analyzing their own empirical materials from scenes of language use that they care about.

FORM250001

Introduction to the Psychological Humanities

Goodman, David M

Fall 2024

Psychology is a modern discipline with a unique history which has served particular societal and political purposes. These purposes have frequently had adverse effects on the discipline's developmental trajectory, contributing to a narrowing of its epistemological and methodological commitments. Contemporary psychology suffers the ongoing effects of the narrowing, often deploying methods (e.g., natural scientific paradigms) that are ill-suited to its subject-human persons. The emerging field of psychological humanities seeks to restore to psychology a more pluralistic means of understanding of humanity- methodologically and theoretically. This is being accomplished through a revitalization of the connection between social scientific exploration with the scholarship and ideas associated with the humanities. In this course, students will be exposed to a survey of topics, issues, and traditions associated with the conversations currently taking place in the psychological humanities. These include phenomenology, critical psychology, indigenous psychologies, existentialism, literary critique, hermeneutics, psychoanalysis, global psychology, and social constructionism, all deployed to enlarge psychology's capacity to dialogue across ideas and methods for the purpose of asking the question of what it means to be human.

Psychology and Politics

Karter, Justin

Fall 2024

This course examines the ubiquitous presence of power and politics in the context of human relationships and society. Students will emerge from this course with greater knowledge about curiosity concerning the social, economic, political, cultural and psychological processes that shape definitions of the self and identity and that contribute to the formation of subjectivities and behaviors within given governing systems, groups, and political contexts. The relationships between and reciprocating impact of social, economic, and political forces are explored with emphasis placed on their implications for how we understand human identity, suffering, and freedom. This is an interdisciplinary course, and students will read and discuss works from the fields of psychology, political science, sociology, philosophy, anthropology and humanities

The Art of Educational Inquiry

Saraydarian, Garo William

Fall 2024

While education and educational research are often seen as separate activities, transformative education holds that the quest to form ourselves entails asking questions about the nature and direction of our growth. Inquiry is simultaneously an effort to understand, a social intervention, and an art of self-fashioning. This seminar invites students into the art of educational inquiry. Through examination of paradigmatic texts and visits from Lynch faculty members describing their own work, we consider the affordances of major traditions of educational inquiry. Working toward a formal proposal for a scholarly investigation, artistic creation, or public action, students are supported to articulate, deepen, and refine their own driving questions about educational concepts, relationships, practices, institutions, and aims. (Students who take EDUC 4050 in their junior year may wish to develop the work itself as a senior project.)

FORM883001

Anthropology of Formative Experience

Zuckerman, Charles

Fall 2024

Reframing education as formation helps us look beyond two prevalent myths about education: that learning happens mainly in schools and what is learned is always quotable "knowledge." Perhaps no discipline is more powerful in freeing us from these myths than anthropology. The formative frame centers questions of meaning; anthropology studies how human beings create, inhabit, and transform it. Formation is inevitably value-laden; anthropology seeks to unpack the rich variety of lived responses to the question of what matters and why. The formative frame decenters schools; the ethnographic ideal impels us to enter every setting—from courtrooms to pickle ball courts—alive to the possibility that here too we can bear witness to human beings exploring and enacting their many-sided natures. FORM8830 is doctoral level introduction to the field of anthropology and its affordances for the study of formative experience. By reading classic and contemporary texts, listening to more informal conversations on Podcasts and YouTube videos, and pursuing their own questions in anthropological terms, students will learn about the tools, people, debates, and ideals that define this rich tradition of inquiry. Required for Ph.D. students in Formative Education; other doctoral students with a special interest in the topic may contact the instructor for permission.

Formative Education Courses: Spring 2025

FORM105001

The Educational Conversation

Alexander, Jeremy

Spring 2025

What does it mean to be an educated person? At first, we must defer to the answers of others. Over time, we become curious about our formation. What does all of this schooling add up to? How do all of my influences beyond school fit together? We realize that it is time to take responsibility for our own education, to reflect on what it is admirable to become, to locate resources for self-cultivation, and to integrate them into a life worth living. But this is not solitary work. Together we will consider a range of rich, rival conceptions of what it means to be educated. In this way, you will be invited to join one of the oldest and richest dialogues, the educational conversation.

Reimagining School and Society

Filatov, Ksenia

Spring 2025

As products of schooling, we find it natural, invisible, inevitable. And yet, modern mass schooling is a relatively recent and-with a little distance-rather strange invention. To defamiliarize this peculiar institution, this course weighs the affordances and limitations of formal and informal education, considers the historical forces that led to the rise of compulsory schooling, and explores the felt experience of being schooled. Through reading and discussion of primary texts in the social sciences and humanities, we examine the official purposes and hidden curriculum of schools, asking questions such as: Does schooling aim to socialize or to individualize? How can it serve both liberal and vocational aims? How do schools shape character and social interaction? What sort of knowledge is valorized in school? Who sets the curriculum in pluralistic society? and, Is schooling a force for social change or social reproduction? We will consider how schools might be reimagined to deal with the great educational challenges of the day. What civic education is needed to deal with entrenched inequality, surging, xenophobia, fraying democracy, and the post-truth condition? How does the heedless embrace of deformative technologies set new challenges and tasks for schooling? How must education evolve in light of the climate emergency? As students, you need to understand the institution that shaped you. As citizens, you need to think about how we can reimagine school and society.

Transformative Teaching and Learning

Giunco, Kierstin M

Spring 2025

What distinguishes transformative education from status quo teaching and learning? What are the practices by which we effect intellectual, personal, and social transformation?This course investigates transformative education at the level of classrooms, schools, and school systems, considering approaches focused on deeper learning (mastery, identity, and creativity), character development (moral, performance, civic, and intellectual), and social transformation (purpose, vocation, and justice).

Learning Cultures

Zuckerman, Charles

Spring 2025

This course explores global cultures of learning and their relationships to the learning of culture. How people learn and know in educational institutions is rooted in cultural values: in the way they imagine studying or practicing, in their different expectations about what success means, in their sense of who should teach and who should learn. But it is equally true that learning extends well beyond the years and settings of formal education. From birth on, humans are learning through experience in the context of families, communities, and a wide range of practices and institutions. We will read and discuss texts to consider how human across the world differently experience and structure these two kinds of learning. We will, for instance, explore how schools from Michigan to Manila to Munich are infused not just with explicit pedagogy, but the values of the people that populate them. As we will also attend to the formative processes happening in our daily lives, beyond schools, from bedtime rituals to alms giving ceremonies to pickle ball courts.

FORM225301

Preparing the Whole Person for Global Citizenship

Owens, Erik C

Spring 2025

What forms of civic education are needed in our politically volatile, globally interdependent world? Can civics expand beyond transmission of information and competencies to become transformation of the whole person? What dispositions are needed in civic life? Can the very idea of citizenship expand beyond the nation state to encompass the possibilities and responsibilities of global citizenship? Drawing on the traditions of civic, intercultural, and peace education and on case studies of holistic, internationally minded education from diverse cultural and geo-political contexts we will explore: the dynamics of identity, attachment, and xenophobia; the concepts of nationalism, patriotism, cosmopolitanism, and cultural imperialism; and questions of environmental and economic justice.

Spiritual Exercises

Colombo, Emanuele

Spring 2025

This course will explore two related questions: 1) What factors constitute optimal human growth and development from the perspective of contemporary psychology and spirituality? And 2) What constitutes a personal spirituality that integrates psychological wellness and spiritual holiness? In interrogating these questions, we will explore: worldviews prevalent in culture today; humanistic thinkers and their attempts to articulate the crucial nexus between human experience, reason, and the sacred; and obstacles to the practices to foster such depth. Along the way, we will also explore various contemporary psycho-social phenomena and their impact on personal and social growth and development.

Selfhood and its Stories

Freeman, Mark

Spring 2025

What is the self? How is our self related to the stories we tell about ourselves? Can one tell a true life story? Or are the stories of our lives better regarded as "fictions," spun out to the narrative imagination? Drawing on readings from psychology, literature, and philosophy as well as selected autobiographies and memoirs, this course will examine the process by which people create and tell the stories of their lives. Topics include the nature of memory, the place of language and culture in shaping the self, the difference between life as lived and life as told, and the role of life stories in the creation of personal identity. Alongside our exploration of these topics, we will also explore, and create, our own life stories and will therefore need to ask: Who am I? How did I become who I am? How should I live my life?

FORM405001

The Art of Educational Inquiry

Saraydarian, Garo William

Spring 2025

While education and educational research are often seen as separate activities, transformative education holds that the quest to form ourselves entails asking questions about the nature and direction of our growth. Inquiry is simultaneously an effort to understand, a social intervention, and an art of self-fashioning. This seminar invites students into the art of educational inquiry. Through examination of paradigmatic texts and visits from Lynch faculty members describing their own work, we consider the affordances of major traditions of educational inquiry. Working toward a formal proposal for a scholarly investigation, artistic creation, or public action, students are supported to articulate, deepen, and refine their own driving questions about educational concepts, relationships, practices, institutions, and aims. (Students who take EDUC 4050 in their junior year may wish to develop the work itself as a senior project.)

Tech Tools for Playful Learning

Bers, Marina

Spring 2025

This course explores the design and use of new technologies for learning and engages students in current debates around educational technologies, computational thinking, coding and robotics. Students will learn how to develop, implement, and evaluate technology-rich curriculum and will design their own computational meaningful projects. They will visit K-2 classrooms to implement technology-rich curricula, will learn how to use video to document their experiences and will become researchers to assess the thinking and learning fostered by the different tools.

Colloquium in Formative Education

Higgins, Christopher R

Spring 2025

Meeting every other week and open to the public, the Colloquium in Formative Education is devoted to interdisciplinary dialogue about formative education, featuring topical readings, visiting speakers, and work in progress from department faculty and students. Ph.D. students in Formative Education register for FORM 8800 each semester for their first three years, completing additional reading, writing, and reflection keyed to each colloquium session.

Design of Formative Experiences

Bers, Marina

Spring 2025

This doctoral seminar examines formative education through the lenses of design thinking, developmental psychology, and the learning sciences. Through reading and discussion, and visits by guest speakers, it explores the nature of experiential and holistic learning, the impact of artificial intelligence, the relation of education and entrepreneurship, and other topics. Seminar students will themselves participate in an iterative design process, a hands-on inquiry into the role of design and innovation in the development and implementation of technology-rich formative learning experiences.

Dissertation Seminar in Formative Education

Higgins, Christopher R

Spring 2025

This is a student-centered seminar that is aimed at assisting doctoral students in identifying, shaping, and defining a research topic. Students will be expected to develop an Intent to Propose a Thesis, and to work toward the development of a full-scale draft of a Thesis proposal. Prior to the completion of the seminar, students will be expected to have established a Dissertation Committee.

Design Studio 3

Kolodner, Janet L;Lachapelle, Cathy P

Summer 2024

The Design Studio is the venue for learning how to practice Learning Engineering. Students will learn practices of design thinking and design decision making in the context of an internship, focused on designing learning experiences for a targeted population of learners that foster learning of targeted learning objectives. The Design Studio will be richly-facilitated and orchestrated as a Cognitive Apprenticeship. Students will work with the internship organization individually or in pairs, and also spend time as a Knowledge Building Community sharing what they are designing and the complexities they are facing, providing advice to each other, and reflecting on and articulating what they are learning about designing for learners.

Reflective Seminar 3

Kolodner, Janet L

Summer 2024

This one-credit seminar is designed to help students make sense of and synthesize across the new concepts, skills, and practices they are learning as participants in the M.A. in Learning Engineering Program. Focus will be taking what they are learning into the workplace. Students will continue to reflect on their experiences to identify their strengths and what brings them joy, to imagine the special expertise they'd like to develop, and to identify the kinds of responsibilities they'd enjoy taking on in the workplace.

Immersive and Augmented Environments for Learning

Lachapelle, Cathy P

Summer 2024

In this module, students will engage with a variety of immersive and augmented environments for learning, reading relevant papers, exploring exemplary projects, and applying ideas to the functional design, adaptation, personalization, and use of learning technology. The module includes a "Design Concept" assignment, where students work in small teams to apply what they are learning to some learning design. Students will work to curate a "knowledge base" of exemplary projects, including examples both from current practice and from the research literature.

Introductory Statistics

Borowiec, Katrina

Summer 2024

This course provides an introduction to quantitative research, descriptive statistics, inferential statistics, and null hypothesis significance testing in the context of z tests for proportions, t tests for means, and simple linear regression. In each area, students learn how to apply statistical procedures, interpret concepts and results, effectively display data and models, and critically evaluate evidence and implications. Software instruction is provided for IBM SPSS Statistics, R, Stata, and G*Power.

Interpretation and Evaluation of Research

Littenberg-Tobias, Joshua S

Summer 2024

This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

General Linear Models

Li, Zhushan

Summer 2024

Addresses the construction, interpretation, and application of linear statistical models. Specifically, lectures and computer exercises cover ordinary least squares regression models; matrix algebra operations; parameter estimation techniques; missing data options; power transformations; exploratory versus confirmatory model building; linear-model diagnostics, sources of multicollinearity; diagnostic residual analysis techniques; variance partitioning procedures; dummy, effect, and orthogonal coding procedures; moderation and mediation analysis; regularization techniques, and an introduction to structural equation modeling.

Evaluation Practice and Methods

Bebell, Damian

Fall 2024

This course addresses the theoretical and philosophical foundations of program evaluation, with emphasis on the roles of social and political theory, methodology, epistemology, and philosophy of science in various models of evaluation in education. Each evaluation model will be examined in terms of the purpose, knowledge construction, the role of the evaluator, relationship to objectives, relationship to policy and decision-making, criteria, and design. The course also includes a focus on issues of value-neutrality and value judgment.

MESA682001

Critical Perspectives on Research Methodology

Russell, Michael K

Fall 2024

This course explores foundational concepts that influence the methodologies and methods employed by social science researchers. Core topics explored include: the Enlightenment's influence on scientific inquiry; the influence of empiricism, positivism, and universalism on social science research; objectivity and subjectivity; verification and falsification; quantification and standardization; the construction of mental ability and intelligence. Also explored are: the influences White racial framing has and continues to have on the research questions posed, the methods embraced, interpretations made, and discourse produced by social science researchers; and the role critical theory and anti-colonization have begun to play in reorienting social science research to challenge various forms of oppression, with a specific focus on racialized oppression. Upon completion of the course, participants will be positioned to critically examine quantitative methods and measurement techniques commonly employed for educational research that are introduced in future coursework.

Interpretation and Evaluation of Research

Littenberg-Tobias, Joshua S

Fall 2024

This course will improve a students' understanding of the empirical research literature in education and psychology. It concentrates on developing the conceptual foundations of empirical research and the practical analytic skills needed by a competent reader and user of research articles. Topics address purpose statements, hypotheses, sampling techniques, sample sizes and power, instrument development, internal and external validity, and typical quantitative research designs. Exercises emphasize the critical evaluation of published research. Each student will develop a research proposal.

Introduction to Human-Centered Data Science

Klugman, Emma M;Smith, Brian K

Fall 2024

In this course, students will be introduced to the technical, social, and ethical considerations in the field of data science, including data security, governance, and privacy. Particular focus will be places on data scientists' responsibility to create effective and inclusive solutions that are responsive to the needs, values, and perspectives of people. This course will also introduce the themes and skills that will be developed in subsequent courses. Specifically, students will: learn about trends and advances in data science (e.g., A.I. and cloud computing); beexposed to data cleaning procedures for various types of commonly used data; learn about project lifecycle planning and execution; and will learn about the steps in a typical data science project (e.g., question framing, data collection, cleaning, exploration, modeling, interpretation of findings). Moreover, instruction will focus on developing students skills relating to project management, problem framing, communication, and project execution. Students will learn to use various data science tools and techniques to tackle real-world problems. The tools that students will use in this class include the Python programming language, various Python libraries for introductory data analysis and basic visualization, and development environments such as GitHub and Jupyter Notebook.

MESA841202

Applied Mathematics for Data Science

Zhang, Liyang

Fall 2024

This course will provide students with a strong foundation in mathematical tools relevant to data science. Selected topics from calculus, vector spaces, matrix algebra, numerical optimization, and probability theory will be covered. These tools will help students understand and solve data science problems and work with emerging methods and techniques in this rapidly growing field. A refresher in calculus will provide a foundation in mathematics necessary to understand data science concepts. Topics will include matrix algebra and vector spaces, which are essential for understanding mathematical models and statistical methods used in data science, and numerical mathematics and optimization, which are integral for understanding model training and efficiency. Additionally, skills in this area can help detect overfitting by providing a way to assess the quality of a models fit to data. Finally, instructional units on basic probability theory will lay the foundation for the subsequent classes on statistical models for data science

Design of Experiments and Causal Inference

Khanani, Noman

Fall 2024

This course will introduce experimental design as a paradigm for thinking about the conduct of educational research and evaluation. The goals of this course are to introduce students to the design and statistical principles of the experimental approach to educational research with particular emphasis on the correct analysis of data arising from designed experiments. We will discuss a variety of experimental designs, their advantages and disadvantages, estimation of treatment effects, and significance testing. The topics covered will include the underlying logic of experimental and quasi-experimental designs, regression discontinuity and factorial designs as well as cluster randomized and multi-site trials.

Dissertation Seminar in Educational Research, Measurement, and Evaluation

Braun, Henry I

Fall 2024

1 credit in the fall, 2 credits in the spring This two-semester seminar is designed to assist doctoral candidates in the preparation of a formal doctoral dissertation proposal. All aspects of dissertation development will be discussed (e.g., problem development, human subjects review, final defense). Students will develop and present a series of draft proposals for faculty and student reaction. Depending on the circumstances of the student, an acceptable pre-proposal (Intent) or full dissertation proposal is required for completion of the course.

Measurement, Evaluation, Statistics, and Assessment
Courses: Spring 2025

MESA106001

Classroom Assessment

Flanagan, Kathleen

Spring 2025

This course emphasizes that assessment entails more than quizzes, unit tests, and standardized multiple-choice measures of student learning. The course explores how assessment is a key component of all aspects of the instructional process including organizing and creating a classroom culture, planning lessons, delivering instruction, and examining how students have grown as result of instruction. The validity of inferences and decisions made based on assessment information is examined within each phase of instruction. The goal is to show students that assessment is an integral part of teaching that should not be separated from daily classroom practices.

Instrument Design and Development

Russell, Michael K

Spring 2025

Data collection instruments are commonly employed by educational and social science researchers to collect information about cognitive, affective, attitudinal and psychological constructs. This course explores principles and techniques applied to develop cognitive tests and survey instruments. Topics covered include: validity and reliability; construct definition and representation; item writing principles; bias, sensitivity, and accessibility; cross-cultural considerations; scaling methods; and techniques for examining item and scale properties. Upon completion of the course, participants will be positioned to develop cognitive test and survey instruments independently for their own research initiatives.

Introductory Statistics

Brown, Nathaniel**Spring 2025**

This course provides an introduction to quantitative research, descriptive statistics, inferential statistics, and null hypothesis significance testing in the context of z tests for proportions, t tests for means, and simple linear regression. In each area, students learn how to apply statistical procedures, interpret concepts and results, effectively display data and models, and critically evaluate evidence and implications. Software instruction is provided for IBM SPSS Statistics, R, Stata, and G*Power.

Psychometrics II: Item Response Theory

Li, Zhushan

Spring 2025

This course will present an advanced study of theoretical concepts, statistical models, and practical applications in educational and psychological measurement. Topics include item response theory, methods for estimating latent trait and item parameters, models for polytomously scored items, explanatory item response models, and multidimensional item response models. Some practical applications of IRT: DIF assessment, computerized adaptive testing, test equating, linking, scaling.

Programming for Data Science

Walton, Devan

Spring 2025

This class will introduce essential programming concepts, data structures, and techniques focusing on data science applications. Students will learn what it means to write high-quality code. Additionally, topics such as testing, debugging, and exception handling will be taught. By the end of the course, students will have reviewed Python programming and be able to apply their knowledge to various data science problems. Topics include functions, recursion, loops, list comprehensions, elementary data structures, and reading and writing files.

Multilevel Regression Models

O'Dwyer, Laura

Spring 2025

This course introduces students to multilevel regression modeling (aka hierarchical models or mixed effects models) for analyzing data with a nesting or hierarchical structure. We discuss the appropriate uses of multilevel regression modeling, the statistical models that underpin the approach, and how to construct models to address substantive issues. We consider a variety of types of models, including random intercept, and random slope and intercept models; models for longitudinal data; and models for discrete outcomes. We cover various issues related to the design of multilevel studies, model building and the interpretation of the output from HLM and SPSS software programs.

Dissertation Seminar in Educational Research, Measurement, and Evaluation

Braun, Henry I

Spring 2025

1 credit in the fall, 2 credits in the spring This two-semester seminar is designed to assist doctoral candidates in the preparation of a formal doctoral dissertation proposal. All aspects of dissertation development will be discussed (e.g., problem development, human subjects review, final defense). Students will develop and present a series of draft proposals for faculty and student reaction. Depending on the circumstances of the student, an acceptable pre-proposal (Intent) or full dissertation proposal is required for completion of the course.

Teacher Education and Curriculum and Instruction Courses: Summer 2024

EDUC104401

Education and Development for Students with Disabilities

McKinnon, Rachael E

Summer 2024

Introduces pre-service teachers to a variety of issues surrounding special education, including its historical development, concepts of disability, the terminology commonly used in the field, and recent trends and practices. Examines legislation pertaining to special education, particularly the Individuals With Disabilities Education Act (IDEA). Assists future educators to understand the process of designing and implementing an Individualized Educational Program (IEP).

Teaching Bilingual Students

Luo, Brenda

Summer 2024

Summer course: Section .01 for Elementary Education majors; Section .02 for Secondary Ed majors In EDUC 6346 participants will learn instructional methods for bilingual, English as a Second Language (ESL), and mainstream Early Childhood and Elementary classrooms. This includes literacy and content area instructional approaches applicable to K-5 classrooms. Other topics include history and legislation related to English Learners and bilingual education as well as the influence of language and culture on students, instruction, curriculum, and assessment. This course combines theory, research, and practice to enable participants to develop the knowledge to work with students who function in more than one language and across cultures.

Classroom Management

Cass, Richard J

Summer 2024

ED201 is now EDUC6373.. Focuses on observation and description of learning behaviors, with emphasis on examining the relationship of teacher behavior and student motivation. Prepares teachers to analyze behavior in the context of a regular classroom setting that serves moderate special needs students and to select, organize, plan, and promote developmentally appropriate behavior management strategies that support positive learning. Also considers theoretical models of discipline and classroom management strategies, and requires students to propose and develop a rationale for selection of specific techniques for specific classroom behaviors.

Spiritual Sources of Catholic Education and Catechesis

Ospino, Hosffman

Summer 2024

The course is open to Catholic school teachers and administrators, religious educators, and anyone interested in learning more about the spiritual roots of Catholic education. Catholic education and catechesis are rooted in particular appropriations of the Christian faith articulated as schools of spirituality. From these appropriations emerge commitments to specific charisms and pedagogical practices. It is imperative that Catholic educational efforts continue to affirm the spiritual legacies that have sustained schools, missions, and parochial programs throughout history. In this course we read some foundational texts of major schools of spirituality and explore how they have inspired life-giving philosophies of Catholic education. The guiding principle throughout the course is that a good philosophy of Catholic education and catechesis is always sustained by a deep spirituality.

Special Topics: Models of Teaching and Learning in Catholic Education

Cownie, Charles T

Summer 2024

This course will examine past, current, and potential future models of Catholic schooling. Special attention will be given to the philosophical and historical foundations of Catholic schooling and how these foundations are lived out in pedagogical and curricular approaches used in contemporary Catholic primary and secondary schools. Additional time will be spent in analyzing how Catholic educational models are evolving to continue to carry out the mission of Catholic education in changing contexts.

In the Footsteps of Leaders

Beaumier, Casey, SJ

Summer 2024

This course considers the historical, spiritual, and pedagogical foundations of Jesuit leadership by situating them in their historical and geographic context. The course begins with two weeks of online coursework, followed by twelve days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher education schools. Coursework features selected readings, workshops, presentations, and projects to be completed both individually and in small groups. Through this course, students will gain an understanding of the Jesuits' early vision of apostolic effectiveness and of the ways that vision has remained constant while adapting to various circumstances along the way.

Family and Community Engagement

Steedman, Peter

Summer 2024

The purpose of this course is to introduce participants to theories, practices, and empirical research regarding family and community engagement in schools. The focus is on how school leaders--formal and informal--enact organizational models, educational programs, and political strategies that increase authentic relationships with parents and community members. Topics of study will include community schools/full service schools, parent involvement models, involvement of diverse families, grassroots organizing for community development, afterschool and community-based education, and school board-community relations. Direct participation in inquiry into school-community activities conducted on-site in schools and neighborhoods will be requirement of the course.

Language Learner in Global Perspective

Kim, Deoksoon

Summer 2024

This course provides an overview of language learning and the situation of second language learners in schools. First, we review processes of language learning and the challenges language learners face when they must simultaneously learn a language and learn subject matter in that language. We do this from a socialcultural perspective, exploring language learning as embedded in sociohistorically situated activities. We develop and account of how learning language is also learning culture. Second, we study how these processes vary across cultural contexts. Because language learning is woven into social and historical contexts, processes of language learning and schooling vary around the world. The course develops several case studies from different areas of the globe in order to illustrate how language learning and schooling can intersect in different ways.

Global Perspectives on Disabilities and Special Education

Francis, Heather

Summer 2024

In the modern world there are many differing perspectives about the significance of disabilities. In this course we examine both "medical model" perspectives on the origin and nature of disabilities, as rooted in the scientific method, and post-modern critical perspectives. Cultural influences on how those perspectives are valued will also be considered. Differing approaches to special education practice--both service delivery systems and interventions--will be critically compared to the thought traditions. The ethics and social value of special education will also be considered.

EDUC730801

Designing Learning Environments in a Social and Digital World

Croft, Andrew J

Summer 2024

In today's society, what counts as knowledge and expertise has changed considering the global shifts in interconnectivity, social interactions, and technology. Previous models of learning focused on knowledge as a collection of facts within curriculum and learning environments helping individuals obtain those facts. However, today technology can enable all individuals to quickly obtain facts. Instead, expertise requires deep knowledge in which ideas are applied across multiple contexts in particular contexts with people and tools. These shifts in knowledge as well as technological advances have significant implications for how we design curriculum and other learning environments. In this course, we will examine different learning environments as well as various aspects within those environments. For example, we will examine curriculum to evaluate the scaffolds to support student learning, analyze digital learning environments for professional development to support teacher learning and critique video of classroom discourse to examine student interactions and community development. In this course, we will consider the environment both as conceptualized by its designers (the design) and as it is experienced by participants as learning interactions unfold in particular settings (the enactment) to evaluate the effectiveness of those learning environments.

Curriculum Design and Enactment

Friedman, Audrey A;Moreno Vera, Maria Akashbani

Summer 2024

This course focuses on questions about what curriculum is, its purpose in society, and how it functions as a social mechanism. In this course, the curriculum is understood to have multiple forms and meanings. It is aspirational (what one aspires to accomplish), technical (a designed artifact, like a textbook or plan, used as an instructional medium), and phenomenological (characterizing what learners experience or take away from their encounters with curriculum). After exploring the multiple meanings of curriculum, the course will then focus on the design and enactment of curriculum materials. In terms of design, we will examine different models of design as well as analyze curriculum materials from these perspectives. Finally, we will consider the curriculum enactment process in terms of different meanings and possibilities within k-12 school settings.

Educating Learners with Disabilities

Khurana, Aashna

Summer 2024

This course focuses on the education of students with disabilities and other learners from culturally and linguistically diverse backgrounds. The goal of the course is to promote access to the general curriculum for all students through participation in standards-based reform. Universal Design for Learning (UDL) provides the theoretical framework for this course. Through an examination of historical milestones, landmark legislation, systems for classification, approaches to intervention, and the daily life experiences of diverse learners, students acquire knowledge about diversity and the resources, services, and supports available for creating a more just society through education.

Summer 2024

This course explores the history, purpose, current status, and possible futures of Catholic elementary and secondary schools. Students will become conversant with the body of scholarly literature, theoretical and empirical, that defines the field of Catholic education. Though the primary focus will be on Catholic schools in the United States, the course will explore how we can learn from the experience of other religiously affiliated schools here and abroad, and from the experience of Catholic educators worldwide. Special attention will be devoted to how the Ignatian spirituality and pedagogy can be a resource for educators in Jesuit and non-Jesuit schools.

Credits: 3

Room and Schedule: July 29 - August 1; August 5 - 8; Stokes Hall 111S MTuWTh 01:30PM-04:00PM; Stokes Hall 111S MTuWTh 09:00AM-11:30AM

EDUC761501**Foundations of Bilingual Education****Proctor, Charles P****Summer 2024**

Students will be able to walk into any school that offers a bilingual program and/or serves bilingual pupils and identify the type of program in place depending on the specifics of different contexts. In service of this goal, students will explore the following characteristics of language education programs in the U.S specifically: history, models (and key attribute of program types), political contexts, and legal foundations. Students will understand dual language models, design, and implementation, specifically: competencies, knowledge, and skills of dual language teachers, features of instruction and assessment, and implementation.
