The renewed interest among philosophers about friendship indicates a break from the suspicion of the last several centuries. The lack of interest can be traced to an understanding of human nature where each individual is a self-contained unit. Ethical reflection emphasized equality so much that friendship appeared hard to justify, as based on preferring one individual over another. This has not always been the case, since Greek and Medieval thinkers regarded friendship rather highly as indicating what is best in human nature and essential to happiness. We will try to understand why different cultural perspectives evaluate friendship in different ways.

PHIL442301

Spanish-American Philosophy

Gurtler, Gary, SJ

Spring 2025

This course is designed to give the student an opportunity to look at some fundamental philosophical issues regarding human nature and the origins and development of human thought from a fresh perspective. Unamuno's Tragic Sense of Life presents a critique of the rationalism of modern European thought by focusing on human life as dream, theater, and struggle in line with Don Quijote. Paz's The Labyrinth of Solitude explores the meaning of human existence through the lens, or perhaps the mask, of the Mexican quest for identity. Ortega y Gasset and Zubiri represent the contemporary Spanish interaction with European phenomenology.

PHIL442401

Approaches to the Philosophy of Religion: Historical, Phenomenological, Hermeneutic, and Analytic

Floyd, Gregory P

Spring 2025

This course examines four approaches in the philosophy of religion: historical investigation, phenomenology, hermeneutics, and analytic philosophy. In examining these approaches, we will consider key terms including faith, reason, religion, belief, philosophy, theology, and god(s), as well as contemporary philosophers working in these fields including Alasdair MacIntyre, Robert Sokolowski, Merold Westphal, W. K. Clifford, W. James, N. Wolterstorff and others. The course will consider questions such as: What are faith and reason and are they compatible? Does religion require people to believe irrational things? Can a religious person be more and less reasonable in her belief, or is all religious belief equal, private, and, therefore, arbitrary? How can we think about ethical commitment within and outside of religious commitment? Satisfies the following distribution requirement(s) for Philosophy: Knowledge & Reality, History of Philosophy.

Revolution and Social Change

Sweeney, Eileen C

Spring 2025

This course will take up accounts of the roots of modern notions of justified revolution and social justice calls to transform society in Hebrew scripture and the ministry of Jesus as depicted in the Christian Bible through the interpretations of political theorist Michael Walzer's *Exodus and Revolution*, and the work of progressive theologian Walter Wink, as well as classical political theory in Aquinas and Locke and others. We will also consider the works of Mahatma Gandhi, Martin Luther King, and Hannah Arendt on non-violent resistance, as well as works of Malcolm X, Fritz Fanon, Vaclav Havel, and Aung San Suu Kyi. Students will work on projects examining the theoretical underpinnings of recent attempts at revolution and social change, and considering their success or failure.

PHIL451201**The Nature of Science****Stan, Marius C****Spring 2025**

This course is an examination of the scientific enterprise with the tools of modern analytic philosophy. Topics include: the structure of a scientific theory; evidence and knowledge in science; the role of models in research and theorizing; the nature of scientific explanations; and the place of values in science. Open to advanced undergraduates.

This course invites students to discern their insights--that is, the ways that they come to knowledge--for the sake of building a good life and a good world. It is based on Bernard Lonergan's "heuristic method," a method of discovery of the inner structures of our understanding that shape our ability to make sense of the world. In the first part of the course, students will engage in exercises that help them in the process of what Lonergan calls "self-appropriation," taking hold of oneself and one's intelligence. In the second part, students will work together to use what they've learned for the sake of developing a project that aims at some social good. Guest lecturers from different disciplines and fields will help name the various ways that reflective intelligence can contribute to a community of growth, healing the world's ills and creating new avenues of progress.

PHIL500501

Medieval Philosophy

Solere, Jean-Luc

Spring 2025

Far from being monolithic and repetitive, the Middle Ages were a creative period during which multiple solutions were tried to make sense of the world and of human life. The legacy of Antiquity, the philosophic and scientific knowledge of the time, and religious views were combined in original syntheses. The aim of the course is to provide a picture of this diversity, through a study of the main problems that a wide range of authors (Christian thinkers from St. Augustine to Ockham, but also Islamic and Jewish philosophers) faced. Medieval philosophy was an important step in the development of human thought. Discovering it will be essential to your philosophical education. This course will especially highlight the ideas, in metaphysics, theory of knowledge, and ethics, which medieval thinkers created and transmitted to modern philosophy. In addition, analysis of texts, debates, and writing assignments will help you to develop rigorous argumentation and expression skills. (NB: This course was previously offered as PHIL 4407; you cannot take it if you took PHIL 4407)

Credits: 3

PHIL523001**The Interior Life****Barrette, Andrew****Spring 2025**

This course will investigate the meaning of an interior life in order to find a way into it. For this, our guides will be Jesuit philosophers, from the 16th century unto present day. With them, we will ask questions about the role of philosophy in our lives, questions about how best to live, about how best to make the decisions and to carry out actions. The main goals of the course are to gain knowledge of the history of philosophy in the Jesuit tradition and to gain self-knowledge along with this tradition. Satisfies the following distribution requirement(s) for Philosophy: Ethics & Values.

Credits: 3**Room and Schedule:** Stokes Hall 213S MW 03:00PM-04:15PM**Satisfies Core Requirement:** None**Prerequisites:** None**Corequisites:** None**Cross-listed with:** None**Frequency:** Periodically in the Fall, Periodically in the Spring**Student Level:** Both**Comments:** None**Status:** Offered**PHIL524001****Figures in Analytic Philosophy****Larrey, Philip****Spring 2025**

This course treats the development of Anglo-American philosophy during the 20th century, in which the philosophical current of thought known as Analytical philosophy took shape and was developed in the United Kingdom and the United States. The core interest of this course represents an epistemological study of the major themes of analytic philosophy from the consideration of three of the most important authors during the twentieth century: W. V. Quine, Donald Davidson, and Hilary Putnam. Following the historical development of analytic thought, we will try to highlight the problems around the concept of truth to demonstrate the primarily metaphysical interest of the authors, as well as of the entire contemporary analytic school.

PHIL529001

Liberalism and its Critics

Fried, Charles G

Spring 2025

In this course we will make an expansive inquiry into the meaning of liberalism as a social and political philosophy, considering the critiques of liberalism made by both the conventionally identified Right, such as Schmitt and Heidegger, and Left, such as Marx and in critical theory. We will focus partially on the American variant of liberalism, with its roots in Locke and the Founding, and also examine contemporary events in the light of the ideas and arguments we will study. Other authors will include de Tocqueville and Cortés on individualism and authoritarianism, Frederick Douglass and Charles Mills on race, Martha Nussbaum and Judith Butler on gender, and others.

Capstone: Working, Playing, Being

Storey, David E

Spring 2025

Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only.. The conventional wisdom is that BC student culture is "work hard, play hard." But what do we mean by "work" and "play" here? How do these implicit meanings reflect broader cultural forces? And do these meanings serve us well? Senior year is an exciting but anxious time, and this seminar is a chance for you to: (a) reflect on how your education has shaped you, and how you have shaped your education and (b) explore your goals, fears, hopes, and expectations around life post-graduation with a small group of peers. We will examine: (1) the meaning of, and relationship between, work and leisure in your own life; (2) how they have developed since your freshman year in light of your education at BC and; (3) how they figure into your vision of a fulfilling life.

Capstone: A Life Well Lived

DeChiara-Quenzer, Deborah

Spring 2025

Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only.. This course engages students in serious reflection on what it means to have "a life well lived." It is advantageous to do this reflection at this time in your life, as it affords you time and opportunity to shape your life going forward. What kind of life do you hope to live? What will bring you peace and satisfaction--dare we say, even happiness? Students will be asked to examine themselves by looking both backwards and forwards in many dimensions of their lives (education, ethics, relationships, career, etc.) while learning what others have said about having a meaningful life.

Philosophy of Imagination

Kearney, Richard

Spring 2025

Readings in the philosophy of imagination from ancient myth to post-modernity. Beginning with Biblical and Greek accounts of images and image-making, this course will explore three main paradigm shifts in the Western history of imagination: (1) the ancient paradigm of the Mirror (Plato to Augustine); (2) the modern paradigm of the Lamp (Kant to Sartre); and (3) the postmodern paradigm of the circular Looking Glass (Lacan to Derrida). The course will conclude with a critical evaluation of the political and ethical functions of imagination in our contemporary civilization of cyber fantasy, simulation, and spectacle.

PHIL554901

Selected Readings in Phenomenology

Moran, Dermot

Spring 2025

This course offers a critical introduction to phenomenology, one of the most important movements of twentieth-century European philosophy, including its French existentialist development, and its critics. The major themes and movements in phenomenology and existentialism will be studied through several key thinkers: Franz Brentano, Edmund Husserl, Martin Heidegger, Edith Stein, Maurice Merleau-Ponty, Jean-Paul Sartre, Emmanuel Levinas. Themes that will be critically considered include: intentionality, phenomenological description, perception and embodiment, moods and emotions, self-consciousness, the nature of the self, sociality and the surrounding lifeworld. The course will have both a historical and a critical orientation with an emphasis on reading selected primary-source texts in English translation.

PHIL584601

Plato's Republic

Kreeft, Peter J

Spring 2025

A careful textual reading of the most well-read book in the history of philosophy, focusing on the larger and more influential metaphysical, anthropological, and epistemological issues rather than the ephemeral political details. The figure of Socrates, related Platonic dialogues, and the Platonic tradition in Western philosophy will also be added as a historical context. Satisfies the following distribution requirement(s) for Philosophy: History of Philosophy, Ancient.

Credits: 3

Room and Schedule: Stokes Hall 109S TuTh 10:30AM-11:45AM

PHIL593401

The Art and Thought of Terrence Malick

Bloechl, Jeffrey

Spring 2025

This is not, in the first instance, a course in philosophy of film. Malick's work will be approached as a palimpsest in which imagery, music, characters, and plot are explored in their interrelation as a way to unlock certain recurrent themes and ideas. We will view six films and read a great deal of philosophy and theology that is promoted by these themes and ideas. On alternating weeks, a film will be viewed together, and discussed in seminar format. In between these two meetings, participants will be required to view the film again, with a set of guidelines for reflection. Satisfies the following distribution requirement(s) for Philosophy: Ethics & Values.

Natural Law to the State of Nature: Medieval to Modern Political Theory

Sweeney, Eileen C

Spring 2025

This course will examine the transition from Medieval to Modern political thought through the lens of the transition from the notion of Natural Law in the Medieval period to classical contract theory based on notions of the state of nature. We will read Thomas Aquinas and William of Ockham, and modern thinkers including Hobbes, Locke, Rousseau, and Kant. Satisfies the following distribution requirement(s) for Philosophy: Ethics & Values, History of Philosophy.

PHIL622601

Kant: Philosophy As System and Critique

Basile, Giovanni Pietro, Society of Jesus

Spring 2025

The course covers two fundamental aspects of Kant's critical philosophy. The first is the architectonic of Kant's system of transcendental philosophy, which includes not only the three Critiques but also his metaphysics of nature and his metaphysics of morals. The second aspect concerns Kant's conception of the history of pure reason and the role of his critical philosophy in this history. These analyses will highlight a tension within Kant's thought between the claim to realize definitive systems and the critique that implies overcoming any historically given system.

PHIL632401

Hegel's Philosophy of Mind

Magri, Elisa

Spring 2025

In this course, we will read and discuss Hegel's Philosophy of Subjective Spirit from the 1830Encyclopedia of Philosophical Sciences in Outline. We will proceed by situating Hegel's concept ofGeist(spirit) in its own philosophical and historical context. Then, we will concentrate on the main themes of Philosophy of Subjective Spirit, namely anthropology, phenomenology (a shorter and different version than the 1807Phenomenology of Spirit), and psychology. Special attention will be given to Hegel's account of feeling, thinking, and acting, drawing --where appropriate-- on contemporary resources and literature.

PHIL660501**Augustine****Byers, Sarah C****Spring 2025**

In this course we examine questions in epistemology, ethics and metaphysics using major works of Augustine (354-430 AD/CE), supplemented by works of contemporary philosophers on related themes (Kretzmann, Matthews, MacDonald, VanInwagen). We will aim at depth of understanding and breadth of knowledge, contextualizing Augustine as a philosopher of late antiquity in dialogue with the Hellenistic schools (Stoicism, Skepticism, Neo-Platonism) whose philosophy is still of interest today. Topics include the nature of faith, skepticism, the problem of evil, the nature of God, moral development and conversion, the origin and characteristics of the natural world, including the human soul and body.

PHIL667001

Technology and Culture

Griffith, William

Spring 2025

This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

PHIL668701

Philosophies of the Earth: Readings in Ecological Hospitality

Kearney, Richard

Spring 2025

The seminar will discuss key readings in the contemporary philosophy of nature as it relates to ecological questions of earth, climate, elemental imagination and interspecies belonging. The readings will run from the seminal writings of Husserl, Heidegger, Merleau-Ponty and Bachelard to a new generation of eco-philosophers including David Abram, Edward Casey, Erazim Kohak, Catherine Keller and Brian Treanor. The seminar will involve lectures, close readings, class discussions and a final paper. Satisfies the following distribution requirement(s) for Philosophy: Modern, Ethics & Values, Knowledge & Reality.

PHIL724001

Platonic Cosmology

Gurtler, Gary, SJ

Spring 2025

The purpose of this course is twofold: to explore Platonic considerations of cosmology in the Timaeus; and to investigate Plotinus major study of the soul's relation to the sensible cosmos in IV 3-5 [27-29]. The Timaeus first describes the generation of the cosmos, with special attention to the four elements and their relation to the possibility of sensation. Fire and earth, for example, produce the motions that make things visible and tangible, with air and water as proportions that help connect things together (31b-34a). The next part concerns the relation of soul to body, its presence throughout the body, and the location of its powers in specific parts of the body.

PHIL755201

Phenomenology of the Self as Cross-Cultural Philosophy

Johnson, David W

Spring 2025

This course explores the question of the self from a phenomenological and cross-cultural standpoint. We examine the notion of self as experiential dimension in Husserl, Heidegger, Sartre, and Merleau-Ponty and consider objections to this concept found in contemporary Buddhist philosophers such as Albahari, Garfield, Dreyfus, and Siderits. A side-by-side explication of the ideas of each of these thinkers will allow us to explore the question of whether it may be possible to reconcile the core experiential self of phenomenology with a particular ontology of selfless states.. Satisfies the following distribution requirement(s) for Philosophy: Modern.

PHIL775301

Reading Jacques Derrida

Newmark, Kevin

Spring 2025

This course will examine some of the fundamental ways that the work of Jacques Derrida has contributed to altering the context in which the humanities can be understood and studied within the modern university. It will take examples from Derrida's repeated interventions in such disciplines as literature, philosophy, theology, and history. By situating Derrida's work at the margins where accepted demarcations between the disciplines begin to blur, the course will suggest new possibilities for conducting interdisciplinary work in the future.

PHIL778801

Aristotle's Metaphysics

Wians, William R

Spring 2025

The course will be devoted to one of the rarest, most excellent, and most difficult philosophical texts ever written. Aristotle's *Metaphysics* presents a profound and profoundly influential answer to the question What is being? But even apart from his answer, the Philosopher reveals his greatness as a thinker by the way he approaches the question of being: what does the question pre-suppose? What does it imply for nature, knowledge and language? How can the question of being be answered when all we experience are individual beings?

Medieval Theories of Mind and Cognition

Solere, Jean-Luc

Spring 2025

How and what do we perceive? How does one form concepts? Who is the thinking subject? What do we know? This class will offer the opportunity to examine central issues of medieval philosophy: sense perception, realism versus representationalism, nature of the intellect, abstraction process, semantics and concepts. Through the study of some landmark thinkers, such as Avicenna, Averroes, Aquinas, Scotus, Ockham, we will observe the apparition of the modern conceptions of the cognitive subject and of knowledge. The course is especially designed for giving graduate students a strong and in-depth presentation of an essential moment of the development of medieval thought.

Introduction to Physics I (Calculus)

Auner, Alexander

Summer 2024

PHYS2050 is the laboratory course to supplement the lecture course material. First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.

Physics Courses: Fall 2024

PHYS110001

Structure of the Universe I

Opeil, Cyril P, SJ

Fall 2024

An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.

PHYS150001**Foundations of Physics I****Kempa, Krzysztof****Fall 2024**

Recommended laboratory (optional): PHYS2050-2051.. First semester of a two-semester algebra-based introductory physics course sequence, primarily for non-science majors, that covers the basic principles of physics. Emphasis is placed on problem-solving to demonstrate the implications of these principles, and to develop analytical skills. This course is similar to PHYS2100 in pace and content but with less emphasis on mathematical technique. First semester covers classical mechanics, including Newton's laws, energy, rotational motion, fluids, thermal physics, oscillations, waves, and gravitation.

PHYS210001

Introduction to Physics I (Calculus)

Gallaba, G M Dinuka H

Fall 2024

PHYS2050 is the laboratory course to supplement the lecture course material. First semester of a two-semester calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics include classical mechanics, including Newton's laws, energy, rotational motion, hydrostatics and fluid dynamics, oscillations, waves, and gravitation.

Credits: 4

Room and Schedule: Higgins Hall 300 MWF 09:00AM-09:50AM

Satisfies Core Requirement: Natural Science

Prerequisites: MATH1100 required. May be taken concurrently.

PHYS310001

Vibrations and Waves

Broido, David

Fall 2024

This course is an introduction to the phenomena of vibrations and waves that span most of the areas in physics. The basic subject matter includes the following: mechanical vibrations and waves, free and forced vibrations and resonances, coupled oscillations and normal modes, vibration of continuous systems, propagation of mechanical and electromagnetic waves, phase and group velocity, interference and diffraction. The course also covers the basic concepts in first and second order differential equations, matrices, eigenvalues and eigenvectors and Fourier series.

Classical Mechanics

Naughton, Michael J

Fall 2024

This course studies classical mechanics at the intermediate level and develops analytical skills for later physics courses. It includes: single particle dynamics and oscillations; conservative forces and conservation laws; gravitation and central force motion; Lagrangian and Hamiltonian dynamics; system of particles and rigid body dynamics.

PHYS440001

Quantum Physics I

Chen, Xiao

Fall 2024

First of a two-semester sequence providing a comprehensive treatment of the principles and applications of non-relativistic quantum mechanics. This semester focuses on basic principles. Topics covered include: historical development of quantum mechanics; the uncertainty principle; the Schrodinger equation and its solution for simple one-dimensional potentials, including constant potentials and the harmonic oscillator; formal presentation of the postulates of quantum mechanics using Dirac notation; commutation relations; basic scattering theory; formulation of Schrodinger equation in three-dimensions, central potentials, orbital angular momentum, and the hydrogen atom; spin angular momentum and the addition of angular momenta.

PHYS454501

Condensed Matter Physics

Ma, Qiong

Fall 2024

Condensed matter physics concerns all aspects of the physics of "condensed" materials, that is, solids, liquids, gels, and plasma. It is the science behind many technologically-relevant applied and integrated science and engineering fields. This course primarily covers the solid state, starting with crystal lattices and their vibrations (phonons), and descriptions of crystalline metals, semiconductors, insulators, and superconductors. It covers in some detail the electrical, magnetic, optical, and thermal properties of materials, and introduces the student to noncrystalline solids and so-called "soft condensed matter."

Statistical Mechanics and Thermodynamics

Tafti, Fazel

Fall 2024

The results of classical thermodynamics are deduced from a statistical basis, including the concepts of temperature and entropy, and the three laws of thermodynamics. Applications to ideal and real gases. Basic elements of statistical mechanics, including the canonical ensemble, partition function, equipartition theorem and Maxwell velocity distribution. Simple application of Maxwell-Boltzmann, Bose-Einstein, and Fermi-Dirac Statistic.

PHYS877001

Special and General Relativity

Engelbrecht, Jan

Fall 2024

This course explores the geometric nature of fundamental classical physics. We aim to strike a balance between physical observations and mathematical sophistication. Topics covered will include how the spacetime coordinates of Special Relativity reveal that electromagnetic fields are not vectors but rather components of a 2-form. In General Relativity we cover the non-uniqueness of solutions to Einsteins vacuum field equations, which include amongst others the Schwarzschild and Kerr metrics whose geodesics generalize Newtonian gravitational orbits. We also cover non-vacuum solutions such as FLRW metrics of the co-moving coordinates of big-bang cosmology and their relationships with astronomical observations.

Physics Courses: Spring 2025

PHYS110101

Structure of the Universe II

Opeil, Cyril P, SJ

Spring 2025

An introductory course directed at non-science majors. Physical principles are developed and applied to our space and astrophysical environment. Topics include structure and evolution of the solar system, physics of the sun and planets, space discoveries, creation and structure of stars and galaxies, relativity and cosmology, extraterrestrial life, and astronomical concepts.

Foundations of Physics II

Naughton, Michael J

Spring 2025

Recommended laboratory (optional): PHYS2050-2051.. Second semester of the two-semester algebra-based introductory physics course sequence primarily for non-science majors. This course is similar to PHYS2101 in pace and content but with less emphasis on mathematical technique. Topics to be covered are fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism, electromagnetic oscillations and waves, physical optics, and, if time allows, basic concepts and applications of special relativity and quantum physics.

PHYS210101

Introduction to Physics II (Calculus)

Gallaba, G M Dinuka H

Spring 2025

PHYS2051 is the laboratory course to supplement the lecture course material. Second semester of a calculus-based introduction to physics primarily for biology majors and premedical students. The development and application of classical physical principles are covered, and students are introduced to more advanced mathematical techniques to extend these applications. Emphasis is placed on problem-solving to better understand the implications of these principles, as well as to develop analytical skills. Topics are electrostatics, electrical circuits, magnetism, electromagnetism and electromagnetic waves, topics in physical optics, and basic concepts of special relativity and quantum physics.

Credits: 4

Room and Schedule: Higgins Hall 300 MWF 09:00AM-09:50AM

Satisfies Core Requirement: Natural Science

Prerequisites: PHYS2100 or MATH1101 required. May be taken concurrently

PHYS220101

Introductory Physics II (Calculus)

Auner, Alexander

Spring 2025

PHYS2051 is the laboratory course to supplement the lecture course material. Second semester of a calculus-based introduction to physics for those majoring in the physical sciences. Students utilize analytical reasoning combined with mathematical formalism to fully explore the development, consequences and limitations of the classical principles of physics. Class size is limited to promote classroom discussion. Topics include fundamentals of electrostatics, simple electrical circuits, magnetism, electromagnetism and electromagnetic oscillations and waves, and selected topics in physical optics. PHYS2200 is a prerequisite for this course.

PHYS330001

Introduction to Modern Physics

Flebus, Benedetta

Spring 2025

This course is a transition between introductory and advanced physics courses for science majors. The basic subject matter includes the two principal physical theories of the twentieth century--relativity and quantum mechanics. Included are the following: the Lorentz transformation, kinematic consequences of relativity, origin of the quantum theory, one-dimensional quantum mechanics, quantum mechanics of a particle in three dimensions, applications to the hydrogen atom and to more complex atoms, molecules, crystals, metals, and semiconductors.

Credits: 4

PHYS420001

Electricity and Magnetism

Zhou, Brian B

Spring 2025

To provide students with the background in electricity and magnetism necessary to deal with experimental problems in electromagnetism. Part 1 will present the mathematical foundations for the entire treatment of electromagnetism. Part 2 deals with Coulomb's law and the electrostatics based on this law. Part 3 addresses stationary currents and magnetostatics. Part 4 deals with induction and quasi-stationary phenomena, self- and mutual-induction. Part 5 presents a treatment of Maxwell equations and the consequences of these equations, e.g., energy and momentum conservation, Plane waves, reflection, and refraction. Time permitting, we will discuss radiation from moving charges.

PHYS440101**Quantum Physics II****Chen, Xiao****Spring 2025**

Second semester of the PHYS4407-4408 sequence, focusing on applications. Topics covered include: treatment of the many-particle systems, including effects of spin and symmetry of the wave function; many-electron atoms and the periodic table; basic elements of quantum statistics; approximation techniques, including non-degenerate and degenerate perturbation theory and the variational principle; time-dependent perturbation theory and the interaction of electromagnetic radiation with matter.

Political Science Courses: Summer 2024

POLI104101

Fundamental Concepts of Politics

Womack, Rory F

Summer 2024

Restricted to freshmen and sophomores only. This is an introduction to the study of politics through a consideration of some of the basic elements associated with governing: the political association, justice, constitutions, equality, liberty, conflict among citizens and between citizens and governments, conflict among governments. Each of the course instructors uses a different set of readings, drawing on a mix of political philosophy texts, works on international politics, novels, biographies. Emphasis is on interesting and important readings, discussion, and writing. NOTE: for academic-year students, this course is major restricted.

POLI106101

Introduction to American Politics

Puerzer, Casey R

Summer 2024

For majors and non-majors. An overview of contemporary American government and politics focusing on how the institutions envisioned by the Framers of the Constitution (Congress, the judiciary, the executive) function today. Particular emphasis will be placed on how developments since the 1960s have affected the interaction of national, state, and local governmental actors, political participation, the articulation of interests, and policy formulation and implementation. Topics covered will include the media, public interest and advocacy organizations, campaign technologies and consultants, and public policy research institutes (think tanks). Whenever possible, comparisons between the U.S. and other advanced industrial democracies will be explored.

This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

POLI352701

Terrorism, Insurgency, and Political Violence

Krause, Peter J

Summer 2024

Terrorism, insurgency, and political violence are unfortunately all around us. Whether its the targeting of elected officials in the U.S. or the killing of civilians in Israel, the West Bank, and Gaza, or mass bombings amidst civil wars in Syria, Somalia, and Yemen, violence by and against non-state actors is the most common form of conflict in the 21st century. Are terrorism and political violence inventions from the modern era, or do they have a deeper past? What drives an individual to join an armed group? Why do some groups choose to employ violence, while others do not? Are terrorism and insurgency effective political tactics? Just how significant is the threat of terrorism to you and to others around the world? This course will address these and other questions, while introducing students to relevant analytical frameworks, theories, and cases concerning terrorism, insurgency, and related forms of political violence. In addition to its topical focus, this course could rightly be called a methods course. Students in the class will learn how to improve their analytical thinking, conduct high quality research, and present an effective argument, both orally and in writing. They will learn the potential and pitfalls of theories of political violence through constant analysis and engagement with the history of terrorism and insurgency. By the conclusion of the course, students will emerge not only with a far richer understanding of these issues, but also as more sophisticated consumers, analysts, and producers of knowledge.

POLI354101**Research Methods in Political Science****Krause, Peter J****Summer 2024**

Rigorous, systematic research methods are at the foundation of quality scholarship for students and professors alike, but many students find research methods scary and/or boring to learn. This class will introduce students to a wide array of research methods in an engaging, accessible way. Students will get hands-on training in how to ask good question, generate their own original arguments, define and measure their concepts, and set up and carry out sophisticated research designs. Along the way, students will learn the basics of archival research, interviews, surveys, case studies, and statistical analysis. The course focuses on applied methods using scholarship and examples from political science, international studies, history, psychology, and sociology. The course is designed for students to write the best paper they have ever written. Every week, student assignments are learning and applying one of these skills to their paper project, so that by the end of the semester they have a well-written, original research paper with an engaging question, well framed arguments, and in-depth comparative case study analysis. This is a great course for students thinking about writing a thesis, pursuing a research-focused career, or for those who simply want to supercharge their analytical skills, in this class and in others.

POLI102101

How to Rule the World: Introduction to Political Theory

Bartlett, Robert C

Fall 2024

This introductory course in political theory will be devoted to exploring what may well be the highest political theme: the requirements of great political rule. What must we do in order to govern well? Even more important, what must we know? With these and related questions in mind, you will be asked to read, reflect on, and write carefully about a handful of foundational texts that all deal, in very different ways, with the question of the requirements of great political leadership.

POLI104201

Introduction to Modern Politics

Hetzner, Candace

Fall 2024

For majors only. Restricted to freshmen and sophomores only.. This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself--the most typical modern political arrangement--as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

POLI122801

The Dynamics of West African Politics

Ngimbous, Jacques M

Fall 2024

What are the causes behind the military coups that took place in four West African countries within the past three years? Why have elections not been successful in granting legitimacy to several Sahelian nations? Is there a correlation between institutional weaknesses, trends in collective identities, and strategies used by interest groups that have triggered political violence? This course aims to analyze and propose plausible answers to these questions. The purpose is to provide a framework that could assist in comprehending the political sociology of Francophone West Africa and aid in the pursuit of stable states. This main focus is on the domestic politics of Francophone countries in West Africa from a comparative perspective. Various topics that will be examined include: 'ethnic violence', 'political crises', 'spiritual insecurity', 'hybrid political esotericism', 'military coups', 'contested elections' and 'endemic corruption--all of which are prominent issues within the West African political sphere. International actors, factors, organizations, and parameters are considered only insofar as they are relevant to local politics and are crucial for the understanding of the primary political dynamics of West Africa.

POLI126601

State Building and Conflict in Africa

Woldegebriel, Mesfin

Fall 2024

This course is about the relationship between political violence and state-building in Africa. The first four weeks provide background topics such as war and state formation in pre-colonial Africa and the dynamics of colonial conquest. The core themes will follow in the following four weeks, including the onset, intensity, and termination of civil war in post-colonial Africa. The last four weeks explore patterns of conflict and state-building in individual African countries. Beyond the descriptive goals, the course significantly emphasizes explaining issues. Thus, students should not only develop an understanding of what patterns of conflict and state-building in post-colonial Africa look like but also engage in a range of competing academic theories designed to describe and explain the patterns. Students can also critically weigh available evidence in developing their original understanding.

The Cost of Free Speech

Bayles, Martha

Fall 2024

This course is a non-subfield elective course for Political Science majors only. This course is class-restricted to juniors and seniors only. Graduate students are welcomed. "The Cost of Freedom" will focus on the challenge of preserving the liberal ideal of free speech in a world where democratic governments seem paralyzed by political and cultural polarization; powerful tech companies have become reluctant censors; authoritarian regimes deploy artificial intelligence and "the internet of things" for surveillance, censorship, and propaganda; and many failing democracies and would-be authoritarian regimes seem poised to do the same. The goal is to help you situate the classic debate over free speech in both the broader historical context and the contemporary landscape.

Policy and Politics in the U.S.

Melnick, Rowell S

Fall 2024

This course is designed to acquaint students with the major features of American policymaking at the national level by engaging in primary research and extensive memo-writing on selected policy issues. Each student will be expected to become familiar with at least three policy areas, understanding existing government policies and underlying tradeoffs and paradoxes; proposing intellectually defensible and politically feasible reforms; and suggesting political strategies for enacting these reforms. Possible topics include social security, environmental regulations, federal aid and mandates for education, affirmative action, welfare, and the use of public lands.

Parties and Elections in America

Hopkins, David A

Fall 2024

This course surveys the practice of campaigns and elections in the United States, with a particular emphasis on the historically central role of political parties in supplying candidates for office, structuring the choices of voters, and determining the outcome of electoral contests. It will examine the influence of party coalitions, candidate strategy, electoral rules, news media coverage, and political money in both presidential and congressional races, with a focus on the 2024 campaign as it unfolds over the course of the semester.

POLI233401

Political Behavior and Participation

Hopkins, David A

Fall 2024

How do citizens form opinions about politics, and how do these attitudes influence their participation in political life? This course addresses these questions by surveying the most prominent sources of influence on the political orientations of individuals, including personality effects, socialization, interpersonal dynamics, cognitive biases, and the news media. We then apply these findings to the most common forms of political behavior, including party affiliation, electoral participation, activism, and protest, aiming to explain why different citizens support different political candidates and causes—as well as why some members of the public engage extensively in political activity while others remain uninvolved.

POLI240701

Introduction to South Asian Politics

Marcesse, Thibaud

Fall 2024

South Asia is not just home to the world's fastest growing economy (India), it is also a region that continues to face significant security and development challenges, with some of the longest running interstate conflicts (between India and Pakistan for instance), and severe poverty and inequality across countries such as India, Pakistan, Bangladesh, or Sri Lanka. What accounts for the variation in security and development outcomes across and within these countries? Why are some of them better able to ensure peace and security and basic service delivery than others? This course proposes an overview of the politics of South Asia as a regional security complex, starting with the colonial legacies of state building in the region, but also looking at the impact of economic reforms and the changing international environment since the end of the Cold War and the rise of India and China as a global powers.

POLI241001

Latin American Politics

Bizzarro Neto, Fernando

Fall 2024

This course is restricted to sophomores, juniors, and seniors. Why are Latin American countries comparatively less developed than other former colonies such as the US or Australia? How did formerly authoritarian Brazil or Mexico build vibrant democracies in the 2000s while Venezuela, the only South American country not to experience democratic breakdown in the 70s, fell into authoritarianism? How can Latin American countries promote inclusive economic growth and provide welfare and public safety to their growing population? Do the failures in the provision of these services fuel discontentment with democracy in the region? This course answers these and other questions about politics, the economy, and the society of Latin America. It introduces the scholarly debate about the historical foundations, evolution, and legacies of Latin American states, political regimes, and welfare systems and studies some of the most pressing challenges faced by countries in the region today (democratic quality, inclusion, transitional justice, corruption, violence, sustainable development, poverty, and inequality).

POLI241601

Politics of Inequality

Bizzarro Neto, Fernando

Fall 2024

This course is restricted to sophomores, juniors, and seniors. Why are some countries more unequal than others? Why has inequality across countries decreased while inequality within countries increased in the past 50 years? Are unequal democracies sustainable? How does economic inequality shape political representation, violence, and the provision of public services across the world? Are there ways to reduce economic inequality? This course answers these and other questions about the interaction between economic inequality and politics. It introduces students to definitional and empirical debates about economic inequality and discusses the political origins of inequality and its contemporary global trends. The course also studies the consequences of economic inequality on democracy, political representation, the rule of law, redistribution (social policy and taxation), and governance. The course has a global focus, studying the politics of economic inequality in both developed and developing countries.

A Continent on the Move: Immigration in Contemporary Europe

Molles, Elitsa V

Fall 2024

Why do people migrate? How do host states and societies react to an increasingly multicultural and diverse foreign population? What impacts the political, economic and socio-cultural incorporation of Europe's immigrants? This course explores the central debates in immigration studies through a survey of contemporary Western Europe, with cases comprising immigrant populations in both traditional immigrant receivers (e.g., Moroccans in France or Turks in Germany) and "new" immigration countries (e.g. Africans and Latin Americans in Spain or Poles and Nigerians in Ireland). Middle Eastern refugees in Europe will be discussed throughout the semester. Particular emphasis is placed on how the relationship between the immigrant and the receiving state transforms both.

African Politics

Honig, Lauren

Fall 2024

This course examines key questions and debates in the study of politics in Africa. Why and when is ethnicity salient in elections? If state boundaries in Africa are largely colonial creations, why are they so resilient? Why are some countries more prone to civil war? What is the relationship between elections and democracy? How do historical legacies impact contemporary politics? The goal of this course is to provide students with analytical tools to understand a number of questions that are of interest to contemporary politics in Africa. Using the methodologies of comparative politics, we will examine both broad cross-national patterns and focused case studies in this class.

The Politics of International Money and Finance

Kirshner, Jonathan D

Fall 2024

The management of money is generally understood to be a highly complex and technical matter, and as a result, it is commonly argued, best left in the hands of dispassionate technocrats guided by the neutral logic of abstract economic theory. But money is always and everywhere a political phenomenon. When it comes to questions of money and finance, locally and globally, political factors and forces inevitably, inescapably, and fundamentally shape choices and determine outcomes. In this course we consider the political foundations of monetary matters, with a focus on topics including central banking, financial crises, the future of the dollar, the unique social meaning of money, the Euro crisis, and more.

POLI261701

Tolerance: Theory and Practice

Kerber, Hannes

Fall 2024

Tolerance is an indispensable political virtue in liberal democracies. Without it, pluralistic societies like our own would be unable to deescalate internal conflicts across political, religious, cultural, racial, and ethnic dividing lines. However, our strong belief in the need for the practice of tolerance is not matched by a corresponding theoretical certainty. Despite the widespread discussions of the idea since it gained prominence in the early modern period, tolerance has remained a notoriously elusive concept. In this course, we will trace various historical and intellectual paths that have led to our current understanding and practice of tolerance. Starting from Aristotle's Ethics, the New Testament, and St. Augustine's City of God, we will carefully study the arguments by classic advocates (such as Pierre Bayle, John Locke, and Voltaire) and pay special attention to past and present critics (such as St. Augustine, Immanuel Kant, and Wendy Brown).

Sem: Democracy and Our Schools

Hartney, Michael T

Fall 2024

This seminar is restricted to juniors and seniors only.. This course examines K-12 education policy through the lens of American politics. On the one hand, schools influence American democracy by cultivating norms of civic and political engagement among youth. Yet public schools are also agencies of government, which means that education policy is established through democratic political processes. This interplay between democracy and education raises fundamental questions about the consequences of living in a nation that relies on elected officials to govern its schools. We begin by examining contestation over the very purposes of public education. We then assess the formal institutions, groups, and ideas that shape education policymaking. Along the way we will be guided by questions such as: Does democracy compromise educational equity? How much say should the public have in determining education policy? Should schools be organized primarily by politics or by markets?

POLI340601

Irish Politics 1916 to Present

McGraw, Sean D

Fall 2024

Class restricted to sophomores, juniors, and seniors. Ireland, a country rich in history, has undergone dramatic changes in the twentieth century beginning with its fight for independence and culminating in its meteoric rise during the Celtic Tiger years. What explains Ireland's distinctive political trajectory and how does it compare to other European nations? How should we understand the Celtic Tiger, the rapid series of social, economic and political transformations that have occurred within Ireland since the 1990s? This course explores these questions by studying the political actors and institutional settings of Irish politics, the nature of political influence and the shaping of political priorities, and the forces that shape policy outcomes. It will address such critical issues as the legacies of colonialism and civil war, nationalism, democratization, the relationship between the Church and State, the Northern Ireland Troubles and the European Union. While the course focuses on the Republic of Ireland, it will adopt a broad comparative perspective, situating the country both within the wider global context and within the political science literature.

POLI352701

Terrorism, Insurgency, and Political Violence

Krause, Peter J

Fall 2024

Terrorism, insurgency, and political violence are unfortunately all around us. Whether its the targeting of elected officials in the U.S. or the killing of civilians in Israel, the West Bank, and Gaza, or mass bombings amidst civil wars in Syria, Somalia, and Yemen, violence by and against non-state actors is the most common form of conflict in the 21st century. Are terrorism and political violence inventions from the modern era, or do they have a deeper past? What drives an individual to join an armed group? Why do some groups choose to employ violence, while others do not? Are terrorism and insurgency effective political tactics? Just how significant is the threat of terrorism to you and to others around the world? This course will address these and other questions, while introducing students to relevant analytical frameworks, theories, and cases concerning terrorism, insurgency, and related forms of political violence. In addition to its topical focus, this course could rightly be called a methods course. Students in the class will learn how to improve their analytical thinking, conduct high quality research, and present an effective argument, both orally and in writing. They will learn the potential and pitfalls of theories of political violence through constant analysis and engagement with the history of terrorism and insurgency. By the conclusion of the course, students will emerge not only with a far richer understanding of these issues, but also as more sophisticated consumers, analysts, and producers of knowledge.

The Arab-Israeli Conflict

Krause, Peter J

Fall 2024

This course is class-restricted to sophomores, juniors, and seniors. The Hamas attacks on October 7, 2023 and the subsequent Israeli invasion of Gaza are only the latest tragic chapters in the ongoing Israeli-Palestinian conflict. The broader struggle, which involves not just Israelis and Palestinians, but also regional states like Egypt, Syria, Jordan, and Saudi Arabia, has been at the core of Middle East politics over the past century. But the character and outcomes of this conflict have varied significantly across time and space. This course will address the origins, dynamics, and effectiveness of Zionism and Palestinian nationalism, the causes of war and peace, and changes in territorial and political control of the region from the early 1900s to the present. Students will learn and analyze the perspectives and behaviors of state and non-state actors on all sides to gain a greater appreciation for a struggle that continues to drive regional dynamics and U.S. foreign policy in the Middle East. By the conclusion of the course, students will emerge not only with a far richer understanding of the region, its people, and its politics, but also as more sophisticated consumers, analysts, and producers of knowledge.

POLI439501

Interest Groups in American Politics

Hartney, Michael T

Fall 2024

This course is class-restricted to sophomores, juniors, seniors, and graduate students. In representative democracies, political power and influence usually hinges on the strength of organized groups. Interest groups also play a key role in linking citizens to their elected officials in government. But interest groups do not arise spontaneously and there are significant disparities in whose interests get represented. To understand why this state of affairs persists, we will first explore the numerous challenges to forming, organizing, and maintaining political advocacy groups. We will then focus on what these groups do on a day-to-day basis to try and influence political decision-making (lobbying, electioneering, mobilizing). The course concludes by evaluating whether and how interest groups affect public policy. In sum, the course provides an in-depth examination of interest group politics in the contemporary United States.

Sem: The Iraq War: Causes and Consequences

Alshamary, Marsin

Fall 2024

This seminar is restricted to Political Science juniors, Political Science seniors, and graduate students. The Iraq War is often described as one of the worst American foreign policy blunders and a cause of violence and instability in the Middle East. This seminar will examine both American and Iraqi perspectives on the war and its aftermath. What were the key causes of the war? How did the transition play out in 2003? How do we assess the Iraqi state building project? What is the war's legacy in the Middle East and in the United States?

Current Issues in U.S. Foreign Policy

O'Rourke, Lindsey A

Fall 2024

This course is class-restricted to juniors, seniors, and graduate students. This seminar will look at current issues in U.S. national security policy. The class is structured in three parts: The first section will consider America's general role in world politics in 2024. The second section will focus on the foreign policy of the Biden administration and how the 2024 presidential election might impact U.S. foreign policy going forward. The remainder of the class will focus on a new international hot spot and discuss recent academic and policy pieces related to that topic. The course has three main objectives: 1) to gain a better understanding of current U.S. foreign policy debates, 2) to better understand ongoing international disputes, and 3) to apply theoretical insights derived from the international relations literature to the policy debates surrounding those disputes.

Realist Theories of International Relations

Kirshner, Jonathan D

Fall 2024

Class restricted to sophomores, juniors, seniors, and graduate students. "Realism" is often invoked in international relations to mean many different things. By policymakers, it is often cited as a source of support for--and opposition to--the use of force by the U.S. in world politics. By scholars, the term realism has been deployed as a rhetorical weapon (implying opponents are "unrealistic"), as a challenge to well-intended but "utopian" foreign policies, and, often, in an academic context, as a synonym for "structuralism," which it need not be. In this course, we will look closely and critically at the tradition of realism in International Relations Theory, both to find out exactly what realism does stand for and to see how it can help us better understand world politics more generally.

Seminar on International Security

Byun, Hyung-Joon

Fall 2024

Class restricted to juniors, seniors, and graduate students. This seminar provides an advanced-level survey of the scholarly literature on International Relations (IR) theory and international security. We will delve into both canonical and cutting-edge works in security studies, addressing debates on critical topics such as the balance of power, conventional and nuclear deterrence, military effectiveness, and crisis diplomacy. The core aim is for students to acquire the substantive and methodological foundations necessary to develop ideas for independent research on international security affairs.

Honors Seminar

Behnegar, Alice P

Fall 2024

Honors Seminar: Thinking, Fighting, Ruling, Writing: Whats the Best Life? In considering the question of what the best life for a human being is, Aristotle suggests the political life and the contemplative life as the two serious contenders; others might suggest piety and poetry have claims of their own. In this course we will think about that question with the help of some very interesting individuals who have been both extraordinary political actors and serious thinkers and writers. Possible texts for the course might be Xenophon's Anabasis (with the movie The Warriors) and Memorabilia, Homer's Odyssey (with the movie O Brother Where Art Thou?), Churchill's My Early Life, T.E. Lawrence's Seven Pillars of Wisdom (with the movie Lawrence of Arabia), and 1 and 2 Samuel (with the Psalms).

Research Methods in Political Science

Hopkins, David A

Fall 2024

This graduate course is a non-subfield elective course. This course provides an introduction to the practice of empirical research in political science. It addresses a variety of prominent methodological approaches, including experimental and quasi-experimental designs, field studies, interviews, content analysis, survey research, and aggregate data analysis. We will also consider relative strengths, tradeoffs, and syntheses of qualitative and quantitative methods. The course aims to equip students both to conduct original research and to evaluate the work of others.

Field Seminar in Comparative Politics

Honig, Lauren

Fall 2024

This course provides a graduate-level survey of the field of comparative politics, introducing students to classic works as well as recent contributions that build upon those works. Readings will draw from leading theoretical approaches-including structural, institutional, rational choice, and cultural perspectives-and cover a broad range of substantive topics, such as democratization, authoritarianism, states and civil society, political economy, and political participation and representation.

POLI780501

Comparative Authoritarianism: Russia and China

Easter, Gerald M

Fall 2024

As the 21st-century unfolds, an undeniable trend in world politics is the persistence of authoritarianism as a regime type. After several decades of advance, democracy is now on the defensive in many countries, while new types of authoritarianism are consolidated. This class examines the phenomenon of the persistence of authoritarianism with a focus on two leading cases: Russia and China. The class takes a long-term perspective from their communist roots to their contemporary forms. Along the way, we sample various comparative politics theories to compare and contrast the two cases, including: reform and revolution; personality cults and terror; politics of economic development; reconfiguration of contemporary authoritarianism. Finally, the class examines the challenges to the established global order posed by the Russian-Chinese partnership.

POLI104201

Introduction to Modern Politics

Behnegar, Alice P

Spring 2025

For majors only. Restricted to freshmen and sophomores only.. This course examines the politics and government of modern states, identifying what is distinctively modern (e.g., representative government, political parties), including in the survey both democratic and non-democratic nations. We will consider the nation-state itself--the most typical modern political arrangement--as well as efforts to "transcend" the nation (e.g., the European Union, the United Nations). We will examine the kinds of public policies that modern states adapt, and consider their consequences. Although this is not a class in international politics, some attention will be paid to the relations among modern states, including war and its causes.

POLI108101

Introduction to International Politics

Ross, Robert S

Spring 2025

Course restricted to political science majors only. This course may NOT be taken by any International Studies majors or minors. Class restricted to political science freshmen and sophomores. This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order. This course is strongly recommended for students who plan to take upper level international politics courses.

POLI122901

African Political Parties

Ngimbous, Jacques M

Spring 2025

The origin of political parties is inextricably linked to the colonial era. Parties were either created as instruments of colonial rule or arose as organized means of resistance to colonial power. This colonial legacy still affects the behavior and role of political parties a half-century after independence. What are the distinctive features of African political parties both across the continent and with other continents? To answer this question, the course is divided into three sections: (1) the pivotal moments in the rise of political parties in modern world politics; (2) an overview of the distinctive characteristics of African political parties in general; and (3) a focused examination of West African political parties in particular.

Identity, Culture, and Conflict Resolution Practices in Africa

Woldegebriel, Mesfin

Spring 2025

The course introduces conflict resolution practices in Africa. It examines the causes of conflicts, the types of disputes, the political economy, the actors, and their relationships to identity and cultural differences. It explores conceptions of identity and cultural differences in Africa, traditional approaches to conflict resolution and modern peace management and resolution techniques, transitional justice, and post-conflict reconstruction. It examines several theories of peace and conflict and case studies from all regions of Africa to develop original insights for the students. Ultimately, students not only understand the causes of conflict and conflict resolution approaches in Africa are not homogenous to all countries but should also explain the conflicts in their way.

POLI126501

Africa in International Politics

Woldegebriel, Mesfin

Spring 2025

This course is an introduction to the international relations of post-colonial Africa. It includes the global politics of pre-colonial Africa, the dynamics of colonialism, and the international relations of de-colonization as background topics. Moreover, the course will examine the politics of post-independence international alignments, the external causes and effects of authoritarian rule, and Africa's role in the global political economy. It concludes by reviewing pressing issues, such as state failure, the "war on terror", China's growing economic and political footprint, and African multilateralism. Students will understand the patterns of international relations in post-colonial Africa and explain and critically weigh available evidence using a range of theories to build their original insights.

Americans, Ugly & Beautiful

Bayles, Martha

Spring 2025

This course is major restricted and class restricted to juniors and seniors; graduate students are welcomed. This course is not about "hard power," meaning coercive military or economic action. Instead, it is about "soft power," meaning attraction, persuasion, the power of example. Despite today's decline, America's image and influence still permeate the world, conveyed through every media platform and taking such different forms as news reports, entertainment, face-to-face interactions, and "public diplomacy" (government efforts to cultivate goodwill among overseas populations). How did these different modes of communication work in the past? How should they work today? What messages should the people of the United States be sending to the 95 percent of humanity who are not American? What messages are we in fact sending? These questions will be explored historically, thematically, and by region.

Introduction to Data Science

Krupenkin, Maria T

Spring 2025

Do YOU want to be the next Nate Silver? Data science has transformed many of the ways we engage with politics, from sophisticated voter turnout operations to the ubiquity of data journalism. This course will introduce students to the basic techniques of data science including data visualization, hypothesis testing, and simple linear regression. Students will learn how to use the R statistical software to analyze political data. This is an introductory class; no math or statistics background is necessary.

POLI230301

Revisiting Rural America

Georges, Elizabeth G

Spring 2025

This course examines the shifting role of rural America in modern politics, and how perceptions and realities of rural people and places have influenced discourse, voting, and governing at the national and state levels. Much has been made of the rising influence of rural voters and the increasing polarization between urban and rural voters. In what ways have rural politics changed in recent decades, and how has the resulting dynamic helped shape our contemporary political landscape? Topics include historical and current trends in rural attitudes and voter preferences, the role of economic and cultural forces in shaping those preferences, the impact of media portrayals and stereotypes, distinctions and commonalities between rural and urban voters, and consequences of a persistent divide to long-term electoral and governmental stability.

The American Presidency

Landy, Marc

Spring 2025

This course analyzes the contemporary presidency with special attention to its constitutional underpinnings and its political evolution. It traces the critical changes and continuities in presidential politics, institutional development, court rulings and statesmanship that have taken place over time. Its focus is presidential leadership and therefore it dwells on the most significant occasions during which great presidential leadership has been exercised and on the men who exercised it. We will pay close attention to current developments.

POLI240401

Populism and the Rise of Anti-Democracy

FitzGibbon, John E

Spring 2025

This course explores the emergence of Populist political movements around the globe and the increased challenge to democracy more generally. While the late 20th century was characterized by the triumph of democracy over alternative forms of government, democracy is facing both new and old challenges around the world. The course investigates the nature of these challenges, what are they, who leads them, and most critically why are they emerging now? Together we will seek to answer these questions so that we can better understand what is happening around the world with politics right now.

POLI240501

Comparative Politics of the Middle East

Bailey, Kathleen T

Spring 2025

The course explores origins of Muslim majority societies and political systems in the Middle East. It covers the formative era of Islamic civilization, and traces the diffusion of the Middle Eastern Islamic paradigm, culminating in the Ottoman system, and explores the social and political disruptions caused by the breakup of Muslim empires and establishment of European economic, political and cultural domination. It addresses how these forces led to the creation of national states and changes in class structure, and explores how the failure of Western forms of modernization and political organization led to demands for the formation of new political communities based on the revival of Islamic principles. Discussions will center Islam's compatibility with liberalism, secularization, modernity, democracy, and terrorism. Recent developments surrounding the "Arab Spring" and its aftermath will be explored. The course includes a crisis simulation exercise.

The New Worlds of Welfare Capitalism: Economic Reform, Redistribution, and Social Policy

Marcesse, Thibaud

Spring 2025

Under what conditions do states decide to redistribute and fund a welfare state? This course builds on scholarship in institutional economics and political economy to consider the evolution of welfare states in both industrialized economies and emerging economies in the global south. It will not only consider the impact of economic reforms such as market and trade liberalization on welfare regimes, but also look at the evolution of the structure of taxation and its impact on social policies. The course will discuss some of the challenges faced by emerging economies in the implementation of welfare policies in the absence of large-scale redistribution.

POLI244001

A Continent on the Move: Immigration in Contemporary Europe

Molles, Elitsa V

Spring 2025

Why do people migrate? How do host states and societies react to an increasingly multicultural and diverse foreign population? What impacts the political, economic and socio-cultural incorporation of Europe's immigrants? This course explores the central debates in immigration studies through a survey of contemporary Western Europe, with cases comprising immigrant populations in both traditional immigrant receivers (e.g., Moroccans in France or Turks in Germany) and "new" immigration countries (e.g. Africans and Latin Americans in Spain or Poles and Nigerians in Ireland). Middle Eastern refugees in Europe will be discussed throughout the semester. Particular emphasis is placed on how the relationship between the immigrant and the receiving state transforms both.

POLI244101

Comparative Politics of Development

Honig, Lauren

Spring 2025

This is a course about power, politics, and global development. Why are some countries rich and others poor? Why do some communities have few resources while their neighbors have plenty? To answer these questions, we will start by critically examining what development is and how it can be measured. Then we will examine theories linking politics to development. We will explore the effects of colonialism, geography, natural resource wealth, regime types, and foreign aid, among others. The readings from this course draw from political science, economics, anthropology, and history. During this semester we will examine both the deep roots of global inequality and engage with active policy debates about development.

POLI244601

Natural Resource Politics

Honig, Lauren

Spring 2025

This course investigates the relationship between natural resources and politics, with an emphasis on developing countries. Key questions include: When and why does wealth in natural resources lead to negative outcomes for governance, democracy, and development? How should scarce resources such as good land and clean water be managed? When does competition over resources devolve into conflict? Is there something special about diamonds? In examining these questions (and others), we will seek to understand how these issues are conditioned by policies and political institutions.

POLI250701

American Grand Strategy

Byun, Hyung-Joon

Spring 2025

This course examines grand strategy--a states theory of how to employ the military instrument to maximize national security--in the context of American diplomatic history. The first part of the course assesses how International Relations (IR) theory informs modern discussions of grand strategy, fleshing out the theoretical underpinnings of ideal-type grand strategies like restraint or deep engagement featured in todays U.S. foreign policy debate. In the second part of the course, we delve into key events in the evolution of American grand strategy since the late 19th century, when the United States began to emerge on the world stage as a great power. We will learn why an extraordinarily powerful state--despite facing no plausible rival in its neighborhood and being geographically insulated from faraway competitors--decided to directly involve its military might in the security affairs of distant regions at several historical junctures. Finally, we will circle back to core issues in todays grand strategy debate. Attention will be paid to the relationship between contrasting grand strategic visions and key issues in post-Cold War U.S. foreign policy, such as NATOs eastward expansion, the wars in Afghanistan and Iraq, and the rise of China.

POLI250801

Cold Wars, Old and New

Byun, Hyung-Joon

Spring 2025

This course investigates how International Relations (IR) theory can illuminate key episodes in the great power politics of the Cold War period, paying close attention to how lessons from this period can inform contemporary debates on the return of great power politics and U.S. foreign policy. Why did hopes for a spheres of influence peace between the two superpowers after World War II come to naught? Why did the United States end up on a collision course with communist China during the early Cold War despite initial interest on both sides for cordial relations? What accounts for the failure of U.S.-led plans to build an integrated European army as a counterweight to Soviet power during the early 1950s? And why did the United States and the Soviet Union continue to engage in costly military competition after the early 1960s despite the emergence of strategic stability? We will analyze these and other important questions through the lens of IR theory, distilling lessons in each session for 21st-century great-power relations. The problems implicated in today's great-power politics are very difficult, but we can get a handle on them by appreciating how they are not entirely new--people and governments had to tackle similar problems in a relatively recent past.

POLI254801

The World Wars: Causes, Conduct, and Unintended Consequences

O'Rourke, Lindsey A

Spring 2025

This course examines the origins, military conduct, and societal consequences of World War I and World War II. We will look at each war from the perspective of state leaders designing their state's military strategy and the soldiers fighting for them. What caused the outbreak of each war? What was each state's military strategy and how did it interact with the strategies of other states? Why were so many soldiers willing to risk their lives and kill others on an unprecedented scale of destructiveness? Topics covered include: the social and technological developments necessary to fight wars of this scale; domestic, accidental, and interstate explanations for WWI; the military strategies of the major combatants in both wars; the Versailles Treaty and Post-WWI order; individual, domestic, and international explanations for WWII; German mass killings; and Japan's surrender.

POLI255001

Nuclear Weapons and IR Theory

O'Rourke, Lindsey A

Spring 2025

How have nuclear weapons influenced international relations? What can nuclear weapons teach us about international relations theory? This course is divided into two main sections. The first section analyzes competing IR theories regarding the strategic utility of nuclear weapons and the causes of proliferation: Under what conditions will nuclear weapons act as an effective deterrent? Can nuclear weapons be used to coerce or blackmail? Does nuclear acquisition embolden states to pursue more aggressive foreign policies? How and why do states acquire nuclear weapons? The second portion of the course focuses on a variety of current issues relating to nuclear weapons, including: strategic missile defense, nuclear terrorism, global zero, and the Iranian nuclear deal, and North Korean nuclear acquisition.

POLI260501

The Architecture of Power

DiPasquale, David M

Spring 2025

This course will examine the political and philosophical implications of architectural design and civic planning. From the time of Socrates, philosophers have paid careful attention to the manner in which the principles of political philosophy could be realized in physical form. The course will offer students an introduction to the history of Western architectural theory, with special emphasis on the manner in which a specific type of regime (democratic, fascist, communist, and monarchic, for example) sought to embody its standard of justice in buildings and the manipulation of space. We will trace the reasoning behind the sometimes radical transformation of the world around us by reviewing and analyzing key texts (and buildings, when applicable) from important artistic and intellectual figures, such as: Frank Lloyd Wright, Claude-Nicolas Ledoux, Adolf Loos, Rem Koolhaas, Jane Jacobs, Le Corbusier, Robert Venturi, plus contemporary works by prominent female architects. Epochal architectural movements like The International Style, Neoclassicism, Postmodernism, and Brutalism will be introduced to help us understand the built environment (and therefore ourselves) a little better. Spanning centuries, the course will also bring matters much closer to home by asking each student to present as a final project one design meant to improve the Boston College campus. Class sessions will include film and additional visual media.

POLI261901

The Rise and Fall of the Idea of Secularism: Politics, Religion, and Modernity

Kerber, Hannes

Spring 2025

The disappearance of religion from political life - the famous or infamous "disenchantment of the world" - was once considered a hallmark of Western modernity. However, the first quarter of the 21st century has shown a forceful and occasionally violent resurgence of religious voices and actors in present-day politics, leading to the questioning of secularization narratives. This seminar will explore the early modern idea of a secular political sphere (Benedict Spinoza, Pierre Bayle, Immanuel Kant), consider late-modern self-interpretations and master-narratives of secularization (Max Weber, Ernst Troeltsch), and engage contemporary thinkers who believe that we have entered a post-secular age (Charles Taylor, Jurgen Habermas, Wendy Brown).

Islamic Political Philosophy

DiPasquale, David M

Spring 2025

This course is restricted to sophomores, juniors, and seniors, only.. What is the relationship between philosophy and Islam? Does the divine law (Shari'a) need to be supplemented with purely rational reflections on the nature and purpose of political life? What is the place of toleration and individual rights in the Islamic legal and philosophic tradition? We will explore these and similar questions by focusing on two particularly fertile periods of Islamic thought: the encounter of Islam with Greek philosophy in the classical period and its encounter with the modern secular west in late modernity.

POLI340301

Peace and Politics in Northern Ireland

Murphy, Mary

Spring 2025

Class-restricted to juniors and seniors. Against a global backdrop of continuing war, conflict, and ethnic and communal tensions, Northern Ireland is often lauded as an exemplar of how to achieve peace. This course engages with the wider peace and conflict studies literature to examine the causes, practices and consequences of conflict in Northern Ireland and determines the extent to which the Northern Ireland peace process serves as a model for conflict resolution more broadly. The course traces the historical origins of the Northern Ireland conflict and analyses its root causes. It looks at what factors contributed to and explain the political, economic, cultural, societal and identity divisions in Northern Ireland which prove/d so consequential in maintaining violence and conflict over a protracted period. This includes an examination of Northern Ireland's (unusual) dual ethnic political party system, and consideration of the role played by key state and non-state (paramilitary) actors during and after the conflict. The significance of negotiation and mediation is captured by tracing the progressive achievement of the peace process, with an emphasis on the roles played by political actors from Northern Ireland, the UK and Republic of Ireland, and by considering the contributions made to peace-making by third parties, including the United States. The 1998 Belfast/Good Friday Agreement (and later agreements) are examined in detail, with a critical emphasis on their consociational features and civil society characteristics. The post-1998 period is explored in terms of the operation, outputs and impact of the post-conflict system of governance. The role of crisis, in particular Brexit, is assessed in terms of its destabilising effect in Northern Ireland and its longer-term ramifications for Northern Ireland's constitutional future. The course concludes by examining ongoing policy, political and legacy challenges which continue to play out in contemporary Northern Ireland, with a particular (and critical) emphasis on the concept of reconciliation. In comparative context, this study of Northern Ireland will allow us to take a broad view of the sources of conflict in other settings, and of what factors and conditions can help to contain or eliminate violent conflict in ways that are both durable and just. This means that in addition to focusing on the Northern Ireland case-study, we will simultaneously be considering general trends, key themes, and evolving paradigms in the wider peace and conflict studies domain.

Spring 2025

Restricted to juniors, seniors, and graduate students only. Not open to students who have previously taken POLI2330.. This course will examine immigration as a social as well as an economic process, with particular attention to its political and policy dimensions. Special attention will be paid to the interaction between immigrants and contemporary American institutions, and to how the contemporary context differs from earlier periods in our history. The various dimensions (social, cultural, economic, and political) of assimilation will be examined. Particular emphasis will be placed on undocumented immigration as well as the group competition and conflict engendered by immigration generally. The course will culminate in an examination of policy responses to the continuing controversy over immigration.

Civil Wars

Alshamary, Marsin

Spring 2025

This course is major restricted to juniors, seniors, and graduate students. This course is a survey of the political science literature on civil wars. It begins by examining the global prevalence of civil war and examining the causes of violent internal conflicts. The course also discusses the factors that exacerbate an ongoing civil war - from ethnic fractionalization to geography, ideology, economic grievances, and others - and the factors that contribute to its resolution. The course concludes with an examination of how civil wars end and what role different actors, domestically and internationally, can play in the post-conflict aftermath. In the process, students will delve into a variety of case studies from around the world and reflect on their commonalities and differences.

POLI449601

Democracy and Political Mediation in the Global South

Marcesse, Thibaud

Spring 2025

This seminar proposes to explore the variation in democratic outcomes across the Global South. Why have some states remained democratic while others have experienced various forms of authoritarianism? Why are political parties stronger in some countries than others? The course will start with a discussion of institutional legacies such as colonialism to account for the transition to and consolidation (or not) of democracy. Looking at empirical evidence from different regions, such as Latin American and the Caribbean, Africa, South Asia and the Middle East, the course will provide a dynamic and comparative overview of democratic institutions, such as political parties and party systems, discuss informal linkages between citizens and political parties, review the broader implications of development for democratic stabilization and look at the impact of institutional reforms such as decentralization on political participation and the exercise of citizenship.

POLI449801

Ethnopolitics in Eastern Europe

Easter, Gerald M

Spring 2025

Eastern Europe has long been the site of nationalist dreams and dystopian nightmares. This class explores the ways in which ethnopolitics has shaped the region, giving rise to the most extraordinary political developments of the modern era. A late-comer to the nation-state, Eastern Europe's wars and revolutions begat fascism, communism, and genocide. The class employs Comparative Politics theories on nation formation, ultra-nationalism, multiethnic states, and ethnic conflict to try to understand and learn from these experiences. Topics covered include the Springtime of Nations in the 19th-century, the Ethnic Cleansing episodes of the mid-20th century, and the post-communist Ethnic Wars of the early 21st century.

POLI459001

East Asian Security

Ross, Robert S

Spring 2025

This course is class restricted to juniors, seniors, and graduate students only.. This class offers an analytical perspective on the strategic conditions of post-Cold War East Asia. It examines the regional political structure, the strategic characteristics of the region's great power relationship--U.S.-China relations and the rise of China--and the implications of great power relations for the conflicts on the Korean peninsula, in the Taiwan Strait, and in the South China Sea, and the role of alliance relationships in regional diplomacy. From these different perspectives, the class seeks an understanding of the sources of state behavior in East Asia and the prospects for regional stability and instability.

POLI493201

Honors Seminar

Melnick, Rowell S

Spring 2025

By department permission only for Political Science Honors Program Students. Students who have taken POLI7726 may not take this course. Honors Seminar: Democracy in America. This course uses the greatest book on American politics, Tocqueville's Democracy in America, as a guide for studying perennial issues in American politics. We will read Democracy in America in conjunction with contemporary studies that address such key themes as individualism and "self interest rightly understood," law and mores, tyranny of the majority and "soft despotism," and local government and the art of association. Some of these recent works build upon Tocqueville's insights. Others claim that the contemporary U.S. bears little resemblance to Tocqueville's America.

POLI771901

American Politics From the Ground Up

Skerry, Peter N

Spring 2025

The populist wave in American politics highlights the limitations of approaches focusing on formal organizations and government bureaucracies, particularly at the national level. As "political realists" such as Galston, Yack, and Honig note, informal and emergent social bonds and cultural forces also demand attention. Others emphasize the causal priority of ideas. This debate will be engaged by examining the social and cultural dimensions of politics. Topics to be considered will include: informal, pre-political social formations such as families and neighborhoods; non-economic aspects of corruption; community institutions such as churches, synagogues, and mosques; labor unions; and Alinsky community organizations. So will social and political movements such as the Tea Party and other manifestations of populism. These will be examined in the context of a regime improbably characterized by both identity politics and expertise.

POLI772901**American Political Development II****Landy, Marc****Spring 2025**

This seminar is look at the course of American history from the Progressive Era through to the present day. Its axiom is that contemporary politics cannot be adequately understand without understanding its philosophical and historical underpinnings nor without examining the critical political conflicts and institutional developments that have occurred. Readings consist of original documents and secondary works by historians and political scientists.

Cognitive Psychology: Mental Processes and their Neural Substrates

MacEvoy, Sean P

Summer 2024

This course is a survey of cognitive psychology, the scientific study of the human mind and human thinking. During the semester we will discuss many different aspects of cognition: perception, attention, memory, language, concepts, reasoning, problem solving, expertise, creativity, and decision making. The emphasis will be on how psychologists have used experiments to help construct theories of how the human mind works and how human thinking occurs.

PSYC228901**Comparative Psychology: Study of Animal Behavior****Jesch, Karen****Summer 2024**

This course is a survey of animal behavior from the psychologist's perspective. The methods and aims of comparative psychology are presented as we consider how and why psychologists should study animal behavior. All species are faced with fundamental problems such as navigating in their environment, finding food and water, defending against predators, communicating with conspecifics, attracting a mate, and learning and remembering information. The course will examine the very different strategies that various species, including humans, have evolved for solving these problems, and discuss reasons why these different kinds of strategies have evolved.

Psychophysiology of Stress

Ivkovic, Vladimir

Summer 2024

This course explores the psychological and physiological factors underlying stress, including basic principles of psychophysiology and fundamental concepts of stress. Topics include emotion, motivation, multitasking, attention, arousal, and distraction. Physiological mechanisms underlying stress will be examined relative to health and abnormal behaviors, such as addictions, mood disorders, and violence. Students will be instructed in methods of stress control, including cognitive behavioral techniques and meditation.

PSYC338901

Motivated Behaviors and the Brain

Shteyn, Rebecca

Summer 2024

Motivated behaviors are critical for the survival of the individual as well as the species. The basic motivated behaviors of 1) reproduction, 2) defense, 3) foraging, and 4) ingestion are innate and are prominent across all species, including humans. The class will discuss how and why these behaviors are necessary for the survival of the species. Throughout the discussion, students will also learn the neural basis underlying both the typical, as well as aberrant, expression of these motivated behaviors. The layout of the course will include discussing the behavior itself, including the evolutionary development of the behavior and the necessity of it, then the underlying neural mechanisms governing these behaviors will be discussed using animal research findings.

PSYC109201

Humans and Other Animals: The Mental Life of Animals

Lamoureux, Jeffrey A

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take ENGL1721 with this course. What is a human and who is an animal? What is a human and who is an animal? Humanism has questionably attributed reason, morality, speech, ritual, and the capacity to imagine future worlds to humans alone. All major philosophies and religions try to separate humans from animals. For instance, in Genesis, God distinguishes Adam and Eve from the beasts, then instructs Adam to name them. Humans still grapple with the ethics of eating, wearing, and experimenting on animals, as well as with understanding how various mental abilities are represented across species. These courses use comparative psychology and literary study to interrogate the blurry and problematic boundaries between human and non-human animals.

Introduction to Social Work

Ryan, Sarah E

Fall 2024

This is a Social Work course available to undergraduate students Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

Undergraduate Research

Anzellotti, Stefano

Fall 2024

An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

PSYC220541**Undergraduate Research****Ford, Jaclyn H****Fall 2024**

An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

PSYC223401**Introduction to Psychopathology****Kane, Kelly****Fall 2024**

This course provides an introduction to the field of psychopathology. Major topics include theoretical and empirical approaches to the study of psychopathology; assessment and diagnosis of abnormality; and psychological, behavioral, biological, and sociocultural characteristics of the major syndromes of psychopathology. Legal and ethical issues and current approaches to the treatment and prevention of psychological disorders will also be discussed.

Credits: 3**Room and Schedule:** Higgins Hall 225 TuTh 03:00PM-04:15PM**Satisfies Core Requirement:** None**Prerequisites:** PSYC1110**Corequisites:** None**Cross-listed with:** None**Frequency:** Every Fall,Every Spring**Student Level:** Undergraduate**Comments:** None**Status:** Offered**PSYC224101****Social Psychology****Heberlein, Andrea S****Fall 2024**

This course explores the scientific study of social thought and behavior. How do we understand, interact with, and influence other minds and our own? How might we apply psychology to social problems? Topics include mind perception, emotion, persuasion, stereotyping, and moral psychology.

Credits: 3**Room and Schedule:** Higgins Hall 300 TuTh 03:00PM-04:15PM**Satisfies Core Requirement:** None**Prerequisites:** PSYC1111**Corequisites:** None**Cross-listed with:** None**Frequency:** Every Fall,Every Spring**Student Level:** Undergraduate**Comments:** None**Status:** Offered

PSYC224201**Personality Theories****Russell, James****Fall 2024**

Does personality make us who we are? Whether selecting a mate, voting for a president, or understanding ourselves, we want and need to know about personality. In this course we consider how personality can be measured, how well it predicts behavior, what shapes our personality, and whether personality can be changed.

Credits: 3**Room and Schedule:** Stokes Hall 107S MWF 09:00AM-09:50AM**Satisfies Core Requirement:** None**Prerequisites:** PSYC1111**Corequisites:** None**Cross-listed with:** None**Frequency:** Annually**Student Level:** Undergraduate**Comments:** None**Status:** Offered**PSYC225001****Cultural Psychology****Zimbler, Mattitiyahu****Fall 2024**

Cultural Psychology involves the study of how psychological processes differ (or are similar) across cultures and groups of people. Central to Cultural Psychology is the idea that one can't separate the self from one's cultural context, and that these entities mutually shape one another. This course explores how culture affects a person's experience of psychological concepts such as morality, perception, acculturation, and motivation. We will investigate how certain identities, such as age, gender, class, and ethnicity, inform one's experience of self and society. Additionally, this course will look at when psychological findings are generalizable, considering the variety of human experiences that are shaped by specific cultural constructs.

PSYC227201

Cognitive Psychology: Mental Processes and their Neural Substrates

Ford, Jaclyn H

Fall 2024

This course is a survey of cognitive psychology, the scientific study of the human mind and human thinking. During the semester we will discuss many different aspects of cognition: perception, attention, memory, language, concepts, reasoning, problem solving, expertise, creativity, and decision making. The emphasis will be on how psychologists have used experiments to help construct theories of how the human mind works and how human thinking occurs.

Sensation and Perception

MacEvoy, Sean P

Fall 2024

How do our senses tell us what is really in the world around us, and can our senses be trusted? These questions have been pondered by philosophers for centuries, and more recently by psychologists and neuroscientists. This course will explore the anatomical/biological basis of sensation (how the world that we perceive is translated into the raw language of the nervous system) and the cognitive processes underlying perception (how our brains reconstruct the physical world from these neural inputs). We will examine these questions for vision, hearing, touch, smell, and taste.

PSYC332701

Psychology of Prejudice and Discrimination

Zimbler, Mattitiyahu

Fall 2024

This course focuses on the social psychology of stereotyping, prejudice, and discrimination. In other words, we will examine beliefs about members of social groups (stereotypes), evaluations of group members (prejudice), and behaviors towards members of social groups based on their group membership (discrimination). Also we will study how these issues shape the experiences of social group members, especially when they are members of low-status and/or minority groups. Rather than relying on anecdotal evidence, we will examine theories of stereotyping, prejudice, and discrimination through empirical research findings.

PSYC332901

Psychophysiology of Stress

Ivkovic, Vladimir

Fall 2024

This course explores the psychological and physiological factors underlying stress, including basic principles of psychophysiology and fundamental concepts of stress. Topics include emotion, motivation, multitasking, attention, arousal, and distraction. Physiological mechanisms underlying stress will be examined relative to health and abnormal behaviors, such as addictions, mood disorders, and violence. Students will be instructed in methods of stress control, including cognitive behavioral techniques and meditation.

Sport and Exercise Psychology

Moore, Kristina

Fall 2024

This course will provide a broad introduction to sport and exercise psychology as both a science and a practice. Content will include major theories, seminal and current empirical research, and practical considerations concerning the cognitive processes, emotional states, social influences, and developmental systems involved in sport and exercise participation and performance. Topics will span across individual, group, and context and may include personality, motivation, anxiety, team cohesion, group dynamics, as well as psychological skills training areas such as confidence, imagery, arousal regulation, goal-setting, and concentration. Students will synthesize material and design appropriate applications to sport and exercise settings.

Close Relationships

Zimble, Mattitياهو

Fall 2024

This course will explore the many psychological mechanisms that play a part in close personal relationships. Using psychological research as our foundation, students will be led in discussions and about attraction, love, lust, and other topics pertinent to close relationships. Students will be asked to think deeply about the social constructs that influence human preferences, and the biopsychosocial processes at play. The course will begin by dissecting the concepts of attraction and love. Once a basis for understanding these fundamental concepts is established, we will progress into discussions about attachment theory and interpersonal dynamics such as jealousy, power, stigmatization, and communication. All matter of relationships (interpersonal, homosexual, asexual, heterosexual, polyamorous, etc.) will be discussed across topics. Lastly, we will finish the course discussing the portrayal of sex in the media and online, and its implications on sex education and sexual understanding.

PSYC337001

Nudge Psychology

Bernhard, Regan

Fall 2024

Small changes in our environments can have big impacts on our behavior. For example, in one hospital in London, simply changing the wording used to remind patients of upcoming appointments dropped the missed appointment rate so dramatically the hospital saved millions of dollars. In this course we will study the power of nudges, subtle but powerful changes in the environment that can counteract behavioral biases and encourage better decision-making. We will start with learning about dual-systems models of cognition and then explore how these systems interact to make us vulnerable to bias, heuristics, jumping to conclusions, and erroneous decision-making. Finally, we will investigate how nudges have been leveraged to positively influence behavior and improve social systems.

PSYC337101

Cognitive Neuroscience

Ritchey, Maureen

Fall 2024

What happens in your brain when you are secretly paying attention to a conversation at the next table? How is that conversation recorded into memory? Cognitive neuroscience aims to address such questions by exploring the brain mechanisms that underlie human mental processing. This course will examine the neural basis of core cognitive processes, including perception, attention, memory, action, and language (identified using techniques such as functional MRI, event-related potentials, and lesion studies). Other mind-brain topics that will be considered include hemispheric specialization, neural plasticity, frontal lobe function, and consciousness.

Building Brains: Topics in Developmental Neuroscience

Cole, Cindy

Fall 2024

Developmental neuroscience refers to the study of the cellular and molecular events underlying the emergence of the nervous system during embryonic development and beyond. This course covers the principles governing the development of the nervous system including induction, neurogenesis, cell migration, differentiation, axonal guidance, synaptogenesis, and experience dependent development of the nervous system. We will also examine how early life experience influences development, and the consequences of disrupted neural development.

PSYC339401

Concepts and Categories

Noyes, Alexander

Fall 2024

Categories are an important part of how we understand the world. We speak, think, and form attitudes about categories, such as chairs, dogs, lawyers, and men. Imagine a person tells you they have no idea what a dog is. We say they lack a concept" of a dog. A concept is something in the mind that allows us to think about particular dogs as members of the same category. But what is a concept? We will start with the classic answer: Learning a concept is learning a definition. From there, we will cover the surprisingly eclectic answers that followed. Throughout the course, we will consider learning an important part of understanding concepts.

Sleep and Circadian Rhythms

Burek, Dominika

Fall 2024

Sleep is a fascinating behavioral state, highly conserved through evolution and serving myriad biological functions. Although sleep is characterized by unconsciousness and increased sensory threshold, sleep actively engages neuronal circuitry and neural networks throughout the entire brain. This course will cultivate your understanding of sleep as an essential and active brain process. We will explore the mechanisms by which sleep is initiated and maintained, how sleep is measured and studied, how circadian rhythms guide systems like the endocrine and immune, dreaming, memory consolidation, and sleep in the context of psychiatric disorders. Through a combination of lectures, readings, primary research article discussions, and writing assignments, students will expand their critical thinking and scientific communication skills while better understanding one of our most complex and mysterious biological processes.

PSYC410101

Research Practicum in Human and Artificial Intelligence

Anzellotti, Stefano

Fall 2024

This course is a practical introduction to the convergence between psychology, neuroscience, and artificial intelligence. Ideas from psychology and neuroscience have inspired the development of artificial neural networks. Their current instantiations, deep neural networks, are having a profound impact on computer science and society, but also on the study of the brain and cognition. This course starts with a brief introduction to the roots of artificial intelligence in psychology and neuroscience, followed by a brief, accessible introduction to the mathematical foundations of deep neural networks. In the remainder of the course, students will learn to use python and pytorch and will work in groups to implement and train deep neural networks to build models of behavior or of the brain. Prior experience with computer programming is highly recommended; students with no experience in programming are encouraged to meet the instructor before enrolling.

Clinical Fieldwork in Psychology

Rosen, Karen

Fall 2024

Seniors only. Priority will be given to students who are in the Clinical Concentration. This course will provide students with an opportunity to integrate theoretical and empirical work in clinical psychology with the real-life experience of working in a clinical setting. Students will select, together with the professor, a field placement (e.g., hospital, community clinic, day treatment center, shelter, emergency hot line, preschool classroom, prison). Students' work in the field will involve at least eight hours per week with weekly, on-site supervision. Weekly class meetings will focus on the discussion of issues relevant to the direct application of mental health services to child, adolescent, and adult patients.

Fall 2024

For students in the Honors Program writing a thesis. All Honors Program students write a thesis during the senior year. In most cases, the thesis involves original empirical research, although theoretical papers may be permitted in exceptional instances. Honors students are encouraged to take an Independent Study with a prospective thesis advisor during the junior year, to develop a thesis proposal. The designation "Graduated with Departmental Honors" will be granted by the Honors Program Committee upon successful completion of the Honors Program requirements and the final evaluation of the thesis. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

Experimental Design and Statistics

Magnus, Brooke E

Fall 2024

This course focuses on experimental design and related statistical methods. It covers between-subject, within-subject, and mixed designs with one and two factors. Statistical topics include the relevant statistical model and model assumptions, omnibus test, test of contrasts, multiple comparison, effect size, and power calculations. One and two sample t tests will also be revisited. If time permits, advanced topics such as designs with nested factors or random factors, mixed model approach, and nonparametric approach may also be covered.

PSYC556201

Theories of Human Uniqueness

Johnston, Angela M

Fall 2024

This course will address the question, "In what ways, if any, are humans categorically different from other animals?" The past few decades of research with nonhuman animals have revealed the deep evolutionary roots of many of our human cognitive abilities, surprising both scientists and lay observers with (e.g.) sophisticated animal communication systems and prosocial behaviors. That said, there are still many theories about the ways in which humans are unique within the animal kingdom, ranging from language to religion. This course will review these theories of human uniqueness and evaluate whether any constitute a categorical difference between human and nonhuman animals.

Cognitive Neuroscience of Attention

Slotnick, Scott

Fall 2024

Over a century ago, William James (1890) wrote, "Everyone knows what attention is. It is the taking possession by the mind, in clear and vivid form, of one out of what seem several simultaneously possible objects or trains of thought." Since that time, the study of attention has become one of the core topics of inquiry in the fields of psychology and neuroscience. Despite its apparent simplicity, the cognitive processes and neural mechanisms underlying attention are quite complex. In this course, following an introduction on what attention is and considering the role that attention plays in everyday life, we will discuss the following key topics on the neuroscience of human attention: methods of cognitive neuroscience, deficits in attention, attentional selection in the brain, voluntary and involuntary influences on attention, the control of attention, temporal attention, and predictive coding models of attention.

Behavioral Neuroimmunology: Immune Modulation of Brain and Behavior

Smith, Caroline J

Fall 2024

This course will focus on the role of the immune system in brain function and behavior, both during homeostasis and in disease states. Topics will include developmental roles for immune cells and molecules, immune response to brain infection and trauma, inflammation in neuropsychiatric and neurodegenerative disorders, and the gut-brain axis. Emphasis will be placed on microglia -- the resident immune cells of the brain -- as well as on the influence of factors such as experience and biological sex on brain-immune interactions.

History of Psychology

Weidman, Nadine

Fall 2024

A hundred years ago, psychology was a tiny academic specialty called mental philosophy. In a matter of decades, however, psychology burgeoned into an enormous field influencing both scholars and the popular imagination (think IQ test, think analyst's couch). What accounts for the rise of psychology to its all-powerful position? This course will examine the twentieth century trajectory of psychology, asking how it has shaped, and been shaped by, cultural, social, and political conditions, and exploring major thinkers such as William James, Sigmund Freud, B.F. Skinner, Stanley Milgram, Abraham Maslow, and others.

PSYC559501**Mathematics and Computation for Research in Psychology and Neuroscience****Anzellotti, Stefano****Fall 2024**

Publishing high-impact research in Psychology and Neuroscience and being competitive on the job market increasingly benefits from having mathematical and computational skills and using state-of-the-art data analysis and modeling methods. In a dialogue with recent studies in Psychology and Neuroscience, this course introduces key mathematical foundations including linear algebra, multivariable calculus, and probability theory, as well as applications such as linear models, dimensionality reduction, clustering, Bayesian models, and artificial neural networks. Along with the theory, the course will involve implementing the methods and models in Python. Throughout the semester, students will be encouraged to think about how to apply the contents of the course to their own research.

Introduction to Social Work

Ryan, Sarah E

Spring 2025

This is a Social Work course available to undergraduate students Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

Undergraduate Research

Anzellotti, Stefano

Spring 2025

An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Registration requires the Syllabus/Contract form on the department's Academic Opportunities page.

Ritchey, Maureen

Spring 2025

An opportunity to participate in research projects in the laboratory of a faculty member. Students are typically assigned to assist with a specific experiment contributing to the laboratory's overall goals. This is the most typical type of undergraduate research course experience in our department. Students may work with researchers at other area universities and hospitals. The work must be relevant to psychology/neuroscience. While primary supervision of the research will be provided by the laboratory PI, a Boston College Department of Psychology and Neuroscience faculty member must agree to serve as the instructor of record for the course. Students are encouraged to obtain permission of the instructor before they register for their other courses, so that they may keep open the time slot for the laboratory meetings associated with the laboratory. Psychology of Motivation

Moore, Kristina

Spring 2025

Understanding human motivation extends beyond instincts, drives, needs, and rewards. This course explores motivation from multiple lenses including biological, cognitive, social, and developmental approaches. Students will examine psychological theories and principles of motivation from biological motives like hunger, thirst, and pleasure to more contemporary social-cognitive views involving self-efficacy, self-determination, competence and control, attribution, and achievement goal theories. Students will consider applications to relevant contexts including the classroom, the workplace, social relationships, and performance.

PSYC225501

Health Psychology: Foundations for a Culture of Health Equity

Louis, Kengthsagn

Spring 2025

Health psychology examines how to promote and maintain health, prevent and treat illness, identify the causes and diagnostic correlates of health and illness, and improve health care systems and policy. This course provides an overview of major concepts and questions in the field, combining classic and contemporary research with a critical examination of psychological theories applied to health and illness. Through reading, lectures, and interactive discussions, students will critically examine various psychological and social influences on health such as identity, behaviors, beliefs, relationships, motivation, environment, and culture. For example, students will explore topics such as health behavior change, determinants of health, the evolving patient-provider relationship, the impact of racism on health, the role of self and social control for health, and the intersection of health motivation with identity. It also examines how health psychology can help promote a more equitable health culture by improving our understanding of how to address issues such as racial and ethnic healthcare disparities.

Cognitive Psychology: Mental Processes and their Neural Substrates

Noyes, Alexander

Spring 2025

This course is a survey of cognitive psychology, the scientific study of the human mind and human thinking. During the semester we will discuss many different aspects of cognition: perception, attention, memory, language, concepts, reasoning, problem solving, expertise, creativity, and decision making. The emphasis will be on how psychologists have used experiments to help construct theories of how the human mind works and how human thinking occurs.

Sensation and Perception

MacEvoy, Sean P

Spring 2025

How do our senses tell us what is really in the world around us, and can our senses be trusted? These questions have been pondered by philosophers for centuries, and more recently by psychologists and neuroscientists. This course will explore the anatomical/biological basis of sensation (how the world that we perceive is translated into the raw language of the nervous system) and the cognitive processes underlying perception (how our brains reconstruct the physical world from these neural inputs). We will examine these questions for vision, hearing, touch, smell, and taste.

PSYC332701

Psychology of Prejudice and Discrimination

Zimbler, Mattitiyahu

Spring 2025

This course focuses on the social psychology of stereotyping, prejudice, and discrimination. In other words, we will examine beliefs about members of social groups (stereotypes), evaluations of group members (prejudice), and behaviors towards members of social groups based on their group membership (discrimination). Also we will study how these issues shape the experiences of social group members, especially when they are members of low-status and/or minority groups. Rather than relying on anecdotal evidence, we will examine theories of stereotyping, prejudice, and discrimination through empirical research findings.

PSYC334501

Social Motivation

Zimbler, Mattitياهو

Spring 2025

How do other people affect our motivation to act? Psychology has given too much emphasis to extrinsic rewards and too little to the ways in which our relationships with others determine our choices, feelings, and thoughts. Many of our behaviors are motivated primarily by our relationships with others. In this course we will explore the influence of others on our behavior. Topics to be considered include kindness and cruelty, cooperation and competition, and conformity and rebellion.

PSYC336201

Mind of a Dog: How Canine Cognition Informs Human Psychology

Johnston, Angela M

Spring 2025

This course explores intelligence and cognitive processes across a variety of animal species, including humans. It addresses such questions as, do chimpanzees lie? Can dolphins count? What makes us uniquely human? Topics include mental representation, memory, tool use, counting, problem-solving, self-awareness, social knowledge, and communication/language. For each area, we will examine the evidence from both wild and laboratory settings, continually returning to the questions of what such knowledge tells us about non-human animals, and how this knowledge informs our theories of human cognition.

PSYC336401

Poverty and Neurodevelopment

Bernhard, Regan

Spring 2025

A growing body of research shows that poverty shapes the way children's brains develop. Children who grow up in low-income households show reduced gray matter in parts of the brain essential for memory, planning, and decision-making. However, simple interventions, like providing low-income mothers with a small monthly supplementary income, can dramatically mitigate these effects. How does poverty change the brain, and why do interventions like these help? In this class we will investigate the effects of poverty on the developing brain, focusing on understanding the physiological mechanisms involved. We will also learn about existing interventions, study their efficacy, and explore possible future interventions.

Social and Emotional Development

Rosen, Karen

Spring 2025

In this course, we will explore developmental changes in social and emotional functioning from birth through adolescence. We will study the beginning of emotion expression and the emergence of attachment relationships, the development of emotional regulation, and the socialization of children during infancy. We will then continue to examine emotional changes and social development through toddlerhood, early childhood, middle childhood, and adolescence. The influences of parents, siblings, peers, and caregivers will be examined, as will the issues of individual differences, stability and change, and coherence of development across contexts and over time.

Psychology and Neuroscience of Cognitive Aging

Ford, Jaclyn H

Spring 2025

This course will examine recent work being conducted in cognitive psychology and neuroscience to understand the effects of healthy aging on the cognitive and neural processes associated with functions such as perception, language, memory, and emotion. The course will introduce and examine research studies that rely on a variety of research methods, including behavioral testing, functional neuroimaging (e.g., fMRI), and structural imaging, and will focus on how the integration of these methods has allowed researchers to better understand the effects of aging. Although the course will focus on healthy aging, it will conclude with an examination of age-related diseases (e.g., Alzheimers disease), allowing for a discussion of the ways in which the effects of disease differ from those of healthy aging.

Neurobiology of Psychiatric Disorders

McDannald, Michael A

Spring 2025

All people are directly or indirectly impacted by psychiatric disorders. It is now clear that virtually all psychiatric disorders have their basis in the brain. This course will explore the neurobiology of psychiatric disorders. We will focus particularly on clinical studies examining brain function in people with psychiatric disorders and animal models aiming to better understand these disorders. Students are expected to have a strong background in neuroscience prior to entering this course.

PSYC339801

Cognition Through Film

Byrne, Molly

Spring 2025

Umwelt is a term that refers to the biological realities that shape a way a species interprets the world. When examining the human umwelt, one surprising tool at our disposal is how humans create art within their own umwelt; specifically, movies, which showcase what humans perceive as immersive experiences. Movies are effective entertainment because they take advantage of the unique perceptual and cognitive biases humans have, and can tell us a lot about the organization of these processes in human psychology. In this course we will explore features of human perception and cognition, from our heavy reliance on visual and auditory perception to our advanced emotional social worlds. Throughout we will look at how film techniques have been created and utilized to hijack human cognition, creating the intense experiences that we associate with excellent films.

Bernhard, Regan

Spring 2025

Program evaluation is essential for designing and operating effective programs in public and nonprofit organizations. It involves the systematic use of methods from psychological science to obtain empirical evidence that can assist program managers and policy makers in deciding which programs to fund, modify, expand, or eliminate. This course will introduce students to program evaluation theory and practice and integrate these ideas into the study of psychological research methods. The work in this class will be centered around partnering with a real-world organization to design and implement an evaluation of their program and produce a report of our findings for their use.

PSYC406001

Research Practicum in Developmental Psychology

Topper, Stacey S

Spring 2025

This course is designed to serve as an overview of the research methods used in the study of Developmental Psychology. Over the course of the semester, you will become comfortable with all aspects of the scientific method. While completing a semester long research project proposal, you will learn to identify research questions, design a thoughtful scientific study, and propose statistical analyses. Students will gain experience reading, analyzing, and critiquing current research in developmental psychology. By the end of course, you will be familiar with the different methods used in developmental research and become critical consumers of research in this area.

PSYC409501

Research Practicum in Media Psychology

Kane, Kelly

Spring 2025

This course explores research methods and emerging questions in media psychology (the study of mediated human interaction). It will focus on discussion of peer-reviewed articles in media psychology and applying those findings to a new research project. Students will design a new research question, collect data to test the hypothesis, analyze those data, and write up their conclusions. Topics will include research ethics, reliability and validity in measurement, experimental design, data collection and privacy, and how to write an APA-style research article.

Research Methods for Psychology and Neuroscience

Ford, Jaclyn H

Spring 2025

This course introduces students to the consumption, interpretation, and application of psychological research. This semester, students will learn how to read existing literature critically for important findings and methodological issues, develop and operationalize future research questions based on existing literature, design and implement non-experimental and experimental research studies, analyze data using the appropriate statistical test, and report new findings to fellow scientists and the public.

PSYC418001

Research Practicum in Behavioral Neuroscience

Reynolds, Caroline

Spring 2025

This course will introduce students to research methods used in behavioral neuroscience. We will read and discuss a variety of methods that researchers use to determine the underlying brain circuitry and mechanisms of observable behaviors. Students will learn how to pose and test behavioral neuroscience research questions, conduct and write a literature review, analyze data, and write a research paper in APA style.

PSYC442501

Programming for Psychology and Neuroscience

Ritchey, Maureen

Spring 2025

This course will provide an introduction to computer programming and its applications to psychology and neuroscience. The goal will be to provide you with the skillset to program experiments and data analyses, as well as an understanding of how these tools are used to facilitate modern research. We will begin with the basics of how to develop algorithms and implement them with programming logic. In a series of hands-on projects, students will learn to program web-based interactive experiments and to analyze psychology and neuroscience datasets using JavaScript and R. Additional topics will include data management, version control, strategies for code debugging, data visualization, and an introduction to machine learning and natural language processing techniques. This course is ideal for students with little to no programming experience, although prior training in statistics is strongly recommended.

Addiction, Choice, and Motivation

Heyman, Gene M

Spring 2025

This is a writing intensive course. Students write weekly prompts on course readings. The readings are drawn from the research literature on addiction and choice. The drug research includes biographical accounts, epidemiological studies, and experiments on drug effects and drug choice. The choice research includes studies with animals and humans that test simple quantitative models of rational choice and impulsiveness.

Clinical Fieldwork in Psychology

Rosen, Karen

Spring 2025

Seniors only. Priority will be given to students who are in the Clinical Concentration. This course will provide students with an opportunity to integrate theoretical and empirical work in clinical psychology with the real-life experience of working in a clinical setting. Students will select, together with the professor, a field placement (e.g., hospital, community clinic, day treatment center, shelter, emergency hot line, preschool classroom, prison). Students' work in the field will involve at least eight hours per week with weekly, on-site supervision. Weekly class meetings will focus on the discussion of issues relevant to the direct application of mental health services to child, adolescent, and adult patients.

PSYC444001

Psychology of Colorism and Anti-Black Racism

Bart-Plange, Diane-Jo

Spring 2025

This course will examine how individual, institutional, and structural level factors reproduce and reinforce white supremacy. Specifically, we will investigate anti-Black racism and colorism as it functions as a facet of white supremacy in three major areas: (1) the historical and social context of anti-Black racism and colorism, (2) how this context and systemic factors (such as predominant cultural narratives, privilege disparities) inform individual level biases and psychological processes, and (3) in turn, how these factors impact individuals across the African Diaspora. We will discuss anti-racist strategies to achieve equity and justice across the Diaspora.

PSYC556601

Psychological Perspectives on the Good Life

McAuliffe, Katherine J

Spring 2025

Drawing primarily on empirical work, this graduate seminar will explore psychological perspectives on the Good Life. What does it mean to live a fulfilling life? And what decisions can we make on a daily basis that allow us to live lives that have meaning? This course is discussion-based and reading/writing intensive. There will also be some practical assignments that vary on a week-to-week basis (e.g., journaling, tasks around habit formation, reflection pieces). Students will have a chance to develop their own empirical approaches to the Good Life and will lead class discussions and activities.

PSYC660101

Structural Equation Modeling

Ryu, Ehri

Spring 2025

This course provides an introduction to the theory and application of structural equation modeling (SEM). The topics are basic concepts of structural equation models, path models with measured variables, measurement models, confirmatory factor analysis, structural equations with latent and measured variables, and extensions and advanced application. The course assumes that you have already completed a course in multivariate statistics. LISREL will be used to perform statistical analysis.

SLAV205301

Introduction to Comparative Slavic Linguistics

Woolhiser, Curt F

Fall 2024

An introduction to the history and linguistic typology of the Slavic languages. We will begin with a brief survey of the reconstructed Common Slavic proto-language and its relationship to the other branches of the Indo-European language family. We will examine the disintegration of Late Common Slavic into three main subgroups: East, South, and West Slavic. Our survey of the modern Slavic languages will focus on the most important similarities and differences with regard to their writing, sound, nominal and verbal systems. Using a variety of modern Slavic languages as examples, we will also address topics of current interest to linguists worldwide: language, ethnic identity, and political borders; language ideology and standardization; the role of language contact in linguistic evolution, and language endangerment and language revitalization.

Introduction to Slavic Peoples and Cultures

Lin, Tony H

Fall 2024

Introduction to Slavic Peoples and Cultures (formerly Slavic Civilizations) is a gateway course that satisfies the Cultural Diversity core and is required for both Russian and Slavic majors. The course is designed to familiarize students with major topics, such as languages and religions in Eastern Europe, and the formation of nation states and identities. Special attention will be paid to major events in Slavic cultural history, from the appearance of Slavs in history to the rise and fall of the Soviet Union and Yugoslavia. We will study these events not only through literary texts but also works of art, music, and film. The course is taught entirely in English with no prerequisites.

Sociology Courses: Summer 2024

SOCY100101

Introductory Sociology

Seim, Joshua D

Summer 2024

Offered every semester. Do not take SOCY1001 if you have already taken SOCY1002. Only one of these courses will count toward the major or minor. This course introduces students to the field of sociology and covers some of its most essential concepts, theories, and methods. Special attention will be paid to understanding social structure and its role in shaping individual and population outcomes and life chances. This course will cover a range of topics that may include family, work, education, politics, medicine, crime, religion, media, and social change. This course satisfies the social science core and is open to a range of students from any major. However, SOCY1001 is also designed as a gateway to the sociology major and minor. Monday and Wednesday meetings will be lecture-based while Friday meetings will be reserved for smaller sociology labs led by teaching assistants. Do not take SOCY1001 if you have already taken SOCY1002.

SOCY103001

Deviance and Social Control

Uyan, Deniz

Summer 2024

This course explores the social construction of boundaries between the "normal" and the so-called "deviant." It examines the struggle between powerful forms of social control and what these exclude, silence, or marginalize. Of particular concern is the relationship between dominant forms of religious, legal, and medical social control and gendered, racialized, and global economic structures of power. The course provides an in-depth historical analysis of theoretical perspectives used to explain, study, and control deviance, as well as ethical-political inquiry into such matters as religious excess, crime, madness, corporate and governmental wrong-doing, and sexual subcultures that resist dominant social norms.

SOCY150001

Global Perspectives on Climate Justice

Sykes, Eunique D

Summer 2024

Climate change, driven by human activities like carbon emissions and deforestation, disproportionately impacts marginalized groups and international communities, raising crucial issues of climate justice. This course centers on integrating social justice into climate change and broader environmental discussions, examining the unequal distribution of environmental hazards and ethical questions of responsibility and justice. Emphasizing the intersectionality of climate justice, students will explore how race, class, gender, and other social factors intersect to exacerbate environmental inequalities. This course encourages critical engagement with and personal reflection, covering topics, such as the science behind climate change, the roles that social, political, and economic conditions play in understanding climate justice, and the different sociological insights and understandings of climate and environmental justice.

Food, Power, and Politics

Nakazato, Hiroshi

Summer 2024

This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

This course introduces students to the field of sociology and covers some of its most essential concepts, theories, and methods. Special attention will be paid to understanding social structure and its role in shaping individual and population outcomes and life chances. This course will cover a range of topics that may include family, work, education, politics, medicine, crime, religion, media, and social change. This course satisfies the social science core and is open to a range of students from any major. However, SOCY1001 is also designed as a gateway to the sociology major and minor. Monday and Wednesday meetings will be lecture-based while Friday meetings will be reserved for smaller sociology labs led by teaching assistants. Do not take SOCY1001 if you have already taken SOCY1002.

Introduction to Sociology for Healthcare Professions

Fan, Wen

Fall 2024

Do not take SOCY1002 if you have already taken SOCY1001. Only one of these courses will count toward the major or minor.. This course is designed to present the fundamentals of sociology to an audience of future healthcare professionals. Attention is given both to micro-level (interpersonal) and macro-level (organizational) behavior. One of the major goals of the course is to enable students to ground themselves and their families sociologically, by examining their own community and social class origins. It will highlight issues of interest to healthcare professionals, along with sociological concepts that appear on the MCAT exam. NOTE THAT LAPTOPS WILL NOT BE ALLOWED DURING CLASS.

SOCY103001

Deviance and Social Control

Pfohl, Stephen J

Fall 2024

This course explores the social construction of boundaries between the "normal" and the so-called "deviant." It examines the struggle between powerful forms of social control and what these exclude, silence, or marginalize. Of particular concern is the relationship between dominant forms of religious, legal, and medical social control and gendered, racialized, and global economic structures of power. The course provides an in-depth historical analysis of theoretical perspectives used to explain, study, and control deviance, as well as ethical-political inquiry into such matters as religious excess, crime, madness, corporate and governmental wrong-doing, and sexual subcultures that resist dominant social norms.

SOCY103601

Introduction to Latin American Societies

Morello, Gustavo, SJ

Fall 2024

The aim of this course is to introduce students to sociology while exploring Latin American societies. The course will start with a general presentation of both sociology and Latin America. We will discuss what sociology is, and the different ways of studying societies. We will take some time to study the birth of modern Latin American nations. Relying on this historical background, we will explore Latin American societies through sociological concepts such as race, gender, social violence, religion, sports, and culture. Finally, we will pay attention to U.S.-LA relations and the fact of Latino people living in the United States.

SOCY104301

Introduction to African-American Society

McGuffey, Clifton S

Fall 2024

To get Sociology credit for the major or minor, you must register for SOCY1043 rather than cross-listed course. In 1896, distinguished scholar W.E.B. DuBois became convinced that the experience of Africans in the Americas was so distinctive that it was imperative to study Black people in order to understand power dynamics at all levels of society. This course will study those power dynamics. While paying particular attention to the many ways that racial power dynamics have impacted all people of African descent in the United States, this course does not assume a uniform Black experience. We shall see that gender, class, and sexuality greatly shape the differing experiences of African-Americans.

Social Problems

Derber, Charles

Fall 2024

This course is an exploration of different sociological approaches to the study of social problems and social trends in contemporary society. It examines the linkages between social structures/institutions, culture and human experience. The course emphasizes theoretical research issues, especially how, and to what degree, the understanding of social problems are a direct result of the processes used to define social problems as well as the research methods and procedures used to investigate them. Students will learn to critique popular discourses from a critical sociological perspective and will be encouraged to form their own opinions and critiques.

SOCY105801

Sociology of the Family

Arend, Patricia

Fall 2024

In recent years, U.S. public policy has focused on strengthening the nuclear family as a primary strategy for reducing poverty and improving the lives of America's youth. It is often assumed that this type of family is healthy, financially independent, heterosexual, violence-free, normative, and grounded in historical tradition. This course examines these assumptions sociologically while considering systemic variations in race/ethnicity, class, gender, ability, and sexual orientation within and among American families.

SOCY107201

Inequality in America

Spangler, Eve

Fall 2024

This course examines class inequality in American society. It not only describes how the rich, the poor, and the middle classes live, but also how they relate to one another. Topics include the strategies used by the rich for maintaining the status quo, the hopes cherished by the middle class for improving their position, and the obstacles that keep the poor in their place. The class is writing intensive, with half the papers focused on readings that emphasize the dynamics of inequality as they are enacted by men and women, and by people of color and Caucasians, and the other half focused on diverse research experiences: simulations, interviews, observations, documentary analysis, fiction writing, etc.

SOCY107801

Sociology of Health and Illness

Sara, Snitselaar

Fall 2024

This is an undergraduate-level course in the sociology of health and illness, an incredibly broad and fragmented field that frequently overlaps with medical anthropology, public health, and other disciplines. The first half of this course focuses on the social roots of sickness. The second half concerns the social relations of medicine. While we'll treat these as relatively autonomous topics, we'll also spend time addressing the mismatches between the forces that make people sick and the organized reactions to sickness. We'll also study a number of general structures and processes that simultaneously affect health and care. For example, we'll study how capitalism, racism, and sexism make people sick. We'll then study how these same systems shape, and are shaped by, medicine.

Women and the Body

Hesse-Biber, Sharlene

Fall 2024

This course covers Western cultural pressures on women be super-slender. We analyze biological, sociological, and feminist perspectives on the body especially with regard to issues of beauty and body image and sexuality. We analyze how race, ethnicity and class intersect to create differences among womens relationship to their bodies. In what way do biological perspectives illuminate as well as cloud understanding of women's relationship to their bodies? We explore mass-mediated pressures on women's bodies through films, women's magazine, reality TV, and social networking sites. We examine the plastic surgery industry and the growing trend toward "designer bodies."

SOCY150001**Global Perspectives on Climate Justice****Sykes, Eunyque D****Fall 2024**

Climate change, driven by human activities like carbon emissions and deforestation, disproportionately impacts marginalized groups and international communities, raising crucial issues of climate justice. This course centers on integrating social justice into climate change and broader environmental discussions, examining the unequal distribution of environmental hazards and ethical questions of responsibility and justice. Emphasizing the intersectionality of climate justice, students will explore how race, class, gender, and other social factors intersect to exacerbate environmental inequalities. This course encourages critical engagement with and personal reflection, covering topics, such as the science behind climate change, the roles that social, political, and economic conditions play in understanding climate justice, and the different sociological insights and understandings of climate and environmental justice.

Hesse-Biber, Sharlene

Fall 2024

This course is geared toward social science and humanities students as well as those in the sciences. We examine the rise of genetic knowledge and advanced biotechnologies and their consequences on society. We examine the historic and contemporary aspects of genetic research from the eugenics movement to the sequencing of the human genome. We provide a sociological lens focusing issues such as the ethics and science of genetics and genetic testing, genetic engineering, human cloning. We analyze the ethical, political, and economic impacts of genetic technologies. We delve into how genetic knowledge impacts concepts such as self, identity, disability, reproduction, and delinquency. We examine the nature versus nurture debate by analyzing the origins of sex differences, gender identity, and gender inequity.

Closed on Sundays: Religious Change in Modern Societies

Morello, Gustavo, SJ

Fall 2024

What is going on with religion in our world? How do we understand it? What is the role of religion in contemporary societies, if any? We will explore the current answers to these questions, and also devote time to reading the classics. We will explore what the 'Founding Fathers' of sociology (Marx, Durkheim, Weber, and Du Bois) had said about religion, and also study the main theoretical frameworks to understand religion from a sociological perspective: secularization and rational choice theories. Finally, we will debate new trends in understanding religion in our globalized societies. Students will gain knowledge on the classics of the sociology of religion, the main theoretical discussions, and the contemporary trends in the field. It will cover some theoretical and methodological perspectives, as well as research literature, and include different geographical and cultural region.

Community Advocacy and Research Engagement

Abowd, Thomas P

Fall 2024

CARE is a two-semester course (SOCY 3254/3255) that offers leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In fall, students in SOCY3254 learn the process of community-based research and its methodologies, and begin to design a proposal for an independent study for spring. In the Spring, students sign up for SOCY3255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

Studies in Crime and Social Justice

Hedges, Jessica D

Fall 2024

Crime and social justice are considered not as distinct, but indivisible constructs produced through specific knowable institutional/personal practices. Course allows students to analyze perspectives on the process through which laws and criminal justice institutions have been/continue to be constructed; situate crime study within a "power reflexive" framework, while being attentive to the operation of race, class, and gender as features of contemporary social relations/institutions; discuss contemporary intellectual and practical efforts challenging existing conceptual and political structures relating to crime and social justice; and imagine/articulate institutions paralleling the vision of social justice developed throughout the course.

Consumption, Health, and the Environment

Ouimette, Monique

Fall 2024

There are many health and environmental impacts associated with consumption activities, yet such impacts often remain hidden or obscured in the course of everyday life. In this applied course, students will examine health and environmental issues associated with consumption activities. Over the course of the semester, students will learn concepts from environmental health, environmental sociology, the sociology of consumption, and public policy. Each student will engage in an original preliminary research project on a contemporary issue related to consumption and environmental health. Students will develop an understanding of the power dynamics and inequalities associated with identifying, defining, managing, and mitigating the health and environmental impacts of consumption activities. Skills, perspectives, and analytic frameworks learned in this course will be useful for students in their roles as individual consumers, citizens, and professionals.

Sustainable Cities

Bolin, Jessica L

Fall 2024

About 4.2 billion people around the world live in cities today, with this figure expected to double by 2050. Improvement of the urban environment is therefore crucial to a sustainable planetary future. In this course, students will examine current best practices for urban sustainability and resilience in areas such as restoration of watershed health, mitigation of air pollution and soil toxicity, management of solid waste, reduction of the urban heat island effect, improvement of mass transit and infrastructure, support of urban agriculture alongside a variety of other environmental justice efforts, and preparation for sea level rise, extreme weather events, and rising temperatures.

Gender and Sports

Kim, Kyoung-yim

Fall 2024

This course uses sport to understand gender relations in a society. The course examines the ways that gender and intersections of race, class, and sexuality are produced by and within relations of power, and how normative definitions of gender and its intersections underpin normative practices in sport, health, and physical cultural contexts. Drawing on feminist scholarship, this course provides a critical insight into the history of gender relations, and how gender is used to reproduce and resist inequalities in sport, health, and physical culture.

American Economic Crisis and Social Change

Derber, Charles

Fall 2024

Course is offered every semester. Course is offered every semester. This course offers a new way to think about American and global capitalism, focusing on our values, our intertwined economic, environmental and social crises exploding in the 2008 Wall Street meltdown, the coronavirus economy, the new militaristic economy after the Ukraine crisis of 2022, and the extinction threats of energy and climate change. We examine economic problems include growing poverty and inequality, an insecure job market, and the failure of many of our industries and corporations to compete globally. We also examine our social crises, involving the growth of violence, family breakdown, global warming, systemic racism, overweening corporate power and erosion of democracy. We look at new visions and social movements to transform our socio-economic system toward a more just, sustainable and democratic economy and society.

Food Justice Across the African Diaspora

Best, Latrica E

Fall 2024

This course is designed to introduce students to the social, political and cultural meanings of food across the African Diaspora. We will cover not only the meaning of food but also the importance of race in key aspects of global food systems, from food production and processing to the distribution and consumption of food. This course will also explore food access and security and the ways in which intersecting identities make meaning, experience, and respond to such issues. By the end of this course, students will be able to apply relevant frameworks, namely environmental justice, to food-related dilemmas globally.

Wars and Revolutions in the Middle East

Kadivar, Mohammad Ali

Fall 2024

Embark on a gripping exploration with 'Wars and Revolutions in the Middle East', a course that delves into the pivotal events that have shaped one of the world's most dynamic regions. This journey begins with the colonial conflicts of the early 20th century, tracing the emergence of national borders and the profound disputes that continue to resonate today. Engage with a diverse curriculum that spans political science, history, international relations, and sociology offering a window into the transformative wars and revolutions that have defined the Middle East. From the Algerian war for independence to the influential Iranian, Egyptian, Tunisian, and Sudanese revolutions, and the persistent Kurdish insurgency in Turkey, you will examine the forces that have forged nations and ignited global discourse. This course not only charts a historical timeline but also challenges you to dissect the major theories of revolution and conflict. By analyzing the nuanced layers of the ongoing struggles, such as those in Palestine, you'll develop a multifaceted perspective on the socio-political undercurrents that continue to shape the Middle East. 'Wars and Revolutions in the Middle East' is more than a course it's an intellectual odyssey that sharpens your ability to think critically about complex global issues. It promises to leave you with a profound understanding of the narratives that have driven the Middle East's past and are still crafting its future.

SOCY356201

Environmental Sociology I

DiDonato, Sandra J

Fall 2024

This is an upper-division seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of empirical research that are national, international, and global in scope, and with particular attention given to how large-scale social institutions and organizational forms impact the environment. We will focus on the social dimensions of environmental impacts, the anthropogenic drivers of environmental impacts, and sociological research on solutions to environmental crises. A key takeaway of the course is the necessity in taking a structural approach to the study of socioenvironmental relationships. Attention will also be given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science. The course is required for all Environmental Studies majors.

SOCY358101**Mining Big Data for Social Sciences****El Tinay, Hassan****Fall 2024**

This course provides a hands-on, semi-technical introduction to the methods and ideas of Computational Social Science. Lying at the intersection of Computer Science, Statistics and Social Science, the emerging field of Computational Social Science uses large-scale behavioral data, otherwise known as "big data", to study and measure human behavior with precision largely thought impossible just a decade ago.

Throughout the semester, we will look at some big data sources such as network data and text data and the innovative methods that are being used to analyze them. Each week, students will have the opportunity to practice different methods by using Python to analyze interesting data sets ranging from online review data collected from Yelp and Airbnb to human mobility data collected from cell-phones. While the course is open to advanced undergraduate students from all majors and disciplines, the majority of the materials will be drawn from sociology and criminology. Students are expected to have some basic understanding of quantitative methods, but no prior programming experience is required.

Beyond Belief: Conspiracy Theories & Media Manipulation

Wilcox, Elizabeth K

Fall 2024

This course explores the social construction and dissemination of conspiracy theories and the mechanisms of media manipulation that amplify them. Through an interdisciplinary approach, students will examine the origins, functions, and consequences of conspiracy narratives in contemporary societies. By unpacking the complex interplay between society, media, and belief systems, students will develop the analytical tools and critical perspectives necessary to navigate an increasingly complex information landscape.

SOCY528901**Qualitative Questions: Policy & Practice Qualitative Research****McGuffey, Clifton S****Fall 2024**

This seminar equips students with the skills to conduct, theorize, and question qualitative research. We first identify the connections between theory and methodology, as well as examine the strengths and weaknesses of various interactive methods (e.g., ethnography, interviewing). We will also discuss the ethical, political, and practical implications that arise when doing research. The course will be highly attuned to issues of power and the dynamics of race, class, and gender during the research process. The course is designed for students who are preparing a research proposal, conducting research, and/or analyzing data.

SOCY552201**Social Determinants of Health****Goldman, Alyssa W****Fall 2024**

This course will examine how and why the social world plays a fundamental role in human health and well-being. Throughout the semester, students will engage with sociological frameworks for understanding both micro and macro-level pathways through which structural conditions shape health outcomes, including behaviors, social relationships, and political, economic, and cultural factors. We will explore how these pathways contribute to inequalities in resources and opportunities in ways that affect community and population health, emphasizing how the sociological perspective contributes to topics of ongoing public policy discourse. Throughout the course, students will evaluate approaches used in this field as they develop proposals for extending research in this area.

Social Psychoanalysis and the Unconscious of Power

Pfohl, Stephen J

Fall 2024

This seminar explores social psychic repetitions at the heart of everyday life and how unconscious social forces affect the ritual organization of power, culture, and history. Inviting a dialogue between sociology and psychoanalysis, the course encourages a critical examination of suggestive social phantasms and fears, compulsive fascinations and desires, selective memories and forgettings. Intended as an advanced introduction to the theories and methods of social psychoanalysis, the seminar pays particular attention to the unconscious haunts of gendered, racialized, erotic, and class-based forms of power in a global historical context.

Technology and Culture

Griffith, William

Fall 2024

This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

SOCY750201

Sociology of Work

Schor, Juliet, PHD

Fall 2024

This course covers historical and contemporary contributions to sociological and political economic approaches to work. The first third focuses on history and theory. We will read influential classic authors such as Marx, Weber, Thompson, Du Bois, Marglin, Burawoy, Folbre, Eric Williams and others. This section synthesizes wage labor, unpaid household labor and enslaved labor. In the second half of the course we look at contemporary workplaces, focusing on issues of racism and sexism, precarity and privilege, and consent and control. Examples of types of workplace settings include gig labor, professional workers, and healthcare. The last sections of the course focuses on technology, working hours and the future of work.

SOCY770001

Computational Sociology

Fan, Wen

Fall 2024

This course provides a hands-on, semi-technical introduction to the methods and ideas of Computational Social Science. Lying at the intersection of Computer Science, Statistics and Social Science, the emerging field of Computational Social Science uses large-scale behavioral data, otherwise known as "big data", to study and measure human behavior with precision largely thought impossible just a decade ago.

Throughout the semester, we will look at some big data sources such as network data and text data and the innovative methods that are being used to analyze them. Each week, students will have the opportunity to practice different methods by using Python to analyze interesting data sets ranging from online review data collected from Yelp and Airbnb to human mobility data collected from cell-phones.

While the course is open to advanced undergraduate students from all majors and disciplines, the majority of the materials will be drawn from sociology and criminology. Students are expected to have some basic understanding of quantitative methods, but no prior programming experience is required. On top of the weekly homework, graduate students are also expected to submit a computational report at the end of the semester as the final project.

Multivariate Statistics

Fan, Wen

Fall 2024

This applied course is designed for students in sociology, education, nursing, organizational studies, political science, psychology, or social work with a prior background in statistics at the level of SOCY7703 Multivariate Statistics. It assumes a strong grounding in multivariate regression analysis. The major topics of the course will include OLS regression diagnostics, binary, ordered, and multinomial logistic regression, models for the analysis of count data (e.g., Poisson and negative binomial regression), treatment of missing data, and the analysis of clustered and stratified samples. Familiarity with Stata is required for this course.

SOCY776101**Second Year Graduate Writing Seminar****Babb, Sarah L****Fall 2024**

This is a 3-credit, 2-semester course that meets approximately every other week for both terms. Students should contact the professor about attending in the fall, but wait to register until the spring term. In the fall term, they should register instead for an independent study with the faculty member advising their writing project. Note that a completed research proposal is required for entry. The writing seminar is intended for second year M.A. and Ph.D. students working on their M.A. theses/papers. The 3-credit seminar begins in fall and continues into the spring term. The seminar employs a supportive structure and a collaborative learning environment to help students to carry out their independent projects.

Sociology Courses: Spring 2025

SOCY100101

Introductory Sociology

Ayaydin, Deniz Berfin

Spring 2025

Offered every semester. Do not take SOCY1001 if you have already taken SOCY1002. Only one of these courses will count toward the major or minor. This course introduces students to the field of sociology and covers some of its most essential concepts, theories, and methods. Special attention will be paid to understanding social structure and its role in shaping individual and population outcomes and life chances. This course will cover a range of topics that may include family, work, education, politics, medicine, crime, religion, media, and social change. This course satisfies the social science core and is open to a range of students from any major. However, SOCY1001 is also designed as a gateway to the sociology major and minor. Monday and Wednesday meetings will be lecture-based while Friday meetings will be reserved for smaller sociology labs led by teaching assistants. Do not take SOCY1001 if you have already taken SOCY1002.

Introduction to Sociology for Healthcare Professions

Sara, Snitselaar

Spring 2025

Do not take SOCY1002 if you have already taken SOCY1001. Only one of these courses will count toward the major or minor.. This course is designed to present the fundamentals of sociology to an audience of future healthcare professionals. Attention is given both to micro-level (interpersonal) and macro-level (organizational) behavior. One of the major goals of the course is to enable students to ground themselves and their families sociologically, by examining their own community and social class origins. It will highlight issues of interest to healthcare professionals, along with sociological concepts that appear on the MCAT exam. NOTE THAT LAPTOPS WILL NOT BE ALLOWED DURING CLASS.

SOCY103001

Deviance and Social Control

Pfohl, Stephen J

Spring 2025

This course explores the social construction of boundaries between the "normal" and the so-called "deviant." It examines the struggle between powerful forms of social control and what these exclude, silence, or marginalize. Of particular concern is the relationship between dominant forms of religious, legal, and medical social control and gendered, racialized, and global economic structures of power. The course provides an in-depth historical analysis of theoretical perspectives used to explain, study, and control deviance, as well as ethical-political inquiry into such matters as religious excess, crime, madness, corporate and governmental wrong-doing, and sexual subcultures that resist dominant social norms.

SOCY104301

Introduction to African-American Society

McGuffey, Clifton S

Spring 2025

To get Sociology credit for the major or minor, you must register for SOCY1043 rather than cross-listed course. In 1896, distinguished scholar W.E.B. DuBois became convinced that the experience of Africans in the Americas was so distinctive that it was imperative to study Black people in order to understand power dynamics at all levels of society. This course will study those power dynamics. While paying particular attention to the many ways that racial power dynamics have impacted all people of African descent in the United States, this course does not assume a uniform Black experience. We shall see that gender, class, and sexuality greatly shape the differing experiences of African-Americans.

Social Problems

Derber, Charles

Spring 2025

This course is an exploration of different sociological approaches to the study of social problems and social trends in contemporary society. It examines the linkages between social structures/institutions, culture and human experience. The course emphasizes theoretical research issues, especially how, and to what degree, the understanding of social problems are a direct result of the processes used to define social problems as well as the research methods and procedures used to investigate them. Students will learn to critique popular discourses from a critical sociological perspective and will be encouraged to form their own opinions and critiques.

SOCY107801

Sociology of Health and Illness

Seim, Joshua D

Spring 2025

This is an undergraduate-level course in the sociology of health and illness, an incredibly broad and fragmented field that frequently overlaps with medical anthropology, public health, and other disciplines. The first half of this course focuses on the social roots of sickness. The second half concerns the social relations of medicine. While we'll treat these as relatively autonomous topics, we'll also spend time addressing the mismatches between the forces that make people sick and the organized reactions to sickness. We'll also study a number of general structures and processes that simultaneously affect health and care. For example, we'll study how capitalism, racism, and sexism make people sick. We'll then study how these same systems shape, and are shaped by, medicine.

Aging and Society

Moorman, Sara

Spring 2025

"Age doesn't matter unless you're a cheese," quipped actress Billie Burke (the Good Witch in *The Wizard of Oz*). Nevertheless, age does matter within societies. This class will cover specific topics in four general areas of sociological study: roles and relationships (e.g., within the family), inequalities (e.g., ageism), institutions (e.g., health care), and social change (e.g., the aging of the population). By the end of the course, you will have acquired a new approach to thinking about how you and others age in the social world and the ways in which age is portrayed in the media.

Global Perspectives on Climate Justice

Sykes, Eunyque D

Spring 2025

Climate change, driven by human activities like carbon emissions and deforestation, disproportionately impacts marginalized groups and international communities, raising crucial issues of climate justice. This course centers on integrating social justice into climate change and broader environmental discussions, examining the unequal distribution of environmental hazards and ethical questions of responsibility and justice. Emphasizing the intersectionality of climate justice, students will explore how race, class, gender, and other social factors intersect to exacerbate environmental inequalities. This course encourages critical engagement with and personal reflection, covering topics, such as the science behind climate change, the roles that social, political, and economic conditions play in understanding climate justice, and the different sociological insights and understandings of climate and environmental justice.

Growing Up Gendered: Socio-Cultural Perspectives in Contemporary Society

Hesse-Biber, Sharlene

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both COMM2216 and SOCY1708. How is our gendered identity constructed? These paired courses analyze how societal norms shape gender roles by examining the impact of family, educational settings, media representations, and social interactions that further understanding of gender identity and sexual orientation. TV shows, movies, ads, and online platforms are assessed. These courses explore how gender intersects with factors such as sexuality, race, and social status, and their impact on gender identity. Issues related to gender-based violence are also examined. By engaging in group discussions, lectures, and innovative assignments that draw from fields including communication studies, sociology, and psychology, students gain a deeper understanding of how gender roles are constructed.

Consumer Culture: Past, Present and the Fate of the Planet

Schor, Juliet, PHD

Spring 2025

This is a Complex Problem course and is open to FRESHMEN only. You must take both SOCY1714 and HIST1717. Although we are increasingly aware that our habits of consumption affect the environment, it is hard to imagine that consuming patterns can be changed. In this course, students will learn that practices of consumption are both socially and historically constructed, that they change dramatically over time, and that there are (and always have been) urgent moral issues connected to these ways of life. We will explore the global, social, and environmental dimensions of consumption, studying things like the 1897 Sears catalog, 1950s television shows, Canada Goose jackets, DIY manuals and makerspaces, and hippy cookbooks of the 1960s.

How Sports Explain America: The Sociology of Sports in the United States

Kim, Kyoung-yim

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both HIST1718 and SOCY1718. How have sports served to define and illustrate the essence of American society and culture throughout history and in contemporary times? These paired courses will explore the complex relationship between sports and society. Through an interdisciplinary approach to history and sociology, students will analyze the evolution of sports, assess how they mirror the changing dynamics of American society and culture, and investigate the multifaceted roles sports have played and continue to play in shaping our society. By the end of these courses, students will understand how sports serve as a microcosm of American society and a platform for social change, fostering critical thinking and a deep appreciation of the nation's cultural fabric.

Gender, Identity, and Sexuality

Barko, Emily B

Spring 2025

This course may be used to satisfy one of four electives required within the Communication major. This course offers an introduction to gender and sexuality studies, as a foundation to explore how the relationships between our personal biographies and the wider forces in society affect our lives and the lives of others. Employing an interdisciplinary approach to scholarship, we utilize a variety of academic and popular cultural resources to analyze how gender, sexuality, and identity are learned, embodied, and re/negotiated in everyday life. Underscoring the influence of media on social norms, we investigate how our identities are dynamically shaped by individual, interactional, and institutional sociocultural domains. With emphasis given to intersections of race, class, gender, sexuality, religion, and ethnicity, we consider how our positionalities are socially constructed, with consequential effects.

Perspectives on War, Aggression, and Conflict Resolution I

Johnson, Spencer K

Spring 2025

The Faith, Peace, and Justice Program at Boston College sponsors this course as an introduction to the field of Peace Studies.. This course asks: Is it ever ethical to go to war? Is it possible to be ethical in war? And, what does ethical conflict resolution look like? This course investigates these questions primarily using the resources of the Christian theological tradition and the social sciences, as well as engaging with philosophy and film. Special attention will be paid to issues in contemporary warfare and the challenges and promises of peacebuilding.

Community Advocacy and Research Engagement

Abowd, Thomas P

Spring 2025

CARE is a two-semester course (SOCY 3254/3255) that offers leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In fall, students in SOCY3254 learn the process of community-based research and its methodologies, and begin to design a proposal for an independent study for spring. In the Spring, students sign up for SOCY3255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

Studies in Crime and Social Justice

Hedges, Jessica D

Spring 2025

Crime and social justice are considered not as distinct, but indivisible constructs produced through specific knowable institutional/personal practices. Course allows students to analyze perspectives on the process through which laws and criminal justice institutions have been/continue to be constructed; situate crime study within a "power reflexive" framework, while being attentive to the operation of race, class, and gender as features of contemporary social relations/institutions; discuss contemporary intellectual and practical efforts challenging existing conceptual and political structures relating to crime and social justice; and imagine/articulate institutions paralleling the vision of social justice developed throughout the course.

Consumption, Health, and the Environment

Ouimette, Monique

Spring 2025

There are many health and environmental impacts associated with consumption activities, yet such impacts often remain hidden or obscured in the course of everyday life. In this applied course, students will examine health and environmental issues associated with consumption activities. Over the course of the semester, students will learn concepts from environmental health, environmental sociology, the sociology of consumption, and public policy. Each student will engage in an original preliminary research project on a contemporary issue related to consumption and environmental health. Students will develop an understanding of the power dynamics and inequalities associated with identifying, defining, managing, and mitigating the health and environmental impacts of consumption activities. Skills, perspectives, and analytic frameworks learned in this course will be useful for students in their roles as individual consumers, citizens, and professionals.

Faith and Conflict: Religion and Social Change in Latin American Societies

Morello, Gustavo, SJ

Spring 2025

This seminar explores the interaction between social changes and religion in Latin America. We study national cases, where we explore the political and religious changes in Latin America during the 1960s and 1970s. Then, we investigate the interactions of religiosity with some social transformations (environmental and gender-related movements, marginality, and migration). During the semester, the students will work on a paper about religion and migration among Latino immigrants to the U.S. After the course, students will be able to explain the origins, context, and consequences of religious transformation in Latin America, to develop their critical assessment of the role of religion in society, and to engage in a clear, concise and analytically sharp reading, writing and speaking.

Environmental Justice

El Tinay, Hassan

Spring 2025

This course examines challenges and controversies associated with the unequal distribution of environmental hazards across communities. Students will explore the social, industrial, and government forces that create inequitable burdens of environmental pollution as well as movements to reduce such burdens. While a majority of the course will focus on the United States, readings will include cases from around the world. Students will be expected to actively contribute to class discussions and to complete a pilot research project on the environmental justice implications of an area of everyday consumption such as food, clothing, cleaning, transportation, or technology.

Sustainable Cities

Bolin, Jessica L

Spring 2025

About 4.2 billion people around the world live in cities today, with this figure expected to double by 2050. Improvement of the urban environment is therefore crucial to a sustainable planetary future. In this course, students will examine current best practices for urban sustainability and resilience in areas such as restoration of watershed health, mitigation of air pollution and soil toxicity, management of solid waste, reduction of the urban heat island effect, improvement of mass transit and infrastructure, support of urban agriculture alongside a variety of other environmental justice efforts, and preparation for sea level rise, extreme weather events, and rising temperatures.

Masculinity, Sexuality, and Difference

Ingram, Brett D

Spring 2025

This course may be used to satisfy one of four electives required within the Communication major. This course will examine constructions of masculinity and sexuality in Western society from a critical cultural perspective. We will consider the ways in which cultural narratives about acceptable masculine behaviors and attitudes catalyze social conflicts, reinforce established power hierarchies, and organize the modes of being available to people of different gender identities and sexual orientations. We will also evaluate the liberatory potential of emergent discourses and practices that seek to cultivate greater acceptance of diversity, and promote social healing. There will be a concentrated focus on popular cultural forms (especially television, film, music, sports, and social media) that are particularly influential to contemporary men and boys.

Sexuality and Society

Lauder, Landon

Spring 2025

This course explores the many ways sexuality is shaped by interactions, cultures, institutions, and state power primarily within the United States context. Topics include histories of sexual identities, queer theory, normativity, masculinities and femininities, place and sexuality, transnational perspectives of sexual identity, and digital sexualities. Throughout the course, we will view these topics with an intersectional lens, understanding how race, class, gender, ability, and citizenship status shape how sexuality is understood. Students will complete both traditional and creative assignments for this course.

American Economic Crisis and Social Change

Derber, Charles

Spring 2025

Course is offered every semester. Course is offered every semester. This course offers a new way to think about American and global capitalism, focusing on our values, our intertwined economic, environmental and social crises exploding in the 2008 Wall Street meltdown, the coronavirus economy, the new militaristic economy after the Ukraine crisis of 2022, and the extinction threats of energy and climate change. We examine economic problems include growing poverty and inequality, an insecure job market, and the failure of many of our industries and corporations to compete globally. We also examine our social crises, involving the growth of violence, family breakdown, global warming, systemic racism, overweening corporate power and erosion of democracy. We look at new visions and social movements to transform our socio-economic system toward a more just, sustainable and democratic economy and society.

Social Movements

Kadivar, Mohammad Ali

Spring 2025

In this course we will learn about the main drivers, dynamics, and consequences of contentious politics. We will learn about major mechanisms at work in episodes of contention. We will learn about rival theories, and some of the major debates in the studies of contentious politics and social movements. We will study cases such as the civil rights movements, Arab spring, and other examples of social movements from across the globe.

Comparative Revolutions

Kadivar, Mohammad Ali

Spring 2025

What are revolutions? Why do they happen? How do they happen? What are their consequences? This course critically engages with these questions, and reviews the main answers presented in the social scientific literature on the revolutions. In addition to a theoretical understanding of the revolutionary processes, the course also presents case studies of some of the classic examples of revolutions such as the Haitian and Russian revolution, as well as more recent revolutions such as the uprisings in the Arab World. Through reviewing the literature and case studies, we also examine how the meanings and dynamics of the revolutions have changed from the early 20th century to the 21st century.

SOCY356201**Environmental Sociology I****DiDonato, Sandra J****Spring 2025**

This is an upper-division seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of empirical research that are national, international, and global in scope, and with particular attention given to how large-scale social institutions and organizational forms impact the environment. We will focus on the social dimensions of environmental impacts, the anthropogenic drivers of environmental impacts, and sociological research on solutions to environmental crises. A key takeaway of the course is the necessity in taking a structural approach to the study of socioenvironmental relationships. Attention will also be given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science. The course is required for all Environmental Studies majors.

This course explores the social construction and dissemination of conspiracy theories and the mechanisms of media manipulation that amplify them. Through an interdisciplinary approach, students will examine the origins, functions, and consequences of conspiracy narratives in contemporary societies. By unpacking the complex interplay between society, media, and belief systems, students will develop the analytical tools and critical perspectives necessary to navigate an increasingly complex information landscape.

Urban Sociology

Lauder, Landon

Spring 2025

This course explores urban and place-based cultures, lifestyles, development, and changes with a particular focus on urban inequalities. Topics include urban and community theory, cultural enclaves, housing and segregation, gentrification, crime, urban policy, and sustainability. Utilizing theoretical, empirical, and multimedia sources, this course will provide students with the opportunity to critically analyze the relationships between communities, places, and cities. Students will conduct an original ethnographic research project in the Boston area on an urban sociological topic of their choosing.

Racialized Medicine

Best, Latrica E

Spring 2025

This course is designed to introduce students to sociological and other interdisciplinary approaches to how race and racism are defined, employed, and contextualized in health and medicine. Though we will cover an array of theoretical perspectives regarding race and its impact on health, the core theoretical underpinnings of this course are rooted in the racialization process. The contemporary readings address four themes: theoretical and methodological perspectives of race, racism, and health, social processes and the racialization of health, health inequities across the life course, and institutional pursuits of health equity. We examine the importance of intersecting identities throughout the course.

Important Readings in Sociology

Seim, Joshua D

Spring 2025

This course is designed as the first in the sequence of courses required of students who have been admitted into the Sociology Department's Undergraduate Honors Program. Ordinarily, students will take this course during the spring of their junior year. The purpose of this seminar will be to read and discuss a series of books that are generally thought to be important contributions to the field. The books chosen will reflect a range of substantive issues, methodological approaches, and theoretical perspectives. The abiding question throughout this seminar class will be the following: What are the characteristics of powerful and compelling sociological work?

Senior Honors Thesis

Goldman, Alyssa W

Spring 2025

After having completed their research proposal in SOCY4961, Students in the Undergraduate Sociology Honors Program then complete the data collection, the analysis, and the writing of their senior thesis during the spring of the senior year. In SOCY4963.01 students complete their thesis research under the direction of their faculty advisor. Ordinarily, students are expected to complete their thesis by April 15, approximately two weeks before all senior honors students present the findings of their research in a public meeting.

Approaches to Mixed Methods Research

Hesse-Biber, Sharlene

Spring 2025

The course covers a wide array of theoretical and methodological approaches to mixed methods research inquiry. The course aims to provide a problem-centered perspective on mixed methods research that starts with the research problem. It aims to create a research design that connects well to the research problem and allows the researcher to adjust their research problem over time. The course offers a hands-on approach designed to assist you with planning your own problem-centered mixed methods research project and reviewing and critiquing a specific research area you are working on that uses a mixed methods approach. This course is a graduate-level research seminar that meets for 2.5 hours once a week. Students can work on their own mixed methods research proposals or manuscripts during class time. We will have dedicated sessions for peer review and feedback on your ongoing work. Students may bring either a new research proposal they would like to start or an ongoing project they are already working on. The course welcomes projects at various stages of development, from initial concepts to works-in-progress manuscripts. Note: Students working on mixed-methods projects may have publication opportunities. I will provide more details on this opportunity for students enrolling in this class. This course suits graduate-level students in sociology, nursing, and other related disciplines. Enrollment is limited to allow for in-depth discussion and personalized feedback. Students enrolling in this course should have taken at least ONE undergraduate or graduate research methods course.

Technology and Culture

Griffith, William

Spring 2025

This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

Work, Health, Aging, Family, Life course (WHAFL) Research Workshop

Sarkisian, Natalia

Spring 2025

This is a 3-credit, 2-semester course that meets approximately every other week for both terms. Students should contact the instructor about attending in the fall, but wait to register until the spring term. The workshop is intended primarily for sociology graduate students working on their own research projects in the following broadly defined areas: sociology of work, sociology of families, sociology of health and medicine, and sociology of aging and the life course. Students outside of the sociology department can be welcomed on a case-by-case basis. The workshop employs a supportive structure and a collaborative learning environment to help students carry out their independent projects.

Regression Models for Categorical Data

Fan, Wen

Spring 2025

This applied course is designed for students in sociology, education, nursing, organizational studies, political science, psychology, or social work with a prior background in statistics at the level of SOCY7703 Multivariate Statistics. It assumes a strong grounding in multivariate regression analysis. The major topics of the course will include OLS regression diagnostics, binary, ordered, and multinomial logistic regression, models for the analysis of count data (e.g., Poisson and negative binomial regression), treatment of missing data, and the analysis of clustered and stratified samples.

SOCY771101**Empirical Research Seminar****Best, Latrica E****Spring 2025**

This course guides first-year sociology graduate students into launching an effective scholarly research project. Students revise and/or make progress on the projects they proposed in SOCY7710, read and analyze multiple examples of methods in action," and peer-review their classmates' work. Students also conduct multiple exercises designed to better understand different ways to do effective sociological research. Prerequisite for SOCY7711 is a grade of "B" or better in SOCY7710

Credits: 3**Room and Schedule:** Stokes Hall 286S F 10:00AM-12:30PM**Satisfies Core Requirement:** None**Prerequisites:** None**Corequisites:** None**Cross-listed with:** None**Frequency:** Periodically in the Spring**Student Level:** Graduate**Comments:** None**Status:** Offered**SOCY771601****Contemporary Social Theory****Pfohl, Stephen J****Spring 2025**

Required for graduate students. This seminar is a graduate level introduction to contemporary social theory. It concerns the historical context and development of a wide variety of perspectives used by social theorists to make sense of multiple social worlds. It also concerns the ways in which social theories are themselves sociologically constructed. Theoretical frameworks addressed include: functionalism and cybernetics; symbolic interactionism and pragmatism; exchange, behavioral, and conflict perspectives; feminism; Marxism; phenomenology and ethnomethodology; critical race theory; queer theory; structuralism and poststructuralism; as well as postcolonial and postmodern theories of the subject and power.

SOCY776101

Second Year Graduate Writing Seminar

Babb, Sarah L

Spring 2025

This is a 3-credit, 2-semester course that meets approximately every other week for both terms. Students should contact the professor about attending in the fall, but wait to register until the spring term. In the fall term, they should register instead for an independent study with the faculty member advising their writing project. Note that a completed research proposal is required for entry. The writing seminar is intended for second year M.A. and Ph.D. students working on their M.A. theses/papers. The 3-credit seminar begins in fall and continues into the spring term. The seminar employs a supportive structure and a collaborative learning environment to help students to carry out their independent projects.

Dissertation Seminar

Sarkisian, Natalia

Spring 2025

This is a continuing research workshop which covers all stages of the research process, from conceptualization and theory development through data analysis and writing. The workshop is intended primarily for sociology graduate students working on dissertation proposals, dissertations, and/or comprehensive exam papers. Others will be welcomed on a case-by-case basis. The group meets bi-weekly, with individual meetings with the professor as necessary. All students who are writing dissertations are strongly recommended to enroll in this workshop, at least for one semester.

Studio Art Courses: Summer 2024

ARTS111501

Imagination and Creativity in Irish Landscapes

Ivy, Candice M

Summer 2024

This hands-on study abroad course is open to students of all levels of artistic background and areas of concentration. This course comprises a uniquely immersive and field-based study at the Burren College of Art--based within the renovated remains of a sixteenth-century castle on the west coast of Ireland. The surrounding landscape is the Burren, a one-of-a-kind ecological land mass of limestone, formed under an ancient ocean, and fostering ecosystems containing flora and fauna unique to the area. Culturally, the region is home to numerous unearthed remains of historical dwellings, tombs, and artifacts, which further sculpt the terrain. Through individual and collaborative creative projects using a variety of media, students use the terrain to investigate, question and expand upon firsthand observation and analysis of relationships between cultural and natural systems. Course content will consist of trips to regional sites, field based research, creative workshops, lectures and art production supported by local ecologists, artists, story-tellers and historians.

Innovation through Design Thinking

Gaudette, Glenn R

Summer 2024

Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

Introduction to Digital Photography

Craig, Ashley

Summer 2024

Students must have a digital camera, and a laptop for classes. In this course, students will become familiar with how to create a photograph with a digital camera, and how to use photographic techniques to control the look of an image through post-production techniques. These will be developed with good digital asset management practices by using Adobe Photoshop. Students will also learn an introduction to photographic history and visual literacy. This course introduces the fundamental principles of photography and its history for universal applications and is available to all majors. All those participating will need to have a DSLR that shoots in RAW and is at least 10 megapixels to take this course.*This course does not fulfill the Arts Core

Design: Seeing Is Believing

Lilly, Anne Martha

Fall 2024

Seeing is Believing is a hands-on class that will help open the door to the mystery behind effective and engaging visual decision making. Do you find yourself using ambiguous gut feelings to make something that looks "good" without applying meaningful criteria? Using a variety of approaches and materials including photography, charcoal, and collage, assignments, exercises, and field trips are designed to strengthen visual acuity and the ability to communicate dynamically and creatively. This class is designed for both advanced and entry-level students with 2-D and 3-D assignments providing enough flexibility to meet each student at whatever level they are.

ARTS110501

Making Prints/Making Books: An Introduction to Printmaking and Book Arts

Stigliano, Stephanie

Fall 2024

In this course, students will be introduced to the world of printmaking and book arts through practical, hands-on assignments. Students will learn to make relief prints, and will leave the class with a book designed from their prints. Art in book form tells a story with words, images, structure, and material. The developmental process of making a print is akin to the building of a narrative. Both of these graphic arts have existed in tandem throughout history. They are ways to communicate ideas to a broader public, so it makes sense to explore them together in the classroom. Students who are just learning to draw and accomplished draftsmen can both benefit from making prints and books. Each assignment will balance technical, conceptual, and formal goals. We will discuss the design basics of line, shape, texture, light and shadow, space, and composition. The printmakers will create series, sequences, and variations on a theme. We will look at books and prints from different eras and cultures, and take advantage of the college's numerous collections. There will be written components, such as an observational response to a single print and a reflection on an individual book work. The students will present their artwork as the focus of group discussion and critique. Additionally, they will receive individual feedback during each class meeting.

2D to 3D Foundations

Della Lucia, Catherine

Fall 2024

This course will introduce the foundational concepts and techniques of 2D and 3D design used in both digital and analog forms of art making. It is intended for Studio Majors and Minors and students interested in pursuing a serious studio art practice, and is recommended to be taken early in the studio course trajectory. The course enables students to develop skills and an understanding of how to move between 2D, 3D, and digital languages. Students will develop confidence and community while learning how to access and safely utilize the variety of resources available for creative work here at Boston College. In addition to demos, critiques, and field trips, students will work on a series of skill building assignments focused on creative problem solving supplemented by guest lectures from core faculty of the studio department

Digital Drawing

Reeves, Brian A

Fall 2024

Digital Drawing expands upon the techniques and principles of traditional drawing, while exploring the range of approaches possible with current technology. Students develop original works, from sketches to larger-scale finished pieces for screen output and high-quality digital printing. Projects range from observational drawing to drawing from imagination. This class is a good foundation for students who are interested in pursuing digital fine-art, animation, illustration, graphic design, architecture, etc. Class time consists of image lectures, technical demonstrations, and critiques of student work. Though some in-class work time will be available, students are expected to complete projects outside of class. The class covers the foundational elements of digital drawing and painting in Adobe Photoshop and Illustrator, pressure-sensitive styluses, and may also include current apps for tablets and phones. Students are expected to have completed Drawing I: Foundations (or the equivalent) but do not need to have prior experience with Adobe programs.

Introduction to 3D: Sculpture

Della Lucia, Catherine

Fall 2024

An introduction to sculpture and 3 dimensional thinking, this course we will use a variety of materials including paper, wood, organic material, found objects, and light to explore concepts around materiality, nature, play, objecthood, and what it means to be a human in space. Students will be introduced to a variety of skills such as woodworking, 3-D printing, and model making. Through critiques, weekly discussions, reading assignments and field trips, students will develop an appreciation of themselves as people who think through making and the role of sculpture and 3-D thinking in society. Highly recommended for students pursuing the Architectural Studies concentration.

ARTS116102**Photography I****Engstrom, Courtney Marie****Fall 2024**

This course is an introduction to 35mm black and white photography, with particular emphasis on exploring the potential of the photographic image and its related light-sensitive materials. Topics to be covered include exposure, film development, printmaking, and mounting for presentation. Class time will be devoted to slide lectures on the work of historical and contemporary visual artists, critiques of student work, and darkroom demonstrations. Students will have weekly photographing and printing assignments, and a final project portfolio. This course requires additional work outside of class time.

Credits: 3**Room and Schedule:** Devlin Hall 11 Tu 02:00PM-05:00PM**Satisfies Core Requirement:** None**Prerequisites:** None**Corequisites:** None**Cross-listed with:** None**Frequency:** Every Fall,Every Spring**Student Level:** Undergraduate**Comments:** None**Status:** Offered**ARTS116301****Introduction to Digital Photography****Muldowney, Greer R****Fall 2024**

Students must have a digital camera, and a laptop for classes. In this course, students will become familiar with how to create a photograph with a digital camera, and how to use photographic techniques to control the look of an image through post-production techniques. These will be developed with good digital asset management practices by using Adobe Photoshop. Students will also learn an introduction to photographic history and visual literacy. This course introduces the fundamental principles of photography and its history for universal applications and is available to all majors. All those participating will need to have a DSLR that shoots in RAW and is at least 10 megapixels to take this course.*This course does not fulfill the Arts Core

ARTS160101

Perspectives on Art: Rupture and Repair

Burns, Jennifer L

Fall 2024

In this course, we will work in tandem with the philosophical inquiry you are undertaking in PHIL1601 to engage with two central questions. First, how do visual artists participate in traditions of making? When and how do they choose to continue or depart from those traditions? Can there be a modern tradition given our circumstances of perpetual disruption? Second, how can art-making be a space of interaction between people from different times or in different places? When artists borrow techniques, forms, symbols, or subject matter from each other, do their meanings change, persist, or evolve in some other way? What new possibilities and/or problems can emerge from encounters between distinct cultural traditions?

ARTS220601

Drawing 2: The Art of Portraiture

Chong, Sammy

Fall 2024

Classroom activities will include demonstration, lecture, and critiques. Basic drawing skills are strongly recommended. This drawing course focuses on the genre of portraiture, both in theory and in practice. The Mona Lisa, carnival portraits, and everything in between they all share the same initial approach to the figure. We will first hone in on the structure of the head. From there, we will use value, shapes, and color to create strong portraits with charcoal, gouache, and watercolor pencils. Along with traditional methods we will explore contemporary approaches to portraiture, with differing uses of format, composition, and color schemes.

ARTS220701

Urban Design for Complexity and Sustainability

Littell, Matthew

Fall 2024

The course explores the changing demands on urban environments in the twenty-first century and the newest policies, technologies, and design approaches that are being developed to address them. Topics will include analyses of the factors that shape the physical form of cities, including zoning and regulatory contexts, real estate development patterns, transportation infrastructure, environmental challenges, and aesthetics. The material will be introduced as case studies and surveys, with presentations by design professionals, city officials, and real estate developers. Students will gain literacy in zoning, real estate metrics, planning, and issues related to architectural design and large scale urban design. The semester will conclude with a final project synthesizing many of the topics covered.

Ideas in Contemporary Art

Alvarez, Camilo

Fall 2024

This course is designed to foster an understanding of the most recent movements in contemporary visual art. Regular visits to galleries and museums serve as a basis for lectures and class discussions. Reading assignments are geared to set the works under discussion in a historical and theoretical context. The course will stress the relevance of the material under study to studio practice. Students are expected to complete reading and written assignments as well as a visual project.

Graphic Design

Henriques, Carissa

Fall 2024

This course is an immersive project-based introductory overview of concepts, contexts, tools, and techniques useful in solving a wide range of contemporary design problems, including logos, business cards, propaganda posters, multi-page documents, data visualizations, web page designs, app wireframes, and proposals for site-specific graphics. Beyond the necessary focus on software, including Adobe InDesign, Illustrator, and Photoshop, the course will incorporate discussion and application of typography, color theory and other 2D design concepts affecting how subject matter is perceived. Students will solve problems on behalf of themselves and choose one or more other clients whom they'll strive to serve.

ARTS334701

Costume Design

Burgess, Quinn M

Fall 2024

Students are not required to have advanced drawing skills to take this class. There are several class sessions devoted to learning and practicing drawing and painting techniques. The art of costume design integrates artistic imagination with the practical concerns of theatrical production. The course is designed to help students develop the fundamental skills used by costume designers, focusing particular attention on character analysis, period research, and visual communication. The course will include a series of exercises and projects to develop skills in figure drawing, rendering in various media, fabric selection and color. Students will learn how to communicate character, mood and style through costume following two learning tracks: (1) developing the concept and theory of the design and (2) communicating the design through figure drawing and rendering.

Issues and Approaches to Studio Art

Beckmen, Kiana Ruth

Spring 2025

This course is intended for Studio Majors and Minors and serious students with previous studio experience. This course enables students to develop skills and ideas by exploring objective, subjective, and conceptual approaches to a variety of media. Practical exercises include live models, scenarios, memory, and imagination. Students develop skills and confidence by exploring a variety of ideas and techniques in preparation for a more individually directed approach in subsequent courses. Discussions and group or individual critiques develop students' critical and analytical skills and provide an open forum for students to bring questions and problems for exploration.

Design: Seeing Is Believing

Weisberg, Debra

Spring 2025

Seeing is Believing is a hands-on class that will help open the door to the mystery behind effective and engaging visual decision making. Do you find yourself using ambiguous gut feelings to make something that looks "good" without applying meaningful criteria? Using a variety of approaches and materials including photography, charcoal, and collage, assignments, exercises, and field trips are designed to strengthen visual acuity and the ability to communicate dynamically and creatively. This class is designed for both advanced and entry-level students with 2-D and 3-D assignments providing enough flexibility to meet each student at whatever level they are.

ARTS110501

Making Prints/Making Books: An Introduction to Printmaking and Book Arts

Stigliano, Stephanie

Spring 2025

In this course, students will be introduced to the world of printmaking and book arts through practical, hands-on assignments. Students will learn to make relief prints, and will leave the class with a book designed from their prints. Art in book form tells a story with words, images, structure, and material. The developmental process of making a print is akin to the building of a narrative. Both of these graphic arts have existed in tandem throughout history. They are ways to communicate ideas to a broader public, so it makes sense to explore them together in the classroom. Students who are just learning to draw and accomplished draftsmen can both benefit from making prints and books. Each assignment will balance technical, conceptual, and formal goals. We will discuss the design basics of line, shape, texture, light and shadow, space, and composition. The printmakers will create series, sequences, and variations on a theme. We will look at books and prints from different eras and cultures, and take advantage of the college's numerous collections. There will be written components, such as an observational response to a single print and a reflection on an individual book work. The students will present their artwork as the focus of group discussion and critique. Additionally, they will receive individual feedback during each class meeting.

ARTS110901

Design is Human

Burns, Jennifer L

Spring 2025

Design today is buzzed about in fields as diverse as business, medicine, and engineering. But if design can mean everything from the swoosh on a shoe to preparing coastal cities for sea-level rise, how do we comprehend this elastic concept? Considering specific examples from graphic, fashion, and product design, studying the shaping of place by architects, planners and infrastructure engineers, and finally exploring the virtual worlds of gaming, the internet and social media, this introductory course critically surveys design practices from the late-nineteenth to early-twenty-first century to understand what design has promised, what it delivered, and what it could still become.

ARTS111201

Digital Drawing

Reeves, Brian A

Spring 2025

Digital Drawing expands upon the techniques and principles of traditional drawing, while exploring the range of approaches possible with current technology. Students develop original works, from sketches to larger-scale finished pieces for screen output and high-quality digital printing. Projects range from observational drawing to drawing from imagination. This class is a good foundation for students who are interested in pursuing digital fine-art, animation, illustration, graphic design, architecture, etc. Class time consists of image lectures, technical demonstrations, and critiques of student work. Though some in-class work time will be available, students are expected to complete projects outside of class. The class covers the foundational elements of digital drawing and painting in Adobe Photoshop and Illustrator, pressure-sensitive styluses, and may also include current apps for tablets and phones. Students are expected to have completed Drawing I: Foundations (or the equivalent) but do not need to have prior experience with Adobe programs.

Innovation through Design Thinking

Rutirasiri, Chokdee R

Spring 2025

Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

Introduction to 3D: Sculpture

Della Lucia, Catherine

Spring 2025

An introduction to sculpture and 3 dimensional thinking, this course we will use a variety of materials including paper, wood, organic material, found objects, and light to explore concepts around materiality, nature, play, objecthood, and what it means to be a human in space. Students will be introduced to a variety of skills such as woodworking, 3-D printing, and model making. Through critiques, weekly discussions, reading assignments and field trips, students will develop an appreciation of themselves as people who think through making and the role of sculpture and 3-D thinking in society. Highly recommended for students pursuing the Architectural Studies concentration.

Drawing the Figure (Drawing II): Observation to Expression

Chong, Sammy

Spring 2025

Together we will venture into a world of the body as represented through drawing materials on 2D surfaces. You will learn techniques and approaches to drawing the figure and will work in the studio from a live model. Studio work include: drawing the body; revise those ideas; developing finished drawings; researching historical and contemporary innovations and doing creative copies of these master works; working from memory and contextualized imagination; translate sensory experience through the representations of the body.

Public Art: The Design Process

Eduardo, Pablo

Spring 2025

This course will provide an introduction to the process of creating public memorials. It will explore how and why communities build public memorials by looking at other public works in Boston and beyond. The course will look at all the components that go into creating monuments and public spaces focusing on the design and design process, ultimately working on a case study to produce a plan for a public art project from thinking about what the community requirements to the conceptual design, construction, and installation. The design process and implementation of the design will rely on problem solving and critical thinking supported through lectures, discussions, presentations, and reading.

Drawing 3: Expanded Practice

Austen, Hartmut

Spring 2025

Fresh ideas and approaches to drawing are essential for the creative development of a department and its students. This class will explore both traditional and new conceptions of what drawing can be. We will conduct our investigation using traditional materials as well as new media in the service of crossing and pushing established boundaries. Utilizing and deepening our understanding of 'mark-making' we will further explore drawing's breath and expanse across disciplines as well as its potential to expand on the what it means to 'draw from observation'."

ARTS331901

Advanced Digital Media, Moving-Image Projects

Friedman, J Georgie

Spring 2025

This class is for advanced digital-media art and film students working in any moving-image medium (video art, experimental film, animation, programming-based imagery, video and performance, etc.) to refine and develop their ideas, skills, and presentation methods. This class is highly recommended for all Art Majors/Minors who want to incorporate moving-image elements into their thesis work. Though a variety of advanced techniques in Adobe Premiere, After Effects, and other programs will be demonstrated, students are REQUIRED to be proficient with the equipment and programs used in their type of moving-image production. Based on individual goals set in the beginning of the semester, students are expected to complete 3-4 short to medium pieces, or one larger piece over the semester. Students are asked to investigate methods for moving-image presentation and viewer experience/interaction beyond the traditional "movie" screen or monitor, including: multi-channel works; object-based or site-specific video installations; interactive pieces (triggered by motion, sound, or physical inputs); or mobile based pieces that utilize geo-location or augmented reality; etc. Based on a student's goals, independent research and skill building may be required. Class sessions will be a mix of screenings, reading discussions, technical demonstrations, in-class work time, peer workshopping, and class critiques of students' projects. Artist talks or exhibition visits may be assigned, based on local event programming. The goal of this class is for students to refine their concepts, polish their formal and technical skills, and make deliberate presentation choices, so all elements add meaning to their moving-image works.

Preference will be given to majors and minors in Studio Art. The computer is one of myriad facilitators of the output of intellectual design ideas, but is by no means a creator of digital design content. This course begins with that notion and will work as a hybrid: equal parts digital skills workshop where software skills are tested and evaluated -- and artists atelier where design ideas, both articulated and ineffable, seek meaningful expression. Course content will draw from the fields of art, photography, film, graphic design, industrial design and architecture. In addition to works of two dimensions, this course will explore the translation from digital design to physical object.

ARTS370801

Advanced Film Photography

Loischild, Rachel

Spring 2025

This course is designed for students looking to develop an advanced practice in film photography through a contemplative semester-long portfolio project. This portfolio project will help students engage in a critique of the photographic essay, a form developed largely in the 20th century through the exhibitions of western photography. Through learning to use medium and large format cameras, students will gain advanced skills in compositional control, creative focusing, and image shape. Technical topics covered in this course include: using the view cameras movements for composition (tilt, swing, shift, rise, and fall), learning medium format film development, sheet film development, advanced darkroom printing, digital scanning, and inkjet printing workflows. In addition to extending students' imaging practice, students will be exposed to historic photographs through visits to prominent photography collections and exhibitions in the Boston area.

Graphic Design 2: Type and Image

Henriques, Carissa

Spring 2025

This course explores the functional and experimental application of typography for visual communication across a variety of scales, contexts, and media. Students will expand on principles of 2D design while gaining fundamental skills in the application of typography through Adobe InDesign, Illustrator, and Photoshop. Additional topics include principles of composition, typographic grid, pacing, structure and meaning, publication design, craft, and print production. Class time will consist of in-class demos, studio-based practice, supporting projects, and critical reflection, with outside of class work required.

Theatre Courses: Summer 2024

THTR337301

Contemporary Theatre and Drama in London

Cummings, Scott T

Summer 2024

This site-based, four-week, summer course abroad examines the current theater scene in London and the artistic and historical legacy that has led to it. Through attending plays, visiting historical and cultural landmarks, classroom lecture and discussion, and writing exercises, we will study representative plays from the Elizabethan era up to the present day. Particular emphasis will be placed on the theatre of William Shakespeare and on recent trends in British playwriting. While the course is classroom-based, our primary 'text' will be the city of London itself, the theatre capital of the English-speaking world. Attending theatre productions (and writing and talking about them) is central to the course.

Theatre Courses: Fall 2024

THTR101101

Theatre Production Lab I: Scenery Run

Evans, Catrin

Fall 2024

The Theatre Production Run Labs will introduce students to the skills necessary to rehearse and perform the technical duties needed to produce a stage production. Through actual hands-on practice, students will be allowed to develop their abilities in the areas of theatre production related to scene shifting, prop running, rigging, and performance needs. Students will work on a departmental production during the semester. The work that students do on that production will vary by student and will be determined by the needs of the production and may evolve during rehearsal. Students may do multiple labs in a semester but they must be in different areas.

Theatre Production Lab II: Dramaturgy

Mohler, Courtney

Fall 2024

The course will be based on the practical application of Dramaturgy Basics: THTR2240. The major emphasis is on the practice and application of the art and science of dramaturgy. Students will apply the knowledge of Dramaturgy Basics to a Theatre Department production. Students will implement typical dramaturgical tasks and receive guidance and feedback on their execution. More importantly, the lab will frame the dramaturgical point of view so students will be able to effectively navigate the role in production. Over the course of the semester students will work on: Script selection and analysis, production dramaturgical research and response, in rehearsal practice and protocol, audience contact, program notes, lobby display and talk backs, new play development, building a theatrical season, and civic engagement.

THTR103901

Theatre Production Lab III: Assistant Stage Manager

Traub, Adele N

Fall 2024

Every department production has two or more assistant stage managers. These students help the stage manager to run rehearsals and are in charge of backstage during performances. ASMs must be at many of the regular rehearsals and at all of the technical and dress rehearsals and performances for the show that they are assigned. ASMing counts as a one credit lab. While it takes a little more time than other labs, you learn how all the theatrical pieces of a show fit together. This lab requires department permission; however, there are no majors only restrictions and no experience is necessary to assistant stage manage a show.

THTR104901**Advanced Production Lab: Stage Manager****Traub, Adele N****Fall 2024**

Once students gain experience as an assistant stage manager, they may advance to the two credit Stage Management lab. The stage manager works alongside the director on a production and is in charge of organizing rehearsals, communicating with the production team, and running performances. Stage managers plan each rehearsal with the director, create rehearsal schedules, keep track of blocking, costume and prop needs, and distribute rehearsal reports to theatre staff and designers. Stage managers are assigned at the end of the previous academic school year to stage manage one of the six Theatre Department productions. This lab requires department permission and significant production experience. Stage managers at BC work alongside students and professionals alike and are considered leaders within the department.

Elements of Dance

Kim, Sun Ho

Fall 2024

This course is designed to develop the student's knowledge and experience of dance as an art form. The elements of dance used in ballet, modern and jazz will be introduced along with the principles of composition. The aesthetics of dance as an art form will also be studied. Students will be reading texts as well as viewing dance works in live performance and on video. This course will provide a groundwork for students who wish to do further work in technique, composition, and performance.

Ballet: Pointe II

Takaishi, Amane

Fall 2024

Prerequisites Pointe I or pointe experiences that are equivalent to Pointe I. Students with no pointe experience may be permitted to take the course after talking to the instructor. More details are described below. This course counts as an additional course required for dance minors, but it is also excellent for dancers who aspire to work on pointe toward the intermediate level. Also, students without pointe experience prior to the course are welcome to take the class on flat shoes and may go on pointe during the warm-up at the barre. The course aims for all students to expand on technique, increase artistic expression, and build knowledge of ballet terms. The class structure is divided into three parts: the first part of the class includes warming up on the barre, such as roll-ups and sous-suss, chapp, and pas de bourree. The second part of the class, which takes place in the center, is to work on some intermediate pointe techniques, such as chans and piqu turns. The last part of the class focuses on learning the choreography of ballet repertoires to develop artistic expression as a performer. In addition to in-class physical activity, the course does require small reading and writing assignments, such as study tasks, a mid-term assignment, and a final paper.

THTR112501

Ballet I

Takaishi, Amane

Fall 2024

This course is designed to challenge both the experienced and beginner dancer. Individual attention will be given with the goal of perceiving the technical and artistic aspects of dance as a performing art. Each class will incorporate barre and center work with phrases appropriate to the individuals in the class. Students will become familiar with the vocabulary and the historical background of ballet. Work in anatomy, kinesiology, costume design, and music will be introduced. Dress code will be leotard and tights or unitard, and ballet shoes. A pianist will accompany each class.

Ballroom Dance: Mid-Nineteenth Century

Burgess, Quinn M

Fall 2024

Students in this course will learn a selection of mid-19th century ballroom dances such as the waltz, the polka, a quadrille, and country dances such as the Virginia Reel. In addition, students will connect with the past through an exploration of topics such as womens and mens fashion, etiquette, and the physical world of the ballroom. Students will be asked to synthesize the information contained in the course through the embodiment of a character that will be presented in class. These elements will encourage each student to envision the past, bringing it to life with an understanding of the relationships between dance, etiquette, fashion, and the culture of the period.

THTR113301

Ballet III

Takaishi, Amane

Fall 2024

This course is one of the core technique courses required for dance minors, but it is also an excellent course for dancers at an intermediate level. Ballet I or II is recommended to take prior to the course. The aim of the course is to expand the ballet technique to a higher level of ballet by working on coordination and phrasing of music during the barre and center exercises. As such, allegro exercises across the floor may incorporate the music that varies its rhythm, which trains dancers to either suspend or anticipate certain movements according to the music. Throughout the course, students work on performing a group dance and a solo variation from classical ballet repertoires, such as La Bayadere. In addition to in class physical activity, the course does require reading and writing assignments, such as study tasks, a mid-term assignment, and a final paper.

Elements of Theatrical Design

Burgess, Quinn M;Fallon, Amanda;Tiala, Crystal

Fall 2024

This course is designed for majors and minors. Minors, please get permission from Theatre Department to enroll. The course is a continuation of the Elements of Theatre Production I class. In addition to learning more of the basic knowledge and skills necessary for the preparation and execution of theatrical production work, students will use class projects to begin creating designs for the stage. The final project will focus on professional design processes and collaborative procedures as they apply to scenic, costume, lighting and sound design. In addition, Elements II in combination with the Theater Production Laboratory will introduce you to skills necessary for the preparation and execution of lights, sound, painting and make-up for stage productions. It is required for Majors.

Dramatic Structure and Theatrical Process

Cummings, Scott T

Fall 2024

This foundational course provides a thorough introduction to theatre and drama study. It is geared towards, though not limited to, Theatre majors (or prospective majors) in their first year. Dramatic texts are studied as blueprints for performed events. Students will read a wide range of plays in order to develop play analysis skills and to gain an awareness of how structure shapes meaning. Fundamental aspects of theatrical process and production are also taken into consideration.

Acting II: Voice, Speech and Text

Riggin, Patricia

Fall 2024

Voice and speech are major tools not only for actors but for anyone who wants to communicate more effectively. In this course, the essential workings of the human voice, methods to free it from tensions and habits, ways to achieve a stronger and healthier voice, and exercises to develop its power and agility are explored through a series of vocal/physical exercises. This work is applied to theatrical texts throughout the semester. An awareness of the magnificence of the vocal instrument and a greater range of expressiveness with this gift are nurtured in this class

Costume Design

Burgess, Quinn M

Fall 2024

Students are not required to have advanced drawing skills to take this class. There are several class sessions devoted to learning and practicing drawing and painting techniques. The art of costume design integrates artistic imagination with the practical concerns of theatrical production. The course is designed to help students develop the fundamental skills used by costume designers, focusing particular attention on character analysis, period research, and visual communication. The course will include a series of exercises and projects to develop skills in figure drawing, rendering in various media, fabric selection and color. Students will learn how to communicate character, mood and style through costume following two learning tracks: (1) developing the concept and theory of the design and (2) communicating the design through figure drawing and rendering.

Creative Dramatics

Jorgensen, Luke R

Fall 2024

This class investigates the power of drama to educate, inspire and empower the individual. The course focuses on drama pioneers whose work crosses over borders between the fields of education, theater, drama therapy and social justice. This is a hands-on investigation of theories and techniques and will include working with local middle school students to observe and apply ways of making drama with adolescents. Creative Dramatics is essential for activists, directors and for teachers in obtaining additional certification to teach drama. Subjects include storytelling, improvisation, Commedia Dell'Arte, drama therapy, Theatre of the Oppressed, and Theatre for Youth. It examines the work of Viola Spolin, Augusto Boal, Winifred Ward, Jerry Grotowski, and Jacob Moreno.

Shakespeare on the Stage

Cummings, Scott T

Fall 2024

William Shakespeare wrote his plays to be performed. Consequently, the most effective method of understanding his work is through performance. Lectures will describe the condition of Elizabethan England and its theatre, providing a larger social and historical context in which to view the playwright and his work. The class will read, analyze and discuss some ten to twelve Shakespearean plays, including his comedies, tragedies, history plays, and the so-called problem plays. Students will also be expected to perform scenes from Shakespeare's plays, not to show off their acting skills, but rather as a means to explore how each play works.

It's Not a Moment it's a Movement: BIPOC Plays for the 21st Century

Mohler, Courtney

Fall 2024

In this course, students will analyze dramatic scripts, performances, and manifestos created by BIPOC dramatists and theatre makers of the 21st century. Lectures, group work, writing assignments, and in-class discussions will explore how theatre can offer insight into the most salient challenges facing our world. Focusing on new North American works, students will read plays that address racism, police brutality, sexism, queerphobia, climate change, gun violence, classism, and xenophobia. Of equal importance, many of the plays we will read will also imagine more equitable futures, offer solace of community, and create space for liberation. To understand the significance of the playwrights' thematic and stylistic choices, we must understand the cultural and political contexts in which they write. To this end, we will critically engage with selected historical and contemporary commentary that illuminate key aspects of the works.

Theatre Production Lab I: Scenery Run

Evans, Catrin

Spring 2025

The Theatre Production Run Labs will introduce students to the skills necessary to rehearse and perform the technical duties needed to produce a stage production. Through actual hands-on practice, students will be allowed to develop their abilities in the areas of theatre production related to scene shifting, prop running, rigging, and performance needs. Students will work on a departmental production during the semester. The work that students do on that production will vary by student and will be determined by the needs of the production and may evolve during rehearsal. Students may do multiple labs in a semester but they must be in different areas.

Theatre Production Lab II: Dramaturgy

Mohler, Courtney

Spring 2025

The course will be based on the practical application of Dramaturgy Basics: THTR2240. The major emphasis is on the practice and application of the art and science of dramaturgy. Students will apply the knowledge of Dramaturgy Basics to a Theatre Department production. Students will implement typical dramaturgical tasks and receive guidance and feedback on their execution. More importantly, the lab will frame the dramaturgical point of view so students will be able to effectively navigate the role in production. Over the course of the semester students will work on: Script selection and analysis, production dramaturgical research and response, in rehearsal practice and protocol, audience contact, program notes, lobby display and talk backs, new play development, building a theatrical season, and civic engagement.

Theatre Production Lab III: Assistant Stage Manager

Traub, Adele N

Spring 2025

Every department production has two or more assistant stage managers. These students help the stage manager to run rehearsals and are in charge of backstage during performances. ASMs must be at many of the regular rehearsals and at all of the technical and dress rehearsals and performances for the show that they are assigned. ASMing counts as a one credit lab. While it takes a little more time than other labs, you learn how all the theatrical pieces of a show fit together. This lab requires department permission; however, there are no majors only restrictions and no experience is necessary to assistant stage manage a show.

THTR104901**Advanced Production Lab: Stage Manager****Traub, Adele N****Spring 2025**

Once students gain experience as an assistant stage manager, they may advance to the two credit Stage Management lab. The stage manager works alongside the director on a production and is in charge of organizing rehearsals, communicating with the production team, and running performances. Stage managers plan each rehearsal with the director, create rehearsal schedules, keep track of blocking, costume and prop needs, and distribute rehearsal reports to theatre staff and designers. Stage managers are assigned at the end of the previous academic school year to stage manage one of the six Theatre Department productions. This lab requires department permission and significant production experience. Stage managers at BC work alongside students and professionals alike and are considered leaders within the department.

THTR112301**Ballet: Pointe II****Takaishi, Amane****Spring 2025**

Prerequisites Pointe I or pointe experiences that are equivalent to Pointe I. Students with no pointe experience may be permitted to take the course after talking to the instructor. More details are described below. This course counts as an additional course required for dance minors, but it is also excellent for dancers who aspire to work on pointe toward the intermediate level. Also, students without pointe experience prior to the course are welcome to take the class on flat shoes and may go on pointe during the warm-up at the barre. The course aims for all students to expand on technique, increase artistic expression, and build knowledge of ballet terms. The class structure is divided into three parts: the first part of the class includes warming up on the barre, such as roll-ups and sous-sus, chapp, and pas de bourree. The second part of the class, which takes place in the center, is to work on some intermediate pointe techniques, such as chans and piqu turns. The last part of the class focuses on learning the choreography of ballet repertoires to develop artistic expression as a performer. In addition to in-class physical activity, the course does require small reading and writing assignments, such as study tasks, a mid-term assignment, and a final paper.

Credits: 1**Room and Schedule:** Brighton Dance Studio;Tu 12:00 Noon-12:50PM**Satisfies Core Requirement:** None**Prerequisites:** None**Corequisites:** None**Cross-listed with:** None**Frequency:** Periodically in the Fall**Student Level:** Undergraduate**Comments:** None**Status:** Offered**THTR112601****Ballet II****Takaishi, Amane****Spring 2025**

This course is designed for beginners, but all levels are welcome to refine details of the ballet technique, which are essential for Ballet III and Ballet IV. The goal of the course is to work on essential ballet skills, such as proper posture and correct placement of arms, legs, and head. During barre exercises, which are dedicated to building strength and improving flexibility, students accomplish the accurate alignments of ballet positions. This training complements center practice, which is followed by traveling exercises across the floor. Training longer phrase of exercises contributes preparing students to learn choreography of ballet repertoires; a solo variation and a group dance from classical ballet, such as the Sleeping Beauty.

Elements of Stagecraft

Burgess, Quinn M; Evans, Catrin; Tiala, Crystal

Spring 2025

This course is required for theatre majors and minors, but it is also open to interested non-majors by permission. Minors please get permission from Theatre Department for registration. Elements I introduces the history, theory, and practice of technical theatre production through lectures, discussions, observation and hands-on experience. The class consists of two paths of learning. The first will be practicing the necessary skills for the preparation of scenery, props, costumes and lights. Students will be required to learn to safely rig scenery, use many power tools, hang and focus lighting equipment, and cut and stitch fabric. The second path develops literacy in the visual design elements as it applies to theatre and theatrical spaces. A number of exercises will expand your visualization and creative skills. Required for Theater Majors and Minors.

THTR113201

Ballet IV

Takaishi, Amane

Spring 2025

This course is designed for students at advanced level. Ballet I, II and III are recommended to take prior to the course. The aim of the course is to improve ballet technique and performance skills at advanced level. The course focuses on details of technique, including maintaining turnout in transition steps as well as the main steps. Some of the advanced technique, such as fouett turns are introduced. In terms of performance skills, learning a group dance and a solo variation from ballet repertoires, such as *Le Corsaire* and *Don Quixote*, provides an opportunity for dancers to interpret ballet steps through their artistry.

Acting III- Meisner Technique

Riggin, Patricia

Spring 2025

Acting III explores the essential principles of acting using the methods developed by Sanford Meisner and William Esper. Through a progression of structured improvisations, the actors ability to work moment by moment and to truthfully live in those moments is developed. These exercises are designed to stimulate impulses, sharpen concentration and listening skills, and develop the imagination, spontaneity and emotional skills of the actor. During the semester, students apply the expertise acquired through these exercises to scene work.

Fashion and Decor: A Cultural History

Burgess, Quinn M;Tiala, Crystal

Spring 2025

Trends in fashion and interior decoration simultaneously shape and are shaped by the culture from which they grow. When we look at styles of a particular period, we see reflections not just of personal taste, but also social values, political and economic developments, influence of popular culture, new technology, and the overall mood of the period. Through lectures, discussions and visual research projects, this class will examine trends in fashion and décor as they relate to the cultures of the eighteenth, nineteenth, and twentieth centuries, highlighting the correlation between fashion, decorative arts, architecture, and interior design.

THEO142001

The Everlasting Covenant: The Hebrew Bible

Kimmel, Joseph

Summer 2024

The Hebrew Bible/Old Testament has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the Hebrew Bible raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of texts from the Hebrew Bible in terms of the central concerns of the core curriculum will be the primary goal of THEO 1420 The Eternal Covenant: The Hebrew Bible. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143001

Buddhism and Christianity in Dialogue

Petillo, Louis M

Summer 2024

This course is both an introduction to Buddhism and to Buddhist-Christian comparative learning. In early weeks we study concepts and practices of Theravada and Zen Buddhism from Southeast and East Asia. We then explore some areas of Christian thought that can be compared with Buddhism--understandings of faith, God, Jesus, sin, spiritual rebirth, sacramentality, and social ethics. Finally, from Buddhist and Christian perspectives, we focus on one or more of the following topics: spiritual practices of deepening care and discernment, faith-based action, interfaith learning, ecology, and/or feminism. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

Credits: 3

Theology Courses: Fall 2024

THEO108801

Person and Social Responsibility I

Troxell, Mary S

Fall 2024

Enrollment limited to freshmen, sophomores, and juniors The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

Perspectives on Western Culture I/Perspectives I

Cronin, Kerry M

Fall 2024

Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

Fall 2024

Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

Peaceful Conflict Resolution Methods

Edwards, Stephanie C

Fall 2024

This course considers conflict resolution methods in several different types of contexts: personal and family, organizational and work, and international peace-making. Among the methods analyzed and practiced in role playing exercises are: methods for resisting win-lose behaviors, methods for developing win-win solutions to conflicts, dialogic methods for developing creative solutions to conflicts, and third party facilitation, mediation, and arbitration methods. Personal skill development as well as careers in conflict resolution are explored. In addition, different types of personal philosophical and spiritual approaches to conflict resolution are considered.

THEO136101

Praying Our Stories

Ponsetto, Daniel P

Fall 2024

Significant experiences of God's presence are often thought of as extraordinary. They are moments we might expect while on retreat, during community worship, or while sitting under the stars. We might assume that to find God we must transcend our mundane life and get to another place. This course will explore how God is in fact more likely, and thankfully, discovered in the ordinary. Ignatian spirituality does not distinguish between secular and sacred, work and prayer, or God and "real life." Instead, it is about finding God in our lived experience and cooperating with God to transform that experience.

God, Self, and Society

Steichen, John D

Fall 2024

The purpose of this course is to introduce students to the dynamics of theological reflection in an academic setting. Framed as a quest for truth, transformation, and justice, the course invites students to explore key questions and themes of enduring human significance in conversation with the classic texts, ideas, and practices that animate the Christian theological tradition. Such questions include: What is theology? What is the ultimate horizon of our lives? What does it mean to be human? Who is Jesus Christ? And how can we know and serve the common good? Satisfies Core requirement for: Theology (Christian Theology)

THEO142002

The Everlasting Covenant: The Hebrew Bible

Vos, Daniel J

Fall 2024

The Hebrew Bible/Old Testament has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the Hebrew Bible raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of texts from the Hebrew Bible in terms of the central concerns of the core curriculum will be the primary goal of THEO 1420 The Eternal Covenant: The Hebrew Bible. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

This course is both an introduction to Buddhism and to Buddhist-Christian comparative learning. In early weeks we study concepts and practices of Theravada and Zen Buddhism from Southeast and East Asia. We then explore some areas of Christian thought that can be compared with Buddhism--understandings of faith, God, Jesus, sin, spiritual rebirth, sacramentality, and social ethics. Finally, from Buddhist and Christian perspectives, we focus on one or more of the following topics: spiritual practices of deepening care and discernment, faith-based action, interfaith learning, ecology, and/or feminism. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

Hinduism and Christianity in Dialogue

Cornille, Catherine M; Navarette, Jess

Fall 2024

It has been said that to know one religion is to know none. In this course, we seek to gain an understanding of two of the major world religions, Christianity and Hinduism, through a comparative and dialogical approach of the ways in which these traditions have come to terms with some of the basic existential questions and religious aspirations of humanity. We will focus on conceptions of evil and salvation/liberation, on ritual practices, ethical principles, and their respective views of one another. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143301

Chinese Religions and Christianity in Dialogue

Zeng, Qi

Fall 2024

This course asks foundational questions about the nature of the divine, the human, and the relationship between the two. What is the nature of ultimate reality? How did the world and all in it come to be? Are human beings naturally moral or must we learn how to be good? What is the full capacity of human being? We shall ponder answers to these questions and more by putting selected Biblical and Christian texts in conversation with selected Confucian, Daoist, and Buddhist texts from the Chinese literary canon. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

Spiritual Exercises: Engagement, Empathy, Ethics

Robinette, Brian

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take MUSA1701 with this course. How might we train for encounters with beauty and the sacred? One objective of these linked courses is to help students realize that their own personal experiences can be the departing point for -- and even the subject of -- scholarly inquiry, that theology, the arts, and philosophy are not mere disciplines to be learned but practices that are indispensable to being alive and serving the common good. Another aim is for students to realize that deeply meaningful experiences -- whether of the true, the beautiful, and the good, or the divine in the world and in one's self -- often don't just happen. Instead, such experiences are usually the result of being situated in the right place and time with the right preparation and mindset; in other words, they are usually the result of a certain type of exercise.

A Life of Virtue: The Wisdom of the Judeo-Christian Tradition

Petillo, Louis M

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take PHIL1729 with this course. What does it mean to be virtuous and why does it matter? These courses will consider what it means to be virtuous and how that contributes to living a flourishing life. Both courses begin with ancient texts -- the Bible and writings of Plato and Aristotle -- and introduce students to foundational ethical and religious notions of virtue. Each course, in its own distinctive manner, will invite students to think about how notions of virtue relate either to famous literary figures (Philosophy course) or to the works of later philosophers and theologians (Theology course). The texts of Plato and Aristotle will serve as a point of connection between the two courses.

THEO211401

When Gods Begin Again: Intro to African and African Diaspora Religions

McElwaine, Michelle L

Fall 2024

This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yorùbá and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santería, Brazilian Candomblé, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

The Challenge of Justice

Pope, Stephen J

Fall 2024

This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

THEO229101

Philosophy and Theology of Community I

Sweeney, Meghan T

Fall 2024

This seminar explores the nature of community, with particular focus on community in the American context. Some of the central historical, cultural, political and religious forces that have shaped both American community and the American understanding of community are examined. These questions are initially approached from an historical perspective with an assessment of philosophical ideas which were dominant in the political thinking of the American founders. The seminar then considers the historical development of those ideas in light of the way they are concretized in political practice, arriving at an assessment of contemporary American thinking on community. As a course in the PULSE program, service is required for this course. Satisfies the following distribution requirement(s) for Philosophy: Ethics & Values.

Living Truthfully: Way to Personal Peace and Social Change

Penna, Anthony

Fall 2024

The primary purpose of this course is to examine the proposition that it is better to tell the truth than tell the lie. Too often, we are tempted to live out an illusion. The personal and social costs of keeping an illusion pumped are steep. Personal peace and courage are born when we settle in on the truth of our identity and dare to live it. In short, this course proposes that the larger life is possible when we come home to the smaller life that defines us as individual women and men.

THEO355701

Catholicism and Social Responsibility

Heyer, Kristin E

Fall 2024

This course explores the tradition of Catholic social thought and in its theoretical and lived forms. It probes the theological and moral foundations of social responsibility and the relationships between the church and civil society. It investigates the implications of the traditions core commitments (including human rights, solidarity, the option for the poor, liberation, the common good) for contemporary questions of justice. It attends to the ways structural inequalities and harmful ideologies impact the courses applied ethics topics (e.g., racialized violence, migration, labor rights, and food justice). Finally it considers growing edges of the tradition in need of development.

THEO361501

Orthodox Christianity in Global Context

Prodromou, Elizabeth

Fall 2024

Orthodox Christianity has emerged as a subject of worldwide interest largely within the current context of Russias war in Ukraine, yet Orthodoxys 2000-year history and global scope extend far beyond the present historical conjuncture. This seminar uses social science and historical approaches, insights from policy experts and faith leaders, to provide a broad introduction to Orthodox Christianity in global context. The seminar explores internal and external factorsgeopolitical, institutional, and religious that help to explain scholarly neglect and policymaking unfamiliarity with an ancient faith tradition and that elucidate Orthodoxys responses to issues of pluralism, human rights, war, and peace.

After Wrongdoing: Justice or Mercy?

Pope, Stephen J

Fall 2024

This undergraduate seminar focuses on theological and ethical responses to wrongdoing, particularly those characterized by justice and those characterized by forgiveness. We will examine the meaning of forgiveness, the significance of repentance, the debate between conditional vs unconditional accounts of forgiveness, the ethics of revenge, the traits of legitimate punishment, the possibility of self-forgiveness, the moral legitimacy of anger and resentment, the relevance of the psychology of forgiveness to the ethics of forgiveness, and the meaning of political forgiveness. While focusing primarily on Christian texts, we will also examine Jewish, Muslim, and secular feminist accounts of forgiveness.

THEO442901

God, Power, and Politics in the Bible

Vanderhooft, David

Fall 2024

The course will analyze the close, perhaps inseparable, relationship between biblical ideas about God and ideas about the institutions of local and international government (mainly in the Hebrew Bible or Old Testament). A basic assumption is that the spheres of politics and theology were inextricably linked in ancient Israel, as they were in other cultures of the ancient Near East. The focus in the course will be on the biblical communities during the eras of the great empires of the first millennium B.C.E.: Assyria, Babylon, Persia, and Greece. We will ask, for example, what the relationship was between God and King, between rulers and subjects, between power and justice, and between imperialism and religion. In each case, answers or hypotheses will emerge from close reading of select biblical and non-biblical texts.

Women and Gender in Islam

DeLong-Bas, Natana J

Fall 2024

This course explores women and gender roles in Islamic history, civilization, and societies, beginning with the pre-Islamic period and continuing through the present. The goal is to present women and womens issues as central to the main narrative of Islamic history, rather than as a side story. This course explores questions related to both historical and contemporary religious interpretation and practice, Sunni, Shia and Sufi, as well as the impact of religion and gender constructs on womens access to the public sphere, positions of leadership, and legal status.

Sexualities and Spiritualities

Weiss, James M

Fall 2024

Can you be Queer and spiritual? Trans or non-binary and religious? Straight, hooking up, and Catholic? Can you combine pleasure and piety? Of course you can. But how? This course surveys progressive thinkers examining the close relationship of sexuality, gender, the body, and spirituality. We look at evolving views of marriage and single life. We reflect on sexual violence. We ask how traditional religion distorts or supports these issues. Catholic, Protestant, and Episcopal authors explore developments and disagreements! -- that nurture authentically spiritual sexuality. The aim is to promote understanding and care for self and others. Graduates and undergraduates welcome.

Mahayana Buddhism: Thought and Practice

Vale, Matthew

Fall 2024

This course explores Mahayana Buddhist thought, meditation practice, narrative, and ritual practice across Asia. We consider texts ancient and modern. After a basic introduction to Buddhism, we take up topics ranging from meditation, to compassion, nirvana, emptiness, Buddha nature, Zen, and Mahayana Buddhist ethics. Our focus is on fundamental theological questions: What are the causes of suffering? How can meditation and ethical practices illuminate sufferings causes, and put an end to them? What is the state of unconditioned awareness, freedom, and joy that lies beyond suffering? Most importantly, what does this all have to do with me? No background in Buddhism is required.

Revolutionaries, Diplomatic Theology, and Catholic Missionaries: Challenges in Twentieth-Century China

Carbonneau, Robert Edward

Fall 2024

This is a survey course. Each of these three groups challenged the witness of Catholicism in China since 1900. Understand how American ambassadors, business and military interests responded to Chinese political and social change. Learn how they then enabled zealous and adventurous Catholic missionaries to balance their dual identity as American citizens as well representatives of the Pope in Rome to preach the Gospel and provide social relief as China quested stability amid decades of war. Discover how the Nationalists led by Chiang Kai-shek and the Communists inspired by Mao Zedong responded to and tested the resolve of these missionary foreigners. After 1949, the focus shifts to see how the U.S., the Holy See, and international Chinese Catholics have had to renegotiate their participation pertaining to religious freedom and human rights in China till the present day. No background on Chinese history is required. Theology, history, political science and international relation students are welcome.

Communities of Knowledge: Explorations in Theology and Philosophy of Science

Ulishney, Megan Carol

Fall 2024

This course brings the disciplines of Theology and Philosophy of Science into constructive dialogue. The course will explore key themes that lie at the intersection of both of these disciplines such as the following: the function of communities and social contexts in shaping the construction of knowledge, the role of experience in knowledge production, the nature of evidence, definitions of laws of nature, the nature and function of explanation, the possibility of assessing theories, the use of models, and the entanglements of theology and science with values and ethics.

Patristic Greek I

Schatkin, Margaret

Fall 2024

This course is continued in the spring as THEO5373 New Testament Greek II. This two-semester course is designed for the student with no previous knowledge of ancient Greek to develop reading and translating skills in Patristic Greek language by mastering the fundamental principles of Greek grammar and syntax and acquiring a basic reading vocabulary. The student becomes familiar with the meaning of Greek words, their forms and structure, and their customary arrangement in sentences. A secondary goal of this course is to serve as a foundation for further studies in Patristic Greek.

Sacraments and Art

Bergin, William N

Fall 2024

Much of our artistic heritage was commissioned to embellish places of worship and to deepen understanding of the ceremonies celebrated there. These works of art offer often-ignored insights into Christian sacraments that complements more traditional theological approaches. This course seeks to deepen our appreciation of Christian sacraments by acknowledging painting, sculpture and architecture as a locus theologicus. Both historical and thematic in approach, it explores sacramentality, incarnation, iconoclasm, typology as well as selected themes from sacramental theology. The course will include off-site visits.

Biotechnologies, Health, and Theological Ethics

Vicini, Andrea, SJ

Fall 2024

In dialogue with scientists, philosophers, and theological ethicists, the doctoral seminar examines current advances in developing scientific disciplines and studies their ethical challenges for health and society by relying on theological ethics. After reflecting on biotechnology in general, in its two parts the seminar focuses, first, on biotechnologies that directly affect human health by considering human genetics (genetic information, research, testing, screening, editing, therapy, pharmacogenomics, and enhancement), stem cell research, regenerative medicine, oncofertility, and neuroscience. Second, the seminar studies new biotechnologies that indirectly regard human health: synthetic biology, nanotechnology, cybertechnology, robotics, artificial intelligence, transhumanism, posthumanism, and astrobiology.

Global Politics, Political Theology, and Ethics

Wambui, Nelly Wamaitha

Fall 2024

This course will employ decolonial critiques, African theology, and liberation theology to examine politico-economic inequality and conflict in the world today. The class will analyze international human rights, international law, and international development and how these structure relations between the colonized and their colonizers. We will engage Kwok Pui Lan, Musa Dube, Walter Benjamin, Johann Baptist Metz, Eboussi Boulaga, Jon Sobrino, Chinua Achebe, and WEB Du Bois among others to critically examine the work of theology in global politics - highlighting the connections between political theologies and material realities of inequality and conflict today while exploring the possibility of decoloniality.

Reading Romans in the Early Church

Hunter, David G

Fall 2024

St. Paul's Epistle to the Romans has been a central text in the history of Christian theology. This seminar will take a close look at a series of early Christian commentaries on Romans from Origen of Alexandria in the 3rd century to Augustine of Hippo and Theodoret of Cyrrhus in the 5th century. Key themes to be covered include: the relation of Jews and Gentiles, justification by faith, the law of nature and the Torah, the problem of sin and salvation, and the place of political authority. Additional commentators to be examined: Ambrosiaster, John Chrysostom, and Pelagius.

THEO729101

Moral Agency

Heyer, Kristin E

Fall 2024

This course explores the topic of moral agency through texts in theological ethics treating autonomy, human rights, conscience, and sin. It also incorporates interdisciplinary literature that considers ways in which agency is impacted by social practices, structures, and cultural norms. Case studies will be incorporated to consider how concrete social questions may impact standard understandings of autonomy and agency and the influence of nonrational factors on human freedom.

Theology of Religions/Comparative Theology

Cornille, Catherine M

Fall 2024

This seminar will focus on the various theological positions which have been developed with regard to the reality of religious pluralism as well as on the relationship between theology of religions and comparative theology. While we will focus mainly on the works of Christian theologians, we will also pay attention to analogous developments in other religious traditions.

Theology and the Mystical Turn

Robinette, Brian

Fall 2024

This seminar explores the wide-ranging apophatic mood in contemporary thought and the diverse ways mystical theology has come to occupy a central role in recent reflection upon God. In addition to examining the role of contemplative practice in the work of philosophical and systematic theology, the seminar inquires into relationship between negative theology and the incarnation, as this relationship uniquely characterizes Christian apophysis.

THEO800801

New Testament Textual Criticism

Roth, Dieter T

Fall 2024

The academic study of the NT requires a text of the NT for that study. This course, therefore, seeks to provide foundational competencies in the knowledge of NT manuscripts, the history of the discipline of textual criticism, and the creation and use of modern critical editions. At the same time, the contemporary field of NT textual criticism is concerned with far more than merely the (re)construction of the NT text. Thus, the course will also consider recent scholarship on early Christian scribal culture, manuscripts as early Christian artifacts, and the theological significance of textual variants. Must be proficient in NT Greek.

Credits: 3

Old Testament and Ethics

Davis, Andrew R; Keenan, James F, SJ

Fall 2024

The purpose of this course is to explore the intersection of the Old Testament and moral theology. Each week we will examine a theme that is significant in both fields, and we will consider how each field informs our understanding a given theme and its application in ministry. While we will be attentive to the different approaches of our respective fields, we will be focus on the ways that biblical studies and moral theology can work together for more effective service rooted in faith.

Perspectives on Western Culture II/Perspectives II

Cronin, Kerry M

Spring 2025

Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

THEO109118

Perspectives on Western Culture II/Perspectives II

McLaughlin, Christopher J

Spring 2025

Freshmen only The course introduces students to the Judeo-Christian Biblical texts and to the writings of such foundational thinkers as Plato, Aristotle, Augustine, Aquinas, Luther, Bacon, Descartes, Hobbes, Locke, Kant, Hegel, and Kierkegaard. The first semester considers the birth of the self-critical Greek philosophic spirit, the story of the people of Israel, the emergence of Christianity and Islam, and concludes with a consideration of medieval explorations of the relationship between faith and reason. Attention will also be paid to non-Western philosophical and theological sources.

God, Self, and Society

Kozee, Barbara A;Mendoza-Alvarez, Carlos

Spring 2025

The purpose of this course is to introduce students to the dynamics of theological reflection in an academic setting. Framed as a quest for truth, transformation, and justice, the course invites students to explore key questions and themes of enduring human significance in conversation with the classic texts, ideas, and practices that animate the Christian theological tradition. Such questions include: What is theology? What is the ultimate horizon of our lives? What does it mean to be human? Who is Jesus Christ? And how can we know and serve the common good? Satisfies Core requirement for: Theology (Christian Theology)

THEO142001

The Everlasting Covenant: The Hebrew Bible

Nelson, Sadrack;Vanderhooft, David

Spring 2025

The Hebrew Bible/Old Testament has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the Hebrew Bible raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of texts from the Hebrew Bible in terms of the central concerns of the core curriculum will be the primary goal of THEO 1420 The Eternal Covenant: The Hebrew Bible. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

The New Testament has been an influential and often fundamental source for many modern, Western views of God, nature, human beings, a just society, and the origin and destiny of humanity and the world. An intelligent, serious reading of the New Testament raises most of the enduring questions that have traditionally stood at the center of philosophical and theological debate. Thus, a thorough analysis of texts from the New Testament in terms of the central concerns of the core curriculum will be the primary goal of THEO 1421 Inscribing the Word: The New Testament. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143001

Buddhism and Christianity in Dialogue

Hartnell-Howden, Tiffany L

Spring 2025

This course is both an introduction to Buddhism and to Buddhist-Christian comparative learning. In early weeks we study concepts and practices of Theravada and Zen Buddhism from Southeast and East Asia. We then explore some areas of Christian thought that can be compared with Buddhism--understandings of faith, God, Jesus, sin, spiritual rebirth, sacramentality, and social ethics. Finally, from Buddhist and Christian perspectives, we focus on one or more of the following topics: spiritual practices of deepening care and discernment, faith-based action, interfaith learning, ecology, and/or feminism. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

Hinduism and Christianity in Dialogue

Bannon, Richard B

Spring 2025

It has been said that to know one religion is to know none. In this course, we seek to gain an understanding of two of the major world religions, Christianity and Hinduism, through a comparative and dialogical approach of the ways in which these traditions have come to terms with some of the basic existential questions and religious aspirations of humanity. We will focus on conceptions of evil and salvation/liberation, on ritual practices, ethical principles, and their respective views of one another. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

THEO143301

Chinese Religions and Christianity in Dialogue

Pino, John Ryan

Spring 2025

This course asks foundational questions about the nature of the divine, the human, and the relationship between the two. What is the nature of ultimate reality? How did the world and all in it come to be? Are human beings naturally moral or must we learn how to be good? What is the full capacity of human being? We shall ponder answers to these questions and more by putting selected Biblical and Christian texts in conversation with selected Confucian, Daoist, and Buddhist texts from the Chinese literary canon. Satisfies Core requirement for: Theology (Sacred Texts and Traditions)

Building a Habitable Planet: Theological Perspectives

DeLong-Bas, Natana J

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both EESC1701 and THEO1703. How have religion and science shaped our understanding of the origins of the Earth, its evolution into a habitable planet, and our human relationship with it? Providing both Christian and Islamic perspectives, this course explores our planet and the evolution of life. Students will also examine the scientific method and the tools of geology, geochemistry, and geophysics used to unlock the history of the Earth from its beginnings.

THEO211401

When Gods Begin Again: Intro to African and African Diaspora Religions

Abimbola, Michelle Ajisebo Mcelwaine

Spring 2025

This introductory course examines Indigenous African and African Diaspora religions from an interdisciplinary perspective. We explore Yorùbá and other African religions, along with African Christianity, Islam, Haitian Vodou, Cuban Santería, Brazilian Candomblé, Sango Baptist of Trinidad and Tobago, Rastafari and Obeah of Jamaica, Black American conjure, and Oyotunji Village. Important themes of religions in Africa and the Afro-Atlantic Diaspora are addressed, such as: the veneration of God(s), Spirit(s), Ancestors, and the natural world; divination, initiation, sacred space, and healing; the impact of slavery on conversion and continuity; fetish as a colonial construct; globalization, race, gender, and power. Ultimately, this course encourages students to reevaluate their understanding of Africana religions, recognize diverse cultural practices and ritual knowledge systems, and engage with oral, written and audio/visual texts that underscore the values of these traditions.

The Challenge of Justice

Snyder, Joshua R

Spring 2025

This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

THEO224101**Roman Religion****Eshleman, Kendra J****Spring 2025**

The Romans lived in a world full of gods; religion affected every part of Roman life, from politics to warfare to entertainment. Christianity took shape within this world, and Roman religion, especially the mystery cults, has often been regarded as a model for the early church. Yet the Roman concept of 'religion' has very little in common with modern, Judeo-Christian-influenced notions. In this class we will explore the theory and practice of religion in the ancient Roman world, as reflected in ancient literary texts, as well as in epigraphic and archaeological evidence. Themes include the nature of Roman worship, from state cult to magic and mysteries, the interplay between religion and politics, and the development of Christianity in its pagan context.

THEO225401**Introduction to Jewish Culture and Civilization****Sienkiewicz, Matthew S****Spring 2025**

This course may be used to satisfy one of four electives required within the Communication major. This course introduces students to the study of Jewish culture and civilization and serves as the gateway course for Boston College's Jewish Studies minor. The course is divided into three core sections: core Jewish texts and beliefs, Jewish geography and languages, and Jewish cultural production. The course presumes no previous knowledge of the subject matter and welcomes students from every discipline. Objects of study will range from the Hebrew Bible and the Talmud to Ladino music, Superman comics, and Seinfeld. The course will feature guest lectures from across Boston College's Jewish Studies faculty and will include off-site learning opportunities ranging from trips to museum exhibitions to dinner at an area kosher restaurant.

Perspectives on War, Aggression, and Conflict Resolution I

Johnson, Spencer K

Spring 2025

The Faith, Peace, and Justice Program at Boston College sponsors this course as an introduction to the field of Peace Studies.. This course asks: Is it ever ethical to go to war? Is it possible to be ethical in war? And, what does ethical conflict resolution look like? This course investigates these questions primarily using the resources of the Christian theological tradition and the social sciences, as well as engaging with philosophy and film. Special attention will be paid to issues in contemporary warfare and the challenges and promises of peacebuilding.

Capstone: One Life, Many Lives

Weiss, James M

Spring 2025

Capstone classes cannot be taken Pass/Fail. You may take only one Capstone class before graduation. This Capstone is designed for students who have engaged in service projects during college and want to reflect on that as they plan their future lives. The service projects may have been through BC (Pulse, 4Boston, Arrupe, service trips, etc.) or on their own in Boston, the U.S., or abroad. Please contact Fr. Weiss to enroll: weissj@bc.edu or 617 552 3897.. This course gives you the chance to review what you have made of your education and preview your long-term life commitments to work, relationships, community, and spirituality. We read fiction, psychology, sociology, and wisdom figures to find the deeper continuity underlying our many experiences. Students lead discussions, conduct interviews of working people, and cap off their Capstone by writing their own autobiography.

U.S. Catholics: The Old Faith In A New Land

Massa, Mark, SJ

Spring 2025

An undergraduate course focused on the Catholic community in the United States, studying both the "lived religion" of ordinary Catholics in the pews and the important theological contributions of American theologians. The course is organized thematically rather than chronologically, looking at both the ways in which Catholics developed their unique identity within the community, and the ways in which the community as a whole related to the larger culture.

Black Church Black Protest

Adkins, Amey

Spring 2025

"This ain't yo mama's civil rights movement." Then whose is it, what fuels it, and why? Taking the urgency of the #blacklivesmatter movement as a point of departure, this course considers the theological premise and political role of the "Black Church" in U.S. social movements for liberation. From the slave rebellions of the antebellum South to the religious icons of the Civil Rights Movement, this course focuses on reading and writing that centers African American religious experience--as well as understandings of morality, power, intersectional identity, and leadership--to contextualize the moral investments along the continuum of movements for black lives.

Asian American Catholics: A Journey of Faith and Theology

Carbonneau, Robert Edward

Spring 2025

This survey course reveals how Japanese, Chinese, Korean, Vietnamese and Filipino Catholics theologies have contributed and have been shaped by the American experience. What have been the common and unique influences of immigration, justice and peace from the 1800s till the present day? Each brings established traditions of family, food and sacred rituals that still enrich their liturgical celebrations. Their recognized spiritual gifts are seen in Marian devotion and their saints. As a result of their cross-cultural domestic and international witness these Asian Americans are acknowledged as esteemed leaders, theological, and pastoral contributors in all aspects of contemporary American Catholicism.

THEO310201

The Historical Jesus

Roth, Dieter T

Spring 2025

Jesus is undoubtedly one of the most significant figures in history; however, who was Jesus? Though the doctrinal affirmations of Christianity seek to answer this question from the perspective of theology and faith, ever since the Enlightenment, some scholars have sought to present an answer from the perspective of history. This course considers both the history of historical Jesus studies and contemporary trends in the discipline in order to come to a greater and deeper appreciation of this important, and often controversial, aspect of the ongoing academic study of Jesus.

Hunter, David G

Spring 2025

The first five centuries witnessed the intensive growth of the Christian tradition, which manifested itself in the development of an organizational structure (clergy and hierarchy), intricate doctrines and statements of belief (creeds), a variety of forms of worship and sacramental practice (liturgies), a scriptural canon that include both Old and New Testaments (Bible), as well as a host of other moral and spiritual traditions that have shaped Christianity down to the present day (martyrdom, monasticism, and celibacy). This course offers an overview of the early church with special attention to its ancient context and its multifaceted developments.

THEO310401

Do Robots Have Souls?

Kruger, Matthew C

Spring 2025

Do robots have souls? Probably not. But this course thinks its a good question, and therefore explores our fundamental thinking of technology and the ways in which it overlaps with religious and philosophical thinking of animal, inanimate object, technical object, and human. The philosophic core is found in the work of Gilbert Simondon, Martin Heidegger, and Nishida Kitaro, focusing particularly on Simondons re-envisioning of the relationship between religion and technology through art and philosophy. After this core, we turn to art, movies, and novels, to explore transhumanism, posthumanism, the threat of AI, and the possibility of human and machine harmony.

THEO311701

Love and the Human Condition

Robinette, Brian

Spring 2025

This course introduces students to classic texts and themes related to human and divine love. Through a careful study of primary texts, both in theoretical and narrative formats, the course is designed to promote extensive classroom conversation and written reflection as we consider forms of love such as affection, friendship, erotic attraction, and agapeic service. Other important themes that will emerge in our study include: freedom, rivalry, suffering, death, beauty, conversion, heroism, and vocation. By situating the dynamics of human and divine love in this way, the course offers an opportunity to reflect upon the meaning of the human condition.

THEO320001

Engaging Interreligious Leadership

DeLong-Bas, Natana J

Spring 2025

This course engages the quest for meaning, purpose, and practical skills in interreligious engagement, building upon material learned in one of the Core courses that brings Christianity into dialogue with another tradition toward the goal of developing models of ethical interaction between religious traditions, people and experiences. Rooted in recognition that engaging religious diversity is a necessary component of training for global citizenship in the contemporary world, the course offers multiple perspectives on interreligious encounters in a variety of fields that can serve as opportunities for collective engagement toward common goals and purposes, as well as a source of conflict and violence when managed poorly, particularly in the context of other political and socio-economic concerns. The course provides theoretical background in framing interreligious engagement within the field of interreligious studies, followed by identification of best practices and community-based initiatives rooted in case studies recorded in print literature, the media, and films, and concludes with students formulating their own case studies. Topics addressed include: strategies for crafting and facilitating interreligious meeting spaces, including in education, medicine, the business world, and the public square; the role of religious identities, gender dynamics, race and racism in interreligious environments; interreligious encounters in culture and the fine arts; developments in interreligious dialogue; interreligious cooperation in addressing environmental and social justice concerns; and engagement of religions as tools for conflict resolution.

Immigration and Ethics

Heyer, Kristin E

Spring 2025

This course entails an interdisciplinary examination of contemporary immigration with a primary focus on the U.S. context. Texts from social scientific, legal, and policy perspectives frame the phenomenon of contemporary migration. Theological and philosophical texts, along with PULSE placement experiences, illuminate ethical assessments of immigration practices. Special attention will be given to Christian anthropology and ethics as resources for analysis as well as the role of gender in matters of migration and citizenship.

The Ethics of Global Public Health and the Common Good

Vicini, Andrea, SJ

Spring 2025

Global public health is both an urgent good and a needed right that is integral to a vision of just society. The course studies, first, the ethical issues raised by global public health (from epidemics and pandemics to poverty and underdevelopment); second, the ethical approaches to address them (from rights to the common good); third, concrete solutions and praxes. International examples from Africa, Asia, Europe, and the Americas help to identify the ethical agenda and to implement it. The course's readings, analyses, and proposals engage: health sciences, anthropology, social sciences, philosophical and theological bioethical discourses, and social doctrine by considering, among others, Catholic and Protestant contributions.

THEO501601

Christians Reading the Qur'an

Welle, Jason

Spring 2025

This course examines various trends and methodological approaches by which Christians have interpreted the Qurn. The semester begins by surveying premodern trends, including Qurn translations, privileging primary sources when possible. Most of the course concentrates on 20 th and 21 st century engagement with Islams sacred text, including debates about orientalism and postcolonial theory. Theological questions include general discussions of whether and how Christians may consider the Qurn revealed and/or inspired along with focused discussions of particular passages of pertinence to Christian comparative theology. Knowledge of Arabic beneficial but not necessary; all required readings exist in English translation. Cross-listed in ICSP.

THEO520101

Christian-Jewish-Muslim Scriptural Reasoning

Ochs, Peter

Spring 2025

Abrahamic Scriptural Reasoning (SR) is a practice of fellowship and study among Muslims, Jews, and Christians, practiced by dozens of groups in the Americas, Europe, Middle East, South Asia, and East Asia. While SR began in an academic setting, it expanded into a civic, community practice. In the course, we first address scriptural study and commentary in the individual traditions, with readings about biblical and quranic commentaries in their historical contexts. Then we study the history and methods of Abrahamic SR, readings in the Journal of Scriptural Reasoning and additional writings on the theory of SR. Each class begins with small-group studies in and across the borders of Jewish, Christian, and Muslim interpretive traditions. Toward the end of the semester, we ponder broader issues: What is Scripture? What is commentary? And what of tension and conflict among Abrahamic communities: does scripture play a role in inter-religious conflict? In its repair?

How Israel Matters

Langer, Ruth

Spring 2025

Israel, both the people and the land, are central to Jewish theology as concrete manifestations of Gods covenants. This course will explore the evolving meanings of these concepts from the Bible to today, looking at themes like peoplehood, life in the land, exile from it, and (messianic) return. The second part of the course will focus specifically on the theologies of a range of modern Jewish thinkers, with the goal of helping students to understand aspects of contemporary Israel and its meaning to world Jewry.

Patristic Greek II

Schatkin, Margaret

Spring 2025

This two-semester course is designed for the student with no previous knowledge of ancient Greek to develop reading and translating skills in Patristic Greek language by mastering the fundamental principles of Greek grammar and syntax and acquiring a basic reading vocabulary. The student becomes familiar with the meaning of Greek words, their forms and structure, and their customary arrangement in sentences. A secondary goal of this course is to serve as a foundation for further studies in Patristic Greek.

THEO559901

A Theology of Food: Eating, Drinking and the Eucharist

Bergin, William N

Spring 2025

Eating and drinking are primordial human experiences that nourish individuals, sustain communities and are at the heart of rituals in many religions. In the Judeo-Christian tradition meals play an important part in the unfolding dialog between God and humanity. Christians believe in a privileged encounter with the Lord Jesus in the Eucharistic meal of bread and wine. Eternal life is portrayed as a great banquet in God's presence. This course articulates a theology of the Eucharist that takes meal as its point of departure. It examines how this central Christian action both shapes the divine-human relationship and informs our response to contemporary issues such as creation and ecology, hunger and suffering, solidarity and exclusion, hope and eternity.

Science-Engaged Theology: Gender, Sin, Beauty

Ulishney, Megan Carol

Spring 2025

In 2018, Science-Engaged Theology (SET) emerged as a new model for doing work at the intersection of theology and the sciences. In this course, we will examine earlier models of interdisciplinary engagement that SET critiques and seeks to revise, the conditions under which SET arose, and the reception of SET since 2018. In addition to developing an understanding of the significance of SET as a new mindset for theologians, the course will also discuss recent examples of science-engaged theology, focusing in particular on theologies of gender, sin, and aesthetics that are in conversation with the sciences.

Cyril of Alexandria, Later Christology

Magree, Michael C, SJ

Spring 2025

The understanding of Christ in the early centuries of Christianity was an important expression of conviction and ecclesiology. In six weeks this course will examine how Christ was understood in the writings of St. Cyril of Alexandria, and then in a second six weeks we will examine Cyrils theological legacy in Churches that accepted the council of Chalcedon and in those that did not. Leontius, Severus, Maximus and John Damascene are the major writers to be examined in the later weeks. Methodologies will include intellectual history, social-critical analysis, and theological judgment with attention to normative dogmatics and ecumenism.

THEO706001

Symbols and Narratives of Redemption

Mendoza-Alvarez, Carlos

Spring 2025

Rethinking the sacramentality lived by the people of God in the context of the 21st century implies reviewing the theoretical framework of signs and symbols of human language, particularly Christian, in the midst of the debris of modern instrumental rationality. Following Wittgenstein and Austin with the linguistic turn, the theory of performativity makes more complex the analysis of the oral, visual and conceptual narratives by which the human condition is celebrated in diverse cultures as the site of divine redemption. This graduate course will explore, from fundamental Christian theology, the symbolism of the good (la symbolique du bien, proposed by Paul Ricoeur), incorporating the lens of critical and decolonial thought to think redemption as performativity of resistance and re-existence experienced by the survivors of systemic violence as a life of the Spirit that emerges from existential and systemic peripheries, with diverse forms of narratives and rituals of combative performativity.

Hebrew Exegesis of the Dead Sea Scrolls

Gillihan, Yonder

Spring 2025

This course begins with exegesis of the Hebrew text of the three "Rules" found in the Qumran caves and in the Cairo geniza: the *Community Rule* (1QS), the *Rule for the Congregation* (1QSa), and the *Damascus Rule* (CD). We will also survey passages from other sectarian texts devoted to interpretation of scripture and history, esp. the *pesharim*. Students with ability to read Aramaic will read selections from the Aramaic DSS that complement the Hebrew texts, and all will read the entire corpus of non-biblical mss. in English translation.

Late Medieval Mystical Traditions

Coolman, Boyd

Spring 2025

This course will explore the influence of the Pseudo-Dionysian corpus on late medieval descriptions of the human-divine relationship. In particular, it will analyze in detail (in both the original Latin and in English translation) the use and interpretation of Dionysian mystical theology in the writings of Hugh of St. Victor, Thomas Gallus, Bonaventure, Hugh of Balma, and the author of the Cloud of Unknowing."

THEO827001

From Just War to Peacebuilding

Cahill, Lisa;Pope, Stephen J

Spring 2025

The focus of this course will be contemporary theological ethics and just war, and the recent peacebuilding trajectory. We will compare and assess different theological commitments grounding positions on war and peace, and on Christian political ethics generally. To be included are "just war" developments in the Augustinian and Thomistic traditions, and philosophical perspectives on forgiveness and restorative justice. We will consider nonviolent strategies to resolve conflict, including perspectives from conflict zones and the global South. Specific problems such as women and war, humanitarian intervention, nuclear weapons, and land mines and cluster munitions will be addressed.

THEO967001**Methods in Theology**

Wilkins, Jeremy

Spring 2025

In the late 1960s, Karl Rahner asserted that theology's new partners in dialogue were the human and social sciences. Increasingly in answering new and perennial questions, contemporary theology has partnered with archaeology, sociology, cultural studies, psychology, world religions, and forms of critical theory. This course considers various methods in doing theology as well as some of theology's significant dialogue partners.

OTE First Year Success Seminar

Bell, Karl

Summer 2024

MUST have completed OTE Program in the previous summer. The First Year Success Seminar will take place in the fall semester of every year, and will provide OTE Summer graduates with supplemental information on both the Thea Bowman AHANA and Intercultural Center and other Boston College resources, in-depth coverage of certain topics through interactive workshops, readings, videos, and group discussions. The First Year Success Seminar will also serve as the primary mode of communication between students and BAIC staff. Students can expect to participate in workshops presented by various organizations in the BC community focused on stress management, budgeting, time management, financial literacy, and effective studying techniques.

Innovation through Design Thinking

Gaudette, Glenn R

Summer 2024

Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

Raposa, Tara

Fall 2024

This course is open to sophomores, juniors and seniors in the Morrissey College of Arts and Sciences, Woods College of Advancing Studies, and Applied Psych majors within the Lynch School of Education. Please note that this course is not open to freshman. In this hybrid course (combination of in-person and online sessions), students who are exploring their career interests will use self-assessment exercises, lively discussion, and thought-provoking activities to identify and reflect upon their values, interests, and skills and then connect them to career options. Using a design thinking framework, students will explore the eight skills that are most desired by employers and discover how they are developing those competencies during their time at BC. We will discuss ways to research varied career paths and learn targeted strategies to achieve meaningful professional goals. Students who are considering such questions as In what academic discipline do I want to major? What kind of internship do I want to pursue? What sort of careers am I interested in? will all benefit from this course.

Peaceful Conflict Resolution Methods

Edwards, Stephanie C

Fall 2024

This course considers conflict resolution methods in several different types of contexts: personal and family, organizational and work, and international peace-making. Among the methods analyzed and practiced in role playing exercises are: methods for resisting win-lose behaviors, methods for developing win-win solutions to conflicts, dialogic methods for developing creative solutions to conflicts, and third party facilitation, mediation, and arbitration methods. Personal skill development as well as careers in conflict resolution are explored. In addition, different types of personal philosophical and spiritual approaches to conflict resolution are considered.

MacEvoy, Sean P

Fall 2024

This Gateway Advising course is taught during both the Fall and Spring semesters for Freshmen. Gateway allows students to persevere within the STEM majors, explore various careers and paths, and develop a sense of community at Boston College. The Gateway Program is designed to help prepare students to take the next step toward their professional development.

UNAS171601

From Hiroshima to K-Pop: Historical Perspective

Hwang, Ingu

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take UNAS1717 with this course. What is the relationship between politics and popular culture? How did East Asia emerge from the wreckage of the Second World War to become the dominant political, economic, and cultural force it is in the world today? What is the relationship between politics and popular culture? Since 1945, East Asia has experienced the Cold War, civil war, communist revolution, modernization, capitalism, democratization, and economic booms and busts. It has also become a powerhouse producer of popular and art cinema. In these paired courses, students will explore the relationship between politics and culture as they learn how historians and filmmakers have grappled with the tumultuous events of the past 75 years.

Real Estate and Urban Action: Transforming Communities and Increasing Access to Opportunity

McCullagh, Neil P

Fall 2024

This is a Complex Problem course and is open to FRESHMEN only. You must take ECON1704 with this course. This course explores concepts of social, economic, and racial inequality with a focus on the interaction between housing, labor markets, and the ultimate accumulation of wealth. Housing will be examined through a study of the history of affordable housing, an exploration of the transformation of Columbia Point Public Housing Development to Harbor Point, and an applied simulation. Labor markets will be explored at the theoretical level (e.g., labor supply/demand, human capital, discrimination) before diving into data and literature on how changes over the last 40 years have expanded inequality. The course will conclude with how the lack of both affordable housing and quality labor market opportunities can interact to restrict intergenerational wealth accumulation and opportunity. Through field projects, simulations, and a practical final project, the course will challenge students to explore and test solutions for transforming distressed communities into safe, desirable neighborhoods that produce better outcomes for all residents.

Why Do the Wicked Prosper?: Portraits of Good and Evil in Literature

Michalczyk, Susan A

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take FILM1702 with this course. Why do the wicked prosper? At the heart of so many stories told through the centuries, the question: "Why do the wicked prosper?" remains without an answer, as authors and artists offer endless interpretations, lessons with or without morals, to an audience eager for explanations. Students will have opportunities to study narratives of heroes and villains, and reflect upon the ways in which writers influence how we think about good and evil in the world, how we react to the unfairness we see happening around us, and how we come to terms with our own choices and understanding of the complexities of human nature.

Climate Change and the Corporation: Risks, Rewards, and Responsibilities

Carter, Mary Ellen

Fall 2024

This is a Complex Problem course and is open to FRESHMEN only. You must take EESC1704 with this course. Climate change is a complex, existential threat to humanity, manifesting in heat waves, droughts, wildfires, and flooding. Corporate America is a contributor to climate change through greenhouse gas emissions. In addition, corporations are impacted by climate change as it threatens their physical assets and their ability to supply goods and services. Through an integrated approach that blends scientific analysis of climate change with case studies of corporations, students will learn the science behind climate risk and study how businesses are managing and communicating to stakeholders both the impacts of climate change on the firm as well as the firm's impact on the environment.

POD Leadership Seminar for Climate Change and The Corporation

Carter, Mary Ellen;Pisani Gareau, Tara

Fall 2024

POD Leaders for EESC1704/UNAS1733 Climate Change and the Corporation are juniors and seniors who are academic and social mentors for first-year students enrolled in this core Complex Problem course. POD Leaders meet weekly with faculty to create lesson plans and co-facilitate a weekly reflection section for first-year students in the course. Students enrolled in this seminar will gain knowledge of the interactions between climate change and businesses as well as skills in collaboration and group facilitation. This leadership seminar provides opportunities to grow academically and professionally. Interested students should reach out to the faculty of EESC1704/UNAS1733.

Utopian Imaginings: Separatist Experiments

Tupelo, Ethan

Fall 2024

This is an Enduring Question course and open to FRESHMEN only. You must take both ENGL1741 and UNAS1736. How do we create a just society? Utopia, a word derived from Greek and literally translating to no place, has, since the sixteenth century, come to mean an ideal, perfect society. While utopias thus may seem to exist only as imaginary spaces, separatist groups throughout history have experimented with turning them into realities, communalizing land and resources. In these paired courses, students will examine the contexts, motivating ideologies, and social structures of a series of these attempts as well as literary texts that spawned and responded to them. Following reflection on the successes and failures of these endeavors as ways of life, social experimentation, and lasting legacies, students will exercise collective imagination in envisioning a just and hopeful future by designing their own utopian communities.

Intro to Programming using Swift for iOS App Development

Gallaugh, John M

Fall 2024

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). The course assumes no programming background, but students with some experience will likely have an easier time. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course was formerly numbered: ISYS2160.

Physical Computing - Interactive Art, Robotics, and Tech for Good

Gallaugher, John M

Fall 2024

Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates. This course was formerly numbered: ISYS2170.

Ethical Design for Social Impact

Antonaccio, Cara;Bhattacharya, Sunanda

Fall 2024

What makes design ethical? By exploring the real-world factors and practical circumstances in which ethical design emerges, this course will consider the ethics of how people make and rely on the products that play a decisive role in our experience of the modern world. Our examination of theoretical approaches to designs social impacts, our discussion of case studies that illuminate designs role in the pursuit of social justice, and our reflections on our own responsibility to design things ethically will provide a comprehensive picture of the conditions that both catalyze and thwart ethical design. Students will leave this course with concrete ideas for how they might play consequential roles in developing ethical designs that positively impact society.

Community Advocacy and Research Engagement

Abowd, Thomas P

Fall 2024

CARE is a two-semester course (SOCY 3254/3255) that offers leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In fall, students in SOCY3254 learn the process of community-based research and its methodologies, and begin to design a proposal for an independent study for spring. In the Spring, students sign up for SOCY3255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

McGillycuddy-Logue Fellows Senior Seminar

Wells, Celeste C

Fall 2024

The course is restricted to a cohort of students who have participated in the broader McGillycuddy-Logue Fellow's program.. This course is the culmination of the McGillycuddy-Logue Fellows Program. It is intended to help students reflect and expand upon their experiences in the program, including both academics and service. The final product of the course will be an electronic book, to be made available to the Boston College community and beyond via O'Neill Library's Open Access system. Each student will contribute a chapter dealing with a global policy issue of particular interest and relevance to them.

Design for Impact

Bhattacharya, Sunanda;Whitcavitch-Devoy, Julia

Fall 2024

Design for Impact is a course on application of a design-driven and innovation mindset to explore, analyze, and help solve complex real-world challenges using human-centered, multi-perspective, inclusive approaches. Students and their supervisors from Boston College, NC State, Virginia Tech, Wentworth, and Clemson work together on fall term Design for Impact projects. Teams work from an interdisciplinary lens including architecture, psychology, engineering, business, education, industrial design, environmental studies, and other fields to attend to various real-world problems and issues.

Cross Currents Seminar: Thinking About Race

Bell, Karl; Mashmasarmi, Denise

Fall 2024

The Cross Currents: Thinking About Race seminar explores the concept of race; the effects of race on individuals; the presentation and negotiation of race in society; and the role of race at Boston College. The topics covered in the course are not only important, but also complex and provocative. The seminar is an opportunity to have candid conversations with others who are also exploring race and its effects in society. The seminar will help develop your understanding and intellectually through discussions with other students.

UNAS333201**Cross Currents Seminar: Thinking About Economic Inequality and College Student Life****Howell, Burton****Fall 2024**

This seminar will look at the consequences of economic inequality in the lives of high financial need undergraduates studying at elite universities. Students will apply what they are learning in other classes to daily campus life. We will ask questions about the challenges of thriving at an affluent institution. The class includes readings from memoirs of low income students at Princeton, Vassar, Saint Michaels, Stanford, and Boston College. This course is recommended for Montserrat students.

Cross Currents Seminar: Thinking about Resilience

Cobb, Reshauna;Razek, Matthew

Fall 2024

Thinking about Resilience is a seminar course designed to provide students an opportunity to learn about, and explore, the quality of resilience through an approach which creates a space for students to develop their own competencies in this area. The following building blocks of resilience will be incorporated into each class meeting: active coping, building on strengths, and cultivating connections. The seminar format will allow for students to learn about resilience, while engaging in activities and dialogue designed to move students from theory to practice.

Designing Your Career: An Exploration Course

McBarnett, Yvonne M

Spring 2025

This course is open to sophomores, juniors and seniors in the Morrissey College of Arts and Sciences, Woods College of Advancing Studies, and Applied Psych majors within the Lynch School of Education. Please note that this course is not open to freshman. In this hybrid course (combination of in-person and online sessions), students who are exploring their career interests will use self-assessment exercises, lively discussion, and thought-provoking activities to identify and reflect upon their values, interests, and skills and then connect them to career options. Using a design thinking framework, students will explore the eight skills that are most desired by employers and discover how they are developing those competencies during their time at BC. We will discuss ways to research varied career paths and learn targeted strategies to achieve meaningful professional goals. Students who are considering such questions as In what academic discipline do I want to major? What kind of internship do I want to pursue? What sort of careers am I interested in? will all benefit from this course.

Innovation through Design Thinking

Rutirasiri, Chokdee R

Spring 2025

Would you like to be innovative in whatever you pursue? Innovation is about solving important and complex problems to create value for the greater good. Innovating through design thinking is a structured, human-centered process for creatively solving problems, which can be adopted by anyone. In this foundational course we will introduce the mindset, process and methods at the core of design thinking. Students will see inspiring case studies, hear from cutting edge practitioners, and work on a project to internalize this learning. Students will discover design thinking is a practical toolkit that helps them reliably innovate in the face of changing social needs, business disruptions, and technology shifts.

Global Ethics and Pragmatic Solidarity

Estelrich Barcelo, Bartomeu

Spring 2025

This interdisciplinary seminar offers participants an opportunity to critically reflect upon selected philosophical and social scientific readings and their lived experiences towards understanding multiple local and global systems and structures that give rise to and sustain social injustice. Specifically, you will begin by exploring your social positions at the intersection of 'race,' gender, social class, sexuality, ethnicity, language, abilities, etc. You will develop criteria for understanding the multiple local and global contexts in which you live towards exploring options for taking actions alongside individuals and communities directly affected by social injustices. You will also explore how action-reflection processes can contribute to clarifying your self-understanding and social position vis-à-vis each other and those with whom you act locally and globally.

Perspectives on Art II: Art Into Life: Episodes in Modernity

Epstein, Thomas

Spring 2025

This literature course, paired with the second semester of Perspectives on Art (PHIL 1602), will explore the complex relationship between life and art, between art, ideal and ethics, and between tradition and innovation. Ranging over a wide variety of genres, from poetry to drama, short story to novel and on to cinema, the course will center on the emergence, development, and decline of an artistic consciousness called modern. Attention will be paid to artistic form as well as to historical, psychological, political, and philosophical contexts. Readings will include selections from Byron, Dostoevsky, Melville, Chekhov, Woolf, Kafka, O'Connor, and Sebald.

Life, Liberty, & Health: Policy, Politics, & Law

Chirba, Mary Ann

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both ECON1702 and UNAS1702. Why is healthcare so interconnected with policy, law, and economics? Recently, health has become a central focus of political infighting, public discord, and personal worry. Healthcare and health insurance now dominate everything from think tanks to Jimmy Kimmel Live! Meanwhile, concussions go up, NFL ratings go down, drug prices soar, and opioid abuse damages individuals, families, the healthcare system, and the economy. Such complex issues are best understood through interdisciplinary study. These paired courses will introduce basic principles of economics, law, and public policy through the lens of contemporary problems involving enduring questions of government authority and individual autonomy, morality and ethics, social justice, and human rights.

War and Peace: Historical and Literary Experiences

Epstein, Thomas

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both HIST1727 and UNAS1715. How does War and Peace speak through its historical context and as a description of a perennial human situation? War and Peace is a great and massive novel. Its primary subject, the effect of the Napoleonic Wars on Russia, may seem distant from our contemporary concerns. Yet its fundamental questions - "How shall I live and what is worth dying for? Is war a necessary evil, or something greater, or different? How does our social-historical experience construct our identity?" - are as relevant today as ever. Approaching these and other questions from our separate disciplines, we will attend both to the historical and literary context in which War and Peace was written and to the ways it speaks to us today.

The "Other" Americans: Representation and Reality in Asian America

Tran, Anthony D

Spring 2025

This is a Complex Problem course and is open to FRESHMEN only. You must take both HIST1621 and UNAS1729. Asian American history is American history. It is simply not possible to understand why the United States looks the way it does today without understanding the roles American interactions with Asian nations and people have played in the development of U.S. society. Despite being key figures in immigration, trade, and foreign policies and domestic contests around race, class, gender, and sexuality, Asians in America are continuously (un)seen as the "Other" Americans. This course will explore the history and mediated representations of Asians in the U.S. to understand how U.S. society has constructed Asians in America and how Asian Americans have sought to speak for themselves. By analyzing primary sources, films, television, and digital media - as well as producing their own media based on historical materials - students will critically engage with U.S. history as both historians and media producers to examine the complex ways Asian Americans have shaped America itself.

Reckoning with Incarceration: Biological Perspectives

Black, Jessica M

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both COMM2183 and UNAS1734. How do stories concerning justice, retribution, and rehabilitation shape the physical, mental, and social health of individuals? These paired courses will examine how the universal needs of justice and safety are institutionalized by legal, social, health, and cultural fields, and how victims, perpetrators of crime, and the families of both come to understand them. One course will explore the stories and unequal impacts of the retribution versus rehabilitation design of the U.S. incarceration model, while the other course will examine how experiences like toxic stress, social exclusion, and poor sleep impact physical and mental health on a biological level and throughout the lifespan.

UNAS173703

From Charity to Justice: Transforming Approaches to Poverty in Political Economy

Giraud, Peter

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both UNAS1737 and ENGL1742. Why does poverty persist and how can we remedy it? In an individualistic society such as ours, poverty is often framed as a personal failing. In these paired courses, however, we will look at some of the systemic factors, notably capitalism, as mechanisms that create and sustain a poorer class of people. We will also consider how poverty complicates narratives of markets as fostering progress and individual freedom. If freedom for some requires the regimentation and exclusion of the many, is it genuine progress? By examining enduring accounts of poverty, we will explore its origins as a mass phenomenon, consequences for civic bonds, and influence on political participation. In addition to making poverty visible, literary texts will also demystify the complex nexus of factors that produce poverty and inhibit true progress. Understanding what causes poverty is the first step in alleviating the suffering of the poor, so that everyone has the right to a life of dignity and fulfillment.

Consensus and Conflict in Democracy

Giraud, Peter

Spring 2025

At a time of heightened political polarization, this class turns to the classic political theories of consensus and conflict to consider which kinds of polarized disagreement undermine the functioning of democracy and which are necessary for democratic progress. It is often suggested that democracies require citizens to have special solidaristic commitments to one other, commitments that override local and cosmopolitan loyalties. In this view, it is important to find a shared sense of belonging so that there can be a people that meaningfully rules. Yet another perspective suggests that contestation and organized disharmony are defining features of democratic life. This course asks: what is the relationship between consensus and conflict in democracy?

UNAS216501

Intro to Programming using Swift for iOS App Development

Gallaugh, John M

Spring 2025

In this fast-paced course, students will learn the Swift programming language and iOS app development skills. Using a "flipped-classroom" approach, the students take lectures in a series of online videos embedded in a web-based course/reference/quiz book, following along with videos as they learn programming concepts and build apps. Although this is a flipped class, expect a challenging course. Class is mandatory (this is NOT an online course) and class time will be used for additional exercises, concept review, and student questions. Students are required to bring a fully-charged Mac laptop to each class with the latest version of Apple's free Xcode software installed (make sure you have access to a Mac that meets these requirements before enrolling). The course assumes no programming background, but students with some experience will likely have an easier time. Students should be prepared to spend significant time each week on self-directed learning and regular programming projects. This course was formerly numbered: ISYS2160.

Physical Computing - Interactive Art, Robotics, and Tech for Good

Gallaugh, John M

Spring 2025

Low-cost microcontrollers, sensors, and computing devices like the Raspberry Pi make it possible to create technical projects that humans can physically interact with. This course assumes no prior programming experience but will progress quickly through block-based MakeCode programming, then CircuitPython programming so that all students have coding knowledge necessary to create hardware projects. Students will purchase an amount of hardware and tools similar to the cost of books in a standard course, and we'll use these parts to build a series of projects that control lights, read sensors, produce sound, respond to touch and app control, capture camera images, and more. We'll also build a wheel-based robot, and students will have an opportunity to create and present several original projects and share their work with classmates. This course was formerly numbered: ISYS2170.

Data Visual Communication

Mitchell, Leila L

Spring 2025

How might we apply principles and techniques of graphic design to effectively communicate informational data to specific audiences? The course will introduce the language of visual communication encompassing gestalt, fundamental elements of 2D design, graphic design principles such as typography, layout and composition, along with an understanding of different data types, their functionalities and how to represent them. Through practical applications, students will learn how to utilize hierarchy within data presentations for specific audiences. Students coming into this course will need prerequisite knowledge of the design thinking process to understand the user audiences mindset and their level of visual literacy to enhance the quality of purposeful communication. Hands-on activities using manual and digital tools are integral to this course.

Community Advocacy and Research Engagement

Abowd, Thomas P

Spring 2025

CARE is a two-semester course (SOCY 3254/3255) that offers leadership, research, and public policy training for students interested in working with Latino, Asian American and/or African Diaspora communities. In fall, students in SOCY3254 learn the process of community-based research and its methodologies, and begin to design a proposal for an independent study for spring. In the Spring, students sign up for SOCY3255 in conjunction with a Readings and Research to conduct their projects. The Spring seminar complements the R&R serving as a forum for students to discuss their research and continue to develop their oral presentation skills.

Cross Currents Seminar: Thinking About Race

Bell, Karl;Mashmasarmi, Denise

Spring 2025

The Cross Currents: Thinking About Race seminar explores the concept of race; the effects of race on individuals; the presentation and negotiation of race in society; and the role of race at Boston College. The topics covered in the course are not only important, but also complex and provocative. The seminar is an opportunity to have candid conversations with others who are also exploring race and its effects in society. The seminar will help develop your understanding and intellectually through discussions with other students.

Claude, Phionna-Cayola;Lee, Philip T

Spring 2025

This seminar is designed for sophomore students in the Fr. Rutilio Grande, S.J. Intercultural Experience community. The Fr. Rutilio Grande, S.J. Intercultural Experience for sophomores is home to students who share a passion for exploring issues of diversity and social justice and becoming agents of social change. This community is for students who are committed to leadership development, and who see leadership as a collaborative process to promote social change. By participating in the seminar, students will have the opportunity to further develop their own leadership skills, explore their passions, and apply knowledge in order to have a positive impact on their community.

Cross Currents Seminar: Thinking about Intercultural Competency

Lowe, Patricia N;Nussbaum, Adrienne J

Spring 2025

Students entering the workforce today, no matter what profession or field of study, need to be equipped with the knowledge, skills, and attitudes to successfully interact with colleagues, clients, customers and communities who are different from themselves. This seminar will help students develop their knowledge and skills through intentional exposure to relevant theoretical materials, meaningful and structured interactions with diverse groups of people, and reflection on the impact of these experiences on their own identities and their relationships with others. Experience with domestic and international diverse populations will be explored.

Cross Currents Seminar: Thinking About Wellness

Amour, Chloe R; Kremer, Jeannine

Spring 2025

This course is designed to apply Health Promotion theory to enhance the physical, mental and spiritual well-being of college students. Students will be exposed to important health topics, national health guidelines, data, and key messages about stress and time management, mental health, healthy sleep, eating, and exercise habits, and decision-making around substance use. This seminar will enhance the student experience by discussing health behaviors, knowledge, attitudes, and skills to become healthier, grow as individuals, and impact the Boston College community.

Cross Currents Seminar: Thinking about Resilience

Davis, Caroline;Razek, Matthew

Spring 2025

Thinking about Resilience is a seminar course designed to provide students an opportunity to learn about, and explore, the quality of resilience through an approach which creates a space for students to develop their own competencies in this area. The following building blocks of resilience will be incorporated into each class meeting: active coping, building on strengths, and cultivating connections. The seminar format will allow for students to learn about resilience, while engaging in activities and dialogue designed to move students from theory to practice.

Global Public Health and the Common Good Courses: Summer 2024

PHCG121001

Public Health in a Global Society

Camp, Lindsey N;Hawkins, Summer S

Summer 2024

This foundation course presents public health as an interdisciplinary science focused on health promotion and disease prevention at the population level. The course provides an overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and emphasizes the collaborative nature of the field through examples in research and practice. An inherent principle in public health is advancing social justice and this course, and the public health sequence more broadly, focuses on at-risk populations, reducing health disparities, and improving health equity at the population level.

Global Public Health Law

Chirba, Mary Ann;Wirth, David

Fall 2024

This course will examine the critical role of law in creating and implementing social policy and achieving (or at least seeking) social justice. Through the lens of current global trends, it will study the ways in which laws and regulations operate to promote and protect--as well as impede--both individual and public health at the local, national, and international levels. Specific topics may include the following: global differences in the definition of health care as a human right, expanded trace in agricultural products, domestic threats to public health, anthropogenic organic compounds, and the integrity of resources of the global commons. This course is designed to instill the policy-makers of tomorrow with the active skill set necessary to grapple with new public health challenges as they arise.

Contemporary Issues in Public Health

Hawkins, Summer S

Fall 2024

This course provides students the opportunity to apply the foundational skills of public health to contemporary public health issues. The course integrates data and research to begin a more in-depth examination of the major burdens of disease and several emerging areas of concern. With a consistent goal of reducing health disparities, the course identifies population-level risk factors as well as evidence-based interventions for health promotion and disease prevention. Principles and concepts learned in Public Health in a Global Society are reinforced through specific health conditions, behaviors, and topics.

Health Inequities : Origins and Remedies

White, Michelle L

Fall 2024

Health Inequities: Origins and Remedies will explore the social, economic, historical and political factors that are responsible for differences in health between different groups of people. These include differences in disease prevalence, adult and infant mortality, and life expectancy. They are the result of unfair systems such as structural racism, economic discrimination and red-lining that negatively affect people's living conditions, access to healthcare, and overall health status. These factors are known collectively as the social determinants of health. They are manifestations of injustice. Students in this course must have taken PHCG1210 Public Health in a Global Society and PHCG2120 Introduction to Epidemiology.

The Law, Policy & Politics of Women's Health

Chirba, Mary Ann

Fall 2024

Although the practice of public health has always been political, the role of politics and political actors have taken center stage in today's U.S. healthcare system. In recent years, few issues have attracted more controversy and political rancor than matters of women's health. Some issues may seem intractable due to conflicting but sincerely held beliefs rooted in religion, ethics and morality. Other matters are more clear-cut. For many women, this sweeping and intensifying political discord has compromised their health status, and curtailed their social and economic resources along with their legal rights. Relying on their complementary expertise in social work and law, Prof. Hawkins and Prof. Chirba will guide students in understanding the importance of interdisciplinary study when confronting problems of individual and public health, particularly when it comes to women's health. Thus, students will learn to understand the ways in which social, cultural, economic, political and legal forces impede the health status of women across the life course, and more specifically, hamper women's access to health care that is appropriate, adequate and affordable. Students will then use their interdisciplinary training to evaluate how to develop sound social and economic policies to mitigate gaps across the healthcare continuum, and how to use law to implement such measures to protect women regardless of age, race/ethnicity or socioeconomic status.

Health and the Environment: People, Policy and Technology

Severnini, Edson R

Spring 2025

This course examines the relationship between health and the environment, focusing on how pollution, climate change, and ecosystem changes influence human health. Students will learn how these environmental factors impact public health and explore the roles of public response, policy, and technology in reducing health risks. The course is structured around three main components: Pollution and Health, Climate Change and Health, and Ecosystem Changes and Health. Through an interdisciplinary approach, students will engage with scientific research, real-world examples, and policy discussions to develop a comprehensive understanding of the links between health and the environment and address complex environmental health challenges.

Cancer Epidemiology

Straif, Kurt H

Spring 2025

Cancer is the second leading cause of death today in many countries around the world in the aftermath of the epidemiological transition. Globally, cancer incidence will increase from an estimated 18.1 million new cases in 2018 to 29.5 million new cases by 2040, with the majority of the increase expected in low- and middle-income countries. Cancer is not a single disease, but comprises a broad spectrum of diseases. This course will provide the student with a thorough understanding of the biology and classification of tumors, the global descriptive epidemiology of cancer incidence, mortality, and survival. No country can treat its way out of the rising global burden of cancer. Therefore global cancer control strategies must focus on primary and secondary prevention of cancer as the most effective response to these public health challenges. The first step in cancer prevention is to identify the causes of human cancer and to determine what works in cancer prevention. The aim of the course is to provide the student with the knowledge and skills to identify relevant cancer types, their established and suspected risk factors and established measures of primary and secondary prevention (screening) of cancer, globally, regionally, and nationally. Within and between countries the poor are often more affected by cancer, therefore cancer control must also aim to reduce the social inequalities in cancer.

The Ethics of Global Public Health and the Common Good

Vicini, Andrea, SJ

Spring 2025

Global public health is both an urgent good and a needed right that is integral to a vision of just society. The course studies, first, the ethical issues raised by global public health (from epidemics and pandemics to poverty and underdevelopment); second, the ethical approaches to address them (from rights to the common good); third, concrete solutions and praxes. International examples from Africa, Asia, Europe, and the Americas help to identify the ethical agenda and to implement it. The course's readings, analyses, and proposals engage: health sciences, anthropology, social sciences, philosophical and theological bioethical discourses, and social doctrine by considering, among others, Catholic and Protestant contributions.

Global Health: Theory to Practice

White, Michelle L

Spring 2025

In this course, students will take the theories and disciplinary practices learned in other global health courses and learn how to apply this knowledge in practical situations. A series of case studies describing real life global health programs, policies, and interventions will be used to present how many diverse disciplines were necessary to address complex public health programs. The case studies will also illustrate the importance of community-based and participatory methods in the day to day work of public health. Students will also assess the case studies to determine best practices and lessons learned from each case that they can then apply in their own future global health work.

Food Policy and Health

Longacre, Ashley

Spring 2025

What we eat isn't just an individual decision; it is influenced by food policy, an intersection of law, science, economics, the environment, national and international governance structures, biotechnology, and social advocacy. This course explores the layers of US (and some international) food policies that have shaped the current food system, along with the complex web of stakeholder groups involved in food policy design and implementation. Students will analyze and assess how the accumulation of food policy decisions-- internationally to locally-- impact the health and nutritional status of individuals and communities.

Biostatistics, Data Analytics and Quantitative Methods in Public Health

Longacre, Ashley

Spring 2025

This course covers descriptive and inferential statistics used in biomedical and public health studies, with emphasis on practice and implementation. Descriptive statistics, probability, basic hypothesis testing, ANOVA, and linear and logistic regression will be covered. Instruction in the use of statistical software will be provided throughout the course. Required prerequisite is PHCG1210 Public Health in a Global Society. PHCG2120 Introduction to Epidemiology is helpful to have taken previously, but not required.

Pandemics and Global Health Diplomacy

Rodrigues, Miguel C

Spring 2025

This course reviews successive outbreaks of infectious diseases on the scale of epidemics and pandemics, from BSE (Mad Cow Disease), SARS, Avian and Pandemic Influenza, and MERS-Cov, to Ebola, Zika, and the recently contained Covid-19 pandemic, with the view toward analyzing the political and public health responses, the expansions in global health response capacity, the development and implementation of the International Health Regulations, and global health diplomacy efforts such as the Global Health Security Agenda (GHSA) that helped countries prevent and respond to infectious disease outbreaks. The course will end with a discussion on the international Pandemic Agreement currently under negotiation, which is struggling to balance pathogen sample access and benefits sharing, two objectives of critical importance to the Industrialized West and the Global South respectively.

PHCG406001

Borderlands & Health Justice: Migration, Environment, and Indigenous Rights

White, Michelle L

Spring 2025

This experiential learning course focuses on the borderlands between the U.S. and Mexico, cutting across traditional indigenous lands. We examine the history, politics, policies, and challenges of the border and the borderlands region. Students employ a social justice lens to understand histories of nation-building; migration and immigration challenges; local Native rights issues; food, biodiversity and sustainability challenges; rural health delivery; the effects of extractive industry and the possibilities of restorative economy; and models of liberatory education honoring indigenous histories and knowledges. This course is built around a REQUIRED, PLACE-BASED TRAVEL EXPERIENCE OVER MARCH SPRING BREAK (typically 8 days from Friday Saturday) in the trinational space of the Sonoran Desert and Sky Islands region of southern Arizona, northern Sonora, Mexico, and the Tohono Oodham Nation. Students explore local landscapes and learn through dialogue with community partners. While we consider historical and contemporary challenges of the region, we also learn about innovative models of response based in local organizing. Ultimately, students apply a root-cause analysis to consider health in context, community challenges and assets, and the importance of community-driven models of development and justice. Finally, students will practice leadership skills for social change by developing and implementing an action plan to advance health justice in the context of their course learning. This is a Dept. Permission course. Please contact publichealth@bc.edu for more information. The mandatory trip component of this course carries an additional travel and program fee of approximately \$2,000. Financial assistance may be available.

Children's Health and the Environment

Landrigan, Philip J

Spring 2025

This course will provide students with fundamental understanding of the powerful influence of the environment on health and disease in children. It will enable students to understand why children are uniquely sensitive to toxic chemicals and other environmental hazards and how toxic exposures in early life can influence risk of disease across the life span. It will familiarize students with the major environmental hazards of our time, including lead, mercury, pesticides, and air pollution as well as with the links between the built environment, climate change, and children's health. Using case studies, it will explore the linkages between children's environmental health and social justice. It will conclude with a discussion of options and strategies for translating science to public policy to prevent diseases of environmental origin in children.

PHCG491101**Directed Independent Study in Global Public Health and the Common Good****Landrigan, Philip J****Spring 2025**

Students planning to enroll in Directed Independent Study should obtain guidelines from the Global Public Health office. Proposals must be submitted at least three weeks before the end of the semester prior to that in which the study will begin. This course provides an opportunity to engage in learning activities that are of interest beyond the required public health curriculum. Examples of learning activities may be, but are not limited to, research, internship, and experiential learning projects.

Cancer Epidemiology (graduate level)

Straif, Kurt H

Spring 2025

Cancer is the second leading cause of death today in many countries around the world in the aftermath of the epidemiological transition. Globally, cancer incidence will increase from an estimated 18.1 million new cases in 2018 to 29.5 million new cases by 2040, with the majority of the increase expected in low- and middle-income countries. Cancer is not a single disease, but comprises a broad spectrum of diseases. This course will provide the student with a thorough understanding of the biology and classification of tumors, the global descriptive epidemiology of cancer incidence, mortality, and survival. No country can treat its way out of the rising global burden of cancer. Therefore global cancer control strategies must focus on primary and secondary prevention of cancer as the most effective response to these public health challenges. The first step in cancer prevention is to identify the causes of human cancer and to determine what works in cancer prevention. The aim of the course is to provide the student with the knowledge and skills to identify relevant cancer types, their established and suspected risk factors and established measures of primary and secondary prevention (screening) of cancer, globally, regionally, and nationally. Within and between countries the poor are often more affected by cancer, therefore cancer control must also aim to reduce the social inequalities in cancer.

Working For and With Communities: Community Engaged and Project Based Learning for the Common Good

Bolton, Caitlyn;McCarty, Kaley

Summer 2024

This course is part of a two-semester course sequence with weekly spring meetings taught by faculty experts in community-engaged collaboration, project management, teamwork and leadership, and intercultural competence; and a three-week immersive in either Santiago, Chile or Zanzibar, Tanzania. During the three weeks, students will work on a community-identified project. Spring enrollment in SCHI3001 is required for participation in the Summer portion of the course sequence. Contact the Schiller Institute for more information.

Schiller Institute for Integrated Science and Society Courses: Fall 2024

SCHI302001

Integrating Science and Society: A Tale of Four Nobels

Huang, Jier;Ming, Yi;Tian, Hanqin

Fall 2024

To borrow a line from A Tale of Two Cities, It was the best of times, it was the worst of times. Hardly a day goes by without headlines about climate change, environmental degradation, socioeconomic inequality and policy failure. Yet the aspirations for a just, sustainable society and the rapid development of new technologies in renewable energy and AI offer hopes and business opportunities. One thing for sure is that what we choose to do (or not to do) at this particular juncture of history is bound to have long-lasting implications for many generations to come. This interdisciplinary course, to be co-taught by the core faculty members of the Schiller Institute, will focus on the intersection of climate science, sustainable growth, green technology and policy actions. It is designed specifically to provide students with a comprehensive, yet in-depth overview of the complex interrelationships between these four key areas and how they may interact to shape the future of our planet. The course is inspired partly by four recent Nobel Prizes (hence the title), which are in physics (2021), peace (2007), chemistry (2023) and economics (2018), and help anchor the main units. The first unit starts with an overview of the scientific evidence for climate change and its causes, as well as the current state of energy production, consumption and technology. In the second unit, students will then learn about the challenges and opportunities associated with transitioning to a more sustainable economy, nature-based solution to climate change. The third unit is devoted to state-of-art technology toward renewable energy. The fourth unit, composed mainly of a series of guest lectures, provides a review of the existing policy frameworks at local, national, and international levels, as well as the role of key actors such as governments, NGOs, industries and communities of faith.

Entrepreneurial Leadership in Energy, Environment and Health

Steinberg, Laura J

Fall 2024

This course is a one-credit professional development course featuring meetings with leaders of organizations who represent the Schiller Institutes mission to serve the common good, focusing on our three core areas: energy, environment, and health. These leaders represent start-ups, corporations, and entrepreneurial incubators. This course will offer opportunities for students in any Boston College major to develop an understanding of entrepreneurship, and skills in communication, business and networking while having unique opportunities to connect with leaders and innovators working on the cutting-edge of these fields. There may be opportunities for optional site visits during Spring Vacation.

**Working For and With Communities: Community Engaged and Project Based Learning for the
Common Good**

Thornton, Vaughn

Spring 2025

This course is the first in a sequence two courses: a 2-credit spring course and a 1 credit summer course. The spring course features weekly meetings taught by faculty experts in community-engaged collaboration, project management, leadership, and intercultural competence. The summer course consists of an intensive, collaborative, community-inspired project. This year's course offers two summer options: 1) A three-week immersive in Santiago, Chile where students work on a project related to energy, environment, and health with an NGO in the local community. 2) A continuation of our ongoing project in Zanzibar, Tanzania with in-country community partners, the State University of Zanzibar (SUZA), Blue Economy Ministry, and others. Professor Mary Khatib and students from SUZA will come to Boston to work collaboratively with our students in bringing to life recommendations outlined in policy briefs written by the 2024 Working For and With Communities team: local governance and educational solutions to Zanzibar's challenges around increasing tourism as well as social and climate change. Students must apply to participate in this course. Selected students will work on these projects in small interdisciplinary teams. For more information about the course and the application, please email Schiller.Institute@bc.edu. Note: This course sequence offers an in-depth opportunity to develop and apply specialized knowledge, and to engage in formative experiences motivating personal growth. Students will be required to enroll in both course sections (spring and summer). Unfortunately, seniors are not eligible to take this course.

Working For and With Communities: Community Engaged and Project Based Learning for the Common Good

Henriques, Carissa

Spring 2025

This course is a continuation of the Working For and With Communities course series, and is for students who have already taken SCHI 3001 and SCHI 3002. It provides students the opportunity to continue working on our ongoing projects with community partners in Zanzibar: the State University of Zanzibar (SUZA), the Blue Economy Ministry, and others. In summer 2025, Professor Mary Khatib and students from SUZA will come to Boston to work collaboratively with our students in bringing to life recommendations outlined in policy briefs written by the 2024 Working For and With Communities team: local governance and educational solutions to Zanzibar's challenges brought on increasing tourism as well as social and climate change. This course helps prepare students with the skills and knowledge they need to support these community-inspired projects. Contact the Schiller Institute for Dept. Health and the Environment: People, Policy and Technology

Severnini, Edson R

Spring 2025

This course examines the relationship between health and the environment, focusing on how pollution, climate change, and ecosystem changes influence human health. Students will learn how these environmental factors impact public health and explore the roles of public response, policy, and technology in reducing health risks. The course is structured around three main components: Pollution and Health, Climate Change and Health, and Ecosystem Changes and Health. Through an interdisciplinary approach, students will engage with scientific research, real-world examples, and policy discussions to develop a comprehensive understanding of the links between health and the environment and address complex environmental health challenges.

Christian Ethics Courses: Fall 2024

TMCE700801**Introduction to Catholic Social Ethics****Iozzio, Mary Jo****Fall 2024**

This course introduces the rich tradition of social ethics engaged explicitly by Leo XIII, *Rerum novarum* (1891), continued by his successors and bishops conferences, and enriched by theological reflection that continues today. Attention will be given to the principal documents (encyclicals, *Gaudium et spes* (1965), pastoral letters), and the contexts from which they emerged to gain facility in applying social analysis to contemporary concerns. Key themes to be studied: life and dignity of the human person, solidarity, social participation and the common good, the preferential option for the poor, and economic development and work, among others.

Virtue Ethics

Daly, Daniel J

Fall 2024

This course introduces the emerging field of Christian virtue ethics. The course begins with a study of the theological and philosophical theories of virtue that have shaped contemporary Catholic and Protestant accounts of virtue. Attention is given to the relation of virtue theory and the virtues to: the Gospels and the life of Jesus; the Christian community; theological anthropology; human happiness; the natural law; and moral norms. The course also discusses the academic and pastoral uses of virtue ethics through the examination of contemporary cases in light of the virtues.

Gender, Race, and Ethics

McRorie, Christina

Fall 2024

This course asks how critical reflection on gender and race challenges and may improve Christian conversations about God, faith, moral agency and obligation, culture, and social issues. It will begin by introducing students to feminist ethics, and to a range of methods and concerns that theologians and ethicists in conversation with this literature have addressed. It will then introduce students to the concerns and methods of womanist theologians and other scholars who complement this critical attention to gender with attention to race and ethnicity, as well as other aspects of personhood and social location. It will pay particular attention throughout to the varying conceptions of moral agency, moral obligation, and justice that are proposed by these literatures.

Relational Ethics

Iozzio, Mary Jo

Fall 2024

The course studies human sexuality in light of the contributions that come from human experience and human sciences, biblical scholarship, theological insights and debates, and the Catholic Magisterium. Personal dimensions (e.g., bodiliness, development, orientation, identity, affectivity), social components (e.g., gender, economic dynamics), and historical shifts will be highlighted. The anthropological, hermeneutic, and phenomenological approaches that will be privileged allow us to discuss behaviors and practices critically and to strengthen and promote virtuous and just relationships.

Catholic Social Teaching in Pope Francis? Era

Catta, Gregoire, SJ

Fall 2024

From Pope Leo XIII's *Rerum novarum* (1891) on, the social magisterium of the popes offers continuity in its proclaiming of the Gospel through addressing social, political and economic issues and newness because of changing contexts and specific accents of each pope. What continuity and newness can we find in Pope Francis' social teaching? In this seminar, we will read and discuss major contributions of the Argentinian pope on ecology, migrations, poverty, and social friendship. Putting them in perspective with those of his predecessors, considering their theological weight, and assessing their relevance for today's challenges, we will attempt to figure out the new impetus he gives to the long tradition of the Church's social teaching.

Call and Response: an Introduction to the Moral Life

lozzio, Mary Jo

Spring 2025

This course introduces the primary sources of the Catholic moral traditions from the Commandments and Beatitudes to the moral and theological virtues as a call and response to Christian discipleship. Attention will be given to the tradition's warrants aligned with moral thought and the philosophical traditions of the virtues and the natural law. Key subjects considered are freedom, authority, sin, conscience, and virtue as well as discernment of the ways to be in a world paradoxically coherent with and contrary to the invitation God extends to all, development of those skills and practices that contribute to growth as a moral agent, and recourse to the remedies of failures encountered along the pilgrim's way.

Social Sin, Responsibility, Accountability and Justice

lozzio, Mary Jo

Spring 2025

This course builds on Catholic social teaching found in the magisterial documentary history and brings the insights on social sin to bear on responsibility, accountability, and justice. Attention will be given to primary sources in light of the contemporary critique of abusive/sinful practices among persons with institutionalized power and authority exposed in anti-racist, post-colonial, and liberation thought. The course a) presents the common good as justice developed in these traditions, b) explores responsibility for the social, economic, educational, health, legal, and political status of vulnerable persons, and c) considers accountability by realizing the preferential option for the poor.

Health Care Ethics

Daly, Daniel J

Spring 2025

This course explores contemporary Catholic health care ethics. The course begins by examining the sources, methods, and influential documents of the Catholic medical ethical tradition. The syllabus traces the development of the tradition from the sixteenth to the twenty-first century. Prominent secular approaches in the field are studied as well. The course then takes up: (1) clinical, case-based medical ethics; and, (2) ethics at the institutional level. Applied topics include: abortion; access to health care and the distribution of medical resources; end of life ethics; mergers among Catholic and non-Catholic health institutions; and international recruiting of health care workers.

Antisemitism, Racism, and Christian Nationalism

Joslyn-Siemiatkoski, Daniel

Fall 2024

Events over the past decade have illustrated how antisemitism, racism, and Christian nationalism are intertwined ideologies. This course will offer a historical and thematic investigation into how these three ideologies emerge within Christian contexts, the ways in which Christian theologies and institutions inform them, and modes of resistance to them. A core outcome of this class will be to recover and generate theological positions that actively counter these ideologies.

New Testament Greek II

Kakavas, Maria

Spring 2025

The main objective of the course is to be able to read the New Testament in the original. This is the second part of the two-semester course where we will finish all Croy's lessons, provided that a good understanding and working knowledge of the material has been attained. We will cover a chapter every two class meetings, and the third meeting we will have a review, a quiz, and may introduce a new chapter depending on the progress. The students will be expected to master the basic grammar and most common vocabulary of the New Testament Greek, complete all assignments on time and participate actively in class.

Pilgrimage: History, Theology, and Actuality

Brouillette, Andre, SJ

Fall 2024

Pilgrimage is a phenomenon that has shaped Christianity from its inception to our days. The immense popularity of the Camino de Santiago de Compostela, in Spain, has generated numerous reflections in recent decades, as well as a flood of works, both popular and scholarly. Taking a large view, the course will explore the history and theology of the practice of pilgrimage, especially in its Christian dimension, but extend also to its actuality as a spiritual practice at the frontier of the institution (within and without), and linked to the narrative construction of the self. The scope of documents read will include historical documents, spiritual texts, Church documents, contemporary narratives and studies, as well as films.

Reforms and Reformations

Molvarec, Stephen Joseph, Society of Jesus

Fall 2024

Church reformers often harken back to a real or imagined pure or golden period at various times in the history of the Christian community and attempt to reform and direct the life of the Church based on that image. This course will examine significant episodes of reform in the Church from the early medieval period (6-9th centuries) until the present day. Notably, it will treat extensively the Protestant and Catholic reform(ation)s of the 16th-century, as well as the reform of the mid-20th century, but also the Carolingian Reforms and the Gregorian Reform, among others.

Discernment and Prayer in the Spiritual Exercises of St. Ignatius

Geger, Barton T, SJ

Spring 2025

This is a Graduate level online course. . A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius' Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius' treatment of prayer, discernment of spirits, and discernment of God's will, work together to form a "contemplative in action."

History of Western Christianity III: Catholicism from the French Revolution to Vatican II

von Arx, Jeffrey

Spring 2025

What John O'Malley, S.J. calls the Church's "long nineteenth century," from the French revolution to the 1950's, although often considered a period of secularization, was also a great age of renewal for the Roman Catholic Church. It witnessed a tremendous institutional growth of the Church, the assertion of doctrinal and administrative control from Rome known as ultramontanism, the flowering of spirituality and devotional life, and the spread of the faith from Europe throughout the world by means of extensive missionary activity. This course will consider the institutional and intellectual transformation of the Church in the nineteenth century, but will also pay close attention to changes in popular piety and the social role of the Church. Focus will be both topical and regional.

TMHC722801

Introduction to Thomas Aquinas

Harkins, Franklin T

Spring 2025

This course provides an introduction to the theology of Thomas Aquinas (c. 1225-1274) in its historical, intellectual, and institutional contexts, with a focus on reading and understanding the primary texts of Thomas (in English translation). The course considers Thomass treatment of central theological topics including the nature and extent of theology, the status and interpretation of Sacred Scripture, the existence and essence of God, divine providence and predestination, Gods triune nature, creation, human nature, evil and sin, grace and its effects, merit, faith and its relationship to reason, the Incarnation, Christs passion and death, His resurrection and ascension, and the sacraments. Throughout attention will be given to Thomass assumptions and working method as a scholastic master and the uses he makes of various authorities (scriptural, patristic, philosophical, etc.) in the development of his theology.

Where Two or Three are Gathered: A History of Religious Life in the West

Molvarec, Stephen Joseph, Society of Jesus

Spring 2025

This course will consider broadly and in narrative fashion the existence of religious life and religious communities in the history of the church, primarily in the West. From the early days of the church, intentional communities have existed. Eventually, communities of desert monastics arose and monastic rules developed. Religious life came to be ordered in particular ways, eventually in what we would think of as religious orders with governing structures, but also in the form of confraternities and lay movements. This course will explore instances of religious life - lay, vowed and clerical - from the deserts to the cities, from patristic times through the medieval, modern, and postmodern periods. The course will consider not only arrangements and institutions, but also the spirituality of various groups and the attempt to follow Christ more closely by Christian women and men throughout time.

The Book of Job in the Middle Ages

Harkins, Franklin T

Spring 2025

Throughout the Middle Ages the Old Testament Book of Job attracted the attention, scholarly acumen, and artistic insight of a number of Christian clerics, exegetes, theologians, philosophers, historians, poets, and painters. This course surveys some of the most important medieval Christian engagements with and interpretations of Job, both in exegetical and theological works (e.g., the *Moralia* of Gregory the Great; the commentaries of Thomas Aquinas, Albertus Magnus, and Nicholas of Lyra; and commentaries on the *Sentences* of Peter Lombard), on the one hand, and in vernacular and popular works (e.g., artistic depictions, Old English literature, the sermons of John Wycliffe and his followers), on the other.

The Spiritual Theology of Ignatius of Loyola

Geger, Barton T, SJ

Spring 2025

Ignatius of Loyola (1491-1556), primary founder of the Society of Jesus (the Jesuits), produced the largest collection of writings of any sixteenth-century figure, excepting only Philip Melanchton (1497-1560). In this seminar course, students will examine the entire Ignatius corpus with regard to salient themes to assess their development over the course of Ignatius' life and how they should be reinterpreted (or not) for twenty-first century Christians. This course is recommended for those intending advanced studies in Jesuit history and spirituality.

New Testament Gospels

Monnig, Matthew S

Fall 2024

This is an introductory core course on the four New Testament Gospels. Among the primary aims of this course is to provide an overview of the structure and content of each of the four Gospels (Matthew, Mark, Luke, and John) and an analysis of various scholarly methods for interpreting them. This course will review what scholars call the Synoptic Problem, an investigation into the relationship of the Synoptic Gospels (Matthew, Mark, and Luke) to one another, and discuss the arguments for and against the hypothetical source known as Quelle. This course will also discuss the relationship between the Gospel of John to the Synoptic Gospels, and the relationship between the Gospels and other relevant texts like the Gospel of Thomas. This study of the Gospels will be situated in an ecclesial framework that includes a theological perspective.

TMNT709201**The Gospel of Matthew****Harkins, Angela Kim****Spring 2025**

Our study of Matthew's Gospel will attend to its literary features, social context, and theological content. In addition to helping us understand how the Matthean author used various sources to write his distinct narrative of Jesus' ministry, Passion and Resurrection, historical-criticism will assist in contextualizing both author and community within a late first-century multi-cultural context. As the most commented upon Gospel in the early Church, we will also consider how Matthew's emphasis on the OT and understanding of Jesus were received by early Christians who sought to articulate Christianity in light of the controversies at that time (e.g., Marcionism).

TMOT701401

The Core Narrative of the Old Testament: Genesis to Kings

Davis, Andrew R

Fall 2024

A study of the Pentateuch and the Deuteronomistic History (Deuteronomy to Kings) through lectures, and sections in which students present an exegesis of important passages. Solid knowledge of these books is essential to understand the rest of the Bible. This course does not duplicate other introductions, for we read only Genesis through Kings (not the Prophets, Wisdom Literature, or Psalms), and a third of the class time is devoted to small sections, which are designed to sharpen exegetical and preaching skills.

Apocalypses: Visions and Otherworldly Journeys

Harkins, Angela Kim

Spring 2025

The word apocalypse comes from the Greek word for 'revelation.' This course will survey ancient Jewish and Christian apocalypses and representative writings from the apocalyptic literary genre taken from the Old Testament, the Dead Sea Scrolls and Pseudepigrapha, the New Testament, and later Jewish and Christian writings. Our examination of the diverse expressions of apocalypticism will assist us in our task of understanding the conceptual worldview and theological perspective of ancient apocalypses and apocalyptic literature.

Job and Suffering

Davis, Andrew R

Spring 2025

This course examines how the Hebrew Bible addresses questions around human suffering. After surveying different biblical perspectives, we will immerse ourselves in the Book of Job, in which Job and his friends (and, ultimately, YHWH) consider the meaning of Job's suffering. While this course is primarily interested in the theologies of the Book of Job, we will also take into account the book's literary artistry, redaction history and historical context. By the end of this course I hope you will have a better understanding of this important book, which is as timeless, complex, and inexhaustible as the mystery it contemplates.

Spiritual Formation for Ministry

Regan, Jacqueline

Summer 2024

This two semester program, a requirement for first year M.A. Theology and Ministry students, cultivates practices for integrating faith, life, and ministry through prayer and reflection on central themes of spirituality for ministry. The program consists of two parts. First, a student commits to a small faith community, which meets on the same day and same time twelve times during the academic year under the guidance of a trained facilitator. Second, a student creates a spiritual formation plan (SFP), the components of which may be fulfilled throughout the duration of one's degree program.

Introduction to Pastoral Care and Counseling: A Narrative Approach

Kelley, Melissa M

Summer 2024

In this foundational course, we develop an understanding of critical dimensions of competent and compassionate pastoral care and counseling today. Drawing substantially on a narrative approach to care, we explore pastoral care and counseling from contemporary pastoral-theological, social-scientific, and cultural perspectives. Particular topics addressed are family systems theory; implicit bias and racism; domestic violence; suicide; power and boundaries; resilience and self-care; and skills for pastoral care.

Anti-racist Ministry in a Catholic Context

Aljentera, Clarissa

Summer 2024

This one-credit module has been designed to allow students to explore what it would mean to help shape a more anti-racist community within the Catholic Church. It will help identify resources and ways in which to help begin and continue the conversation around anti-racism with peers in ministry, colleagues and people in positions of power. Particular attention will be given to understanding a brief examination of the role that prejudice has had in shaping the political and social structure of the US Catholic Church. Participants will examine pastoral letters and Church documents advocating for racial justice. Self-care through the lens of being an anti-racist minister will be covered. Students will also explore ways to take professional and personal action to become more anti-racist.

From the Synod to Synodality: Cultivating Co-responsibility for Mission

Bader Mayer, Jennifer;O'Connell, Maureen H;Rudolph, Bernadette

Summer 2024

Through our participation in the Synod on Communion, Participation and Mission, the People of God around the world have expressed a desire for increased co-responsibility in serving the Church's mission. As we transition from the conclusion of the formal Synod process to the ongoing work of integrating synodality into our ways of being Church, the next step is to cultivate co-responsibility at the local level. In this module, you will learn how to facilitate conversations in the Spirit the essential tool of becoming a synodal Church and be resourced to identify where you can apply this approach in your ministry.

Eco-Spirituality and Justice in Amazonia, Brazil

Romero, David;Ryan, Marcia A

Summer 2024

Rooted in Pope Francis' document *Laudato Si*, this two-week immersion in the Amazon region of northern Brazil offers an enriching experience of biodiversity, intercultural exchange and a unique spiritual encounter. Students will learn how to share an ecocentric perspective for the challenging task of climate change; give witness to a profound sense of connectedness with nature and the planet and others; and respond creatively to the appeal of responsibility in caring for our common home.

Pastoral Studies Courses: Fall 2024

TMPS700601

Grief and Loss

Kelley, Melissa M

Fall 2024

Grief may be understood as the response to a significant loss. We will explore pastoral, theological, religious, and secular perspectives on grief and loss and seek to integrate these perspectives where appropriate. We'll consider important new research in thanatology and review traditional psychological theories of grief in light of contemporary critiques. We will explore the experience of grief in light of context and culture and consider which features may be universal. We will attend to often unrecognized dimensions of grief—disenfranchised grief and the grief born of injustice. We'll focus on how to respond pastorally to grieving individuals and communities.

The Practice of Ministry with Youth and Young Adults

O'Keefe, Theresa A

Fall 2024

This course aims to explore elements critical to the effective practice of ministry for and with youth and young adults. Considering the broad demographics herein, this class attends to fostering the skills of discernment and mentoring, which would be valuable across the spectrum of these varied constituencies and contexts. Together the class explores the contexts of the ministry (ecclesial and social), identifies a vision for the work, and considers how that vision might assist in discerning God's action in and direction for work with youth and young adults.

Introduction to Pastoral Care and Counseling: A Narrative Approach

Kelley, Melissa M

Fall 2024

In this foundational course, we develop an understanding of critical dimensions of competent and compassionate pastoral care and counseling today. Drawing substantially on a narrative approach to care, we explore pastoral care and counseling from contemporary pastoral-theological, social-scientific, and cultural perspectives. Particular topics addressed are family systems theory; implicit bias and racism; domestic violence; suicide; power and boundaries; resilience and self-care; and skills for pastoral care.

Pastoral Care in/with Communities of Faith: Creating Networks of Care

Roozeboom, William D

Fall 2024

Life is in inherently relational, multidimensional, interconnected, and located within larger systems and structures - i.e. communities. Thus, our practices of pastoral care and counseling must likewise attend to the multidimensional and systemic nature of relationality. This course uses an interdisciplinary approach to explore personal, pastoral, and communal processes of creating networks of care in communities of faith and para-church organizations. Both pastoral and lay leaders will learn how to engage and utilize systems theory, conflict theory, therapeutic skills and processes, and theological and spiritual resources to navigate conflict, foster dialogue, and build constructive solutions and possibilities in community as part of an overarching practice of pastoral care. Particular attention will be given to one's self-in-relationship and the capacity to remain a non-anxious, non-reactive constructive presence.

M.Div. Spiritual Formation

Regan, Jacqueline

Fall 2024

All M.Div. students participate in a one- credit comprehensive program of formation that expresses the STM's commitment to the formation of the whole person for effective ministry. Students who are members of religious orders or candidates for ordination fulfill the one-credit requirement for formation by participating in the formation programs required by their religious orders or diocese. Lay students are required to complete the seven components of the one-credit program that follow over the course of three years.

Professional Ministry Practicum

Weiss, Joseph E, SJ

Fall 2024

Students receive 3-credits in the fall semester and 3-credit in the spring semester. The professional ministry practicum provides M.Div. students with an opportunity to integrate the academic study of theology and ministry with the exercise of a particular pastoral ministry under supervision. There are three required components of the professional ministry practicum. First, students are engaged in pastoral ministry in an approved setting for a required number of hours. Second, students are mentored by approved supervisors at the ministry site. Third, students participate in a course component to deepen their understanding of their ministry experience and to further develop pastoral and professional skills and sensitivities for ministry.

Christian Sacred Music: Survey and Application

Ganir, Phillip A, SJ

Fall 2024

This course explores the vast treasury of Christian sacred music. While the development of music in (Roman-Rite) liturgy anchors the historical survey, the course engages other sacred repertoire allied (and at times, overlapping) with liturgy. These include operas, symphonies, folk songs, soundtracks, and soundscapes. Moreover, through theological aesthetics and some performance practice, this course addresses issues relating to music's pastoral application: Is there a way out of bad church music? What repertoire can educators or preachers draw upon to inspire curriculum or animate homilies? How can music help people pray? To what extent might secular music be sacred?

Credits: 3

Room and Schedule: Simboli Hall 135 Th 03:30PM-06:20PM

Satisfies Core Requirement: None

Prerequisites: Prerequisites: None. However, for students who do not read music, they will need to acquire that ability earlier in the semester (in order to read music at the level of basic chant and the vocal score of a Bach chorale). The professor will provide...

Podcasts: A New Medium for Ministry

Van Dorn, Margaret

Fall 2024

There are over 5 million podcasts in the world and Religion & Spirituality podcasts consistently top the charts. People are hungry for a nourishing word, a refreshing perspective, and authentic companionship. Do you know where to find good podcasts? Would you like to explore podcasting as a creative extension of your ministry? Or empower those you serve to find their own voice behind the mic? This course will explore consuming and creating podcasts for ministry. We'll look at best practices for sourcing quality podcasts to inform and inspire your ministry along with the basics for how to launch a podcast.

Introduction to Canon Law

Ponzone, Andrea

Fall 2024

This course examines the nature, history, and sources of Canon Law in the Catholic Church. It presents an overview of the norms provided in the 1983 Code of Canon Law and relevant complementary canonical legislation. This course will focus on general norms (Book I), the People of God (Book II), the teaching munus of the Church (Book III), temporal goods (Book V). Given the current circumstances and issues about the Catholic Church's sexual abuse crisis, a brief presentation of penal law (Book VI) and processes (Book VII) will be offered. This course is recommended as a foundational background for "Canon Law of the Sacraments."

Advanced Professional Ministry Practicum

Weiss, Joseph E, SJ

Fall 2024

The Advanced Professional Ministry Practicum provides advanced M.Div. or Th.M. students with opportunities for exercising ministerial leadership in settings requiring both advanced ministerial experience and professional expertise in a field other than theology. The aim is to conjoin expertise in another professional field (e.g., health care, law, economics, social work, education, international affairs, etc.) with the practice of ministry. The student is mentored by experienced ministers. The course component offers opportunity for careful reflection on the experience with peers. Students should meet with the instructor early on to allow sufficient time to plan an approved practicum experience.

Pastoral Studies Courses: Spring 2025

TMPS701801**Death and Dying****Kelley, Melissa M****Spring 2025**

The study of death and dying is a complex, multidimensional, and evolving field. This course draws on contemporary theory and research to explore death and dying from multiple perspectives, including religious, theological, pastoral, and psychological. Topics include societal attitudes toward death; facing one's own death; cultural features of death and dying; end-of-life issues; children and death; funerals and the use of ritual in ministry to the dying; pastoral sensitivities and skills for ministering to the dying; and pressing contemporary concerns, such as death in the workplace, institutional death, violent death, and death in global perspective.

Pastoral Care of the Family

Kelley, Melissa M

Spring 2025

This course presents specific topics that are important for effective and compassionate pastoral care of families today. We will examine challenging realities that may shape and/or disturb families and lead members to seek pastoral care, such as domestic violence, substance abuse, imprisonment of a family member, grief and loss, and family caregiver stress. We will consider the specific needs of families affected by injustices and harsh difficulties such as poverty and immigrant/refugee status. We will consider the specific roles and strategies of the pastoral caregiver and the faith community in helping families to negotiate challenges and create stability and well-being.

TMPS709001

Ministry in a Diverse Church: Latino Perspectives and Beyond

Ospino, Hosffman

Spring 2025

Catholicism in the United States is presently shaped by rich cultural traditions that demand creative approaches to ministry in the midst of diversity. Nearly 45% of all Catholics in the country are Hispanic, 40% Euro-American, 4% Asian-American, 3.7% African-American, among others. Students in this course explore key questions and discuss ministerial strategies that will help them develop cultural competencies for effective ministry today. The course builds on the U.S. Latino/a Catholic experience as a case study while addressing core issues in ministry that affect everyone in the Church. Ecumenical and international perspectives are welcomed into this conversation.

Leadership for Ministry

McCarthy, Michael, Society of Jesus;Regan, Jacqueline

Spring 2025

In this one-credit module, students will engage with leadership models, styles, and skills that are essential for effective leadership in a variety of ministerial settings. Particular attention will be given to the spirituality of leadership, identifying one's own strengths and areas of growth, team development, collaboration, the art and skill of dialogue, the role of discernment and data in decision-making, and leading for change.

M.Div. Spiritual Formation

Regan, Jacqueline

Spring 2025

All M.Div. students participate in a one- credit comprehensive program of formation that expresses the STM's commitment to the formation of the whole person for effective ministry. Students who are members of religious orders or candidates for ordination fulfill the one-credit requirement for formation by participating in the formation programs required by their religious orders or diocese. Lay students are required to complete the seven components of the one-credit program that follow over the course of three years.

Professional Ministry Practicum

Weiss, Joseph E, SJ

Spring 2025

Students receive 3-credits in the fall semester and 3-credit in the spring semester. The professional ministry practicum provides M.Div. students with an opportunity to integrate the academic study of theology and ministry with the exercise of a particular pastoral ministry under supervision. There are three required components of the professional ministry practicum. First, students are engaged in pastoral ministry in an approved setting for a required number of hours. Second, students are mentored by approved supervisors at the ministry site. Third, students participate in a course component to deepen their understanding of their ministry experience and to further develop pastoral and professional skills and sensitivities for ministry.

Conflict Transformation

DuBois, Heather

Spring 2025

Conflict theory can enable constructive responses to situational disagreements and long-term relationship building. This course combines resources from secular conflict theory and Christian theology and ministry to foster transformation of micro (interpersonal), meso (communal), and macro (societal, international) level conflicts. Most texts reference the U.S. context, but other cultural perspectives are welcome. Assignments include regular short papers and a presentation. This is a discussion-based (not lecture-based) class; close reading is required.

TMPS731301

Theology and Practice of Ignatian Spiritual Accompaniment

Moons, Jozef

Spring 2025

The key question of this course is, how can we listen well to our brothers and sisters? While the skills we train in this course are particularly relevant for the context of spiritual care or spiritual accompaniment, they will also make us better listeners to our family, friends, colleagues, students generally. In the course we both practice actual listening, thus training a set of skills, and reflect theologically on our listening: what are the theological grounds for doing that? Ignatian spirituality will be a major source of inspiration for the course, with an openness to other voices also. While the course is in a 4-hour block, each student will spend 2.5 hours in class each week.

Canon Law of the Sacraments

Ponzone, Andrea

Spring 2025

This course examines Book IV of the 1983 Code of Canon Law, the sanctifying munus of the Church. It presents a canonical study of the Sacraments of the Catholic Church, other Acts of Divine Worship, and Sacred Places and Times. Special emphasis is placed on the Sacrament of Marriage, not only on substantive norms (cann. 1055-1165) but also on Book VII as regards the Process for Declaration of Marriage Nullity. A comparison with selected norms of the 1990 Code of Canons of the Eastern Churches will highlight some specificities of Sacramental Law of the Eastern Catholic Churches. Students who have not completed an introductory course in Canon Law are required (prior to the beginning of the course) to submit a preliminary essay to the instructor demonstrating basic knowledge and appropriation of the essential elements of the Code of Canon Law and insights from the work of Martin De Agar, Joseph T., A Handbook on Canon Law (Wilson & Lafleur, 2007).

Advanced Professional Ministry Practicum

Weiss, Joseph E, SJ

Spring 2025

The Advanced Professional Ministry Practicum provides advanced M.Div. or Th.M. students with opportunities for exercising ministerial leadership in settings requiring both advanced ministerial experience and professional expertise in a field other than theology. The aim is to conjoin expertise in another professional field (e.g., health care, law, economics, social work, education, international affairs, etc.) with the practice of ministry. The student is mentored by experienced ministers. The course component offers opportunity for careful reflection on the experience with peers. Students should meet with the instructor early on to allow sufficient time to plan an approved practicum experience.

Church in Context

Reynolds, Susan B

Summer 2024

This course examines the intersection of ecclesiology that is, the theological study of the Church and culture. Centering the lived experiences of concrete ecclesial communities, we consider how attending carefully to the local church shapes our theology. Throughout the course, we maintain an emphasis on racial, cultural, and geographical diversity; ritual and liturgical practice; visual and material culture; and place and belonging, especially city-dwelling.

Screening Theology: Theology In and Through Film

Valentin, Benjamin

Spring 2025

Highlighting the possibility and potential of a theology of culture, this course explores the ways in which recent Hollywood movies can be used as resources to think about and even to rethink the meaning of key theological concepts such as ideas of God, human nature, sin, Christ/human redemption, and eschatological hope. Through brief lecture presentations, reading materials, the viewing of movies, and class discussions, students will be encouraged to consider how an appreciative and critical engagement with popular culture can allow for a relevant and contemporary practical theology.

Mitigating Trauma

DuBois, Heather

Spring 2025

Traumatization occurs at the interrelated social, psychic, and physiological boundaries of life and death. This course offers an introduction to trauma healing and prevention for contexts of pastoral and spiritual care. It surveys approaches to trauma developed in peacebuilding, public health, and psychology, as well as the emerging subfield of trauma theology. Assignments include a book review, a presentation, and a research paper. This is a discussion-based (not lecture-based) class. Close reading is required.

Religious Education Courses: Summer 2024

TMRE705301

Spiritual Sources of Catholic Education and Catechesis

Ospino, Hosffman

Summer 2024

The course is open to Catholic school teachers and administrators, religious educators, and anyone interested in learning more about the spiritual roots of Catholic education. Catholic education and catechesis are rooted in particular appropriations of the Christian faith articulated as schools of spirituality. From these appropriations emerge commitments to specific charisms and pedagogical practices. It is imperative that Catholic educational efforts continue to affirm the spiritual legacies that have sustained schools, missions, and parochial programs throughout history. In this course we read some foundational texts of major schools of spirituality and explore how they have inspired life-giving philosophies of Catholic education. The guiding principle throughout the course is that a good philosophy of Catholic education and catechesis is always sustained by a deep spirituality.

Religious Education Courses: Fall 2024

TMRE706001

Education in Living Faith: Foundations and Practice

Groome, Thomas

Fall 2024

This course proposes theological, spiritual and pedagogical foundations for faith-based education, ministry and service. The course invites participants to develop their own theory and praxis of educating in faith, and to intentionally harness the faith formation potential of all functions of ministry and faith-based service. There is particular emphasis on religious education for a liberating faith that promotes the social values of God's reign - compassion and justice for all.

TMRE708301

Education for Justice and Peace

O'Keefe, Theresa A

Fall 2024

The course begins with an investigation of the tools of social analysis as a means of getting beneath the surface of issues of injustice, followed by a review of Catholic social teachings as a means of offering a theological foundation for educating for justice. Finally, it looks at educational methods from the early 20th century to the present that reflect on education itself as a work of justice. The course concludes with student groups presenting lessons in which they have used tools of investigation and analysis on an issue, incorporated theological reflection, and developed a methodology for effective education.

Education of Christians: Past, Present, and Future

Ganir, Phillip A, SJ

Spring 2025

The history of the church's educational ministry serves to enlighten its present pastoral praxis. Students in this course read original and classical documents as a treasury of wisdom for religious education and pastoral ministry. The course will closely parallel the history of theology, of the church, and of Western education.

Catholic Higher Education

James, Michael J

Spring 2025

This course offers an historical and philosophical overview of Catholic higher education, a survey of current scholarship and related Church documents, and an examination of the role of Catholic higher education--particularly in the U.S.--and its relationship with the Church, contemporary academic culture, and the broader society. This course also engages students in an analysis of contemporary issues facing Catholic higher education particularly, faith and reason, the Catholic intellectual tradition, Catholic social thought, governance and leadership models, student development, and institutional mission, identity, and culture.

Mission, Curriculum, and Pedagogy: Teaching High School Religion

O'Keefe, Theresa A

Spring 2025

This course is designed to assist students in developing religion curriculum for adolescents, particularly within the setting of Catholic secondary schools. It considers the place of religious instruction within the larger ambit of the Catholic schools mission, including interaction with campus ministry and service learning. It attends to frameworks of faith development within adolescence. It includes the development of learning outcomes and assessment tools; pedagogy; curricular maps; units and lesson plans. Finally, it calls participants to be self-aware of the teachers role through the development of a pedagogic creed.

TMRE725201

What Makes Education Catholic?

Groome, Thomas

Spring 2025

When a school presents itself to the world as offering Catholic education, it signals, at a minimum, that it is committed to educating from and for faith. It is to educate from deep spiritual convictions that are core to Catholicism and for a Transcendent as well as an immanent perspective on life, preparing students to live well into an Ultimate Horizon God as revealed in Jesus Christ. What does this ask of the curriculum of a Catholic school, of its faculty and administrators? We once took for granted our response to such questions, for example when 95% of faculty and staff were vowed religious and all students were decidedly Catholic. That era has passed, bringing new challenges and opportunities. Note, for example, the growing number of students from other or no faith tradition attending, likewise an often diverse faculty and staff, and many Catholic students who are more cultural than affiliated in their faith. This changed reality, coupled with the secular and postmodern culture of our time, offers new opportunity for a fresh address of what makes education Catholic.

Sacraments in the Life of the Church

Bergin, William N

Summer 2024

After exploring sacrament in its broadest sense, the meaning of sacramentality, and other fundamental elements of Roman Catholic sacramental theology, we will examine each sacrament both in its role in the life of the church as well as its role in each individual's faith journey. We will address historical background and contemporary issues about the Sacraments of Initiation, Baptism, Confirmation and Eucharist, the Sacraments of Healing, Reconciliation and the Sacrament of the Sick; and Sacraments at the Service of Communion, Marriage and Holy Orders.

TMST730701

Spirituality of Thomas Merton for Today: On Racism, Violence, and Justice

Horan, Daniel P, OFM

Summer 2024

This course explores the still-relevant contributions of the Trappist monk and best-selling author Thomas Merton, who was one of the most influential voices in Christian spirituality during the twentieth century. In returning to both his well-known and lesser-known works, we will study how Merton's prophetic writings on subjects such as violence and racism, among other timely themes, continue to speak to our contemporary church and world. Special attention will also be given to the pastoral and ministerial implications of Merton's insights and contributions. [n.b., This course will incorporate both lecture and seminar formats throughout the session].

TMST705901

Theological Virtues

Doyle, Dominic F

Fall 2024

The Church is often described as a community of faith, hope, and love. This course explores how some Christian thinkers have understood these central theological virtues. After considering New Testament sources, we will examine the following periods and thinkers: patristic (e.g. Augustine), medieval (Aquinas), reformation (Calvin), early modern (John of the Cross), and modern (Rahner, Lonergan, liberation theology). While special attention will be paid to the systematic thought of Aquinas, the goal of this course is to present a broad range of thinkers so that students can articulate their own account of these characteristic marks of Christian life.

Disputed Questions in Contemporary Theology

Doyle, Dominic F

Fall 2024

An introduction to contested issues in contemporary Christian theology, such as the role of biblical criticism, the relationship between science and faith, the encounter with world religions, theories of atonement, divine impassibility, and the possibility of faith in a consumer culture. The goals of this course are: (1) to map out the basic elements of each problematic area, (2) to register some popular yet unsatisfactory answers (e.g., creationism and reductionism as responses to the question of science and faith), and (3) to consider more authentic and theologically persuasive responses.

Writing and Research for Theology and Ministry

Regan, Jane

Fall 2024

This course provides an introduction to writing and research for students engaged in STM degree programs. Through a series of workshops, the course will introduce students to the basics of research, developing a thesis statement, and the use of sources, as well as the different kinds of writing that STM faculty require (research papers, biblical exegeses, theological reflection papers). With an individual tutor, students will work on developing research paper that has been assigned in the current semester. This is a year long course. Students register both fall and spring semesters and will receive 1-credit in the spring semester.

Introduction to Patristic Theology

Dunkle, Brian P, SJ

Fall 2024

This course presents the methods and insights of patristic treatments on the topics of theology through a study of major figures and texts. After an overview of the culture and context of the early church, we will treat patristic reflection on: Scripture, faith and reason, Christ, Trinity, the church, liturgy, ethics, and prayer. Authors and literature include, but are not limited to: Ignatius of Antioch, Justin Martyr, Irenaeus, Clement of Alexandria, The Martyrdom of Perpetua and Felicity, Origen, Tertullian, Athanasius, Basil of Caesarea, Gregory of Nazianzus, Gregory of Nyssa, Hilary of Poitiers, Ambrose, Augustine, and John Chrysostom.

Sacraments: Theology and Practice

Fink, Peter E, Society of Jesus

Fall 2024

We will look at each of the sacraments as they are now practiced in the Roman Catholic Church, and on the nature of sacrament itself, observing the ritual, the history of its evolution, and the theology which underlies it.

Credits: 3**Room and Schedule:** Simboli Hall 130 Tu 03:30PM-06:20PM**Satisfies Core Requirement:** None**Prerequisites:** None**Corequisites:** None**Cross-listed with:** None**Frequency:** Periodically**Student Level:** Graduate**Comments:** None**Status:** Offered**TMST724701****Theologies of Justice and Liberation in the U.S.****Valentin, Benjamin****Fall 2024**

Liberation theologies are modes of theological discourse that rethink the purpose of religious thought and practice by placing attention on distinctive experiences of injustice and inequality encountered by different individuals and social groups. Although the liberation theology movement is now a global one, the United States has been the birthplace of a good number of liberation theologies. This course examines the emergence, development, emphases, and methodologies of four of these, including African American/Black theology of liberation, feminist theology of liberation, Latino/a theology of liberation, and LGBTQ theology of liberation. Besides offering a solid introduction to liberation theology, the course analyzes basic concepts underlying theories of injustice, domination, and oppression.

TMST727301**The Franciscan Tradition****Guider, Margaret E****Fall 2024**

This course traces the origins and evolution of the Franciscan tradition by examining a variety of primary and secondary sources. The selected sources include the writings of Francis and Clare, various biographies and legends concerning their lives and legacies, along with noteworthy examples of spiritual writings and theological treatises rooted in the Franciscan charism. These diverse sources will be used as points of reference in the study of specific themes, values, attitudes and practices that characterize the Franciscan tradition. Special consideration will be given to contemporary sources that demonstrate the relevance of insights from the Franciscan tradition for today's world.

This Level Two course is open to all students and focuses on ordained ministry of the Roman Catholic priesthood in terms of its biblical & theological foundations, historical development, contemporary issues, pastoral practice, & priestly spirituality, especially as treated in the pertinent ecclesial documents. Also treated are the cooperation between laity and clergy and the roles of lay ecclesial ministry as well as both tensions and critiques arising out of the Church's reservation of the priesthood to males and mandatory celibacy. Ecclesiology is a prerequisite for counting this course for the Ecclesial Ministry requirement in the M.Div. curriculum.

What is the relationship between what theologians have said about discipleship and the ways in which these articulations have shaped the living out of their vocations as theologians in the church and in the world? What can we learn from their lives? What do they teach us about following Jesus amidst the forces of secularization and desecularization? What does it mean to follow Jesus particularly in times of war, genocide, natural disaster, catastrophe, socio-economic collapse, scientific discovery, globalization and pluralism? What currently informs our own theological imaginations with regard to the challenges of Christian discipleship in today's church and world?

TMST810901**The Trinity in the Early Church****Dunkle, Brian P, SJ****Fall 2024**

An introduction to early Christian Trinitarian theology and its enduring pertinence to the Church's worship of God as one and three, Father, Son, and Holy Spirit. Treating authors from Justin Martyr to John of Damascus, we explore the scriptural and philosophical features of, among other issues, the Cappadocian solution, the psychological analogies of Augustine, the roots of the filioque, and the challenge of Islam. We will consider the retrieval of patristic Trinitarian theology by recent authors, especially in light of debates on ontotheology, the immanent and the economic Trinity, and social analogies for divine perichoresis.

Ecotheology has been developed in the last decades as a theological response to the climate crisis that we are facing in the world today. Ecotheology has two goals. First, it is a critique of the cultural concepts, images, and practices that are at the bottom of the climate crisis. Second, it is both a retrieval of the ecological dimension of Christian faith, and an interpretation of theological sources (such as the Bible and Tradition) and doctrines (such as Trinity, Creation, and Salvation) from the perspective of Ecology. In this seminar course, students will explore different aspects of Ecotheology.

Reconciliation in a World of Conflict

Valiente, Orfilio E

Fall 2024

The twentieth century's legacy is marked by social conflict and war: more than 200 million people killed because of political repression, ethnic or religious wars. Enlisting a theological lens, this seminar examines the Christian resources and contribution to the problem of reconciliation. After examining the most important secular approaches to the problem of personal and social conflict, we will focus on the main Christian theologies of reconciliation, including the works of Robert Schreier, Miroslav Volf, John de Gruchy, and Jon Sobrino. Their theologies will be examined through individual case studies of the Balkan region, South Africa, and El Salvador.

Systematic and Historical Theology Courses: Spring 2025

TMST702001

The Church

Guider, Margaret E

Spring 2025

The ecclesial dimension of Christian faith is the focal point of this course. The course will locate the church within both a Trinitarian theology and a theological anthropology. Specific topics for exploration include the place of the church in the Creed, the sacramentality of the church, a theology of mission, and of structure and authority. The course will also explore current issues shaping the church's life and its place in the wider culture.

TMST702401

Christology

Valentin, Benjamin

Spring 2025

This course seeks to clarify what it means to confess that Jesus of Nazareth is the Christ, and why this is a significant claim. The course examines the New Testament, the early councils of the Church, the writings of early and medieval Christian theologians, the dogmatic teachings of the Church, and the contributions of contemporary theologians. Two main questions will be addressed: Who is Jesus? How does Jesus save us?

TMST705101**Development of Christological Doctrine****Dunkle, Brian P, SJ****Spring 2025**

Jesus' question to his disciples, "Who do you say that I am?" (Mk 8:29) received a definitive response in Church doctrine only through a long and tumultuous process of development. In seeking to formulate our own responses to this question, we need to appropriate the contents of this process. The project of this course is to integrate contemporary questions with those that generated the development of christological doctrine so that we may delve deeper into the mystery of the human-divine identity of Jesus Christ.

Theology of Culture

Doyle, Dominic F

Spring 2025

This course explores the relationship between theology and culture through the following questions: How do particular cultures shape Christian faith? How has the Church, for better or worse, changed (or failed to change) the various cultures into which it has been received? How are rapid advances in technology shaping culture and how should the Church respond? How do theologians navigate between their local context and global economic realities that influence all locales? How does the study of culture, which integrates the various branches of inquiry into human meaning, challenge and invigorate theological reflection?

Ecclesial Ministry

Lennan, Richard J

Spring 2025

This course explores the theology, history, and spirituality of ministry in the church. The emphasis will be on the ecclesial foundations for ministry and the relationship between ministry and the mission of all the baptized. The course will examine current issues in the theology and practice of ministry as well as the implications of ministry for the faith and practice of the minister.

Theological Anthropology and the Body

Griffith, Colleen M; Miller, Sarah L

Spring 2025

Issues of embodiment relating to theology, spirituality, and ministry form the substance of this course. We will probe understandings of the body found in the historical Christian tradition and draw insights regarding human bodiliness from contemporary theology, philosophy, psychology, and social theory. Finally, we will examine the role of the body in lived Christian faith with a particular emphasis on spirituality, education, and pastoral care.

Theological Approaches to the Holy Spirit

Brouillette, Andre, SJ

Spring 2025

The twentieth century has witnessed a renewed interest in the theological understanding of the Holy Spirit (i.e., pneumatology) in Western Christianity. Great theologians, such as Yves Congar, Jürgen Moltmann, or Hans Urs von Balthasar, have devoted important works to this enterprise. Unlike Christ, who, as the Image of God, can more easily be represented and grasped, the Holy Spirit remains an elusive--though powerful--figure of God.

The Mystery of the Trinity

Chong, Vicente, SJ

Spring 2025

The course will offer the Scriptural sources, the dogmatic development and the works of contemporary theologians that have contributed to the Church's reflection on God, One and Triune, as revealed through the life and praxis of Jesus of Nazareth. This fundamental path will permit us to offer a systematic Trinitarian theology of God as Mystery of salvation and liberation of all.

TMST811501

Theology of Liberation

Valiente, Orfilio E

Spring 2025

Latin American liberation theology traces its origins to the grassroots Christian communities that struggled for social justice in the 1960s. This course explores the distinctive way in which Latin American liberation theologians correlate their interpretation of their social context with the Christian tradition and praxis in a mutually-critical manner. We will critically examine their fundamental presuppositions, their contribution to theology, and their efforts to articulate the Christian message as an effective response against oppression and on behalf of a full human liberation. We will also incorporate some of the liberationist voices that emerge from other social and cultural situations.

TMST812601

Synodality and Reforms in the Church Today

Luciani, Rafael F

Spring 2025

This Course explores the theological and pastoral roots of synodality as a consequence of the process of reception and deepening of the Ecclesiology of the People of God in the Second Vatican Council. In this context, pastoral conversion and synodal conversion are key to understand today's ecclesial proposal of an inverted pyramid that overcomes clericalism and leads to a new way of proceeding in the Church that starts from below, from the *sensus fidei fidelium*, and then upwards. From this perspective, we are entering in a new phase in the reception of the Council and a renewed ecclesiology, an event that involves the reform of structures and processes. This demands a conversion in the ecclesial mentality, a revision of lifestyles, practices of communal discernment, and structural reform. Therefore, the course will present synodality as a constitutive and constituent note of the Church that embraces a major reform.

Theology of Mission

Guider, Margaret E

Spring 2025

This seminar surveys diverse theologies of mission and examines how these theologies have informed and transformed the Church's understanding of mission and missionary activity in the 20th and 21st centuries. Attentive to the contributions of selected biblical scholars, theologians, church historians and social scientists as well as the corpus of Roman Catholic documents on mission, along with documents of the World Council of Churches and the Lausanne Movement, the seminar traces the evolution of critical theological thinking on mission and assesses the ecclesiological relevance of theologies of mission in a religiously pluralistic world.

Latin West and Greek East: From Nicaea to the Fall of Constantinople

Dunkle, Brian P, SJ

Spring 2025

The course involves informed discussion of source texts referring to the main events and topics in the theological relations between Latins and Greeks from the fourth to the fifteenth century: from the "golden" conciliar age to early debates/schisms, especially on the filioque and azymes; iconoclasm; the so-called "Schism of 1054"; Innocent III and the Fourth Crusade; medieval theologians and their attitudes towards Byzantine theology and culture; Byzantine humanists and latinophrones of the fourteenth and fifteenth centuries; the Council of Florence (1439), its achievements and failures. We focus on ecclesial self-understanding of the emerging Churches, and their respective perception of a theological and cultural "other." Special emphasis will be placed upon the developments in attitudes to sacraments, doctrine, and authority. The course will conclude with reflection on the implications for ecumenical dialogue and current ecclesiology.

Seminar: Theology of Elizabeth Johnson

Griffith, Colleen M

Spring 2025

This class is a doctoral level seminar. Advanced MA/MDiv/MTS students considered, with permission of the instructor. An introduction to the theological corpus of Elizabeth Johnson, one of the foremost women's voices in theology today. The course will examine Johnson's writings, turning a keen eye toward the methodologies, source materials, and commitments apparent in her work. It will explore Johnson's expansive reading of the Christian tradition, as evident in her presentation of God, Christ, the human, and the world.

The Theology of Johann Baptist Metz

Valiente, Orfilio E

Spring 2025

This seminar will unfold by first examining Johann Metz's early relationship and subsequent break with the theology of Karl Rahner. Next we will explore Metz's critical dialogue with the thinkers of the Frankfurt school and the manner in which this encounter led to the formulation of Metz's early political theology. We will then turn to Metz's mature political theology as a "theology after Auschwitz." Some of the themes to be considered include Metz's assertion of the need for "anamnestic rationality," his focus on "the theodicy question," his apocalyptic eschatology, and his articulation of a mystical-political spirituality.

Advanced Seminar in Spirituality Studies: Foundations and Methodology

Brouillette, Andre, SJ

Spring 2025

The seminar explores the foundations, methodology, major trends and partners of spirituality studies. Through the reading and discussion of classical and contemporary texts, the seminar will sketch the contours of the academic discipline of spirituality and its actuality. The course will unfold along five main axes: foundations, interpretation, dialogue partners (scripture, history, theology, anthropology), research and interdisciplinarity, and current themes (nature, ethics, aesthetics, interfaith dialogue). This course is open to Advanced degree students and Advanced Master's degree students.

Theological Aesthetics

Chong, Vicente, SJ

Spring 2025

This course is a study of the mystery of God from the perspective of aesthetics and art. In other words, we will try to understand God's saving presence and action in our lives, in the world, and in history, based on the transcendental and liberating experience of art, and we will try to speak about God who has revealed God's self in Christ using aesthetic categories. We will also explore different ways to establish a conversational relationship between theology and the arts.

Predictive Analytics/Forecasting

Fulton, Lawrence V

Summer 2024

Econometrics This course will expose students to the most popular forecasting techniques used in industry. We will cover time series data manipulation and feature creation, including working with transactional and hierarchical time series data as well as methods of evaluating forecasting models. We will cover basic univariate Smoothing and Decomposition methods of forecasting including Moving Averages, ARIMA, Holt-Winters, Unobserved Components Models and various filtering methods (Hodrick-Prescott, Kalman Filter). Time permitting, we will also extend our models to multivariate modeling options such as Vector Autoregressive Models (VAR). We will also discuss forecasting with hierarchical data and the unique challenges that hierarchical reconciliation creates. The course will use the R programming language though no prior experience with R is required.

Algorithmic Ethics and Governance - from traditional to AI/ML

Zhou, Bing

Summer 2024

This is a survey course of governance frameworks & techniques for algorithms that are used to make decisions within an organization or in servicing clients. The recent acceleration in the use of Artificial Intelligence (AI) and specifically Machine Learning (ML) techniques have introduced unique opportunities and risks that require governance to encourage their responsible and ethical use. We will start with the intent of governance, its roots, its current manifestations and identify trends that are shaping algorithmic decision-making governance with a focus on for-profit firms, mainly the US. Industries covered will vary but may include the Financial Industry, Healthcare, Manufacturing, Defense, and Biotech for illustrative examples.

Software Tools for Data Analysis

Parravano, Stefano A

Summer 2024

The course provides students with an overview of popular software packages used today for data exploration, analysis and visualization. The first part of the course will offer an overview of the non-programming tools Excel and Tableau. In Excel we will cover basic charts with the emphasis on their use with pivot tables. In Tableau students will be introduced to more advanced data exploration and visualization methods via a variety of advanced charts and dashboards. The second part of the course will cover exploratory data analysis in R. Here students will learn how to write their own code for importing, cleaning and exploring large datasets, as well as how to create, modify and export complex charts and summaries for visual, qualitative and quantitative analysis of the data. The third part of the course will provide an intro to using SQL databases, where students will learn how to create SQL queries to select, filter and manipulate the data.

This course focuses on the application of statistical tools used to estimate economic relationships. The course begins with a discussion of the linear regression model, and examination of common problems encountered when applying this approach, including serial correlation, heteroscedasticity, and multicollinearity. Models with lagged variables are considered, as is estimation with instrumental variables, two-stage least squares, models with limited dependent variables, and basic time-series techniques. Prerequisite: ADAN 7310 Data Analysis or department approval.

Computer Vision

Fulton, Lawrence V

Fall 2024

This course introduces students to computer vision concepts and methods. Students will learn how to conduct classification, detection, and recognition tasks. The course covers 1) the basics of computer vision, 2) machine learning (ML) models for vision, 3) Convolutional Neural Networks (CNN) and transformer architecture, 4) object detection and image segmentation, 5) autoencoders & image manipulation, 6) Generative Adversarial Networks for image creation, and 7) multi-input models.

Credits: 3

Room and Schedule: On-line Asynchronous

Satisfies Core Requirement: None

Prerequisites: Restricted to MSAA major.

Operations Research in Applied Economics

Chale, Marc W

Fall 2024

This course provides an introduction to the use of operations research methods in economics. For this purpose, the course starts with a brief review of the basics from microeconomic theory, calculus and linear algebra, which is followed by the conceptual foundations of economic modeling and the applications of optimization techniques on various economic problems. The course provides a very sound perspective on how to use operations research techniques in any kind of economic and managerial decision making, which has becoming an increasingly sought after skill. We will work on various problems, including portfolio management, resource management, environment and energy related regulations, etc.

Credits: 3

Room and Schedule: On-line Asynchronous

Satisfies Core Requirement: None

Prerequisites: ADEC7201 or approval of the instructor

Corequisites: None

Cross-listed with: ADEC7401

Predictive Analytics/Forecasting

Bradley, Robert J

Fall 2024

Econometrics This course will expose students to the most popular forecasting techniques used in industry. We will cover time series data manipulation and feature creation, including working with transactional and hierarchical time series data as well as methods of evaluating forecasting models. We will cover basic univariate Smoothing and Decomposition methods of forecasting including Moving Averages, ARIMA, Holt-Winters, Unobserved Components Models and various filtering methods (Hodrick-Prescott, Kalman Filter). Time permitting, we will also extend our models to multivariate modeling options such as Vector Autoregressive Models (VAR). We will also discuss forecasting with hierarchical data and the unique challenges that hierarchical reconciliation creates. The course will use the R programming language though no prior experience with R is required.

Credits: 3

Room and Schedule: Gasson Hall 207 Th 06:30PM-09:00PM

ML/AI Algorithms I

Sharma, Arvind

Fall 2024

This course demonstrates how to merge economic data analysis and applied econometric tools with the most common machine learning techniques, as the rapid advancement of computational methods provides unprecedented opportunities for understanding big data. This course will provide a hands-on experience with the terminology, technology and methodologies behind machine learning with economic applications in marketing, finance, healthcare, and other areas. The main topics covered in this course include: advanced regression techniques, resampling methods, model selection and regularization, classification models (logistic regression, Naive Bayes, discriminant analysis, k-nearest neighbors, neural networks), tree-based methods, support vector machines, and unsupervised learning (principal components analysis and clustering). Students will apply both supervised and unsupervised machine learning techniques to solve various economics-related problems with real-world data sets. No prior experience with R or Python is necessary.

Natural Language Processing

Fulton, Lawrence V

Fall 2024

Course Description: This course introduces students to natural language processing (NLP) concepts and methods. Students will learn how to conduct both supervised and unsupervised NLP. The course covers 1) the basics of NLP, 2) text (document) classification, 3) text summarization, 4) text similarity & clustering, 5) semantic analysis, 6) sentiment analysis, and 7) deep learning approaches (Recurrent Neural Networks and transformer-based architecture).

ADAN750001

Algorithmic Ethics and Governance - from traditional to AI/ML

Mc Gowan, Richard, Society of Jesus

Fall 2024

This is a survey course of governance frameworks & techniques for algorithms that are used to make decisions within an organization or in servicing clients. The recent acceleration in the use of Artificial Intelligence (AI) and specifically Machine Learning (ML) techniques have introduced unique opportunities and risks that require governance to encourage their responsible and ethical use. We will start with the intent of governance, its roots, its current manifestations and identify trends that are shaping algorithmic decision-making governance with a focus on for-profit firms, mainly the US. Industries covered will vary but may include the Financial Industry, Healthcare, Manufacturing, Defense, and Biotech for illustrative examples.

AI Algorithms II

Mosaliganti, Kishore R

Fall 2024

This course aims to teach students advanced AI algorithms and covers neural networks, deep learning architectures, and reinforcement learning. The course provides a high-level theoretical overview of each section and discusses practical applications through hands-on projects. The course uses Python as the programming language. Prerequisites: Data analysis and feature engineering, traditional machine learning theory and practice, python programming (intermediate level e.g., familiarity with sci-kit learn, matplotlib, NumPy, pandas), linear algebra, and first-order derivatives.
