

2024–2025 University Catalog

The Boston College University Catalog contains current information regarding the University calendar, admissions, degree requirements, fees, regulations, and course offerings. It is not intended to be and should not be relied upon as a statement of the University's contractual undertakings.

Boston College reserves the right in its sole judgment to make changes of any nature in its program, calendar, or academic schedule whenever it is deemed necessary or desirable, including changes in course content, the rescheduling of classes with or without extending the academic term, cancelling of scheduled classes and other academic activities, and requiring or affording alternatives for scheduled classes or other academic activities, in any such case giving such notice thereof as is reasonably practicable under the circumstances.

The Office of Student Services manages the publication of the University Catalog. They can be reached by e-mail, phone, or mail:

- E-mail: studentservices@bc.edu
- Phone: 617-552-3300 or 800-294-0294
- Address: Boston College, Office of Student Services, Lyons Hall 103, 140 Commonwealth Avenue, Chestnut Hill, MA 02467

Undergraduate Programs

With more than a hundred undergraduate majors, concentrations, and minors, Boston College students have the opportunity to complete degrees in diverse and wide-ranging areas of study. In addition to courses taken for majors, minors, and electives, students also engage with the Core Curriculum, allowing students to step out of their comfort zone and fostering the Jesuit ideal of educating the whole person.

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented in the University Catalog, please contact the [Office of Student Services](#) for a printout of the website.

Carroll School of Management

Founded in 1938, Boston College's Carroll School of Management educates undergraduate students for careers in the various disciplines of management, as well as graduate students and practitioners who seek deeper insights into a complex global economy. The School has a dual mission: to carry out both top-level teaching and cutting-edge research. It sees this mission as a collaborative effort among faculty, staff, and students, in engagement with alumni and other management practitioners.

A Carroll School education is a lively blend of the liberal arts and the functional areas of management. Undergraduates are introduced to a broad slate of topics related to accounting, business analytics, finance, business law, marketing, and other disciplines. But they are also encouraged to branch out and delve into subjects ranging from history and literature to natural science and the fine arts. Academic rigor and close interaction with faculty go hand in hand with this multidisciplinary approach.

Situated within a Jesuit liberal arts university, the Carroll School helps its students cultivate the habits of intellectual discernment along with a commitment to service and the public good. There are numerous opportunities for students to apply their specialized knowledge to a vast array of human, social, and organizational challenges.

In keeping with its philosophy of undergraduate management education, the Carroll School aims to:

- Teach analytical reasoning, problem-solving, and communication skills to create effective leaders.
- Inform students of the latest advances in accounting, finance, data analytics, marketing, operations, and many other fields.
- Help students carve out a specialization in one or more fields, making them ready for management practice and leadership upon graduation.
- Provide them with the tools and inspiration to seek out, develop, and experiment with innovative ideas drawn from a wide mix of sources.
- Create a variety of programs that allow students to gain hands-on experience and apply theory to practice. Specialized research and education centers provide many of these opportunities.
- Develop a multicultural and global outlook, attentive to the needs of diverse communities and a fast-changing world.
- Emphasize the ethical responsibilities of managers and business and assist students in the development of their capacity for moral reasoning.
- Inculcate the habits of lifelong learning and self-reflection.

Through the curriculum and other offerings, Carroll School students are taught to value both knowledge and wisdom, both hard skills and broader insights. They emerge from Boston College as capable professionals and thoughtful leaders ready to make a difference in their organizations and in their world.

Information for First Year Students

In most ways, the first year in the Carroll School of Management resembles the first year in the Morrissey College of Arts and Sciences. Carroll School of Management freshmen are expected to focus their study on aspects of the University's Core curriculum (described in the University Policies and Procedures section); the study of courses required in the Management Core, with the exceptions noted below, usually begins in earnest in sophomore year.

All Carroll School freshmen will enroll in Portico (PRTO1000), a 3-credit course, offered in the fall semester, which combines an introduction to business with ethics and attention to globalization.

During freshman year, Carroll students should also complete the Writing Seminar and Literature Core requirements, and Statistical Analysis (BZAN1135). These four courses, or their equivalent via Advanced Placement, and Excel for Business Analytics (BZAN1037) are indispensable

in the first year. Note that there is no necessary sequence for the above-mentioned courses; they may be taken in any order, either semester, during the first year.

What other courses should a freshman pursue? Students contemplating study abroad should be aware that some programs require a language proficiency and may want to consider taking a relevant language course(s).

Freshmen should also consider enrolling in one of the University's hallmark programs, PULSE or Perspectives, which fulfill both the Philosophy and the Theology Core requirements. Perspectives, with the exception of a few sophomore sections, is restricted to freshmen; PULSE may be taken at any time except senior year.

Other possibilities for freshman year include the History core courses, Principles of Economics (ECON1101), plus innovative courses in the Enduring Questions and Complex Problems Core offerings.

While the preceding remarks capture a range of possibilities, even greater possibilities await a student possessed of Advanced Placement, transfer, or International Baccalaureate credit. Such students should consult carefully with the Senior Associate Dean and their faculty orientation advisor in crafting a plan of study for their first year.

Management Core Courses

- PRTO1000 Portico (freshman, fall)
- BZAN1135 Statistical Analysis (freshman)
- ECON1101 Principles of Economics (freshman or sophomore)
- ISYS1021 Digital Technologies (freshman)*
- BZAN1037 Excel for Business Analytics (1 credit, freshman)**
- ACCT1021 Financial Accounting (sophomore or freshman)
- BZAN2021 Coding for Business (sophomore or freshman)
- BSLW1021 Introduction to Law (sophomore or junior)
- MGMT1021 Organizational Behavior (sophomore or junior)
- BZAN1021 Operations Management (sophomore or junior)
- MFIN1021 Fundamentals of Finance (sophomore or junior)
- MKTG1021 Principles of Marketing (sophomore or junior)
- MGMT3099 Strategic Management (senior)
- 4–6 CSOM concentration courses (junior, senior)
- 12-15 credits of MCAS Electives (any year)***

With the exception of MGMT3099 Strategic Management, all Management Core courses usually are completed by the end of the junior year. Students who have transferred, who have done a semester or a year abroad, or who have had deficiencies may have to modify their schedules somewhat.

Students in the Classes of 2025 and 2026 pursuing a minor in the Morrissey College of Arts and Sciences or the Lynch School of Education and Human Development may elect to eliminate one of the Carroll School core management courses. Students who complete the pre-medical program requirements (without a major or minor in MCAS) are eligible for this incentive as well. A student pursuing a major in the Morrissey College of Arts and Sciences may elect to eliminate two of the Carroll School core management courses. Selection of the eliminated courses must be done with advising from the Associate Dean's office. No one may eliminate Portico, Financial Accounting, Statistical Analysis, Coding for Business, or Principles of Economics. Note: Students are not eligible to combine any of the incentives above (i.e., a student with two minors may not eliminate two courses).

Prerequisites, which are listed in the individual course descriptions, must be followed.

*For the Class of 2026 onward, ISYS1021 Digital Technologies is no longer required.

**For the Class of 2025 onward, students will be required to take BZAN1037 Excel for Business Analytics.

***For the Class of 2027 onward, students will be required to take 15 credits of non-CSOM Electives and are not eligible to reduce their Management Core class by one or two for minors and majors outside of the Carroll School, respectively.

Requirement for Good Standing

Students must complete 120 credits to earn the bachelor's degree. To continue enrollment in a full-time program of study, a student must maintain a cumulative average of at least 1.5 as the minimum standard of scholarship and must not fall more than 6 credits behind the total number of credits a student of their status is expected to have completed (15 credits each semester freshman, sophomore, junior, and senior year).

Any student who is permitted by the dean to continue enrollment in a full-time undergraduate program is considered to be in good standing.

Academic Dismissal

At the end of each semester, students who do not meet the academic standards of the Carroll School of Management are dismissed. Possible grounds for academic dismissal include the following:

- Passing fewer than three courses (or 9 credits) in a semester
- Passing fewer than eight courses (or 24 credits) in an academic year (except senior year)
- Passing fewer than 18 courses (or 54 credits) by the end of sophomore year
- Passing fewer than 28 courses (or 84 credits) by the end of junior year
- A cumulative grade point average of below 1.5
- Students with any combination of 7 withdrawals and/or failures may be permanently dismissed

A student on academic warning may return to good standing by approved methods (e.g., make-up of credits via approved summer school work; students may make up no more than 12 credits in summer study). A student who incurs additional failures or withdrawals or carries an unapproved underload while on academic warning may be required to withdraw from the School at the time of the next review.

Morrissey College of Arts and Sciences Major

Students who have a very strong interest in an area in Arts and Sciences may complete a major in the Morrissey College of Arts and Sciences by careful use of their electives. For example, it is possible to graduate with a concentration in Finance and a major in Philosophy or History. Students interested in this option should contact their Carroll School advisor and the department undergraduate advisor in the Morrissey College of Arts and Sciences as early in their studies as possible.

Pre-Medical Studies

Carroll School students are also eligible to pursue a pre-medical course of study in addition to their management curriculum.

International Study

Studying and living in another country enables students to broaden their horizons and experience a different culture. Carroll School of Management students who have a 3.0 GPA or higher are eligible to study abroad during their junior year. During the spring semester of freshman year, the Dean's Office sponsors an informational session for management students interested in studying abroad; a subsequent fall semester study abroad fair for first-semester sophomores encourages further exploration of program options. All students interested in international study should visit the Office of Global Education early in their sophomore year.

The Office of Global Education administers a growing number of programs for Boston College including course-based summer programs for those who desire a shorter abroad experience or cannot go during the regular academic year. Carroll School of Management students may avail themselves of opportunities for study in excellent institutions in the Pacific Rim, continental Europe and the United Kingdom, South America, and Eastern Europe, among others. See elsewhere in this Catalog for a full listing.

Special Programs

Pre-Professional Studies for Law

Pre-Law students need clear reasoning power, a facility for accurate expression, a mature balance of judgment, and the ability to appreciate the moral, social, and economic problems related to the administration of justice in modern society. The Carroll School of Management offers an ideal opportunity to develop these qualities both through the Liberal Arts Core and specialized management courses, notably, those case-style courses which place a premium on analytical powers and a capacity in both oral and written expression.

Carroll School students interested in law should contact Kamryn Gooden, Assistant Director for Career Education, in the Career Center, and the University's pre-law advisor.

The Ethics Initiative

In addition to Portico (PRTO1000), many regular Carroll School of Management courses integrate ethical issues in business and management. Elective courses in accounting, marketing, law, and operations are focused on ethical issues specific to those disciplines.

The Winston Center for Leadership and Ethics offers annual lecture, seminar, and workshop programs on ethics and leadership for undergraduate students.

Summer Management Catalyst Program

The Carroll School of Management Summer Management Catalyst Program is an intensive, full-time, 8-week program designed to develop a solid and broad foundation in the functional areas of management for non-management students.

Participants register for 11 credits that cover a wide range of business management topics, including accounting, finance, marketing, ethics, law, Excel, big data, and career skills.

Additional information and application can be found at bc.edu/catalyst.

Catalyst Program Benefits

- Learn how organizations operate and develop management skills to contribute to complex, not-for-profit, business, and government entities.
- Complete three core management courses and one Career Practicum in one summer and receive 11 credits—ideal for students who find it difficult to fit management courses into their schedule and students interested in completing a Carroll School minor.
- Develop career strategies in building your personal brand through sessions on skills assessment, writing resumes and business letters, interviewing skills, effective networking, and employer panels.
- Connect exclusively with potential employers through alumni networking and recruiting panel events.

Stand out in the competitive job market for internships or full-time positions with enhanced credentials from the summer program, including Excel and exposure to programming languages.

Carroll School of Management Dean's Office Courses

PRTO1000 Portico (Fall: 3)

This course is required for all Carroll School students and must be taken in the fall semester of their first year at BC. Portico fulfills the Carroll School ethics requirement.

This is the introductory course for Carroll School of Management's first-year students. Topics will include ethics, leadership, globalization, economic development, capitalism, innovation, entrepreneurship, vocational discernment, and the types and structures of organizations operating in the business world. This will be an interactive 3-credit seminar, serving as one of the five courses in the fall semester and fulfilling the ethics requirement for the Carroll School. The instructor will serve as an academic advisor during the student's first year.

The Department

BCOM1021 Essential Business Communication

Essential Business Communication is a one-credit asynchronous course designed to support sophomores (and second-semester first-year students) transitioning from academic to business writing and preparing them for on-the-job communication. Students learn how to boost their business writing and presentation skills through various activities, including analyzing audiences, writing everyday business communication, collaborating, and presenting. Instructors and writing coaches provide individualized feedback to students in this online environment. The course is graded pass/fail. The course will be offered in one five-week term within a semester.

The Department

BCOM6688 Business Writing and Communication Skills for Managers (Fall/Spring: 3)**Restricted to CSOM**

The course focuses on the type of communication done on the job, especially in corporations. Business assignments are used to illustrate appropriate writing and communication strategies, protocols, practices, styles, and formats. Students work alone and in collaboration with others around a variety of assignments and tools, including everyday business communications, reports, proposals, and presentations. By the end of the semester, students will be proficient in producing business materials for a variety of audiences including clients, colleagues, managers, and executives.

Rita Owens

PRTO2401 Free Markets, Faith, and the Common Good (Spring: 3)

If sharing our gifts, pursuing justice, and acting on our concern for the poor and marginalized of society are core values of Jesuit-trained students, to what extent is free market capitalism a good "fit" for helping us meet those goals? In this course, we will explore several key moral and philosophical foundations of free market capitalism. These arguments will then be placed in dialogue with central insights contained in Catholic social teaching, especially the principles of human dignity, solidarity, the preferential option for the poor, and the common good.

Joseph Cioni

PRTO2402 American Commerce and American Culture

By any number of measures, the American social fabric is fraying. Long before the exacerbations of a global pandemic, polarization was increasing, trust was plummeting, deaths of despair were on the rise, civic participation was down, and we heard talk of a growing epidemic of loneliness. All this amidst a world-historical expansion of wealth and falling rates of crime. What is going on? This course begins with the suspicion that American business plays a central, underappreciated role in the ongoing evolution of our social fabric. It aims to ask: how do the business community's deep assumptions, values and practices shape our sense of ourselves and each other? Our senses of safety and precarity? Our inclinations to creativity and conformity? This course will examine key documents from management theory, social science, philosophy and literature to explore some ways that American commerce and American culture shape one another, and how this relationship can be brought into healthier alignment.

The Department

PRTO4307 Happiness in a Commercial Society (Spring: 3)

The aim of this course is to introduce students to the interdisciplinary study of human well-being with a special emphasis on how that pursuit is influenced by contemporary capitalism and commercial life in general. The course will include philosophical, psychological, and social scientific inquiries into human flourishing as they apply to topics such as the relationship between wealth and happiness, the nature of meaningful work, the changing structure of relational networks, as well as practical strategies for emotional regulation and increased self-knowledge.

Michael Smith

Jeremy Evans

PRTO4309 Everybody's Working for the Weekend: Ambition and Alienation (Spring: 3)

This course will propose an answer to the following question: Why does it seem like some people are more ambitious than others? On the surface, those with what appears to be a natural drive to succeed seem to become more affluent. That is to say, some people appear to embrace hustle culture, or the idea that any time spent not making money is wasted time, while others are drawn toward a trend identified around 2021 as quiet quitting, that is to say, they refuse to devote more time and energy to their work than is absolutely necessary to avoid losing their jobs. Why is this apparent lack of ambition and motivation so prevalent? Can we blame mere laziness? This question will be answered with a resounding no. Rather, this class will show that there are indeed systematic measures in place that cause some to not appear as motivated as others. In order to work through this answer, this class will look at alienation and capitalism. This course will address the effects of systemic racism, automation and AI, environmental concerns, generational trends, and the COVID-19 pandemic on ones

ambition to succeed in the workforce. This course will combine philosophical readings from Marx, Weber, Arendt, and others with contemporary business case studies.

Christine Rojcewicz

PRTO4901 Special Topics: The Ethics of Capitalism (Spring: 3)

This course explores the philosophical basis and moral implications of contemporary commercial life. Along the way, we will consider the role of business in society, the relationship between capitalism and democracy, and the ethics of consumption, among other issues where market values intersect public and private virtues.

Michael Smith

Jeremy Evans

UGMG1010 Perspectives on Management (Spring: 3)

This course, taught by practitioners John Clavin (BC '84) and Jere Doyle (BC '87), provides BC students with an excellent opportunity to explore the functional disciplines of business from a real-world perspective. Using a combination of lectures, case studies, readings, and outside speakers, the course provides students the opportunity to get grounded in each of the CSOM concentrations while gaining outside views on careers in related fields and industries. The course will also provide a framework to explore and discuss cross-functional issues that impact business strategy and execution. This is a highly interactive class that places a premium on both preparation and participation each week. The course is initially open to CSOM sophomores but normally has availability for juniors and seniors across all undergraduate majors

John Clavin

Jeremiah Doyle

UGMG1222 Career Bridge

Career Bridge will equip first generation and high financial need college students with the confidence and knowledge to have a successful experience navigating BC. Career Bridge will follow a discussion-based model, emphasizing class participation in three main topic areas: BC experience, personal discernment, and career discernment. Have you struggled getting your footing on campus? Are you looking for a like-minded community? Undecided on what concentration to pursue & how this will impact your career choices? If you answered yes to any of these questions, this course is for you. To inquire about joining, please connect with Drew Barksdale, barksdaa@bc.edu.

Andrew Barksdale

UGMG2222 Career Accelerator (Fall/Spring:1)

Restricted to sophomores and second-semester freshmen in the Carroll School of Management

It is a 1-credit pass/fail course consisting of nine 75-minute sessions designed to ensure that you learn the following: how to identify your top skills/interests and explore career fields that are a good match; how to write an effective resume/cover letter; how to talk about yourself to employers; how to network effectively and utilize the BC Network; how to interview to get the job; how to dress to impress; how to make a positive first impression; how to use social media to your advantage. This course utilizes a group of about 300 alumni called Eagle Experts who you will utilize for learning to network and for conducting a mock interview. You will also hear from a panel of recruiters to help you better understand the ins and outs of campus recruitment.

Amy Donegan

Morenike Eastman

UGMG4301 Personal Finance Fundamentals: Learning How to Manage your Money

This comprehensive and practical class aims to equip you with essential financial knowledge and skills to make informed decisions about managing your personal finances. Over the length of this course, we will provide you with the necessary knowledge and tools to move into your professional career with confidence and knowledge about your personal finances.

Andrew Barksdale

Managing for Social Impact and the Public Good

The Managing for Social Impact and the Public Good minor is jointly sponsored by the Carroll School of Management and the Morrissey College of Arts and Sciences.

Managing for Social Impact and the Public Good aims to provide students with a well-defined, interdisciplinary minor focused on analyzing the multifaceted impacts of today's global corporations, social enterprises, public sector, and nonprofit organizations.

In successfully completing this minor, students will:

- Develop a theoretical and practical understanding of the extended social impacts of global corporations and why responsible enterprise values and the public good are relevant for all stakeholders
- Learn to apply research and critical thinking to understand the challenges, benefits, and current practices in corporate social responsibility
- Explore the philosophical, ethical, legal, economic, and ecological implications of the decisions made by corporate and public sector global leaders through case studies, readings, and class discussions
- Understand the challenges, available tools, and innovative models for managing social impacts and balancing stakeholder value in a variety of corporate, nonprofit, and public sector organizations
- Develop and articulate a personal vision for integrating moral decision-making, social justice, citizenship, and responsible management in their future professional lives

Course Requirements

The Managing for Social Impact and the Public Good interdisciplinary minor is an 18-credit program. Students have the option to select electives that focus on one of these three areas:

- Digital Economy, Social Innovation, and Citizenship
- Economic Development, Equality, and Enterprise
- Environmental and Economic Sustainability

Students must take the two required courses described below and earn at least 12 additional credits by taking approved elective courses. No more than 3 credits in this minor may be applied to fulfilling the requirements for another major, minor, or Core requirement.

The following two Carroll School courses are required:

- BSLW3345 Managing for Social Impact (fall/spring)
- BSLW6001 Leading for Social Impact (spring of senior year)

The electives are described further on our [Managing for Social Impact and the Public Good](#) website.

Study Abroad

A course taken during a semester abroad may be approved as an elective counting toward the Managing for Social Impact minor, but such courses must be pre-approved by the directors of the program **before** enrollment if they are to be counted. After a student completes the pre-approval process, credit for courses taken abroad will only be granted upon the student's return from the program, based on the graded work completed for the course.

Declaring the Minor

For questions about the Managing for Social Impact minor, contact the Carroll School Senior Associate Dean's Office at carrollug@bc.edu.

Accounting

The objective of the accounting curriculum sequence is to prepare students for a career, either in accounting or a related field. This curriculum is broad in scope and coverage, so it is relevant and useful for careers in public accounting, industry, financial institutions, government, information systems, law, and not-for-profit organizations.

There are three concentrations housed in the Accounting Department: (1) Accounting, (2) Accounting for Finance and Consulting, and (3) Accounting and Information Systems. Students are not permitted to concentrate in more than one of these.

Students outside of CSOM will be able to complete one of two minors in accounting, Accounting for CPAs and Accounting for Finance and Consulting. The requirements for a minor are based on a selection of the required and elective courses for the Accounting and the Accounting for Finance and Consulting concentrations.

[Accounting Courses](#)

[Accounting Faculty](#)

[Accounting Website](#)

Concentration in Accounting

The objective of the accounting curriculum sequence is to prepare students for a career, either in accounting or a related field. This curriculum is broad in scope and coverage, so it is relevant and useful for careers in public accounting, industry, financial institutions, government, information systems, law, and not-for-profit organizations. Students intending to acquire a Certified Public Accountant (CPA) designation should choose this concentration to best satisfy its requirements.

Objectives

The objectives of the Accounting Concentration are as follows:

(1) Prepare the student to successfully pass the CPA exam. The exam includes three core parts - covering financial reporting, auditing, and tax – and a fourth part chosen by the candidate (business analysis, information systems, or tax compliance). The course requirements for the concentration provide a sound basis for preparing students to successfully pass each section of the exam. Passing the CPA exam and becoming a licensed accountant opens the door to many careers in addition to professional accounting. The CPA designation not only signals a specific set of skills but is also indicative of the dedication and rigorous analytical skills useful in numerous nonaccounting pursuits.

(2) Provide a broad-based understanding of the use of accounting data and information by managers and others for decision-making. Although most graduates with an Accounting Concentration begin their careers in public accounting, the mid- and long-term career options are diverse, and our graduates now hold key positions in corporate finance, human resources, marketing, economics, entrepreneurship, government, education, and many other fields.

REQUIRED 15 credits hours in:

- ACCT1022 Managerial Accounting
- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost and Strategic Analysis
- ACCT4405 Federal Taxation

AND at least 3 credits from one of the following four courses only:

- ACCT3309 Audit and Other Assurance Services*
- ACCT3351 Financial Statement Analysis

- ACCT6601 Financial Accounting Standards and Theory III (Spring)
- ACCT6618 Accounting Information Systems

***Auditing** is a requirement to sit for the CPA exam in all states.

Most states require eight to eleven accounting classes (24 to 33 accounting credit hours) to be qualified as a Certified Public Accountant (CPA). Because the accounting concentration requires only six accounting classes (18 credits), in addition to ACCT1021 Financial Accounting (3 credit hours) included in the CSOM core, a student must take additional accounting classes. **The department offers a number of accounting electives that students can take to satisfy their CPA requirements.**

After taking ACCT3301, students desiring to switch from the Accounting Concentration to the Accounting for Finance and Consulting Concentration may do so by supplementing ACCT3301 with a one-credit independent study that together will satisfy the ACCT3321 requirement for that concentration.

Accounting Department Electives

- ACCT3309 Audit and Other Assurance Services
- ACCT3330 ESG Reporting and Analysis: Accounting for a Changing World (Fall)
- ACCT3351 Financial Statement Analysis
- ACCT3399 Directed Readings and Research
- ACCT6601 Financial Accounting Standards and Theory III (Spring)
- ACCT6615 Advanced Federal Taxation
- ACCT6618 Accounting Information Systems
- ACCT6626 Taxes and Management Decisions (Spring)
- ACCT6634 Ethics and Professionalism in Accounting**
- ACCT6635 Forensic Accounting

**** Please note: Massachusetts is no longer accepting this course as one of the required 10 accounting classes.**

Please check with the state where you plan to practice to see if this course will count towards your required Accounting credits.

Concentration in Accounting for Finance and Consulting

The Accounting for Finance and Consulting Concentration builds on the CSOM core curriculum and is a great complement to many other concentrations, including Finance, Marketing, and Business Analytics. Students with this concentration can pursue a wide variety of careers in business, including financial analysis, investment banking, consulting, marketing, and management training programs. Skills learned in this concentration position students for greater upward mobility in their career paths, because the need for managers with an understanding of financial statements and financial reporting is evergreen. This concentration is designed to inform users of financial statements (rather than preparers of financial statements) how accounting information, shaped by regulation, has advantages and limitations in assessing the economics of an underlying business.

Objectives

The objectives of the Accounting for Finance and Consulting Concentrations are as follows:

- (1) Expand and deepen your knowledge of external financial reporting and choices that managers make in preparing information for SEC filings. This knowledge is critical for both those who plan to use financial statements to analyze or value companies and those whose jobs require an understanding of how business decisions affect financial statements.
- (2) Provide an understanding of the accounting data and information managers use for internal decision-making. For students interested in marketing or consulting, this knowledge enables you to accurately assess the true costs of producing a product or service and to identify the relevant information for make-versus-buy decisions. You will develop the skills needed to accurately forecast revenues, expenses, and product demand. You will also understand how to set important organizational controls.

(3) Provide students with the financial tools and accounting savvy needed to converse with upper-level management about the operations of the firm.

Guidelines and Courses

This concentration requires four courses (12 credit hours): one intermediate accounting course, one required elective in either managerial cost analysis or financial statement analysis, and two other electives from a set of approved electives in accounting, finance, business analytics, or economics. Please check the prerequisites for each course.

REQUIRED 3 credit hours in:

- ACCT3321 Intermediate Accounting for Finance and Consulting*

AND at least 3 credit hours from one of the following:**

- ACCT3307 Managerial Cost Analysis
- ACCT3351 Financial Statement Analysis

AND at least 6 credit hours from two of the following*:**

- ACCT3307 Managerial Cost Analysis **or** ACCT3351 Financial Statement Analysis
- ACCT3309 Audit and Other Assurance Services
- ACCT3330 ESG Reporting and Analysis: Accounting for a Changing World (Fall)
- ACCT4405 Federal Taxation
- ACCT6601 Financial Accounting Standards and Theory III (Spring)
- ACCT6615 Advanced Federal Taxation
- ACCT6618 Accounting Information Systems
- ACCT6626 Taxes and Management Decisions (Spring)
- ACCT6635 Forensic Accounting
- BZAN3307 Machine Learning
- BZAN3375 Operations Strategy and Consulting
- BZAN6606 Forecasting Techniques
- ECON2228 Econometric Methods
- MFIN2235 Investment Banking
- MFIN6616 Intro to the Investment Banking Industry

*Students desiring to switch from the Accounting concentration after taking ACCT3301 (FAST I) have two options. You may take a one-credit independent study which, together with ACCT3301, will satisfy the ACCT3321 requirement. Alternatively, you may take ACCT3302 as one of your electives. Both courses together will satisfy the ACCT3321 requirement.

**Both classes may be taken, and the second one will count as an elective.

***A maximum of one elective can count towards the requirements of two different concentrations.

Concentration in Accounting and Information Systems *

Employers continually emphasize the value of graduates who understand both business and the information system (IS) that supports it. While IS professionals develop competence in the design and implementation of business information systems, accountants have a broad understanding of the business process and controls and how the systems are used to generate information for decision-making. Having the two skill sets is invaluable.

Students fulfilling this concentration will satisfy all of the requirements for the IS concentration and also obtain a background in Accounting. The curriculum entails five courses (four required and one Accounting elective) and is designed for students interested in careers either with

the consulting divisions of professional service firms, such as major accounting firms and IS departments of companies, or as IS auditors. Students are advised to see a faculty advisor in selecting an appropriate Accounting elective. This concentration is administered jointly by the Accounting Department and the Information Systems Department.

***This Concentration ends with the class of 2025.**

Required 12 credit hours in:

- ACCT3301 Financial Accounting Standards and Theory I
- ACCT6618/ISYS6618 Accounting Information Systems
- ISYS3257 Database Systems and Applications (or CSCI2257)*
- ISYS4258 Systems Analysis and Design

***Beginning with the class of 2024, ISYS3350 Data Management for Analytics and Applications will be required in place of ISYS3257 or CSCI2257.**

And at least 3 credit hours from one of the following:

- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost and Strategic Analysis
- ACCT3309 Audit and Other Assurance Services
- ACCT3351 Financial Statement Analysis

Accounting for CPAs Minor

This minor is for students who are interested in working in public accounting. Please note: To meet the CPA requirements, students will need several courses beyond the minor.

The objective of the accounting curriculum sequence is to prepare the student for a professional career in public accounting, industry, financial institutions, government, information systems, law, or not-for-profit organizations. The curriculum is broadly based on its scope and coverage so as to be relevant and useful for a variety of careers. Students intending to acquire a Certified Public Accountant (CPA) designation should choose this minor to best satisfy its requirements. For more information, see the discussion of the Accounting Concentration.

Please note: This MCAS minor does not ensure that a student meets all requirements for sitting for the CPA exam. For instance, most states require a significant number of general business classes to sit for the CPA exam. This minor is only meant to give an MCAS student a start on meeting the many requirements. Interested students can work with faculty to construct a sequence of courses that will satisfy the requirements to sit for the CPA exam.

REQUIRED 18 credit hours in:

- ACCT1021 Intro to Financial Accounting
- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II
- ACCT3307 Managerial Cost Analysis
- ACCT3309 Auditing and Other Assurance Services*
- ACCT4405 Federal Taxation

***Auditing** is a requirement to sit for the CPA exam in all states.

Most states require eight to eleven accounting classes (24 to 33 accounting credit hours) in order to be qualified as a Certified Public Accountant (CPA). Because the accounting minor requires only six accounting classes (18 credit hours), a student must take additional accounting classes. The department offers a number of accounting electives that students can take to satisfy their CPA requirements.

After taking ACCT3301, students desiring to switch to the Accounting for Finance and Consulting minor may do so by supplementing ACCT3301 with a one-credit independent study that together will satisfy the ACCT3321 requirement for that minor.

Accounting Department Electives

- ACCT1022 Managerial Accounting
- ACCT3330 ESG Reporting and Analysis: Accounting for a Changing World (Fall)
- ACCT3351 Financial Statement Analysis
- ACCT3399 Directed Readings and Research
- ACCT6601 Financial Accounting Standards and Theory III (Spring)
- ACCT6615 Advanced Federal Taxation
- ACCT6618 Accounting Information Systems
- ACCT6626 Taxes and Management Decisions (Spring)
- ACCT6634 Ethics and Professionalism in Accounting*
- ACCT6635 Forensic Accounting

*Please note: Massachusetts is no longer accepting this course as one of the required 10 accounting classes. Please check with the state you plan to practice in to see if this course will count towards your required Accounting credits.

Accounting for Finance and Consulting Minor

The Accounting for Finance and Consulting minor leverages the critical thinking and communication skills developed in the MCAS curriculum, providing students with key skills that distinguish them from other new hires in financial services or consulting. It also provides students with an advantage in graduate business programs.

Objectives:

The objectives of the Accounting for Finance and Consulting minor are:

- (1) Develop your knowledge of external financial reporting and choices that managers make in preparing information for SEC filings. This knowledge is critical for both those who plan to use financial statements to analyze or value companies and those whose jobs require an understanding of how business decisions affect financial statements.
- (2) Provide an understanding of the accounting data and information managers use for internal decision-making. For students interested in consulting, this knowledge enables you to accurately assess the true costs of producing a product or service and to identify the relevant information for make-versus-buy decisions. You will develop the skills needed to accurately forecast revenues, expenses, and product demand. You will also understand how to set important organizational controls.
- (3) Provide students with the financial tools and accounting savvy needed to converse with upper-level management about the operations of the firm.

Requires 18 credit hours:

Required Courses:

- ACCT1021 Financial Accounting
- ACCT3321 Intermediate Accounting for Finance and Consulting*

Choose a Track:

Consulting Track

- ACCT1022 Managerial Accounting

- ACCT3307 Managerial Cost Analysis

Finance Track

- MFIN1021 Fundamentals of Finance
- ACCT3351 Financial Statement Analysis

*AND 6 credit hours from the following list of electives (check the prerequisites for each course).***

- ACCT1022 Managerial Accounting **and** ACCT3307 Managerial Cost and Strategic Analysis
- ACCT3309 Audit and Other Assurance Services
- ACCT3330 ESG Reporting and Analysis: Accounting for a Changing World (Fall)
- ACCT4405 Federal Taxation
- ACCT6601 Financial Accounting Standards and Theory III (Spring)
- ACCT6615 Advanced Federal Taxation
- ACCT6618 Accounting Information Systems
- ACCT6626 Taxes and Management Decisions (Spring)
- ACCT6635 Forensic Accounting
- BZAN3307 Machine Learning
- BZAN3375 Operations Strategy & Consulting
- BZAN6606 Forecasting Techniques
- ECON2228 Econometric Methods
- MFIN1021 Fundamentals of Finance **and** ACCT3351 Financial Statement Analysis
- MFIN2235 Investment Banking
- MFIN6616 Intro to the Investment Banking Industry

*Students wanting to switch from the Accounting for CPA minor after taking ACCT3301 (FAST I) have two options. You may take a one-credit independent study which, together with ACCT3301, will satisfy the ACCT3321 requirement. Alternatively, you may take ACCT3302 as one of your electives. Both courses together will satisfy the ACCT3321 requirement.

**Electives may also include both courses from the other track (both will count together, but not separately). A maximum of one elective can count towards the requirements of two different minors/concentrations.

Information for Study Abroad

Given the international scope of the profession, Accounting concentrators are encouraged to study abroad. The Accounting Department will endeavor to recognize elective courses for transfer to BC when appropriate. Prior approval is required in every case. All Accounting concentrators or minors should meet with the department assistant chair or department chair to plan their study abroad programs and to obtain definitive course approvals.

CPA Recommendations

The Department recommends that students who intend to practice as Certified Public Accountants (CPAs) check the board of accountancy of the state in which they plan to practice for its specific educational requirements ([nasba.org](https://www.nasba.org)). In almost all states, students are now required to complete 150 semester hours of course work to qualify for CPA licensure. In addition, a minimum number of accounting courses with specific topical coverage may be necessary. For more information please refer to the BC Guide to Meeting CPA Requirements available online or in the department office.

Because Boston College students typically graduate with only 120 credit hours (ignoring AP credits and overloads), students may require an extra year of course work in order to meet the 150 credit hours. Most undergraduates are able to meet the additional hours through AP credit transfers, overloads, and/or online/summer courses. However, Boston College offers a Master of Science in Accounting (M.S.) program to meet these additional requirements. For more details on the program, refer to the Boston College M.S. website: bc.edu/msa. Students

who enter BC with Advanced Placement credits may be able to satisfy the 150-hour requirement in less time. Please contact the Accounting Department in Fulton 520 or via e-mail at csom.accounting@bc.edu if you have any additional questions.

Business Analytics Website

Concentration in Business Analytics

Business Analytics is the emergent capability for organizations in the twenty-first century. All organizations, regardless of industry, size, or operating environment generate and manage large volumes of data and information that, used well, inform the decision-making and competitive capabilities of the enterprise. The emerging area of analytics is focused on using business data to examine what already happened, to determine or predict what will happen, and to explore or model what should happen. Successful managers across functional areas, whether finance, marketing, operations, human resources, or information systems, need to be able to understand and utilize business analytics in order to manage and lead effectively.

Business Analytics draws upon a portfolio of methods and tools including statistics, forecasting, experimental design, data mining, and modeling to turn data into information and insights. The business analytics field includes descriptive, predictive, and prescriptive analytics. Descriptive analytics help organizations describe what has happened in their operating environment and includes gathering, organizing, tabulating, and communicating historical information, e.g., how many online subscribers do we have? Predictive analytics helps organizations understand what to do by uncovering relationships and associations in the available data and uses techniques such as probability and forecasting to reveal the likelihood of outcomes. For example, the number of online subscribers increases when we have banner advertising on search sites. Prescriptive analytics is focused on understanding the causal effects that can be discerned from data sets and strives to predict what will happen, given a particular course of action. For example, if we increase our banner advertising and provide one-click subscribing, how will the number of subscribers change?

The Business Analytics concentration builds upon the Carroll School of Management core. The concentration is designed to align with a variety of functional disciplines making Business Analytics an excellent complement to other concentrations including Accounting, Operations Management, Finance, Marketing, Information Systems, or Management and Leadership.

Objectives of the Undergraduate Co-Concentration in Business Analytics

The objectives of the undergraduate co-concentration are to develop managers who:

- Possess a broad and deep understanding of theories and concepts in business analytics
- Are adept at data management and analysis
- Understand and utilize quantitative techniques for historical analysis, predictive analysis, modeling, and simulation
- Are capable of applying analytical skills and knowledge to address management problems across disciplines and industries

Careers in Business Analytics

Rather than simply answering questions about what, how, when, and where things have happened, today's business analysts are able to push the use of data further, find out why things are happening and what will happen if identified trends continue, and model how an organization can use this information to optimize outcomes. Careers that utilize the skills and knowledge of business analytics continue to emerge and grow in all fields and business disciplines. Students with this co-concentration may pursue careers in consulting, financial services, healthcare services, accountancy, technology management, government, manufacturing, and not-for-profit organizations. The demand for managers with these skills is strong and will increase as firms continue to recognize that they compete not only with new products and services, but also with a high degree of competence in managing their data, information, and business intelligence.

Business Analytics Co-Concentration Requirements

Business Analytics Co-Concentration Class of 2023

The following three courses are required for students co-concentrating in Business Analytics who belong to the class of 2023:

- ISYS3340 Data Analytics in Practice (fall and spring)
- BZAN3384 Predictive Analytics (fall and spring)
- BZAN6604 Management Science (fall and spring)

Select two additional courses, excluding any courses taken from above *list*:

- BZAN6614 Quality Management (offered periodically)
- BZAN3307 Machine Learning for Business Intelligence (fall and spring)
- BZAN3310 Sports Analytics (fall and spring)
- BZAN3385 Applied Statistical Modeling (fall and spring)
- BZAN6605 Risk Analysis and Simulation (offered periodically)
- BZAN6606/MFIN6606 Forecasting Techniques (fall, online, and spring)
- BZAN6608 Pricing and Revenue Optimization (offered periodically)
- ISYS2157 Programming for Management and Analytics (fall and spring) (or CSCI1101)
- ISYS3257 Database Systems and Applications (fall and spring)
- ISYS3360 Machine Learning and Artificial Intelligence (fall)
- ISYS6621 Social Media, Emerging Technologies, and Digital Business (fall)
- ISYS6625 Geographic Information Systems (fall and spring)
- ISYS6645 Data Visualization (fall and spring)
- MKTG2153 Customer Research and Insights for Marketing Decisions (fall and spring)
- MKTG3114 Pricing and Demand Analytics (offered periodically)
- MKTG3161 Customer Relationship Management (fall and spring)
- MKTG3258 Marketing Analytics for Customer Insights (spring)
- ACCT6640 Dive, Dissect, and Decide with Big Business Data (spring)
- MFIN2270 Data Analytics in Finance (fall and spring)

Business Analytics Concentration Classes of 2024 and Beyond

The following course is required for students concentrating in Business Analytics who belong to the class of 2024 and beyond:

- BZAN3385 Advanced Statistical Modeling (fall and spring)

Students must choose two of the following courses:

- ISYS3350 Data Management for Analytics and Application (fall and spring)
- BZAN6604 Management Science (fall and spring)
- BZAN3307/ISYS3360 Machine Learning (fall and spring)

Students must choose two electives from the list below:

- ISYS2160 IOS/Swift Programming
- ISYS2170 Physical Computing
- BZAN3310 Sports Analytics
- ISYS4258 Systems Analysis and Design
- BZAN6612 Forecasting for Business Analytics
- ISYS6625 Geographic Information Systems
- ISYS6641 Cybersecurity
- ISYS6645 Data Visualization
- ISYS6655 Introduction to Blockchain and Its Business Applications
- ACCT6640 Dive, Dissect, and Decide with Big Business Data
- MFIN2270 Data Analytics in Finance
- MKTG2153 Customer Research and Marketing Decisions

Concentration in Operations Management

Operations Management is a broad and multi-dimensional business area. Highly integrative, Operations Management determines how an organization executes its mission and goals. Operations Management is both an art and a science, tying together quantitative analytical skills with cognitive problem-solving.

The Operations Management concentration provides students with knowledge of current issues in the Operations Management discipline. Intense competition in fast-paced global environments makes competencies in this field critical in both service and goods-producing organizations. This concentration is applicable in many industries and organizations, combining knowledge in business analytics, process design and analysis methods, project management, and operations management issues. The curriculum recognizes environmental, ethical, and social issues. The pedagogy entails lectures and discussions, case studies, field studies, and analytical modeling.

The Operations Management concentration builds upon the Carroll School of Management core, particularly complementing courses in statistics, organizational management, and economics. Our courses emphasize analysis and decision-making and are explicitly designed to deliver the skills and knowledge required to successfully manage people, processes, and systems in today's competitive environment.

The concentration is designed to intersect with other functional disciplines making Operations Management an excellent complement to other concentrations including Accounting, Business Analytics, Finance, Marketing, Information Systems, or Management and Leadership.

Objectives of the Undergraduate Concentration in Operations Management

The objectives of the undergraduate concentration are to develop managers who:

- Possess a broad and deep understanding of theories and concepts in Operations Management
- Are capable of applying skills and knowledge to address management problems
- Understand and utilize quantitative and qualitative analysis in decision making
- Appreciate the role of operations in an organization and the interrelationships among functional areas

Careers in Operations Management

Operations managers manage both processes and people, with a highly integrative career path tying together analytical decision-making with strategic perspectives and the needs of employees and other stakeholders. Our graduates have successfully attained positions in process management and analysis in major companies such as Accenture, Boston Beer, Deloitte, EY, Fidelity, General Electric, Goldman Sachs, IBM, JPMorgan Chase, and UBS. Students with this concentration may pursue careers in consulting, financial services, healthcare services, retail, transportation, technology, government, manufacturing, and not-for-profit organizations. Students with an operations management concentration are typically hired into positions such as Operations Analyst, Project Team Member, Supply Chain Analyst, Consultant, Process Designer, and Management Trainee, as well as positions on the corporate planning staff.

The demand for managers with these skills is strong and will increase as firms continue to recognize that they compete not only with new products, good marketing, and skillful finance but also with a high degree of competence in managing their operations. Salaries for majors in Operations are and will likely remain competitive with all other concentrations in management.

Operations Management Concentration Requirements

The following two courses are required for the concentration:

- BZAN3375 Operations Strategy and Consulting (fall)
- BZAN2255 Managing Projects (fall and spring)

Also, take two of the following:

- BZAN3307 Machine Learning and Artificial Intelligence
- BZAN3310 Sports Analytics (fall and spring)
- BZAN3385 Applied Statistical Modeling
- BZAN6632 Supply Chain Management (offered periodically)
- BZAN6604 Management Science (fall and spring)
- BZAN6612 Forecasting for Business Analytics

Study Abroad

Although there are no particular prerequisites needed to qualify for study abroad, the usual course prerequisites still apply. There is no limit to how many courses taken abroad will be allowed for major credit. If the courses are judged equivalent and if the proposed courses constitute a reasonable selection, major or elective credit will be given.

All students wishing to study abroad must first meet with an advisor from the Office of International Programs (OIP). If accepted into the study abroad program and approved by the Undergraduate Dean's Office, the student should then see Sam Graves, Department Chair, for course approvals before going abroad. When students wish to have a course considered, they should e-mail or bring a copy of the syllabus and course description for approval.

Business Law and Society

The Department of Business Law and Society in the Carroll School of Management does not offer a major or concentration. The courses taught by the Department of Business Law and Society are designed to give students a basic understanding of legal procedures and the legal environment of business. Undergraduate students in the Carroll School of Management are required to take Law I—Introduction to Law and Legal Process. This course covers the legal system, the sources of law, business ethics, the regulatory environment of business including antitrust and employment law, securities regulation and corporate governance, the international trade environment, and contract law. Elective courses are offered in a variety of topics that may interest students interested in starting their own business, considering law school, or preparing for the Certified Public Accounting examination. A core course and other electives that relate to concentrations are offered at the graduate level.

Finance

Accessibility to preeminent finance faculty and cutting-edge academic research are key ingredients to providing undergraduate and graduate students with the tools and methods necessary to expand their understanding of finance. Rigorous training at all academic levels prepares students for the quantitative and analytical challenges in both the business and academic fields.

Concentrations and degrees for qualified students include:

- Undergraduate Concentration in Finance
- Master of Science in Finance
- Ph.D. Program in Finance

Our nationally recognized Finance Department, cited by U.S. News & World Report as among the top 15 in the country, hosts the Finance Department Seminar Series featuring top scholars from around the world addressing current research and trends in the field. These weekly seminars provide an engaging forum for students, faculty, and practitioners alike. In addition, informal brown bag lunches are hosted throughout the year by the Department.

Members of the Finance Department consistently facilitate meaningful interaction between students and professionals through an alumni advisement system which supplements faculty advisement in the areas of financial institutions, manufacturing firms, service firms, nonprofit organizations, and government agencies.

[Finance Courses](#)

[Finance Faculty](#)

[Finance Website](#)

Concentration in Finance

Finance Concentration Course Requirements

All required finance core courses (1–3) and select electives (4) must be taken in CSOM only.

Five Prescribed Courses

1. MFIN1021 Fundamentals of Finance (formerly Basic Finance) (prerequisite: ACCT1021)
2. MFIN1127 Corporate Finance (prerequisite: MFIN1021)
3. MFIN1151 Investments (prerequisite: MFIN1021)
4. One elective from the following list* (*courses listed below must be taken in CSOM*)

- MFIN2202 Derivatives and Risk Management
- MFIN2205 Corporate Financial Strategies
- MFIN2220 Global Macro and the Financial System
- MFIN2230 International Finance
- MFIN2235 Investment Banking
- MFIN2250 Fixed Income Analysis
- MFIN2265 Behavioral Finance
- MFIN2270 Data Analytics in Finance
- MFIN2275 Digital Self-Defense with Python
- MFIN2285 Advanced Corporate Finance

- MFIN6650 FinTech and Cryptocurrencies

5. At least 1 elective from any **MFIN[^]** course offered outside of the required courses or another from the set list above.

* Not every course will be offered each semester. Additional courses may be added to the set list in the future. Please pay careful attention to prerequisites which are listed in Eagle Apps Course Information and Schedule.

See Course Information and Schedule for up-to-date course listings.

Regardless of your concentration, we expect finance concentrators to have understanding in the following areas:

- Major investment, financing and governance decisions (e.g., capital structure, merger and acquisitions, dividend, board of directors, etc.) of corporations;
- The risk and return trade-offs in investment and know how to evaluate basic financial products (e.g., stocks, bonds and derivatives);
- The role of financial institutions/intermediaries (e.g., investment and commercial banks, asset management companies) in the financial system;
- The role of financial markets in the economy and the need for efficient regulations.

For more information about the concentration in finance, visit the [Finance Department web page](#).

Minor in Finance

This minor is for non-CSOM students who are interested in learning more about finance to be better prepared for careers in financial institutions, service firms, nonprofits, and government agencies.

6 Required courses:

1. ACCT1021 Introduction to Financial Accounting
2. MFIN1021 Fundamentals of Finance (formerly Basic Finance) (sophomore or junior year)
3. MFIN1127 Corporate Finance (prerequisite: MFIN1021) (junior or senior year)
4. MFIN1151 Investments (prerequisite: MFIN1021) (junior or senior year)
5. One elective from the following list* (*courses listed below must be taken in CSOM*)
 - MFIN2202 Derivatives and Risk Management
 - MFIN2205 Corporate Financial Strategies
 - MFIN2220 Global Macro and the Financial System
 - MFIN2225 Financial Policy
 - MFIN2230 International Finance
 - MFIN2235 Investment Banking
 - MFIN2250 Fixed Income Analysis
 - MFIN2265 Behavioral Finance
 - MFIN2270 Data Analytics in Finance
 - MFIN2275 Digital Self-Defense with Python
 - MFIN2285 Advanced Corporate Finance
 - MFIN6650 FinTech and Cryptocurrencies

6. At least 1 elective from any **MFIN[^]** course offered outside of the required courses or another from the set list above.

* Not every course will be offered each semester. Additional courses may be added to set list in the future. Please pay careful attention to prerequisites which are listed in Course Information and Schedule.

See Course Information and Schedule for up-to-date course listings.

Information for Study Abroad

All students wishing to study abroad must first meet with an advisor in the Office of International Programs (OIP).

If accepted into the study abroad program and approved by the Undergraduate Dean's Office (Fulton 315), the student should then fill out the "Study Abroad Course Evaluation Form" on the Student Services website to seek approval to take a course abroad.

Any requested finance elective abroad must be equivalent to a finance elective taught at BC.

The Finance Department requires that Financial Accounting (ACCT1021) and Fundamentals of Finance (formerly Basic Finance) (MFIN1021) be taken at Boston College as prerequisites for any finance **elective** prior to going abroad. **All required finance concentration core courses plus the elective from the short list must be taken in CSOM only.**

All approvals should be obtained prior to going abroad.

No approvals will be granted after the course has been completed.

For more information about study abroad, visit the [Finance Department web page](#).

General Management

Students choose to concentrate in this area for many reasons, but it is especially attractive to those students who are preparing for the management of a family business or for those who want a broad management background as preparation for law school.

The Undergraduate Associate Dean coordinates the General Management concentration.

Concentration in General Management

Choose two areas and meet the criteria specified by the departments. Usually, this involves one required course and a choice of an elective.

Note: Students who have elected another concentration within the Carroll School of Management as well as the General Management concentration must select areas different from their other CSOM concentration as they pursue General Management.

Accounting

Option 1:

- ACCT3301 Financial Accounting Standards and Theory I
- ACCT3302 Financial Accounting Standards and Theory II

or

Option 2:

- ACCT3307 Managerial Cost and Strategic Analysis

Plus one elective:

- ACCT3351 Financial Statement Analysis
- ACCT4405 Federal Taxation
- ACCT6618 Accounting Information Systems

Business Analytics

Required course:

- BZAN3307 Machine Learning *or* ISYS3360 Machine Learning and Artificial Intelligence

Choose 1 Elective:

- BZAN3310 Sports Analytics
- BZAN3385 Applied Statistical Modeling
- BZAN6604 Management Science
- BZAN6605 Risk Analysis and Simulation
- BZAN6614 Quality Management
- ISYS2160 IOS/Swift Programming
- ISYS2170 Physical Computing
- ISYS3350 Data Management for Analytics and Applications
- ISYS6625 Geographic Information Systems
- ISYS6641 Cybersecurity
- ISYS6645 Data Visualization
- ISYS6655 Introduction to Blockchain and its Business Applications

- ACCT6640 Dive, Dissect and Decide with Big Business Data
- MFIN2270 Data Analytics in Finance
- MKTG2153 Customer Research and Marketing Decisions

Finance

Required courses:

- MFIN1127 Corporate Finance
- MFIN1151 Investments

Information Systems

Required: Pick two of the following three areas and choose one course from each area:

- Programming: ISYS2160 Intro to Programming Using Swift or ISYS2170 Physical Computing or ISYS2180 Web Applications Development
- Data: ISYS3257 Database Systems and Applications or ISYS3350 Data Management for Analytics and Applications
- Analysis and Design: ISYS4258 Systems Analysis and Design

Management and Organization

Required course:

- MGMT2127 Leadership

Choose one additional MGMT elective course other than MGMT1021, MGMT3099, or MGMT2127

Marketing

Required course:

- MKTG2153 Customer Research for Marketing Decisions *or* MKTG4256 Applied Marketing Management

Choose one additional MKTG elective course.

Operations Management

Required course:

- BZAN3375 Operations Strategy and Consulting

Choose 1 Elective:

- BZAN2255 Managing Projects
- BZAN3304 Quality Management
- BZAN3310 Sports Analytics
- BZAN3332 Supply Chain Management
- BZAN3384 Predictive Analytics
- BZAN6604 Management Science
- BZAN6605 Risk Analysis and Simulation
- BZAN6608 Pricing and Revenue Optimization
- BZAN6616 Forecasting for Business Analytics

Management and Organization

How can managers best develop and utilize the human capital in an organization and inspire their employees to thrive? Why do individuals and groups behave the way they do in organizations? What strategies should organizations pursue to grow and be productive? Our Management and Organization Department focuses on how to manage an organization's human resources and effectively develop and implement strategies for all types of organizations.

Through our programs, students develop the critical competencies for organizational success: leadership, communication, design, organizational development, and more.

[Management and Organization Courses](#)

[Management and Organization Faculty](#)

[Management and Organization Website](#)

Concentration in Management and Leadership

The Management and Leadership concentration will help develop and enhance your ability to lead and manage people and organizations. These skills are highly desired by virtually all potential employers, making the Management and Leadership concentration beneficial to all Carroll School undergraduates.

Upon completing the concentration, students will (1) demonstrate an appreciation for the fundamentals and complexity of successful leadership; (2) identify exemplary leadership in themselves and others; and (3) demonstrate skills of effective leadership.

In addition to taking MGMT1021 Organizational Behavior, the concentration requires MGMT2127 Leadership and three electives. Two electives, in particular, are highly recommended for this concentration: MGMT2123 Negotiation and MGMT2137 Managing Diversity.

Required of all concentrators:

- MGMT1021 Organizational Behavior
- MGMT2127 Leadership

Three electives chosen from the following:

- MGMT2110 Management of Human Capital and the Employee Experience
- MGMT2111 Ethical Leadership Skills
- MGMT2123 Negotiation
- MGMT2132 Managing Change
- MGMT2133 Leading High Performance Teams
- MGMT2137 Managing Diversity
- MGMT2139 Social Impact and Entrepreneurship
- MGMT2140 International Management
- MGMT2141 Power and Influence
- MGMT2142 The Science of Thriving at Work: Individuals, Groups and Organizations
- MGMT2143 Idea Work: Making Things That Matter
- MGMT2144 Design-Driven Innovation Consultin
- MGMT2170 Entrepreneurial Management
- MGMT2172 Managerial Decision Making
- MGMT2175 Thinking Strategically: Integrative Strategy Simulation
- MGMT2260 Leadership and Corporate Accountability
- MGMT2265 Globalization, Culture, and Ethics
- MGMT3099 Strategic Management (**minor only**)

- MGMT3315 Managing Digital Innovation
- MGMT4901 Independent Study (by permission of instructor)
- MGMT5548/UNCP5548 Capstone: Leadership and Mindfulness

Minor in Management and Leadership for Non-Carroll School of Management Students

A minor in Management and Leadership is offered to students in the Morrissey College of Arts and Sciences, Lynch School of Education and Human Development, and Connell School of Nursing who are interested in pursuing management careers. This minor focuses on the behavioral side of management by offering courses designed to increase students' knowledge of leadership and management and build skills in these areas. Students must complete six courses offered by the Management and Organization Department.

The Management and Leadership minor will help students develop and enhance their ability to lead and manage people and organizations. More specifically, students will:

- (1) develop an appreciation for the fundamentals and complexity of successful leadership;
- (2) identify exemplary leadership in themselves and others; and
- (3) demonstrate effective leadership and management skills.

The minor is completed by taking two required courses and four MGMT electives.

Required courses:

- MGMT1021 Organizational Behavior
- MGMT2127 Leadership

Four additional MGMT electives (junior/senior year)

The Management and Leadership minor prepares students for managerial roles in corporations, non-profit organizations, and government agencies. The common thread is managing people. In addition, the concentration provides excellent preparation for a career in management consulting, which focuses on diagnosing and solving management problems in client organizations.

For more information, please consult Professor Richard Spinello, in Fulton 430E, or e-mail him at spinello@bc.edu to set up an appointment.

Entrepreneurship Co-concentration

Are you interested in an Entrepreneurial career where you start or join a firm that revolutionizes markets through innovation? The entrepreneurship co-concentration provides a strong background for launching and managing high-growth ventures in nascent or high-velocity industries, for starting projects with a focus on the social good, or simply for those who want to develop an entrepreneurial mindset for innovating within large companies. It is an interdisciplinary program that will help engender entrepreneurial thinking and problem-solving approaches. The course of study includes a mix of theory and real-world application with an emphasis on teamwork. The curriculum introduces a set of tools and a way of thinking that will help students to navigate the uncertain, ambiguous contexts that often characterize new initiatives in established firms as well as start-ups. The Entrepreneurship co-concentration is designed to be a second concentration for Carroll School of Management students. Up to one class from the co-concentration course list can be counted towards another concentration.

Required Courses

The courses in the co-concentration include the following:

Required:

- MGMT2170 Entrepreneurial Management

Additional requirement for the Class of 2025 and beyond; select one (1) of the following (1 credit):

- ISYS3205/MGMT3205 TechTrek West
- ISYS3206/MGMT3206 TechTrek

Required: one of the following four courses:

- MFIN2210 Entrepreneurial Finance
- MFIN2212 Venture Capital/Private Equity
- MGMT2139 Social Impact and Entrepreneurship
- ISYS/MGMT3315 Managing Digital Innovation

Students must also take an additional two electives from the required courses listed above or from the following list:

- BSLW6604 Law for the Entrepreneur
- ISYS3205 TechTrek West (3 credit version, discontinued after Spring 2022)
- ISYS3206 TechTrek East (3 credit version, discontinued after Fall 2021)
- ISYS3178/MKTG3178 Design Thinking and Strategy
- ISYS6621/MKTG6621 Social Media and Digital Business
- MGMT2123 Negotiation
- MGMT2139 Social Impact and Entrepreneurship
- MKTG3156 Digital Marketing
- MKTG3158 Product Planning and Strategy
- MKTG3170 Entrepreneurial Marketing in a Digital World
- UGMG1010 Perspectives on Management
- UNAS1025 Innovation Through Design Thinking

For more information, please visit the [Edmund H. Shea Jr. Center for Entrepreneurship](#) website.

Information for Study Abroad

Students may take one or two electives abroad to count toward either the Management and Organization concentration or minor. In addition, it is sometimes possible to take the equivalent of MGMT1021 abroad. However, this must be approved prior to finishing the course by the Chairperson of the Management and Organization Department, who will need a detailed copy of the course syllabus, assignments, and readings.

Marketing

Marketing is the business function that is responsible for setting market strategy and giving strategic direction to other business functions in the firm. It centers around understanding the wants and needs of a firm's customers, be they consumers or other businesses, and is essential for properly positioning the company within the firm's target markets.

Marketing offers a number of varied and interesting career paths, from sales, advertising, and product development, to marketing research, retailing, and brand management. A marketing degree is a valuable asset in many business sectors, for large or small companies, for-profit or non-profit firms, products or services, and consumer or business-to-business environments.

In the digital mobile economy, consumers are increasingly armed with more and better information, making them more demanding, less gullible, and less loyal to companies that don't pay close attention to their needs. Competition is increasingly global, and markets mature faster; first mover and market leader advantages can evaporate in a heartbeat. Advances in production and service delivery make it very difficult to compete on quality and production or distribution advantages are difficult to sustain long-term.

This means that the successful company is the one that can respond to changing market demands faster than its competitors. Marketing is one of the key tools in keeping a company responsive and nimble. It specializes not only in understanding customer needs and motivations, but it also delivers the message to consumers that the company can meet those needs and motivations. This focus on the customer has caused marketing and the marketing concept to become increasingly central in management decisions and marketing is fully integrated with other functional areas in successful leading companies.

Regardless of your specific interests within marketing, Boston College will help you understand the marketing functions and its financial, social, and ethical responsibilities. The marketing program at BC teaches critical thinking, creative problem-solving, and a mix of theory- and skill-based approaches to marketing management and decision-making. Marketing represents a unique mixture of quantitative statistics and analysis with a more lateral-thinking and behavioral approaches to management. Recent advances in technology, from social media to supply-chain integration, have revolutionized the way marketing is conducted. As a marketing major, you will develop skills in market analysis and decision-making by working on varied marketing projects and programs such as new product launches, pricing and distribution strategies, service innovations, sales force management, and internet marketing campaigns.

[Marketing Courses](#)

[Marketing Faculty](#)

[Marketing Website](#)

Undergraduate Concentration in Marketing

Marketing Principles (MKTG1021) is a prerequisite for all other Marketing courses. Beyond the required core course, students must take four courses for the Marketing concentration. Of these four courses, the two required are as follows:

- MKTG2153 Customer Research and Insights for Marketing Decisions
- MKTG4256 Applied Marketing Management

Customer Research is a prerequisite for Applied Marketing Management. Typically, Applied Marketing Management is taken in the senior year.

The two additional courses may be taken from any of the following electives:

- MKTG2152 Consumer Behavior
- MKTG3114 Strategic Pricing and Marketing
- MKTG3148 Services Marketing
- MKTG3153 Multichannel Retailing
- MKTG3154 Integrated Marketing Communications

- MKTG3156 Digital Marketing
- MKTG3157 Professional Selling and Sales Management
- MKTG3158 Product Planning and Strategy
- MKTG3165 Strategic Brand Management
- MKTG3177 Heritage Marketing
- MKTG3178 Design Thinking and Strategy
- MKTG3180 Sports Marketing
- MKTG3258 Marketing Analytics for Customer Insights
- MKTG3260 Sustainable Behavior of Consumers, Firms, & Societies
- MKTG3625 Luxury Marketing
- MKTG6157 Strategic Selling and Persuasion
- MKTG6610 Sports Marketing
- MKTG6635 New Media Industries (cross listed with ISYS6635)

Students interested in a career in marketing often take more than the minimum four courses in order to enhance career preparation.

Students are cautioned, however, against becoming too narrowly specialized.

MKTG4911 (Independent Study, 3 credits) provides creative learning opportunities and is offered for enrichment purposes only. It does not count toward the Marketing concentration. Independent Study enables a student to focus on a topic of his/her own choice working with a marketing professor.

Marketing Minor

This minor is for non-Carroll School students who are interested in developing quantitative and qualitative marketing knowledge and skills to be better prepared for careers in marketing and advertising.

Required Course Sequence:

- ACCT1021 Introduction to Financial Accounting
- MKTG1021 Marketing Principles
- MKTG2153 Customer Research for Marketing Decisions
- MKTG4256 Applied Marketing Management

2 electives:

Choose two MKTG electives from course list available at bc.edu/marketing.

Information for Study Abroad

Only one course from an international university can be considered for concentration credit. Customer Research for Marketing Decisions (MKTG2153) and Applied Marketing Management (MKTG4256) cannot be taken abroad.

All students wishing to study abroad must first meet with an advisor from the Office of International Programs. If accepted into the study abroad program and approved by the Undergraduate Dean's Office, the student should then see the Marketing Study Abroad Coordinator for course approvals before going abroad. When students wish to have a course considered they should e-mail or bring a copy of the syllabus and course description for approval.

All approvals must be obtained prior to going abroad. No approvals will be granted after the course has been completed.

Boston College AMA Chapter

The Boston College collegiate chapter of the American Marketing Association is affiliated with both the National and Boston AMA organizations. The aim of the Boston College chapter is to expose its members who are committed to and passionate about a marketing career to industry professionals, organizations, and events that will further their experience.

Boston College Marketing Academy

The Marketing Academy is one of Boston College's most active organizations. It is open to all students at Boston College.

It is the Academy's goal to educate students about career opportunities, assist students in training for a future professional career, and establish professional contacts in business.

Connell School of Nursing

Founded in 1947, the Boston College Connell School of Nursing offers a four-year program of study leading to a Bachelor of Science degree with a major in Nursing. At the completion of the program, graduates are eligible to take the national examination for licensure as a registered nurse (R.N.). The program of study is approved by the Massachusetts Board of Registration in Nursing and is accredited by the Commission on Collegiate Nursing Education. Visit bc.edu/cson for more information.

The mission of the Boston College William F. Connell School of Nursing is to prepare compassionate, professionally competent nurses whose practice and scholarship are scientifically based and grounded in humanizing the experience of health and illness. In keeping with the Jesuit, Catholic ideals, we focus on the formation of the whole person and the promotion of social justice. The Connell School of Nursing educates students as reflective life-long learners who use knowledge in service to others. The graduate of the baccalaureate program is prepared as a generalist who promotes, maintains, and restores the health of individuals, families, and communities/populations across the lifespan.

Nursing courses are designed to include more complex concepts and content at each level. Consequently, students must take courses in a specific sequence and pass each course before proceeding to the next level. To be eligible for graduation, students must successfully complete the courses that comprise the curriculum, nursing requirements, and electives.

The study of nursing is based on a common intellectual heritage transmitted by a liberal education and the art and science of nursing. (See Core Curriculum under the University Policies section of this catalog.) Students are encouraged to complete their art, history, philosophy, theology, and English Core courses in their first and second years.

Nursing students use the clinical reasoning process to assess, plan, implement, and evaluate care. Judgments made by the nurse result in a selection of interventions and outcomes in concert with the client's choices. Most nursing courses have a theory and a clinical component, and the curriculum includes content on the care of children, childbearing families, and adults of all ages across the continuum of wellness to illness. Faculty members guide student learning in campus laboratories and in a variety of healthcare agencies in the Greater Boston area.

Students should consult the curriculum plan and see their advisors as they plan for registration.

Typical Plan of Study for Class of 2019 and Forward

Note: CSON Undergraduates are obligated to register for a minimum of 12 credits per semester but normally should take 15 credits in almost all semesters to meet all program requirements on time.

Freshman Year

Semester I

- BIOL1300, BIOL1310 Anatomy and Physiology I
- CHEM1161, CHEM1163 Life Science Chemistry
- NURS1010 Professional Development Seminar
- Core or elective
- Core or elective

Semester II

- BIOL1320, BIOL1330 Anatomy and Physiology II
- MATH1180 Principles of Statistics for the Health Sciences
- NURS2070 Introduction to Professional Nursing
- Core or elective
- Core or elective

Sophomore Year

Semester I

- BIOL2200, BIOL2210 Microbiology for Health Professionals
- NURS2122 Nursing Health Assessment Across the Life Span
- NURS2121 Nursing Health Assessment Across the Life Span Clinical Laboratory
- NURS2080 Pathophysiology
- Core or elective

Semester II

- NURS2230 Adult Health Nursing Theory I
- NURS2231 Adult Health Nursing Clinical I
- NURS2205 Clinical Pharmacology
- HLTH2206 Principles of Nutrition
- NURS2090 Sophomore Formation Seminar
- Core or elective

Junior Year

All students will have a flexible semester in their junior year. The flexibility will allow for study abroad (if approved by the Office of International Programs and their specific program). Students who are not abroad in their "flex" semester will be scheduled to take at least one clinical course.

This is one example of the flexible junior year schedule below. The Undergraduate Program Office will determine the exact clinical sequence for each junior.

Semester I

- NURS3242 Adult Health Nursing Theory II
- NURS3243 Adult Health Nursing Clinical II
- NURS3244 Childbearing Nursing Theory
- NURS3245 Childbearing Nursing Clinical
- NURS3170 Principles of Evidence-based Nursing

Semester II

- "Flex" Semester

Senior Year

The Undergraduate Program Office will determine the exact clinical sequence for each senior. This is one example of the senior year schedule below.

Semester I

- NURS4250 Child Health Theory
- NURS4251 Child Health Clinical
- NURS4252 Psychiatric-Mental Health Nursing Theory
- NURS4253 Psychiatric-Mental Health Nursing Clinical Lab
- Core or elective

Semester II

- NURS4260 Population Health Nursing Theory
- NURS4261 Population Health Practice in the Community
- NURS4263 Nursing Synthesis Clinical Laboratory
- NURS4264 Actualizing the Role of the Professional Nurse
- Core or elective

The Connell School of Nursing reserves the right to alter any program or policy outlined.

Satisfactory Academic Progress

The CSON Academic Standards Review Committee meets at the end of each semester to review the records of students with course failures, course deficiencies, low GPAs, or other academic concerns. Decisions about progression in the program are made by this committee in accordance with the policies outlined in the CSON Baccalaureate Program Handbook (on the CSON website) and other relevant university policies.

Credit and Graduation Requirements

Students registered for at least 12 credit hours per semester are considered full-time students. Usually, 15 credits are carried each semester and a minimum of 117 credits are required for graduation.

Information for First-Year Students

During the first-year students typically complete two semesters of Anatomy and Physiology with laboratories, Life Science Chemistry with Laboratory, Statistics, Introduction to Professional Nursing, and Nursing Professional Development Seminar along with a combination of two core courses each semester. Electives may be substituted in certain situations (e.g., the student has Advanced Placement credits for Core courses or wishes to continue foreign language study). During orientation, students will meet with faculty members who will assist them with registration for the fall. In September, students will be assigned advisors who will guide them through the Nursing program.

Special Opportunities

Study Abroad

Students in the William F. Connell School of Nursing are encouraged to take advantage of opportunities to study abroad for one semester. Normally, students may study abroad during fall or spring semester of junior year. Most students take electives and can sometimes complete core courses while they are abroad. Students are free to study abroad in any location approved by the Office of Global Education. A minimum GPA is required for all study abroad programs.

Nursing Synthesis Course

The Nursing Synthesis course in the senior year offers students an advanced nursing practicum where they work with an individually assigned professional nurse preceptor. Students write a proposal in their junior year indicating their special learning interests.

Independent Study (NURS4911)

Junior or senior nursing students develop a proposal for independent study in an area of nursing in which they wish to obtain further knowledge and/or experience. Guidelines are available on the CSON undergraduate website. Students should consult an academic advisor about their proposal. All independent study is graded as Pass/Fail.

Undergraduate Research Fellows Program

Students in excellent academic standing may apply to assist faculty in a faculty-directed research project and gain valuable experience in nursing research.

Minors in the Connell School of Nursing

Nursing students may minor in any Morrissey College Arts and Sciences, Carroll School of Management, or Lynch School of Education and Human Development discipline by fulfilling the requirements of those departments.

Minor in Hispanic Studies

Nursing students may minor in Hispanic Studies by completing 18 credits in Spanish/Hispanic Studies that are approved by the Associate Dean. CSON students who wish to declare a CSON Hispanic studies minor should meet with the Associate Dean.

Minor in Psychology

The minor is awarded to CSON students who complete 18 credits in psychology. Courses should include PSYC1110 Brain, Mind, and Behavior and PSYC1111 Mind Self and Society. Students who received AP credit for PSYC1110 or PSYC1111 may select one alternate course. Courses that may be applied to the minor include the following (or others approved by the undergraduate Associate Dean):

- ADPS1100 Introductory Psychology (Woods College; no credit for ADPS1100 if PSYC1111 was taken)
- APSY1030 Child Growth and Development
- APSY1032 Psychology of Learning
- APSY2041 Adolescent Psychology
- APSY2241 Abnormal Psychology
- FORS5315 Victimology
- FORS5317 Forensic Mental Health
- FORS5318 Forensic Science 1
- PSYC1011 Psychobiology of Mental Disorders
- PSYC1029 Mind and Brain
- PSYC2241 Social Psychology
- PSYC2260 Developmental Psychology
- PSYC2268 Psychological Development through the Life Span
- PSYC2272 Cognitive Psychology
- PSYC2274 Sensation and Perception
- PSYC2285 Behavioral Neuroscience
- PSYC3329 Psychology of Stress
- PSYC3331 Developmental Psychopathology
- PSYC3334 Interpersonal Violence
- PSYC3336 Clinical Psychology
- PSYC3338 Topics in Abnormal Psychology
- PSYC3344 Psychology of Gender
- PSYC3345 Social Motivation
- PSYC3354 Culture, Identity, and the Asian-American Experience
- PSYC3366 Social and Emotional Development
- PSYC3367 Psychology of Art

- PSYC3371 Cognitive Neuroscience
- PSYC3372 Affective Neuroscience
- PSYC3377 Psycholinguistics
- PSYC3382 Neurobiology of Stress
- PSYC3383 Neurobiological Basis of Learning
- PSYC3384 Neurophysiology
- PSYC3386 Psychopharmacology
- PSYC3391 Ethical Controversies in Psychology and Neuroscience

Minor in Forensics

The Forensic Science minor explores the application of scientific principles in legal contexts, focusing on human-centered applications and a commitment to the common good. Designed for students across disciplines, the minor covers scientific analysis, forensic applications, the role of forensic science in resolving disputes, enforcing laws, and safeguarding public health.

Minor Requirements

The minor in Forensics is composed of three required courses and three electives from an approved list. The required courses are:

1. FORS5318 Forensic Science (Fall - CSON)
2. FORS5315 Victimology (Fall - CSON)
3. FORS5317 Forensic Mental Health (Spring - CSON)

Three electives from the following list of approved electives:

- ADCJ3010-01 Criminal Law and Procedure (Woods)
- SOCY1030-01 Deviance and Social Control (Morrissey)
- SOCY3000-01 Crime and Punishment (Morrissey)
- SOCY3309-01 Restoration and Resistance: International Innovations in Criminal Justice (Morrissey)
- SOCY3310-01 Studies in Crime and Social Justice (Morrissey)
- FORS2201 Wounded Warriors in Transition (CSON)
- ADPS2220-01 Forensic Psychology (Woods)
- BSLW1170-01 Securities Regulation (Carroll)
- BSLW102101 Law I--Introduction to Law and Legal Process (Carroll)
- ADCJ2101-01 Corrections: Policies and Practices (Woods)
- ADCJ2801-01 The Evolution of a Hate Crime from Thought to Execution and Punishment (Woods)
- APSY224101 Mental Illness: Social and Clinical Perspectives (Lynch)

Minor in Global Health and the Common Good

Recognizing that public health is an eclectic field that draws insights and technologies from many disciplines, the approved electives span a wide range of schools and departments across Boston College. Additional courses at Boston College and in other institutions in the United States and overseas may be considered as approved electives subject to the approval of the program director and Associate Deans. (Adapted from [Schiller Institute Global Public Health and the Common Good.](#))

Minor Requirements

The minor in Global Public Health and the Common Good is composed of three required courses and three electives. The required courses are:

- Public Health in a Global Society (PHCG1210)
- Introduction to Epidemiology (PHCG2120)

- Either Global Public Health Law (PHCG2130) or The Ethics of Global Public Health and the Common Good (PHCG3223, cross-listed as THEO3223)

Minor in Humanities, Health, and Culture

This is a minor for students who are interested in examining health and health care from new and varied perspectives. Currently, students from pre-med and pre-health professions throughout the Morrissey College of Arts and Sciences and other backgrounds such as law, psychology, public/global health, social work, and journalism are enrolled in the MCAS version of the minor. A special version of the minor has been created for CSON students to accommodate constraints in the B.S. (nursing) schedule. CSON students who are comfortable with significant writing assignments, have room in their schedule to accommodate added classes (especially those who have brought in AP credit and/or fulfilled a majority of their Core in the freshman year), and may wish to engage with a range of academic fields may consider this minor.

Minor Requirements:

- ENGL2212 Introduction to Medical Humanities (Enrollment is based upon acceptance to the minor.)
- BIOL1300 and BIOL1310 Anatomy and Physiology I with Lab
- BIOL1320 and BIOL1330 Anatomy and Physiology II with Lab
- NURS4264 Actualizing the Role of the Professional Nurse
- 2 electives from the [approved list](#):
 - (At least **one** course should be beyond those used to fulfill the Core requirements and **not** come from either Nursing or Biology.)

Applications for the Humanities, Health, and Culture minor are available in the early spring semester for first-year students only.

Special Requirements for CSON Students

Health Requirements

In addition to the health and immunization requirements for all undergraduate students, nursing students must have immunity to varicella (chicken pox), hepatitis B, and MMR with an annual screening for tuberculosis (PPD) and flu shot. Other requirements may be required.

Other Clinical Requirements

Nursing students are required to obtain and maintain a Castlebranch account, and to be certified in Cardiopulmonary Resuscitation (CPR) before enrolling in Adult Health I clinical, and must keep this certification current. Nursing students must also undergo the expanded multistate criminal offense background checks that are required by affiliating health care institutions.

General Information

Cooperating Hospitals and Health Agencies

Students in the baccalaureate nursing program have planned learning experiences in teaching hospitals and community agencies in the Boston metropolitan area. The facilities used for these experiences are located in Boston and the surrounding area. Students are responsible for providing their own transportation to and from those facilities. Most sites are accessible by public transportation.

Fees

School of Nursing students pay the same tuition, fees, and room and board costs as other colleges' enrollees. In addition, nursing students have the following expenses:

- Standardized examination (NCLEX Assessment Test) \$70.00

- Laboratory Fee up to \$200.00 (Payable for certain clinical nursing courses)
- Costs for scrubs, a stethoscope, a BC name badge, transportation to clinical sites, additional health requirements, and CPR certification

College Credit for Transfer Students

Candidates possessing a bachelor's degree in another field and candidates possessing college credit in either nursing or non-nursing programs apply to the Office of Transfer Admissions, located in Devlin Hall. A maximum of 60 credits will be accepted in transfer. Nursing courses taken at another institution will be evaluated on an individual basis. Students applying for transfer will be asked to submit course syllabi to the School of Nursing for use in evaluating prior course work. Additional information on transfer credits may be found in the Baccalaureate Program Handbook on the BC website.

Career Opportunities

The field of nursing offers a wide variety of career options, including positions in hospitals, long-term care facilities, community health agencies, clinics, and day care centers for children and the elderly. Nurses are establishing private practices and group practices with other health professionals. Business, industry, and occupational health settings employ nurses.

The baccalaureate program of study prepares its graduates for entry into master's and doctoral degree programs in nursing. With graduate study, advanced practice nurses see clients in primary care, teach students and other health professionals, establish programs of research, provide consultation, serve as health care planners, and participate on governmental committees dealing with health care issues. Many graduates of the Boston College Connell School of Nursing have gone on from clinical careers to become researchers in clinical settings and to serve on faculties of schools of nursing and administrators of clinical and educational institutions.

Lynch School of Education and Human Development

The Lynch School of Education and Human Development (LSEHD) offers undergraduate and graduate programs in education, transformative educational studies, and applied psychology and human development.

The mission of the Lynch School of Education and Human Development is to improve the human condition through improved applied practice and education. It pursues this goal through excellence and ethics in teaching, research, and service. It prepares undergraduate and graduate students to serve diverse populations in a variety of professional roles including as teachers, administrators, human service providers, psychologists, researchers, policy analysts, educational consultants, training and knowledge-transfer experts, professional development providers, executive coaches, instructional designers, and other roles in business human capital and talent development, government, NGOs, foundations, and cultural organizations.

Through research, LSEHD seeks to advance knowledge in its respective fields, inform policy, and improve practice. Teachers, psychologists, scholars, and learners in LSEHD engage in collaborative school and community improvement efforts locally, nationally, and internationally. What unites the diverse work conducted within the Lynch School of Education and Human Development is the underlying aspiration to enhance the human condition, to expand the human imagination, and to make the world more just.

The Lynch School of Education and Human Development is named in honor of Carolyn A. and Peter S. Lynch. Peter Lynch, a Boston College graduate, is one of the country's best-known financial investors.

Undergraduate Programs

Undergraduate students in LSEHD may choose to major in Elementary Education, Secondary Education, Transformative Educational Studies, or Applied Psychology and Human Development. All students entering LSEHD undergraduate programs follow a program of study in selected majors and minors and complete the Boston College Common Core requirements and electives needed to fulfill degree requirements. Students must formally declare at least one major by the end of their academic first year.

Elementary Education

Elementary Education majors should enroll in EDUC1030 Child Development in the fall of their first year. This course will also satisfy one BC Core Social Science requirement. In the spring of the first year, students should enroll in EDUC1031 Family, School, and Society. This course will satisfy one BC Core Social Science and the Cultural Diversity requirement. During the first year, Elementary Education students may also elect to begin the sequence for their second major. All Elementary Education majors in the Class of 2026 or before must complete a second major either in a content area in the Morrissey College of Arts and Sciences, Transformative Educational Studies, Applied Psychology and

Human Development, or in one of three interdisciplinary majors offered through the Lynch School. Interdisciplinary majors include American Heritages, Mathematics and Computer Science, and Perspectives on Spanish America. For the Class of 2027 and beyond, the second major requirement for Elementary Education will become optional.

Secondary Education

Secondary Education students should enroll in either FORM1050 The Educational Conversation (Philosophy II, Core) or EDUC1030 Child Development (Social Science Core) in the fall of their first year. In the spring of the first year, students should enroll in FORM1051 Reimagining School and Society (Social Science and Cultural Diversity) or EDUC1031 Family, School, and Society (Social Science and Cultural Diversity). Secondary Education majors must also major in a state-approved licensure area. These second major areas include Biology, Chemistry, Environmental Geoscience, Physics, English, History, and Mathematics, and are completed in MCAS. Students may also elect to begin the sequence for the desired second major during the first year. In particular, students declaring a major in Mathematics or the Sciences should strongly consider beginning those majors in the first year.

All elementary and secondary education majors complete two pre-practicum experiences (1 day/week for 10 weeks) and one full practicum experience (5 days/week for 14 weeks) in a variety of classrooms where they mediate theory and practice to develop and provide instruction that enhances the developmental outcomes of all individuals. All Elementary and Secondary Education programs lead to endorsement towards an Initial Licensure in the state of Massachusetts. These programs may change in response to state licensure regulations. **All** students seeking licensure in Massachusetts **must** pass all the appropriate Massachusetts Tests for Educator Licensure (MTEL).

Graduates from Elementary and Secondary Education programs attain positions in public, private, parochial, and charter schools, other education-related fields, and areas that require strong liberal arts, subject matter, and pedagogical preparation and the ability to collaborate with others. In addition, there are a number of Fifth-Year Programs available for academically talented students through which the bachelor's and the master's degrees may be earned in five years.

Transformative Educational Studies

The Transformative Educational Studies Major is intended for students who wish to study the fundamental educational questions arising during this moment of social and educational transformation and contribute to improving the quality of human education and experience and to making global society more just. The major is designed for students who are interested in careers in education such as: policy analysis; educational training and knowledge-transfer programs; professional development; executive coaching; instructional design, and other roles in government, schools, foundations, and community organizations, as well as classroom teaching, but who either do not need endorsement towards K-12 licensure or who wish to defer that aspect to a Fifth Year or later Master's program.

Transformative Educational Studies students should enroll in FORM1050, The Educational Conversation, in the fall of the first year. This course will also satisfy the BC Core Philosophy II requirement. In the spring, students should enroll in FORM1051, Reimagining School and Society. This course will satisfy one BC Core Social Science and the BC Core Cultural Diversity requirement. This major does not require a second major or minor, and does not lead to endorsement towards licensure, however, students are encouraged to consider the minor and major options available in LSEHD and across Boston College and may elect to begin the sequence for a second major or for minor(s) at any point where there is sufficient time to complete the program of study for the second major or minor(s). In addition, there are a number of Fifth-Year Programs available for academically talented students through which the bachelor's and the master's degrees may be earned in five years.

Applied Psychology and Human Development

The Applied Psychology and Human Development major prepares students for work in human, social, and community services and/or for graduate study in counseling, human development, educational psychology, organizational studies, higher education, and related fields. Coursework in this major curriculum offers a base in developmental and counseling psychology with a focus on understanding psychological processes in a variety of contexts.

Students in Applied Psychology and Human Development enroll in a 36-credit major, with a required applied psychology practicum experience typically during the junior year, and focus in a choice of four areas: human services and health science; organization studies and human capital; policy, advocacy, and community change; and science of learning which must be declared before the start of junior year fall

term. Students are not required to declare a minor or a second major; however, students are encouraged to consider the minor and major options available in LSEHD and across Boston College. In addition, there are a number of Fifth-Year Programs available for academically talented students through which the bachelor's and the master's degrees may be earned in five years. Please refer to the section following the descriptions of majors in the Lynch School of Education and Human Development for more information about these programs.

Satisfactory Academic Progress

Lynch School of Education and Human Development students who are Elementary or Secondary Education majors must successfully complete 120 credits which must include the BC Core curriculum, the education major, and an appropriate second major, if required for the entering class year. Students who are majoring in Transformative Educational Studies or Applied Psychology and Human Development must also successfully complete 120 credits, which **must** include the BC Core curriculum.

To continue enrollment in a full-time program of study, a student must maintain a cumulative grade point average of **at least 1.667**, as the minimum standard of scholarship and must not fall *more* than **6 credits behind** the total number of credits a student of his/her status is expected to have completed (Elementary and Secondary Education majors usually carry 15–17 credits each semester during the first three years and 30 credits during the senior year). For example, a first semester sophomore student must have completed at least 30–32 credits during the freshman year. Any student who is permitted by the LSEHD Dean of Undergraduate Programs and Students to continue enrollment in a full-time undergraduate program is considered to be in good standing.

Failure to maintain good standing either through a low cumulative grade point average or by incurring excessive deficiencies including failures, withdrawals, or unapproved underloads will result in placement on academic probation, possible withdrawal or dismissal, as determined by Dean of Undergraduate Programs and Students in consultation with Lynch Academic Standards Committee.

A student on probation may return to good standing by approved methods, e.g., make-up of credits via approved summer schoolwork, raising GPA to acceptable standards, etc. (Students may make up **no more than 12 credits in summer study**.) A student who incurs additional failures or withdrawals, or carries an unapproved underload while on probation, may be required to withdraw from the institution at the time of the next review.

Information for LSEHD First-Year Students

Although students may satisfy BC Core requirements (42 credits) during any of their four undergraduate years, they are advised to complete most or, if possible, all BC Core requirements within the first two years. The remaining 78 credits (minimum) are to be fulfilled by courses required in the major(s), minor(s), and elective choices.

All first-semester, first-year students should select ENGL1010 First-Year Writing Seminar or a BC Core Literature course, FORM1050 The Educational Conversation or EDUC/PSY1030 Child Development, ERAL1100 First-Year Experience, Reflection, and Action (ERA) Program, and the course(s) designated by your intended major. (Students who place out of BC Core courses in advance will take different courses selected in collaboration with an advisor.) Major requirements are listed in the sections that follow. Students are not required to formally declare a major in Lynch until the end of their first-year spring term. Students who have not officially decided or declared a major, are listed as “Undeclared,” and follow the course requirements for the Transformative Educational Studies or the Applied Psychology and Human Development major until they formally declare at the end of the first-year.

The ERAL1100 First Year Experience, Reflection, and Action Program (the ERA-FYP), a 3-credit course (1 credit first semester and 2 credits second semester), is a **requirement** for all LSEHD students and is taken as a sixth course during first and second semesters, over the full first year.

Students in LSEHD must elect one of four majors: Elementary Education, Secondary Education, Transformative Educational Studies, or Applied Psychology and Human Development.

As pre-professional majors, both Elementary and Secondary Education majors must complete the education major and successfully complete 120 credits, including the Boston College Core curriculum. Secondary Education majors must complete an appropriate second major. Elementary Education majors from the Class of 2027 and beyond may elect a second major, but one is not required.

Transformative Educational Studies and Applied Psychology and Human Development majors must successfully complete the major and 120 credits, including the Boston College Core curriculum. Students in these majors **may** elect a second major or minor(s) from a wide variety of options in LSEHD and across Boston College but none are required.

The University Core Curriculum (BC Common Core) offers an essential liberal arts foundation that grounds and informs most of the coursework you will explore during your time at Boston College. Although some students complete much of the BC Core by the end of sophomore year, we suggest that students consider BC Core course options carefully. The interdisciplinary Complex Problems and Enduring Questions Core courses are available to first-year students only, and combine research, service, critical reflection, and off-site experiences in an engaging, nontraditional manner. LSEHD students who enroll in one of the Complex Problems or Enduring Questions Core courses should use caution in electing Core courses that may also be satisfied by the major requirements.

The remaining courses required for graduation include additional major courses, minor courses, and electives.

Practicum Experiences Leading to Endorsement for Teacher Licensure

Endorsement towards the license is a collaborative effort between the undergraduate teacher candidate, the Office of Field Placement and Outreach, Program Supervisor, and the Supervising Practitioner. The Office of Field Placement and Partnership Outreach (Campion 102) approves and arranges placements for pre-practica and full-practica leading to endorsement towards licensure only for eligible students enrolled in programs in LSEHD. Placement for full practicum also requires prospective teacher candidates to complete a successful interview with the Principal/Headmaster and/or potential Supervising Practitioner from the school in which they plan to fulfill this requirement. The Office of Field Placement and Outreach evaluates each placement to ensure that it meets the requirements for endorsement towards licensure by the Massachusetts Department of Elementary and Secondary Education. The Office of Field Placement and Outreach, for appropriate reasons, may choose not to approve a teacher candidate for the practicum. Pre-practica and full practica are essential components and experiences of the teacher preparation curriculum in LSEHD. Teacher candidates must complete two semesters of pre-practicum placements (1 day/week/10 days) before they enter a full-time practicum placement in Elementary and Secondary Education classrooms. A full description of policies may be found in the Practicum Handbook available in the Office of Field Placement and Partnership Outreach (Campion 102).

A full practicum (student teaching) is a full-time five-days-per-week experience that occurs for a minimum of 14 weeks during the senior year. In the Lynch School, a full practicum must meet the teaching performance standards required by the Massachusetts Department of Elementary and Secondary Education. Teacher candidates must demonstrate competence according to the standards outlined in the Boston College Candidate Assessment of Performance (BC-CAP). The semester prior to completing a field placement, students must formally apply and participate in an interview in the Office of Field Placement and Partnership Outreach before securing a field assignment. Subject to eligibility, teacher candidates submit an online application for pre-practicum and practicum experiences. Online applications are available at the [Student Teaching](#) page.

All students seeking endorsement towards teacher licensure must complete the full practicum. A cumulative grade point average of 2.5 and successful completion of all major courses are required prior to student teaching for all students in the Elementary program. Students in Secondary Education must complete all major courses in Secondary Education and 4/5 of Morrissey College of Arts and Sciences courses prior to student teaching. No incomplete grades may be outstanding, and a minimum of 87 credits must have been completed before placement is approved.

A full description of policies may be found in the Practicum Handbook available in the Office of Field Placement and Partnership Outreach in Campion 102. All students will be screened for eligibility, and any who fail to meet the standards (academic, health, professional) will be counseled into courses that will complete an appropriate degree program from Boston College. These students will not be recommended for endorsement for teacher licensure and will not receive the BC Endorsement (a recommendation for licensure). The Commonwealth of Massachusetts issues teacher licenses, not the endorsing university. Therefore, students who earn the BC Endorsement submit all licensing documentation directly to the Massachusetts Department of Elementary and Secondary Education. Normally, students are not allowed to overload courses while student teaching. Exceptions to this policy are to be made in consultation with the Associate Dean of Undergraduate Programs and Students, LSEHD. If, for any reason, a student is unable to complete the full practicum, an extended practicum (additional time in the field and/or semester) will be required by arrangement of the Assistant Dean of Field Placement and Outreach.

Application deadlines for all pre-practica are May 1 for fall placements and December 1 for spring placements. Application deadlines for all full-practica are March 15 for fall placements and October 15 for spring placements. The Office of Field Placement and Partnership Outreach will not be able to arrange assignments for late applicants. Applications are submitted online at the [Student Teaching](#) page.

The school sites utilized for pre-practica and full-practica are located in Boston and neighboring communities. Teacher candidates are responsible for their own transportation to and from these facilities.

Applied Psychology and Human Development Field Practicum

Applied Psychology and Human Development students should visit the [Applied Psychology and Human Development](#) page for information on practicum experiences for this major and register for APSY2152 Applied Psychology Practicum: Pathways Work & Life in the semester during which they will complete their field practicum experience. Students in the major may register for a practicum no sooner than second semester of sophomore year, preferably junior or senior year, or after having successfully completed a minimum of twelve (12) credits of APSY courses.

Majors in Education

The undergraduate teacher education majors in LSEHD are intended to meet the requirements for endorsement towards Initial Licensure as a teacher of the Massachusetts Department of Education. The Lynch School of Education and Human Development accreditation process and the Interstate Licensure Compact (ICC) facilitate licensure in other states. Licensure requirements are set by each state, however, and are subject to change. Students seeking licensure in Massachusetts must pass all appropriate tests of the Massachusetts Tests for Educator Licensure. All students must consult with the Office of Practicum Partnerships and Professional Development to review the most recent licensure requirements of Massachusetts and other states.

The Lynch School offers several minors and one concentration for Education majors—Middle School Mathematics Teaching, Leadership in Higher Education and Community Settings, and a Special Education Concentration.

The concentration in Special Education is designed to prepare students to work with a diverse group of special needs learners. In light of a growing national movement for further inclusion of special needs students in regular classrooms, teachers must be able to accommodate special needs students in their classrooms. All education students are strongly urged to consider this important concentration. Detailed information on the concentration in Special Education can be found in the minors section of the Lynch School catalog and on the Lynch School website.

The minor in Middle School Mathematics Teaching is available to Elementary Education majors with a Morrissey College of Arts and Sciences Mathematics major or Mathematics/Computer Science interdisciplinary major, or to Secondary Education majors with a Morrissey College of Arts and Sciences Mathematics major. Teachers of middle school mathematics are in great need in the United States, and all eligible Lynch School students should investigate this option. For more information on the minor in Middle School Mathematics Teaching, consult the minors section of the Lynch School catalog and the Lynch School website.

Major in Elementary Education

The major in Elementary Education prepares students for teaching children without disabilities and children with mild disabilities in regular classrooms, grades 1–6.

The major requirements for the elementary program include foundation and professional courses. Foundation courses focus on building understanding in areas such as child growth, learning, pedagogy, and development from diverse social, cultural, and historical perspectives. Professional courses integrate theoretical and pedagogical knowledge of the subject matter of the elementary classroom that includes reading, language, literature, mathematics, science, and social studies, informed by a pupil-centered perspective.

In addition to the mastery of program content, students are instructed in learning theories, instructional strategies and models, curriculum and school organizational practices, educational technology, inquiry, and effective assessment procedures and instruments.

Students also develop competencies in working with diverse learners including English language learners. Instruction enables teacher candidates to effectively integrate children with disabilities into regular classrooms. Teacher candidates have opportunities to engage in problem-solving and reflective practice, work with parents and communities, and apply knowledge to research projects.

The pre-practicum component begins at the sophomore level and culminates in full-time senior level practicum. Courses and practica are carefully linked.

The learning outcomes for Elementary Education majors include:

- Outcome 1: The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.
- Outcome 2: The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.
- Outcome 3: The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.
- Outcome 4: The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.
- Outcome 5: The teacher candidate will identify policies and practices that contribute to systemic inequities in education, be aware of how his or her own background experiences are influenced by these systems, and recognize a professional responsibility to promote and practice principles of social justice teaching.

A second major, either interdisciplinary or in a subject discipline in the Morrissey College of Arts and Sciences or Transformative Educational Studies or Applied Psychology and Human Development in the Lynch School, is optional for Elementary Education majors beginning with the Class of 2027. Students must consult with their program advisors as to the selection and requirements for the major.

Major in Secondary Education

The major in Secondary Education prepares students for teaching in secondary schools, grades 8–12 in most subjects and grades 5–12 for English and History. The major in Secondary Education is ideal for those students interested in high school teaching, who want to achieve an in-depth major in a discipline, and who want to apply elective courses to enhance the major and professional course work. Students may prepare to teach in the following disciplines: biology, chemistry, environmental geoscience, physics, English, history, or mathematics.

Requirements for the secondary major include courses in adolescent development; theory and instruction in teaching diverse populations and meeting the special needs of children; teaching reading, writing, and specific subject methods courses; inquiry; and classroom assessment. The program also includes two pre-practicum experiences beginning sophomore year and culminating in a full practicum in the senior year.

Learning outcomes for Secondary Education majors include:

- Outcome 1: The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing student performance and growth data, using this data to improve instruction, providing students with constructive feedback on an on-going basis, and continuously refining learning objectives.
- Outcome 2: The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.
- Outcome 3: The teacher candidate will promote the learning and growth of all students through effective partnerships with families, caregivers, community members, and organizations.
- Outcome 4: The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.
- Outcome 5: The teacher candidate will promote an inquiry stance of critical reflection about personal practice through individual and collaborative inquiry in service of improving pupil academic, emotional, and social learning.

Middle School Licensure

Teacher candidates seeking endorsement towards licensure to teach at the middle school level should consult the Office of Field Placement and Partnership Outreach.

Major in Transformative Educational Studies

A degree in Transformative Educational Studies from Boston College is one of a kind. Students study the fundamental educational questions arising during this moment of social and educational transformation and learn how to reflect on the direction and purposes of their own education. Students learn how to make authentic contributions to improve the quality of human experience and to make society more just. The Transformative Educational Studies program features coursework that covers leading theories and strategies in Curriculum, Diversity, Equity, Inclusion, Global Perspectives, and Formative Education. The major is designed for students who are interested in careers in education, broadly understood, who wish to pursue careers in educational equity, curriculum development, policy analysis, education law, design of learning spaces, educational technology, higher education, international development work, educational journalism, and non-profit work, as well as, classroom teaching, but who either do not need endorsement towards licensure or wish to defer that aspect to a Fifth Year or Master's program.

Transformative Educational Studies students should enroll in FORM1050 The Educational Conversation in the fall of the first year. This course will also satisfy the Philosophy II BC Core requirement for Lynch School students. In the spring, students should enroll in FORM1051 Reimagining School and Society. This course will satisfy one Social Science and the Cultural Diversity requirement. This major does not require a second major or minor, but students may elect to begin the sequence for a second major or for minor(s) at any point where there is sufficient time to complete the program of study for the second major or minor(s).

In this major, students focus on:

- What does it mean to be an educated person?
- Is schooling primarily a force for social reproduction or social change?
- How will education evolve in light of paradigmatic shifts in the nature of technology and media, literacy, and work?
- What type of learning leads to personal and social transformation?
- How will education respond to contemporary social, environmental, and health crises?
- What does it mean to be an educator?
- How to serve diverse and increasingly globalized student populations?
- This major also provides opportunities for students to pursue their own interests through a variety of elective courses.

While Transformative Educational Studies (TES) majors are not required to have a second major or minor, many TES majors do declare and complete second majors and minors. The minimum number of credits acceptable for most minors is 18, which may include applicable BC Core courses. The concentration in Special Education, however, requires only 12 credits. The minor in Management and Leadership, offered in collaboration with the Carroll School of Management, is another option for students planning to work in industry. The Lynch School of Education and Human Development also offers a number of specialized interdisciplinary minors including: Research, Evaluation and Measurement; Restorative and Transformational Justice; Immigration, Education and Humanitarian Studies; Communication; Cyberstrategy and Design; Design-Thinking and Innovation; Education Theatre; Leadership in Higher Education and Community Settings. Approved areas of study for majors and minors are listed under the Morrissey College of Arts and Sciences, the Carroll School of Management (CSOM minors only), and the Lynch School of Education and Human Development for LSEHD's interdisciplinary majors, second majors, and specialized interdisciplinary minors. Please consult the Chair of the Teaching, Curriculum and Society (TCS) Department or the LSEHD Associate Dean of Undergraduate Programs and Students Office (Campion 104) for the most current course information.

Major in Applied Psychology and Human Development

The twelve-course, 36-credit major in Applied Psychology and Human Development consists of course offerings in developmental psychology, personality theories, educational psychology, and related fields. It provides a basic foundation for careers in social service and community settings or for graduate study in many fields of psychology, including counseling, developmental or educational psychology, organizational

studies, business, and social work. This major prepares students for entry-level employment as support personnel in offices of senior professional psychologists and counselors and in settings such as child/adult residential or daycare facilities and alternative educational, community, or business settings.

The Applied Psychology and Human Development major requires six specified courses and six additional courses selected from across the following areas: Human Services and Health Science; Organization Studies and Human Capital; Policy, Advocacy, and Community Change; and the Science of Learning.

Learning outcomes for Applied Psychology and Human Development majors include:

- Outcome 1: Understand the processes of human development and learning from infancy into late adolescence or the transition to adulthood.
- Outcome 2: Understand how social and cultural contexts shape developmental and educational processes.
- Outcome 3: Understand how contemporary social problems affect children, families, and communities.
- Outcome 4: Use foundational theories of applied psychology and human development to analyze educational and other real-world settings.
- Outcome 5: Articulate a researchable theoretical argument and apply appropriate research techniques to empirical analysis.
- Outcome 6: Articulate their personal core values and beliefs, how these are informed by critical engagement with theoretical and empirical knowledge in applied psychology and human development, and how these inform their relationships with their families and communities.
- Outcome 7: Develop a specialized understanding of 1 of 4 areas:
 - **Human Services:** Basic knowledge of psychosocial challenges to normal development and of a range of individual and community-level strategies to prevent mental illness and enhance psychosocial well-being and mental health.
 - **Organizational Studies—Human Resources:** Basic knowledge of organizational behavior theories, their applications in human resource management, and the contributions of applied psychology in these contexts.
 - **Community, Advocacy and Social Policy:** Basic knowledge of theories of community psychology and the applications of psychological knowledge to advocacy and social policy for and with children, youth and their families, and communities.
 - **Science of Learning:** Basic knowledge of cognitive, motivational, and affective processes that underlie learning and behavior across diverse contexts, and learn to translate this knowledge into educational and behavioral practice.

The Applied Psychology and Human Development major does **not** provide endorsement towards state licensure in psychology nor as a classroom teacher. APHD students are not required to declare a minor or second major; however, they are encouraged to consider the additional minors or majors that are available. There are also APSY field practicum courses, supporting fields of study, and study abroad opportunities, as well as information about future career choices listed. Students who are arranging the Applied Psychology and Human Development Practicum should seek information in Campion Hall 102.

Second Majors and Interdisciplinary Majors for Lynch School Students

All students in LSEHD pursuing a Secondary Education major leading to endorsement for teaching licensure are required to complete an approved second major in the Morrissey College of Arts and Sciences. Elementary Education majors, beginning with the Class of 2027, are not required to declare a second major, but may elect to do so. Transformative Educational Studies or Applied Psychology and Human Development students are not required to declare a second major or minor but are encouraged to do so.

Lynch School Majors

Interdisciplinary Majors

Interdisciplinary majors are based in two or more Morrissey College of Arts and Sciences disciplines that are relevant to teaching in elementary school settings. Each of these majors is available to students in LSEHD pursuing Elementary Education, Transformative Educational Studies, and Applied Psychology and Human Development. Students should consult their advisors regarding the specific courses required for these interdisciplinary majors.

Note: Secondary Education students **cannot** receive endorsement towards teaching licensure in *any* of these interdisciplinary major areas. Secondary endorsement for licensure requires a Morrissey College of Arts and Sciences second major in one of the specific subject disciplines listed under the description of Secondary Education requirements.

Transformative Educational Studies and Applied Psychology and Human Development majors may choose a second LSEHD major or one of the LSEHD interdisciplinary majors listed below or a Morrissey College of Arts and Sciences major.

American Heritages

Recommended for students who are interested in the American heritage from literary and historical perspectives. Two tracks are available for students pursuing this major: a cultural track with emphasis in the literary perspective, and a social science track for students interested in historical and sociological perspectives.

Mathematics/Computer Science

This major is recommended for students who have had four years of high school mathematics and wish to specialize in the area of mathematics and computer science but who are not interested in the traditional Mathematics major because of their intended career objective as elementary, early childhood, or special needs educators. Many students who complete this interdisciplinary major in conjunction with Applied Psychology and Human Development or Elementary Education go on to acquire licensure to teach mathematics at the secondary level by fulfilling master's degree requirements in Secondary Education through the Fifth Year Program.

Perspectives on Spanish America

Recommended for students who may have had at least two years of high school Spanish and wish to develop Spanish language skills, this minor is to be coupled with a background in the historical, sociological, and literary traditions of Hispanic cultures.

Minors or Concentrations for Lynch School Students

A minor is most often an interdisciplinary link to other important fields. It connects students to another discipline or disciplines and changes and expands how they think about subjects, topics, fields of learning and practice, but also expands how they think about life, people, working with others and the importance of interconnectivity. The impetus for new minors across subjects is in Boston College's [Strategic Plan](#). The first of the plan's strategic directives is to foster a culture of learning that "promotes opportunities for students to integrate traditional liberal arts disciplines with professional preparation and vocational discernment."

Lynch minors have students' interest the the future of careers and learning in mind and provide key opportunities for students to explore new concepts and subjects, as well as interdisciplinary expertise and skills. Lynch minors not only offer courses in interesting academic areas, more so ever than in the past, but they also offer several traditional department-related minors. Below are specialized minors for LSEHD students. Please consult the Office of Undergraduate Programs (Campion Hall 104) for the most current information and/or to declare the following minors specifically for LSEHD students.

The minimum number of credits acceptable for most minors is 18, which may include applicable BC major and BC Core courses. LSEHD offers a number of specialized interdisciplinary minors: Research, Evaluation, and Measurement; Restorative and Transformational Justice; Immigration, Education, and Humanitarian Studies; Communication; Cyberstrategy and Design; Design-Thinking and Innovation; Education Theatre; and Leadership in Higher Education and Community Settings.

Cyberstrategy and Design Minor

The minor is designed to advance understanding of the intersections of cybersecurity, data science, and human behavior. Students will explore introductory and mastery level coursework, select electives from different departments, and engage in applied action projects and special topics research specially designated each year. Students successfully completing this minor with the appropriate 3.0 GPA also have the opportunity of accelerated entry into the Fifth-Year Master of Science in Cybersecurity degree offered in another graduate program of Boston College.

Design-Thinking and Innovation Minor

The minor is designed to advance understanding of Design-Thinking as an important set of tools for expanding social impact and human-centered problem solving for people and the planet. Students explore introductory and mastery Design-Thinking coursework, including design ethics, design research methods, design-driven advanced topics, the Design for ImpACt inter-institutional initiative, and select electives from different schools and departments at BC, and engage in social impact action/field-based projects specially designated each year.

Immigration, Education, and Humanitarian Studies Minor

The Immigration, Education, and Humanitarian Studies minor is designed to advance understanding of immigration and related educational and humanitarian topics. Students will explore introductory and mastery level coursework, select electives from both LSEHD and different Boston College schools and departments, and engage in applied action projects and special topics research specially designated each year.

Leadership in Higher Education and Community Settings Minor

This 18-credit minor is designed for students who may have an interest in institutions of higher education, in local and international non-governmental organizations (NGOs), and/or in community-based organizations and programs.

Middle School Mathematics Teaching Minor

A minor in Middle School Mathematics Teaching is available to undergraduates who are either: Elementary Education majors (with an MCAS Mathematics major **or** a Mathematics/Computer Science Interdisciplinary major) **or** Secondary Education majors (with an MCAS Mathematics major). While the minor does not lead directly to middle school mathematics certification at Boston College (we do not offer middle school certification), it does fulfill the National Council of Teachers of Mathematics requirements for middle school teachers of mathematics. With this minor, acquiring middle school mathematics certification in Massachusetts should not be difficult.

Research, Evaluation, and Measurement Minor

The Research, Evaluation, and Measurement minor is designed to advance understanding research, evaluation, and measurement tools and practices. Students will explore topics as they relate to education, applied psychology, and human development. Students successfully completing this minor with the appropriate 3.0 GPA also have the opportunity of accelerated entry into the master's degree in Measurement, Evaluation, Statistics and Assessment degree offered at the LSEHD graduate school.

Restorative and Transformational Justice Minor

The minor is designed to advance understanding of Restorative and Transformational Justice as a critically important tool for addressing past harms and transforming lives across multiple settings and domains. Students explore Restorative and Transformational Justice topics as they relate to legal systems and criminal justice, environmental justice and sustainability, decolonializing and restoring history, human capital in organizational settings, transformative teaching and education, and in other areas aligned to human development.

Special Education Concentration

The Special Education Concentration is available to Lynch School of Education and Human Development students only. This includes students majoring in Elementary Education, Secondary Education, Transformative Educational Studies, and Applied Psychology and Human Development who have an interest in special needs education.

Teaching English Language Learners (TELL) Certificate

The Lynch School of Education at Boston College offers a formal Boston College approved certificate program in Teaching English Language Learners (TELL). Candidates should be working towards endorsement for licensure in an education field (early childhood, elementary,

secondary, reading, etc.). This Boston College program is designed to prepare mainstream teachers to work with bilingual learners/English Language Learners in their mainstream classroom settings. The Boston College approved (TELL) certificate requires two courses and completion of a field experience in a classroom that includes bilingual learners.

Minors in the Carroll School of Management for Lynch School of Education and Human Development Students

There are seven minors offered to non-management students: Accounting for CPAs, Accounting for Finance and Consulting, Finance, General Business, Management and Leadership, Managing for Social Impact and the Public Good, and Marketing. Interested students should visit bc.edu/csom-minors for more information.

Minors in the Morrissey College of Arts and Sciences for Lynch School of Education and Human Development Students

In addition to a multitude of MCAS department and interdisciplinary minors, open to the Lynch School undergraduates, students may also declare the following minors that were created for specifically for Lynch School students by contacting the Office of Undergraduate Programs.

Educational Theatre Minor

This minor provides drama education and theater training to LSEHD students who hope to include theater as a subject they teach and practice in school settings and/or who want to use creative dramatics and applied theater techniques as teaching tools in other institutional settings.

Communication Minor

This 18-credit minor introduces students to the field of Communication. Students enroll in four required courses and two electives.

Minors in LSEHD for Morrissey College of Arts and Sciences, Carroll School of Management, and Connell School of Nursing Students

Applied Psychology and Human Development Minor

This 18-credit minor with specific course requirements in each of three categories may interest students who wish to (1) deepen their knowledge of human behavior in the areas of psychology, human development, and learning in preparation for a career in fields such as human resources, counseling, public health, social, community and political advocacy, among others; (2) gain specialized knowledge in certain specific areas of human development and wellness: for example, counseling, personal assessment, family crisis assistance, substance abuse interventions, and child/aging/elderly care; or (3) prepare for employment in a government organizations.

Foundation in Education Minor

This 18-credit minor introduces students to courses in the fields of applied psychology and teacher education.

Inclusive Education Minor

This 18-credit minor is designed to (1) introduce students to the world of disabilities and special education, with an emphasis on special education practice, and (2) enhance the ability of future professionals to meet the needs of an increasingly diverse population of students in America's schools.

Research, Evaluation, and Measurement Minor

The Research, Evaluation, and Measurement minor is designed to advance understanding research, evaluation, and measurement tools and practices. Students will explore topics as they relate to education, applied psychology, and human development. Students successfully completing this minor with the appropriate 3.0 GPA also have the opportunity of accelerated entry into the Masters in Measurement, Evaluation, Statistics and Assessment degree offered at the LSEHD graduate school.

Leadership in Higher Education and Community Settings Minor

This 18-credit minor is designed for students who may have an interest in institutions of higher education, in local and international non-governmental organizations (NGOs), and/or in community-based organizations and programs.

Secondary Education Minor

This minor is open to Morrissey College of Arts and Sciences students who major in one of the following disciplines: English, Mathematics, History, Biology, Chemistry, Environmental Geoscience, or Physics, and who plan to pursue licensure to teach in high school.

Declaration of Minor Process

Students in MCAS who are interested in the Secondary Education Minor should make an appointment with the Office of Undergraduate Programs. This minor requires early planning, an interview, an application, and a minimum grade point average of 3.0.

Graduation

For information regarding graduation, visit the Graduation section of Undergraduate Academic Policies.

This includes information on policies regarding such topics as:

- Advanced Standing
- Acceleration

The University awards degrees in May, August, and December of each year, although commencement ceremonies are held only in May.

Fifth-Year and Early Admit Programs

For Boston College Juniors

The Fifth-Year and Early Admission Programs offer academically qualified Boston College juniors a unique opportunity to begin graduate study during their undergraduate senior year, allowing them to graduate with a bachelor's and master's degree in a shortened amount of time. Students accepted in the Fifth Year/Early Admit program will be able to apply two approved graduate courses (6 credits) towards both their bachelor's degree (120 credits) and their master's degree (30 credits or more). In consultation with an advisor, a graduate level course may be added each semester onto the student's senior-year schedule.

All undergraduate juniors in the Lynch School of Education and Human Development, Morrissey College of Arts and Sciences, Connell School of Nursing, and Carroll School of Management are eligible to apply for these programs.

(*See additional Early Admit requirements below.)

Fifth-Year Programs are available in:

- Measurement, Evaluation, Statistics, and Assessment
- Global Perspectives
- Early Childhood, Elementary, or Secondary Teaching
- Curriculum and Instruction

- Special Education for Moderate Support Needs (mild/moderate learning disabilities, developmental disabilities, and behavior disorders)
- Special Education for Extensive Support Needs (including visually impaired, deaf/blindness, and multiple disabilities)
- Higher Education

There may be limited federal financial assistance for some graduate programs in Severe Special Needs and Secondary Science Teaching.

Early Admit Programs are available in Mental Health Counseling and School Counseling. Given the number of credits required for licensing in Mental Health and School Counseling, both Early Admit Program and students admitted directly into the M.A. programs typically need six years to complete their B.A. and license-eligible M.A. degree in Mental Health (60 credits) or School Counseling (48 credits). The main advantages of the Early Admit Program are (1) BC juniors receive early provisional admittance into these M.A. programs, and (2) complete two master's-level courses during senior year.

Students interested in a Fifth Year or Early Admit Program should consult with the Lynch School Office for Graduate Student Services, Campion 135, during the fall semester of their junior year. Without proper advisement and early acceptance into a master's degree program, students will be unable to complete the program in five years.

Full Graduate Student Status

Upon successful graduation from the undergraduate program, Fifth-Year and Early Admit students will be advanced to full graduate student status if they have maintained good academic standing (including a 3.5 or higher in their two graduate courses). Early admit students will also need to have engaged in field experience as described above. Students should submit their transcripts and documentation of any additional service work if the work was not previously documented in their application for the Fifth-Year and Early Admit programs. Upon final admission, the student will receive an official letter of acceptance into the full master's program by the Office of Graduate Admission (gsoe@bc.edu or 617-552-4214).

Application Process

- Students must apply by March 1 of their junior year.
- Applicants must meet all [graduate admission requirements](#).
- The application fee and GRE are waived for applicants to the Fifth Year and Early Admit Programs.
- Notification of approval to begin the program is usually made in May by the Office of Graduate Admission.

If students are in a study-abroad program during their junior year but are still interested in one of these programs, they should contact the Office of Graduate Admission at gsoe@bc.edu or (617) 552-4214.

If an applicant is not offered admission into the program, they are welcome to re-apply to the master's program upon completion of their undergraduate degree.

B.A./M.S. Option

A special accelerated entry Master of Science in Cybersecurity Policy and Governance is also available for a limited number of students pursuing a B.A. in LSEHD and successfully completing the Cyberstrategy minor. Students will be able to apply two approved graduate courses (6 credits) towards both their bachelor's degree (120 credits) and their Master of Science in Cybersecurity Policy and Governance degree. Students interested in this 4/1 accelerated entry program should consult with the LSEHD Advisor in Campion Hall 104 for the M.S. in the Cybersecurity Policy and Governance Program and the Lynch Office of Undergraduate Programs for information on requirements and prerequisites during their undergraduate coursework and to request the application for graduate-level admission at the beginning of their **senior year**.

*Students who have completed the Cyberstrategy minor including the two approved graduate courses and have at least a 3.0 GPA in both of the graduate courses counted in the minor are strong candidates for this graduate program.

B.A./M.S.W. Option

A special master's degree program in Social Work program is also available for a limited number of students pursuing a B.A. in Transformative Educational Studies or Applied Psychology and Human Development. Students should consult the Graduate School of Social Work for information on requirements, prerequisites, and application at the beginning of their sophomore year. Students interested in this 3/2 program in Transformative Educational Studies or Applied Psychology and Human Development and in Social Work should apply to the Graduate School of Social Work before the end of their **sophomore year**. The student's application will be re-evaluated after final grades are posted in senior year for full acceptance into the M.S.W. Program. Please contact the Office of Admissions, Graduate School of Social Work, Boston College, McGuinn Hall, Chestnut Hill, Massachusetts 02467, 617-552-4024.

*Students who have completed some transformative educational studies or psychology-related coursework, have at least a 3.5 GPA, and have completed some type of practical, field-based or helping experience (e.g., residential advisor, camp counselor, hotline operator, youth worker, etc.), either volunteer or paid, are strong candidates for this 3/2 B.S./M.S.W. program.

Morrissey College of Arts and Sciences

The Morrissey College of Arts and Sciences is the oldest and largest of the undergraduate colleges of the University. It offers either a Bachelor of Arts (B.A.) or Bachelor of Science (B.S.) degree, depending upon the major discipline, and prepares graduates for careers in a broad range of fields, as well as graduate training in both professional and academic disciplines.

In the Morrissey College of Arts and Sciences a student's program consists of required Core courses, intensive study in a major field, and a choice of individual electives reflecting a student's personal interests.

Core—A modern version of the traditional Jesuit *Ratio Studiorum*, the Core in the Morrissey College of Arts and Sciences provides an introductory exposure to the various disciplines that define a liberally educated individual in today's world as well as to the philosophical and theological ideas that help integrate these different areas of knowledge into a student's own intellectual perspective. All Morrissey College of Arts and Science students must complete the University Core requirements in the Arts, Cultural Diversity, History, Literature, Mathematics, Natural Sciences, Philosophy, Social Sciences, Theology, and Writing, as well as a Foreign Language Proficiency Requirement.

Major—All students in the Morrissey College of Arts and Sciences must select a major field of study from the 39 majors offered in the college. Work in the major is not necessarily directly related to career training, but it is meant to develop critical and analytical thinking, professional and presentational skills, and an appreciation for the complexity of an area of study beyond the introductory level. A major generally consists of at least 30 credits (ten to twelve focused courses) in a field, 27 of which are not used to fulfill requirements for another major or minor. Some of these are sequentially organized required courses. Some of the courses are more narrowly focused major electives. A list of majors is available at the [Majors and Minors](#) page.

Electives—Electives in the Morrissey College of Arts and Sciences are designed to challenge students to help define their own individual education. Students may use electives to pursue intensive work in another field with a second major or minor; to study fields that bridge traditional disciplines through organized interdisciplinary minors; to pursue professional interests in management, education, or nursing; or to explore their own individualized personal, intellectual, and artistic interests.

Thus, the purpose of the Morrissey College of Arts and Sciences is to produce broadly-educated, as well as highly-skilled graduates.

To ensure a coherent, well-developed program, students must meet with their faculty advisors before registration for each semester. They should also consult with other faculty, students, the Deans, the Pre-medical and Pre-law advisors, the Counseling Office, and the Career Center.

[MCAS Courses](#)

Scholar of the College

Scholar of the College is a designation given at Commencement to exceptional students (those with overall GPAs of 3.700 or higher) who have done independent work of the highest quality for a significant part of their senior year under the supervision of scholars in their major fields. The program is administered by the Dean's Office. Students apply through their major departments and ordinarily complete Advanced Independent Research projects within that department. Interdisciplinary projects require the approval of all of the relevant departments, one of which must be the student's major department.

Normally, the Advanced Independent Research that qualifies for Scholar of the College recognition will consist of 12 academic credits, 6 each in the fall and spring of senior year, although occasionally a 3-credit senior thesis in the fall may develop into a 6-credit Advanced Independent Research in the spring. Students who successfully complete Advanced Independent Research projects with grades of A- or better and maintain cumulative GPAs of 3.700 or higher may be nominated for Scholar of the College recognition at Commencement.

To be considered for Scholar of the College recognition, finished projects, along with the evaluations of the faculty advisor and a department-appointed second and independent reader, must be submitted to the Office of the Dean in mid-April. Student should consult the Dean's office for the exact deadline for the current year. The Scholars of the College will be selected from among the nominated student authors. All projects nominated for the McCarthy Prize will be reviewed by a faculty committee appointed by the Dean.

Departmental Honors

The designation of departmental honors is reserved for above average students who have demonstrated academic achievement in additional or more difficult courses or by successfully undertaking an approved research project, as determined by each department.

Departmental Minors

A departmental minor consists of at least 18 credits (typically six, 3-credit courses). These must include one introductory-level course and at least one upper-level course or seminar. Students choose courses for the minor in consultation with the director of the department's minor program. The following restrictions apply:

- No more than two Core courses may be used toward a minor.
- Core courses that do not count toward a departmental major will not count toward a departmental minor.
- Students may not major and minor in the same department unless that department offers more than one major.
- Students must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor.

Minors are available in Arabic Studies, Art History, Biology, Chemistry, Chinese, Classics, Computer Science, Economics, English, Environmental Studies, Film Studies, French, Geological Sciences, German Studies, Hispanic Studies, History, Irish Studies, Italian, Linguistics, Mathematics, Music, Philosophy, Physics, Russian, Sociology, Studio Art, Theatre, and Theology. Information regarding specific requirements is available in the departments.

Interdisciplinary Programs

The Morrissey College of Arts and Sciences offers a variety of interdisciplinary programs and minors. Visit the Interdisciplinary Programs and Minors page for more information.

Six-Year Bachelor and Law Degree Program

In order to respond to changing student needs, the Boston College Law School has instituted an accelerated admissions program (3+3 Program). The 3+3 Program allows students to earn an undergraduate degree and a law degree in six years instead of seven.

Under this program, exceptionally well-qualified students from the Morrissey College of Arts and Sciences will be allowed to enter the Boston College Law School after completing their junior year of undergraduate study. During their junior year, students seeking to participate in the 3+3 Program apply to Boston College Law School. If accepted for admission, they begin law school immediately following completion of their junior year. Upon successful completion of the first year of law school with grades of "C" or better, students earn a bachelor's degree from the Morrissey College of Arts and Sciences. Upon successful completion of the remaining two years of law school, students earn a J.D. from Boston College Law School.

The 3+3 Program is limited to undergraduates in the Morrissey College who have completed at least four full-time semesters in residence in the College. Interested students should contact the pre-Law advisor early in their program of study for more information and advisement.

Fifth Year B.A./M.A.

The Morrissey College of Arts and Sciences—Graduate School offers a five-year B.A./M.A. program in some departments. Application to the program normally takes place early in the second semester of the junior year. The applicant must complete an application to the master's degree program in the Graduate School of the Morrissey College of Arts and Sciences, Gasson 108. Admission to the B.A./M.A. program normally requires an overall GPA of 3.333 and a GPA of 3.5 in the major. Although specific B.A./M.A. program requirements will vary across departments, the program limits the number of credits that can be applied towards the master's degree to 6 credits that may also be applied

to the 120 credits required for the undergraduate degree. The undergraduate degree will be conferred upon completion of undergraduate requirements. The master's degree will be conferred upon completion of degree requirements specified by the department.

Accelerated Bachelor of Arts—Master of Social Work Program

The Morrissey College of Arts and Sciences and the Boston College School of Social Work offer an Accelerated B.A./M.S.W. Program whereby a limited number of Psychology and Sociology majors may begin the Social Work foundation courses during their junior and senior years and receive the B.A. at the end of four years and the M.S.W. after the fifth year. Students must meet all standard requirements for admission to the Boston College School of Social Work and enroll as final-year M.S.W. candidates for their fifth year. Interested students should contact the Director of Admissions of the School of Social Work by spring semester of the sophomore year at the latest. For prerequisites and application information, consult the School of Social Work, McGuinn 118, 617-552-4024.

The School also offers an upper-division introductory course that is not applicable to the M.S.W. degree, SCWK6600 Introduction to Social Work, which is cross-listed with the Departments of Psychology and Sociology in the Morrissey College of Arts and Sciences.

Minors in the Lynch School of Education and Human Development for Morrissey College of Arts and Sciences Students

Arts and Sciences students completing minors in the Lynch School of Education and Human Development must fulfill all major, Core, and elective requirements in the Morrissey College of Arts and Sciences and have completed at least 96 credits in the Morrissey College of Arts and Sciences.

There are five minors offered to non-Lynch School of Education and Human Development students: Applied Psychology and Human Development, Foundation in Education, Inclusive Education, Leadership in Higher Education and Community Settings, and Secondary Education.

The minor in Secondary Education is open to Morrissey College of Arts and Sciences students in specific majors. See the Lynch School of Education and Human Development section for more information.

Minors in the Carroll School of Management for Morrissey College of Arts and Sciences Students

Morrissey College of Arts and Sciences students completing minors in the Carroll School of Management must fulfill all major, Core, and elective requirements in the Morrissey College of Arts and Sciences and have completed at least 96 credits in the Morrissey College of Arts and Sciences.

There are six minors offered to non-management students: Accounting for CPAs, Accounting for Finance and Consulting, Finance, Management and Leadership, Managing for Social Impact and the Public Good, and, Marketing. Interested students should visit bc.edu/csom-minors for more information.

International Study

The aim of international study is to enable students to become fluent in a foreign language and to better understand a different culture. Students wishing to spend a year or a semester abroad and transfer the credits earned to their Boston College degree must receive approval from a Dean and enroll in a program approved by the College. To qualify for Dean's approval, a student must have at least a 3.0 cumulative average, have completed a significant number of courses in the major and have made substantial progress on Core requirements, have the approval of the Chairperson of the major department, and have adequate proficiency in the language of the country in which he/she plans to study. For students who have not passed the language proficiency requirement, a minimum of one year of college-level language study is required.

Students should begin the application process by contacting the Office of International Programs early in their sophomore year.

Academic Regulations

Satisfactory Academic Progress

A student in the Morrissey College of Arts and Sciences must complete at least 120 credits to earn the bachelor's degree 96 of which are Morrissey College credits over at least 8 full-time semesters. Particular requirements for gaining those credits, or compiling those courses, are stated elsewhere in this section. All Morrissey College of Arts and Sciences students must complete the University Core requirements in Arts, Cultural Diversity, History, Literature, Mathematics, Natural Sciences, Philosophy, Social Sciences, Theology, and Writing, as well as the Language Proficiency requirement. For more information, visit the Policies and Procedures section.

To continue normal progress in a full-time program of study, a student must ordinarily maintain a cumulative average of at least 1.667 as the minimum standard of scholarship and must not fall more than 7 credits behind the total number of credits a student of their status is expected to have completed (an average of 15 credits each semester). Any student who is permitted by the Deans to continue enrollment in a full-time undergraduate program, with the exception of students on probation, is considered to be in good standing.

Failure to maintain good standing either through a low cumulative average, or by incurring deficiencies including failures, withdrawals, incompletes, or unapproved underloads, will result in the student being placed on warning, probation, or being required to withdraw, as the Dean shall determine.

Morrissey College Academic Warning and Probation Policy

Academic Concern

A student who falls 8–11 credits behind, at the end of the semester, will be the subject of academic concern for the Associate Deans. These students are required to take summer courses to make up their academic deficiencies.

Academic Warning

A student who falls 12–14 credits behind, at the end of a semester, will receive an academic warning. Incompletes are considered deficient credits for the purpose of this determination. An academic warning will push the student's graduation date back by one semester, though the original graduation date may be regained if and when adequate make up credits are completed. A student may request restoration of their original graduation date when they are within three credits of their original graduation date.

Academic Probation

A student who falls 15 or more credits behind at the end of a semester will be academically withdrawn for the subsequent semester, or placed on probation. Incompletes will be counted as deficient credits for the purposes of making this determination. A student on probation is not considered to be in good academic standing. In order to return to academic good standing and continue as a degree candidate in MCAS a student on probation must:

1. Demonstrate their capability of continuing by successfully completing at least 12 credits in MCAS day courses.
2. Achieve an average term GPA of at least 2.00 in those 12 credits.
3. Earn sufficient credits to be within 3 of the number expected for their revised graduation date.

While courses taken at BC while on probation will count towards graduation, the probationary semester will *not* count as one of the 8 semesters required for the degree. Hence, after a probationary semester, the student's graduation date will normally be delayed at least one semester. A student who has been on probation may become eligible to regain their original graduation semester by satisfying all degree requirements by their original graduation date.

A student failing to meet all the conditions of the probationary semester will be academically withdrawn from the college and can only apply for readmission after making up all credit deficiencies by approved methods. Probation will not be extended to a second consecutive semester. A student is allowed no more than 2 probationary semesters. Subsequent credit deficiencies can lead to permanent academic dismissal.

If a student does not want to meet the conditions of a probationary semester in MCAS they can choose to be academically withdrawn. While withdrawn, a student can apply to take pre-approved makeup courses as a non-degree student in the Woods College or at an appropriately accredited external college or university. After completing the required makeup credits, the student can apply for readmission to the Morrissey College. Upon readmission, their graduation semester will be postponed at least one semester.

Importantly, in all cases, there is normally a limit of 24 external credits that can be applied to a Morrissey College degree. A student who finds they are unable to meet the requirements of their academic warning or probationary semester should contact their Dean immediately.

Acceleration

For information regarding acceleration, visit the Graduation section of Undergraduate Academic Policies.

Procedure of Appeal

Students with questions of interpretation or petitions for exception from the Morrissey College of Arts and Sciences Regulations, apart from those specified in the University's academic integrity policy, may submit them to the Associate Deans.

A student should always attempt to resolve problems concerning the manner in which grades have been awarded or the academic practices of an instructor by direct contact with the instructor. In the rare case of an unresolved question the student should first refer the matter to the Chairperson or Director of the relevant department or program.

A formal appeal of a course grade, which ought not be entered lightly by a student nor lightly dismissed by an instructor, should be made no later than the sixth week of the following semester. In making a formal appeal, a student files a written statement with the Dean for his or her class. The Dean will then request written responses from both the instructor and Chairperson and submit the case to the Appeals Committee of the Educational Policy Committee. The committee will review the case thoroughly and make a recommendation on resolution to the Dean of the College. The Dean's decision will be final.

African and African Diaspora Studies

Central Themes

To get the most out of an AADS minor, students are encouraged to organize their courses around the central themes of globalization, intersectionality, or social justice.

Globalization

Globalization is as old as the trade in African slaves. Patterns of resource extraction, labor, trade, commerce, and travel have shaped the experiences of African-descended peoples and the peoples they have encountered. Selected courses explore the connections between various geographic regions, cultural traditions, and historical developments that have defined globalization.

Intersectionality

Race is defined by various identity categories and social locations such as gender, class, color, ethnicity, region, nation, age, sexuality, political ideals, and spiritual beliefs. Intersectionality reminds us that race is not a monolithic or homogenous category of human experience.

Social Justice

The history of African and African-descended peoples has been defined by the struggle for social justice: the fight for human equality and the fight against racism, sexism, homophobia, and class exploitation. In resisting enslavement, segregation, patriarchy, imperialism, and colonialism, and by striving to overturn discrimination in education, housing, healthcare, employment, and religious institutions, African and African Diasporic peoples have undertaken drives for social emancipation that have expanded the meaning of democratic ideals.

Major Requirements—31 Credits (or More)

The African and African Diaspora Studies (AADS) major consists of a minimum of 31 credits, equivalent to at least 10 full-semester courses. AADS majors can have a second major as long as the student stays in compliance with the University's regulation that, in order to earn a major, a student must have at least 27 credits in the major program that are not used to fulfill requirements for another major or minor. In addition to taking AADS1110 Introduction to African Diaspora Studies (3 credits) and AADS6600 Senior Seminar (4 credits), students pursuing an AADS major need to take 8 additional elective courses, and only two of which can be a 1000-level course. Four of those elective courses must be Black Atlantic courses. Black Atlantic courses are those that have a global framework that puts different geographical regions of the world in conversation with one another within the African Diaspora.

There are two tracks in which AADS majors can concentrate: (1) Intellectual Traditions and Cultural Production or (2) Politics and Social Inquiry. Students in the Intellectual Traditions and Cultural Production track examine Black intellectual traditions, expressive forms, and modes of cultural analysis and cultural criticism primarily (but not exclusively) based on textual analyses. In the Politics and Social Inquiry track students examine the development of institutions, measure inequality, and identify societal patterns utilizing primarily (but not exclusively) historical and social science techniques. While both tracks are rooted in the interdisciplinary study of the African Diaspora, the Intellectual Traditions and Cultural Production track will be for those students most interested in pursuing careers and graduate studies typically associated with the humanities, while the Politics and Social Inquiry track will attract students with more social science interests.

AADS majors must take six of their eight elective courses in one track and their remaining two in the other. Students' elective courses may not fall exclusively in Social Science (Communication, History, Political Science, or Sociology) or Humanities (Art History, English, Music, Philosophy, Romance Languages and Literatures, Theatre, or Theology) departments.

Sample Schedule for Intellectual Traditions and Cultural Production

First Year

- AADS1110 Introduction to African Diaspora Studies (3 credits)
- AADS2204 Music and Social Justice (3 credits)

Sophomore Year

- AADS1114/THEO2114 When Gods Begin: Introduction to African and African Diaspora Religions (3 credits)
- AADS/ENGL2470 Black and Popular: Speculative Fictions by Black Writers (3 credits)
- AADS2306/MUSA2306 Music of Africa (3 credits)

Junior Year

- AADS/ENGL4538 Visual Culture in Black America: Seeing and Being Seen (3 credits)
- AADS/THEO3000 Black Church, Black Protest (3 credits)

Senior Year

- AADS/ENGL3326 Blackness, Performance, and Freedom (3 credits)
- AADS5597/SOCY5597 Contemporary Race Theory (3 credits)
- AADS6600 Senior Seminar (4 credits)

Sample Schedule for Politics and Social Inquiry

First Year

- AADS1110 Introduction to African Diaspora Studies (3 credits)
- AADS1155/SOCY1043 Introduction to African American Society (3 credits)

Sophomore Year

- AADS/COMM2182 Black Popular Culture (3 credits)
- AADS2442/POLI2442 African Politics (3 credits)
- AADS/HIST2800 From Slave Patrols to the War on Crime: Policing Blacks Across American History (3 credits)

Junior Year

- AADS/ART2250 Introduction to African Art and Visual Culture (credits) (3 credits)
- AADS/SOCY3400 Food Justice Across the African Diaspora (3 credits)

Senior Year

- AADS/SOCY4400 Racialized Medicine (3 credits)
- AADS3310 Studies in Race, Law and Resistance (3 credits)
- AADS6600 Senior Seminar (4 credits)

Minor Requirements—18 Credits (or More)

AADS introduces histories, cultures, and experiences of African descended peoples to the broadest range of students; supports serious academic research on Africa and the African Diaspora; gives students opportunities to examine the depth and breadth of African legacies on the continent and in all parts of the world; links local Black communities more closely to Boston College; projects the significance of realities of people of African descent to the intellectual life of Boston College and larger communities; and prepares students to succeed in college and their post-graduate careers.

An AADS minor will consist of a minimum of 19 credits (6 full-semester courses)

Requirements

- AADS1110 Intro to African Diaspora Studies (3 credits)

- AADS6600 Senior Seminar (4 credits)
- 4 electives (12 credits)
 - 2 electives must be Black Atlantic Courses

A Black Atlantic course has a global perspective that puts different geographical regions of the world in conversation with one another within the African Diaspora

AADS1110 Introduction to African Diaspora Studies familiarizes students with the major issues and methodologies involved in studying the African Diaspora. **AADS6600 Senior Seminar** is an intensive reading and writing course designed to assist students in synthesizing their minor experience. Minors must pass **AADS1100** prior to enrolling in **AADS6600**.

To affirm and specify our minors' selected Central Theme, we suggest that their four additional courses reflect a particular thematic focus. Some possible themes are:

- Cities and Urban Life
- Economics of Inequality
- Gender and Sexuality
- Globalization and Development
- Intellectual and Philosophical Traditions
- Migration and Immigration
- Music and the Performing Arts
- Political Systems and Grassroots Protest
- Popular Culture and New Media
- Spirituality and Social Protest

Though suggested, these themes are not required; additionally, students may devise their own thematic focus, in consultation with the AADS Director or their AADS Advisor.

Contact us at 617-552-3238 or visit our website at bc.edu/aads.

Core Offerings

The Program offers several courses that satisfy the Core requirement in Cultural Diversity and one course that satisfies the requirement in Social Sciences.

Art, Art History, and Film

Major Requirements: Art History

Art history encompasses the study of images, objects, and buildings from a broad range of historical periods and geographical regions, providing a doorway into many rich and diverse cultures throughout the world. It is about vision in the broadest sense, how people saw themselves in the past, and how we see ourselves in the present and future. Art history understands art as an instrument of power and recognizes its potential for influencing contemporary social issues.

By honing skills of careful observation, critical analysis, historical research, and written communication, a degree in art history provides students with tools to interpret the past in a wide variety of cultural contexts and teaches them how to be more critical participants within our media-saturated world. Through the close study of objects, art history cultivates a greater aesthetic awareness by considering questions of beauty, quality, and value across time and space.

The teaching and research of our faculty cover the arts of Africa, Asia, Europe, the Americas, and the Islamic world, from ancient to contemporary times. Professors actively participate in interdisciplinary collaboration through co-teaching, joint research projects, workshops, conferences, and museum curation. Students are encouraged to think across geographic and disciplinary boundaries by studying the visual cultures of multiple regions and by taking courses in complementary fields, such as studio art, philosophy, sociology, history, and religion.

Art history courses make use of the rich collections of Boston College's McMullen Museum of Art and numerous other cultural institutions across the city, including the Museum of Fine Arts, Institute of Contemporary Art, and Isabella Stewart Gardner Museum, as well as the built environment of historic Boston. Students frequently engage in summer internships and study abroad, enhancing traditional classroom learning through first-hand experience.

The skills of observing, reading, and writing offered through an art history degree not only enrich life but are fundamental to many future career paths. Alumni of the department have gone on to work in academia, art criticism, architecture, museums, art conservation, cultural preservation, intellectual property law, and at commercial galleries and auction houses. Because art history contributes to the broad intellectual foundation that constitutes a liberal arts education, the skills acquired are also transferable to many areas outside the discipline.

The Art History major requires 11 courses (33 credits):

- ARTH1101 Intro to Art History I: Prehistory to Middle Ages
- ARTH1102 Intro to Art History II: Renaissance to Modern
- **Two** of the following three courses: ARTH2212 East Asian Art and Architecture, ARTH2213 Islamic Art and Architecture, ARTH2250 Introduction to African Art and Visual Culture
- One Studio Art (ARTS) course or ARTH4314 The Materials of Art and their Conservation
- Elective 1 (2000 or 3000 level)
- Elective 2 (2000 or 3000 level)
- Elective 3 (3000 or 4000 level)
- Elective 4 (3000 or 4000 level)
- Elective 5 (3000 or 4000 level)
- ARTH4401 Seminar in Art Historical Research (must be taken in the fall semester of junior or senior year)
- OPTIONAL Thesis: Students sign up for an Independent Study with a faculty advisor in the spring semester of their senior year. Students who write a senior thesis are eligible for departmental honors.

The Art History major can also be completed with a concentration in Museum Studies, which requires a minimum of 12 courses (36 credits):

- ARTH1101 Intro to Art History I: Prehistory to Middle Ages
- ARTH1102 Intro to Art History II: Renaissance to Modern
- Two of the following three courses: ARTH2212 East Asian Art and Architecture, ARTH2213 Islamic Art and Architecture, ARTH2250 Introduction to African Art and Visual Culture
- ARTH4314 The Materials of Art and Their Conservation

- ARTH4370 Museum of Art: History, Philosophy, and Practice Course
- One of the following courses: MGMT1021 Organizational Behavior, MGMT2123 Negotiation, MGMT2127 Leadership, MGMT2132 Managing Change, MGMT2133 Leading High Performance Teams, MGMT2265 Globalization, Culture, and Ethics
- Elective 1 (2000 or 3000 level)
- Elective 2 (2000 or 3000 level)
- Elective 3 (3000 or 4000 level)
- Elective 4 (3000 or 4000 level)
- ARTH4401 Seminar in Art Historical Research (must be taken in the fall semester of junior or senior year)

Major Requirements: Film Studies

The Film Studies major applies the liberal arts tradition to the present-day culture of images and technologies. Courses in film history, theory, and criticism enable students to become active, selective, and ethical participants in a world progressively more dominated by the media of visual communication.

Research-based studies in American and world cinema explore the mutual influence of the films and their respective diverse cultures and historic periods. Familiarity with several of the great films and filmmakers provides a basis for understanding the relationship between contemporary artists and industrial society. Each student will have an opportunity to apply this theoretical knowledge to the experience of film making and exhibition both through programs in scripting, photography, production, and digital editing, and through an extensive internship program in the Boston area.

Students are encouraged to widen and deepen their understanding of the medium through additional courses in Art History, Studio Art, Theater, and Communication. While this Film Studies major provides a solid foundation for further studies and professional involvement in the industry, it also offers the liberal arts student a broad-based preparation for other career options.

For more information, contact Prof. John Michalczyk, Director, Film Studies major Coordinator, Devlin Hall 420, 617-552-3895, john.michalczyk@bc.edu.

For the major in Film Studies there is a requirement of twelve courses, eight of which must be at the 2000 level or above:

- FILM2202 Introduction to Film Art

At least two production courses:

- FILM1171 Filmmaking I
- FILM2230 Video Art
- FILM2273 Filmmaking II
- FILM2274 Digital Non-Linear Editing
- FILM2285 Adobe Premier Editing
- FILM3301 Screenwriter
- FILM3303 Advanced Screenwriting
- FILM3396 Advanced Screenwriting II
- FILM3310 Working Cinematographer
- FILM2287 Creative Web Design
- FILM3390 Sound Design
- ARTS1155 Introduction to Digital Arts
- ARTS1161 Photography I
- ARTS2261 Intermediate Photography
- ARTS1156 Photoshop and Illustrator

Two film history courses and six electives from this selection:

- FILM2220 Holocaust and the Arts
- FILM2277 Russian Cinema

- FILM2282 Political Fiction Cinema
- FILM2283 History of European Cinema
- FILM3304 From Script to Screen
- FILM3305 Italian Cinema: Passion, Politics, and Pain
- FILM3306 Social Issues in Film
- FILM3307 German Cinema: Light and Shadows
- FILM3308 Autobiography in Film
- FILM3309 Nazi Film, Nazi Art: The Power of Propaganda
- FILM3312 World Cinema
- FILM3314 Cinema of the Greater Middle East
- FILM3316 Film Directing
- FILM3318 Filming Performance
- FILM3319 Advanced Digital Media-Moving Images Projects
- FILM3325 Comic Film
- FILM3331 Independent American Film
- FILM3332 Maverick Hollywood Directors
- FILM3333 War is Hell: The Combat Film
- FILM3336 Cold War Revisited in Film
- FILM3343 Genocide and Film
- FILM3380 Latin American Cinema
- FILM3381 Propaganda Film
- FILM3382 Documentary Film
- FILM3383 Film Criticism and Theory
- FILM3389 American Directors Series
- FILM3391 American Film Genres

Senior year: One course from the following:

- FILM3394 Documentary Film Production
- FILM3396 Advanced Screenwriter II
- FILM4400+ Senior Project: Thesis, Script, or Film
- FILM4441 Independent Study
- FILM4461 Filmmaking III

Major Requirements: Studio Art

The Studio Art major provides students with an opportunity to develop the techniques, visual sensibility, and historical understanding necessary for working with various materials. An exploration of the meanings and ideas generated by the things we make and an awareness of the process of making are essential parts of the program.

An integral part of the Studio Art major's undergraduate education is the senior project. Focused in their area of concentration, senior projects are exhibited on campus at the end of the academic year.

Students interested in majoring in Studio Art should contact Prof. Mark Cooper at mark.cooper@bc.edu

The Studio Art major requires 11 courses (33 credits):

Students must have taken at least four semesters of coursework in Studio Art prior to their senior year. It is strongly recommended to take Issues and Approaches in the sophomore year after declaring their major or minor.

TWO of the following introductory courses:

- ARTS1101 Drawing I
- ARTS1102 Painting I

- ARTS1104 Design: Seeing is Believing or ARTS1107 Design 1: Foundations
- ARTS1105 Making Prints/Making Books: An Introduction to Printmaking and Book Arts
- ARTS1138 Introduction to 3D: Sculpture
- ARTS1141 Ceramics I
- ARTS1155 Introduction to Digital Arts (Note: course has been renamed Introduction to Photoshop and Illustrator and course # on Eagle Apps is ARTS1156)
- ARTS1161 Photography I
- ARTS1163 Intro to Digital Photography
- ARTS1701 Art of Creativity

ONE of the following courses:

- ARTH2204 Postwar: Art After 1945
- ARTS2211 Ideas in Contemporary Art
- ARTH3356 Art Since 1945

All Majors and Minors are required to take

- ARTS1103 Issues and Approaches to Studio Art

Electives

- Elective 1 (2000 or 3000 level)
- Elective 2 (2000 or 3000 level)
- Elective 3 (2000 or 3000 level)
- Elective 4 (3000 or 4000 level) (not including Senior Project)
- Elective 5 (3000 or 4000 level) (not including Senior Project)

Senior Project

Senior Project is a required year-long course for senior majors taught on Wednesday afternoons.

- ARTS4498 Senior Project I
- ARTS4473 Senior Project II

In addition to the required courses, the following courses are recommended:

- ARTH1101 Intro to Art History: Prehistory to Middle Ages
- ARTH1102 Intro to Art History: Renaissance to Modern
- ARTH2257 Nineteenth-Century Art
- ARTH2258 Modern Art: Nineteenth-Twentieth Century II
- Summer course for enrichment

Additional Stipulations for the Studio Art Major

- No more than two independent studies in the field of concentration.
- No more than two courses taken during the junior year abroad or at another institution may count toward the major. Transfer students should work out credits with the department major advisor.
- Courses to be counted in the major must be taken for a grade (no pass/fail grades).
- For inquiries about exceptions to these stipulations, please contact the Studio Art Major Coordinator, Prof. Mark Cooper (mark.cooper@bc.edu).

Art History Minor

The Art History minor requires six courses (18 credits):

- ARTH1101 Intro to Art History I: Prehistory to Middle Ages
- ARTH1102 Intro to Art History II: Renaissance to Modern
- One of the following three courses: ARTH2212 East Asian Art and Architecture, ARTH2213 Islamic Art and Architecture, ARTH2250 Introduction to African Art and Visual Culture
- Elective 1
- Elective 2
- Elective 3

At least two of these electives must be at or above the 3000 level, and at least two must come from one of the following categories:

- Ancient/Medieval
- Renaissance/Baroque
- Nineteenth/Twentieth Century
- Asian
- African
- Islamic
- Museum Studies

The Art History minor also requires a copy of a research paper written in one of the Art History elective courses. To satisfy the requirement, the paper must have received a grade of B or above. Please submit the paper to Professor Aurelia Campbell.

Courses counted for the minor must be taken for a grade, not pass/fail. At least 15 credits (five courses) in the minor program must not be used to fulfill any other major or minor.

Film Studies Minor

The Film Studies minor enables students to develop a basic awareness of film as a contemporary medium of communication.

Requirements include FILM2202 Introduction to Film Art, then one production course, and one course in history or criticism. A selection of three additional courses as electives from the offerings of the Film Studies Program allows the student to pursue individual interests and develop a level of competence in one particular area, such as filmmaking, digital editing, scriptwriting, photography, history of film, or film criticism.

Students interested in the Film Studies minor may contact the Director, Professor John Michalczyk, Film Studies minor Coordinator, Devlin Hall 420, 617-552-3895, john.michalczyk@bc.edu.

Studio Art Minor

The minor in studio art offers students the opportunity to pursue a course of study in ceramics, creative thinking, design, drawing, mixed media, painting, photography, or sculpture. There are features of the minor program that resemble, in an abbreviated way, aspects of our major studio program that we have found to be successful. The required Senior Minor Project class, for example, will function analogously to our major's Senior Project. Students can focus on one medium, choosing from ceramics, design, drawing, painting, photography, or sculpture. Mixed media allows for an exploration in multiple media combined. The creative thinking minor is for those majoring in other disciplines interested in expanding their skill set as creative and critical thinkers through experiential learning. Instead of concentrating in one medium, the mixed media and creative thinking minors involve taking a range of courses. The course structure of the minor aims at having the individual student develop the artistic techniques, critical thinking and creative skills, and conceptual visual sensibility necessary for working as an artist today. Students are encouraged to declare the Studio Art minor before their senior year. Students who are interested in declaring the minor should contact [Prof. Hartmut Austen](#).

The Studio Art minor requires six courses (18 credits):

- ARTS1103 Issues and Approaches to Studio Art

ONE of the following introductory courses:

- ARTS1101 Drawing I
- ARTS1102 Painting I
- ARTS1104 Design: Seeing is Believing
- ARTS1107 Design 1: Foundations
- ARTS1141 Ceramics I
- ARTS1150 Painting Plus Collage
- ARTS1155 Introduction to Digital Arts
- ARTS1161 Photography I
- ARTS1163 Intro to Digital Photography
- ARTS1138 Introduction to 3D: Sculpture

Electives and Senior Project:

- Elective 1 (1000 or 2000 level)
- Elective 2 (2000 or 3000 level)
- Elective 3 (3000 or 4000 level)
- ARTS3328 Senior Minor Project

The three electives should be concentrated in one of the following areas:

- ceramics
- design
- digital art
- drawing
- painting
- photography
- sculpture
- mixed media (electives in different media)
- creative thinking (electives in different media)

Additional stipulations for the minor:

- Students are allowed only one independent study in their field of concentration
- Courses to be counted for the minor must be taken for a grade (not pass/fail)
- Students who wish to strengthen their minor are strongly encouraged to take additional offerings in their field of concentration

Students who are interested in declaring a minor can contact Professor Mark Cooper, Director of Undergraduate Studies, Connolly House Carriage House, mark.cooper@bc.edu.

Information for First-Year Majors

First-Year Art History majors should take ARTH1101 Art from Prehistoric Times to the High Middle Ages with ARTH1103 Art History Workshop. First-Year Studio Art majors are advised to select two studio courses from ARTS1101, ARTS1102, ARTS1104, ARTS1107, ARTS1150, ARTS1155, or ARTS1161 before taking ARTS1103. First-Year Film Studies majors should take FILM2202 Introduction to Film, a required foundation course to ground the student in film language, history, and criticism.

Information for Study Abroad

The Boston College Art, Art History, and Film Department offers study abroad options for Art History, Film Studies, and Studio Art majors.

The Art, Art History, and Film Department believes strongly that study abroad is worthwhile, exposing students to not only other cultures but other forms and traditions of artistic expression. At the same time, it cautions students to consider their growth and development in their specific major and to integrate study abroad with their chosen area of concentration in consultation with their department advisor.

For further information, contact:

- Director of Undergraduate Studies for Studio Art, Prof. Mark Cooper, Director of Undergraduate Studies for Art History, Prof. Aurelia Campbell, aurelia.campbell@bc.edu
- Director of Undergraduate Studies for Film, Prof. John Michalczyk, john.michalczyk.1@bc.edu

Biochemistry

This interdisciplinary major in Biochemistry, administered jointly by the Chemistry and Biology Departments, provides the student with a broad background in biochemistry and related courses in chemistry and biology. This major is intended for those interested in the more chemical and molecular aspects of the life sciences.

[Biochemistry Website](#)

Degree Requirements for B.S. in Biochemistry

- BIOL2000 Molecules and Cells (3 credits)
- BIOL2010 Ecology and Evolution OR BIOL3030 Introduction to Physiology (3 credits)
- BIOL2040 Investigations in Molecular Cell Biology (3 credits)
- One course in cell biology from the following list (3 credits):
 - BIOL3040 Cell Biology
 - BIOL3210 Plant Biology
 - BIOL3090 or BIOL4140 Microbiology
- One course in genetics or genomics from the following list (3 or 4 credits):
 - BIOL3150 Introduction to Genomics
 - BIOL3050 Genetics
- CHEM1109 General Chemistry I and CHEM1111 Laboratory (or CHEM1117 and CHEM1119) (4 credits)
- CHEM1110 General Chemistry II and CHEM1112 Laboratory (or CHEM1118 and CHEM1120) (4 credits)
- CHEM2231 Organic Chemistry I and CHEM2233 Laboratory (or CHEM2241 and CHEM2243) (4 credits)
- CHEM2232 Organic Chemistry II and CHEM2234 Laboratory (or CHEM2242 and CHEM2234) (4 credits)
- CHEM3351 Analytical Chemistry and CHEM3353 Laboratory (4 credits)
- CHEM4473 Physical Chemistry for Biochemistry majors (3 credits) CHEM4461–4462 Biochemistry I and II; **or** BIOL4350 Biological Chemistry and BIOL4400 Molecular Biology (6 credits)
- PHYS2100 Physics I (calculus) and PHYS2050 Laboratory (5 credits)
- PHYS2101 Physics II (calculus) and PHYS2051 Laboratory (5 credits)
- MATH1101 (or MATH1103, or MATH1105) Calculus II (3–4 credits); or MT2202 Multivariable Calculus (4 credits)
- Two advanced electives (5 credits min.)* *see current major checklist for available options*

Total Credits: 64–65

Note: The Biochemistry major requires all of its majors to take a Boston College calculus course, regardless of AP score. Students can take Calculus 2 (MATH1101, MATH1103, or MATH1105), or Multivariable Calculus (MATH2202).

*With Biology or Chemistry Department approval, no more than one advanced elective may be substituted by two semesters of Undergraduate Research.

Advanced Placement: Biochemistry majors who have a 5 on the Biology AP exam in their senior year may choose to bypass the 2000-level lecture courses (BIOL2000 and BIOL2010). These students will begin the major with BIOL3040 Cell Biology and take 6 credits of additional biology courses, level 3000 or above.

Recommended Course Sequencing for Biochemistry Majors

Freshman Year

- General Chemistry and Labs
- BIOL2000 and either BIOL2010 or BIOL3040
- BIOL2040 lab (if possible)
- MATH1101, MATH1103, MATH1105 or MATH2202

Sophomore Year

- Organic Chemistry and Labs
- One course from the cell biology list
- One course from the genetics/genomics list
- BIOL2040 lab

Junior Year

- Biochemistry sequence
- Physics Sequence

Senior Year

- Analytical Chemistry and lab
- Physical Chemistry
- Two advanced electives

Note:

- Calculus is typically completed by the end of the sophomore year.
- Physics can be taken at any time beginning with the sophomore year.
- Students are encouraged to participate in Undergraduate Research, typically beginning in the sophomore year. Students should speak to their academic advisors and individual professors to learn how to gain research opportunities.

Approvals for Biochemistry Major Courses Taken Abroad; Boston College Summer Courses

With **prior Department approval**, students may apply **one** course taken abroad to their biochemistry elective requirement. To be considered as a possible substitute for a Biochemistry major elective, a course must be a second level course with published prerequisites and not be an introductory level course or a course intended for professional study (or for non-biochemistry majors).

Note: Biochemistry major required courses offered through the Boston College Summer School will be applied to the Biochemistry major as regular academic-year electives with the same catalog number.

Biology

The Biology Department considers a basic understanding of biological systems to be an essential skill in our increasingly technological society and offers a range of courses for both biology majors and non-majors. Courses are designed to promote scientific literacy and a sophisticated understanding of complex biological systems. Our courses introduce students to life at various levels of organization, with topics ranging from the molecular basis of cellular function, to the coordination of organ systems in the physiology of organisms, to the interactions of organisms with each other and the environment. The importance of research and experimentation in biology is stressed throughout the curriculum, which includes both lab courses and research experiences.

The Biology Department offers the following degrees:

Bachelor of Science (B.S.) in Biology is a structured program for biology majors who are interested in pursuing those aspects of the field that require a strong background knowledge in physics, chemistry, and mathematics and for students who want to fulfill premedical/pre dental requirements.

Bachelor of Arts (B.A.) in Biology is a flexible program that can prepare students for graduate school in the life sciences or can be integrated with other areas, including law, ethics, history, sociology, computer science, and management. The B.A. provides a solid foundation in biology but allows more flexibility in course selection by removing some of the chemistry and quantitative requirements that characterize the B.S. program. Thus, students in the B.A. program can either add more depth and focus around a sub-discipline or have more breadth, either within the biology curriculum or by taking advantage of the B.A. elective options. Students should note that, unlike the B.S. program, the B.A. program does not fulfill medical school admission requirements.

The Biology Department offers a **minor in Biology**, a **concentration in Bioinformatics**, and also co-sponsors a **Bachelor of Science (B.S.) in Biochemistry** together with the Chemistry Department. The Biochemistry degree is described separately in this Catalog. Requirements for the Biology minor and bioinformatics concentration can be found on the Biology Department website.

[Biology Courses](#)

[Biology Faculty](#)

[Biology Website](#)

Bachelor of Science (B.S.) and Bachelor of Arts (B.A.) Program Requirements

- BIOL2000 Molecules and Cells
- BIOL2010 Ecology and Evolution
- BIOL2040 Investigations in Molecular Cell Biology
- One course from Category A: Genetics and Genomics
 - BIOL3050 Genetics
 - BIOL3060 Introduction to Genetics (*summer only*)
 - BIOL3150 Introduction to Genomics
- One course from Category B: Physiology and Organismal Biology
 - BIOL3030 Introduction to Physiology
 - BIOL4110 Ornithology
 - BIOL4320 Developmental Biology
 - BIOL4330 Human Physiology with Lab
 - BIOL4450 Behavioral Ecology
 - BIOL4540 Neuroscience
- One course from the Advanced Experience list—a minimum of 2 credits
- For the B.S.: Additional electives numbered 3000 and above to reach a minimum of **30 Biology credits** for ALL Biology courses. Students can choose from any of the Biology elective courses or choose specific courses to complete one of the four concentrations in:
 - Microbiology

- Cell Biology and Development
- Genetics and Genomics
- Physiology and Organismal Biology
- A complete listing of Biology courses is available on the departmental website.
- For the B.A.: Additional electives numbered 3000 and above to reach a minimum of **33 credits for ALL Biology courses**. (9 credits can be from the B.A. elective list available on the departmental website or pre-approval from the department).

Advanced Experience courses include undergraduate research, research lab courses, and smaller classes involving the primary literature and data analysis. Courses fulfilling this requirement are available on the Biology Department website. Note: While independent undergraduate research courses can be taken over several semesters for credit, only 3 of these credits can be applied toward the 30 required credits for the Biology major (B.A. or B.S.). Students using undergraduate research to fulfill the Advanced Experience requirement and/or to have the 3 credits applied to the Biology major must complete at least two semesters.

Students wishing to focus their studies on biology subdisciplines, can choose biology electives from the following concentrations: Microbiology, Cell Biology and Development, Genetics and Genomics, and Physiology/Organismal Biology. A list of elective courses and directions for completing a concentration are found on the departmental website.

Corequisite Courses for the Bachelor of Science (B.S.) Program

Chemistry (15–16 credits)

- General Chemistry I and II with Labs (CHEM1109–1110, CHEM1111–1112)
- Organic Chemistry I with Lab (CHEM2231–2232)
- Organic Chemistry II with Lab (CHEM2233–2234) **or** Biological Chemistry (BIOL4350)

Quantitative Requirements: Mathematics, Physics, and Computer Science

- Calculus I (MATH1100)
- Three additional courses from the following list:
 - PHYS2100 Physics I (calculus) with Lab
 - PHYS2101 Physics II (calculus) with Lab
 - BIOL2300 Biostatistics (or EC1151 or MATH3353)
 - BIOL3140 Experimental Methods in Organismal Biology
 - BIOL4250 Population Genetics*
 - CSCI1101 Computer Science I
 - CSCI1102 Computer Science II
 - CSCI2291 Topics: Data Science
 - CSCI2257 Database Systems and Application
 - MATH1101 Calculus II
 - Mathematics courses numbered 2000 or higher

Additional options are noted on the [Biology Department](#) website.

*BIOL3140 and BIOL4350 cannot be used to satisfy both a corequisite and a biology elective.

Calculus Placement

- Calculus I requirement is satisfied by completing MATH1100 or with an AP score of 4 or 5 on the AB exam or a score of 3 on the BC exam
- Calculus I and II can be satisfied by completing MATH1101 or with an AP score of 4 or 5 on the BC exam

Corequisite Courses for the Bachelor of Arts (B.A.) Program (8–12 Credits)

- General Chemistry I and II with Labs (CHEM1109–1110, CHEM1111–1112)
- Calculus I (MATH1100)

Advanced Placement Programs for the B.A. and B.S. Degrees

Students who received a score of 5 on the AP exam and wish to consider advanced placement may enroll in a 3000 level BIOL course in place of BIOL2000. Freshmen should enroll in BIOL2010 first semester (there is no AP substitution for BIOL2010), and take a 3000 level course in the second semester, if they wish to continue with the AP substitution for BIOL2000. The AP substitution does not reduce the total number of credits for the major; students will still need a total of 30 credits in biology courses.

Information for First Year Students: Biology Majors and Others Considering a Major in Biology

Biology majors in the regular B.A. and B.S. programs are advised to enroll in BIOL2000 Molecules and Cells and BIOL2010 Ecology and Evolution their freshman year. Freshmen are also advised to enroll in CHEM1109/CHEM1110 General Chemistry (with corequisite Labs) and Calculus I or II, depending on their AP scores. First-term AP students should enroll in BIOL2010 Ecology and Evolution. Second term, students using the AP option will enroll directly in a 3000 level course, or they can continue with the regular program by enrolling in BIOL2000 Molecules and Cells.

Information for Study Abroad and Summer Programs

With Department approval, students may apply ONE course taken either abroad or during an off-campus summer session to their biology elective requirements. To be considered as a possible substitute for a biology elective, a course must be a second level course with published biology prerequisites and not be an introductory level course or a course intended for professional study or for non-biology majors. As an exception, students studying abroad for two full academic semesters may apply two courses taken abroad to the biology elective requirement.

This policy does not apply to Biology Department major elective courses offered through the Boston College Summer School; such courses are applied to the Biology major as regular academic-year electives.

Research Opportunities for Undergraduates

Research is a fundamental aspect of undergraduate training in the sciences, and the Biology Department actively encourages interested majors to take advantage of the undergraduate research programs that are available. There are two distinct options for engaging in research activity.

Option 1: Students do research in the laboratory of a Biology Department faculty member or at an off-site laboratory with departmental approval. Undergraduate research can be taken for course credit over multiple semesters. Two semesters must be completed to fulfill a Biology elective requirement. Only 3 credits of the undergraduate research are applied to the Biology major; all credits are applied to the 120 credits for graduation

Option 2: The Department offers a number of research lab courses where students build technical skills in the context of an ongoing research project. These one-semester courses are taught by Biology faculty and focus on their current area of research. Students have full access to dedicated lab space throughout the semester and present their data at the departmental Undergraduate Research Day.

Biology Senior Thesis

Students doing undergraduate research may elect to write a Senior Thesis with the approval and support of their faculty research adviser. Students writing a thesis are recognized at Undergraduate Research Day. The student producing the “Best Senior Thesis,” as judged by a faculty committee, is awarded the Balkema Prize.

Information for Non-majors

Non-majors may fulfill their Natural Science Core requirements through the introductory major courses (BIOL2000 or BIOL2010) or one of several university Core courses offered for non-majors by the Department. Information about preparation for the allied health professions is available online at bc.edu/premed.

Chemistry

The Chemistry Department offers a comprehensive curriculum to students in the Morrissey College of Arts and Sciences who wish to acquire a knowledge of chemistry. The Chemistry Department is approved by the American Chemical Society (ACS) Committee on Professional Training. By electing to supplement the degree requirements for the chemistry major with a year of independent research under the direction of a faculty member, the student qualifies for degree certification by the ACS.

[Chemistry Courses](#)

[Chemistry Faculty](#)

[Chemistry Website](#)

Major Requirements

The major in chemistry consists of ten 1-semester courses as follows: two semesters of general chemistry lecture and laboratory (CHEM1109–1110 and CHEM1111–1112 or CHEM1117–1118 and CHEM1119–1120), two semesters of organic chemistry lecture and laboratory (CHEM2231–2232 and CHEM2233–2234 or CHEM2241–2242 and CHEM2243 and CHEM2234), one semester of analytical chemistry lecture with laboratory (CHEM3351), one semester of inorganic chemistry lecture and laboratory (CHEM3322 and CHEM3324), two semesters of physical chemistry lecture (CHEM4475–4476), one semester of advanced methods lecture with laboratory (CHEM5552), and one semester of biochemistry lecture (CHEM4465). In addition, the following are required: two semesters of physics lecture and laboratory (PHYS2200–2201 or PHYS2100–2101 and PHYS2050–2051) and three semesters of calculus (MATH1102–1103, and MATH2202). The preceding fulfills the Boston College requirements for a B.S. degree in chemistry. For this degree to be certified by the American Chemical Society, two additional chemistry laboratory electives are required, usually CHEM4491–4492 Introduction to Undergraduate Research I and II or CHEM5591–5592 Undergraduate Chemical Research I and II. The recommended sequence for the Chemistry major is as follows:

First Year

CHEM1109–1110 General Chemistry with Laboratory or CHEM1117–1118 Honors Modern Chemistry with Laboratory; two semesters of Physics with Laboratory (PHYS2200–2201 or PHYS2100–2101 with PHYS2050–2051); Calculus (MATH1102–1103); Core courses.

Second Year

CHEM2231–2232 Organic Chemistry or CHEM2241–2242 Honors Organic Chemistry with Laboratory; CHEM3351 Analytical Chemistry with Laboratory; CHEM3322 Introduction to Inorganic Chemistry with Laboratory; MATH2202 Multivariable Calculus; elective or Core courses.

Third Year

CHEM4475–4476 Physical Chemistry; CHEM5552 Advanced Methods in Chemistry I; elective or Core courses.

Fourth Year

CHEM4465 Introduction to Biochemistry; elective or Core courses.

The ten 1-semester chemistry courses that comprise the chemistry major amount to 37 credits. The five non-chemistry courses amount to 22 credits.

Information for First-Year Majors

Students who intend to be Chemistry or Biochemistry majors must enroll in CHEM1109 General Chemistry and CHEM1111 General Chemistry Laboratory, or CHEM1117 Honors Modern Chemistry and CHEM1119 Honors Modern Chemistry Laboratory. The choice of chemistry or biochemistry as a major requires that certain courses in other disciplines be taken as soon as possible.

Minor Requirements

The minor in chemistry consists of six courses. Two semesters of general chemistry (CHEM1109–1110 or CHEM1117–1118, with associated laboratories) are required as the introductory courses for the minor. Four additional chemistry courses are chosen in consultation with a faculty advisor and approved by the Director of the departmental minor, Professor Lynne O'Connell (Merkert 111, 617-552-3626). Normally, two of the four additional courses would be Organic Chemistry I and II, but other selections might be better choices, depending on the student's objective in attaining the minor. In accordance with MCAS policy, a student must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor.

The following 1000-level courses cannot be used to complete the minor: CHEM1105, CHEM1106, CHEM1115, or CHEM1161. The following research courses cannot be used to complete the minor: CHEM4491–4492 or CHEM5591–5592.

Information for Study Abroad

Before going abroad, Chemistry majors must have completed the following prerequisites: General Chemistry, CHEM1109–1110 or CHEM1117–1118 and lab; Organic Chemistry, CHEM2231–2232 or CHEM2241–2242 and lab; Analytical Chemistry, CHEM3351 and lab; Inorganic Chemistry, CHEM3322 and lab; Calculus, MATH1102–1103 and MATH2202 or 2203; Physics, PHYS2200–2201 or PHYS2100–2101 and lab. Exceptions must be approved by the department.

In order for a course studied abroad to count for major credit, prior department approval is required for each course. Students must meet with the department study abroad advisor for course approval, advisement, and planning.

Fulfilling the Natural Science Core Requirement

The requirement of two courses in natural science may be fulfilled by any of the following courses: CHEM1105 Chemistry and Society I, CHEM1106 Chemistry and Society II, CHEM1109 General Chemistry I with lab, CHEM1110 General Chemistry II with lab or CHEM1115 Fundamentals of Chemistry. The courses specifically intended for students who are not science majors are CHEM1105 and CHEM1106. CHEM1115 will satisfy a core requirement but is specifically intended to prepare students for General Chemistry.

Biochemistry Major

Refer to the Biochemistry section for a description of this interdisciplinary major.

Classical Studies

Classical Studies encompasses all the social, material, and intellectual culture of the ancient Greek and Roman worlds, as they can be studied both in the original languages and in English.

The department offers courses under three headings, including (1) elementary and intermediate courses in Latin and Greek, designed to teach a student to read the languages; (2) courses in Greek and Roman literature, history, art and archaeology, society, and culture, including Core (Literature, History I, and Fine Arts) courses, taught in English and designed to acquaint a student broadly with the world of classical antiquity; (3) advanced reading courses in ancient authors and genres taught in the original languages and advanced cultures courses in English. Courses related to antiquity are also available in other departments.

[Classical Studies Courses](#)

[Classical Studies Faculty](#)

[Classical Studies Website](#)

Major Requirements

The major includes courses in Latin and/or Greek language and literature, from the elementary to the advanced level, and courses in ancient civilization and culture. Readings in the latter courses are in English. There are two tracks within the major: Classical Language and Classical Cultures. The former emphasizes the study of the ancient world through Latin and Greek while the latter foregrounds the interdisciplinarity of Classical Studies, drawing on the study of ancient literature, art, performance, science, and more. The program is designed to be flexible in response to the interests and prior experience of individual students. Requirements, totaling a minimum of ten courses (or 30 credits), fall under three headings:

- Two courses or 6 credits (minimum) from the following foundational courses: Classical Mythology, Greek Civilization, Greek History, Roman History, and City of Rome.
- Three courses or 9 credits (minimum) of advanced courses. For the Language track, these are courses in Latin and/or Greek at the 3000 level. For the Cultures track, these are courses in English at the 4000 level.
- Five courses or 15 credits (minimum) consisting of any course the department offers or any of the approved electives from other departments.
- All seniors must participate in the Senior Colloquium

Notes

- Students who may think of going on in Classics are strongly advised to study both languages and to take as many advanced courses as possible. They should also discuss their interest with a faculty member at the earliest opportunity.

The Minor in Ancient Civilization

The interdisciplinary minor in Ancient Civilization is designed to make the study of the ancient world available to students without the requirement of learning Latin or Greek. Students learn about the history, literature, art, and culture of antiquity in courses that emphasize the study of primary texts in English translation. As a minor, it naturally looks to students whose main interests lie in other areas, but who are curious about the ancient world and who seek a program that is at once structured and interdisciplinary. It makes a good complement in particular to majors in English, History, Art, Art History, and Film, Philosophy, and Theology but is available to everyone regardless of major. A list of the courses that are available each semester from the various departments and that count for the minor will be available at registration time. A program consists of six courses under three headings:

- One course in Greek History (CLAS2205) or Greek Civilization (CLAS1186). As a rule, one or the other of these courses will be taught each year.
- One course in Roman History (CLAS2206) or Roman Civilization (CLAS2262). Again, as a rule, one or the other of these courses will be taught each year.

- Four electives taught in Classics and other departments, chosen from various offerings in ancient culture, for instance, in the areas of literature, philosophy, religion, history, art, and archaeology.

Latin Minor

The Latin minor consists of six courses/18 credits:

- Four courses (12 credits) in Latin above the elementary level
- One of the following courses on Roman culture: City of Rome (CLAS2262) or Roman History (CLAS2206)
- One elective: either Latin (intermediate or above) or a course on Roman civilization

Courses for the Latin Minor

I. Four courses (12 credits) in Latin above the elementary level

- CLAS1056 Intermediate Latin I
- CLAS1057 Intermediate Latin II
- CLAS1058 Advanced Intermediate Latin
- CLAS3312 Roman Love Elegy
- CLAS3320 Roman Civil War Literature
- CLAS3325 Lucretius
- CLAS3329 Ovid, Metamorphoses
- CLAS3333 Apuleius
- CLAS3334 Senecan Tragedy
- CLAS3335 Ovid
- CLAS3336 Horace
- CLAS3337 Lucan
- CLAS3340 Latin Pastoral Poetry
- CLAS3342 Livy
- CLAS3338 Cicero and Sallust: Catiline
- CLAS3350 Catullus
- CLAS3356 Tacitus
- CLAS3358 Petronius
- CLAS3360 Martial and Juvenal
- CLAS3370 Roman Comedy
- CLAS3375 Vergil

II. One course on Roman culture: City of Rome (CLAS2262) or Roman History (CLAS2206)

III. One elective: either Latin (intermediate or above) or a course on Roman civilization

- Any of the Latin courses above
- Electives:
 - CLAS1702 Rome: Art, Regime, and Resistance
 - CLAS1706 The Self and its Limits: Greco-Roman Slavery
 - CLAS2210/HIST2207 Roman Spectacles
 - CLAS2206/HIST2205 Roman History
 - CLAS2225/HIST2225, Ancient Medicine
 - CLAS2230/ENGL2200 Classical Mythology
 - CLAS2236/HIST2206 Roman Law and Family
 - CLAS2240/ENGL2204 Dangerous Women in Classical Literature
 - CLAS2242/THEO2241/HIST4211 Roman Religion
 - CLAS2250/HIST2837 Multiculturalism in the Roman Empire
 - CLAS2262/ARTH2262 City of Rome

- CLAS2270 Gender and Sexuality in Ancient Rome
- CLAS2285/THTR2286 The Chorus, Ancient and Modern
- CLAS2286/LING3205 History and Structure of Latin
- CLAS2294/HIST2203 Greco-Roman Egypt
- CLAS2295/ENGL2295 Ancient Comedy
- CLAS2384/LING 2384/THEO2384 Church Latin
- CLAS/HIST Everyday Aphrodite: Classics and the History of Sexuality
- CLAS42280/ENGL2202 Beast Literature
- THEO5448 Patristics: Latin and English

Ancient Greek Minor

The ancient Greek minor consists of six courses/18 credits:

- Four courses (12 credits) in ancient Greek above the Elementary level
- One of the following courses on Greek culture: Greek Civilization (CLAS1186) or Greek History (CLAS2205)
- One elective: Either ancient Greek (intermediate or above) or a course on Greek civilization

Courses for the Ancient Greek Minor

I. Four courses (12 credits) in ancient Greek above the Elementary level

- CLAS1052 Intermediate Greek I
- CLAS1053 Intermediate Greek II
- CLAS3301 Greek Tragedy
- CLAS3302 Greek Rhetoric
- CLAS3315 Homer
- CLAS3330 Aphrodite
- CLAS3331 Sophocles and Aristophanes
- CLAS3345 Sophocles
- CLAS3373 Euripides
- CLAS3382 Herodotus
- CLAS3387 Thucydides
- CLAS3388 Sophocles Philoktetes
- THEO7803 Graeca

II. One course on Greek culture: Greek Civilization (CLAS1186) or Greek History (CLAS2205)

III. One elective: either Greek (intermediate or above) or a course on Greek civilization

- Any of the ancient Greek courses above
- CLAS1186 Greek Civilization
- CLAS1701 Death in Ancient Greece, Achilles to Alexander
- CLAS1706 The Self and its Limits: Greco-Roman Slavery
- CLAS2205/HIST2201 Greek History
- CLAS2207/HIST2202 Greeks and Barbarians
- CLAS2208/ARTH2206 Art and Myth in Ancient Greece
- CLAS2216/ARTH2216 Art and Archaeology of Homer and Troy
- CLAS2225/HIST2225 Ancient Medicine
- CLAS2230/ENGL2200 Classical Mythology
- CLAS2240/ENGL2204 Dangerous Women in Classical Literature
- CLAS2285/THTR2286 The Chorus, Ancient and Modern
- CLAS4203/HIST4203 Everyday Aphrodite: Classics and the History of Sexuality
- CLAS4252 Sex/Power/Gods: Ancient Wisdom Literature

- CLAS2254/HIST4202 Culture of Athenian Democracy
- CLAS2280/ENGL2202 Beast Literature
- CLAS4212/HIST4212 Ancient Sicily
- CLAS2285/THTR2286 The Chorus, Ancient and Modern
- CLAS2294/HIST2203 Greco-Roman Egypt
- CLAS2295/ENGL2295 Ancient Comedy
- ARTH3311 Greek Art and Archaeology
- PHIL3332 Political Thought of the Greeks
- PHIL4405 Greek Philosophy
- PHIL5505 The Aristotelian Ethics
- PHIL5528 Skepticism/Stoicism/Neoplatonism
- THEO5425 Patristic Seminar: Intermediate Greek and English

Information for First-Year Majors and Non-majors

“Classics” as outlined above is a broad, interdisciplinary field of study. For a first-year student, courses of two types are likely to be of most immediate interest: (1) Core Literature, History, and Fine Arts courses, in which the reading is entirely in English, and (2) elementary and intermediate language courses in Latin and Greek.

If you would like to begin a language now or have had only one or two years of a language in high school, you should choose an elementary course: CLAS1010 Elementary Latin I or CLAS1020 Elementary Greek I. If you have studied a language for three or four years in high school, you may want to choose an intermediate course: CLAS1056 Intermediate Latin I or CLAS1052 Intermediate Ancient Greek I.

Completion of the second semester of Latin or Greek at the intermediate level will fulfill the Morrissey College of Arts and Sciences and Carroll School of Management language proficiency requirement (beginning with the class of 2022, the Carroll School will no longer have a language requirement). In addition, the Department offers elective courses in ancient civilization and on Greek and Roman authors. Those in ancient civilization are taught entirely in English. They make excellent choices for freshmen interested in antiquity. Those on Greek and Roman authors require a background in the appropriate language. If you have studied Latin or Greek for four or more years in high school, you may wish to try courses in Greek and Roman authors. For further information, consult the Chair of the Department.

Information for Study Abroad

The Classics Department does not have a general set of requirements for study abroad. Students are advised individually, and recommendations are made based on their academic records and the specific program. Students should arrange to meet with the Chair of the Department when planning to study abroad.

Core Offerings

The Department offers several courses that satisfy Core requirements. CLAS2206 Roman History will be offered in fall 2024. CLAS2205 Greek History and CLAS2208 Art and Myth in Ancient Greece will be offered in spring 2025. CLAS1706 The Self and its Limits: Greco-Roman Slavery, an Enduring Question Core course, and CLAS2207 Greeks and Barbarians, a cultural diversity course, will be offered in fall 2024.

Licensure for Teachers

The Undergraduate Initial License as Teacher of Latin and Classical Humanities 5–12 may be gained by pursuing a Classics major in addition to the Secondary Education major or minor. For further information, contact the Chair of the Department.

Communication

The Boston College Department of Communication is committed to the intellectual and ethical development of analytical and creative communication skills in our students, with particular emphasis on the effective functioning of circuits of communication, the impact of technological innovation on human beings and institutions, and the power relationships that develop through this interaction.

This program of study has led graduating majors to careers in communication industries and to success in fields related to communication including business, government/politics, international relations and negotiations, social and human services, health, and education. Many majors have completed graduate programs in fields including communication, business, and law.

33 credits are required for the major.

[Communication Courses](#)

[Communication Faculty](#)

[Communication Website](#)

Major Requirements

Four Common Requirements (12 credits):

- COMM1010 Rhetorical Tradition
- COMM1020 Survey of Mass Communication
- COMM1030 Public Speaking
- COMM3330 Communication Methods: Social Science **or** COMM3340 Communication Methods: Cultural (take one)

One Theory Course (3 credits):

- Any course numbered between COMM3360 and COMM3380
- Theory courses should, ideally, not be taken until after a student has completed Rhetorical Tradition, Survey of Mass Communication, Public Speaking, and the Communication Methods course.

Two Writing Intensive Seminars (6 credits):

- Any two courses numbered between COMM4425 and COMM4499, not including COMM4485
- These are upper-level courses and should not be taken until after a student has completed the four common requirements. Freshmen and sophomores should never register for writing-intensive seminars.

Four Electives (12 credits):

- Electives may be chosen from any 3-credit class offered by the department.
- A maximum of 6 transfer credits will be accepted by the department toward elective credits.
- One class of 3 credits or more from the Woods College may be counted toward an elective, with permission from the Director of Undergraduate Studies.
- Internship Practicum, COMM5589, a 3-credit elective, may be conducted only once during either junior or senior year and used toward elective requirements.

1-credit internships and courses may not be combined to total a 3-credit course.

Information for First-Year Majors

Students may declare the Communication major by contacting Kristin Hartnett, Academic Advisor at kristin.hartnett@bc.edu.

The common requirements: Rhetorical Tradition, Survey of Mass Communication, Public Speaking, and Communication Methods are strongly recommended as prerequisites for all other Communication classes. Majors are encouraged not to register for theory, writing intensive, or electives until those courses are completed.

Information for Study Abroad

Students applying for Study Abroad must meet all the application requirements set forth by BC's Office of Global Education (OGE). This includes meeting and/or discussing potential study abroad plans with a student's academic advisor prior to submitting the application to OIP. Before traveling abroad in the fall or spring of Junior year, students in the Communication major must complete at least three of the four foundational courses in the major: Rhetorical Tradition, Survey of Mass Communication, Public Speaking, and Communication Research Methods.

A student may transfer up to two courses in Communication as **electives** from the Study Abroad placement, which counts toward the 4 elective courses required for the major. These courses must be submitted for approval via the online Study Abroad Course Evaluation form, available on the Office of Student Services website at the [Academic Forms](#) page. Students must provide the title of the course, the course description, and the syllabus in order to expedite approval. For more information about Communication Department Study Abroad policies, please contact the Director of Undergraduate Studies, Associate Professor of the Practice [Lindsay Hogan](#).

Internship Program

COMM5589 Internship Practicum, a 3-credit elective course, is open to junior and senior Communication majors. In addition, potential interns must have completed a minimum of five courses in communication including COMM1010 Rhetorical Tradition, COMM1020 Survey of Mass Communication, COMM1030 Public Speaking, and one of COMM3330 Communication Methods: Social Science or COMM3340 Communication Methods: Critical/Cultural.

For internship applications, please visit our department website. For departmental approval, contact Christine Caswell, Director, Internships and Career Opportunities, St. Mary's Hall South Room S375, 617-552-6148, christine.caswell@bc.edu.

Honors Program

The honors program in the Department of Communication is targeted towards exceptional communication majors, defined as those whose overall GPA is 3.70 or higher. To be invited to join the honors program, students must have an overall GPA of 3.70 or higher at the conclusion of their freshman year (summer courses will be counted if taken for BC graded credit). Students will be invited to the program in the fall semester of their sophomore year prior to spring registration. The honors program requires enrollment in an honors methods course in sophomore spring and an honors writing course in their junior year. In addition, students in the honors program will complete a thesis in order to officially graduate with department honors. A more complete description of the program is available on the department website or in the Honors Handbook in the department's main office. Students may also contact Professor of the Practice Celeste Wells, Director of the Communication Department Honors Program. St. Mary's Hall South, Room S479, 617-552-1194, celeste.wells@bc.edu.

Contacts

Questions about the Communication curriculum, course substitution forms, and transfer credits should be directed to Associate Professor of the Practice Lindsay Hogan, Director of Undergraduate Studies, St. Mary's Hall South, Room S453, 617-552-4054, lindsay.hogan.2@bc.edu.

To declare the major and discuss the general course of study, please e-mail Kristin Hartnett, Academic Advisor, kristin.hartnett@bc.edu.

Communication Department Chairperson: Associate Professor Matt Sienkiewicz, matt.sienkiewicz@bc.edu 617-552-8837 St. Mary's Hall South Room S450.

Computer Science

The Computer Science Department offers major programs in the Morrissey College of Arts and Sciences leading to the degrees of Bachelor of Arts and Bachelor of Science as well as a minor and a Concentration in Bioinformatics. The department also offers a Data Science Minor. For further information, contact the Computer Science Department at 245 Beacon Street, Third Floor Suite 324, 617-552-3975.

[Computer Science Courses](#)

[Computer Science Faculty](#)

[Computer Science Website](#)

Bachelor of Arts in Computer Science

The curriculum for the Bachelor of Arts degree in Computer Science is based on current recommendations of the Association for Computing Machinery (ACM) for liberal arts institutions. The program is designed both to provide a solid foundation in the fundamentals of computer science and to provide practical, hands-on experience with computing systems, as the current technology job market dictates.

Bachelor of arts students complete a 34-credit computer science component, supplemented by a mathematics component rooted in calculus. For most students, the program requires completion of fourteen 3-credit courses along with one 1-credit lab.

Computer Science Component

The 34 credits required for completion of the Bachelor of Arts major are grouped into two categories, seven required core courses (totaling 22 credits) and four electives (totaling at least 12 credits). The seven required core courses are the following:

- CSCI1101 Computer Science I
- CSCI1102 Computer Science II
- CSCI2243 Logic and Computation
- CSCI2244 Randomness and Computation
- CSCI2271 Computer Systems
- CSCI2272 Computer Organization and Lab
- CSCI3383 Algorithms

All of these courses are 3 credits with the exception of CSCI2272, which is 4 credits. The remaining 12 credits will typically be earned from four courses with 3 credits earned through any CSCI courses numbered CSCI2000 or above and at least 9 of the credits earned from courses at the CSCI3000 level or above.

Logic and Computation and Randomness and Computation (CSCI2243 and CSCI2244) provide students with mathematical fundamentals necessary for Computer Science. It is necessary that these courses be completed **no later than the end of junior year**, since this material is a prerequisite for the required course Algorithms (CSCI3383). CSCI2243 and CSCI2244 are also required prerequisites for many 3000-level CSCI electives.

Students enrolled in the computer science BS, BA, or Minor programs must maintain a grade point average (GPA) of 1.67 or above in the CSCI courses counted toward their program's requirements. This policy applies to students who declare any CSCI major or minor after the spring 2023 semester.

Mathematics Component

Mathematics courses required for completion of the bachelor of arts major:

- MATH1103 Calculus II (Math/Science majors)
- MATH2210 Linear Algebra

Many students will need to complete a prerequisite calculus course (e.g., MATH1102 (Calculus I for Science Majors) before MATH1103, so this calculus requirement is often satisfied by enrolling in a two-semester sequence.

Bachelor of Science in Computer Science

The curriculum for the Bachelor of Science major in Computer Science is designed to provide an extensive background in computer science and is well suited for students considering graduate study or students planning to pursue careers in science or engineering.

Bachelor of Science students must complete a 38-credit computer science component, supplemented by a mathematics component and a natural science component.

Computer Science Component

The Bachelor of Science major in Computer Science requires a minimum of 37 credits in computer science. The computer science credits are grouped into two categories: seven required CSCI courses (totaling 22 credits) and five elective courses (totaling at least 15 credits).

The seven required core courses are:

- CSCI1101 Computer Science I
- CSCI1102 Computer Science II
- CSCI2243 Logic and Computation
- CSCI2244 Randomness and Computation
- CSCI2271 Computer Systems
- CSCI2272 Computer Organization and Lab
- CSCI3383 Algorithms

All of these courses are 3 credits with the exception of CSCI2272, which is 4 credits.

Of the 15 credits of electives, 3 credits must be earned from one course in the social and ethical issues cluster (CSCI2260–2267) and at least 12 credits must be from courses numbered CSCI3000 or above.

Logic and Computation, and Randomness and Computation (CSCI2243 and CSCI2244) provide students with mathematical fundamentals necessary for Computer Science. It is necessary that these be completed **no later than the end of junior year**, since this material is prerequisite for the required course Algorithms (CSCI3383). CSCI2243 and CSCI2244 are also required prerequisites for many 3000-level CSCI electives.

Students enrolled in the computer science B.S., B.A., or Minor programs must maintain a grade point average (GPA) of 1.67 or above in the CSCI courses counted toward their program's requirements. This policy applies to students who declare any CSCI major or minor after the spring 2023 semester.

Mathematics Component

At least 12 credits of mathematics are required for completion of the Bachelor of Science major:

- MATH1103 Calculus II (Math/Science majors)
- MATH2202 Multivariable Calculus
- MATH2210 Linear Algebra
- Any MATH course 3000 or higher, other than MATH4426 Probability.

Since many students will need to complete MATH1102 before taking MATH1103, this calculus requirement will often be met by enrolling in a two-semester sequence.

Science Component

A two-semester sequence in a laboratory science for science majors. The sequences that fulfill this requirement can be chosen from among Biology, Chemistry, Physics or Earth and Environmental Sciences.

Biology:

- BIOL2000 Molecules and Cells, BIOL2010 Ecology and Evolution and BIOL2040 Investigations in Molecular Cell Biology Lab, or
- BIOL2000 Molecules and Cells, BIOL3030 Introduction to Physiology and BIOL2040 Investigations in Molecular Cell Biology Lab;

Chemistry:

- CHEM1109/1111/1113 General Chemistry I and CHEM1110/1112/1114 General Chemistry II or
- CHEM1117/1119/1121 Honors Modern Chemistry I and CHEM1118/1120/1122 Honors Modern Chemistry II;

Physics:

- PHYS2200/2050 Introductory Physics I (Calculus) and PHYS2201/2051 Introductory Physics II (Calculus);

Earth and Environmental Sciences:

Option #1

- Exploring the Earth EESC1132/1133

Then any two of the following 2-credit Environmental Systems courses:

- EESC2202/2212 Ecosystems
- EESC2203/2213 Water Resources
- EESC2204/2214 The Critical Zone
- EESC2205/2215 Climate Change
- EESC2206/2216 Oceans
- EESC2207/2217 Earthquakes
- EESC2208/2218 Quantitative Methods

Option #2

- Exploring the Earth EESC1132/1133

Then any 2000, 3000, or 4000 level class in EESC (note the prerequisites)

Option #3

Any two of the following 2-credit Environmental Systems courses:

- EESC2202/2212 Ecosystems
- EESC2203/2213 Water Resources
- EESC2204/2214 The Critical Zone
- EESC2205/2215 Climate Change
- EESC2206/2216 Oceans
- EESC2207/2217 Earthquakes
- EESC2208/2218 Quantitative Methods

Then any 2000, 3000, or 4000 level class in EESC (note the prerequisites)

Departmental Honors

Junior and senior Computer Science majors with at least a 3.3 GPA in CSCI courses are eligible to join the Departmental Honors Program. To graduate with the Departmental Honors designation, eligible students must maintain at least a 3.3 GPA in CSCI courses and complete a senior thesis. Thesis requirements are to have a thesis proposal approved by a faculty advisor and by the Honors Committee by the end of junior year. Students in the Departmental Honors Program must;

1. Complete two sections of CSCI4961 Honors Thesis during their senior year with grades of B+ or higher;
2. Submit a written honors thesis by the last day of class in the second semester of senior year, and
3. Give a 30-minute presentation of their thesis at the end of their senior year.

Students participating in the Honors Program are required to take both sections of CSCI4961 Honors Thesis. One section of CSCI4961 Honors Thesis may count as a CSCI 3000-level elective.

The Computer Science Minor Program

The minor program in Computer Science is designed to provide an introduction to computer science, primarily for mathematics and science majors. It is also suitable for students with a strong secondary interest in computer science and good analytical skills.

18 credits are required for completion of the minor.

The requirements for a Minor in Computer Science are:

1. CSCI1101 Computer Science I
2. CSCI1102 Computer Science II
3. Two electives numbered 2000 or higher and one of them must be CSCI2243 (Logic and Computation) or CSCI2271 (Computer Systems). Courses from the social and ethical issues cluster (CSCI2260–2267) are not accepted as one of the 2000-level required courses.
4. Two electives numbered 3000 or higher

The minor also requires students to do a Math course, MATH1103 Calculus II (Math/Science majors). Many students will need to complete a prerequisite calculus course (e.g., MATH1102 (Calculus I for Science Majors) before MATH1103, so this calculus requirement is often satisfied by enrolling in a two-semester sequence.

Students can declare a minor in computer science after they have taken CS2 or enrolled in the course (following the add/drop deadline). The minor must be declared before the end of the student's sophomore year.

Students pursuing a minor in computer science should carefully consider the prerequisites of 3000-level courses when selecting 2000-level electives. Several 3000-level electives specify CSCI2243 Logic and Computation and/or CSCI2271 Computer Systems as prerequisites. The 3000-level CSCI electives are in high demand, so minors should be prepared for a wide variety of 3000-level electives.

The Computer Science Minor Program

The Data Science Minor at Boston College is an interdisciplinary program emphasizing human-centered applications of data analysis and modeling for the common good. The minor is open to all undergraduate students at Boston College.

18 credits are required for completion of the minor. The requirements for a Minor in Data Science are:

- CSCI1090 Data Science Principles
- MATH2250 Mathematical Foundations of Data Science
- CSCI2291 Data Science: Methods and Applications
- Two electives from the approved Data Science minor elective list
- CSCI4900 Data Science Capstone

Students can apply to the minor in data science after they have taken CSCI1090 and Math2250. Students must apply to the minor before the end of sophomore year.

Interdisciplinary Concentration in Bioinformatics

The Bioinformatics Concentration is offered to students majoring in Biology, Mathematics, or Computer Science. Please note that courses in this concentration may overlap with major or minor requirements. In addition, a semester of bioinformatics research within a lab can be substituted for either one of the three additional computer science courses or the computational biology course. Students wishing to pursue this option should visit the Biology Department (Higgins 355) for course approval.

Course Requirements (for a Total of Seven Courses)

- BIOL2000 Molecules and Cells or BIOL3150 Introduction to Genomics (fall/spring)
- One of the following statistics courses:
 - BIOL2300 Biostatistics
 - MATH4426 Probability
 - CSCI2244 Randomness and Computation
- BIOL4200 Introduction to Bioinformatics (spring)
- A computational biology course, such as:
 - BIOL6160 Graduate Bioinformatics
 - BIOL4802 Research in Evolutionary Genomics*
 - Undergraduate Research in a Computational Biology lab
- Any three computer science courses at the level of CSCI1101 or above, such as:
 - CSCI1101 Computer Science 1 (recommended)
 - CSCI1102 Computer Science 2 (recommended)
 - CSCI2227 Introduction to Scientific Computation*
 - CSCI3345 Machine Learning*
 - CSCI3383 Algorithms*

*Prerequisites apply

Information for First-Year Majors and Non-majors

The Computer Science majors are for students who enjoy using computers and who wish to gain a deeper understanding of computing technology. Both B.S. and B.A. majors are designed to provide a solid foundation in the fundamentals of computer science. At the same time, they provide practical, hands-on experience, as the current technological job market dictates. Students are prepared for a variety of careers such as software development, network administration, technical support, and systems analysis. In addition, knowledge of computing technology is becoming increasingly important for people entering business, law, and the healthcare fields.

First-Year Computer Science Majors

First-year students considering majoring in Computer Science should plan to complete the program's calculus requirement (MATH1102 or higher) during their first year. Most will enroll in MATH1100 in fall semester and continue with MATH1103 in spring semester. Students who either carry advanced mathematics placement or who have completed a year of calculus in high school, should enroll directly in MATH1103 (or a more advanced course) in the fall semester. First-year students wishing to double major in Computer Science and Mathematics should take the calculus sequence recommended for the Mathematics major.

First-year students with prior programming experience are encouraged to take CSCI1101 Computer Science I. Students who have had no programming experience should consider beginning with Principles of Computer Science (CSCI1080) in their first semester. First-year students who have achieved a score of 4 or higher on the Computer Science AP examination or students entering with significant programming backgrounds should speak with the Undergraduate Program Director about course placement.

First-Year Non-majors

The department periodically offers introductory 3-credit courses in computer science: CSCI1080, CSCI1101, and CSCI2227.

CSCI1080 and CSCI1101 are the introductory programming courses. One of these is required of all Computer Science majors and minors and is a prerequisite for all advanced computer science courses. The skills needed to write computer programs come easily to some people and less easily to others. Students who have little or no programming experience and are apprehensive about their ability should consider enrolling in CSCI1080 before enrolling in CSCI1101.

CSCI2227 is an introduction to programming with an orientation to scientific applications, using MATLAB as the programming language.

Transfer Credits and Placement for Computer Science Courses

The Computer Science Department will accept transfer credits from other schools with documentation (for example, syllabi) sufficient for us to determine course equivalence. Before taking an external course, check BC's academic policies. AP, IB, and GCE scores are used to make placement decisions, but not for course credit. Specifically, students who score a 5 on the Computer Science A exam, or a 4 or 5 on the Computer Science AB exam, or who have significant programming experience should consult with the Chairperson of the Department or Undergraduate Program Director about starting the Computer Science course sequence with CSCI1102.

Course Availability

Most introductory courses (e.g., CSCI1101 and CSCI1102) are available every semester. CSCI1080 is offered every fall. All courses that are required for the major are offered at least once each academic year. Most advanced electives are offered only in alternate years; hence, student schedules should be designed carefully.

Course Credit Information

All Computer Science courses are prefixed by the letters CSCI and are registered as courses in the Morrissey College of Arts and Sciences. However, some courses are cross-listed with other departments.

Students enrolled in the computer science B.S., B.A., or Minor programs must maintain a grade point average (GPA) of 1.67 or above in the CSCI courses counted toward their program's requirements. This policy applies to students who declare any CSCI major or minor after the spring 2023 semester.

Earth and Environmental Sciences

An undergraduate in the Department of Earth and Environmental Sciences will develop a program in one of two majors: Environmental Geoscience or Geological Sciences. Within the requirements discussed below, programs can be designed to meet the interests and objectives of each student. Students may wish to major or to have a concentration in the department for a variety of reasons including: (1) a desire to work professionally in Earth and environmental sciences; (2) a desire to obtain a preparatory foundation for post-graduate work in Earth and/or environmental science, environmental studies, environmental policy, resource management, environmental law, or similar fields; (3) a desire to teach Earth and environmental science in secondary schools; or (4) a general interest in the discipline. Geoscientists study the Earth's complex systems and the interrelations among the solid Earth, hydrosphere, biosphere, cryosphere, and atmosphere. Students trained in the Earth sciences can look forward to exciting and rewarding careers, as society continues to require ever greater amounts of energy and resources in the twenty-first century, and at the same time, will face increasing environmental problems and concerns. The department provides students with the skills and varied background needed to address these problems. Earth scientists are naturally interdisciplinary and use science to solve real-world problems. Today's Earth scientists can choose to work in the field in almost any area of the world, including ultramodern laboratories equipped with the latest scientific and computing equipment. Whether understanding hazards and environmental challenges such as earthquakes, landslides, floods, sea level rise, and climate change, exploring for Earth's energy and mineral resources, or working with governmental agencies or industries to analyze pollution problems, the Earth and environmental sciences provide exciting possibilities for a rewarding career.

[Earth and Environmental Sciences Courses](#)

[Earth and Environmental Sciences Faculty](#)

[Earth and Environmental Sciences Website](#)

Major Requirements: Environmental Geoscience

The field of Environmental Geoscience is interdisciplinary and evolving. This bachelor of science program serves as an excellent major for students who wish to concentrate in the scientific aspects of sustainability, including those who might not be looking toward professional careers as scientists. Many Environmental Geoscience students go on to graduate work in environmental law, environmental policy, or sustainability studies. Students majoring in Environmental Geoscience should work out their programs closely with a departmental advisor to insure both breadth and depth in this subject area.

To provide students with training in the interdisciplinary nature of Environmental Geoscience, the major includes an introductory sequence in Environmental Systems (EESC2201–2208), consisting of eight 2-credit courses with labs. These courses can be taken in any order and do not have prerequisites. They are recommended particularly for first-year students and sophomores. They are usually offered as two-course pairs, with one course meeting for the first half of the semester and another course meeting for the second half of the semester, in the same time slot. Students are welcome to take one or both of the courses in each of these pairs in any given semester. In general, 2–4 Environmental Systems courses are offered each semester. Environmental Geoscience majors are required to take 12 credits toward this requirement. Students are also welcome to take our introductory geology course, Exploring the Earth (EESC1132), to fulfill 4 credits toward the introductory requirement.

Students in this major must complete the following course requirements:

(A) 12 credits from EESC2201–2208 (2 credits each, plus laboratories) and/or EESC1132 (4 credits)

- Environmental Systems: The Human Footprint (EESC2201)
- Environmental Systems: Ecosystems (EESC2202)
- Environmental Systems: Water Resources (EESC2203)
- Environmental Systems: Carbon Cycle (EESC2204)
- Environmental Systems: Climate Change (EESC2205)
- Environmental Systems: Oceans (EESC2206)
- Environmental Systems: Earthquakes (EESC2207)
- Environmental Systems: Quantitative Methods (EESC2208)

- Exploring the Earth (EESC1132)

Note: Some substitutions are possible. Approved substitutions include: EESC1170 for EESC2203, EESC1174 for EESC2205, and EESC1157 for EESC2206. Due to overlapping content, if you have taken one of these pairs of courses, you cannot take the other (i.e., if you have taken EESC1170, you cannot take EESC2203).

(B) EESC2220 Earth Materials (4 credits)

(C) At least 18 credits of elective courses. All EESC courses count toward this requirement, with the following limitations:

- Up to 3 credits can be from 1000-level courses.
- Up to 6 credits can be from 2000-level courses.
- Up to 6 credits can be from approved non-EESC courses.
(Approved courses: all ENVS courses, BIOL3210, BIOL4450, BIOL5130, CHEM2231, CHEM4475, CSCI1127, ECON2277, ECON2278, ECON3391, ECON3392, HIST2406, HIST4703, INTL2260, MATH3305, PHIL5515, PHIL5534, PHYS3301, SOCY3346, SOCY3349, SOCY3350, SOCY5562, THEO5429, or other courses, such as field camps, by permission of the Undergraduate Studies Committee.)
- Up to 3 credits of independent study (EESC5596–EESC5598) can count toward this requirement.

(D) Senior research experience (at least 4 credits)

- EESC5582 and EESC5583 Senior Research Seminar (2 credits each), or
- EESC5595 Senior Thesis (at least 6 credits)

(E) Three or four corequisite courses in Natural Sciences and Mathematics (12 credits)

- Calculus II (MATH1101, MATH1103, or MATH1105) and
- Two semesters of Physics with labs (PHYS2200/2050 and PHYS2201/2051), or
- Two semesters of Chemistry (CHEM1109–1110 with labs CHEM1111–1112 or CHEM1117–1118 with labs CHEM1119–1120), or
- Three semesters of Biology (BIOL2000, BIOL2010, and lab BIOL2040)

AP credits cannot substitute for the Physics, Chemistry or Biology corequisite (E) above. Students planning to go on to graduate programs in natural science are encouraged to take at least four semesters of introductory Physics, Chemistry, and/or Biology.

Information for First-Year Environmental Geoscience Majors

For those students who would like to explore the major in Environmental Geoscience, it is suggested that students take two to four of the Environmental Systems courses (EESC2201–2208, with laboratories) and/or Exploring the Earth (EESC1132) during their first year. The laboratory science requirement (E above) should be taken during the first or second year.

Major Requirements: Geological Sciences

This major combines elements of traditional Earth and environmental sciences programs and is considered excellent preparation for those working toward graduate school in the geosciences or employment in industry following graduation with a B.S. degree.

(A) Two required courses (8 credits)

- Exploring the Earth (EESC1132) with laboratory, 4 credits
- Earth Materials (EESC2220) with laboratory, 4 credits

Note: Any pair of Environmental Systems courses (EESC2201–2208, plus labs) can substitute for EESC1132.

(B) At least 11 credits from the following courses

- Stratigraphy and Sedimentation (EESC2264) with laboratory, 4 credits

- Structural Geology (EESC3385) with laboratory, 4 credits
- Introduction to Geophysics (EESC3391), 3 credits
- Petrology (EESC3378) with laboratory, 4 credits

(C) At least 19 credits of elective courses, with the following requirements:

- Electives include all EESC courses and approved interdisciplinary options (below).
- Up to 3 credits toward this requirement may be from a 1000-level course.
- At least 7 credits must be from EESC courses numbered 3000 or above.
- Up to 6 credits from approved non-EESC courses can count toward this requirement (approved courses: MATH3305, PHYS3301, CHEM2231, CHEM4475, or others by permission of the Undergraduate Studies Committee).
- Up to 6 credits from independent study or senior thesis (EESC5595–5599) can count toward this requirement.

(D) Five corequisite courses in Natural Sciences and Mathematics (20 credits)

- Calculus II (MATH1103 or MATH1105)
- Two semesters of Physics with labs (PHYS2200/2050 and PHYS2201/2051)
- Two semesters of Chemistry (CHEM1109–1110 with labs CHEM1111–1112 or CHEM1117–1118 with labs CHEM1119–1120)

AP credits cannot substitute for the Physics and Chemistry corequisite (D) above.

Note: All Geological Sciences majors are strongly encouraged to take a geology summer field course, which can count toward requirement C.

Information for First-Year Geological Sciences Majors

The following courses are recommended for first-year Geological Sciences majors, if their schedules permit:

- Exploring the Earth (EESC1132) with laboratory
- Earth Materials (EESC2220) with laboratory
- Two semesters of Calculus (MATH1102–1103)
- Two semesters of Chemistry (CHEM1109–1110) with labs (CHEM1111–1112)

Minor in Geological Sciences

In addition to the two major programs, a student may choose to minor in Geological Sciences. The minor is designed to be flexible and to allow the interested student to explore an area of interest in the Earth sciences without the formal commitment of a major. Students interested in declaring a minor in the department should contact the Director of Undergraduate Studies (Professor Jeremy Shakun, jeremy.shakun@bc.edu) to ensure they receive advising about course selections.

A minor in the Department of Earth and Environmental Sciences consists of a minimum of six courses in the department structured as follows:

(A) Two required courses (8 credits):

- Exploring the Earth (EESC1132) with laboratory
- Earth Materials (EESC2220) with laboratory

(B) At least 7 additional credits from departmental courses numbered 1000 or higher

(C) At least 3 additional credits from a departmental course numbered 2000 or higher

(D) At least 3 additional credits from a departmental course numbered 3000 or higher

Each student's minor program must be approved in advance by a faculty advisor in the Department of Earth and Environmental Sciences. Students should be aware that many upper-level courses have prerequisites in geoscience, mathematics, physics, or chemistry. Consult this catalog or a departmental advisor, and keep in mind that these prerequisites must be considered in designing a specific minor program. The

minor program allows students flexibility in their choice of courses. Minor programs can be designed to emphasize specific areas of concentration within the broad range of subjects in Earth and Environmental Sciences.

Senior Thesis and the Departmental Honors Program

Students are encouraged to conduct research with professors in the department. A senior thesis is normally a two-semester project, often also involving work during the summer after your junior year (or before). To do a thesis, students register for Senior Thesis (EESC5595) each semester of the senior year. To achieve Department Honors, majors in the department need to meet the GPA criteria (3.3 in major, 3.2 overall) and provide a thesis proposal to the Undergraduate Studies Committee by the add-drop date in the fall semester. In the spring, the completed thesis, signed by the faculty research advisor, is due to the committee by 5:00 p.m. on April 20, or if that is on a weekend or holiday, 5:00 p.m. on the first regular day of classes thereafter. Students can also write a senior thesis under the Morrissey Arts and Sciences Honors and Scholar of the College programs. Theses that meet these requirements would normally meet the Department Honors requirements. Honors will be awarded upon successful completion of a thesis based on the proposed research project as evaluated by the faculty advisor and approval of the thesis and the candidate's academic record by the Undergraduate Studies Committee. In general, all students in the department are urged to fulfill at least one of the elective courses in any major program with a project-oriented research course during their senior year. Students may propose substitutes for particular course requirements by writing to the department Undergraduate Studies Committee.

Fulfilling the Core Requirements

Core courses in the department (numbered EESC1XXX) are designed to give non-science majors an introduction to various aspects of the Earth's history and dynamics. The course offerings include a wide variety of subjects and approaches that reflect the breadth of the Earth sciences. This variety of courses provides maximum freedom of choice for introductory students. All of these courses presume no prior knowledge beyond high school science and all fulfill the Natural Science Core requirement. They are designed to acquaint students with some exciting aspect of the world we live in while providing a background in the methods of analysis and reasoning common to all science. EESC1110, EESC1125, EESC1132, EESC1168, and EESC1180 are courses that provide insight into the wide scope of geoscience subjects. Other Core offerings (such as EESC1146, EESC1150, EESC1157, EESC1170, EESC1172, EESC1174, EESC1177, and EESC1187) cover more specific sub-fields, such as oceanography, climate change, water resources, astronomy, or evolution. The department participates in the Core Renewal process, offering both Complex Problems (for example, EESC1501, EESC1506) and Emerging Questions (for example, EESC1701, EESC1702) courses for first-year students. Students wishing to find out more about department Core courses should contact the department at 617-552-3640 (Devlin 213) or see the department Director of Undergraduate Studies (Professor Jeremy Shakun, jeremy.shakun@bc.edu).

Information for Study Abroad

The Department of Earth and Environmental Sciences strongly encourages students to take advantage of study abroad opportunities. An Earth scientist can never see too much of our planet. We particularly encourage students to participate in programs that include field-based courses and research experiences. Depending upon the student's major, and the courses available at the foreign school, the department can be quite flexible. We typically allow one elective per semester abroad to count toward major requirements, or two courses in unusual circumstances. Students should work out their plan well in advance with a departmental advisor or the Director of Undergraduate Studies (Professor Jeremy Shakun, jeremy.shakun@bc.edu).

Eastern, Slavic, and German Studies

The Department of Eastern, Slavic, and German Studies administers undergraduate majors in German, Linguistics, Russian, and Slavic Studies, as well as minors in Arabic Studies, Chinese, German, Linguistics, Russian, and East European Studies. Students may also participate in an interdisciplinary minor in interdisciplinary programs in Asian Studies, German Studies, Jewish Studies, International Studies, and Islamic Civilization and Societies. A German business concentration within the German major and minors is also available. Departmental honors require successful completion of honors requirements. For information, contact the Department.

The Department maintains listings of related courses from other departments that satisfy various program requirements. Substitutions and exemptions from specific program requirements, as well as the application of courses from other institutions, require express permission from the Chairperson or the Undergraduate Program Director.

Students fulfilling the undergraduate Core requirements in Literature, Arts, and Cultural Diversity should consider Core offerings taught by members of the Department.

References to the number of credits required correlate with the number of full one-semester courses.

Majors

The Department of Eastern, Slavic, and German Studies offers majors in German, Linguistics, Russian, and Slavic Studies.

Major in German (30 Credits)

The major in German is designed to help students achieve linguistic, literary, and cultural competence and to foster and develop transferable skills of critical thinking, textual analysis, effective writing and communication, and international cultural discernment. Training in German Studies includes advanced language courses combined with upper-level seminars on topical areas of literature, film, history, music, and culture. Majors complete the program with strong German-language proficiency, expertise in the analysis of texts and cultural artifacts in their historical and cultural context, the ability to produce texts of various genres in German, and the intellectual background for graduate study in German and many other fields, including business, law, political science, international studies, and medicine. German majors are eligible to apply for popular internships, which place Boston College students with companies in Germany or Austria every summer.

The German major requires ten 3-credit courses (30 credits):

- GERM2001–2002 German Composition and Conversation I and II (6 credits)
- One topics course numbered between GERM2010 and 2020 (3 credits)
- GERM2200 The German Literary Legacy (3 credits)
- One 3000-level course (3 credits)
- Five elective courses in German Studies, which may be taught in English (15 credits)

Students with a minimum 3.5 GPA may apply for the Honors program.

Freshmen and sophomores should consult with the German Studies Director of Undergraduate Studies concerning opportunities for study abroad during their junior year at a German or Austrian university, in which case up to 12 credits (four 3-credit courses) may be applied to the major.

Students are encouraged to double-count Core requirements by taking courses in German Studies that also fulfill the Core. One course for the German major may be double-counted toward another major or minor.

To declare your major in German Studies, contact the Director of Undergraduate Studies, Professor Daniel Bowles, Lyons 201F, bowlesd@bc.edu, or the department administrator.

Major in Linguistics (31 Credits)

The focus of the Linguistics program does not solely lie in the acquisition of language skills, but rather, in learning to analyze linguistic phenomena with a view toward making significant generalizations about the nature of language.

Students majoring in Linguistics build their programs around a specific area of emphasis. In consultation with the faculty, students design a program of study tailored to the individual's interests and goals. Typical areas of emphasis include philology (the historical and comparative study of ancient languages), psycholinguistics, and language acquisition.

A typical program for this major requires the following:

- LING3101 General Linguistics (3 credits)
- LING3102 Syntax and Semantics (3 credits)
- LING3103 Language and Language Types (3 credits) or LING3104 Formalism and Functionalism in Linguistics (3 credits)
- 6 credits in Philology or in the Structure of Language
- 15 additional credits drawn from departmental offerings, of which two must be upper-division electives
- LING4391 AB Comprehensive: Linguistics (1 credit)

Linguistics majors should additionally develop proficiency in at least one foreign language and competence in at least one other language at levels appropriate to their career plans (e.g., French, German, Spanish, Latin, Greek, Russian, Bulgarian).

Also desirable: exposure to a non-Indo-European language (e.g., Chinese, Arabic, Japanese, Korean, Hebrew, Persian (Farsi))—all of which are taught within the Department of Eastern, Slavic, and German Studies.

Major in Russian (30 Credits)

The major in Russian provides rigorous training in Russian language, literature, and culture. The major concentrates on acquiring advanced proficiency in Russian language and on comprehending important aspects of the literature, culture, and civilization of Russia and the former USSR.

The requirements for the major in Russian are as follows:

- 9 credits (normally, three one-semester courses) in Russian grammar, composition, and stylistics beyond the intermediate level
- 9 credits (normally, three one-semester courses) in Russian literature and culture, including two survey courses for classical and modern Russian literature (SLAV2162 and SLAV2173)
- 3 credits in Introduction to Slavic Peoples and Cultures (formerly Slavic Civilizations)
- 6 credits (normally, two one-semester courses) in Russian literature, culture, advanced grammar and stylistics, history or politics, of which at least 3 credits must be in Russian literature and culture (consult the Department about the list of available courses)
- 3 credits (normally, a one-semester course) in Russian and Slavic linguistics (The Structure of Russian, Old Church Slavonic, or Old Russian)

Major in Slavic Studies (30 Credits)

The major in Slavic Studies provides broadly based training about Russia and the nations of Eastern Europe and the former Soviet Union. The normal program for this major requires the following:

- 6 credits (normally, two one-semester courses) in a Slavic language at or above the intermediate level
- 6 more credits (normally, two one-semester courses), in the same Slavic language at a higher level or 6 more credits (normally, two one-semester courses) in another Slavic language
- 3 credits in Introduction to Slavic Peoples and Cultures (formerly Slavic Civilizations)
- 6 credits (normally, two one-semester courses) in Slavic or Eastern European literatures, which must include at least one survey in Russian literature, either Classics of Russian Literature or Twentieth-Century Russian Literature
- 9 credits (normally, three one-semester courses) in Slavic or East European history, politics, culture, or linguistics (consult the Department about the list of available courses)

Minors

The Department offers departmental minors in Arabic Studies, Chinese, German, Linguistics, and Russian, as well as interdisciplinary minors in Asian Studies, East European Studies, German Studies, and Jewish Studies.

Minor in Arabic Studies (Departmental)

The departmental minor in Arabic Studies covers areas of Modern Standard Arabic and Modern Hebrew languages, Modern Middle Eastern literature and cultural history, and Near Eastern Civilizations. The minor requires a minimum of 18 credits in approved courses (normally, six one-semester courses):

- 6 credits (normally, two one-semester courses) in Modern Standard Arabic above the first semester of intermediate intensive level
- 12 credits (normally, four one-semester courses) from departmental offerings in Middle Eastern languages, cultures, literatures, and civilizations (consult the Department about the list of available courses)

Minor in Chinese (Departmental)

The departmental minor in Chinese focuses on acquiring modern language proficiency and knowledge of aspects of Chinese culture, literature, and civilization. The minor requires **a minimum of 18 credits:**

1. At least 6 credits in modern Mandarin Chinese above EALC2121 Intermediate Chinese I:
 - EALC 2122 Intermediate Chinese II (3 credits; co-requisite EALC 2124)
 - EALC 2124 Intermediate Chinese practicum (3 credits; co-requisite EALC 2122)
 - EALC 3161 Business Chinese (3 credits)
 - EALC 3162 Newspaper and Media Chinese (3 credits)
 - EALC 3163 Contemporary Chinese Literature (3 credits)
 - EALC 4121 Advanced Chinese I (3 credits)
 - EALC 4122 Advanced Chinese II (3 credits)
2. At least six credits in Chinese culture and literature, which may include courses taught in translation and language courses in Classical Chinese:
 - EALC 2062 Love and Nature in Far Eastern Literatures (3 credits)
 - EALC 2063 Wisdom and Philosophy of East Asia (3 credits)
 - EALC 2064 Far Eastern Literary Masterpieces (3 credits)
 - EALC 2161 Ghosts and Strange Happenings in Chinese Literature (3 credits)
 - EALC 2162 Gods and Heroes in Chinese Literature (3 credits)
 - EALC 3165 Gender and Sexuality in Traditional Chinese Literature (3 credits)
 - EALC 3166 Traditional Chinese Literature (3 credits)
 - EALC 4151 Readings in Chinese Literature and Philosophy (3 credits)

3. No more than six credits may be transferred from another department or institution. Departmental approval is required for all transferred courses.
4. According to the A&S EPC “New Co-counting Limitations for Majors and Minors,” “in order to earn a departmental minor, students must have at least 15 credits in the minor program that are not used to fulfill requirements for another major or minor.” Please plan your studies accordingly.

To take a placement test in Chinese, contact Prof. Fang Lu (fang.lu@bc.edu).

For more information contact Professor Sing-Chen Lydia Chiang (Lyons 210J; chiangs@bc.edu)

Minor in German (Departmental)

The minor in German is for students interested in learning the German language and creating ties with the German-speaking world while combining their interest in German with other academic and professional goals. The foremost goal of the program is to foster among students an international focus and the accompanying skills, whatever their major may be. Minors are strongly encouraged to study or work abroad. German minors are eligible to apply for popular internships, which place Boston College students with companies in Germany or Austria every summer.

The German minor requires six 3-credit courses (18 credits):

- Four language courses between Elementary and Composition and Conversation (GERM1001, 1002, 1050, 1051, 2001, 2002). More advanced students can substitute upper-level language courses (12 credits).
- GERM2200 The German Literary Legacy (3 credits)
- One elective course in German Studies, which may be taught in German or English (3 credits)

Freshmen and sophomores should consult with the German Studies Director of Undergraduate Studies concerning opportunities for study abroad during their junior year at a German or Austrian university, in which case up to 6 credits (two three-credit courses) may be applied to the minor.

Students are encouraged to double-count Core requirements by taking courses in German Studies that also fulfill the Core. One course for the German minor may be double-counted toward another major or minor.

To declare your minor in German Studies, contact the Director of Undergraduate Studies, Professor Daniel Bowles, Lyons 201F, bowlesd@bc.edu.

Minor in Linguistics (Departmental)

This departmental minor requires a minimum of six approved one-semester courses (18 credits)

- LING3101 General Linguistics (3 credits)
- LING3102 Syntax and Semantics (3 credits)
- 6 credits in Philology or in the Structure of Language
- 6 additional credits drawn from departmental Linguistics offerings

Minor in Russian (Departmental)

The departmental minor in Russian requires a minimum of 18 credits (normally, six approved courses):

- 6 credits (normally, two one-semester courses) in Russian at or above the intermediate level
- 6 credits (two one-semester courses) in Russian literature: one pre-twentieth century and one post-nineteenth century (normally two survey courses for classical and modern Russian literature, SLAV2162 and SLAV2173)
- 6 additional credits (normally, two one-semester courses) in Russian literature, culture, advanced grammar and stylistics, history, or politics (consult the Department about the list of available courses)

Minor in Asian Studies (Interdisciplinary)

The [Asian Studies](#) program offers students a rich curriculum in the arts and literatures, history, philosophy, religion, and contemporary affairs of East Asia, South Asia, and Central Asia. It rests on three pillars:

- an emphasis on regional and transnational relations
- the integration of different disciplinary approaches
- language study

For more information concerning the Asian Studies minor:

- Visit the Interdisciplinary Programs and Minors (MCAS) page
- Contact the Director of the interdisciplinary minor in Asian Studies, Sing-chen Lydia Chiang, chiangs@bc.edu, 617-552-0128

Minor in East European and Eurasian Studies (Interdisciplinary)

The East European Studies and Eurasian interdisciplinary minor requires a minimum of 18 credits in approved course work (normally, six one-semester courses), distributed as follows:

- 3 credits in either Slavic Civilizations (usually Introduction to Slavic Peoples and Cultures)
- 3 additional credits in Russia, East European or Eurasian history, culture, or politics
- 6 credits in Russian or in another Slavic or East European or Eurasian language at or above the intermediate level
- 6 credits in approved elective course work from related areas such as: art history, economics, sociology, film studies, literature, linguistics or language, philosophy, or theology, at least one of which should be in Russian literature and/or culture taken at Boston College.
- No more than 6 credits (or two courses) may be taken at another institution or a study-abroad program.

For information concerning the interdisciplinary minor in East European and Eurasian Studies, contact Professor Maxim D. Shrayer, Director, East European and Eurasian Studies minor, shrayerm@bc.edu.

Minor in German Studies (Interdisciplinary)

The interdisciplinary minor in German Studies aims to provide a comprehensive understanding of German-speaking civilization and its place in today's world. Students choose the interdisciplinary minor for its flexibility in taking courses tailored to their interests across departments and may complete the entire minor with courses taught in English. German Studies minors are eligible to apply for popular internships, which place Boston College students with companies in Germany or Austria every summer.

The German Studies minor requires six 3-credit courses (18 credits):

- GERM2242/HIST2270 Germany Divided and Reunited (3 credits)
- Three elective courses in German Studies, taught in English or German (9 credits)
- Two courses on topics related to the German-speaking world from different departments in the Morrissey College of Arts and Sciences (6 credits)

Consult the German Studies website for a list of courses from across the campus suited to the interdisciplinary minor in German Studies.

Freshmen and sophomores should consult with the German Studies Director of Undergraduate Studies concerning opportunities for study abroad during their junior year at a German or Austrian university, in which case up to 6 credits (two 3-credit courses) may be applied to the minor.

One course for an interdisciplinary minor may be “double counted” toward another major, minor, or a Core requirement.

To declare your German Studies minor and plan your course of study, contact the Director of the Interdisciplinary Minor, Professor Nick Block, Lyons 210C, blockni@bc.edu.

Minor in Jewish Studies (Interdisciplinary)

The Boston College Jewish Studies program seeks to examine the multiple dimensions and complexities of Jewish culture throughout its broad chronological and geographical range. The interdisciplinary minor in Jewish Studies consists of a total of six 3-credit courses (18 credits), including one foundation course, four electives, and a concluding seminar/Capstone course.

For information concerning the interdisciplinary undergraduate minor in Jewish Studies, visit the [Minor in Jewish Studies](#) program web page.

German Studies Special Opportunities

Honors Program in German

Students with a minimum 3.5 GPA in German Studies courses are encouraged to apply for the Honors program in German. Honors students take an additional 6 credits in German Studies (either one additional 3-credit upper-level course and one semester of GERM6699, or two semesters of GERM6699). As part of GERM6699, students complete a bachelor's thesis on a topic chosen in consultation with their proposed thesis advisor. To apply for the Honors program, please contact the Director of Undergraduate Studies, Professor Daniel Bowles, Lyons 201F, bowlesd@bc.edu.

Business Concentration in German Studies

The business concentration allows German majors or minors to combine a dual interest in business and German with a program of study that prepares them for an international career. The business concentration has been developed in conjunction with the Boston College Carroll School of Management to take advantage of the thriving German economy that makes Central and Eastern Europe a strong market for American products and has enabled German companies to open branches in the United States.

The German business concentration requires two 3-credit courses (6 credits), counting simultaneously toward the German major or minors:

- GERM2004 German for Professional Purposes (3 credits)
- GERM2005 Germany in Europe Today (3 credits)

Students majoring or minoring in German Studies can apply in the fall semester for popular internships, which place Boston College students with companies in Germany or Austria every summer. Inquire about the internship, for which you may receive one course credit (GERM5501), by contacting Ursula Mangoubi in Lyons 201G, mangoubi@bc.edu.

Students are encouraged to spend a year or a semester at the Wirtschaftsuniversität Wien (Vienna University of Economics and Business), the Frankfurt School of Finance and Management, or the Ingolstadt School of Management affiliated with our partner university, the Catholic University of Eichstätt-Ingolstadt.

Study Abroad

The Department of Eastern, Slavic, and German Studies requires, in general, at least two years of language study, in addition to coursework (tailored to the individual student's program of study) that would provide cultural orientation. Since the Department offers a wide variety of majors and minors, courses taken abroad may be conferred major or minor credit (up to 12 credits to majors and 6 credits to minors) on a case-by-case basis. Please consult with the relevant departmental undergraduate studies coordinator.

Individual programs of study are arranged according to the types of instruction available and the student's goals and background.

Students interested in German Studies can study in a German-speaking country for a year, a semester, or a summer, with recommended programs in Eichstätt, Tübingen, Berlin, Frankfurt, and Vienna. Students majoring in Linguistics may profit from any number of study-abroad

opportunities, depending on the specific language(s) they elect to focus on. Students of Near Eastern and East Asian languages have participated to great advantage in a variety of different study abroad opportunities in Egypt, Jordan, Morocco, Oman, Japan, the People's Republic of China, the Republic of China, Korea, and other nations of Asia.

Junior year is the most popular time to study abroad, but seniors have done so successfully as well. All Eastern, Slavic, and German Studies majors must obtain department course approval before going abroad. Students should consult with the relevant faculty members, depending on their language and area of expertise.

Work Abroad in Germany

Only German majors and minors are eligible to apply for popular internships, which place Boston College students with companies in Germany every summer. Students are paid through their job and/or through Boston College internship grants and other fellowships.

The Fulbright Program for Germany and Austria

Students apply for the elite Fulbright program starting the spring before their senior year. For Fulbright information, contact Daniel Bowles, Lyons Hall 201F, bowlesd@bc.edu.

Office of International Programs

Students taking classes in the Department of Eastern, Slavic, and German Studies participate in Boston College's programs and international partnerships in China, Germany, Israel, Japan, Korea, Lebanon, Morocco, Nepal, Philippines, Poland, Russia, and other countries.

For complete information on any of these programs and also on unofficial study abroad, visit bc.edu/international.

Teachers of English to Foreign Students

The Department of Eastern, Slavic, and German Studies offers a number of linguistics courses for training teachers of English to foreign students. The Department of English offers elective and Core-level undergraduate courses of English language and literature for foreign students enrolled at Boston College.

Economics

The Economics major provides a critical examination of how the economic system works in the United States and throughout the world. The introductory courses are surveys of economic problems, policies, and theory; and the required courses in Microeconomic Theory and Macroeconomic Theory give a deeper analytical foundation. Electives permit further study in a wide range of fields, including money and banking, international trade and finance, public sector economics, economics of the family, economics of education, inequality, environmental economics, industrial organization, and computational investing.

The Economics major provides a general background that is useful to those planning careers in law, government service, or business as well as those planning careers as professional economists. Professional economists work as college teachers, as researchers for government agencies, businesses, and consulting firms, and as administrators and managers in a wide range of fields.

The B.A. in Economics has been classified as STEM (CIP Code 45.0603: Econometrics and Quantitative Economics). Students in STEM degree programs can apply for a 24-month STEM extension of F1 Optional Practical Training (OPT).

[Economics Courses](#)

[Economics Faculty](#)

[Economics Website](#)

- The Core Courses
- Requirements for Economics
- Double Major
- Courses Taken Outside the Department
- Information for Study Abroad

The Core Courses

Principles of Economics (ECON1101) is a 4-credit course, with 3 hours of lecture and a 1-hour discussion section. This satisfies one of the University's two Social Science Core requirements. Qualifying Advanced Placement (AP) scores on both Micro and Macro allow to the student to place out of ECON1101 (and later take an Economics elective to replace 1101 to ensure the appropriate number of courses needed to satisfy the minor/major/concentration). For the classes of 2025 and before, qualifying AP exams on both Micro and Macro also satisfy the second Social Science Core requirement. For the classes of 2026 and after, only one Social Science Core requirement is satisfied with the qualifying AP score in Micro or Macro; completing ECON1101 will allow these students to satisfy the second Social Science Core requirement, however.

Requirements for Economics

MCAS Major Requirements

A minimum of 36 credits, consisting of five required courses and six electives, are required for the Economics major. The required courses are: Principles of Economics (ECON1101), Economic Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and Econometric Methods (ECON2228). At least four of the six electives must be upper-level courses, i.e., 3000-level courses that have a Theory prerequisite (and possibility Statistics and/or Econometrics as well). Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), Statistics (ECON1151), and Econometric Methods (ECON2228) should be completed by the end sophomore year unless a student starts the major after their first year. All students must have the five required courses completed by the end of junior year. Exceptions to this requirement may be granted at the discretion of the Director of Undergraduate Studies.

Calculus I is prerequisite to both Theory courses. Students can take MATH1102 (preferred) or MATH1101 to satisfy this requirement before enrolling in the Theory courses. The AB Calculus version of the AP exam can also be used to satisfy this requirement. Students with other

forms of Advanced Placement (e.g., International Baccalaureate) should consult both the Director of Undergraduate Studies for the Economics and Mathematics Departments. Students considering graduate work in economics or related fields should take additional mathematics courses: about the same number as required for the minor in mathematics.

All Economics courses counting toward the major and minor are 3-credit courses with the exception of Principles of Economics (ECON1101), Statistics (ECON1151), and Econometric Methods (ECON2228), which are 4-credit courses. Additionally, all intermediate courses (Theories, Statistics, and Econometrics) must be taken through the BC Economics Department. Exceptions are made for transfer students.

The Economics major is meant to be structured. Students should take ECON1101 before taking Economics courses other than Statistics. Students should complete at least one Intermediate Theory course before beginning the electives (the exception to this is ECON2211), although the Department recognizes that those who start the major late may not have time to follow this sequence precisely. Students who need to take an elective before completing an Intermediate Theory course should register for a 2000-level elective that has only ECON1101 as a prerequisite. It is also sometimes possible, with permission of the professor, to take a 3000-level elective concurrently with its Intermediate Theory prerequisite.

Economics electives are taught in two formats: the traditional lecture format, with enrollments up to 50, and a smaller writing-intensive format, with enrollments capped at 20 to 25 depending on the size of the writing component. Students are urged to take advantage of the writing-intensive courses and to check with the Department before the registration period to learn which courses will be offered in which format.

MCAS Minor Requirements

The minor in Economics consists of five required courses and two electives, a minimum of 24 credits. The required courses are: Principles of Economics (ECON1101), Statistics (ECON1151), Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), and Econometric Methods (ECON2228). At least one of the two electives must be an upper-level (3000) course.

Please see the Major Requirements above for additional details about the sequencing of classes, prerequisites, etc.

MCAS Economics Honors Program

The Honors Program in Economics provides solid preparation for students planning to attend graduate school in economics as well as for those planning advanced study in other fields. For those students planning to enter the workforce directly after graduation, the program will develop the research, analytical, and writing skills that employers desire. The program offers highly motivated students the opportunity for an individualized and challenging curriculum. Upon successful completion of the program students are awarded their Boston College degrees with the designation "Honors in Economics."

An unofficial entrance to the program ideally occurs in either the second semester of freshman year or first semester of sophomore year when the student with good Principles of Economics and Calculus I grades will be urged to consider the Honors Theory sequence (ECON2203–ECON2204) in place of the standard sequence (ECON2201–ECON2202). If students prefer to take Honors Macro Theory first, after completing Principles of Economics, that is allowable. Both Honors Micro Theory and Honors Macro Theory will be offered each semester.

Students who have already completed ECON2201 and/or ECON2202 with excellent grades may also receive honors in Economics by successfully completing a senior honors thesis.

Students considering becoming honors candidates should take Statistics as soon as possible and should take Econometrics immediately following. Such students are also encouraged to complete the Calc I requirement with MATH1103.

Honors candidates must complete a 6-credit Honors Thesis (ECON4497–ECON4498) during their senior year. Three of these credits will count as an upper-level Economics elective; the other three credits are general university electives. Departmental permission is required for registration in ECON4497 Honors Thesis Seminar. Candidates must submit a thesis proposal approved by a faculty member who agrees to serve as thesis advisor in the spring of the junior year. In addition, they must have completed the Calculus I and Econometrics requirements and have a GPA of at least 3.5 in Economics courses at the end of the junior year. Students who did not take Honors Theory (ECON2203–2204) must have a GPA of at least 3.5 in their Theory courses.

The distinction of Honors in Economics may only be conferred upon those students completing an Honors Thesis. A letter grade less than B+ on the Honors Thesis would be considered a deficiency to the conferral of Honors in Economics. A higher letter grade supports the conferral, but does not in itself assure that the distinction shall be conferred. GPA and the rigor of the courses taken will be considered. The conferral is the sole responsibility of the Honors Committee.

CSOM, Economics Concentration: Class of 2023 and Beyond

For CSOM Classes of 2023 and 2024

All Carroll School of Management students (CSOM), regardless of their area of concentration, are required to take Principles of Economics (ECON1101) and Statistics (BZAN/OPER1135 or ECON1151). The CSOM classes of 2023 and 2024 may chose Economics as an area of concentration. The concentration consists of five additional courses: Microeconomic Theory (ECON2201 or 2203), Macroeconomic Theory (ECON2202 or 2204), Econometric Methods (ECON2228), and two electives, at least one of which must be an upper-level (3000) course.

As for statistics, CSOM students who have already taken BZAN/OPER1135 prior to declaring an Economics concentration, please be advised that ECON1151 is distinct from that offered in CSOM. As such, students should consider taking ECON1151, but if not, CSOM students will have to also take ECON1158 (Statistics for Computing in Stata)—a 1-credit, pass/fail course that will teach you the software used in Econometric Methods. Students should consult with the professor of ECON2228 if they would like to take ECON1158 simultaneously. If the professor doesn't allow this, you will need to take ECON1158 before enrolling in ECON2228.

Students with a serious interest in Economics are encouraged to fulfill all the requirements of the MCAS major.

Please see the Major Requirements above for additional details about the sequencing of classes, prerequisites, etc.

For CSOM Classes of 2025 and Beyond

Beginning with the class of 2025, Economics is no longer be an area of concentration for students from CSOM. The MCAS Economics major is, however, a possibility for CSOM students, as is the MCAS Economics minor.

Double Major

Requirements for double majors are the same as those for the major.

Courses Taken Outside the Department

General Department policy is that students may apply external credits to no more than three courses for the major. External credits are any college level credits taken outside the MCAS. This includes summer session(s) at BC or another institution, study abroad programs, and/or courses through Woods College of Advancing Studies (WCAS). Classes that can be taken outside of the Economics Department at BC include the equivalent of ECON1101 and two electives. Three electives are allowed for students who enroll in a year-long study abroad program. All intermediate courses (Theories, Statistics, and Econometric Methods) must be taken through the BC Economics department. Exceptions are made for transfer students, however.

All external courses need the syllabi approved by the Director of Undergraduate Study to determine if the course will count towards their study of Economics. Lists of pre-approved courses abroad and through the WCAS are listed on the Economics website.

The same rules apply for CSOM concentrations.

Information for Study Abroad

There are many opportunities for students to take elective courses at the many varied institutions partnered with BC. The Department of Economics encourages students to take advantage of global engagement and education, and it will work with students to help make it happen.

The Office of Global Education (OGE), located in Hovey House, coordinates study abroad opportunities and can provide detailed information about specific programs. OGE helps plan and coordinate students' study abroad semester or year from beginning to end: from offering advice about various programs; applying to and planning the course of study at whatever program the student may choose; and transferring credits and grades back to BC when the student return after having successfully completed their studies abroad.

To ensure that students are able to complete the requirements for the MCAS Economics major or minor in time for graduation, all students must have completed Statistics and either Micro or Macro Theory before studying abroad. The Department strongly recommend that both Theory courses and Econometric Methods are completed before studying abroad as well, as those courses must be taken no later than the junior year.

The following requirements must be met for a course to transfer back credits towards the major or minor:

1. MCAS Economics majors and minors and CSOM Economics concentrators must earn at least a B- in at least one of the Intermediate Theory courses before going abroad.
2. Micro Theory, Macro Theory, Statistics, and Econometric Methods cannot be taken abroad.
3. Classes to be taken abroad must be approved for content. The Director of Undergraduate Studies for Economics will determine if the course counts as a lower-level (2000 level) or upper-level (3000 level) elective. As a general rule of thumb, lower-level courses require Principles of Economics (ECON1101) as a prerequisite. Upper-level electives require Micro and/or Macro Theory, at a minimum, as prerequisites. Please send a detailed and complete course syllabus to the Director of Undergraduate Studies as a WorkFlow. Courses taken from abroad that count towards your MCAS Economics major, minor, on concentration must be similar to what you could take at BC in the Economics Department.
4. The course must have the appropriate number of credit hours. OGE determines the course credit hours. If you have questions about the number of credit hours a course has, please check with the Academic Operations Administrator.
5. The student must receive a C- or above in the course (if taken in an external program) to receive transfer credit at BC.
6. Students cannot have exceeded the limit of courses that can be taken outside of the Department. General Department policy is that students may apply up to three external courses or 9 credits (e.g., AP exams, summer session at BC, WCAS, study abroad). Students can take one introductory course (e.g., ECON1101) and two electives outside of the BC Economics Department. Students studying abroad for an entire year are allowed an extra elective, however. All intermediate courses (Theories, Statistics, and Econometric Methods) must be taken through the Economics Department at BC. Exceptions are made for transfer students. In general, for single semester abroad programs, students may take a maximum of two courses abroad; for full-year programs, students may take a maximum of three courses abroad. Students who have previously taken summer courses, those with AP credits, etc. should discuss their individual situations with the DUS. Please note that it is not always possible to take more than one elective abroad, so careful planning is required.
7. A course must generally be a 3-credit course to qualify, but students may combine two 2-credit-hour courses to count for one elective, or three 2-credit-hour courses to count for two electives. The Department collects a list of classes it has approved and will share it with students. Student Services and OGE also have copies of this list. Therefore, if a course you take is on the list, it will automatically be placed on your degree audit when Student Services receives the grade from the host university, assuming the student has met all of the other requirements listed above.

Economics majors, minors, and concentrators must contact OGE to apply for study abroad and to plan their semester or year abroad. Those planning to participate in the Honors Program are strongly advised to identify a thesis topic and a faculty supervisor before going abroad, especially if the student will be abroad during the spring semester of their junior year. Very tight deadlines during the fall semester of senior year make this advance planning essential. Students who are considering doing Ph.D. work in Economics or related disciplines should plan their programs abroad with particular care.

Engineering

The Engineering Department offers an undergraduate major in Human-Centered Engineering (HCE) to students in the Morrissey College of Arts and Sciences. Students in this major will receive a Bachelor of Science (B.S.) in Human-Centered Engineering. The HCE program provides students with a technical education that is human-centered, design-process driven, and focused on applying engineering knowledge to solve complex problems that impact society. The HCE major is designed to meet the standards of ABET, the main body for accreditation of engineering programs in the United States. HCE courses are distinctive in that they actively integrate the acquisition and application of technical engineering knowledge with a broader understanding of how that knowledge shapes and is shaped by society. Courses range from introductory engineering design to higher-level technical electives focused on specific topics within engineering. HCE majors apply their knowledge of the physical and natural sciences, mathematics, and computation to engineering fields and connect their academic experiences in BC's Core Curriculum to their formation as engineers. All HCE students participate in weekly reflection sessions that integrate their learning experiences with broader questions about society, student formation, and the common good.

Bachelor of Science (B.S.) in Human-Centered Engineering Program Requirements

Required HCE Courses

- One course from Introduction to Human-Centered Design
 - ENGR1026: Innovation Through Engineering Design *
 - ENGR1801/HIST1627: Making the Modern World: Design, Ethics & Engineering (Complex Problem course)
- Introductory Engineering Courses
 - ENGR1101: Introduction to Human-Centered Engineering
 - ENGR1102: Physical Modeling and Analysis Lab
 - ENGR1103: Engineering Analysis Lab
 - ENGR1105: Engineering Computation and Programming
- Engineering Foundations Studio Courses
 - ENGR2101: Engineering Foundations Studio I
 - ENGR2102: Engineering Foundations Studio II
 - ENGR2103: Engineering Foundations Studio III
 - ENGR2104: Engineering Foundations Studio IV
 - ENGR2105: Engineering Foundations Studio V
- Advanced Engineering Courses
 - ENGR3101: Engineering for Society
 - ENGR3103: Advanced Engineering Math
 - ENGR3105: Introduction to Statistical Data Analysis and Machine Learning
- Engineering Project Courses
 - ENGR3100: Collaborative Service Engineering Project (3 credits)
 - ENGR4102–4103: Senior Impact Project (6 credits)
- Technical electives
 - Fourteen (14) credits of Technical Engineering Electives
 - One course must be an Advanced Engineering Foundations course
 - One course must be 4 credits
 - Choose from:
 - ENGR3110: Advanced Engineering Foundations: Materials
 - ENGR3112: Advanced Engineering Foundations: Thermodynamics
 - ENGR3114: Advanced Engineering Foundations: Bioprocess Engineering
 - ENGR3210: Advanced Engineering Foundations: Biomaterials
 - ENGR3220: Biomedical Imaging
 - ENGR3320: Quantitative Sustainable Design
 - ENGR3410: Advanced Engineering Foundations: Energy and Environmental Materials
 - ENGR3420: Water Quality Engineering
 - ENGR4230: Biomechanics

- Eight semesters of HCE Reflection
 - ENGR1702: First-Year Human-Centered Engineering Reflection 1
 - ENGR1703: First-year Human-Centered Engineering Reflection 2
 - ENGR2702: Second-Year Human-Centered Engineering Reflection 1
 - ENGR2703: Second-Year Human-Centered Engineering Reflection 2
 - ENGR3702: Third-Year Human-Centered Engineering Reflection 1
 - ENGR3703: Third-Year Human-Centered Engineering Reflection 2
 - ENGR4704: Senior Year Human-Centered Engineering Reflection 1
 - ENGR4705: Senior Year Human-Centered Engineering Reflection 2

*ENGR1025: Innovation Through Design Thinking counts for this requirement before Fall 2024

Corequisite Courses for the Bachelor of Science (B.S.) HCE Program

- PHYS2200: Introduction to Physics I for Physics Majors
- CHEM1109/CHEM1111: General Chemistry I and General Chemistry I Lab
- Calculus 1 and Calculus 2

Physics Placement

- Students must take PHYS2200 irrespective of their scores on the AP exam.

Calculus Placement

- HCE students should take Calculus 1 and Calculus 2 in their first year and should work with their HCE advisors to determine the appropriate calculus sequence. Students who are exempted from one or both of these requirements must, in consultation with their HCE advisors, identify an equivalent number of math/science credits to take for substitution.

Information for Non-majors

Incoming first-year students must be admitted as HCE majors in the Morrissey College of Arts and Sciences to be part of the undergraduate engineering major. BC students can enroll in HCE courses open to non-majors and reach out to HCE faculty regarding opportunities for research.

English

The study of literature offers students a comprehensive point of view from which they can integrate the diversity of human experiences. Language reveals fascinating truths about the human mind and literature records its preoccupations—intellectual, aesthetic, spiritual, psychological, political, social, historical, and ethical.

The study of literature offers deep schooling in human experience. It is also superb training for any field in which understanding of behavior is valued. Students of literature consistently explore language and the forms of expression, valuable in any future work where precise and effective communication is important. English majors and minors can develop these skills to a considerable degree, and non-majors find that taking even a few well-chosen electives beyond the Core requirement can widen their knowledge of literature and sharpen their linguistic abilities.

The English major at Boston College is designed to introduce students to a wide range of expression in the literary traditions of the past and present. It aims to help undergraduate students develop a strengthened ability to work critically and sensitively with texts in poetry and prose, to write with clarity and grace, and to articulate judgments about literature with an awareness of various critical approaches. English majors will become familiar with some of the major developments in the history of literature in the English language and will have the opportunity to choose from an array of courses covering topics from the medieval period to contemporary cultural studies to a range of transnational literatures.

By the successful completion of the English major at Boston College, students will be able to demonstrate:

- An ability to write clear, coherent, organized, and stylistically correct papers;
- An ability to close-read, interpret, and analyze texts (including poetic texts);
- A knowledge of literary genres and appropriate use of critical terminology;
- A recognition of the historical specificity of literary works and/or other cultural products;
- An awareness that there are a variety of critical approaches to literary and cultural texts.

[English Courses](#)

[English Faculty](#)

[English Website](#)

Information for First-Year Majors and Non-majors

The English Department has primary responsibility for two Core requirements—ENGL1010 First-Year Writing Seminar, taught entirely by English Department faculty, and ENGL1080 Literature Core, taught largely by English Department faculty. Because Core classes are restricted to first-year students, students should plan to take both courses during the first year. Courses offered through the Woods College may not be counted toward the English Core, major, or minor.

ENGL1010 First-Year Writing Seminar

The First-Year Writing Seminar helps students use their writing as a source of learning and a form of communication. Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. In connection with their writing, students read and discuss a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to learn and discuss writing processes and strategies, various genres and rhetorical situations for writing, the evolving drafts of class members, and various forms of conducting and writing research, including an introduction to using the resources at O'Neill Library.

ENGL1080 Literature Core

In this part of the Core program, students explore the principal motives which prompt people to read literature—to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art.

Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres.

Courses for English Language Learners

The department offers Core level courses in language and literature for English language learners. These classes require department permission for registration. Interested students should contact the ELL Director, Lynne Anderson, for more information:

lynne.anderson@bc.edu.

Major Requirements

Students ordinarily begin the English major in their sophomore year, after completing the First-Year Writing Seminar and the Literature Core. In addition to the two 3-credit Core courses, students take 30 credits (in the form of ten 3-credit courses) from the Department's offerings. These must include ENGL2131 Studies in Poetry (3 credits) and ENGL2133 Studies in Narrative (3 credits), usually taken in sequence in the sophomore year. Both courses train students intensively in the close reading of literary texts and in writing with critical awareness about literature.

To provide a deeper understanding of the foundations of literary traditions, English majors are required to take 6 credits in *earlier literatures in English*, to be distributed in the following manner:

- 3 credits in medieval or early-modern literature (before 1700)
- 3 credits in eighteenth or nineteenth-century literature (between 1700–1900)

Students are also required to take a course in Race, Blackness, and Language. This requirement is designed to encourage students to think about how the meaningfulness of literature emerges from the many forces shaping the world as we understand it, focusing on anti-black racism and racial difference. Students will examine issues of race thinking and global relations of power through lenses of ethics, social justice, respect for human dignity, and sustainability.

Students complete the English major by taking 15 credits in elective courses of their choice. Courses offered through the Woods College may not be counted toward the English Core, major, or minor.

During the sophomore year, historical survey courses such as Introduction to British Literature and Culture I and II and the American Literary History sequence may be useful to fill in students' knowledge of the development of English and American literature. Students who have a special interest in American literature are advised to take American Literary History I as a foundation for later courses. Please note that earlier literatures in languages other than English (such as cross-listed courses offered through other departments) will be counted as major electives and not historical distribution requirements. At this point, students should be in a position to begin making their own choices about how they will complete the major requirements, in discussion with their major advisor. They will have many options from among the 30 or more electives the Department offers each semester in English and American literature, in Irish Studies, in writing, in the different genres, and in particular themes.

Seminars

All majors will be required to take one seminar prior to graduation. The seminar, with its small class size and intensive focus, is designed to foster an intimate learning community where students are encouraged not only to study an issue intensively but also to engage actively in an intellectual exchange with a faculty member and a select group of committed peers. These courses are intended mainly for juniors and seniors, and ordinarily, students are advised to have completed both Studies in Poetry and Studies in Narrative and at least one additional

elective before taking a seminar. Students should expect to produce a longer seminar project or research paper (15–20 pages) as well as one or more shorter papers and make at least one oral presentation.

English Minor

The English minor is comprised of six courses (18 credits) beyond the Core requirements in English. These must include:

- Either ENGL2131 Studies in Poetry or ENGL2133 Studies in Narrative
- A historical foundations course (pre–1700 or pre–1900)
- Four electives from the department offerings.

Core and Woods College classes may not be counted toward the minor, though additional courses that fulfill the first two requirements may be counted as electives. Students may count up to two courses from study abroad toward the minor, though they must be approved by the department.

For questions about the English minor, or to declare, please contact Marla DeRosa (marla.derosa@bc.edu).

English Courses for Non-majors

Students majoring in other subjects have always been welcome in English courses for the diversity of viewpoint and variety of knowledge they often bring with them. From the students' point of view, English courses offer the enjoyment of reading good literature; insight into history, culture, and human character; and a chance to polish reading and writing skills.

Interdisciplinary and Related Programs

The English Department is connected to a variety of interdisciplinary programs at Boston College. For details about each program, you can go to the English Department website.

- American Studies Program
- Asian American Studies
- Creative Writing
- Irish Studies
- Journalism
- Medical Humanities

Secondary Education Major

English majors who are also completing Lynch School of Education and Human Development majors must fulfill more specific major requirements to demonstrate a broad range of knowledge within the discipline. In addition to the First-Year Writing Seminar, the Literature Core, Studies in Poetry, and Studies in Narrative, these students must fulfill the following requirements:

- one pre–1700 course
- one pre–1900 course
- one course on Anglophone or Ethnic American Authors
- one course on Women Authors
- one course on the History of Language/Grammar/Linguistics
- one course in Adolescent and Young Adult Literature
- two English electives

To acquire sufficient knowledge across this spectrum, Lynch students should consider taking more general survey courses (e.g., Introduction to British Literature and Culture I and II, American Literary History I, II, and III) to fulfill some requirements.

Students with questions about the ENGL/Lynch requirements should contact Marla DeRosa (marla.derosa@bc.edu).

Creative Writing Concentration

The English Department offers a Creative Writing Concentration that allows certain students to intensify and focus their English majors by taking a series of practice-based writing courses along with their literature courses.

- The creative writing concentrator undertakes a 36-credit English major instead of the usual 30 credits. At least 9 of these credits must be writing workshops in any genre, selected with the help of the student's concentration advisor.

All concentrators also attend monthly social gatherings to read new work and share news about literary activity on campus. English majors may declare the Creative Writing Concentration up through first semester of junior year, after receiving a grade of A- or better in one of the Department's creative writing workshops. The period for declaring the Concentration runs through the end of add/drop week of each semester. Eligible English majors wishing to declare should see Marla DeRosa in Stokes S493.

Summer Courses

A limited number of summer courses may be counted toward the English major or minor.

These include summer English courses taught abroad by our faculty through the Office of International Programs, as well as electives taught through the MCAS English Department.

Please contact Marla DeRosa (marla.derosa@bc.edu) for questions about summer courses.

Information for Study Abroad

English majors should complete (at minimum) the required Studies in Poetry and Studies in Narrative prior to study abroad, while minors should complete at least one of those requirements. Majors will need to have their preliminary application for study abroad approved by the department. Majors may count up to six credits per semester abroad for the major (12 credits maximum); minors may count six credits total. These courses may fulfill historical requirements or major electives. All courses taken abroad must be approved by the department in order to be counted toward the major or minor. A course syllabus is required for major/minor approval. This syllabus must include the writing requirements for the course, and courses cannot be approved without this information. Please note that the number of credits awarded per course is determined by the Office of International Programs.

Students may study abroad for either or both semesters but must contact Marla DeRosa (marla.derosa@bc.edu).

Honors Program

The English Department offers an honors program for English majors. Students admitted to the program will write an honors thesis senior year, either a critical study or a creative project, for 6 credits total toward the major. Students contemplating an honors thesis are encouraged to take a seminar during their junior year. A description of this program is available on the [department website](#).

B.A./M.A. Program

The English Department at Boston College offers a B.A./M.A. Program that allows selected students to earn both a B.A. and an M.A. in English in five years. Enrolled students will start earning graduate credit as a senior, then complete the M.A. in a fifth year of full-time study. The purpose of the program is to allow students a greater opportunity for concentrated study and research training.

Requirements

Students in the B.A./M.A. program must meet all the specific course requirements for the undergraduate major as well as the formal requirements for the M.A., including the completion of Introduction to Advanced Research or its equivalent, demonstrated proficiency in a foreign language, a theory course, and a comprehensive exam. This requires overloading courses in the senior year, when BA/MA students take four courses that count towards the MA, at least two of which must be designated as graduate, or hybrid graduate/undergraduate, courses. Please see the English Department website for detailed information about the requirements specific to this program.

Students interested in the program should consult the [Director of the M.A. Program](#), to discuss whether this version of the M.A. is right for their individual goals. Admission to the program requires a GPA of 3.3 overall and a 3.6 in the English major. The Director will review the student's academic record and, if appropriate, facilitate the application process. Students in the program will not be eligible for TF/TA positions or graduate financial aid. Students in the program will not be charged graduate tuition for the two overload graduate courses taken in the senior year.

How to Apply:

Students must submit applications by March 31 of the junior year. The required application materials are a personal statement, a writing sample, three letters of recommendation, and an official transcript. The application fee will be waived. Please take a look at the [Graduate School of the Morrissey College of Arts and Sciences Admissions](#) page for application instructions and e-mail gsasinfo@bc.edu with any questions on how to upload materials.

Do not send any materials to the English Department.

Environmental Studies

Program Goals

The Environmental Studies Program aims to empower students to be agents of change for a sustainable society. We meet this goal by:

- Providing students with an interdisciplinary knowledge and understanding of the world's environmental challenges from scientific, societal, and cultural points of view.
- Preparing students with a diverse skill set for a wide range of environmentally related careers and/or further graduate study.

[Environmental Studies Courses](#)

[Environmental Faculty](#)

[Environmental Studies Website](#)

Applying for the Environmental Studies Major

Students are accepted into the Environmental Studies major by application only. Applications are evaluated for academic achievement, related coursework, and a personal statement that demonstrates a genuine interest and track record in environmental work. Admission is determined by the Steering Committee of the Environmental Studies Program, which includes faculty drawn from many departments.

The deadline for submitting applications is February 6 during the students' first year. The application form may be found on [Apply for the Major](#) page.

Major Requirements

The ENVS major consists of a minimum of 43 credits, equivalent to at least 14 full-semester courses, as detailed below. ENVS students may choose more than one major, but at least 27 credits for the ENVS major must not be used to fulfill requirements for another major or minor (i.e., 16 credits can be shared). Note that all Boston College majors require at least 27 unique credits, so the number of credits that can be shared will be fewer for majors that require fewer courses, such as most departmental majors (i.e., if a major requires 30 credits, only 3 can be shared).

1. ENVS 2240 Ideas and Practices in Environmental Studies (3 credits)

This course is offered in the fall semester for the new cohort of ENVS majors (sophomores). Ideas and Practices in Environmental Studies provides an introduction to the history, ideas, and practices of the field of environmental studies for new ENVS majors. This interactive course will draw on cross-and inter-disciplinary perspectives from the natural sciences, social sciences, and humanities to explore different ways of thinking about complex environmental topics.

2. Environmental Systems courses (6 credits):

- EESC2201 Environmental Systems: The Human Footprint (2 credits)
- EESC2202 Environmental Systems: Ecosystems (2 credits)
- EESC2203 Environmental Systems: Water Resources (2 credits)
- EESC2204 Environmental Systems: Carbon Cycle (2 credits)
- EESC2205 Environmental Systems: Climate Change (2 credits)
- EESC2206 Environmental Systems: Oceans (2 credits)
- EESC2207 Environmental Systems: Earthquakes (2 credits)
- EESC2208 Environmental Systems: Quantitative Methods (2 credits)

These are a series of 2-credit half-semester courses that introduce students to the basic concepts of environmental science from a variety of perspectives and professors, with the specific goal of providing students with a foundation for further interdisciplinary study of

environmental issues. Students can take one or more of these courses in any given semester. Approved substitutions include EESC1167 for EESC2201, EESC1170 for EESC2203, EESC1174 or EESC1505 for EESC2205, and EESC1157 for EESC2206.

3. One Environmental History Foundation Course (3 credits)

- HIST2406 This Land Is Your Land: US Environmental History
 - or HIST 1710 Nature & Power: Making the Modern World Core EQ
 - or HIST 4703 Environmental Histories of Water
 - or HIST 4705 In the Eye of the Hurricane: An Environmental History of Latin America

Students are encouraged to fulfill the history requirement by their sophomore year. A historical understanding of how humans have related to the natural environment allows students to grasp both the specificity and the contingency of our contemporary ideas about the environment — a core intellectual resource for our work.

4. One Environmental Sociology Foundation Course (3 credits)

- SOCY3562/ENVS3562 Environmental Sociology

Students are encouraged to fulfill the sociology requirement by their junior year. Environmental sociology is a core intellectual resource for thinking through persistent problems in the socially constructed world (like poverty, racism, and migration) and the complex ways these human issues impact and are impacted by the environment and our changing climate.

5. ENVS3360 Research Methods in Environmental Studies

- ENVS3360 Research Methods in Environmental Studies

Students take this course as juniors to encounter and understand a variety of ways that interdisciplinary scientists formulate questions, collect and analyze data, and draw conclusions within environmental studies research. As a cohort, students develop research skills that they will go on to employ in meeting their senior research requirement.

6. One elective (3 credits)

The elective can be used to deepen understanding of the student's concentration, or to encounter a novel perspective in the environmental field.

7. Senior Research Seminar (4 credits) or Senior Thesis (6 credits)

In their senior year, all ENVS students formulate and carry out a research project. This requirement can be met in one of two ways: through enrollment in the senior research seminar or through completion of a senior thesis.

- Senior Research Seminar (4 credits)
 - ENVS4941 Senior Research Seminar [Fall]
 - ENVS4942 Senior Research Seminar II [Spring]

This cohort experience brings seniors together weekly with a faculty instructor to undertake a small group research project over two semesters.

- [Senior Thesis](#) (6 credits)
 - ENVS4951 Senior Thesis I [Fall]
 - ENVS4952 Senior Thesis II [Spring]
 - ENVS4961 Senior Honors Thesis I [Fall]
 - ENVS4962 Senior Honors Thesis II [Spring]

Alternatively, students can undertake an independent research project under the supervision of a faculty advisor who signs on to the project in spring of the junior year.

8. Concentration (18 credits):

Biodiversity Conservation

Two Social Science Courses:

- ENVS3354 Wildlife and Society
- ENVS3324 Conservation Policy and Governance
- SOCY3360 Animals and Society

Two Ecology Courses:

- BIOL1440 Sustaining the Biosphere Core or BIOL 1520 Biodiversity Connections: Biodiversity, Humans and Environment
- BIOL2010 Ecology and Evolution Core

One Upper-Level Ecology Course:

- BIOL4030 Deep Sea Biology
- BIOL4130 Ecology in a Changing Climate
- BIOL5050 Evolution and Development
- BIOL4450 Behavioral Ecology

One Humanities Course:

- ENGL1724 Nature and Power: Reading the American Place Core
- ENGL2202 Beast Literature
- ENVS2445 The Vegetative Soul: The Hidden Life of Plants
- HIST4222 How Animals Saved the World
- HEO2231 Bible and Ecology
- THEO3000 Theological Bioethics: From the Basics to the Future

Climate Change and Societal Adaptation

One Introductory Environmental Science Course:

- EESC1720 Climate & Storytelling in the Age of Climate Change
- EESC1174 Climate Change and Society
- EESC1501 Global Implications of Climate Change

One Sociology or History Course:

- SOCY1031 Society and Environmental Transformations
- SOCY1501 Global Implications of Climate Change
- SOCY1509 Planet in Peril
- HIST1505 Planet in Peril
- HIST1507 Powering America: Energy, Tech, Environment
- HIST1842 Atlantic World and Environmental Change

Two Upper-Level Environmental Science Courses:

- EESC3310 Earth System Science and Sustainability

- EESC3396 The IPCC Scientific Assessment
- EESC4464 Environmental Data Exploration and Analysis
- EESC5535 Coastal Processes
- EESC5599 Climate Change Debates
- ENVS3340 Alternative Energy

Two Upper-Level Social Sciences or Humanities Courses:

- ARTS2207 Urban Design for Complexity and Sustainability
- ECON3391 Economics of Energy and the Environment
- ENVS3355 Sustainable Cities
- INTL2260 International Environmental Science and Policy
- PHIL3690 Energy Justice: Ethics, Economics, and the Environment
- PHIL5515 How to Save the World: Ethics of Climate Change
- POLI2531 Energy Politics in U.S., Comparative and Global Perspective

Food and Water Sustainability

Three Courses on Agricultural systems and Watersheds:

- EESC3310 Agroecology
- ENVS3315 Sustainable Agriculture
- EESC1170 Rivers and the Environment

One Environmental Science Course:

- EESC2297 Environmental Hydrology
- EESC3380 Environmental Oceanography
- EESC4400 Geomorphology and Landscape Change

One Social Science Course:

- COMM4470 Communication, Capitalism, Consumerism
- ENVS3345 Environment and Public Health
- ENVS3356 Seminar in Environmental Law
- ENVS3331 Geopolitics of Water

One Humanities Course:

- ARTS2207 Urban Design for Complexity and Sustainability
- HIST2044 A Material and Cultural History of Food in China
- HIST4254 Century of Famine
- HIST4702 Feast or Famine
- HIST4703 Environmental Histories of Water
- PHIL5534 Environmental Ethics
- THEO2231 The Bible and Ecology
- THEO5429 Theology and Ecology

Environmental Communication

Craft Courses (at least 6 credits drawn from the courses listed below):

- ARTS1161 Photography I or ARTS1163 Introduction to Digital Photography
- COMM2204 Digital Media Fundamentals or COMM2221 Digital Media Field Production

- COMM2213 Fundamentals of Audio I
- ENGL4201 Science Writing
- FILM1171 Filmmaking I
- FILM2230 Video Art
- JOUR2225 Journalism and New Media
- JOUR2232 Investigative Journalism
- JOUR2246 Podcasting: The Art and Craft of Digital Storytelling
- JOUR2261/ENVS2261 Environmental Journalism: Science, Society, Solutions

Critical Courses (at least 6 credits drawn from the courses listed below):

- ARTH/ENVS4316 History of Scientific Illustration
- COMM2203 Image as Communication
- COMM2265 Theory, History and Practice of Talk Media
- COMM2278 Social Media
- COMM3377 Visual Communication Theory
- COMM4470 Communication, Consumerism, Capitalism
- ENGL3358 The Great Acceleration: Contemporary Fiction and Climate Change
- ENGL4028 Climate Fiction
- ENGL4280 Beast Literature
- ENGL6045 Seminar: Animal Worlds in the Middle Ages

Environmental Entrepreneurship

One Course on Micro/Macroeconomics:

- ECON1101 Principles of Economics Core

Two Environmental Economics Courses:

- ECON2212 Geographic Information Systems for Planning and Decision-Making
- ECON2278 Environmental Economics OR ECON2277 Environmental Economics & Policy
- ECON3348 Economics of Electricity Markets
- ECON3391 Economics of Energy & the Environment (ECON2201 and ECON2228 are prerequisites)

One Sociology Course:

- SOCY3322 Consumption, Health, and the Environment
- SOCY3661 Urban Sociology

One Humanities Course:

- HIST2703 Is All Commerce Capitalism?
- HIST2702 Colonial Pasts/Global Presents
- PHIL5901 The Ethics of Capitalism
- SCHI3200 The Ethics of Sustainability and the Future of the Common Good

One Management Course:

- BSLW3345 Managing for Social Impact & the Public Good
- MGMT2137 Managing Diversity
- MGMT2139 Social Innovation & Entrepreneurship
- MGMT2265 Globalization, Culture, & Ethics

Environmental Health

One Environmental Health Course:

- ENVS3345 Environment and Public Health

One Ethics Course:

- PHIL3690 Energy Justice: Ethics, Economics, and the Environment
- PHIL5534 Environmental Ethics
- THEO3223 The Ethics of Global Public Health and the Common Good

One Nursing Course:

- NURS3210 Contemporary Issues in Public Health
- NURS5350 Global Health Care: Meeting Challenges and Perspectives

One Biology Course:

- BIOL1480 Pathogens and Plagues
- BIOL3090 Foundations of Microbiology (requires BIOL2000)

One History Course:

- AADS4485/HIST4485 History of Medicine and Public Health
- HIST4741 Opium Past and Present

One Social Science Course:

- ENVS2246 Earth Ethics: Morality, Religion, and Social Justice
- ENVS2501 State of Affordable Housing in the States
- NURS1210 Public Health in a Global Society
- PHCG2130 Global Public Health Law
- PHCG4140 Children's Health and the Environment
- SOCY1002 Introduction to Sociology for Healthcare Professions
- SOCY1078 Sociology of Health and Illness
- SOCY3322 Consumption, Health, and the Environment

Environmental Justice and Policy

One Introductory Environmental Law & Policy Course:

- ENVS/UNAS2256 Environmental Law and Policy

One Political Science Course:

- POLI 2441 Comparative Politics of Development
- POLI 2446 Natural Resource Politics
- POLI 2531 Politics of Energy and Climate in US and International Perspectives

One Upper-Level Environmental Law & Policy

- ENVS3324 Conservation Policy and Governance
- ENVS3356 Seminar in Environmental Law

- ENVS4408 Democracy and the Environment

One International Studies Course:

- INTL2230/ENVS2230 Geographies of Nature and the Environment
- INTL3340 Environmental Politics of the Middle East

One Sociology Course:

- SOCY1072 Inequality in America
- SOCY1501 Global Implications of Climate Change Core

One Course on Environmental Justice:

- ENVS3328 Global Environmental Justice and Conservation
- PHIL3690 Energy Justice: Ethics, Economics, and the Environment
- SCHI3200 The Ethics of Sustainability and the Future of the Common Good
- SCHI5020 Exploring the Climate-Energy-Sustainability-Policy Nexus
- SOCY/AADS3400 Food Justice Across the African Diaspora
- SOCY3346 Environmental Justice

Minor Requirements

The ENVS minor consists of 19 credits, with at least 15 credits being used solely for the ENVS requirements.

A. EESC2201 Environmental Systems: The Human Footprint (plus lab; 2 credits)

B. One of the following courses (plus lab; 2 credits):

- EESC2202 Environmental Systems: Ecosystems
- EESC2203 Environmental Systems: Water Resources
- EESC2204 Environmental Systems: Carbon Cycle
- EESC2205 Environmental Systems: Climate Change
- EESC2206 Environmental Systems: Oceans
- EESC2207 Environmental Systems: Earthquakes
- EESC2208 Environmental Systems: Quantitative Methods

C. Two foundation courses (6 credits)

One in Research Methods:

- ENVS3360 Research Methods in Environmental Studies

One in the Social Sciences or Humanities:

- ECON2277 Environmental Economics and Policy
- ECON2278 Environmental Economics
- ENVS/UNAS2256 Environmental Law and Policy
- HIST2406/ENVS2406 The Land Is Your Land: U.S. Environmental History
- INTL2260 International Environmental Science and Policy
- MGMT2145 Environmental Management
- SOCY1031 Society and Environmental Transformations
- SOCY1501 Global Implications of Climate Change

- SOCY1509 Planet in Peril: History and Future of Human Impact
- SOCY2200 Statistics (or a different statistics course)
- SOCY3562 Environmental Sociology
- PHIL3690 Energy Justice: Ethics, Economics, and the Environment
- PHIL5515 How to Save the World: Ethics of Climate Change

D. At least 6 credits (two courses) of electives.

At least 3 credits must be from courses numbered 3000 and above.

E. ENVS4943 Environmental Seminar, a 3-credit senior seminar offered every spring semester

To register for the minor, contact the Environmental Studies Program at envstudy@bc.edu, or stop by the program office in Devlin 213. For more information see the program website at <https://www.bc.edu/content/bc-web/schools/mcas/sites/envstudies.html>.

Information for First-Year Students

First-year students who are considering applying to become Environmental Studies majors should consider taking University Core courses with an environmental focus.

Information for Study Abroad

ENVS majors are encouraged to take advantage of study abroad opportunities. Studying outside of the U.S. provides a global perspective on environmental and sustainability issues and educational opportunities not available at BC. ENVS students are allowed 3–6 credits (one to two courses) per semester abroad to count toward the major or minor requirements. If a student is doing a program specifically designed for Environmental Studies, more than 6 credits (two courses) may be approved. *Students must meet with their academic advisor and the ENVS Director or Associate Director prior to leaving for their study abroad experience.*

For further information see the program website at bc.edu/envstudies, contact the Environmental Studies Program at envstudy@bc.edu, or stop by the program office in Devlin 213.

History

The Department of History offers the undergraduate student a variety of courses in American, European, African, Asian, Latin American, and Middle Eastern history. Studying history equips students with the tools to understand the complexities of this modern, globalized world. As a history major or minor, students develop critical thinking skills, learn to write persuasively, and deepen their cultural awareness. While some graduates go on to study history at a graduate level, others thrive in professions such as law, business, finance, government, journalism, and teaching.

[History Courses](#)

[History Faculty](#)

[History Website](#)

Major Requirements

Class of 2024

- Two-semester US History survey (US History I & II (HIST 2401 2402))*
- The Study and Writing of History (3000-level classes for history majors only)
- One free elective (2000- or 4000-level)
- Two LAMA (Latin America, Asia, Middle East, Africa) electives (2000- or 4000-level)**
- Three+ upper-division electives (4000-level)
- Senior Honors Thesis or Senior Colloquium or Making History Public (5000-level classes for history majors only)

**Majors in the Class of 2024 who have not taken the US History survey should take two US History electives (2000- or 4000-level) instead.*

***LAMAs taken at the 4000-level can co-count for the upper-division requirements, as long as the student has a total of ten history (non-Core) history courses*

Class of 2025 and After

- One US History elective (2000- or 4000-level)
- The Study and Writing of History (3000-level classes for history majors only)
- Two free electives (2000- or 4000-level)
- Two LAMA (Latin America, Asia, Middle East, Africa) electives (2000- or 4000-level)*
- Three+ upper-division electives (4000-level)
- Senior Honors Thesis or Senior Colloquium or Making History Public (5000-level classes for history majors only)

**LAMAs taken at the 4000-level can co-count for the upper-division requirements, as long as the student has a total of ten history (non-Core) history courses*

Of the 30 required credits for the major, students may take a maximum of 12 credits abroad, no more than 6 of which may be upper-division credits. Likewise, students may earn a maximum of 6 credits for the major through summer school. However, at least 18 credits, including The Study and Writing of History and 6 of the upper-division credits, must be taken at Boston College during the regular academic year.

Minor Requirements

The History minor consists of five courses for a total of 15 credits. Please note that each requirement is separate. There is no co-counting.

- Two upper-division electives (4000-level)
- One LAMA (Latin America, Asia, Middle East, Africa) elective (2000- or 4000-level)
- Two free electives (2000- or 4000-level)

Core courses do not satisfy minor requirements.

Study Abroad for Major and Minor Credit

History majors may take as many as four courses (12 credits) abroad for major credit (including a maximum of two courses—6 credits—for upper-division credit). Six history courses (18 credits) beyond the Core, including The Study and Writing of History, must be taken at Boston College during the regular academic year. Students should complete the Study and Writing of History requirement before studying abroad.

History minors may take up to two courses (6 credits) abroad for minor credit, including one upper-division course worth 3 credits.

Students seeking major or minor elective credit need only show that they passed a course offered in a history department. Typically, the department does not give upper-division credit for history courses taken abroad. Students seeking upper-division credit should present the course syllabus and the paper(s) written for the course to the Director of Undergraduate Studies after they have completed the course.

Students who are contemplating a senior Honors thesis and who will be abroad during the normal application process in the spring of their junior year are strongly urged to plan ahead. They should try to establish a thesis topic and identify a faculty member willing to supervise their work before departing and verify that they will be able to be in e-mail contact with their thesis advisor while abroad. They should be aware that the deadline for submission of applications is in April of their junior year. For additional information, they should consult with the director of the History Honors Program early in the semester prior to their departure for study abroad.

For additional information on foreign study for history majors, please visit the [Foreign Study](#) page.

For more information on the application of these guidelines to the history minor, please visit [Minor in History](#) page.

If you have further questions about study abroad, please contact Professor Charles Gallagher. For questions about the History Honors Program, contact Professor Mike Glass. For questions about History Core courses, contact Professor Ling Zhang. For questions about the History major, minor, or general questions about the undergraduate program, please contact Professor Penelope Ismay.

Information for First-Year Majors and Non-Majors

Information about the History Core

The University History Core requirement consists of two courses in history from late medieval times to the present. Students must take two halves of a sequence: History Core I, which covers c. 1500–1800; and History Core II, which covers c. 1800 to the present.

History Core courses examine the complex historical processes that structure the modern world. These courses introduce students to key historical concepts, methods, and controversies, and examine how the past shapes the present and vice versa. Covering several centuries of time and multiple cultural contexts, all History Core courses trace the political, social, economic, and cultural changes that created the modern world. As part of the Core Curriculum, these courses seek to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives. Through the History Core, students will learn how to (1) use primary sources to interpret the past, and (2) explain change over time using those sources.

Taught by historians who specialize in distinct areas, eras, and approaches, History Core courses vary in their emphases on different parts of the world. The History Core currently includes courses focused on Asian, Atlantic, European, Latin American, African, and global experiences. Students are not restricted to taking a History I and a History II course in the same subject. For example, if a student takes History I in "Asia and the World," the student can follow that with "Modernization II" for their History II requirement. The key is to take one course marked History I and one marked History II.

Advanced Placement and Study Abroad for the Core

Students who scored a 4 or 5 on the European History or World History Advanced Placement exams fulfill the History Core and are invited to take a history elective.

Students who would like to apply foreign study courses for Core credit must get permission from the Director of the Core, and they are strongly urged to do so before going abroad. In order for a course taken abroad to fulfill the History Core requirement, it must cover the time periods outlined above (c. 1500–1800 for History Core I, and 1800 to the present for History Core II) and examine more than one country, surveying historical developments in a global or world-regional framework. Similar guidelines apply to summer classes and courses transferred from a previous institution. At least one of the Core courses must be taken at Boston College.

For further information about the History Core, please visit [Core Requirements](#) page.

Interdisciplinary Programs and Minors (MCAS)

In addition to the areas of major study offered by individual departments, a variety of special programs are available. All of them are designed to provide a coherent grouping of courses drawn from various disciplines and focused around a specific theme. Through such programs, a student can integrate or enrich an academic program through completing a minor or developing an independent major.

Independent Major

Under usual circumstances, students are advised to follow the formal educational programs offered by departments. In rare instances, for students with special interests that cannot be satisfied in a regular major, double major, or a combined major and minor, the Educational Policy Committee will approve an interdisciplinary Independent Major. Students who wish to apply for an Independent Major must normally have achieved a minimum 3.5 GPA. The student must plan, with the aid of a faculty advisor, a program of 36 credits (ordinarily twelve courses), thirty of which must be in upper-division courses. These will extend over no more than three departments and will be selected in accordance with a clearly defined unifying principle. This program should be equal in depth and coherence to a typical departmental major and should include a plan for a final project or paper that demonstrates the intellectual coherence of the Independent Major and for ongoing assessment of the program by the student and the advisor. Each proposed major should be submitted to the Dean's Office before March 1 of the student's sophomore year. The Dean will then present it to the Educational Policy Committee for approval. An Independent Major will ordinarily be the student's only major.

Interdisciplinary Minors

An interdisciplinary minor in the Morrissey College of Arts and Sciences must consist of at least 18 credits (typically six, 3-credit courses) and must include either a required introductory course or a concluding seminar or project. (Note: some programs require both.) The minor should aim for a coherent form appropriate to the subject matter and offer courses that give students a definite sense of movement—from a beginning to a middle and an end, from introductory to advanced levels, or from general to specialized treatments.

Students must select at least three of the courses from three different Morrissey College of Arts and Sciences departments. At least 15 credits used for the minor cannot be used to fulfill requirements in another major or minor. With the approval of the program, students may share one course between the interdisciplinary minor and their major or another minor. For specific program requirements see the individual program descriptions below.

African and African Diaspora Studies

The African and African Diaspora Studies Program (AADS) considers the history, culture, and politics of Africans on the continent and African-descended peoples in the U.S., the Caribbean, South America, Europe, Asia, and the Middle East. Covering vast historical periods and geographies, AADS acquaints students with the multiplicity and diversity of the African Diaspora and the world in which we all live. Using interdisciplinary and comparative approaches, the program draws on a broad range of methodologies in English, history, sociology, philosophy, theology, communication, and theater.

For more information on the African and African Diaspora Studies program, visit the following:

- African and African Diaspora Studies catalog web page
- or the [African and African Diaspora Studies website](#)

American Studies

American Studies is an interdisciplinary program that brings together faculty from various departments to teach a wide range of approaches to American culture past and present. Thematic emphases include race and ethnicity; gender, sexuality, and culture; cultures of cities; society and subcultures; popular culture and media; law, politics, and culture; and America and the world.

The program is directed by Christina Klein of the English Department. Participating faculty come from English, History, Art History, Sociology, African and African Diaspora Studies, and Political Science, among other departments.

Eighteen credits are required for the minor. All students must take ENGL2278 American Culture: Engaging Difference and Justice when beginning the minor and ENGL5513 American Studies Senior Seminar during their senior year. In addition, nine credits must be clustered in a common area of concentration chosen by the student in consultation with the director or assistant director. Courses used for fulfilling the minor must come from at least two different departments outside the student's major.

For further information on the American Studies minor, e-mail american.studies@bc.edu, or visit the American Studies website at bc.edu/amstudies.

Ancient Civilization

The interdisciplinary minor in Ancient Civilization introduces students to the history, literature, art, philosophy, and culture of ancient Greece and Rome. Students explore the world of the Greeks and Romans by reading primary texts in English translation and by studying their art and archaeological remains. Studying the Latin or Greek languages is not required. The minor consists of six courses (18 credits or more), two required and four electives:

- 3 credits in Greek History or Civilization and 3 credits in Roman History or Civilization, drawn from the following list. These courses, offered every other year, serve as a general overview of the field and an introduction to the minor.
CLAS2205/HIST2201 Greek History OR CLAS1186 Greek Civilization
CLAS2206/HIST2205 Roman History OR CLAS2262/ARTH2262 The City of Rome
- 12 other credits, chosen after consultation with the director, from available offerings in Classics and other departments in the areas of literature, philosophy, religion, art and archaeology, history, and linguistics; however, courses in the Greek and Latin languages do not normally count for the minor.

A list of the courses that are available each semester from the various departments and that can count for the minor will be published at registration time. Interested students should contact Professor Mark Thatcher of the Classical Studies Department, Stokes Hall 245S, 617-552-1807, or visit the Classical Studies website at bc.edu/classics.

Asian Studies

The [Asian Studies](#) program offers students a rich curriculum in the arts and literatures, history, philosophy, religion, and contemporary affairs of East Asia, South Asia, and Central Asia. It rests on three pillars:

- an emphasis on regional and transnational relations
- the integration of different disciplinary approaches
- language study

Students take a minimum of 18 credits to fulfill the minor, 15 of which may not simultaneously be counted towards the Core or other major/minor requirements. The minor begins with an introductory survey course on *Asia as a world region* from the vantage point of a particular discipline (such as art, literature, history, or philosophy) and concludes with a senior capstone course that approaches a particular topic relevant to the study of Asia from an *interdisciplinary perspective*. Along the way, students have ample opportunity to hone their interdisciplinary skills and global outlook through a wide range of lower and upper level electives involving different departments. Although no more than an intermediate proficiency in an Asian language is required (the same as the University Core requirement), further language study is encouraged. All minors must meet with the Director when they declare their minor, typically in their sophomore year. They must also meet with the Director prior to choosing the senior capstone course.

Summary of minimum requirements (18 credits):

1. Introductory course on Asia as a world region (3 credits)
2. Intermediate proficiency in an Asian language (3 credits)
3. Two to four electives (6–12 credits) from the list provided
4. Senior capstone course (3 credits)

Students are invited to take full advantage of the Distinguished Lectures Series in Asian Studies as well as other Asian Studies-sponsored campus events and are encouraged to study abroad in Asia. Our faculty provide many different resources related to advising, scholarships, and internship opportunities.

For further information, consult the [Asian Studies website](#) or contact the director at asian.studies@bc.edu.

Catholic Studies

The interdisciplinary minor in Catholic Studies at Boston College seeks to develop an intellectual and academic approach to Catholicism which does justice to the full human reality, integrity, and pluralism within this major world religious tradition. Since Catholicism comprises more than a religious institution, a set of moral or ritual practices, a body of doctrines, or individual and communal experiences, no one discipline or several disciplines functioning separately can properly understand it from the vantage point of its lived experience as a culture.

The Catholic Studies minor provides students with the opportunity to explore the Catholic intellectual tradition. The minor emphasizes the richness of Catholic philosophical and theological systems, artistic and cultural expressions, historical evolution (including internal and external moments of contestation), and approaches to social analysis, economic systems, and the natural sciences, in order to appreciate the vision and values which emerge from this tradition.

Requirements:

Six approved 3-credit courses or a total of 18 credit hours:

- 18 credit hours selected from the three Catholic Studies clusters: The Catholic Imagination, Catholicism in Time and Space, and Catholic Social Thought.
- Upon petition, electives and other courses may be counted for the minor if the major research paper course is completed on a Catholic topic.
- In many cases, electives and other required courses can be petitioned for inclusion in the Catholic Studies Interdisciplinary minor based on the Catholic content of the course.
- Students are strongly encouraged to take THEO1401 Engaging Catholicism, which will count towards their Christian Theology (CT) credit in Core theology. THEO1401 is a 3-credit course and will count for Core theology credit as well as the “basis course” for the Interdisciplinary Minor in Catholic Studies.
- Depending upon enrollment numbers in the minor, a concluding 3-credit research seminar will be offered which will focus on texts dealing either with the enculturation of Catholicism in different geographical/regional locations (e.g., Asia, Latin America, Africa, Oceania, Irish-American, Italian-American, Latinx, Black, and Indigenous), or a Catholic theme that is approached from several disciplinary perspectives and across historical periods (e.g., Catholic practices of asceticism in art, music, literature, and theology). This seminar will offer the student the opportunity to research, write, and present a senior project that thematically integrates what has been learned in the minor. The seminar is facilitated by a member of the Catholic Studies advisory committee. It is envisioned that the seminar presentations will become an occasion for creating intellectual community among Catholic Studies minors and faculty advisors.

Further information is available from the interim Director, Professor Liam Bergin, Theology Department, Stokes Hall N449, 617-552-3588, liam.bergin@bc.edu or the [Catholic Studies website](#).

Data Science

The Data Science Minor at Boston College is an interdisciplinary program emphasizing human-centered applications of data analysis and modeling for the common good. The minor has been designed to be flexible and accessible for students across a variety of disciplines; no previous programming experience is required, and students will be able to construct a 6-course pathway that connects data science to their application area of interest. The minor is open to all undergraduate students at Boston College.

The 18-credit minor includes three required courses that introduce students to foundational concepts in programming, mathematics, data processing, data exploration, and modeling:

- CSCI 1090 Data Science Principles (no prerequisite)
- MATH 2250 Mathematical Foundations of Data Science (prerequisite: Math 1101 or AP Calculus AB)
- CSCI 2291 Data Science: Methods and Applications (prerequisite: CSCI 1090 and MATH 2250)

Students will be eligible to apply for entry to the Data Science Minor program after the completion of CSCI 1090 and MATH 2250. It is recommended that students maintain a **minimum GPA of 3.0** (averaged across these 2 courses) for entry into the minor. The application consists of a **degree audit** and completion of a **data science minor pathway form** listing the focus area of the student's pathway, the 2 elective courses they will take, and 2 additional courses outside of the minor that support the pathway plan. For students to have time to complete the requirements of the degree, **students must apply for entry into the minor before the end of their sophomore year**. There will be two deadlines for applications each year aligned with registration: November 20 in the Fall and April 20 in the Spring. Notifications on acceptance will be made in December and May (once degree audits can be reviewed).

Consistent with the university's academic regulations, students must have at least 15 credits in the data science minor that are not used to fulfill requirements for another major or minor or a Core requirement. At most 3 credits (1 course) can be "double-counted" towards the minor and the student's major requirements.

For further information or to receive a data science minor pathway form as part of the application, please email the program director, Professor George Mohler, at mohlerg@bc.edu.

East European and Eurasian Studies

The interdisciplinary minor in East European and Eurasian Studies encompasses faculty and courses from across the University and spans the entire region east and southeast of western Europe, from central and eastern Europe to southeastern Europe, Russia, Ukraine, Belarus, the Caucasus, and Siberia. The minor in East European Studies concentrates on the multilingual, multicultural, and multireligious legacy of Slavic and Eastern European nations and countries. Students who complete the minor will work toward proficiency in a Slavic and/or East European language (e.g., Russian, Polish, Bulgarian, etc.) related to the region and attain valuable knowledge, experience, and professional skills. The Program prepares students for careers in diplomacy, journalism, law, military, business, government, and social service, as well as graduate, academic, or professional study.

Further information is available from the Director, Professor Maxim D. Shrayer, Department of Eastern, Slavic, and German Studies, Lyons 210, (shrayerm@bc.edu). Students may also consult the [Program's website](#).

Environmental Studies

The Environmental Studies minor uses an interdisciplinary approach to understand the science and policy of the Earth's environmental challenges and is designed to complement any undergraduate major.

The goals of the Environmental Studies minor are to provide undergraduate students with: (1) an awareness of the scientific, political, and cultural aspects of the world's environmental problems and potential paths toward sustainable solutions; (2) a background for environmentally related careers in business, education, law, policy, or research; and (3) preparation for graduate study.

For more information on the Environmental Studies program, visit the following:

- Environmental Studies catalog web page
- or the [Environmental Studies website](#)

Faith, Peace, and Justice

The Faith, Peace, and Justice minor offers students the opportunity to explore, in an interdisciplinary manner, how their own serious questions about faith, peace, and justice are related to concrete work for peace and justice in our world. The goals of the Faith, Peace, and Justice Program are to (1) help undergraduate students acquire skills in the social scientific analysis of challenges for justice and peace, (2) gain a solid grasp of the ethical principles and theories of justice that pertain to these issues, (3) become agents of social change that know

how to formulate public policy or transform unjust structures in order to solve these problems, and (4) implement creative methods for conflict resolution appropriate for their particular issues.

To achieve these goals, each student is required to take the introductory course for the minor, THEO2160/PHIL1160 The Challenge of Justice and, in the second semester of their senior year, UNAS4942 Faith, Peace, and Justice Senior Seminar. In addition, the student selects or develops an area of concentration focused on a particular concern for justice and peace. With the advice and approval of the Faith, Peace, and Justice Director, the student takes a cluster of four elective courses, from at least three different academic disciplines, that addresses the area of concentration. These four elective courses serve as the foundation for the student's writing project in the FPJ Senior Seminar. In total, eighteen credit hours are required for the minor.

For further information or to register for the Faith, Peace, and Justice minor, see the Director, Professor Joshua R. Snyder, Ph.D., Stokes 453N or visit the program website at bc.edu/fpj.

German Studies

The interdisciplinary minor in German Studies is one of two minors offered by the Department of German Studies. This program aims to provide a comprehensive understanding of German-speaking civilization and its place in today's world. Students choose the interdisciplinary minor for its flexibility in taking courses tailored to their interests across departments and may complete the entire minor with courses taught in English. German Studies minors are eligible to apply for popular internships, which place Boston College students with companies in Germany or Austria every summer.

For more information on the minor in German Studies program, visit the following:

- Eastern, Slavic, and German Studies catalog web page
- or the [Eastern, Slavic, and German Studies website](#)

Global Public Health and the Common Good

Boston College offers an undergraduate minor and a range of courses in Global Public Health and the Common Good through the Schiller Institute for Integrated Science and Society. Our entry-level courses are open to students from across Boston College and are designed to introduce students in any field of study to core concepts in public health.

For more information on the Global Public Health and the Common Good program, visit the following:

- Schiller Institute for Integrated Science and Society catalog web page
- or the Global Public Health and the Common Good pages on the CSON website:
 - [Global Public Health and the Common Good major](#)
 - [Global Public Health and the Common Good minor](#)

International Studies

The International Studies Program offers a flexible and rigorous interdisciplinary undergraduate major and minor in the Morrissey College of Arts and Sciences that develops keen analytical skills and ethical reasoning amidst complex global dynamics.

For more information on the International Studies program, visit the following:

- International Studies catalog web page
- or the [International Studies website](#)

Irish Studies

Founded in 1978, the Irish Studies Program provides an interdisciplinary approach to the study of Irish culture and society. Our faculty includes internationally recognized scholars whose influential publications and professional commitment distinguish them as leaders in the field of Irish Studies. Undergraduate and graduate courses alike address social and economic history, literature, art, film, music, and the Irish

language. The Irish Studies program also offers extensive public programs including a comprehensive lecture, symposia, and renowned music series. Faculty routinely collaborate with the McMullen Museum to present groundbreaking exhibits and have developed public programming, as well as undergraduate and graduate seminars, to complement exhibits.

Students must successfully complete 18 credits in approved Irish Studies courses, which must be drawn from more than one discipline and designated as appropriate by the Irish Studies program advisor. Only one course may be “double counted” toward both a major and minor.

Please contact Irish Studies at 617-552-3938 to arrange curriculum planning assistance. A listing of Irish Studies-approved courses is posted on the [Irish Studies Courses](#) web page.

Students pursuing the minor are encouraged to take advantage of partnerships that the Irish Studies program and BC’s Global Engagement have forged with the National Universities of Ireland at Galway and Maynooth, University College Cork, University College Dublin, Trinity College Dublin, and Queen’s University Belfast. It is important to note that only two courses taken abroad in any given semester may be applied to the Irish Studies minor.

Contact: Joan Reilly, joan.reilly@bc.edu.

Islamic Civilization and Societies

The interdisciplinary major and minor in Islamic Civilization and Societies encompasses faculty and courses from across the university. The program prepares students for careers in diplomacy, journalism, business, government, social service, as well as graduate academic or professional study. Students who complete the major will attain proficiency in Arabic or another language related to the region, along with valuable skills and broader horizons that only an interdisciplinary major can provide.

For more information on the Islamic Civilization and Societies program, visit the following:

- [Islamic Civilization and Societies catalog web page](#)
- or the [Islamic Civilization and Societies website](#)

Jewish Studies

The Jewish Studies Program seeks to examine the multiple dimensions and complexities of Jewish civilization throughout its broad chronological and geographical range. In so doing, the program contributes to Boston College's efforts to internationalize and enrich its curriculum by creating a space for reflection on an ethnically and religiously diverse campus. Jewish Studies as an academic discipline draws upon almost every area in the humanities and social sciences in order to understand the myriad expressions of Jewish civilization over thousands of years.

The Minor in Jewish Studies consists of a total of six three-credit courses, including one foundation course “Introduction to Jewish Culture and Civilization” and five electives. Students are encouraged to fulfill Core classes that can also be used for the minor (Theology, Cultural Diversity, Literature, History, and Arts Cores). All Hebrew classes used for the MCAS language requirement can be applied to the minor. As an interdisciplinary minor, students will end up with coursework in at least three Morrissey College of Arts & Sciences departments. Only one course of the six can be used to fulfill requirements in another major or minor.

For additional information or to sign up for the minor in Jewish Studies, contact the program co-director, Professor Matt Sienkiewicz, matt.sienkiewicz@bc.edu.

Journalism

The Journalism minor at Boston College is an interdisciplinary program designed to bring the liberal arts into direct, ongoing conversation with the wider contemporary world. Students from all majors and schools are invited to apply to this dynamic minor that combines craft skills with a critical understanding of the history and traditions of journalism.

The six-course minor includes the following:

- Introduction to Journalism, to be taken as early as possible during the course of study;
- One “Craft” course (i.e., Investigative Journalism, Feature Writing, Podcasting);
- One “Critical” course (i.e., News Media & Democracy, Reporting Civil Rights, Narrative Journalism in Peace & War);
- Two additional electives drawn from a mix of “Craft” and “Critical” courses; and
- the Senior Seminar, to be taken in the senior year.

Course offerings reflect our shifting technological and media climate while continuing to develop bedrock reportorial and writing skills: identifying and acquiring reliable information; making analytical, ethical, and technical choices about how best to turn that information into news; and presenting the news in useful, compelling ways. As the program continues to develop the possibilities of its Boston location, forging fresh links between the Boston College campus and the city’s international public culture, students will also have more and more opportunities to work with the city’s wide array of talented professional journalists, venture out to do original reporting, and intern at a variety of media outlets. Interested students should contact program director, Associate Professor Angela Ards, Department of English, Stokes S443, 617-552- 3712, angela.ards@bc.edu.

Latin American Studies

The Latin American Studies program encompasses faculty and courses from across the University. With academic advisement from participating faculty, students can shape the Latin American Studies minor to fit usefully with their academic major and with the ambitions they hope to pursue after graduation. Students may earn a minor in Latin American Studies by completing 18 credits (approximately six courses) from at least three different academic departments, selected from courses approved for the program. Proficiency in Spanish or Portuguese that is equivalent to successful completion of a third-year college language course is required for the minor (but this course is not counted as one of the above six). With approval from the Director, two courses with focus on Latin America taken in a study abroad program can count toward the minor.

Students seeking to earn a minor in Latin American Studies must submit a proposed plan of study to the Director of the program, usually no later than the second semester of the sophomore year. The Director, in consultation with the student and other faculty in the program, will review the proposal, and notify the student of his/her acceptance into the minor.

For further information contact the Director, Professor Ernesto Livon-Grosman, Communication Department, St Mary’s Hall South 482, 617-552-2680, or visit the [Latin American Studies website](#).

Managing for Social Impact and the Public Good

The Managing for Social Impact and the Public Good minor is sponsored by both the Carroll School of Management (CSOM) and the Morrissey College of Arts and Sciences (MCAS). It draws upon faculty and courses in both schools and is open to all undergraduates. It is the first interdisciplinary minor jointly sponsored by different schools within the university.

In an interconnected world, we are all stakeholders in how business is conducted. Billions of human lives and our planet’s viability depend on whether leaders in the private and public sectors are guided by the principles of sustainability and social justice. The interdisciplinary minor integrates ethical, social, economic, environmental, and management perspectives in analyzing the role of business in society and the challenges of managing private and public institutions for the good of society, both domestic and global.

The minor is an 18-credit program with two required and four elective courses. The required courses are: Managing for Social Impact (BSLW3345 in CSOM), the introductory course to the program, and Leading for Social Impact (BSLW6001 in CSOM), the cumulative seminar course taken in spring of senior year.

Students will select their four elective courses (for a minimum of 12 credits) from approved electives in MCAS, CSOM, and the Lynch School of Education and Human Development. The intro course Managing for Social Impact should be taken prior to taking any of the approved electives. The electives must come from at least three different academic departments, with the Carroll School counting as a single department.

One course taken during a semester abroad may be approved as an elective counting toward the minor, but should be pre-approved before enrollment if it is to be counted. After a student completes the pre-approval process, credit for a course taken abroad will only be granted upon the student's return from the program, based on the graded work completed for the course.

Students in the program can plan to take their electives from the three Focus Areas. Courses are coded (visit the MSI website for the up-to-date list) to help students explore social impact themes. Students are not required to take their courses all in one area, but it is encouraged. Elective courses are grouped into the following Focus Areas:

Digital Economy, Social innovation, and Citizenship

Today's global digital economy, in which people, companies, markets, and even machines are constantly connected and communicating, enables innovative social solutions as well as opportunities for rapid growth and expansion of services. Such a setting also presents complex challenges. Expectations about long-term employment, economic security, and personal privacy are shifting with the rise of billion-dollar global firms based on freelance jobs, global social networks, digital media, and data mining. The rights and responsibilities of citizenship, both personal and corporate, are open to debate and radical revision, as are the form of the corporation and the appropriate roles of the public and private sectors in addressing urgent social issues. This focus area prompts students to consider the social impacts of the digital economy on citizenship, equality, personal values, work, privacy, and public policy.

Economic Development, Equality, and Enterprise

Citizens of wealthier nations and communities, as well as managers of multinational corporations and local enterprise, need to examine the degree to which their well-being and profitability may rely on the exploitation of natural resources and fellow human beings. Such judgments are difficult without the skills of ethical reflection, social/political/historical/economic analysis combined with research, discussion, and evaluation. This focus area challenges students to move beyond their taken-for-granted assumptions common to life in an economically developed society and to consider models of economic development and enterprise management that provide not only greater material well-being but also more equity and empowerment for individuals and groups in domestic and international settings who are disadvantaged at present.

Environmental and Economic Sustainability

With more than 13,000 signatories committed to the principles of a sustainable and inclusive global economy, the UN Global Compact is the world's largest corporate sustainability initiative. Its mission recognizes the significant challenges facing nations, corporations, and communities in the twenty-first century. It is vital that culturally and economically diverse populations come to terms with the pressing need to organize environmentally sustainable economies at the local community level as well as for the benefit of the entire planet. Sustainable enterprise and economic development require managers in the private and public sector to balance the needs of their diverse stakeholders in an ethically informed manner. This focus area will enable students to analyze the difficult questions of social, ethical, and environmental sustainability and development from multiple disciplines in the sciences, humanities, social sciences, and management.

Medical Humanities, Health, and Culture

In the Medical Humanities, Health, and Culture minor, students explore health and health care practices through multiple disciplines, including literature, theology, history, and philosophy, as well as natural and social sciences. From each vantage, humanistic and cultural approaches to health and the body are emphasized. The minor, interdisciplinary in its approach, draws on Boston College's commitment to social justice, ethics, and care for the whole person. This is a useful program for students interested in careers in medicine, health care policy or law, psychology, public or global health, social work, patient advocacy, or health journalism. It is also helpful for students interested in exploring historical, narrative, and cultural contexts for current (and at times competing) ideas about illness, the body, and representation.

The minor is comprised of 18 credits. Courses (not necessarily in sequence) include a **required Introductory course** (ENGL2212), **four electives** from a designated list of approved courses, and a **final advanced elective**, normally taken in the junior or senior year. In addition, minors will be encouraged to take part in reading groups, film series, conferences, and relevant local events.

Students choose electives from at least three different departments. The following thematic clusters will help students to plan a path through the minor:

- Global/Public Health
- Values and Ethics
- Mind and Body
- Health Care Delivery
- Medical narrative, writing and representation

Students interested in learning more or in registering for the minor should contact the Director, Amy Boesky, in Stokes 437 South or e-mail boesky@bc.edu to set up an appointment.

Religion and Public Life

The Religion and Public Life minor will offer students a way to explore and connect diverse conversations about the role of religion in public life. Bringing together a wide array of courses to choose from, the Religion and Public Life minor will have an interdisciplinary emphasis and be composed of six courses, two required courses, and four electives. The introductory course will be a focused and constructive seminar conversation about the various intersections between religion and public life, focusing on the American context. Listed as a theology course, the introductory seminar (THEO3253), Religion and American Public Life, will be taught by the director of the minor. All students entering the minor will take this introductory course first. During the course, students will meet with the director to determine which elective courses are the best fit for their interests and, if needed, will be connected with another faculty member who will assist in recommending electives. These electives will form a cluster that narrows the focus of the minor to consider the individual student's interests in religion and public life, either within or expanding beyond the American context. This cluster consists of four electives, including at least one advanced elective. An advanced elective is a writing intensive course that should be taken near the end of the student's fulfillment of minor requirements. The elective courses must be chosen from at least two departments outside of theology. The other required course, taken during their senior year, is Ethics, Religion, and International Politics (THEO5563/INTL5563/PHIL5563); it is cross listed among theology, international studies, and philosophy.

Students who are interested in the Boisi Center Minor in Religion and Public Life should contact the director, Fr. Mark Massa, by email. His email address is mark.massa@bc.edu.

Ideal students for the minor are high-achieving BC sophomores and juniors who are interested in the intersection of religion and public life, would like to be introduced to the study of religion and public life, and are interested in being guided through articulating and exploring their own specific academic and/or professional interest within this broad intersection. The minor includes courses on various religious traditions: Judaism, Catholicism, Islam, etc. Similarly, the minor includes courses under a broad understanding of what we mean by "public life." If selected for the minor, students would also be named Boisi Center Fellows and would be invited to participate in the Boisi Center's many events.

Overall, the minor will create an atmosphere where students may seriously engage in conversations with each other and with faculty about the pursuit of the common good of a religiously diverse society, the future of engaged citizenship, the religious and theological role of the arts, and the moral consequences of public policies. In doing so, the minor in Religion and Public Life supports Boston College's Jesuit and Catholic commitment to education that shapes the minds and hearts alike for service to the common good, with an eye towards addressing the world's most urgent problems.

Expectations and Requirements

The aims of the Religion and Public Life minor are to form undergraduate students who are able to:

- Understand and narrate the history of religious and cultural interactions across the U.S. historical landscape;
- Speak knowledgeably about what comprises a religiously diverse society—its constructions, conflicts, and common goods—both within the American tradition and in international contexts;
- Understand the varying roles of an engaged citizenry and the political consequences of religious associations;
- Ask difficult questions that lead to analyses of the moral consequences of public policies;
- Articulate what the "Common Good" might look like in a pluralistic society.

Students are required to take six courses for the minor, beginning with the introductory theology course (THEO3253), Religion and American Public Life. Each student will work predominantly with the director of the minor and affiliated faculty, as necessary, to design a personalized

interdisciplinary course of study comprised of five other elective courses (a "cluster"). All courses for the minor must be completed with a grade of "B" or higher.

Course Requirements

Introductory Seminar Course in Religion and American Public Life (THEO3253)

Boisi minors are expected to enroll in a one-semester, 3-credit introductory seminar. This class will immerse students in the ongoing conversation around the issues, approaches, and texts focusing on religion in America. It is not designed to be cumulative, but instead is an orienting look at relevant issues in religion and American public life, which will spark a more specific interest to be explored by individual students over the course of the minor. Over the course of the semester, students will be asked to convene parts of the seminar meeting, offering reflection on their reading, and developing interests. Over the course of the seminar, students will also begin to formulate a problem that will constitute the core of what they will focus on within the minor as a whole. This could be a focus on religion and politics, religion and the arts, religion and race and/or ethnicity, religion and government, etc., and it will form the basis for how they will select their later electives. This introductory course will be listed as a theology course, and will always be taught by the director of the minor, Mark Massa, S.J.

Elective Clusters

The elective cluster consists of four courses (12 credits), in addition to the 6 credits already provided by THEO3253 and THEO5563/INTL5563/PHIL5563. These electives must come from at least two different departments other than theology in order to satisfy the requirements for minors at Boston College. The courses students take that comprise a cluster will be decided in conjunction with the director of the minor, and with the input of affiliated faculty as needed. Available courses will vary each year depending on the given year's course catalog; example clusters are listed below.

Examples of Elective Clusters:

- Religion and the Arts
- Religion and Gender
- Religion and the Environment
- Religion and Technology
- Religion, Culture, and Media
- Religion and Political Philosophy
- Religion and the Social Sciences
- Religion and American Politics
- Religion and International Politics

Boisi Center Access

Because the minor's course of study aligns with the research interests of Boston College's Boisi Center for Religion and American Public Life, students will have access to the resources of the Boisi Center during their studies in the minor. Students will be named as Boisi Center Fellows and will have contact with speakers, primary access to events, and be able to engage in other specific programs designed especially for students in the minor, including dinner conversations twice a year. As Boisi Center Fellows, students in the minor will be expected to attend at least one Boisi Center event each semester.

Women's and Gender Studies

The Women's and Gender Studies Program is an interdisciplinary forum for the study of the role of gender in the past and present positions of individuals in American society and across a diversity of nation-state, international, and global contexts. Drawing from a broad range of theoretical frameworks and empirical scholarship, Women's and Gender Studies analyzes the intersection of gender with differential identity factors such as race, class, religion, culture, and sexuality. Women's and Gender Studies sheds light on the construction and maintenance of gender ideologies in different environments and locations and considers gender relations a primary factor in our understanding of statuses and roles. Multiple perspectives and lenses—literary, historical, sociological, psychological, political, activist, popular culturist—are applied to the study of lived realities, representations, histories, oppressions, coalitions, and movements.

The Boston College Women's and Gender Studies Program encourages diversity and equality in all areas of campus life. Our WGS courses and professors respect differences in background and identity, including differences in race, gender, ethnicity, sexuality, and class.

The WGS classroom environment is inclusive: which means that differences are not ignored, but rather that students can have space to bring their various identities into conversation.

We expect students to honor and respectfully listen to differences that may come up in the classroom setting and to listen and respond to other points of view.

In addition, this means that students have space to bring their various identities into conversation with class material as they find helpful, but are not expected to represent or speak for an entire group of people who share aspects of an identity.

Boston College students may decide to minor in Women's and Gender Studies at any time prior to graduation, provided that the requisite scope and number of courses have been completed with satisfaction.

Required Courses

The following two courses should not be taken in the same semester.

- ENGL2125 **Introduction to Feminisms**
Cross-listed with HIST2502, SOCY2225. *Minors are encouraged to take Introduction to Feminisms prior to taking other WGS electives.*
- SOCY5593 or COMM4941 **Advanced Topics**
Always taken as a Senior during Spring semester

Electives

Four electives (12 or more credits) from a variety of departments are required and can be tailored to your own interests.

The following guidelines must be followed:

Guidelines

- No more than two electives (6 credits) can be courses within the same department.
 - *Note:* Many courses that count for the minor are cross-listed with other departments. To avoid having to select an alternative course, you can select the department from which you wish to register the course. For example, if you have three additional courses from the Sociology department, one may be cross-referenced with the Communications department; therefore, you would register for it as a COMM course rather than an SOCY course.
- **Only one course can "double count" toward the WGS minor and another requirement** (ex: Core, major, or another minor). Five of the six courses, or 15 out of 18 credits, must only count toward the WGS minor. *The Women's and Gender Studies program does not guarantee that one of our courses will satisfy any major/minor requirements in other departments.* You are responsible for knowing whether or not your respective department will accept a WGS elective for major credit. Please contact gender@bc.edu if you have any questions or concerns.

For more information on the Women's and Gender Studies Program, visit bc.edu/ws or consult the Director of the minor, Professor Lisa Cuklanz, Communication Department, e-mail: cuklanz@bc.edu.

International Studies

The International Studies Program offers a flexible and rigorous interdisciplinary undergraduate major and minor in the Morrissey College of Arts and Sciences that develops keen analytical skills and ethical reasoning amidst complex global dynamics. Our faculty is drawn from many departments across the Morrissey College of Arts and Sciences. Students in our **major** take seven IS Core courses and six courses in one of four concentrations, study abroad, and satisfy a rigorous foreign language requirement and complete a senior research project. Students in the IS minor complete six courses in one of four concentrations.

** Please consult the [International Studies website](#) for the most accurate and up-to-date information about requirements for the IS major and minor.

[International Studies Courses](#)

[International Studies Faculty](#)

[International Studies Website](#)

Applying to Be an International Studies Major

Students are accepted into the International Studies major only through an online application process. We accept approximately 105 students into the major each year. Applications from freshmen are due the first week of February; applications from transfer students should be made the spring or summer before they enroll as sophomores at BC. Visit the [International Studies website](#) for exact dates and more information about the process.

Language Requirement

All students completing the IS major, regardless of school, must demonstrate advanced proficiency in one modern foreign language or intermediate proficiency in two modern foreign languages. All students completing the IS minor must demonstrate intermediate proficiency in a modern foreign language. Visit the [International Studies website](#) for more about how to meet these requirements.

Major Requirements

The International Studies major requires at least 13 courses, totaling 45 credits. This includes seven classes (24 credits) in the IS core; six classes (18 credits) in one of four concentrations; and a senior seminar (3 credits) or thesis (6 credits, 3 of which count toward an elective). At least 27 of these credits must be applied exclusively to the IS major and cannot fulfill requirements for another major or minor. Courses to meet the major's language requirements (noted above) are not included, although they confer university credit and meet the university's language requirements. Visit the [International Studies website](#) for complete details.

The four concentrations available to IS majors and minors are:

- Cooperation and Conflict
- Ethics and Social Justice
- Global Cultures
- Political Economy and Development Studies

Minor Requirements

The International Studies minor requires 6 courses, totaling 18 credits. Students select one of four concentrations (Cooperation and Conflict; Ethics and Social Justice; Political Economy and Development Studies; or Global Cultures) in which they take two foundation courses and four electives, offered from at least three different academic departments. Courses to meet the language requirements (noted above) are not included, although they confer university credit and meet the university's language requirements. Visit the [International Studies website](#) for complete details.

Information for First Year Students

The responses you give on your IS major application are the most important factor we use to admit students into the major, but grades and courses taken your first semester play a role as well. To prepare for your application, we encourage students to read about the IS Program online and talk with current IS majors; you might consider starting with our Peer Advisors or with members of the International Studies Student Association. We also encourage freshmen to enroll in one or more classes that take up international issues and/or are taught by an IS faculty member. Your application will ask you to list a faculty member who can give you a reference, so we encourage you to get to know a faculty member, rather than simply list the professor who gave you the best grade of the semester.

There are no specific courses you need to have taken to apply for the IS major, but there are some introductory courses you will need to take to complete it that also count for the University Core requirements (e.g., Principles of Economics). A comparative politics course in the political science department could be a useful way to test the waters. But we encourage freshmen to take the interdisciplinary Core Renewal courses or others that meet University's Core requirements, even if they don't count for IS major requirements. The IS major is just one part of your university experience, and we understand that you won't necessarily focus on that during your first semester.

Information for Study Abroad

IS majors are expected to study abroad for a semester but are not required to do so. Nearly 90% of our majors study abroad for a summer, semester, and/or full academic year. IS majors who are unable to study abroad because of family, professional, athletic, or other academic commitments can take advantage of other opportunities to engage with international students, use their language skills, and meet people and groups from around the world via video links and other programming. IS majors can apply up to two courses to their IS major if abroad for one semester and up to four courses if abroad for two semesters. IS minors can apply a maximum of two courses toward their International Studies minor.

Islamic Civilization and Societies

Major Requirements

The major consists of ten required courses (30 credits) plus language proficiency (four semesters of a relevant language or native speaking ability).

Islamic Civilization and Societies Core: One Course

Integrative and multidisciplinary, this course is designed as an introduction to the field. It explores rich culture produced in the regions where Islam was the predominant religion during the past 1,400 years. The course is offered in the fall semester, is open to non-majors, and fulfills the Cultural Diversity Core requirement.

Disciplinary Base: Four Courses

Choose a Disciplinary Base in History, Political Science, Theology, Art, Art History, and Film, or Near Eastern Languages and Literatures. Take all required departmental foundation courses and two additional courses in your primary department. Visit the department website at bc.edu/ics for the list of approved courses.

Departmental Foundation Courses: Two Courses

- Political Science: POLI1041/1042 Fundamentals of Politics I and II
- Art, Art History, and Film: ARTH1101/1102 Art from Prehistoric Times to High Middle Ages/Art: Renaissance to Modern Times
- History: Two courses from the HIST1001–1094 sequence: HIST1059 Islam and Global Modernities preferred
- Theology: Any of the two-semester University Core requirements: THEO1161–THEO1162 Religious Quest I&II preferred
- Near Eastern Languages and Literatures: Any two of the following: NELC2061 Language and Identity in the Middle East, NELC2062 States and Minorities in the Middle East, NELC2161 Modern Middle Eastern and Arabic Literature, NELC2063 Near Eastern Civilization

Base Discipline Electives: Two Courses

Political Science:

- POLI2363 Muslims in U.S. Society and Politics
- POLI2405 Comparative Politics of the Middle East
- POLI2409 Revolution, Nationalism and State-Building in the Middle East
- POLI2414 Politics and Society in Central Eurasia
- POLI2636 Medieval Jewish and Christian Political Thought
- POLI2637 Introduction to Islamic Law
- POLI3444 Intellectuals and Politics in the Middle East
- POLI3527 Terrorism and Political Violence
- POLI2528 International Relations of The Middle East
- POLI2615 Islam and Liberal Democracy
- POLI2638 Islamic Political Philosophy
- POLI7700 Muslims and American Institutions
- POLI7812 State-Church Relations in Modern Europe
- POLI7813 Islam in Europe

History:

- HIST4140 Middle East in the Twentieth Century
- HIST4150 Modern Iran
- HIST4370 Byzantium and Islam

- HIST4131 Rise and Fall of the Ottoman Empire
- HIST4135 History and Historiography of Arab Israeli Conflict
- HIST4122 Odysseys in the Western and Islamic Traditions
- HIST4090 Modern South Asia
- HIST4497 Terror and the American Century

International Studies

- INTL3340 Environmental Politics of the Middle East

Theology:

- THEO3116 Medieval Religions and Thought
- THEO1225/ICSP2225 Exploring the Religious Worlds of Istanbul and Anatolia
- THEO5101/ICSP5101 The Great Books of Islam
- THEO5351 Faith Elements in Conflict
- THEO5352 Israelis and Palestinians
- THEO5441 Ibn 'Arabi and The Islamic Humanities: Islamic Philosophy and Theology
- THEO5544 Prophetic Tradition and Inspiration: Exploring the Hadith
- THEO5554 Encountering the Qur'an: Contexts and Approaches
- THEO5566 Mystical Poetry in the Islamic Humanities
- THEO7855 Modern/Contemporary Islam in Context

Art, Art History, and Film:

- ARTH2213 Introduction to Islamic Architecture
- ARTH2226 Islamic Spain/al-Andalus: Word, Monument, and Image
- ARTH2280 Masterpieces of Islamic Art
- ARTH3350 The Art of the Object/Islamic Art
- ARTH4409 The Art of the Islamic Book
- ARTH4412 Cairo: City of 1001 Nights
- FILM3314 Cinema of the Greater Middle East

Near Eastern Languages and Literatures:

- NELC1211/1212 Modern Hebrew I and II
- NELC1251/THEO5582 Biblical Hebrew
- NELC1431/1432 Turkish for Scholars I and II
- SLAV2069 Literature of the Other Europe in Translation
- SLAV2067 Gender and War in Eastern Europe
- SLAV2066 Conversion, Islam, and Politics in the Balkans
- NELC4121/4122 Advanced Arabic I and II
- SLAV2071 War and Peace in Yugoslavia
- SLAV2065/SOCY2280 Society/National Identity in the Balkans
- SLAV2062 Exile and Literature
- NELC2063 Near Eastern Civilizations
- NELC2331 Advanced Readings in Persian Texts
- LING3359 The Structure of Biblical Hebrew
- NELC3162 Business Arabic
- NELC4190 Advanced Tutorial Arabic

Electives: Three Courses

Majors choose three elective courses from an approved list found on our website at bc.edu/ics. Electives must be distributed among at least two other departments in addition to the disciplinary base.

Senior Seminar and Research Project/Honors Thesis: Two Courses

All majors will be required to enroll in a thesis seminar in the fall of their senior year. In the spring term of their senior year, students will complete a senior thesis under the supervision of a faculty member affiliated with the Program.

The Senior Seminar will allow ICS majors to integrate the knowledge, skills, and concepts of their diverse disciplinary bases and to share them in a genuinely cross-disciplinary manner. The course encourages students to make intellectual connections across disciplines and to engage in critical reflection. After exploring common themes, majors will develop a research design, select a methodology, engage in research, and begin writing the thesis.

Language Requirement: Four Courses

Students will be expected to attain proficiency (completion of intermediate level) in a relevant language such as Arabic, Hebrew, Turkish, Persian, or Urdu. In some cases, French, Russian, Chinese or other languages relevant to specific research concerns may be accepted for students specializing in the study of Muslims in Africa, Central Asia, China, Europe, or the Americas, subject to approval by the program's director.

Boston College currently offers four years of Arabic language instruction, from Elementary Intensive through Advanced Arabic. Students studying abroad can enroll in even more intensive language programs offered in Morocco, Kuwait, Egypt, Jordan, Sharjah, UAE, and at the School of Oriental and African Studies at the University of London (SOAS) during the regular academic year and in the summer. Our students have also studied during the summer months at Middlebury, Harvard, and Columbia to accelerate their language skills, and several have won U.S. State Department Critical Language Scholarships and Flagship Fellowships to study Arabic in the summer.

Arabic and other relevant languages can be taken through the Boston Area Consortium. Our Consortium partners, B.U., Brandeis, and Tufts in particular, offer additional languages such as Persian, Turkish, and advanced levels of Hebrew if majors wish to study a language other than, or in addition to, Arabic.

Mathematics

Bachelor of Arts (B.A.)

The Bachelor of Arts program in Mathematics is designed to provide a solid foundation in the main areas of mathematics and mathematical applications. Coursework is offered in preparation for careers in the actuarial profession, applied areas of government and industry, and education. Students who succeed in the program make excellent candidates for law school and other professional schools.

Requirements for Mathematics B.A.

The Mathematics B.A. major requires completion of at least 33 credits, including:

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- MATH2216 Introduction to Abstract Mathematics
- MATH3310 Introduction to Abstract Algebra
- MATH3320 Introduction to Analysis
- 18 elective credits chosen from MATH courses numbered 4000 or higher

With the approval of the Assistant Chair for Undergraduate Programs, advanced students may omit required courses, substituting 3 credits in MATH courses numbered 4000 or higher for each.

Bachelor of Science (B.S.)

The Bachelor of Science program in Mathematics is designed to give students a rigorous and thorough mathematical experience, one that includes connection to another area of scholarship in which mathematics is an essential tool. In particular, the program is strongly recommended for those who wish to pursue graduate study in mathematics.

Requirements for Mathematics B.S.

The Mathematics B.S. major requires completion of at least 36 credits, including:

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- MATH2216 Introduction to Abstract Mathematics
- MATH3311–3312 Algebra I, II
- MATH3321–3322 Analysis I, II
- MATH4460 Complex Variables
- 12 elective credits in mathematics numbered 4000 or above
- 12 credits in natural science, computer science, or economics courses (listed below).

With the approval of the Assistant Chair for Undergraduate Programs, advanced students may omit required courses, substituting 3 credits in MATH courses numbered 4000 or higher for each.

Corequisite Science Courses for B.S. in Mathematics

- BIOL2000 Molecules and Cells
- BIOL2010 Ecology and Evolution
- BIOL2020 Organisms and Populations
- BIOL3040 Cell Biology
- BIOL3190 Genetics and Genomics
- BIOL4200 Introduction to Bioinformatics
- CHEM1109 (1117)–1110 (1118) General (Modern) Chemistry I, II

- CHEM3351 Analytical Chemistry
- CHEM4475–4476 Physical Chemistry I, II
- CSCI1101–1102 Computer Science I, II
- Any upper-division course for majors in Computer Science
- ECON2228 Econometric Methods
- ECON2229 Forecasting Techniques
- ECON3308 Game Theory in Economics
- ECON3311 Mathematics for Economists
- EESC1132–1134 Exploring the Earth I, II
- EESC3391 Introduction to Geophysics
- EESC4424 Environmental Geophysics
- EESC4460 Introduction to Seismology
- PHYS2100/2110–2101/2111 Introduction to Physics (Calculus) I and II
- Any upper division course for majors in Physics

Additional Major Requirement (All Students)

A grade point average of at least 1.67 in the MATH courses used to fulfill the major.

Some students may need to complete (or will benefit from completing) MATH1102 Calculus I (Math/Science Majors) and/or MATH 1103 Calculus II (Math/Science Majors) to prepare for the major. Well-prepared students with a strong Calculus BC program may, and sometimes should, begin directly in MATH2202. Exceptionally strong students may apply for the Honors Section MATH2203 and should contact the Assistant Chair for Undergraduate Programs. More information about Calculus courses and suggestions for choosing the right Calculus course can be found at bc.edu/mathadvise.

Each student should consult directly with the Assistant Chair for Undergraduate Programs or a Mathematics Advisor at Orientation to determine the appropriate and recommended Calculus choice for their situation.

Departmental Honors

Candidates for either the Bachelor of Arts or the Bachelor of Science who meet the following requirements will be awarded Departmental Honors in Mathematics:

- Completion of the mathematics requirements for the B.S. degree.
- A grade point average of at least 3.3 in all mathematics courses numbered 3000 and above.
- Completion, as one of the required electives, of an honors thesis course MATH4961; or an independent study course MATH4901 under the direction of a faculty member; or completion, as one of the required electives, of one graduate course at the 8000 level.

Each student's honors program must be approved individually by the Assistant Chair for Undergraduate Programs.

The Minor in Mathematics

The Mathematics Department also offers a program for majors in other disciplines leading to the minor in Mathematics.

Requirements for the Minor in Mathematics

- MATH2202 Multivariable Calculus or MATH2203 Multivariable Calculus (Honors)
- MATH2210 Linear Algebra or MATH2211 Linear Algebra (Honors)
- 12 elective credits, chosen from:
 - MATH2216 Introduction to Abstract Mathematics
 - MATH3310 Introduction to Abstract Algebra
 - MATH3311–3312 Algebra I, II

- MATH3320 Introduction to Analysis
- MATH3321–3322 Analysis I, II
- MATH major courses numbered 4000 or higher

Information for Study Abroad

Normally, Mathematics majors should have completed MATH2202/3, MATH2210/1, and MATH2216 before going abroad. For students going abroad in the second semester of junior year only, you should also complete at least one of MATH3310/MATH3311 or MATH3320/MATH3321 before leaving.

Students usually may take **no more than two** mathematics courses for credit towards the mathematics major while abroad, although exceptions may be made if the host institution provides suitable offerings. All courses to be used for major credit must be approved beforehand.

There are no restrictions on what type of mathematics course you may take while abroad, but usually each will be counted as an elective. Choices most commonly available include courses in Differential Equations, Numerical Analysis, Graph Theory/Combinatorics, Number Theory, Complex Analysis, Probability and Statistics, Mathematical Modeling, and Operations Research.

Substitutes for the required 3000-level courses in Algebra and Analysis may be available while abroad; however, these titles are generic. Thus, it is extremely important that you check with the Department about taking either one of these two courses abroad, to be sure that the level of the course matches your background.

For course approval, contact the Assistant Chair for Undergraduate Programs.

Choosing Courses and Fulfilling Core Requirements

All students at Boston College are required to complete one mathematics course as part of the University's Core Curriculum. A score of 4 or higher on either the Calculus AB or BC Advanced Placement Exam (once recorded on your transcript by the Admissions Office) exempts you from this Core requirement.

Some schools or major programs, however, may require more than this minimum, or perhaps require a specific Calculus course or courses. Basic guidelines for students who fall into these categories (or who are seriously thinking about choosing majors in these categories) are as follows:

Majors in Mathematics, Physics, Chemistry, Computer Science, and Geological Sciences

In your first semester of freshman year, enroll in MATH1102 Calculus I (Math/Science Majors), MATH1103 Calculus II (Math/Science Majors), or MATH2202 Multivariable Calculus. If you have had a solid year of calculus, MATH1103 is usually the most appropriate choice. Well-prepared students with a strong Calculus BC program may, and sometimes should, begin directly in MATH2202. Exceptionally strong students may apply for the honors section of MATH2202 and should contact the Assistant Chair for Undergraduate Programs.

Majors in Life and Social Science (E.g., Biology, Neuroscience, Economics, Management) and all Premedical students

Enroll in your first semester of freshman year in one of the Calculus courses MATH1100 (Calculus I), MATH1101 (Calculus II), or MATH2202 (Multivariable Calculus). If you have had a solid year of calculus (the AB curriculum), MATH1101 is usually the most appropriate choice. Particularly well-prepared students should consider MATH2202. If you have a strong interest in mathematics, you should consider choosing a Calculus course from the MATH1102–MATH1103–MATH2202 sequence mentioned above.

Other Students

For all other students seeking to fulfill the Core requirement in mathematics, you may take a Core-level mathematics course at any time—it need not be (and sometimes simply cannot be) completed right away in freshman year. You certainly have the option to elect a Calculus course for the Core requirement, but there often may be more appropriate course selections available to you, such as:

- MATH1004 Finite Probability and Applications
- MATH1007 Ideas in Mathematics
- MATH1180 Principles of Statistics for the Health Sciences (CSON students)
- MATH1190 Fundamentals of Mathematics I (LSOE students in Elementary Education or Human Development, only)

For more complete information on course selection, please visit the course selection area of the Mathematics Department website at bc.edu/mathadvise.

Music

Whether students aspire to a career in music or wish to pursue their own love of the art, they will find that the Department of Music offers courses in theory and composition, in the history and current trends of Western, World, and Popular styles, and provides lessons in voice and/or an instrument. All students, regardless of musical background, are welcome in any course unless a prerequisite or an instructor's permission is indicated (for example, in certain theory courses).

The Music Department offers a variety of courses (MUSA1100, MUSA1200, MUSA1300, MUSA1701) that satisfy the University Core requirement in the Arts and serve as introductions to the various areas of musical knowledge. MUSA1100 Fundamentals of Music Theory focuses on technical aspects of the language of music and functions as a prerequisite to Harmony and further upper-level courses in theory and composition, such as Chromatic Harmony, Counterpoint, as well as Jazz Harmony, Tonal Composition, and the Seminar in Composition. MUSA1200 Introduction to Music offers a broad historical survey of the styles and genres of Western music, while upper-level courses focus on specific periods of music history (Middle Ages, Renaissance, Baroque, Classical Era, Romantic Era, Modern Era), the historical development of specific genres (Opera, Symphony, Keyboard Music, Dance), or the contributions of various individual composers (Monteverdi, Bach, Beethoven, the Schumanns). MUSA1300 History of Popular Music offers a socio-historical approach to the broad history and context of Popular music; upper-level cross-cultural courses deal with Popular traditions (Music in America, History of Jazz, Hip-Hop, the Beatles) and regional styles of World music. MUSA1701 Aesthetic Exercises is an Enduring Questions class which, with THEO1701 Spiritual Exercises, satisfies the Arts Core and one of the two Theology Core requirements. In World music, MUSA1320 Introduction to Musics of the World, MUSA2303 Afro-Brazilian Music, MUSA2304 Musics of India, MUSA2306 Musics of Africa, MUSA2307 Musics of Asia, and MUSA2309 Music and Culture in the Middle East satisfy the Cultural Diversity requirement of the Core, but not the University Core requirement in the Arts.

For the music major, a liberal arts framework offers a broader perspective than that offered by conservatories or schools of music. In this comprehensive liberal arts framework, students encounter historical, theoretical, cultural, ethnographic, and performance perspectives on music. The student majoring in music at Boston College may find employment in teaching, communications, arts administration, or liturgical music, or may major in music to provide a firm enriching discipline for the mind or a source of lifelong enjoyment. Some students go on to graduate school or a conservatory to become professional performers, composers, musicologists, ethnomusicologists, educators, or arts professionals. Within the major, all students acquire a common base of knowledge with a specialization at higher levels in such areas as composition, performance, music history, or cultural studies. A broad grounding in Western art music and World Music and Popular traditions is considered indispensable.

[Music Academic Courses](#)

[Music Performance Courses](#)

[Music Faculty](#)

[Music Website](#)

Performance

The Music Department offers individual instruction in voice and instruments either for credit (MUSP1925—1 credit per semester) or not for credit (MUSP1920, 1910, 1900). Individual instruction, whether for credit or non-credit, requires an extra fee. In addition, several free, non-credit performance opportunities offer instruction and/or coaching in various instruments and ensembles. Private lessons, when taken for credit, require a juried performance at the end of the semester. Students may count up to 3 credits of individual instruction toward graduation.

Major Requirements

(Minimum of 12 courses, 38 credits)

- *Theory, Analysis, and Composition Courses:* (12 credits total)
Prerequisite: MUSA1100 Fundamentals of Music Theory or equivalent
Required of all majors: MUSA2100 Harmony, MUSA3100 Chromatic Harmony, MUSA3106 Counterpoint

- *Choice of any one course:* MUSA3110 Form and Analysis, MUSA3114 Jazz Harmony, MUSA3120 Composition Seminar, MUSA3126 Tonal Composition, MUSA3130 Orchestration, MUSA2130 Education Through Music
- *Historical Courses:* (9 credits total)
Required of all majors: MUSA2209 Music of the Modern Era
Choice of any two:* MUSA2201 Medieval-Renaissance Music, MUSA2202 Music of the Renaissance, MUSA2203 Music of the Baroque, MUSA2205 Music of the Classic Era, MUSA2207 Music of the Romantic Era
 *A composer or genre course may be substituted for one of the period courses.
- *Cultural Courses:* (6 credits total)
 Required of all majors, a choice of one from each of the following two groups:
- *Group I—World Music*
 - MUSA1320 Introduction to Musics of the World*
 - MUSA2303 Afro-Brazilian Music*
 - MUSA2304 Musics of India*
 - MUSA2306 Musics of Africa*
 - MUSA2307 Musics of Asia*
 - MUSA2308 Music in the Medieval Islamic World
 - MUSA2309 Music and Culture in the Middle East*

*MUSA1320, MUSA2303, MUSA2304, MUSA2306, MUSA2307, and MUSA2309 also satisfy the Core Cultural Diversity requirement

- *Group II—Popular Music*
 - MUSA2320 Music and America
 - MUSA2330 History of Jazz
 - MUSA2334 Hip Hop in American Culture
 - MUSA2340 Introduction to Irish Folk Music
 - MUSA3350 The Beatles
- *Required Senior Seminar:* (one semester, 4 credits)
 The Senior Seminar (MUSA4941) is ordinarily open only to senior music majors. The Seminar entails a series of weekly projects allowing majors to investigate issues in depth with special emphasis in one of the areas listed above (history, cultural studies, or performance). The Seminar serves as preparation for a senior project with supervised reading, research, writing, and discussion.
- *Electives:* (6 credits)
 Students choose a minimum of two 3-credit courses in whatever category is appropriate to their particular interest, whether it is in music theory and composition, performance, history, or cultural studies. Students with a performance emphasis must have three semesters of private instruction for credit. Three semesters of private instruction for credit may be used as an elective only upon completion of the juries at the end of each semester of lessons.
- *Performance Ensemble Experience:* (minimum of two semesters)
 Each major must have two semesters of experience in ensemble performance in some capacity and may choose from any organized performance group at Boston College (such as the Boston College Symphony Orchestra, Chamber Music Ensemble, Popular Styles Ensemble, Irish Traditional Music classes, University Chorale, the Middle Eastern Ensemble, West African Drumming and Dance, Voices of Imani, Liturgy Arts Group, a student a cappella group, BC bOp, Marching Band, Wind Ensemble, etc.), through more informal student groups (by consultation with the Director of the Undergraduate Program in Music), or through private lessons.
- *Cumulative Listening Competency*
 Majors will be asked to identify important works from the Western tradition in a series of Listening Competency exams. Each year of the music major (normally three), a list of works will be given to students that they must be able to identify by the end of the year. A listening test on each of the three lists of works will be administered until the student passes.
- *Ear Training/Sight Singing:* (2 credits)
 All majors must pass the minimum competency requirements in Ear Training and Sight-Singing before graduation. The courses MUSA1090 and MUSA2090 Ear-Training and Sight-Singing are 2-credit classes designed and recommended as an aid to passing this test.

Minor Requirements

(Minimum of six courses, 18 credits)

The Music Department has designed a minor in music for students who are interested in music, but who do not wish either to make music their career or to go on to graduate studies, or for students who have majors that preclude taking music as a second major. The total number of courses required for the minor in music is six. Those wishing to minor in music should take the following:

- One of the following (3 credits): MUSA1100 Fundamentals of Music Theory (required if they do not have the background in music theory needed before entering MUSA2100 Harmony), or MUSA1200 Introduction to Music, MUSA1300 History of Popular Music, or MUSA1701 Aesthetic Exercises. Students who can pass out of MUSA1100 will substitute an upper-level course as an elective.
- Two additional music theory courses (6 credits): MUSA2100 Harmony and MUSA3100 Chromatic Harmony.
- Three historical and cross-cultural electives (9 credits): One period course, one composer or genre course, one cross-cultural course (either in World Music or in Popular Music).

The choice of courses should be made in consultation with an advisor from the Music Department. In addition, each student must participate in at least two semesters of credit or non-credit performance experience (either as a member of an ensemble or through private lessons), as approved by the department.

Honors

In order to graduate with departmental honors, a student must maintain a grade point average of 3.5 in the major and 3.3 in the University, pass the Ear-Training and Listening Repertoire requirements with a high score, and produce a final project, recital, or paper deemed worthy of honors. The project must be completed for a grade of A- or better to receive honors. There are various ways to fulfill the project:

- A research paper of no fewer than 40 pages and a public presentation of approximately 20 minutes on their findings.
- A recital of around 40 minutes (but no less than 30 minutes) with a paper of no fewer than 15 pages. Non-honors majors may still count a senior recital for credit as MUSA4600 Senior Recital Preparation but without it being considered for honors.
- A composition or set of compositions of no less than 15 minutes.

Information for First-Year Majors and Non-majors

Included in the University's Core Curriculum is one course in the Arts (Art, Art History, and Film, Music, or Theatre). MUSA1100 Fundamentals of Music Theory, MUSA1200 Introduction to Music, MUSA1300 History of Popular Music, and MUSA1701 Aesthetic Exercises are the Music Department's Core offerings. They are designed for the non-musician as well as the student who has studied music. Prospective music majors or minors should reference the Recommended Course of Study below. Students with advanced musical backgrounds and interests should speak to the Director of the Undergraduate Program in Music regarding appropriate upper-level courses. The Department offers MUSA1320 Introduction to Musics of the World, MUSA2303 Afro-Brazilian Music, MUSA2304 Musics of India, MUSA2306 Musics of Africa, MUSA2307 Musics of Asia, and MUSA2309 Music and Culture in the Middle East as options for the Cultural Diversity requirement of the Core.

Information for Study Abroad

For the Core: Students who wish to satisfy the Arts Core through Music while abroad should consult with the Director of the Undergraduate Program before their departure. Acceptable courses should be similar in scope and content to those offered at Boston College. Not all Study Abroad programs offer classes that satisfy these requirements.

For the major and minor: The department requires that the music theory sequence for minors and majors through Chromatic Harmony and the Senior Seminar for majors be taken at Boston College. Music of the Modern Era and Counterpoint (required of majors) should be taken at Boston College, though exceptions may be possible depending on equivalent courses offered by the host school. Majors may not be abroad in the Fall semester of senior year since they are required in this semester to take the Senior Seminar at BC.

Before going abroad, both minors and majors should have completed Chromatic Harmony. Majors, in addition, should have taken a few of the history or cultural studies courses. Thus, acceptable offerings from abroad tend to lean towards courses in Western music history or in

World or Popular studies, with some upper-level theory courses acceptable. Usually, students complete 6 or 9 credits; however, majors have had as many as 12 credits fulfilled abroad.

Students should contact the Director of the Undergraduate Program in Music, to plan an acceptable course of study for their semester or year abroad. The department recommends the music programs offered at King's College, London, and University College, Cork, Ireland.

Recommended Course of Study

Freshman Year

All students with a serious interest in music should try as freshmen to take, or test out of, MUSA1100 Fundamentals of Music Theory. Students can test out of Fundamentals through AP, IB or equivalent programs. Students who have simply acquired knowledge of music theory through lessons will most likely need to take MUSA1100. Contact the Director of Undergraduate Studies in Music for advice about placement. The theory courses (especially MUSA1100 Fundamentals of Music Theory and MUSA2100 Harmony) are essential and necessary predictors of a student's potential to succeed in the major. Those who can test out of MUSA1100 and who wish to fulfill the Arts Core requirement with a music course should take MUSA1200 Introduction to Music, MUSA1300 History of Popular Music, or MUSA1701 Aesthetic Exercises. Outside of Music, Core courses in Art, Art History, and Film or Theatre are also possible instead of Music and are recommended for those who wish to acquire a broader and deeper understanding of the Arts.

Sophomore Year

Harmony and Chromatic Harmony should be taken in sequence along with MUSA1090–2090 Ear Training/Sight Singing Labs. Two history courses in Western Music (selected from Medieval-Renaissance, Baroque Music, Music of the Classical Era, Music of the Romantic Era, Music of the Modern Era, or a composer or genre course) or one history course and one World or Popular music course should be taken. The first year's required Listening Repertoire should be mastered. Some performance experience (Orchestra, Chorale, Band, Chamber Music, non-Western performance, and/or private lessons) should be started and pursued throughout the major.

Junior Year

Counterpoint and a choice of Jazz Harmony, Form and Analysis, or Composition and a second or third history course and/or course in World or Popular music should be taken. The second year of the required Listening Repertoire should be mastered.

Senior Year

Any advanced courses in the department relevant to a student's chosen emphasis—performance, composition, history, or cultural studies—and the Senior Seminar, which is designed to synthesize previous course work. The final year of the required Listening Repertoire should be mastered.

Recommended Course of Study: Minors

Students can add music as a minor as late as their junior year, but no later than second semester as the minor requires a minimum of three consecutive semesters in order to complete the theory sequence of the following: Fundamentals, Harmony, and Chromatic Harmony. The history and cultural studies component may be taken at any time in conjunction with various levels of theory, although some understanding of Fundamentals is recommended for students with little previous, formal background in music.

Philosophy

To study philosophy is to engage in systematic reflection on the most fundamental questions about ourselves and our world. Studying philosophy provides the critical skills, the historical understanding, and the vision necessary to meet existential and ethical challenges, and live richer, more self-aware lives. As students prepare to become citizens, professionals, parents, and men and women for others, the study of philosophy is strong preparation for a wide variety of enterprises. Both as a Core requirement and as a major, Philosophy is foundational in helping us appropriate our intellectual and spiritual heritage and develop self-understanding anew.

Philosophy has been central to the educational mission of Boston College since its founding. The prominence of philosophy in the curriculum reflects our Jesuit heritage. From the beginning, Jesuit colleges emphasized the values of authentic Christian humanism, the power of human intelligence, and the mutual compatibility of faith and reason.

The study of philosophy remains among the most relevant and urgent of pursuits. It investigates life's perennial questions—questions of ultimate meaning and value, truth and rationality, being and transcendence. The mission of the Philosophy Department at Boston College is to provide an encouraging and supportive environment for the exploration of these questions, and for the critical examination of philosophical traditions that inform our personal and professional lives. Toward that end, we offer a broad spectrum of courses with a special focus on the history of philosophy, and fundamental contemporary problems in practical philosophy.

A Philosophy major is excellent preparation for careers in numerous fields including law, business, and medicine. The study of philosophy teaches highly useful and highly transferrable skills. Philosophy also blends well with other majors because it speaks to issues that are foundational to numerous disciplines and career paths. For students entering fields such as science, medicine, law, public service, economics, finance and management, the Philosophy Department offers optional tracks within the major to provide focus and direction toward career goals.

[Philosophy Courses](#)

[Philosophy Faculty](#)

[Philosophy Website](#)

Major Requirements

All Philosophy Majors must complete a total of 30 credits in Philosophy, as follows:

- Two Core courses in Philosophy (6 credits)
- Eight Philosophy electives (24 credits):
 - 1 course in the History of Philosophy
 - 1 course in Knowledge and Reality
 - 1 course in Ethics and Value
 - 5 free electives

Lists of courses satisfying each of the three distribution requirements (2a-c) can be found on the Philosophy Department website. Students may take up to two cognate courses in other departments for elective credit toward the Philosophy major. The courses must be philosophical in content and/or substantially contribute to the enhancement of the student's chosen area of study. Cognate courses must be approved by the Director of Undergraduate Studies.

Students wanting further focus for their electives may select a track within the major. Tracks are satisfied by completing two electives from within the track area, in consultation with the major advisor. The Philosophy Department offers the following major tracks:

Science, Ethics, and Humanity Track

- Designed for students preparing for careers in science and medicine

Law, Public Policy, and Economics Track

- Designed for students preparing for careers in law, politics, economics, or business/finance

Philosophy, Religion, and the Arts Track

- Designed for students preparing for careers in theology, ministry, or the arts

Philosophy Minor

All Philosophy Minors must complete a total of 18 credits in Philosophy, as follows:

- Two Core courses in Philosophy (6 credits)
- Four Philosophy electives (12 credits)

No particular course or course distribution is required of minors. Each student will design his or her own minor in consultation with a faculty advisor.

Core Requirement in Philosophy

As part of the Core Curriculum at Boston College, all students take a two-semester Philosophy Core sequence. There are several ways to complete the Philosophy Core requirement:

- PHIL1070–1071 **Philosophy of the Person I and II**
 - Fall/Spring: 3 credits per semester. Satisfies Philosophy Core.
- PHIL1090–1091 **Perspectives on Western Culture I and II**
 - Fall/Spring: 6 credits per semester. Satisfies Philosophy Core and Theology Core.
- PHIL1088–1089 **Person and Social Responsibility I and II (PULSE)**
 - Fall/Spring: 6 credits per semester. Satisfies Philosophy Core and Theology Core.
- PHIL 2150–2151 **Philosophical Perspectives on Science**
 - Fall/Spring: 3 credits per semester. Satisfies Philosophy Core. Designed for students majoring in the natural and social sciences.
- One of our new **Enduring Questions** courses, available to freshmen only.
 - One 3-credit Philosophy Core course paired with a Core course from another discipline. Satisfies one semester of the two-semester Philosophy Core requirement. Students complete the second semester of Philosophy Core with Philosophy of the Person I or II.

It is strongly recommended that students complete the Philosophy Core requirement by the end of sophomore year. Core courses are foundational, providing skills and background knowledge presupposed by more advanced courses in the college. Philosophy of the Person, PULSE, and Perspectives are each two-semester sequences, with the second semester designed to build upon the first, and thus should be taken in order—e.g., Philosophy of the Person I before Philosophy of the Person II.

The Honors Program in Philosophy

The Philosophy Department offers highly qualified majors the opportunity to participate in a departmental honors program. Application to the honors program is by invitation only, based on GPA and/or nomination by a member of the faculty. Invitations to apply will be extended by the Director of Undergraduate studies in the fall of the junior year. Applications are due early in the spring of the junior year.

Accepted students will pursue a year-long research project in the senior year, under the direction of a faculty mentor, culminating in a thesis of approximately 50–75 pages. Honors students participate in a Philosophy Honors Seminar in the fall semester of senior year and complete the project in consultation with a faculty advisor in the spring.

The department arranges seminar meetings and social events to provide an intellectual community for honors program participants. The Department also participates in the Scholar of the College Program, details of which can be found in the Morrissey College of Arts and Sciences section.

Perspectives Program I–IV

The Perspectives Program at Boston College is a four-year interdisciplinary program centered upon the great books of the Western intellectual tradition. It integrates the humanities and natural sciences in order to help students work out for themselves a set of coherent answers to such questions as the following: Who are we? Where do we come from? Where are we going? The Perspectives Program seeks (1) to educate the whole person, (2) to help students develop skills in practical living and critical thinking, and (3) to form students who are intelligent, responsible, reasonable, attentive, and loving.

Students in the Perspectives Program complete the Philosophy major by completing the following sequence of four Perspectives courses:

- Perspectives I
 - PHIL1090–1091 (THEO1090–1091) **Perspectives on Western Culture I and II**
 - Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core and 6-credit Theology Core. Normally open to freshmen only.
- Perspectives II
 - UNAS1104–1105/UNAS1106–1107 **Modernism and the Arts I and II**
 - Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core, 3-credit Fine Arts Core, 3-credit Literature Core.
- Perspectives III
 - UNAS1109–1110/UNAS1111–1112 **Horizons of the New Social Sciences I and II**
 - Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core, 6-credit Social Sciences Core.
- Perspectives IV
 - UNAS1119–1120/UNAS1121–1122 **New Scientific Visions I and II**
 - Fall/Spring: 6 credits per semester. Satisfies 6-credit Philosophy Core and **either** 6-credit Natural Science Core **or** 3-credit Mathematics Core, 3-credit Natural Science Core.

Each Perspectives course is a year-long, 12-credit course. Each is designed to fulfill the Core requirements of the relevant departments. While Perspectives I is normally open only to freshmen, Perspectives II, III, and IV are open to students at any rank, and need not be taken in order. Descriptions of Perspectives II, III, and IV are in the University Courses section of the course catalog.

The Perspectives Concentration in Philosophy

By taking more than one Perspectives course, students can pursue a Perspectives Concentration towards either a major or a minor in Philosophy. Students who complete any three Perspectives courses will, in addition to fulfilling various Core requirements, fulfill the requirements for a minor in Philosophy. Students who complete all four Perspectives courses, plus two philosophy elective courses, fulfill the requirements for a major in Philosophy.

Admission to the Perspectives concentration in philosophy comes at the end of the sophomore year. A minimum GPA of 3.50 will be required for admission. Questions concerning the requirements for the concentration, or other opportunities and possibilities within the Perspectives Program, can be directed to perspectives@bc.edu.

The PULSE Program for Service Learning

With its mission to educate Boston College students for social justice, the PULSE Program for Service Learning educates more than 500 undergraduates each year through the integration of community-based social service and social advocacy fieldwork with the study of theology and philosophy. The PULSE Program offers its signature Core course, "Person and Social Responsibility," in addition to a few elective courses. For a full description of the program, please visit the PULSE website at bc.edu/pulse.

Fifth Year B.A./M.A. Program

Undergraduate Philosophy majors may opt to enter a five-year B.A./M.A. program. Application to the program will normally take place during the junior year.

Students admitted to the B.A./M.A. program will follow the curriculum for Philosophy majors, except that two courses taken during the senior year must be eligible for graduate credit. These two courses will count toward both the M.A. and the B.A. The remainder of the M.A. may be completed by taking eight additional graduate courses, submitting an M.A. qualifying paper in the fifth year, and satisfying the M.A. language requirement.

Interested undergraduate Philosophy majors should consult with the Director of the Graduate Program during junior year and must apply to the Graduate School of the Morrissey College of Arts and Sciences. Expectations are that such applicants will have achieved an overall GPA of at least 3.33 and a major GPA of 3.5 or above. For internal applicants, the application fee is waived, and the GRE is not required.

Physics

The Department of Physics offers a comprehensive program of study leading to the B.S. degree in Physics. This program is designed to prepare students not only for advanced graduate studies in physics or a related field but also for employment upon graduation in physics and other disciplines related to science and technology. Basic courses give students a solid foundation in the concepts of classical and modern physics and assist them in developing their analytical reasoning and problem-solving skills. Laboratory courses complement this experience with an opportunity to develop experimental skills and a working knowledge of advanced technology and computational techniques. Students are strongly encouraged to further develop all these skills by participating in advanced experimental, analytical, or computational research under the supervision of faculty mentors, and we will make every effort to find a suitable research opportunity for all interested students with our faculty members.

[Physics Courses](#)

[Physics Faculty](#)

[Physics Website](#)

Physics Major

The minimum requirements for the B.S. degree with a major in Physics include 44 credits in Physics, as described below, and additional corequisites in Mathematics and other sciences.

Physics Requirements

- PHYS2200 (or PHYS2100*) Introductory Physics I
- PHYS2201 (or PHYS2101*) Introductory Physics II
- PHYS2050 Introductory Physics Lab I
- PHYS2051 Introductory Physics Lab II
- PHYS3100 Vibrations and Waves
- PHYS3300 Modern Physics
- PHYS4100 Classical Mechanics
- PHYS4200 Electricity and Magnetism
- PHYS4400 Quantum Physics I
- PHYS4401 Quantum Physics II
- PHYS4500 Applied Mathematics for Physical Scientists**
- PHYS4600 Statistical Mechanics and Thermodynamics At least 3 credits of a course, chosen from:
 - PHYS4300 Numerical Methods and Scientific Computing
 - PHYS4951 Senior Thesis
 - PHYS4350 Experiments in Physics

*Physics majors are strongly recommended to take the PHYS2200-2201 sequence. PHYS2100-2101 is typically for Biology, Pre-med, and students fulfilling science requirements.

**Students may replace with both MATH2210 Linear Algebra and MATH4410 Differential Equations

- At least 6 credits of an advanced (at or above the 4000 level) elective course. Courses vary from year-to-year, but recent offerings include:
 - PHYS4505 Nuclear and Particle Physics
 - PHYS4515 The Physics of Conventional and Alternative Energy
 - PHYS4525 Foundations of Plasmonics
 - PHYS4535 Nanoscale Integrated Science
 - PHYS4545 Introduction to Condensed Matter Physics

- PHYS4555 Optics
- PHYS5540 General Relativity; Cosmological Implications
- PHYS4595 Introduction to Quantum Computing
- MATH4440 Dynamical Systems
- Advanced undergraduate Physics majors may, with departmental approval, enroll in first-year graduate courses, such as PHYS7711, 7732, or 7741.

Corequisites

Students are also required to take the following courses.

Mathematics

MATH2202 Multivariable Calculus***

***Students without advanced math placement will need to take introductory calculus courses, such as MATH1103, which is a prerequisite for MATH2202.

Chemistry

- CHEM1109–1110 and associated labs; other science courses, along with their associated labs, may qualify but require prior departmental approval.

Computer Science

- CSCI2227 Introduction to Scientific Computation

Applied Physics Major

The Applied Physics major provides a flexible platform for students to combine a strong interest in the concepts and analytical tools of physics with any one of the varied applications of those tools to societal problems. In consultation with our Undergraduate Program Director, students will tailor an interdisciplinary program of study to focus on topical areas such as quantum computation, materials science, energy and the environment, biophysics, mathematical physics, financial modeling, and more. The curriculum will culminate in a research project with a physics faculty member, or jointly supervised by faculty members from multiple departments. This track is recommended for students planning to enter the workforce after graduation rather than applying to graduate school in physics or related disciplines.

Physics Requirements

- PHYS2200 (or PHYS2100*) Introductory Physics I
- PHYS2201 (or PHYS2101*) Introductory Physics II
- PHYS2050 Introductory Physics Lab I
- PHYS2051 Introductory Physics Lab II
- PHYS3100 Vibrations and Waves
- PHYS3300 Modern Physics
- PHYS4500 Applied Math for Physical Scientists**
- PHYS4700 Survey of Applied Physics
- At least two of the following Advanced Physics Courses
 - PHYS4100 Classical Mechanics
 - PHYS4200 Electricity & Magnetism
 - PHYS4400 Quantum Mechanics I
 - PHYS4401 Quantum Mechanics II (QM I prerequisite)
 - PHYS4600 Statistical Physics

* Physics majors are strongly recommended to take the PHYS2200-2201 sequence. PHYS2100-2101 is typically for Biology, Pre-med, and students fulfilling science requirements.

**Students may replace with both MATH2210 Linear Algebra and MATH4410 Differential Equations

- At least 3 elective courses at or above the 4000 level. May include courses from the Advanced Physics Course list above. Courses vary from year-to-year, but recent offerings include:
 - PHYS4505 Nuclear and Particle Physics
 - PHYS4515 The Physics of Conventional and Alternative Energy
 - PHYS4525 Foundations of Plasmonics
 - PHYS4535 Nanoscale Integrated Science
 - PHYS4545 Introduction to Condensed Matter Physics
 - PHYS4555 Optics
 - PHYS5540 General Relativity; Cosmological Implications
 - PHYS4595 Introduction to Quantum Computing
 - MATH4440 Dynamical Systems
- Applied Physics Capstone Project PHYS4955

Corequisites

Applied Physics Majors are also required to take the following courses.

Mathematics

MATH2202 Multivariable Calculus***

***Students without advanced math placement will need to take introductory calculus courses, such as MATH1103, which is a prerequisite for MATH2202.

Computer Science

CSCI2227 Introduction to Scientific Computation

Other Science

Two introductory science courses outside of physics

Physics Minor Requirements

The minimum requirements for a minor in Physics include 24 credits in Physics and 8 corequisite credits, as described below:

- PHYS2200 Introductory Physics I
- PHYS2201 Introductory Physics II
- PHYS2050 Introductory Physics Lab I
- PHYS2051 Introductory Physics Lab II
- PHYS3100 Vibrations and Waves
- PHYS3300 Modern Physics
- Two upper-level courses (PHYS4000 and above) of 3 or more credits each.

Students should discuss course selection with the Undergraduate Program Director.

Information for First-Year Majors and Non-Majors

Physical science, computer science, and mathematics majors planning on taking physics in their freshman year should enroll in PHYS2200 and the associated lab PHYS2050. Biology majors and premedical students should enroll in PHYS2100 with the associated discussion section and lab PHYS2050. Depending on high school background, Physics majors take either the Calculus I–II sequence MATH1102–1103, or Calculus II–AP MATH1105 or start with Multivariable Calculus MATH2202. Note that MATH1100–1101 is intended for Biology and Premedical students and is not sufficient calculus preparation for Physics majors. Students who are interested in studying abroad are strongly encouraged to do so during the spring semester of their junior year. While planning their study abroad program, Physics majors should meet with the Undergraduate Program Director. Students should inquire early at the Office of International Programs, and with possible host institutions, to arrange for a course of study appropriate for physics majors.

Information for Study Abroad

Before undertaking study abroad, it is strongly recommended that the Physics major complete PHYS2200, PHYS2201 (or PHYS2100, 2101) with labs, PHYS3100, PHYS3300 (also with labs), and the corequisite math course MATH2202. The Department typically allows a maximum of four courses taken abroad to count for major credit. Of these four courses, two should be major required courses, plus two Physics electives. The department recommends any program with a solid teaching and research program in physics.

Students who are interested in studying abroad are strongly encouraged to do so during the spring semester of their junior year. While planning their study abroad program, Physics majors should meet with the Undergraduate Program Director. Students should inquire early at the Office of International Programs, and with possible host institutions, to arrange for a course of study appropriate for physics majors.

Course Offerings

Courses numbered below 2000 are introductory courses directed primarily toward non-science majors. These courses have no prerequisites and need no mathematics beyond ordinary college entrance requirements. The courses that satisfy the Natural Science Core requirement are noted in the individual course descriptions. PHYS2100–2101 Introductory Physics I, II (Calculus) or PHYS2200–2201 Introduction to Physics I, II (Calculus) and PHYS2050–2051 Introductory Physics Laboratory I and II are required of all Chemistry and Physics majors; Biology majors should consult the Biology Department regarding Physics requirements. Courses numbered above 3000 are advanced offerings primarily for Physics majors.

Political Science

An undergraduate major in Political Science provides a foundation for careers in politics, public administration, international service, law, business, and journalism, as well as a foundation for graduate work and teaching in the social sciences.

The Political Science major at Boston College consists of ten courses: two introductory courses; at least one course in each of the four subfields of political science (American Politics; Comparative Politics; International Politics; and Political Theory); and four electives from any of the subfields. Please note that courses, not credits are the fundamental building block of the major. In order to complete the major, students must complete 10 political science courses that are each worth at least 3 credits. Thus, for the purposes of the major, three 4-credit political science courses from another institution are counted as three courses (they are not equivalent to four 3-credit courses). The larger number of credits for a single course from another institution may count toward the aggregate credits required for BC graduation, but that course will still count as a single course toward the major's ten-course requirement. (A "double course" transferred from abroad, however, that spans two semesters, and carries 6–8 credits, will be counted as two elective courses for the major.)

[Political Science Courses](#)

[Political Science Faculty](#)

[Political Science Website](#)

The Introductory Sequence

With some exceptions as noted below under **Qualifications, Exceptions, and Special Rules**, all majors should take one of the following introductory courses: Fundamental Concepts of Politics (POLI1041) or How to Rule the World (POLI1021). In addition, students should take a second introductory course, selected from the following: Introduction to Modern Politics (POLI1042); Introduction to American Politics (POLI1061); Introduction to International Politics (POLI1081); or Introduction to Comparative Politics (POLI1091).

- POLI1021, POLI1061, and POLI1091 satisfy the Social Sciences Core and are open to majors and non-majors.
- POLI1041, POLI1042, and POLI1081 satisfy the Social Sciences Core and are restricted to majors only.

Note: It is not essential to take Fundamental Concepts of Politics or How to Rule the World before Introduction to Modern Politics, Introduction to American Politics, Introduction to Comparative Politics, or Introduction to International Politics; nor is it essential to take either or both of the introductory courses in the freshman year. **Many students do not begin their major until sophomore year, and they have no difficulty finishing it on time.**

The introductory curriculum in political science is not like that in other majors, such as economics or the natural sciences. It does not present a single curriculum that all students are expected to know before moving on to higher-level courses. Rather, the introductory curriculum is designed to expose students to the study of politics in a variety of ways. Thus, each faculty member who teaches POLI1041 (Fundamental Concepts) will have his or her own particular approach.

There is, however, some common ground. POLI1041 (Fundamental Concepts of Politics) and POLI1021 (How to Rule the World), are devoted principally to a study of some of the classic texts in political theory. POLI1042 (Introduction to Modern Politics), POLI1061 (Introduction to American Politics), POLI1081 (Introduction to International Politics), and POLI1091 (Introduction to Comparative Politics), all emphasize philosophical, conceptual, and analytical foundations for understanding their substantive domains. Critical dialogue—in the classroom and in some cases, in discussion sections—is central to the way these introductory courses are taught.

Beyond the Introductory Sequence

Students go directly from introductory courses into upper-level electives. These electives do not have to be taken in any particular order. The second digit of course numbers indicates the subfield. Courses with a "3" in that location (e.g., 2300) are in American Politics; courses with a "4" in that location (e.g., 2400) are in Comparative Politics; courses with a "5" in that location (e.g., 2500) are in International Politics; and courses with a "6" in that location (e.g., 2600) are in Political Theory. Students must take eight courses **beyond** the introductory courses and at least one course must be taken in each of the four subfields: American Politics, Comparative Politics, International Politics, and Political

Theory. All courses that do not fulfill the subfield or introductory requirements will be counted as electives in the major. The subfield requirements must be satisfied by courses taken in the department; courses taken abroad or transferred from other institutions may only be used to fulfill introductory or elective requirements. Furthermore, to fulfill the major, at least six courses of the ten courses required must be taken in the Political Science Department in the Morrissey College of Arts and Sciences. No more than four courses in total, then, can be transferred from outside the department, including other U.S. institutions or study abroad programs.

There is a considerable variety in our elective offerings because each faculty member has a rotating set of courses and usually teaches four of these each year. There are approximately 100 courses open to undergraduates over a four-year period. Some of these courses are seminars, which meet once a week and are usually limited to 15–19 members so that there is much more opportunity for sustained and intense analysis of texts and problems than there is in a conventional lecture/discussion format. With the exception of the special Sophomore Seminars, seminars are open only to juniors and seniors.

The amount of work required in all of our courses is generally high. Clarity of thought and writing are two sides of the same skill, and for this reason, our courses place special emphasis on writing skills. In addition, most courses encourage classroom discussion on a regular basis so that students may be graded on their participation in class as well as on their writing and exams.

Degree Requirements

Fields and Electives

- Two introductory courses: One introductory course must include either Fundamental Concepts of Politics (POLI1041) or How to Rule the World (POLI1021). The other introductory course must include one of the following: Introduction to Modern Politics (POLI1042); Introduction to American Politics (POLI1061); Introduction to International Politics (POLI1081), or Introduction to Comparative Politics (POLI1091).
- At least one course in each of the four subfields of Political Science: American Politics (POLIX300–X398), Comparative Politics (POLIX400–X499), International Politics (POLIX500–X599), and Political Theory (POLIX600–X699), for a total of four subfield courses.
 - **NB:** POLI1021 (How to Rule the World) may also satisfy the subfield requirement in Political Theory; POLI1061 (Introduction to American Politics) in American Politics; POLI1081 (Introduction to International Politics) in International Politics; and POLI1091 (Introduction to Comparative Politics) in Comparative Politics. They may not, however, satisfy the Introductory requirement and the subfield requirement at the same time.
- Four electives from among any courses offered by the department that are not introductory courses.

Note: Courses designated as POLIX200–X299 count as electives toward the major but do not fulfill any of the four subfield distributional requirements. Courses numbered POLI7700 and above are graduate courses.

Qualifications, Exceptions, and Special Rules

- **AP Credit:** Students who scored a 4 or 5 on either of the AP exams in Government and Politics (American or Comparative) may place out of the requirement for the second introductory course (but not the first). It will still be necessary to take 10 courses in the major -- you will take five electives instead of the usual four.
- **Late Majors:** Students who join the major *after their sophomore year* should not take Introductory courses. With department permission, they may substitute other elective courses for the standard introductory sequence. In this case, *students will still need to take ten courses (six electives instead of the usual four) and will need to complete and submit the online Degree Audit Course Substitution and Waiver Form which is found on the [Academic Forms and Diploma Information](#) web page, in order to slot the extra electives into the introductory requirements on the Degree Audit.*
- **Woods College Courses:** The courses in Political Science offered in the Woods College of Advancing Studies are separate from the courses offered in the Department and cannot generally be used towards the major. Students who believe they have a compelling reason to use a Woods College of Advancing Studies course for the major as an elective course must petition the Department's Director of Undergraduate Studies prior to the start of the class to see whether an exception can be made.
- **Transfer Courses:** Students studying abroad or transferring to Boston College from another institution may transfer up to four courses from other institutions, including study abroad programs; however, in no case may a student earn a degree in Political Science without taking at least six courses (**18 credits**) in the Department. Transfer credits and study abroad credits may not be used to satisfy the four subfield distributional requirements.

Please Note: Even after the University has accepted a transfer or a study abroad course for your MCAS requirements, you will need

to complete and submit the online Degree Audit Course Substitution and Waiver form which is found on the [Academic Forms and Diploma Information](#) web page to get it counted for the major. The form will be routed to the Director of Undergraduate Studies for review and approval. Study abroad courses must first be approved by one of the Department's study abroad advisors.

Honors Program

The Department of Political Science has established its own Honors program to encourage and reward high academic achievement among its majors. Admission to the program is by invitation from the Department. Each year approximately 15 Political Science majors who have completed the sophomore year are invited to join the Honors program. Selection is based on academic records within the major and overall. The Honors program seeks to provide additional opportunities for intellectual exchange and friendship among students as well as with the faculty. The Department hopes that the spirit of the Honors program will in turn extend to all our classes.

Honors Seminar: The Department offers special Honors Seminars on a variety of topics to members of the program. These are topics not ordinarily available in our course offerings, and they frequently focus on the special interests of faculty in important policy questions or intellectual puzzles. The intention of these seminars is to provide a setting in which students who have shown their lively and nimble engagement with politics can come together with others who share their enthusiasm, for the enjoyment and rewards of shared scholarly exploration. Members of the Honors program must take two Honors Seminars over the course of their junior and senior years, in addition to the ten courses otherwise required for the major. Students seeking to complete the Honors program and graduate with Honors must, therefore, take at least 12 Political Science courses in all.

One Honors Seminar is given each semester. The seminars are scheduled a year in advance so that students can plan their programs (especially important for students who will be studying abroad for one or two semesters). Because these seminars are beyond the regular requirements for the major, *they do not exempt the student from the requirement of taking one course in each of the four subfields in Political Science*. With the permission of the Director of the Honors program, Honors students may substitute one graduate seminar for one of the two required Honors Seminars, subject to the approval of the faculty member teaching the seminar.

Honors Thesis: As a culmination of the Honors program, members may write an Honors Thesis during their senior year. An Honors Thesis is generally a two-semester project, for which students earn credit for two elective courses in the major (Honors Thesis I and II, designated in the catalog as POLI4961 and POLI4962).

Students participating in the Honors program are eligible for one of three Honors designations when they graduate: Honors, High Honors, and Highest Honors in Political Science. All members of the program who complete at least 12 courses in Political Science, including two Honors Seminars, are eligible to graduate with Honors if they have sustained a record of academic excellence in the major. Members of the program who choose to write an Honors Thesis, and do so successfully, will be eligible to be considered for High or Highest Honors.

For further information on the Political Science Honors Program, contact the Director of the Honors Program.

Study Abroad

Study abroad is an excellent way for Political Science majors to gain a comparative and cross-cultural perspective on politics. The Political Science Department encourages students to study abroad, so long as they have a strong academic record and have prepared themselves. They should choose their study abroad location with care, to ensure that the courses taken abroad meet the Department's expectations with respect to quality and content.

Students planning to go abroad should begin the process with the Office of Global Education (OGE). Their office provides information on specific programs and steps for applying. After exploring the available options, students should consult with one of the Political Science Department's study abroad advisors. Advisors can help students confirm that they are far enough along in the major so that they can finish in time to graduate and can successfully integrate the study abroad program with other academic plans. Students who are in the Department's Honors Program, for example, need to plan carefully to coordinate study abroad with the Honors requirements.

Note: Political Science majors should be aware that not all study abroad sites available to Boston College students will have courses acceptable toward the major. Some sites lack political science departments or have weak political science offerings. The Department's study abroad advisors will also advise students about which programs and courses abroad will be acceptable with respect to the Political Science major. Although the OGE seeks to maintain updated lists of "pre-approved" sites and courses, those lists are not authoritative, and sites and

courses on such lists may in fact no longer be acceptable to the department. *Students are urged to gain approval for specific courses from the department's study abroad advisors before departing.* A student who seeks approval only after they return from abroad risks not receiving approval for study abroad courses. Always ask first, and if circumstances in the host country change (as they frequently do), e-mail one of the study abroad advisors for advice.

The Department will accept no more than two courses per semester from an institution abroad or four courses for an entire year. These courses will count as major electives only. As noted above, the four courses for the field distributional requirement in the Political Science major (one each in American, Comparative, International Politics, and Political Theory) must be taken at Boston College. No courses taken abroad will be accepted for these distributional requirements. Again, bear in mind that *courses, not credits*, are the building blocks of our major. Single courses taken abroad that carry 3 or more credits will be counted as single courses in the major. Thus, for the purposes of the major, three 4-credit political science courses from another institution are counted as three courses (they are not, in other words, treated as equivalent to four 3-credit BC political science courses). Final approval of courses taken abroad must be approved by one of the study abroad advisors in the department.

Note that the Office of Global Education requires all study abroad applicants to have a conversation with a faculty member about their study abroad plans. Students may fulfill this requirement by having a conversation with the Political Science study abroad advisor, their major advisor, or another faculty member on BC's campus.

To be eligible for elective course credits toward the Political Science major while studying abroad, a student should have at least a 3.0 GPA generally and in the Political Science major before departing. Students with GPAs below this should contact one of the Department's study abroad advisors about the possibility of being granted a waiver to this requirement.

Because gaining foreign-language fluency is one of the main benefits of study abroad, Political Science majors are encouraged to seek study abroad programs in non-English-speaking countries. Students who believe that their foreign-language skills are not advanced enough to take college courses abroad in a foreign language should consider study-abroad programs in foreign-language countries where universities offer courses to their own students in English. Information about such programs can be obtained from the Office of Global Education at Hovey House.

Students should also know that they can apply for grants and scholarships that will help pay for the costs of studying abroad. For a list of such opportunities, check the [University Fellowships Committee](#) website.

Summer Courses

Students may take external summer courses for enrichment or to make up for a past failure, withdrawal, or underload. **Approval of external summer courses to count for the major is at the discretion of the department.**

Students who wish to take an external summer course at any degree-granting accredited four-year college or university must have the course pre-approved prior to taking the course. The online Course Pre-Approval Form should be completed and submitted prior to registering for the course. This online form is found at the [Academic Forms and Diploma Information](#) web page. The online form should include supporting documentation as requested. Once this form is completed and submitted, the form will be routed to the Director of Undergraduate Studies before the form is sent to the appropriate Associate Dean for final approval. Any external summer course counts towards the elective requirement only.

Students who take Political Science Morrissey College summer courses offered by the Boston College Summer Session and are taught by department faculty do not need to complete a Course Pre-Approval Form or need department approval. These Boston College Summer Session courses will count toward the expected number of courses or credits required for graduation, and grades will be calculated into the GPA. Students may only take online courses that have the MCAS department code, POLI.

Thesis Writing Outside the Honors Program

With department permission, students who are not members of the Honors Program may still have the opportunity to write a thesis by enrolling in POLI4951–4952 (Thesis I and II). This is an opportunity open to seniors, and the first step is to speak with a faculty member, during your junior year, who might be willing to act as your thesis supervisor. The thesis courses do not satisfy subfield requirements in the major, but they may be used to satisfy elective requirements.

Scholar of the College Program

Scholar of the College is a special designation conferred at Commencement on seniors who have successfully completed particularly creative, scholarly, and ambitious Advanced Independent Research projects during their senior year while maintaining an overall cumulative grade point average of 3.700 or better. Students interested in this program should consult the University's website for further information. (In this Department, Scholars projects are done under the course number POLI4921 Advanced Independent Research.)

Awards and Fellowships

Advanced Study Grants

The Boston College Advanced Study Grants were established to encourage, support, and give visible recognition to undergraduates who have that special spark of scholarly initiative and imagination. Students with these qualities should also be thinking of themselves as prospective candidates for national fellowships, such as the Rhodes, Marshall, Fulbright, Goldwater, or Truman. An Advanced Study Grant for a summer project can be an important step along the way. For more information on the ASG program, consult the University's website.

Advanced Study Grants are for student-designed projects. They are not awarded for projects in which a student proposes to work with a faculty member on the faculty member's research. For faculty-designed projects, Boston College has Undergraduate Research Fellowships.

Students intending to write an Honors Thesis or Senior Thesis should consider applying in their junior year for Advanced Study Grants for Thesis Research, which fund summer research or skills-acquisition projects in direct support of a senior project that will be undertaken during the student's senior year.

Undergraduate Research Fellowships Program

The Undergraduate Research Fellowships program enables students of at least sophomore status to gain firsthand experience in scholarly work by participating with a faculty member on a research project. Faculty members who have an Undergraduate Research Fellowship will select students to work as their Undergraduate Research Fellows. Undergraduate Research Fellows are paid an hourly wage for the work they complete for the duration of the semester's work period. Students do not receive academic credit for these fellowships. Their value lies in the close mentoring relationship students can form while working with a faculty member. All full-time undergraduates of at least sophomore status are eligible. Fellowships are available for the fall, spring, and summer semesters. For more information on the program and application deadlines, consult the website for the University Fellowships Committee or inquire directly with faculty to express your interest in being involved in their research.

National Fellowships Competitions

Boston College students need to be aware, early in their undergraduate careers, of the fellowships and awards given on a competitive basis by national foundations. Fulbright Grants, Marshall Scholarships, Mellon Fellowships, National Science Foundation Fellowships, Rhodes Scholarships, and Truman Scholarships are among the major grants available. Some of these are available to juniors and seniors for undergraduate study. In order to have a realistic chance of competing for one of these awards, students need to plan ahead. Students interested in pursuing any of these opportunities should contact Dr. Jason Cavallari, the Director of the University Fellowships Office. Many of these opportunities are especially for students planning a future in public service, so they are very appropriate for Political Science majors. In recent years, several of the Department's majors have, for instance, been awarded Fulbright Grants and Truman Scholarships. We encourage students to plan and prepare early—freshman year is not too early.

For further information about national fellowships, consult the [University Fellowships Committee](#) website.

Psychology and Neuroscience

Psychology is the scientific study of how and why people think, feel, and behave as they do. Psychology focuses on understanding basic functions such as memory, emotion, visual perception, social interaction, development and learning, and problem-solving and creativity, as well as on alterations to these functions in psychopathology, developmental disorders, or neurological disorders. Faculty in our department approach these topics from multiple, converging levels, using assessments of individual behavior, dynamic group interactions, and investigations of the neural processes and computations that give rise to behavior. Our courses embody the philosophy of Boston College's liberal arts education, providing students the opportunity for intellectual growth and a deeper understanding of the scientific method as applied to the human condition. Our courses also provide the knowledge and tools necessary for students to prepare for graduate training.

The Department of Psychology and Neuroscience offers three majors: the Psychology Bachelor of Arts (B.A.) major, the Psychology Bachelor of Science (B.S.) major, and the Neuroscience Bachelor of Science (B.S.) major. All three degree options introduce students to the broad range of topics that psychologists study, while also allowing students to choose an individualized course of study and focus on some aspects of psychology in greater depth. Each option allows students to gain research experience working in one or more of our labs.

The Psychology B.A. and the Psychology B.S. majors are particularly suited to students who wish to understand human behavior and mental function. Students will take Psychology courses relevant to social, developmental, biological, and cognitive psychology and will learn how animal models can be used to inform human behavior. Together these courses will provide students with an appreciation for the theories that have been put forth to explain human behavior and for the importance of considering clinical, cultural, social, biological, and developmental factors when trying to understand why humans think, feel, and act as they do. Both degree options introduce students to the broad range of topics that psychologists study, while also allowing students to choose an individualized course of study and focus on some aspects of psychology in greater depth.

The Psychology B.S. is a research-focused track. Students interested in psychology as it relates to other scientific disciplines and/or who are planning to pursue research-focused graduate work (e.g., Ph.D., M.D.) are encouraged to select the B.S. major. B.S. students will take courses in Psychology and choose from elective corequisites in departments including Economics, Computer Science, Biology, Chemistry, and Physics. Together these courses will provide students with an in-depth understanding of the scientific study of the human mind and with opportunities for exposure to hands-on, laboratory science. This major is well-suited for students interested in a research-based approach to psychology. For students who are more likely to pursue graduate work without a focus on research (e.g., social work, law, Psy.D., Ed.D.) and/or would like greater flexibility in their course schedule, the B.A. may be more appropriate.

The Neuroscience B.S. is a research-focused degree for students who are interested in understanding the biological basis of brain function in relation to thought and behavior. The major has co-requisites in Biology and Chemistry as well as elective natural science corequisites and emphasizes exposure to hands-on, laboratory science. Students will take courses that are related to evolution, genetics, physiology, neurobiology, and the neural basis of higher cognitive and emotional processes in humans. Together these courses will provide students with a strong foundation in the neurobiological processes that underlie behavior, motivation, and cognition. The Neuroscience major covers many of the pre-medical requirements.

Starting with the class of 2028 the Psychology B.A. and B.S. major requirements will change, resulting in distinct requirements for the classes of 2028 and after and for the classes of 2027 and before.

[Psychology and Neuroscience Courses](#)

[Psychology and Neuroscience Faculty](#)

[Psychology and Neuroscience Website](#)

Requirements for Psychology B.A. Majors (Class of 2027 and Before)

Students must take a minimum of 33 credits, including the following required courses.

PSYC1110 and PSYC1111 should be taken in either order as early as possible. PSYC1120 and PSYC1121 (or a research practicum) should be taken sequentially and in the sophomore year when possible.

- PSYC1110 Brain, Mind, and Behavior (3 credits)
- PSYC1111 Self, Mind, and Society (3 credits)
- PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits)
- Either of the following courses (3 credits):
 - PSYC1121 Introduction to Behavioral Statistics and Research II
 - Any Research Practicum
- Three 2000-level courses, including at least one course from three of the following five areas (9 credits):
 - Biological: PSYC2285 Behavioral Neuroscience or PSYC2289 Comparative Psychology: Study of Animal Behavior
 - Cognitive: PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates or PSYC2274 Sensation and Perception
 - Developmental: PSYC2260 Developmental Psychology or PSYC2262 Baby Talk
 - Psychopathology: PSYC2234 Introduction to Psychopathology or PSYC2250 Cultural Psychology
 - Social and Personality: PSYC2241 Social Psychology, PSYC2242 Personality Theories, or PSYC2245 Psychology of Motivation
- Four additional Psychology courses (12 credits): three courses numbered PSYC3000 or higher, and one numbered PSYC2000 or higher. Courses numbered PSYC4000–4199 are not eligible.

Requirements for Psychology B.A. Majors (Class of 2028 and After)

Students must take a minimum of 33 credits, including the following required courses.

PSYC1110 and PSYC1111 should be taken in either order as early as possible. PSYC1120 and PSYC1121 (or a research practicum) should be taken sequentially and in the sophomore year when possible.

- PSYC1110 Brain, Mind, and Behavior (3 credits)
- PSYC1111 Self, Mind, and Society (3 credits)
- PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits)
- Either of the following courses (3 credits):
 - PSYC1121 Introduction to Behavioral Statistics and Research II
 - Any Research Practicum
- One course from the Biological/Cognitive cluster (3 credits):
 - PSYC2272 Cognitive Psychology
 - PSYC2274 Sensation and Perception
 - PSYC2285 Behavioral Neuroscience
 - PSYC2289 Comparative Psychology
- One course from the Social/Cultural cluster (3 credits):
 - PSYC2241 Social Psychology
 - PSYC2245 Psychology of Motivation
 - PSYC2250 Cultural Psychology
- One course from the Developmental/Individual Differences cluster (3 credits):
 - PSYC2234 Introduction to Psychopathology
 - PSYC2242 Personality Theories
 - PSYC2260 Developmental Psychology
- Four additional Psychology courses (12 credits): three courses numbered PSYC3000 or higher, and one numbered PSYC2000 or higher. Courses numbered PSYC4000–4199 are not eligible.

Requirements for Psychology B.S. Majors (Class of 2027 and Before)

Students must take a minimum of 54 credits, including the following required courses:

36 Credits within the Department

- PSYC1110 Brain, Mind, and Behavior (3 credits)
- PSYC1111 Self, Mind, and Society (3 credits)

- PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits)
- Any Research Practicum (3 credits)
- Three 2000-level courses, including at least one course from three of the following five areas (9 credits):
 - Biological: PSYC2285 Behavioral Neuroscience or PSYC2289 Comparative Psychology: Study of Animal Behavior
 - Cognitive: PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates or PSYC2274 Sensation and Perception
 - Developmental: PSYC2260 Developmental Psychology or PSYC2262 Baby Talk
 - Psychopathology: PSYC2234 Introduction to Psychopathology or PSYC2250 Cultural Psychology
 - Social and Personality: PSYC2241 Social Psychology, PSYC2242 Personality Theories, or PSYC2245 Psychology of Motivation
- Five additional Psychology courses (15 credits): four courses numbered PSYC3000 or higher, and one numbered PSYC2000 or higher. Courses numbered PSYC4000–4199 are not eligible.

Computational Corequisite

- Two of the following courses (6 or more credits):
 - CSCI1101 Computer Programming I (recommended)
 - MATH1004 Finite Probability and Applications
 - MATH1100 Calculus I or MATH1102 Calculus I (Math and Science Majors)
 - MATH1101 Calculus II or MATH1103 Calculus II (Math and Science Majors) or MATH1105 Calculus II (Math and Science Majors with AP)
 - MATH2210 Linear Algebra

Science Corequisites

- Four of the following courses (12 or more credits):
 - Biology courses numbered BIOL2000 or higher, excluding BIOL2040 and BIOL2300
 - Computer Science courses numbered CSCI1102 or higher
 - Math courses numbered MATH1100 or higher
 - Physics courses numbered PHYS1500 or higher
 - CHEM1105 Chemistry and Society I
 - CHEM1106 Chemistry and Society II
 - CHEM1109 General Chemistry I with Lab (CHEM1111)
 - CHEM1110 General Chemistry II with Lab (CHEM1112)
 - ECON2201 (or ECON2203) Microeconomic Theory
 - ECON3305 Market Design
 - ECON3308 Game Theory in Economics
 - ECON3312 Evolutionary Economics
 - LING2377 Language and the Study of Africa
 - LING2379 Language and Ethnicity
 - LING3101 General Linguistics
 - LING3102 Syntax and Semantics
 - LING3103 Language and Language Types
 - LING3104 Formalism and Functionalism in Linguistics
 - LING3361 Psycholinguistics
 - LING3362 Language in Society
 - LING3378 Second Language Acquisition
 - Only one of the following Psychology laboratory courses:
 - PSYC2205 Undergraduate Research
 - PSYC4490 Senior Thesis
 - PSYC4495 Senior Honors Thesis
 - PSYC4497 Scholars Project Research

For all B.S. students, participation in research in a laboratory setting (e.g., enrolling in Senior Thesis) is strongly recommended.

Requirements for Psychology B.S. Majors (Class of 2028 and After)

Students must take a minimum of 54 credits, including the following required courses:

36 Credits within the Department

- PSYC1110 Brain, Mind, and Behavior (3 credits)
- PSYC1111 Self, Mind, and Society (3 credits)
- PSYC1120 Introduction to Behavioral Statistics and Research I (3 credits)
- Any Research Practicum (3 credits)
- One course from the Biological/Cognitive cluster (3 credits):
 - PSYC2272 Cognitive Psychology
 - PSYC2274 Sensation and Perception
 - PSYC2285 Behavioral Neuroscience
 - PSYC2289 Comparative Psychology
- One course from the Social/Cultural cluster (3 credits):
 - PSYC2241 Social Psychology
 - PSYC2245 Psychology of Motivation
 - PSYC2250 Cultural Psychology
- One course from the Developmental/Individual Differences cluster (3 credits):
 - PSYC2234 Introduction to Psychopathology
 - PSYC2242 Personality Theories
 - PSYC2260 Developmental Psychology
- Five additional Psychology courses (15 credits): four courses numbered PSYC3000 or higher, and one numbered PSYC2000 or higher. Courses numbered PSYC4000–4199 are not eligible.

Computational Corequisite

- Two of the following courses (6 or more credits):
 - CSCI1101 Computer Programming I (recommended)
 - MATH1004 Finite Probability and Applications
 - MATH1100 Calculus I or MATH1102 Calculus I (Math and Science Majors)
 - MATH1101 Calculus II or MATH1103 Calculus II (Math and Science Majors) or MATH1105 Calculus II (Math and Science Majors with AP)
 - MATH2210 Linear Algebra

Science Corequisites

- Four of the following courses (12 or more credits):
 - Biology courses numbered BIOL2000 or higher, excluding BIOL2040 and BIOL2300
 - Computer Science courses numbered CSCI1102 or higher
 - Math courses numbered MATH1100 or higher
 - Physics courses numbered PHYS1500 or higher
 - CHEM1105 Chemistry and Society I
 - CHEM1106 Chemistry and Society II
 - CHEM1109 General Chemistry I with Lab (CHEM1111)
 - CHEM1110 General Chemistry II with Lab (CHEM1112)
 - ECON2201 (or ECON2203) Microeconomic Theory
 - ECON3305 Market Design
 - ECON3308 Game Theory in Economics
 - ECON3312 Evolutionary Economics
 - LING2377 Language and the Study of Africa

- LING2379 Language and Ethnicity
- LING3101 General Linguistics
- LING3102 Syntax and Semantics
- LING3103 Language and Language Types
- LING3104 Formalism and Functionalism in Linguistics
- LING3361 Psycholinguistics
- LING3362 Language in Society
- LING3378 Second Language Acquisition
- Only one of the following Psychology laboratory courses:
 - PSYC2205 Undergraduate Research
 - PSYC4490 Senior Thesis
 - PSYC4495 Senior Honors Thesis
 - PSYC4497 Scholars Project Research

For all B.S. students, participation in research in a laboratory setting (e.g., enrolling in Senior Thesis) is strongly recommended.

Requirements for Neuroscience B.S. Majors

Students must take a minimum of 57 credits, including the following required courses.

Foundation (24 Credits)

- PSYC1110 Introduction to Brain, Mind, and Behavior (3 credits)
- Either PSYC2272 Cognitive Psychology: Mental Processes and their Neural Substrates (3 credits) or PSYC2274 Sensation and Perception (3 credits)
- BIOL2000 Molecules and Cells (3 credits)
- CHEM1109 General Chemistry I with lab (4 credits) or CHEM1117 Honors Modern Chemistry I with lab (4 credits)
- CHEM1110 General Chemistry II with lab (4 credits) or CHEM1118 Honors Modern Chemistry II with lab (4 credits)
- MATH1100 Calculus I (4 credits) or MATH1102 Calculus I (Math and Science Majors) (4 credits)
- Any one of the following courses (3 credits):
 - PSYC2285 Behavioral Neuroscience
 - BIOL4540 Neuroscience
 - BIOL4590 Introduction to Neuroscience

Computation (6 Credits)

- Any one of the following courses:
 - PSYC1120 Introduction to Behavioral Statistics and Research I
 - BIOL2300 Biostatistics
 - MATH3353 Statistics
 - SOCY2200 Statistics
- Any one of the following courses:
 - PSYC1121 Introduction to Behavioral Statistics and Research II
 - CSCI1101 Computer Science I
 - CSCI1102 Computer Science II
 - CSCI2227 Introduction to Scientific Computation
 - MATH1101 Calculus II, MATH1103 Calculus II (Math and Science Majors) or MATH1105 Calculus II-AP (Math and Science Majors)
 - MATH2210 Linear Algebra

Cognitive Neuroscience (3 Credits)

- Any one of the following courses:
 - PSYC3317 Topics in Machine Intelligence: Biomedical Image Analysis

- PSYC3322 Religion and the Brain
- PSYC3338 Topics in Psychopathology
- PSYC3341 Psychology of Morality
- PSYC3364 Poverty and Neurodevelopment
- PSYC3370 Nudge Psychology
- PSYC3371 Cognitive Neuroscience
- PSYC3372 Affective Neuroscience
- PSYC3373 Associative Learning
- PSYC3374 Cognitive Aging
- PSYC3375 Psychology and Neuroscience of Human Memory
- PSYC3378 Vision
- PSYC3379 Disorders of Language and Communication
- PSYC3391 Ethical Controversies in Psychology & Neuroscience
- PSYC3397 Cognitive and Neural Bases of Person Knowledge
- PSYC4446 Social Neuroscience
- PSYC4472 fMRI
- PSYC4476 Cognitive Neuroscience of Memory
- PSYC5570 Advanced Topics in Cognitive Neuroscience
- PSYC5571 Controversies in Cognitive Neuroscience
- PSYC5572 Advanced Cognitive Neuroscience of Memory
- PSYC5573 Advanced Topics in the Neuroscience of Memory
- PSYC5574 Neuroscience of Sensation and Perception
- PSYC5575 Advanced Affective Neuroscience

Systems Neuroscience (3 Credits)

- Any one of the following courses:
 - BIOL4450 Behavioral Ecology
 - PSYC2289 Comparative Psychology: Study of Animal Behavior
 - PSYC3329 Psychophysiology of Stress
 - PSYC3376 Developmental Neuroscience
 - PSYC3381 Psychobiology of Emotional Learning
 - PSYC3383 Neurobiological Basis of Learning and Memory
 - PSYC3384 Neurophysiology
 - PSYC3385 Neurobiology of Motivation and Emotion
 - PSYC3386 Psychopharmacology
 - PSYC3388 Neurobiology of Eating and Eating Disorders
 - PSYC3389 Motivated Behaviors and the Brain
 - PSYC3390 Neurobiology of Psychiatric Disorders
 - PSYC3392 Neuroscience of Addiction
 - PSYC3393 Neuroscience of Pain
 - PSYC3395 Novel Technologies in Neuroscience
 - PSYC5585 Brain Systems: Motivation and Emotion
 - PSYC5587 Cellular Perspectives on Motivated Behavior

Electives (18 Credits, excluding laboratory credits)

- Any six courses from the following:
 - Courses listed in the Cognitive Neuroscience and Systems Neuroscience clusters above (a course cannot double-count for both the cluster and elective requirements.)
 - Biology courses numbered BIOL3000 or higher
 - Chemistry courses numbered CHEM2000 or higher
 - Physics courses numbered PHYS1500 or higher
 - CSCI3341 Artificial Intelligence

- CSCI3343 Computer Vision
- CSCI3345 Machine Learning
- PSYC4490 Senior Thesis I
- PSYC4495 Senior Honors Thesis I
- PSYC4497 Scholars Project Research

Praxis (3 credits)

- Any one of the following courses:
 - PSYC2205 Undergraduate Research*
 - PSYC2206 Independent Study*
 - PSYC4101 Research Practicum in Human and Artificial Intelligence
 - PSYC4170 Research Practicum in Cognitive Psychology
 - PSYC4171 Research Practicum in Experimental Psychology
 - PSYC4173 Research Practicum in Judgment and Decision-Making
 - PSYC4174 Research Practicum in Sensory Psychology
 - PSYC4177 Research Practicum in Cognitive Neuroscience
 - PSYC4179 Research Practicum in Neurogastronomy
 - PSYC4180 Research Practicum in Behavioral Neuroscience
 - PSYC4473 Event-Related Potentials
 - PSYC4490 Senior Thesis I*
 - PSYC4495 Senior Honors Thesis I*
 - PSYC4497 Scholars Project Research*
 - PSYC5576 Methods in Human Brain Mapping

*Students may conduct research with any faculty member, including those conducting neuroscience research outside of the department. Projects should have significant neuroscience components, and course proposals are subject to review by the Director of Undergraduate Studies.

PSYC4490, PSYC4495, and PSYC4497 count toward the Praxis or Electives requirement. These courses cannot satisfy both requirements, only one.

Advanced Placement

A student who has earned AP credit by scoring a four or five on an Advanced Placement exam may substitute the exam for a relevant course, according to the following list.

Psychology: Either PSYC1110 or PSYC1111. Students making this substitution are required to take an additional Psychology course. For Psychology B.A. and B.S. majors, this course must be a Psychology course numbered 2000 or higher. For Neuroscience majors, this course must be from the Cognitive Neuroscience or Systems Neuroscience clusters.

Biology: BIOL2000 Molecules and Cells.

Calculus AB: MATH1100 Calculus I

Calculus BC: MATH1100 Calculus I and MATH1101 Calculus II

Statistics: We generally do not give major credit for the Statistics exam. A student can petition the Director of Undergraduate Studies for credit for PSYC1120.

Senior Thesis

Students in all three majors may choose to write a thesis during their senior year. In most cases, the thesis will involve original, empirical research, although theoretical papers will also be permitted. Students must obtain the consent of a faculty member to serve as their thesis advisor.

Those who are interested in writing a thesis are encouraged to participate in an Independent Study with a prospective thesis advisor during their junior year to develop a thesis proposal.

Seniors who are engaged in writing a thesis may enroll in PSYC4490 in the fall and/or PSYC4491 in the spring. Only one semester may count as an elective to fulfill a major requirement. Students who plan to write a thesis are advised to complete PSYC1120 Introduction to Behavioral Statistics and Research I and either PSYC1121 Introduction to Behavioral Statistics and Research II or a Research Practicum before their senior year.

Students whose theses are judged to be of exceptional merit will receive a note that their "Senior thesis passed with distinction." This is kept on file in the department but not noted on transcripts.

Clinical Concentration

The Concentration in Clinical Psychology is designed for majors with a particular interest in careers in clinical or counseling psychology or clinical social work. The concentration lays a solid foundation in coursework, research, and field experiences to help students decide whether they wish to apply to a graduate program and obtain licensure to practice in a clinical field.

To complete the clinical concentration, students must satisfy their major requirements and some additional course requirements. A complete description of the concentration, along with a listing of the additional required courses, is available on the department's website: go to the Undergraduate section, click Academic Opportunities, and click Concentration in Clinical Psychology. Contact the concentration advisor, Karen Rosen, for additional information.

Honors Program

The Honors Program offers students in our majors an excellent opportunity to get involved in research. The program is for students with strong academic records who wish to devote a substantial amount of time in their senior year to a senior honors thesis.

Students who are eligible to participate in the Honors Program receive a letter from the Honors Program Director at the beginning of their junior year. Students who meet or exceed the GPA requirement, in their major and overall, will be invited to join the Honors Program. For the class of 2025 the GPA requirement is 3.6. Starting with the class of 2026 the GPA requirement is 3.7. Students must identify a faculty member in the Department of Psychology and Neuroscience who is willing to supervise them in their work. Students then need to complete a preliminary application by November 1 of their junior year. On this application, they need to indicate the issue or topic they would like to investigate in their honors thesis and the name of the faculty member who has agreed to advise them.

The principal requirement of the Honors Program is the completion of the honors thesis. During their senior year, students should enroll in PSYC4495-4496 Senior Honors Thesis I and II. In addition, students in the Honors Program are required to take one additional upper-level course (5000-level or above). One semester of the Senior Honors Thesis course (PSYC4495) may count toward the major requirements. The second semester of the Senior Honors Thesis course (PSYC4496) and the 5000-level course are taken in addition to the courses required for the majors. Therefore, students in the Honors Program will have completed two courses in Psychology beyond the basic major requirements.

For further information about the requirements of the Honors Program, distinctions between the MCAS Honors and Psychology Honors Programs, and what to do if you are planning to study abroad, visit our website or contact the Director of the Honors Program, Karen Rosen.

Study Abroad

Psychology and Neuroscience majors should arrange an appointment with their advisor for permission to study abroad. Students should meet with the Director of Undergraduate Studies for permission to apply courses taken abroad towards meeting major requirements. These

decisions about international study are made on a case-by-case basis. Approval should be obtained before the start of the study abroad program.

Fifth Year M.A. Program

The Fifth Year M.A. program allows selected students to earn both a B.A. or B.S. in Psychology or in Neuroscience and an M.A. in Psychology in five years. The purpose of the program is to give students a greater opportunity for concentrated study and research training. Such training is excellent preparation for application to a Ph.D. program in any area of psychology. The Fifth Year M.A. program is limited to Boston College undergraduates who are majoring in Psychology or Neuroscience, and the fifth year must follow immediately after the fourth.

The Department of Psychology and Neuroscience has the following areas of concentration. Visit our website for additional information on these areas.

- Behavioral Neuroscience
- Cognitive Psychology and Cognitive Neuroscience
- Social Psychology
- Developmental Psychology
- Quantitative and Computational Psychology

Fifth Year B.A./M.S.W. Program

This program is available only to Psychology B.A. majors.

In cooperation with the Graduate School of Social Work, the Department of Psychology and Neuroscience offers a dual five-year master's degree program for those students who have decided upon a career in social work. Students in this program complete their undergraduate requirements including those for the Psychology B.A. major during their first four years. In addition, in their junior year students begin to take Social Work courses. Upon successful completion of all undergraduate requirements, students receive the B.A. after their senior year at which time they are formally enrolled in the Graduate School of Social Work. Upon successful completion of all graduate requirements at the end of the fifth year, students are awarded the M.S.W. Students apply for admission to the five-year program during their sophomore year. Contact the School of Social Work for more information.

Faculty Advisement

All majors should seek faculty advisement prior to each registration period. Faculty members provide expanded office hours during these periods. Students interested in studying abroad should seek the consent of their advisor.

Majors who do not have an academic advisor (e.g., majors in their first year of study or recent transfer students) should consult with the Director of Undergraduate Studies prior to registration.

University Core Requirements

PSYC courses numbered between 1010 and 1111 fulfill University Core requirements. PSYC1110 Brain, Mind, and Behavior is a Natural Science Core course. All other Core courses in this department (e.g., PSYC1032 or PSYC1111) are Social Science Core courses.

Students receiving a four or five on the Psychology AP exam have fulfilled half of the Social Science Core requirement.

Prerequisites

Course prerequisites are listed with each course description. If none is listed, the course has no prerequisites.

Guide to Psychology Course Numbering

PSYC1000–PSYC1009: Courses that *do not* satisfy the Social Science Core requirement and *do not* provide credit toward completion of the major.

PSYC1010–PSYC1099: Core courses that satisfy the Social Science Core requirement but *do not* provide credit toward completion of the major.

PSYC1110–PSYC1111: Courses that satisfy the Social Science Core requirement and also provide credit toward completion of the Psychology and Neuroscience majors.

PSYC1112–PSYC1119: Introductory, one-credit courses.

PSYC1120–PSYC1999: Introductory, statistical, and methodological courses.

PSYC2000–PSYC2999: Introductions to primary subdisciplines of psychology, serving as prerequisites to more advanced courses.

PSYC3000–PSYC3999: More advanced and/or specialized courses requiring one or more 2000-level courses as prerequisites.

PSYC4000–PSYC4099: Research Practicum courses that do not count toward completion of Psychology major electives or the Neuroscience Praxis requirement.

PSYC4100–PSYC4199: Research Practicum courses that do not count toward completion of Psychology major electives but can be used for the Neuroscience Praxis requirement.

PSYC4200–PSYC4999: Advanced seminars in various areas of psychology.

PSYC5000–PSYC5999: Seminars open to advanced undergraduates and graduate students.

PSYC6000 and above: Graduate-level courses.

Romance Languages and Literatures

The Department of Romance Languages and Literatures offers both majors and minors in French, Hispanic Studies, and Italian, each of which affords a wide exposure to international culture and literature in the target language. The major offers solid preparation and guidance for students interested in teaching or in graduate studies and serves as an important foundation for work in many diverse fields such as law, medicine, interpreting, politics, publishing, and international business, to name only a few. The minor is a strong complement to other major programs at Boston College, offering linguistic proficiency as well as the analytic fundamentals of written and visual culture. To learn of the, in fact, numerous areas of employment in which mastery of a second language and culture gives you valuable, necessary skills and, indeed, a competitive edge, see [Foreign Language Careers](#).

Unless otherwise stated, all courses are taught in the target language.

French Studies

A French Studies major assures exceptional competence in French, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency consolidated in the language program, majors expand that proficiency to a wide variety of French texts. This training exercises and assures our students' ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

French Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two 4000-level courses.

Language Courses for the Major and Minor

Students begin the program at the level most appropriate for their linguistic proficiency. Contact Prof. Andrea Javel (andrea.javel@bc.edu) for guidance about placement.

French Studies majors and minors may begin their program with Conversation, Composition and Reading I (FREN2209) or II (FREN2210).

French Studies Major Requirements

30 Credits (ten 3-credit courses), which must include:

- **12 credits (four 3-credit "foundation" courses)** to be chosen from among the following categories: *
 - FREN3305 Wordplay: Introduction to Drama and Poetry
 - FREN3306 Introduction to Narrative Forms
 - FREN3307 Masterpieces of French Literature
 - FREN3308 Advanced Language Studies in French
 - FREN3309 Topics in French Culture and Civilization

**Note that the specific titles of the courses that fall within these “foundation categories” change from year to year (though not the course number); however, students can only take one course in each category.*

- **12 credits (four advanced courses)** in French language, literature, or culture at the 4000 level or above.
- **6 credits (two elective courses)** to be chosen among the following:
 - FREN2209 and FREN2210 French Conversation, Composition and Reading I and II (as entry-level courses only)
 - Additional courses in French Studies at the 3000 or 4000 level
 - Related courses with departmental permission

Notes and Conditions

- French Studies majors are required to enroll in at least one advanced course (4000 level or above) each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.
- 1-credit practicum courses do not count for the major.
- Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (three 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the French Studies major will be granted for courses taken abroad (1) conducted in French; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of French-speaking peoples’ cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- French Studies majors who transfer 9 credits (3 three-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the major in the department.
- Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with departmental permission.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the French Studies section.

French Studies Minor Requirements

18 Credits (six 3-credit courses), which must include:

- **6 credits (two foundation courses)** to be chosen from among the following categories*:
 - FREN3305 Introduction to Drama and Poetry
 - FREN3306 Introduction to Narrative Form
 - FREN3307 Masterpieces of French Literature
 - FREN3308 Advanced Language Studies in French
 - FREN3309 Topics in French Culture and Civilization

**Note that the specific titles of the courses that fall within these “foundation categories” change from year to year (though not the course number); however, students can only take one course in each category.*

- **3 credits (one advanced course)** at the 4000 or 7000 level
- **9 credits (three elective courses)** to be chosen among the following:
 - FREN2209 and FREN2210 French Conversation, Composition, and Reading I and II (as entry level courses only)
 - Additional courses at the 3000 or 4000 level in French

Notes and Conditions

- French Studies minors must enroll in at least one advanced course (4000 level and above) during their senior year, regardless of whether they have completed the six-course requirement for the minor.
- 1-credit practicum courses do not count for the minor.

- Maximum total transfer credit toward a minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the French Studies major will be granted for courses taken abroad (1) conducted in French; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of French-speaking peoples' cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- French Studies minors who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the minor in the department.
- All courses for the French minor will normally be in French, though one relevant course taught in English may be counted toward the minor with permission from the French Section.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate studies in consultation with the French section.

Hispanic Studies

A Hispanic Studies major assures exceptional competence in Spanish, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency consolidated in the language program, majors expand that proficiency to a wide variety of Hispanic texts. This training exercises and assures our students' ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

Hispanic Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two 6000-level courses.

Language Courses for the Major and Minor

Students begin the program at the level most appropriate for their linguistic proficiency. Advanced, heritage, and native speakers of Spanish can seek advisement to determine where to enter the program from any of the Spanish Language Coordinators or Assistant Coordinators or any professor in the Hispanic Studies program.

Non-native Spanish speaking majors and minors may begin the program with Conversation, Composition and Reading I (SPAN2215).

Note that linguistic proficiency equivalent to Conversation, Composition and Reading II (SPAN2216) is a prerequisite for Contextos: Introduction to Textual Analysis (SPAN3395) and Contextos is a prerequisite for all upper-level courses (SPAN6000 and above).

Hispanic Studies Major Requirements

30 Credits (ten 3-credit courses), which must include:

- **3 credits (one course) in SPAN3395 Contextos**
- **12 credits (four advanced courses) at the 6000 level in literature and culture**, which must include at least one course in each of the following categories:
 - Pre-1800 Peninsular literature and culture
 - Pre-1900 Latin American literature and culture
 - Post-1800 Peninsular literature and culture
 - Post-1900 Latin American literature and culture
- **15 credits (five elective courses)**, which may be chosen from:
 - SPAN2215 Spanish Conversation, Composition, and Reading I (as entry-level course only)
 - SPAN2216 Spanish Conversation, Composition, and Reading II
 - Additional courses at the 3000 or 6000 level in Hispanic Studies
 - Related courses with departmental permission

Notes and Conditions

- Hispanic Studies majors are required to enroll in at least one 6000 level course each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.
- 1-credit practicum courses do not count for the major.
- Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (3 three-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Hispanic Studies major will be granted for courses taken abroad (1) conducted in Spanish; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Spanish-speaking peoples' cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- Hispanic Studies majors who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the major in the department.
- Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with permission of the Hispanic Studies section.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate studies in consultation with the Hispanic Studies section.

Hispanic Studies Minor Requirements

18 Credits (six 3-credit courses), which must include:

- **6 credits (2 courses)**
 - SPAN2215 Spanish Composition, Conversation and Reading I
 - SPAN2216 Spanish Composition, Conversation and Reading II
- **3 credits (1 course):** SPAN3395 Contextos
- **9 credits (3 advanced courses)** at the 6000 level in literature and culture

Students who have taken Span3395 Contextos fulfill any remaining elective requirements with *6000-level courses only*.

The minor begins with SPAN2215 (CCRI). Students who began the HS minor before the Fall semester 2023 and who began the minor above the level of CCRI or CCR II do not have to take either of those two courses to fulfill the minor. They should take any courses at the 6000 level.

Notes and Conditions

- Hispanic Studies minors must enroll in at least one 6000 level course during their senior year, regardless of whether they have completed the six-course requirement for the minor.
- 1-credit practicum courses do not count for the minor.
- Maximum total transfer credit toward the minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Hispanic Studies minor will be granted for courses taken abroad (1) conducted in Spanish; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Spanish-speaking peoples' cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- All courses for the Hispanic Studies minor will normally be in Spanish, though one relevant course taught in English may be counted toward the minor with permission from the Hispanic Studies Section.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Hispanic Studies section.

Italian Studies

An Italian Studies major assures exceptional competence in Italian, allowing students to work extensively and closely with literary and cultural artifacts that language makes possible. Building on their linguistic proficiency consolidated in the language program, majors expand that proficiency to a wide variety of Italian texts. This training exercises and assures our students' ability to analyze texts and contexts, as well as to conceive, articulate, and defend an original idea.

Italian Studies minors reap similar benefits, albeit to a lesser extent, by attaining linguistic proficiency and taking at least two advanced courses.

Language Courses for the Major and Minor

Students begin the program at the level most appropriate for their linguistic proficiency. For advisement about elementary and intermediate level placement, contact the department office (rll@bc.edu). For advisement at the post-intermediate level, contact Prof. Mattia Acetosso (acetoso@bc.edu).

Italian Studies majors and minors may begin their program with Conversation, Composition, and Reading I (ITAL2213) or II (ITAL2214).

Italian Studies Major Requirements

30 Credits (ten 3-credit courses), which must include:

- **18 credits (six advanced courses)** in Italian literature or culture (5000 level and above)
- **12 credits (four elective courses)** to be chosen from the following:
 - ITAL2213 and ITAL2214 Italian Conversation, Composition and Reading I and II (as entry-level courses only)
 - Additional courses at the 3000, 5000 or 8000 level
 - Related courses with departmental permission

Notes and Conditions

- An Advanced Placement high school course in Italian with an exam score of 4 or 5 will count toward the Italian Studies major as one 3-credit elective.
- Italian Studies majors are required to enroll in at least one advanced course (5000 level and above) each semester of their senior year, regardless of whether they have completed the ten-course requirement for the major.
- 1-credit practicum courses do not count for the major.
- Maximum total transfer credit toward the major from study abroad: 15 credits (five 3-credit courses) for one year of study; 9 credits (three 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Italian Studies major will be granted for courses taken abroad (1) conducted in Italian; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Italian-speaking peoples' cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- Students who transfer 9 credits (three 3-credit courses) or more from study abroad or elsewhere outside the department must take their remaining courses towards the major in the department.
- Students who do not study abroad may take up to two courses related to their major program of study outside the Department of Romance Languages and Literatures, with departmental permission.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Italian Studies section.

Italian Studies Minor Requirements

18 Credits (six 3-credit courses), which must include:

- **6 credits (two foundation courses):** ITAL2213 and ITAL2214 (Italian Conversation, Composition, and Reading I and II)

- **6 credits (two advanced courses)** in Italian Literature or Culture at the 5000 level or above (courses for undergraduates)
- **6 credits (two elective courses)** in Italian Literature or Culture at the 3000 level or above

Notes and Conditions

- An Advanced Placement high school course in Italian with an exam score of 4 or 5 will count toward the Italian Studies minor as one 3-credit elective.
- Italian Studies minors must enroll in one advanced course (5000 level or above) during their senior year, regardless of whether they have completed the six-course requirement for the minor.
- 1-credit practicum courses do not count for the minor.
- Maximum transfer credit toward a minor from study abroad: 9 credits (three approved 3-credit courses) for one year of study; 6 credits (two approved 3-credit courses) for one semester of study. No RLL credit will be granted for courses abroad conducted in English taken during a semester or academic year program.
- Credit toward the Italian Studies minor will be granted for courses taken abroad (1) conducted in Italian; (2) of the sophistication and level of expectations appropriate for our program; (3) directly related to analysis of Italian-speaking peoples' cultural production. Students taking courses in other disciplines are encouraged to seek credit for those courses in the appropriate departments.
- All courses for the Italian Studies minor will normally be in Italian, though one relevant course taught in English may be counted toward the minor with permission from the Italian Studies section.
- Approval for summer courses taught by Boston College faculty, including courses abroad, will be granted on a case-by-case basis by the Director of Undergraduate Studies in consultation with the Italian Studies section.

Study Abroad Guidelines and Policies

The Department of Romance Languages and Literatures strongly encourages all of its students to study abroad, both to strengthen their linguistic skills and to benefit from the experience of living in another culture. Majors and minors in French, Hispanic Studies, and Italian interested in study abroad should consult with the appropriate program director. For a general overview of semester and academic-year study abroad programs and to apply, visit the [Office of Global Education](#).

[Although most study-abroad courses can count](#) towards the general elective requirement for graduation, students should be aware that not all the courses offered by study-abroad programs available to BC students are automatically acceptable toward the RLL major or minor or BC graduation requirements.

No RLL credit will be granted for courses taken abroad conducted in English, except for summer courses taught by Boston College faculty (in which case a maximum of three credits are transferrable). Credit is not automatically granted for courses taken in the target language. Courses must show a direct relationship to the student's program of study.

In order to earn credit in an RLL major or minor, courses must be in the target language, show a direct relationship to the student's program of study in the department, and have a level of sophistication comparable to departmental offerings. Students are encouraged to seek credit for courses in other disciplines, such as (but not limited to) economics, political science, communications, and history, from appropriate Boston College departments.

Students intending to study abroad are urged to gain approval for specific courses before departing. Students who seek approval only after they return from abroad risk not getting credit for study-abroad courses. Final approval of courses taken abroad requires the signature of the department's Study Abroad Advisors: for French, [Prof. Kevin Newmark](#); for Italian, [Prof. Mattia Acetoso](#) and for Spanish, [Prof. Sarah Beckjord](#). To obtain approval for courses, students must complete the "Study Abroad Course Evaluation Form" [available online](#) from the Student Services. Once completed and submitted online, the form will be automatically directed to the appropriate RLL faculty member for approval.)

Please note: Approval for Core "Cultural Diversity" courses taken abroad are handled by the [Office of the Associate Dean for the Core](#).

"Lit Core" credit is not given for any study-abroad courses.

For further information about study abroad course credit see the [Grades, Credits, and Transfers](#) page of the Office of Global Education.

To schedule an appointment with the Director of Undergraduate Studies, contact the Romance Languages and Literatures Department, Lyons 304, 617-552-3820; rll@bc.edu.

For further information about Study Abroad requirements, please consult our department [website](#).

Transfer of Credit from Study Abroad

Romance Languages and Literatures majors may earn credit for up to three courses (9 credits) toward their major in a single semester of study abroad, and credit for up to five courses (15 credits) in a year-long program. Courses must be related to textual and cultural analysis and must be in the target language. Majors who transfer 9 credits or more (three 3-credit courses) from study abroad into their RLL major must take their remaining courses in the department.

Romance Languages and Literatures minors may earn credit for up to two courses (6 credits) toward their minor in a single semester of study abroad, and credit for up to three courses (9 credits) in a year-long program. Courses must be related to textual and cultural analysis and must be in the target language.

For more detailed information about study abroad credit transfer, visit the [Romance Languages and Literatures Study Abroad](#) web page.

For further information or to declare a major or minor, please contact the Romance Languages and Literatures Department, Lyons 304; rll@bc.edu.

Getting Started

Students who plan to major or minor in Romance Languages and Literatures should consult the Director of Undergraduate Studies to review their qualifications, establish correct placement within the program, and organize a course of study suited to their individual needs and objectives.

Information for First-year Majors and Non-majors

Students considering a major or minor in Romance Languages and Literatures are welcome to contact the Director of Undergraduate Studies to discuss how the program might relate to and enhance their career and life objectives (rll@bc.edu).

Students who have not already fulfilled the language proficiency requirement through an achievement or advanced placement test should sign up for an appropriate language course. Placement tests in French and Spanish are available. For the placement exam in Italian, please contact the department office (rll@bc.edu).

The RLL Department offers courses, some taught in the target languages and some in English, that satisfy University Core requirements and also earn credit in the major or minor. Students interested in advancing their major credits at the early stages of their careers are encouraged to take these Core courses.

Core Offerings: Literature and Cultural Diversity

All the courses offered in the Department of Romance Languages and Literatures explore the culture and literature of countries around the world where French, Italian, and Spanish are spoken. In addition, the department has created a number of courses for inclusion in the Morrissey College of Arts and Sciences Core, both Literature and Cultural Diversity, which are designed for non-specialists.

Literature Core

Core offerings, whether in the target language or in translation, treat texts in their full linguistic, artistic, and cultural contexts. Literature Core courses offer students close exposure to great narrative arts, whether visual or written, under the guidance of a professor sensitive to their original language. Comparative literature courses introduce students to the interplay of artistic forms and themes across national boundaries.

In order to achieve an intimate understanding of the texts studied, all Core courses propose close reading and thorough discussion of a limited number of texts.

For a list of courses that satisfy the Literature Core requirement, visit bc.edu/core.

Cultural Diversity Core

The curriculum of Romance Languages and Literatures offers courses that treat the cultures of people around the world who speak French, Spanish, and Italian, including western Europe as well as Hispanic and Francophone cultures in the Caribbean, South and Central America, Africa, and Asia. Students can choose from a number of courses that focus on these cultures in order to satisfy the Cultural Diversity Core requirement.

For a list of courses that satisfy the Cultural Diversity Core requirement, visit bc.edu/core.

The Departmental Honors Program

The Honors Program offers RLL majors a unique opportunity to conduct research and write a thesis on a topic of their choice, under the guidance of a faculty member in the department. Students admitted into the program will work throughout the senior year with their Thesis Director.

To be eligible, candidates must be declared majors in the Department of Romance Languages and Literatures with a grade point average of 3.6 or higher. No more than 9 credits must remain for completion of the major in their senior year. Candidates must also have exhibited the maturity and self-discipline that long-term independent work requires.

Faculty members will nominate students for the Honors Program in April of their junior year. Nominated students will be invited to meet with the Program Coordinator during the semester preceding their enrollment in the program. The final decision about acceptance into the program will be made during the first week of registration.

For complete details, please read the RLL Honors Program Guidelines available on the [Romance Languages and Literatures website](#). After consulting the guidelines, interested students should contact their current RLL instructor to inquire about nomination to the program.

Undergraduate Research Positions

Departmental faculty regularly obtain university funding for undergraduate majors and minors to work on research projects with them during a set number of hours per week. Interested students should contact their current professor or the Director of Undergraduate Studies.

Sociology

The undergraduate program in Sociology is designed to satisfy the intellectual, career, and civic interests of students who are concerned about social inequality, social change, and social interaction. The sociological perspective and the technical knowledge and skills developed in this program contribute to critical thinking, writing skills, and data-based reasoning. The program prepares students for a broad range of occupations in health, social work, law, public affairs, public administration, criminal justice, industrial organization, education, etc.

Many Sociology courses are part of the University Social Science Core. These courses address a wide range of important sociological themes ranging from the study of major social institutions, such as the family, religion, education, mass media, the workplace, and justice system, to the analysis of global social processes including culture, identity formation, war and peace, deviance and social control, aging, social movements, and inequalities in the areas of race, class, and gender.

[Sociology Courses](#)

[Sociology Faculty](#)

[Sociology Website](#)

Information on Core Courses

The course listings in Course Information and Schedule will indicate which, if any, Core requirements are satisfied by each course.

Major Requirements

Sociology majors are required to take a minimum of 30 credits (generally ten courses) in Sociology. These courses must include the following:

- Either SOCY1001 Introductory Sociology (preferably SOCY1001.01, the section designed for Sociology majors and minors), or SOCY1002 Intro to Sociology for Healthcare Professionals, but not both.
- Statistics (SOCY2200), Social Theory (SOCY2215), and Research Methods (SOCY2210) are also required.
- 18 credits in elective courses, at least 9 credits of which must be in upper-level courses (SOCY3000 or higher).

Minor Requirements

Sociology minors are required to take a minimum of 18 credits (generally six courses). These courses must include the following:

- Either SOCY1001 Introductory Sociology (preferably SOCY1001.01, the section designed for Sociology majors and minors), or SOCY1002 Intro to Sociology for Healthcare Professionals, but not both.
- Statistics (SOCY2200), Social Theory (SOCY2215), and Research Methods (SOCY2210) are also required.
- 6 credits in elective courses, at least 3 credits of which must be in courses numbered SOCY3000 or above.

Honors Program

Membership in the undergraduate Honors Program in Sociology is by invitation and is designed to give eligible Sociology majors (3.50 GPA in Sociology) the experience of doing original sociological research that leads to a Senior Honors Thesis. The program includes a three-course Honors sequence that allows students to work closely with a faculty advisor and other students in the Program. The sequence begins in the second term of the junior year when students read some of the most engaging classics of sociological research. In the first semester of the senior year, students design an original project and in the last semester of the senior year, they gather and analyze the data and write the thesis. For details, contact sociology@bc.edu.

Information for Study Abroad

Although the Sociology Department designates no particular prerequisites, it strongly recommends that students have completed at least five courses in Sociology, including all of the required courses (Introductory Sociology or Intro to Sociology for Health Care Professionals, Statistics, Methods, and Theory), prior to going abroad.

Courses taken overseas in a department of Sociology or Anthropology of a BC-approved program will almost always be accepted for credit towards the Sociology major. The department recommends not more than two Sociology courses in any one semester or five Sociology courses in a full year. Courses taken in other departments will not be considered for Sociology credit unless a syllabus and reading list are submitted. All Sociology majors should contact sociology@bc.edu when planning their study abroad program.

The Sociology Department does not accept overseas courses for Social Science Core credit.

B.A./M.S.W. Program

Majors in Sociology have the opportunity to earn two degrees over a period of five consecutive years. The choice of this program will provide the Sociology major with an undergraduate B.A. degree in Sociology and with the professional degree of Master of Social Work. The B.A. degree will be awarded with the student's undergraduate class. The master's degree will be awarded one year later. Sociology majors must apply to this program no later than April of their sophomore year so that the required course sequence and degree requirements can be fulfilled. For details, contact sociology@bc.edu and the [M.S.W. Program](#) website.

Theatre

The Boston College Theatre Department—faculty, staff, and students—is committed to theater education that combines art with scholarship and drama study with theater practice. We seek to foster creativity, critical thinking, excellence, and professionalism through the integration of courses, productions, workshops, and other activities. We value theater as a liberal art as well as a performing art, which means that we seek to understand it not only as a means of artistic expression and a form of entertainment, but as a window onto history, a method of inquiry into all things human, and a vehicle for social change. Interested students are invited to join us in this mission regardless of previous experience. Those who do will develop an intellectual frame of reference, a theatrical imagination, and practical skills that prepare them for advanced training in a wide range of disciplines and vocations.

[Theatre Courses](#)

[Theatre Faculty](#)

[Theatre Website](#)

Major Requirements

The Theatre Department offers a major in Theatre and students earn a bachelor of arts degree. Students must successfully complete a total of eleven 3-credit courses, five of which constitute the foundation upon which the upper-level courses are built. Ideally, these five courses will be completed by the end of the sophomore year. The required foundation courses are:

- THTR1172 Dramatic Structure and Theatrical Process (fall only) or, only in special cases, THTR1170 Introduction to Theater (fall and spring)
- THTR1103 Acting I: Fundamentals of Performance (fall and spring)
- THTR1130 Elements of Stagecraft (spring only; corequisite THTR1017 1-credit lab)
- THTR1140 Elements of Theatrical Design (fall only; corequisite THTR1018 1-credit lab)
- THTR2275 History of Theater I (fall only) **or** THTR2285 History of Theater II (spring only)
- Two upper-level Performance/Production courses (numbered from THTR3300 to THTR3369 or from THTR4400 to THTR4469)
- Three upper-level Dramatic Literature, Criticism, and Theater History courses (numbered from THTR3370 to THTR3389 and from THTR4470 to THTR4489 or History of Theater I or II that is in addition to the one taken previously)
- One Theatre Elective, THTR2000 and above, chosen from the Theatre Department curriculum according to individual interest. Students may bundle three 1-credit mini-courses together to make one General Theatre Elective.
- Four additional Production Lab credits numbered THTR1011 through 1016 and THTR1020 through 1060. These are experiential learning courses that involve practical work backstage or in the shops (1 credit) or as a designer or stage manager (2 credits) on Theatre Department productions. Students register for Labs at the beginning of each semester.

Students who wish to declare a Theatre major should contact Professor Luke Jorgensen, Acting Chairperson, luke.jorgensen@bc.edu, with an e-mail indicating their interest and providing their Eagle ID number.

Minor Requirements

The Theatre minor is intended for students with a serious interest in theater who for one reason or another are not able to commit to fulfilling the requirements for the Theatre major. Based on the same principles and structure as the Theatre major, it aims to provide students with a broad-based theater education that balances courses in theater studies and theater practice.

A Theatre minor will complete the following courses and requirements:

- THTR1172 Dramatic Structure and Theatrical Process (fall only) or, only in special cases, THTR1170 Introduction to Theater (fall and spring)
- THTR1103 Acting 1: Fundamentals of Performance (fall and spring)
- THTR1140 Elements of Theatrical Design (fall only; corequisite THTR1018 1-credit lab) **or** THTR1130 Elements of Stagecraft (spring only; corequisite THTR1017 1-credit lab)

- THTR2275 History of Theater I (fall only) **or** THTR2285 History of Theater II (spring only)
- One upper-level Dramatic Literature, Criticism, and Theater History courses (numbered from THTR3370 to THTR3389 and from THTR4470 to THTR4489 or History of Theater I or II that is in addition to the one taken previously)
- One upper-level Performance/Production courses (numbered from THTR3300 to THTR3369 or from THTR4400 to THTR4469)
- Two additional Production Lab credits numbered THTR1011 through 1016 and THTR1020 through 1060

Students who wish to declare a Theatre minor should contact Professor Luke Jorgensen, Acting Chairperson, luke.jorgensen@bc.edu, with an e-mail indicating their interest and providing their Eagle ID number.

Dance Minor

The Dance Minor began its 2-year pilot phase in fall 2021. The minor is only open to 15 students per graduating class during the pilot phase. **Only Dance Minors** will be eligible for credits as a department choreographer, performer, or dance captain.

Required Courses:

- 2 Core Technique courses
 - THTR1125: Beginning Ballet I
 - THTR1126: Beginning Ballet II
 - THTR2221: Contemporary Dance I
 - THTR3321: Contemporary Dance II
 - THTR2223: Dance for Musicals I
 - THTR3323: Dance for Musicals II
 - THTR2222: Jazz Dance I
 - THTR3322: Jazz Dance II
- 1 History or Theory Class
 - THTR1120: Elements of Dance (also fulfills University Arts Core)
 - History of Dance
- An additional 3 courses from the following
 - Any Intermediate or Advanced level technique course
 - 1, 2, or 3 credits as either a department choreographer, dance captain, or performer

Email luke.jorgensen@bc.edu for more information and to register for the Dance minor.

Educational Theatre Minor

For students in the Lynch School of Education and Human Development with an interest in the teaching and practice of theater in school and institutional settings, the Theatre Department offers a minor in Educational Theatre. An Educational Theatre minor will complete the following courses and requirements:

- THTR1172 Dramatic Structure and Theatrical Process (fall only) **or**, in special cases, THTR1170 Introduction to Theater (fall and spring)
- THTR1103 Acting I: Fundamentals of Performance (fall and spring) **or** THTR1130 Elements of Theater Production I (spring only)
- THTR3378 Creative Dramatics (fall only)
- THTR2268 Theater for Youth (spring only) **or** THTR3366 Directing I (fall only) **or** THTR4469 Composition and Performance Workshop (intermittent)
- One upper-level Literature, Criticism, History course (see above) **or** THTR2275 History of Theater I (fall only) **or** THTR2285 History of Theater II (spring only)
- One upper-level Production/Performance course (see above) **or** THTR1130 Elements of Stagecraft (fall only)
- Two 1-credit Production Labs (including at least one Prep Lab)

Lynch School of Education and Human Development students who wish to declare this minor should contact Professor Luke Jorgensen, Acting Chairperson, (luke.jorgensen@bc.edu) with an e-mail indicating their interest and providing their Eagle ID number. Contact should also be made with the Assistant Dean in the Lynch School of Education and Human Development.

All courses for the Morrissey College of Arts and Sciences minor in Theatre and the Lynch School of Education and Human Development minor in Educational Theatre need to be chosen from the Theatre Department curriculum. Courses taken abroad, courses taken at other institutions, and Readings and Research/Independent Study courses will only count towards a Theatre minor in rare and exceptional circumstances.

Mentoring and Advisement

The Theatre Department faculty place great emphasis on academic advisement and professional mentoring. We are committed to helping students design an academic program that stimulates their curiosity, supports their interests, and advances their abilities. In this interest, we encourage students to pursue professional internships and/or summer training programs that provide practical experience and help to clarify long-range goals. When arranged in advance, internships can earn academic credit and often lead to job offers after graduation. Junior and senior Theatre majors are guided and coached as they prepare for graduate study, advanced training, a full-time professional internship, or early-career job experience.

The Theatre Department Production Program

The Theatre Department maintains an ambitious co-curricular production program that includes four faculty-or-guest directed Mainstage productions and two student-directed, student-designed Workshop productions per academic year. Casting is open to all students and based mainly on audition. The Theatre Department actively encourages students of color to audition for all productions and is firmly committed to a policy of non-traditional color conscious casting, which means that race and ethnicity are not a factor when casting decisions are made. Opportunities abound for students who are interested in design, technical production, and stage management.

Information for Study Abroad

The Theatre Department has no formal affiliation with international programs that focus on theater training or theater study. Students who are considering study abroad are advised to meet with their advisor a full year in advance of their departure in order to plan their academic progress and discuss the advantages and disadvantages of being off campus for a semester or more as an upperclassman. In general, students can receive credit towards the Theatre major (as appropriate) for no more than one course taken abroad. For more information, please contact Professor Luke Jorgensen, Acting Chairperson, luke.jorgensen@bc.edu.

Theology

The undergraduate program in Theology is designed to provide students with the knowledge and skills necessary for a reasoned reflection on their own values, faith, and tradition, as well as on the religious forces that shape our society and world. As a broad liberal arts discipline, theology encourages and guides inquiries into life's most meaningful issues from such diverse perspectives as ethics, biblical studies, history, psychology, social studies, philosophy, and comparative religion. There is a strong, although not exclusive, emphasis on Christianity, especially as manifested in the Roman Catholic tradition.

The major in Theology has proven to be excellent preparation for vocations requiring careful reasoning, close reading, clarity in written expression, the ability to make ethical decisions, and a broad understanding of cultures. It provides a solid background for graduate study in the humanities and for such professional schools as medicine, business, and law. For those wishing to pursue a career in ministry or religious education Theology is, of course, still a prerequisite. Long gone, however, is the time when Theology was considered the exclusive domain of seminarians and the religious. Many students now elect Theology as a second major to balance and to broaden their education and to provide perspective on such first majors as biology, political science, or English literature.

Students who elect to major or minor in Theology are encouraged to meet with the Department's Director of Undergraduate Studies to review their opportunities as well as pertinent departmental policies.

The Theology Department boasts a large, internationally known faculty with expertise in areas as diverse as systematic theology, ethics, biblical studies, church history, liturgy, psychology of religion, and the dialogue between Christianity and other major religious traditions. A prestigious graduate program leads to the Ph.D. degree in several specialties. Nevertheless, the Department as a whole remains fully committed to the teaching of undergraduates and to the education of Theology majors.

[Theology Courses](#)

[Theology Faculty](#)

[Theology Website](#)

Course Offerings

The Department distinguishes four levels of course offerings:

Level 1 and Core (THEO1000-1999)

Introductory, designed for the fulfillment of the University's basic Theology core requirements, and non-core elementary undergraduate theology courses, including pre-approved elementary language courses.

Level 2 (THEO2000-4999)

Undergraduate electives, more specifically aimed at minors and majors.

Level 3 (THEO5000-5999)

Addressed to advanced undergraduates (usually majors) and graduate students who are more theologically proficient.

Graduate (THEO6000-7999)

Offered exclusively for professionally academic theological formation.

Core Options

The Core requirement in theology is six credit hours and may be fulfilled by *either* of the following options (A or B):

A. Two 3-Credit Courses: One CT and one STT

Students must take one Christian Theology (CT) course **and** one Sacred Texts and Traditions (STT) course. These need not be taken in any particular order and may even be taken in the same semester.

Christian Theology (CT) Courses

- THEO1401 Engaging Catholicism
- THEO1402 God, Self, and Society

Sacred Texts and Traditions (STT) Courses

- THEO1420 The Everlasting Covenant: The Hebrew Bible
- THEO1421 Inscribing the Word: The New Testament
- THEO1422 The Sacred Page: The Bible
- THEO1430 Buddhism and Christianity in Dialogue
- THEO1431 Islam and Christianity in Dialogue
- THEO1432 Hinduism and Christianity in Dialogue
- THEO1433 Chinese Religions and Christianity in Dialogue
- THEO1434 Judaism and Christianity in Dialogue

Enduring Questions and Complex Problems courses offered by the Theology Department (THEO17XX) will be identified by the department as counting towards the Christian Theology (CT) or Sacred Text and Traditions (STT) requirement. Note: a student may *not* fulfill their Theology Core with two Enduring Questions/Complex Problems courses.

B. 12 Credit Options

A student may take either of these course sequences to fulfill the Theology requirement:

- THEO/PHIL1088–1089 Person and Social Responsibility I and II (for PULSE Program students only)
- THEO/PHIL1090–1091 Perspectives on Western Culture I and II (for first-year students only)

Note: students who only complete one semester of the 12-credit theology core sequences must reach out to the theology department for guidance regarding the completion of their theology core requirements.

Major Requirements

The major curriculum in Theology incorporates both structure and flexibility, intensive focus, and breadth of scope. Majors take a combination of essential, required courses and electives from within and outside the Department of Theology. Programs are designed in consultation with the Director of Undergraduate Studies. Theology majors must choose one of the following curricular tracks:

I. The **Standard Theology Major (30 hours)** is relatively unstructured and flexible, easily tailored to various motivations and goals for theological study, and adaptable to the diverse paths and timetables by which students come to the major. It offers a theological enrichment and complement to a student's BC education, through the following requirements:

1. Theology Core (2 courses; 6 credits)
2. Majors Course: THEO2001 Tradition and Traditions (1 course; 3 credits)
3. Majors Course: THEO2002 Trajectories in Contemporary Theology (1 course; 3 credits)
4. Electives (6 courses; 18 credits)*

*2 courses/6 credits from another discipline (including the first major) may also count toward the Standard Theology or Honors Theology majors, provided that they have sufficient theological relevance as determined by the Director of Undergraduate Studies.

II. The **Honors Theology Major (36 hours)** is designed for Theology as a first major, especially for students with an interest in further study of theology or related fields. Both rigorous and comprehensive, it provides an integrated introduction to the discipline and a broad foundation for further study. With its comprehensive distribution requirements across all areas, it exposes students to the entire breadth of the theological discipline. With increased credit hours and an optional thesis, it is capacious enough for students to focus on a particular sub-discipline in which to pursue and demonstrate theological excellence. As an Honors Program, it would also allow students to be recognized for their achievement, both within and outside the university, thus facilitating admission to the next level of study. Students are expected to maintain a 3.5 GPA within the major.

Requirements:

1. *Theology Core* (2 courses; 6 credits): Students must fulfill their normal Theology Core requirements with either (A or B):

A. One semester of Christian Theology:

- THEO1401 Engaging Catholicism
- THEO1402 God, Self, and Society
- CT-themed Enduring Questions/Complex Problems

And one semester of Sacred Texts and Traditions from the following:

- THEO1430 Buddhism and Christianity in Dialogue
- THEO1431 Islam and Christianity in Dialogue
- THEO1432 Hinduism and Christianity in Dialogue
- THEO1433 Chinese Religions and Christianity in Dialogue
- THEO1434 Judaism and Christianity in Dialogue
- STT-themed Enduring Questions/Complex Problems

(NOTE: Honors Majors may not fulfill their STT core requirement with THEO1420, THEO1421, or THEO1422)

B. Perspectives or PULSE.

2. *Scripture Sequence* (2 courses; 6 credits): Students must complete both THEO1420 The Everlasting Covenant: The Hebrew Bible and THEO1421 Inscripting the Word: The New Testament. Alternatively, students may complete THEO1422 The Sacred Page and an additional Scripture elective (level II or above) with the undergraduate director's approval.

3. *Majors Course*: THEO2001 Tradition and Traditions (1 course; 3 credits)

4. *Majors Course*: THEO2002 Trajectories in Contemporary Theology (1 course; 3 credits)

5. *Honors Electives* (6 courses; 18 credits), including an optional Honors Thesis (6 or 12 credits). * At least two of these electives should be level 3 or above. Students, with the guidance of their advisor, should make sure their program of study addresses each of the general subject areas (Bible, History, Systematics, Ethics, Comparative Theology) covered by the department's faculty

*2 courses/6 credits from another discipline (including the first major) may also count toward the Standard Theology or Honors Theology majors, provided that they have sufficient theological relevance as determined by the Director of Undergraduate Studies.

Students, with the guidance of their advisor, should endeavor to make sure their program of study addresses each of the theology sub-disciplines (i.e., Bible, History, Systematics, Ethics, Comparative Theology) covered by the department's faculty.

Minor Requirements (21 Hours)

The Theology minor consists of the Theology Core requirement plus five 3-credit courses that are Level Two or above.

Information for First-Year Majors and Non-majors

Theology is the academic discipline concerned with the realities that are the center of religious faith and with the traditions of belief and worship that inform the life of communities of faith. Historical, biblical, psychological, ethical, pastoral, comparative, philosophical, and doctrinal studies are all included within the scope of Theology at Boston College, which introduces the undergraduate to a mature, critical approach to religious knowledge and experience. There is a strong, but by no means exclusive, emphasis on Christianity, and more specifically, on the Roman Catholic tradition.

The courses offered are grouped into four categories: (1) biblical, (2) historical, (3) ethical and social-scientific, and (4) comparative and systematic or doctrinal. All courses, particularly those taught at the Core level, aim at fulfilling certain goals:

- A liberal arts goal of fostering awareness of the religious roots and background of our culture—for example, by giving students a coherent view of religion and its development, a groundwork for moral decision, and an awareness of their own existence as religious persons
- A specifically theological goal of introducing the materials and methods of one or more approaches to the academic study of religious faith and tradition
- A religious or confessional goal, explicit in some—though not all—courses, of exploring a particular tradition from the inside, healing negative encounters with religion, inviting commitment and belief, and the like.

Information for Study Abroad

There are no formal requirements stated by the Theology Department, but it is presumed that students will have completed at least one Core course (**or 3 credits of the Core**) before going abroad. The Department will allow 9 credits or three courses taken abroad to count toward major credit. A maximum of one Core course (3 credits) may be taken abroad.

All Theology majors should contact the Director of Undergraduate Studies while planning their study abroad program.

Loneragan Center

Studies related to the work of the Jesuit theologian and philosopher Bernard Lonergan (1904–1984) have a focus in the Lonergan Center at Boston College. The Center houses a growing collection of Lonergan's published and unpublished writings as well as secondary materials and reference works, and it also serves as a seminar and meeting room. Kerry Cronin is the Associate Director of the Lonergan Center, which is located on the fourth level of Bapst Library and is open during regular hours as posted. Information about the Center or the Lonergan Institute is available at bc.edu/lonergan.

University Courses

University Capstone Courses

For up-to-date information on Capstone, including the best way to register, the seminars available, their syllabi, and the faculty, please see the Capstone website at bc.edu/capstone.

A course for seniors: Reserved for seniors only, the Capstone program is designed to cap off college by facing the questions of life after graduation. The Capstone Seminars (UNCP5500–UNCP5599 only) directly address the hopes and anxieties that seniors face but seldom find treated in traditional courses. They invite seniors to discover the patterns underlying their choices up to now. They also relate the life and learning of the past four years to the life and learning ahead. In this way, Capstone Seminars take seriously the struggle to integrate four crucial areas of life: work, relationships, citizenship, and spirituality.

Ask some inevitable questions now, not later.

How did my education prepare me to live? With everything I want to do, what will I have to compromise? How can I balance my career and my family? Can I find work with a higher meaning than my income? How do I wish to live responsibly and affect society?

Special features of the courses:

- Faculty from various departments
- Each section limited to 15–19
- Innovative teaching methods
- Interdisciplinary reading
- Some guest speakers from professional life

Capstone Seminars may satisfy major requirements if they are cross-listed in certain departments. Check with the instructor.

To Register for a Capstone Seminar

You must be a senior to take the course. **Students may take only one Capstone Seminar during their time at Boston College. Capstone Seminars may not be taken Pass/Fail. This is true whether the course is listed under the UNCP department numbers or as a course in a specific department. If a second Capstone course appears on your record, it will be removed. This could make you ineligible for graduation.**

Different Capstone Seminars will be offered each semester. All Seminars are interdisciplinary. You may register for any one of the seminars as a University (UN) course.

In addition, several Capstone seminars are cross-listed, both as University courses with a UNCP number and also as courses in the department of the professor offering the course. If you find a particular Seminar closed, try to register under the cross-listed number (e.g., if UNCP5500 is closed, try to register for the class as THEO2410, and vice versa). Some Capstones require “Department Permission”: if so, contact the instructor, not the Program Director. A Capstone Seminar can count as an elective for students in all colleges (Morrissey College of Arts and Sciences, Connell School of Nursing, Lynch School of Education and Human Development, Carroll School of Management). For majors in English, Philosophy, Theology, and certain other departments, it might satisfy the major requirements if the seminar is taken under the cross-listing in the department of his/her major. Check with the instructor.

Students should also understand the following rule:

No student may take more than one Capstone seminar during his/her undergraduate years. Thus, you may not take two Capstone courses in one semester or in two different semesters.

Schiller Institute for Integrated Science and Society

Global Public Health and the Common Good

Boston College offers a 12-course (36 credit) newly launched undergraduate major and a 6-course (18 credit) minor as well as a range of courses in the Global Public Health and the Common Good academic program. The Global Public Health and the Common Good program is offered through the Connell School of Nursing with an academic partnership with the Schiller Institute. Our entry-level courses are open to students from across Boston College and are designed to introduce students in any field of study to core concepts in public health.

Enrollment in the major or minor in Global Public Health and the Common Good is by a competitive application submitted in the spring of the freshman or sophomore year. Students accepted into the program have the opportunity to delve deeply into epidemiology, the core science of public health, and to pursue coursework and research in diverse areas of public health such as infectious disease epidemiology, the epidemiology of cancer, children's environmental health, environmental epidemiology, nutritional epidemiology, and refugee health. A distinctive feature of the minor is its strong emphasis on the ethical, moral, and legal foundations of global public health.

The Program for Global Public Health and the Common Good at Boston College provides opportunities for academic and experiential learning, reflection, and service in the United States and overseas.

The major and minor in Global Public Health and the Common Good are open to students with career interests in medicine, nursing, environmental studies, and public health. It will prepare students for postgraduate studies in public health (M.P.H. and Ph.D.) and enrich the education of students headed to medicine, dentistry, and nursing. And because public health is highly interdisciplinary and intersects many fields of human endeavor, the minor is open also to students interested in law, economics, international studies, mathematics, physics, chemistry, the humanities, business, social work, and education.

[Global Public Health and the Common Good Major](#)

[Global Public Health and the Common Good Minor](#)

Program Objective

The goal of a minor in Global Public Health and the Common Good is to introduce students from a wide range of majors, disciplines, and schools across Boston College to key concepts in Global Public Health. The major will prepare students for postgraduate studies in public health (MPH and Ph.D.) and enrich the education of students headed to medicine, dentistry, veterinary medicine, and nursing.

Program graduates will gain knowledge of:

- The theory, history, and key issues in Global Public Health;
- Epidemiology: the study of the distribution and determinants of health and disease in populations—the foundational science of public health;
- The social, economic, and environmental determinants of health and disease;
- The contributions of public health to the stability and well-being of modern societies; and
- The moral and ethical foundations of Global Public Health.

Coursework in the major in Global Public Health and the Common Good will be grounded in epidemiology and biostatistics, the core disciplines of public health. Students will gain an intellectual and experiential understanding of the social determinants of health – the complex web of social, economic, environmental, political, and historical factors that influence health and drive the spread of disease.

Major Requirements

The major will consist of 36 academic credits, equivalent to 12 full-semester courses. It will consist of:

- Eight required core courses
- A 6-credit, 2-semester Interdisciplinary Senior Capstone Experience; and
- Two elective courses.

Eight Required Core Courses:

1. Introduction to Public Health in a Global Society - **PHCG/NURS121**

An overview of the history of public health, global burden of disease, sub-disciplines of public health, maternal/child health, and nutrition, and the collaborative nature of the field through examples in research and practice, focusing on at-risk populations, reducing health disparities, and improving health equity at the population level.

2. Introduction to Epidemiology - **PHCG2120**

This course introduces basic principles and methods of epidemiology and biostatistics. Measures of disease frequency, association, and causation, the design and analysis of studies, and the potential issues that may arise in these studies are addressed.

3. Biostatistics, Data Analytics and Quantitative Methods in Public Health - **PHCG3560**

This course covers descriptive and inferential statistics used in biomedical and public health studies, with an emphasis on practice and implementation. Descriptive statistics, probability, basic hypothesis testing, ANOVA, and linear and logistic regression will be covered.

4. Ethics of Global Public Health and the Common Good - **PHCG/THEO3223**

Life expectancy is 30 years longer in high-income countries than in very low-income countries. 92% of all pollution-related deaths occur in low- and middle-income countries. Maternal mortality in childbirth is much higher among Black women in the United States than among white women. The course studies the ethical issues raised by these and other real-world issues in global public health, and it considers approaches to address them.

5. Health Inequities: Origins and Remedies - **PHCG3600**

Disease is not distributed evenly or randomly within societies, but instead is concentrated among people of color, the poor and marginalized. This course will examine the social, economic, political, and historical factors that drive disparities in health and explore strategies to overcome these structural injustices.

6. Global Public Health Law - **PHCG2130**

This course will examine the critical role of law in creating and implementing social policy and achieving (or at least seeking) social justice.

7. Global Health: Theory to Practice - **PHCG3300**

In this course, students will learn how to apply the theories and practices learned in other global health courses by working through practical case studies involving real-life global health problems.

8. Public Health Planning, Practice, and Evaluation - **PHCG3810**

This course explores the theoretical and practical elements of public health program planning, monitoring, and evaluation. Public health advocacy concepts are included in the class.

Electives Senior Capstone Experience - PHCG4975 and PHCG4976

Each student enrolled in the major in Global Public Health and the Common Good will be expected to complete a 2-semester, 6-credit, interdisciplinary Capstone Experience in their senior year. This Capstone will be the culmination of each student's undergraduate experience in global public health and will require the application of theoretical knowledge in a real-world setting. It will be conducted under the guidance of a faculty mentor and will involve working with a community-based organization identified by CSON's Office of Community Partnership. Working individually or in pairs, students in the Capstone will be expected to work in and with a community. They will identify a community-level public health problem; undertake a rigorous analysis of the problem's origins and health effects, including a detailed review the relevant public health literature; and devise solutions that are feasible, acceptable to the community, and cost-effective. They will be expected to produce a scholarly report that describes the project, their approach to it, and its outcome. This final product will be required to be of a quality suitable for publication in a peer-reviewed biomedical journal or for presentation at a regional or national meeting.

Electives:

Students in the major will be permitted to choose two Electives from an extensive list of courses in many schools and departments that have already been approved as electives for the minor in Global Public Health and the Common Good (see list of electives under the Minor requirements)

Minor Requirements:

The Global Public Health and the Common Good minor consists of three Required core courses and a selection of three Elective courses.

Three Required Core Courses:

1. PHCG1210: Public Health in a Global Society
2. PHCG2120: Introduction to Epidemiology
3. Either of the following:
 - o PHCG2130: Global Public Health Law (fall semester only) OR
 - o PHCG3223: The Ethics of Global Public Health and the Common Good (spring semester only, cross-listed as THEO3223)

Electives

In addition to the 3 required courses, students are also expected to select 3 Elective courses from the list below. Please note: Additional electives may be considered subject to the approval of the program director and Associate Deans. Students must choose at least one elective from List B.

Please contact publichealth@bc.edu for further information. Not all classes are offered each semester.

List A

Carroll School of Management

- MGMT2139 Social Innovation and Entrepreneurship
- BSLW1113 Climate Change Law & Ethics
- BSLW2000 The State of Affordable Housing in the States (cross-listed as ECON2000)
- BSLW3345: Managing for Social Impact and the Common Good

Connell School of Nursing

- NURS4260: Population Health Nursing Theory
- NURS4261: Population Health Practice in the Community
- NURS5345: Ecuador: Global Health Perspectives

- FORS2201: Wounded Warriors in Transition

Lynch School of Education and Human Development

- APSY2217 Statistics for Applied Psychology
- APSY3320 Building Sustainable Communities
- APSY6348 Prevention and Intervention Strategies for Children
- APSY6397 Social Issues and Social Policy
- APSY7471 Psychological Responses to Humanitarian Crises

School of Theology and Ministry

- TMCE7052 Theological Bioethics: From the Basics to the Future
- TMCE7128 Just Sustainability
- TMCE8072 Human Genetics and Biotechnologies: Challenges for Science and Religion
- TMCE8159 Catholic Healthcare: History, Contexts, Values, and Principles
- TMCE8518 Global Health and Theological Ethics

Law School

- LAWS4501 New Frontiers in Environmental Policy *
- LAWS4503 Water Law and Policy *
- LAWS4505 Climate Change Law and Policy *
- LAWS9326 Bioethics and the Law Seminar

*Students must take either ENVS2256 or PHCG2130 prior to enrolling in this course. In addition, students must be registered by the department. Please email publichealth@bc.edu for further information.

Morrissey College of Arts and Sciences

Biology

- BIOL1440 Sustaining the Biosphere
- BIOL2300 Biostatistics
- BIOL4130 Ecology in a Changing Climate
- BIOL4440 Vaccination and Immunity
- BIOL5130 Environmental Disruptors of Development
- BIOL5150 Vaccine Development and Public Health

Communications

- COMM4465 Health Communication

Core

- PHCG1701 Maternity and Science: Society, Culture, & Public Health (first year only)
- PHCG1702 Institutional Disparity: Equity and Global Health (first year only)

Earth & Environmental Science

- EESC1170 Rivers and the Environment
- EESC1174 Climate Change and Society
- EESC1187 GeoScience and Public Policy
- EESC2201 Environmental Systems: The Human Footprint

- EESC2206 Environmental Systems: Oceans
- EESC2297 Environmental Hydrology
- EESC3310 Agroecology: The Science of Sustainable Agriculture
- EESC4480 Applications of GIS (Geographical Information Systems)
- EESC5549 Climate Change Debates
- ENVS2256 Environmental Law and Policy
- ENVS2258 Environmental Law and Policy in the United States and Europe
- ENVS3315 Sustainable Agriculture
- ENVS3356 Seminar in Environmental Law
- ENVS3345 Environment and Public Health

Economics

- ECON1151 Statistics
- ECON2000/BSLW2000: The State of Affordable Housing in the States
- ECON2213 Economics of Health Policy
- ECON2242 Public Policy and an Aging Society
- ECON2273 Development Economics
- ECON2275 Economic Development: The Experience of El Salvador
- ECON2277 Environmental Economics and Policy
- ECON2278 Environmental Economics
- ECON2289 Which is Better? An Economic Comparison of Health and Health Care in France, the UK, and the US?
- ECON3315 Economics of Immigration
- ECON3317 Economics of Inequality
- ECON3363 Micro Public Policy Issues
- ECON3373 Impact Evaluation in Developing Countries
- ECON3374 Development Economics and Policy
- ECON3385 Health Economics
- ECON3390 Applied Health Economics
- ECON3391 Economics of Energy and the Environment

English

- ENGL4201 Science Writing

History

- HIST2431/AADS2431 Leeches to Lasers: Medicine and Health in the United States
- HIST4485/AADS4485 History of Medicine and Public Health in the African Diaspora

Philosophy

- PHIL4320 Philosophy of Mental Illness

Schiller Institute

- SCHI2000 Spatial Data Science and Applications (cross-listed as PHCG2000)
- PHIL2233 Values in Social Services and Health Care

Psychology and Neuroscience

- PSYC1120 Introduction to Behavioral Statistics and Research Methods I

Sociology

- SOCY1002 Introductory Sociology for Healthcare Professionals
- SOCY1072 Inequality in America
- SOCY1073 States, Markets, and Bodies
- SOCY1078 Sociology of Health and Illness
- SOCY1096 Aging and Society
- SOCY1097 Death and Dying
- SOCY2200 Statistics
- SOCY3322 Consumption, Health, and the Environment
- SOCY3373 Sexuality and Society*
- SOCY3346 Environmental Justice
- SOCY4400 Racialized Medicine (cross-listed as AADS4400)

Theology

- THEO3222 Bioethics and Social Justice
- THEO5498 HIV/AIDS and Ethics

Schiller Institute for Integrated Science and Society

- SCHI2000/PHCG2000 Spatial Data Science and Applications
- SCHI5020 Exploring the Climate-Energy-Sustainability Nexus

Woods College of Advancing Studies

- ADSB1904 Planetary Health

List B

- ADSB3000 Global Environmental Change and Human Health
- APSY4050 Public Health Practice in the Community (not currently offered)
- BIOL2320 Case Studies in Epidemiology (not currently offered)
- PHCG3210 Contemporary Issues in Public Health (formerly NURS3210)
- NURS5350 Global Healthcare: Meeting Challenges & Connections
- PHCG3120 Cancer Epidemiology
- PHCG3300 Global Health: Theory to Practice **
- PHCG3425 Food Policy and Health
- PHCG3560 Biostatistics, Data Analytics and Quantitative Methods in Public Health **
- PHCG3600 Health Inequities: Origins and Remedies **
- PHCG3810 Public Health Planning, Practice and Evaluation
- PHCG4140 Children's Health and the Environment
- PHCG4050 The Law, Policy, and Politics of Women's Health
- PHCG4060 Borderlands & Health Justice: Migration, Environment, and Indigenous Rights
- PHCG1290 Global Health Delivery and Health Equity: A South African Context (summer only)
- EESC3398 Statistical Analysis of Scientific Data

**These are required courses for Major students, therefore cannot be used to fulfill the electives requirement for Major students

For Connell School of Nursing Students only:

CSON students *only* must take the following two courses, which will count as their Electives:

- NURS4260 Population Health Nursing Theory (List A elective credit)

- NURS4261 Population Health Practice in the Community (List A elective credit)
- One elective from List B above

Messina College

Messina College is the newest undergraduate college of the University. It offers Associate's degrees in four majors that prepare students for specialized careers in education, business, health, and STEM fields. Students are also well-positioned after earning their Associate's degree to pursue bachelor's degree studies either at Boston College or another 4-year institution.

Career discernment and preparation are built into the Messina curriculum. At Messina College a student's program consists of a First-Year Discovery Seminar, required Core courses, intensive study in a major field, and an internship (or clinical rotations for Health Science majors) with a 3-credit internship seminar course.

Messina College provides its students with a strong foundation in a Jesuit liberal arts education, along with the major skills required to succeed in either direct entry into the workforce or to pursue additional higher education.

Core

The Messina College Core consists of a subset of the University Core required of all BC four-year undergraduate students. Messina's Core provides introductory exposure to the various disciplines that define a liberally educated individual in today's world. All Messina students must complete Core requirements in the Arts, Cultural Diversity, History, Literature, Mathematics, Natural Sciences, Philosophy, Social Sciences, Theology, and Writing. The Theology and Philosophy course has a service component that helps students apply and integrate these disciplines into a student's own intellectual discovery. By completing 11–12 of the BC Core requirements, grade-eligible Messina students are well-positioned to enter their 3rd year at Boston College and complete their remaining Core courses within the next two years. If students decide to pursue a bachelor's degree at a peer institution, Core courses often align with the general education requirements at other 4-year schools.

Major

All students at Messina College must select a major field of study from one of the four majors offered in the college. These majors align with coursework in Boston College's four bachelor's degree schools:

- Applied Data Science: Morrissey College of Arts and Sciences
- Applied Psychology and Human Development: Lynch School of Education and Human Development
- General Business: Carroll School of Management
- Health Sciences: Connell School of Nursing

Academic work in the major includes experiential learning opportunities to enable students to directly apply their coursework to career exploration. Courses are designed to develop critical and analytical thinking, professional and presentational skills, and an appreciation for the complexity of an area of study beyond the introductory level. A major generally consists of at least 18 credits in a field. Some of these are sequentially organized required courses. A list of the required courses for each major is available on the [Majors](#) page. While most of the courses are taught on the Brookline campus, Messina students in their second year of the program will attend at least one major course per semester with peers on the Chestnut Hill campus to ensure that Messina students benefit from interaction with the faculty and students in BC's other undergraduate schools and colleges.

[Messina College Courses](#)

[Messina College Website](#)

- Program Requirements
- Internships
- Academic Regulations
- Internal Transfer
- Time to Complete a Degree

Program Requirements

To graduate from Messina College, students must take at least 60 credits over four semesters and two summer sessions. Summer sessions are required for all Messina College students.

The requirements for the program include:

- 36 credits in the Core Curriculum
- At least 18 credits in a major concentration
- An internship
- A public speaking course
- A first-year seminar

Students who complete all requirements with at least a cumulative 3.4 grade-point average will be eligible for an internal transfer to one of the four-year undergraduate day schools or colleges at Boston College.

Internships

Internships, or clinical rotations for students studying Health Sciences, will take place during the fall semester of students' second year. Students will simultaneously take a 3-credit seminar course to help them connect their internship experience to their academic and professional goals, and reflect on and articulate the professional skills they are gaining.

In addition to the accompanying course, students will work closely with a Boston College Career Center coach throughout the internship process. The Career Center coach will help students prepare for their internship experience, navigate any challenges, and serve as a resource for on-site internship supervisors.

Academic Regulations

Satisfactory Academic Progress and Credit Deficiencies

Students should average 12 credits per semester in fall and spring, and 6 credits each summer, with a target of completing 30 credits in the academic year. In a student's first year, the fall semester is based on 9–11 credit hours, depending on the program of study.

Given Messina College's cohort-based model, students are not permitted to overload.

To remain in good standing at Messina College, you must maintain a cumulative GPA of 1.667 or higher. Students who receive below a 2.0 GPA in a semester will be required to meet with the Associate Dean and make a plan for satisfactory academic progress.

If a student falls below the 1.667 GPA requirement, they will be academically withdrawn from the College beginning the semester immediately following the one in which the student failed to meet the requirement.

Messina College Academic Probation and Dismissal

Students who are academically withdrawn from Messina College will have the option to submit an appeal in writing to the Dean.

If the appeal is granted and the student is reinstated, they will be placed on academic probation for one semester. Students on academic probation must demonstrate their ability to continue by successfully completing at least 6 credits in graded courses during the probationary semester (i.e., you can't have any Incompletes or missing grades) and achieve a GPA of at least 2.0 (equivalent grades of C) for those 6 credits.

A plan for making up the deficient credits will be created with the Associate Dean.

Probationary semesters may count as an extra semester to make up courses and not as a regular semester (one of the required semesters at Messina College). As a result, students on probation may have their graduation date pushed back by one semester.

If students fail to meet the terms of probation, they will be academically withdrawn from Messina College. Probation will not be extended to a second consecutive semester. Students may not have more than two probationary semesters in total.

Grade Grievances

Grade changes are normally only made in the case of a clerical error. If a student wishes to file a formal appeal of a course grade, the request should be made no later than the sixth week of the following semester. In making a formal appeal, a student files a written statement with the Dean. The Dean will then request written responses from both the instructor and the Associate Dean and submit the case to the Educational Policy Committee. The committee will review the case thoroughly and make a recommendation on the resolution to the Dean. The Dean's decision will be final.

Students are strongly encouraged to work with their instructors before beginning this formal process and should reflect on the merits of the case.

Retaking a Course

Students who fail to complete the intended credits per semester will incur credit deficiencies and may be required to make up credits before being allowed to continue at Messina College. To make up for a credit deficiency, students may take summer courses offered at Boston College.

Students can take summer courses to make up for a past failure or withdrawal. Students can take a maximum of two courses per summer. Students must earn a passing grade (i.e., D-) on a summer course to receive course credit.

Students must take summer courses offered by one of the Undergraduate day schools (Morrissey, Connell, Lynch, Carroll) in order to make up for a failed or withdrawn course. Online courses from one of these schools are accepted. The Dean or Associate Dean of Messina College must pre-approve summer retakes to ensure alignment with a student's program of study.

If a student wishes to retake a course at another institution, that course must be pre-approved by the Dean.

Internal Transfer

Students at Messina College with a 3.4 GPA can make an internal transfer into any of the Undergraduate Day schools with the approval of both the Dean of Messina College and the receiving Undergraduate Day school deans. Eligibility for transfer does not guarantee admission into all programs of study. In some cases, students will need to apply for admission into a particular program (i.e., Connell School of Nursing) due to capacity limitations.

Time to Complete a Degree

Messina College follows a cohort model for its programs of study. If a student falls outside of their cohort due to medical or personal circumstances, such as an approved leave of absence, the Associate Dean will outline a course of study for completion when possible. Housing, however, cannot be guaranteed outside of the student's intended graduation cohort.

A student who is unable to complete a program of study in a timely manner (not to exceed three years) despite a revised program of study as outlined by the Dean's Office may be asked to withdraw from the program and advised to transfer to another degree program in the Woods College of Advancing Studies or to an external institution.

Woods College of Advancing Studies

The James A. Woods, S.J., College of Advancing Studies offers both full- and part-time study to undergraduate and graduate students from widely differing backgrounds and preparations who wish to maximize their experiences and master the skills necessary to advance their future.

Boston College fosters in its students rigorous intellectual development coupled with religious, ethical, and personal formation in order to prepare them for citizenship, service, and leadership in a global society.

Within the context of the Boston College environment, James A. Woods, S.J., College of Advancing Studies promotes the care and attention to the human person that is the hallmark of Jesuit education while faculty and students engage in scholarship that enriches the culture and addresses important societal needs.

Undergraduate Programs

The James A. Woods, S.J., College of Advancing Studies offers the atmosphere of a small college within the environment of a large university. The professional staff at the James A. Woods, S.J., College of Advancing Studies have experience helping students arrange a realistic program of study, one that combines work responsibilities with educational goals. Students receive personal attention while enjoying access to the many resources of Boston College. A flexible admission process coupled with academic advising allows a student to select the most appropriate major based on individual needs. Courses are ordinarily scheduled between the hours of 6:15–9:35 p.m. on weekdays, with online and hybrid courses also available.

Bachelor of Arts Program

The Bachelor of Arts program prepares students to address and master the challenges of a rapidly changing and increasingly complex world. A broad-based and robust liberal arts curriculum, which includes Core requirements, permits students to choose courses and majors reflecting individual interests and varied career objectives. The curriculum offers intensive work and a degree of disciplined mastery in a major area.

Degree Requirements and Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing
 - Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses
- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course

- Designing Your Career

Degree candidates must fulfill all Core curriculum and major requirements as part of earning the minimum of 120 credits. Students are required to achieve a minimum cumulative GPA of 1.67 to be eligible to graduate.

Transfer of Credit and Residency Requirements: External to BC

At the B.A. level, a minimum of 60 credits must be completed at Boston College to satisfy residency requirements, and a maximum of 60 credits from regionally accredited institutions, CLEP exams, DSST exams, or Joint Service Transcripts may be transferred into a student's program.

Courses from regionally accredited institutions with a grade of C or better may be accepted for transfer credits; only courses with a minimum of three credits will be considered for transfer to satisfy a Woods College program requirement. Courses with fewer than three credits will be evaluated on a case-by-case basis for transfer as elective credit.

For all students, transfer credits must be submitted for evaluation by the conclusion of your first semester of study at the Woods College.

College Credit through Examination

Students will only be awarded up to a total of 15 credits from the combination of CLEP and DSST examinations.

College-Level Examination Program (CLEP) and DANES Subject Standardized Tests (DSST) offer students the opportunity to earn college credits through examination, by demonstrating comprehensive knowledge of college-level material gained through independent or prior study. The Woods College of Advancing Studies will accept up to 15 credits from the combination of the CLEP and DSST examinations. The Woods College recognizes the American Council on Education's college credit recommendations for each CLEP and DSST exam. Those recommendations can be found on the [CLEP](#) website and the [DSST](#) website.

Current students must consult with their academic advisor prior to taking CLEP/DSST exams for credit to verify that any CLEP/DSST exam will support the student's program of study. Students seeking admission to the Woods College should consult an admissions advisor for evaluation of how previously taken CLEP/DSST exams will impact their program of study.

Joint Service Transcripts

Students who have served in the United States armed forces typically have college-level credit. The American Council on Education (ACE) has worked with the U.S. military to evaluate many of the service members' training modules. They have recommended college-level credit for many of these trainings, and the Woods College of Advancing Studies recognizes that training for possible transfer credit.

When evaluating ACE credit recommendations for transfer, the Woods College will consider trainings that map onto courses or disciplines that Boston College offers. For example, a recommendation for three credits for Computer Applications would transfer as three credits within the Information Systems discipline. A recommendation of three credits for Aircraft Maintenance would not be eligible for transfer as Boston College does not offer any courses in this area.

Please consult an academic advisor during the admissions process to evaluate how many of the ACE credit recommendations on your Joint Service Transcripts (JST) might transfer into your program of study at Boston College.

At this time Boston College will accept up to 30 credits through the JST. Any CLEP credits a student may have would also count towards this 30-credit limit. For example, a student with nine credits through CLEP would be allowed to bring in 21 credits through the JST. Or a student with 24 JST credits would be allowed to bring in six credits through CLEP exams.

Students should submit their official JST for evaluation prior to the conclusion of your first semester of study at the Woods College.

Taking Courses at Other Institutions

Students enrolled in the Woods College as degree students must follow the curriculum prescribed by the college. Once a student matriculates, courses may not be taken at other institutions for credit in a Boston College degree program.

Students who have taken leaves of absence, exmatriculated, or otherwise interrupted their studies at the Woods College are not eligible for transfer credit for courses taken during their absence from the Woods College.

Transfer of Credit and Residency Requirements: Internal BC Students

Current Boston College students transferring to the Woods College of Advancing Studies must submit a Woods College Bachelor of Arts Degree Application at bc.edu/woodsapply.

The following conditions will apply to all transfers of credit from any other Boston College schools into the Woods College of Advancing Studies:

- All courses taken at any other school within Boston College and the GPA earned will transfer to the Woods College of Advancing Studies.
- All incoming credits will be evaluated on a case-by-case basis to determine applicability within the program of study the student chooses to pursue at Woods College of Advancing Studies.
- A minimum of 12 credits (equivalent to one full-time semester of study) will be required to be taken at Woods College of Advancing Studies.

Course Load

Woods College students, **both graduate and undergraduate**, enrolled in three Woods College courses are considered full-time for the purposes of financial aid, and students enrolled in two or fewer courses per semester are considered part-time. The maximum allowed course load is three courses per semester for students in the Woods College. A maximum of four courses over the duration of the summer sessions may be taken.

Course overloads (i.e., taking additional credits or courses beyond the maximum) will be considered on a case-by-case basis, pending an evaluation of academic performance. Advisor approval is required to process a registration for a course overload.

Undergraduate Admission

Applications for admission may be submitted at any time and are reviewed on a rolling basis. The following documentation is required:

- Completed online application form;
- Official transcripts from high school and colleges previously attended;
- Two essays (requirements are found on the application);
- Two letters of recommendation; and
- If English is not your primary language, then English Language Proficiency with an IELTS score of 6.5–7.5 or TOEFL score of 90–100.

Please see the Woods College website for further details on how to apply.

Degree Programs and Certificates

Woods College offers the following undergraduate majors:

- Applied Liberal Arts (ALA)
 - English (ALA Concentration)
 - History (ALA Concentration)
 - Interdisciplinary Studies (ALA Concentration)
 - Philosophy (ALA Concentration)
 - Political Science (ALA Concentration)
 - Sociology (ALA Concentration)

- Sustainability (ALA Concentration)
- Business
- Digital Communication
- Criminal and Social Justice
- Cybersecurity
- Economics
- Information Technology
- Psychology

Woods College also offers undergraduate-level certificates in Cybersecurity.

B.A., Applied Liberal Arts

Applied Liberal Arts (ALA) helps clarify connections between your education and your life, your job, and your future. The critical thinking, ethical reasoning, and cultural literacy skills valued by today's employers are hallmarks of a liberal arts education. Our program also provides courses in high-demand workplace essentials such as project management, data visualization and analysis, design thinking, and conflict resolution.

Curriculum

You will pursue a major in Applied Liberal Arts while earning a concentration in one of six areas. You'll complete seven major requirements and either five or six courses within a specific concentration.

Major Requirements

ADIT3308 Project Management

This course takes a 360-degree perspective on project management, incorporating the important peripheral elements that influence the discipline. This course helps students develop practical skills for functioning in a variety of roles on projects, including project manager, while developing an appreciation for the importance of governance and project and portfolio management (PPM) in any work environment, looking at the concept and the practice of projects from the perspective of participant, practitioner, and executive sponsor.

Data Visualization or Programming

ADIT2025 Data Visualization

A picture is worth a thousand words. We are in a world full of data and information; the demand for data analytics and visualization skills is growing rapidly nowadays. Data visualization is a critical part of data science. It is an effective way to communicate insights from data through visual presentation. We use data visualization to identify hidden patterns and reveal relationships to show trends in data and tell the full story of the data. In this course, students are introduced to the foundations of data visualization along with various data visualization tools. We will introduce the key design principles, how to present data using a number of common data visualization tools (such as Excel and Tableau software). This course will provide students from all backgrounds the opportunity to learn data skills and have hands-on experience working with various datasets, creating visualizations and telling data stories. Students will develop data visualization skills that can be applied to their fields of study and future career. Topics covered include best practices in use of color, visualization principles, static and interactive visualizations, visualization types, etc.

Programming Courses

- ADIT1350 JavaScript: This course teaches students the fundamental concepts of programming (coding). First, we will define what a programming language is and then we will learn its grammar and syntax. We will learn about variables, conditionals, and iteration. We will also learn about arrays, functions, and objects. We will use the industry-standard JavaScript programming language to put into practice all of these concepts. Designed specifically for individuals who have little-to-no programming experience, this course teaches participants in a project-based environment how to code JavaScript, the language of the web. During this course students

will (1) learn how to think of problems logically and computationally, (2) use programming tools to express themselves creatively as they learn the fundamentals of coding, and (3) create real-world applications.

- ADIT1985 Python: This course is meant for any student interested in learning computer programming concepts with the Python programming language. We will cultivate our problem-solving abilities as we develop programs in Python. This course is suitable for students that have little to no programming experience. We will start with the basics as we discuss logical decisions and loops. Further, we will explore Python data structures such as tuples, sets, lists, and dictionaries. We will couple this knowledge to make our own classes as we learn about object-oriented programming. We will also discover basic debugging techniques throughout the semester. At the end of this course, we will have learned enough concepts to be able to compose Python programs that solve problems on their own.
- ADIT1990 C++: An introduction to programming with C++. This course is meant for students with little or no programming experience. We will start with the basics of programming using the C++ programming language. C++ is the cornerstone programming language used to develop many of the fundamental applications we use on a daily basis. For example, operating systems, web browsers, and other programming languages such as Java, Python, and SQL are built with C++. We will use the low-level nature of the C++ programming language to learn about the fundamental aspects of how a computer works. In this course we will develop basic command line applications, explore how data is stored in memory and how we may use logic to manipulate the data to produce different results.

ADBM3075 Conflict Resolution and Negotiation

This course presents specific tools for improving people skills in preparing for and conducting negotiations. It examines the characteristics of different negotiating situations, leadership and decision-making functions, interpersonal communication, the intercultural community, management strategies, and factors affecting which negotiation style most enhances communication.

ADBM1771 Applied Data Analysis and Interpretation

This course will introduce students to the basics of data analysis and interpretation. Students will critically engage with actual data from across disciplines in order to develop their own interpretations of the underlying meaning. We will explore how these skills can apply to making decisions in academic, professional, and community contexts. The skills developed and practiced here will assist the students in critically evaluating and drawing meaning from data as well as making well-informed decisions from that data.

ADBM2250 Design Thinking and Creativity

Design Thinking is human-centered, creative problem solving. It seeks to tackle tough problems by examining what is economically possible, systemically viable, and desirable to the constituents of focus. It is a process that overcomes many of the challenges to innovation today—preference for or comfort in the status quo—while remaining true to human nature at the center of most problems. This course seeks to introduce students to the concept of Design Thinking, its foundational principles, and the application of these principles to real-world issues. At its heart, this is a methods course that asks students to reframe problems in new ways so that creative solutions might arise from a reframing of the problem.

ADEX4500 Integrative Capstone

This course closes out the degree. It's meant to be taken after completing all major requirements (though not necessarily all degree requirements). You may take it concurrently with the final courses for the major if you are scheduled to graduate in the given semester.

Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing
 - Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)

- 2 Theology courses
- 2 Social Science courses
- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course
- Designing Your Career

Learning Outcomes

Critical Thinking and Problem-Solving

- Examine, and dissect the assumptions and conventions of different areas of study, while addressing complex questions, problems, materials, and texts of all types with creative solutions and analytical processes
- Evaluate and synthesize large amounts of information to execute decisions and devise solutions to problems
- Formulate creative solutions to complex problems integrating multiple perspectives

Quantitative Reasoning

- Ethically analyze and interpret data from real-world situations to construct creative solutions
- Develop creative arguments supported by quantitative evidence and communicate numerical data in a variety of formats and mediums utilizing data visualization and other media tools

Communication and Information Literacy

- Find, appraise, organize, use, and convey information and their ideas, both individually and collaboratively, through oral, digital, and written forms. Address both specific and general audiences through various writing genres.
- Analyze and manage group dynamics and the resolution of conflicts by integrating conflict resolution strategies with the goal of reaching productive outcomes.
- Produce and present ideas using digital media and storytelling techniques that increase knowledge, foster understanding, or promote change in listener attitudes, values, beliefs, or behaviors
- Understand the value and process of working with others and use critical perspectives and skills needed to co-create knowledge with others

Acting as Men and Women for and with Others

Discern personal and professional responsibilities in order to develop creative solutions that lead to engagement in courageous action that contributes to dismantling unjust structures

Integrative learning

- Reflect on connections among ideas, disciplines, and experiences in order to examine issues, ideas, and events
- Synthesize and transfer their learning to new and complex situations or issues

Diverse Perspectives

Demonstrate a nuanced understanding and respect of diverse individuals and perspectives and the application of this understanding to further equity, human rights, and social justice.

Applied Liberal Arts Concentrations

English Concentration

The English concentration continues to improve upon skills that are first introduced in the College Writing and the Literary Works Core requirements. Continued development of these technical English skills is the central focus of this concentration. Honing these technical skills and developing a strong base in the English language will allow students to best translate those skills into any future discipline.

Beyond these required courses, students will be free to select any four electives. Students will focus these electives primarily on the broad array of literature courses covering the major time periods and genres, as well as a selection of courses with non-Western roots. Consistent across all literature courses will be an emphasis on developing the essential, and widely transferable, skill of analysis. This exploration of literature will allow students to explore the issues fundamental to the human condition and they will emerge with a deep understanding of how literature both reflects and enhances the lived experience.

Concentration Requirements

- Completion of the Core English requirements: ADEN1054 College Writing and ADEN1060 Literary Works.
- ADEN2650 Writing with Precision
- Four additional English electives, one of which must focus on a non-Western literary genre.

Learning Outcomes

- At the end of the program, students will be able to write at an advanced level.
- At the end of the program, students will be able to distinguish between and characterize different periods in American and British literature.
- At the end of the program, students will be able to interpret literature through the lens of class, race, gender, and historical context.
- At the end of the program, students will be able to criticize works of literature in a thoughtful and responsible way.
- At the end of the program, students will be able to imaginatively inhabit the perspectives of others.

History Concentration

Deepen your understanding of the present through an immersion in the events and cultures of the past. Our curriculum encompasses European, American, Latin American, African, Middle Eastern, and Asian history ranging from premodernity to today. Classes introduce you to vital areas of historical research and schools of thought.

As critical thinkers, students apply tools and concepts of historical inquiry and communicate research results clearly and effectively. Students will engage in primary sources in an attempt to better understand the perspectives and viewpoints of other cultures, civilizations, and people. Students will engage in critical analysis of historical texts to analyze how the interpretation of events is altered based on vantage point. Courses will also encourage students to engage the current events of today by drawing connections to the events of the past.

Entering this concentration, students are required to take five additional history courses beyond the Core requirements. One of these courses must focus on Latin American, African, Middle Eastern, or Asian history.

Concentration Requirements

- Completion of History Core requirements.
- Five additional History electives, one of which must focus on Latin American, African, Middle Eastern, or Asian history.

Learning Outcomes

- At the end of the program, students will be able to bring historical research methods and principles of interpretation to bear on research problems.

- At the end of the program, students will be able to distinguish between and characterize distinct significant events and periods in American, European, and non-Western history.
- At the end of the program, students will be able to communicate effectively, orally and in writing.
- At the end of the program, students will be able to apply an ethical framework to the interpretation of historical events.

Interdisciplinary Studies Concentration

Students choosing to pursue the Interdisciplinary Studies concentration will work with their academic advisor to design a course of study that allows them to draw upon the other disciplines within the ALA major. In designing their concentration, students should make sure to select courses from up to three different disciplines, two of which must be within the ALA program. Furthermore, a student may use at most two introductory level Core courses toward the completion of this concentration.

It will be incumbent upon the student to thoughtfully consider how the courses they choose combine to form this interdisciplinary concentration to ensure that it has a coherent structure with a beginning, middle, and end. Students should also incorporate a range of course levels from introductory to advanced. This will be accomplished with the assistance of their academic advisor. They will need to submit their proposed plan of study to the Associate Dean of Undergraduate Programs for approval. The approval process ensures the integrity of the program as well as assists Woods College in the course scheduling process.

Additionally, this concentration will provide the flexibility needed for some transfer students to bring together their previous coursework into a meaningful program of study at the Woods College.

Concentration Requirements

In designing their concentration, students should make sure to select courses from up to three different disciplines, two of which must be within the ALA program.

Learning Outcomes

- At the end of the program, students will understand the relationship between different fields of social scientific inquiry and will be able to address research problems using an interdisciplinary approach.
- At the end of the program, students will be able to communicate effectively, orally and in writing.
- At the end of the program, students will have the capacity to engage in meaningful, constructive exchanges with others.
- At the end of the program, students will be able to design research projects that respect the ethical boundaries involved in the study of human beings.

Philosophy Concentration

Who are we, and why are we here? What is the nature of knowledge, truth, and justice? This concentration explores these and other enduring questions that form the basis of our shared humanity while sharpening your critical thinking and analytical skills in the process.

This concentration is ideal for students who seek to understand the world around them at its deepest level. They will learn to address fundamental questions about knowledge, goodness, and the nature of human experience in a clear, systematic fashion. With a curriculum anchored in the great works of antiquity and the Enlightenment, this program introduces students to the major fields of philosophical inquiry, including political philosophy, the philosophy of religion, and the philosophy of science among others.

Before beginning this concentration, students are encouraged to take a philosophical ethics course in addition to a second philosophy Core course. To complete the concentration, students need to take four additional philosophy elective courses, one of which must be a non-Western philosophy course.

Concentration Requirements

- Completion of the Philosophy Core requirements.
- ADPL History of Philosophy
- Four additional Philosophy electives. One of these courses must be a non-Western philosophy course.

Learning Outcomes

- At the end of the program, students will be able to analyze ethical problems from a variety of philosophical standpoints.
- At the end of the program, students will be able to evaluate arguments using the tools of practical logic.
- At the end of the program, students will be able to communicate effectively, orally and in writing.
- At the end of the program, students will have the capacity to engage in meaningful, constructive exchanges with others.
- At the end of the program, students will be able to engage critically and analytically with the information that they encounter in different spheres of life.

Political Science Concentration

The Political Science concentration exposes students to the concepts underpinning the U.S. political system before broadening and applying that knowledge to politics as a whole with exposure to other forms of political systems found throughout the world. The classic texts of political theory will form the base of this concentration, and through thoughtful exploration within the elective courses, students will develop their particular focus within the discipline.

Concentration Requirements

- ADPO1041 Fundamental Concepts of Politics (Satisfies a Social Science Core requirement)
- ADPO3005 Comparative Politics
- Four additional Political Science electives

Learning Outcomes

- At the end of the program, students will be able to compare and contrast the American system of government with other forms of government.
- At the end of the program, students will be able to apply the principles of international relation theory to the analysis of current events.
- At the end of the program, students will be able to apply a sophisticated understanding of race, class, and gender to the analysis of contemporary political phenomena.
- At the end of the program, students will be able to communicate effectively, orally and in writing.
- At the end of the program, students will have the capacity to engage in meaningful, constructive exchanges with others.

Sociology Concentration

Students in the Sociology concentration will develop the skills necessary to apply a sociological lens to everyday life and scholarly research. They will also be able to analyze and critique social, structural, and cultural factors that influence those experiences and develop the critical thinking skills to discern how different systems of society and people engage with each other.

Concentration Requirements

- ADSO1001 Introductory Sociology (Satisfies a Social Science Core requirement)
- ADSO2501 Sociological Theories
- Four additional Sociology electives

Students in the Sociology Concentration are strongly encouraged to take a statistics course as their quantitative reasoning Core requirement.

Learning Outcomes

- At the end of the program, students will be able to analyze social phenomena from the perspective of classical and contemporary sociology.
- At the end of the program, students will be able to apply a sophisticated understanding of race, class, and gender to the analysis of contemporary social phenomena.

- At the end of the program, students will be able to design research projects that respect the ethical boundaries involved in the study of human beings.
- At the end of the program, students will be able to communicate effectively, orally and in writing.
- At the end of the program, students will have the capacity to engage in meaningful, constructive exchanges with others.

Sustainability Concentration

There is increasing recognition of the growing challenges of balancing human needs with ensuring a healthy planet for all. Indicators of planetary health are declining at the same time that environmental shocks and stressors to human well-being are increasing. Moreover, environmental degradation disproportionately impacts the most vulnerable.

There is growing recognition that addressing planetary sustainability is one if not the major existential challenges facing us. Many professions and jobs intersect with sustainability in some way, including businesses, public administration, non-profit organizations, and health care practitioners to name a few.

Concentration Requirements

- ADSB1904 Planetary Health
- 1 Elective in Global Environmental Change
- 1 Elective in Well-being Society
- 1 Elective in Sustainable Systems Solutions
- 1 Elective in Mobilizing Personal and Societal Change
- 1 additional ADSB elective

Learning Outcomes

- At the end of the program, students will be able to evaluate and synthesize information about global environmental change, human health and societal well-being to assess and analyze situations and devise solutions increase planetary and human health.
- At the end of the program, students will be able to analyze and assess the economic, environmental, political, social, and equity issues around environmental sustainability to prioritize and develop sustainable solutions.
- At the end of the program, students will be able to assess different approaches to sustainability challenges and develop creative solutions to complex socio-ecological problems integrating perspectives from different communities and stakeholders including indigenous groups, marginalized populations, businesses, and community-based organizations among others.
- At the end of the program, students will be able to apply ethical principles of sustainability to practical problem solving and identifying solutions for issues of planetary health, social justice, and environmental-economic equity.
- At the end of the program, students will have explored their place in interconnected natural and human systems; evaluated the personal, social, and environmental impacts of their choices; and be able to apply their knowledge and skills for building a just, resilient, and thriving world.

B.A., Business

Students in the Business bachelor's degree program develop skills in-demand by employers, including critical thinking, ethical leadership, quantitative analysis, communication, project management, and risk management. Through elective courses, students can align their degree and professional goals.

Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing

- Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses
- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course
- Designing Your Career

Major Requirements

- ADAC1081 Financial Accounting
- ADMT1801 Data Analysis and Probability
- ADBM1430 Corporate Communication
- ADMK2201 Digital Marketing Strategy
- ADEC1101 Principles of Economics
- ADIT3308 Project Management
- ADBM3101 Management and Organizational Behavior
- ADFN2000 Principles of Finance
- ADLA2400 Business Law
- ADSY4001 Strategic Leadership
- 2 Business Electives

ADMT1801 Data Analysis and Probability may fulfill the quantitative reasoning Core requirement. ADEC1101 Principles of Economics may fulfill one social science Core requirement.

Learning Outcomes

Students will be able to:

- Apply analytical skills in a systematic manner to define a business problem/challenge or opportunity, develop potential solutions, select the “best” solution using the information/performance data available at the time, and prepare an implementation (rollout) and evaluation plan—with metrics for measuring successes and/or failures, as well as strategies for action-planning based on performance against these metrics.
- Translate strategic objectives into measurable plans and deploy the necessary resources in the most effective manner to achieve the desired results.
- Apply management theories to solve contemporary business problems.
- Participate in and lead small and large group projects, working within defined time constraints, and allocating available resources to achieve the desired results.
- Solve problems using a defined approach that enables them to turn information into quantitative data and analyze that data to develop potential solutions.
- Use data analysis skills to find relationships among various types and sources of data and be able to use that data to enhance their understanding of an issue and strengthen their conclusions.
- Communicate effectively in writing, person-to-person, and through presentations to large and small groups using a variety of electronic applications.
- Apply working knowledge of risk management to identify and mitigate risks in organizations.
- Examine all situations through an ethical lens and apply principles of ethical decision-making in a business context
- Assess the possible legal, environmental, financial, and human resource impacts of their decisions with an emphasis on the effects on historically marginalized groups along with the impact on the overall performance of the organization.
- Optimize the use of skills of all individuals in their respective organizations by developing long-term solutions that recognize the ability of each individual—and integrate those skills to create a more talented, diverse, inclusive, and equitable environment.

B.A., Digital Communication

Acquire an in-depth understanding of the many ways communication affects—and is affected by—modern societies. The Digital Communications degree prepares students for a field that relies on technology channels to share and receive information. Students will develop skills to critically analyze information and present it persuasively and effectively

Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing
 - Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses
- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course
- Designing Your Career

Major Requirements

Requirements for Major:

- Survey of Mass Communication
- Introduction to Communications
- Corporate Communications
- Digital Marketing Strategy
- Writing for the Digital Space
- Social Media Marketing
- Principles of Strategic Communications
- Digital Storytelling
- 3 electives

Learning Outcomes

Students will be able to:

- Communicate effectively across different channels and mediums, both verbal and written, for personal and professional purposes.
- Identify communication opportunities where a new, strategic plan would benefit a business or organization.
- Create a strategic communications and/or marketing plan for a business or organization, leveraging the newest tool, resources, and trends to achieve business goals.
- Present data and information in a way that tells a compelling story and drives influence within a team or organization.
- Evaluate existing marketing and communications campaigns in order to optimize tactics for long-term success.
- Possess a fundamental understanding of the ethical and legal ramifications of various communication scenarios.
- Work collaboratively, as a part of a team, to implement a strategic communications plan for a local entity and report back on the successes and opportunities observed.

B.A., Criminal and Social Justice

This flexible B.A. program explores the intersection of criminal and social justice through the lenses of psychology, sociology, and data analysis. In addition to studying the foundations of the criminal justice system, students analyze systemic issues such as addiction, race, gender, and violence to understand the social and economic roots of crime and identify ethical approaches to addressing them.

Taught by experts in the field of criminal justice—including attorneys, police chiefs, academics, and practitioners—the program combines in-depth study of criminal law and criminology with electives on social change, psychology, and sociology. Boston College's Jesuit tradition of inquiry and service prepares graduates to help build an ethical, rehabilitative criminal justice system.

Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing
 - Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses
- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course
- Designing Your Career

Major Requirements

Requirements for Major:

- ADCJ1100 Introduction to Social Justice
- ADCJ1101 Principles of Criminal Justice
- ADPS1100 Introduction to Psychology
- ADSO1001 Introduction to Sociology
- ADCJ2000 Criminology or Crime and Punishment
- ADCJ2101 Corrections: Policies and Practices
- ADCJ3010 Criminal Law and Procedure
- ADCJ3051 American Institutions
- Select two courses from Social and Systemic Challenges in Criminal Justice elective courses
- Select two courses from Interdisciplinary elective courses

ADPS1100 and ADSO1001 can fulfill the social science Core requirements.

Learning Outcomes

Students will be able to:

- Appraise the power dynamics of policy, social norms, and biases in determining how criminal laws are made and enforced.
- Apply established and emerging psychological and sociological theories to explain criminal behavior.

- Identify and propose interdisciplinary approaches to resolve critical criminal and social justice issues, recognizing that these issues are both evolving and contested, as demonstrated in real-life case studies.
- Employ oral and written communication to effectively interact within a variety of audiences and contexts.
- Articulate the competing ethical issues surrounding criminality and punishment and advocate for a course of action informed by ethical principles that serve the common good.
- Explain the roles of the key components of the criminal justice system: law enforcement, the courts, and corrections.
- Integrate historic social, cultural, legal, economic, and political events into a coherent explanation of the current state of American institutions.
- Distinguish the constitutional protections of people who are suspected to have committed a crime, those who are accused of having committed a crime, and those who are convicted.
- Explain how legislation and judicial decisions affect criminal justice policies and practices.
- Apply criminal and constitutional law to specific facts employing legal reasoning skills.

B.A., Cybersecurity

The B.A. in Cybersecurity prepares students to succeed in the ever-changing cyber ecosystem.

This program emphasizes risk management, risk tolerance, and risk mitigation as well as the implementation of security controls and compliance with regulatory requirements necessary to achieve the level of risk tolerance acceptable to a particular organization.

The cybersecurity program provides a robust baseline of skills needed to adapt to changes in business, technology, and threat environments. The degree program introduces advanced topics within cybersecurity including ethical hacking, incident response and disaster recovery, security within the software development framework, and the legal and regulatory aspects of cybersecurity.

Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing
 - Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses
- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course
- Designing Your Career

Major Requirements

Requirements for Major:

- ADIT2500 Cybersecurity Fundamentals
- ADEN 2650 Writing with Precision
- ADIT2000 Computer Security
- Programming Elective (Choose One)
 - ADIT1990 C++ Programming
 - ADIT1985 Python Programming

- ADIT2100 Computer Networks
- ADIT2750 Systems Analysis and Design
- ADIT4110 Ethical Hacking
- ADIT3500 Laws, Frameworks, and Policies in Cybersecurity
- ADIT3650 Incident Response and Disaster Recovery
- ADIT3102 DevOps Automation and Cloud Security

Learning Outcomes

Upon successful completion of this program, students will be able to:

- Discuss articulately and efficiently with large groups of diverse stakeholders, both technical and non-technical, to effectively demonstrate and communicate security concepts and the value of a modern cybersecurity program.
- Detect, analyze, identify, prioritize, and resolve security vulnerabilities, threats, risks, and breaches using appropriate tools.
- Develop cybersecurity programs, policies, and procedures to manage enterprise security risks.
- Apply security principles and practices to maintain operations in the presence of risks and threats.
- Demonstrate foundational knowledge of risk management strategies, including calculation of risk, evaluating risk tolerance, compensating controls, and risk management planning.
- Evaluate and communicate the human role in security systems with an emphasis on ethics, social engineering vulnerabilities, and training.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Discuss relevant laws, regulations, and frameworks as they apply to cybersecurity operations.
- Describe professional, ethical, legal, security, and social issues and responsibilities related to computing and cybersecurity.
- Upon additional review, the ability to achieve the following industry certifications: Cisco—CCNA, CompTIA—Network+, CompTIA—Security+, CompTIA—CySA+, EC-Council Ethical Hacking, ISACA—CRISC, ISACA—CISA, ISACA—CISM, (ISC)²—CCSP, (ISC)²—SSCP, (ISC)²—CISSP, ITIL Foundations.

B.A., Economics

Want to understand how consumers and businesses alike behave? For students aspiring to master the theory and practical skills central to our market-driven world, our program provides a 360-degree understanding of economic dynamics in modern societies.

Students aiming to become bankers, business managers, market researchers, budget analysts, or others working in careers where they need to know the intricacies of economies will be well-suited for success with this degree. Students learn to differentiate between market structures and analyze case studies using theories of economic growth, unemployment, and inflation.

Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing
 - Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses
- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course

- Designing Your Career

Major Requirements

Requirements for Major:

- ADEC1101 Principles of Economics
- ADMT2530 Statistics
- ADMT1100 Calculus 1 (prereq for ADEC3201/3202)
- ADEC3202 Macroeconomic Theory
- ADEC3201 Microeconomic Theory
- ADEC3515 or ADEC5310 Econometrics or Data Analysis
- Upper-level Economics electives: Select five courses.

ADEC1101 and ADMT1100 will fulfill the Core social science and Core quantitative reasoning requirements respectively.

Learning Outcomes

Students will be able at the end of the program to:

- Bring theories of economic growth, unemployment, and inflation to bear on the analysis of particular case studies.
- Characterize and distinguish between different market structures.
- Relate models of consumer and firm behavior to particular case studies.
- Bring different macroeconomic models to bear on the analysis of the national economy.
- Communicate effectively, orally and in writing.
- Evaluate economic policies and decision making with an ethical lens.

B.A., Information Technology

The Information Technology undergraduate program is structured to provide students with a holistic understanding of the field of IT and allow them to explore specialized electives that cater to industry-specific needs. It includes core concepts such as operating systems and database management as well as advanced topics like automation and cloud security. The curriculum is designed with an applied focus, offering hands-on learning experiences that mirror real-world scenarios. There is an emphasis on integrating technology-driven teaching methodologies and tools to replicate the environment students will encounter in their professional lives.

Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing
 - Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses
- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course

- Designing Your Career

Learning Outcomes

- Demonstrate an understanding of core information technologies, including proficiency in programming languages, database management, networking, and cybersecurity, and apply this knowledge in various real-world contexts.
- Develop strong analytical thinking and problem-solving skills. They will be able to analyze complex problems, identify and evaluate possible solutions, and implement the most effective solutions using information technology tools.
- Understand the ethical, legal, and societal implications of information technology. This involves recognizing the potential impacts of technology on individuals, organizations, and society as a whole and making responsible decisions in the design and implementation of IT systems.
- Communicate technical information to various audiences both orally and in writing.
- Work collaboratively in teams, reflecting the importance of collaboration in the field of IT.
- Understand how information technology aligns with business strategy and contributes to achieving organizational goals. This includes the ability to analyze business needs, design IT solutions that meet those needs, and manage IT projects to successful completion.
- Upon additional review, the ability to achieve the following industry certifications:
 - CompTIA A+: Pursued by students who have studied basic IT operations and technologies.
 - CompTIA Network+: Pursued by students who've taken courses in networking fundamentals.
 - CompTIA Security+: For students who've delved into basic cybersecurity concepts.
 - Cisco's CCNA (Cisco Certified Network Associate): For those who've studied networking.
 - Microsoft's MTA (Microsoft Technology Associate) or MCSA (Microsoft Certified Solutions Associate): Relevant for student who've studied Windows servers (operating system), databases, or other Microsoft technologies.
 - AWS Certified Solutions Architect – Associate: For students who've been introduced to cloud computing, specifically with Amazon Web Services.
 - Certified Information Systems Security Professional (CISSP): Ideal for student who've covered advanced cybersecurity topics.
 - Project Management Professional (PMP): For those who've taken the project management course.
 - CompTIA Project+: For those who've taken the project management course.

B.A., Psychology

Do you wonder why we do what we do and what makes us tick? Seek the answers through this flexible program, which covers aspects of many applied areas in psychology. Whether you enroll full or part-time, you'll study with leading practitioners and industry experts as you learn to apply key theories from the field of psychology to solve real-world issues at work, in your community, and in society. Courses are offered weekends, nights, online, and in a hybrid format.

This major is ideal for students who want to analyze human behavior through the lenses of developmental history, social sciences, cognitive psychology, and civil society. You'll also learn the theory and practice of psychological counseling and apply foundational principles of developmental and cognitive psychology to case studies while considering the field's ethical dimensions.

Core Curriculum

A distinguishing characteristic of liberal arts education is a required Core curriculum. The Bachelor of Arts programs require the following Core courses:

- The Examined Life
- 2 English courses:
 - College Writing
 - Literary Works or other Core literature course
- 2 Philosophy courses (one of which should be an Ethics course)
- 2 Theology courses
- 2 Social Science courses

- 2 History courses (one must be non-Western)
- 1 Quantitative Reasoning course
- 1 Natural Science course
- 1 Arts course
- 1 Engaging Diverse Perspectives Course
- Designing Your Career

Major Requirements

Requirements for Major:

- ADMT1805 Applied Statistics
- ADPS1100 Introduction to Psychology
- ADPS1153 Research Methods for the Social Sciences
- ADPS1261 Developmental Psychology
- ADPS2272 Cognitive Psychology
- ADPS4001 Psychology in Context
- 6 Psychology Electives

Electives

Students are required to complete six elective courses in psychology. To assist students in selecting the best electives for their academic goals, we have developed three areas that reflect possible career paths or areas of interest for which the particular course might be helpful. Some courses will fit into multiple areas. Students do not need to take all of their electives within a single area, and the areas will not be reflected on the student's transcript or diploma. These are simply to guide students in selecting electives and to provide a better understanding of how the B.A. in Psychology might be put to use.

Community Psychology (CP)

Courses within Community Psychology (CP) bring together many different lenses through which to understand the human being in context. Courses may explore concepts of social justice, social empowerment, and inequality, encouraging students to understand the roles of power and privilege and their impacts on various populations in an effort to conceptualize effective leadership and active citizenship. Students will apply theories of psychology to societal systems and institutions with an aim of developing effective approaches to fostering collaborative relationships and advocating for more just civil structures.

Community Psychology is a broad field with many areas of application including education, public policy, community resources and organizations, and research.

CP Career Paths

- Education Programming
- Special Education Paraprofessional
- Policy Planning, Creation, and Implementation
- Community Resource Creation
- Community Health Worker Coordinator
- Conciliation Specialist
- ABA Therapist
- Health Data Specialist

Health/Human Services Psychology (HP)

Courses within Health/Human Services (HP) explore areas of psychology related to physical and mental health. It seeks to give students a deeper understanding of how to apply psychological theories to meet the diverse needs of society and develop trusting relationships with

individuals they aim to support. Many of the courses in this area equip students to pursue entry-level positions in the field of healthcare advising, community health promotion and outreach, as well as research and data collection.

Health/Human Services is wide-reaching, including the fields of mental health treatment and advisement, data collection, research, and many areas within physical healthcare.

HP Career Paths

- Research Assistant
- Mental Health Associate
- Mental Health Technician
- Health Data Specialist
- Health and Community Interventionist
- Health Promotion Specialist
- Health Educator
- Outreach Worker
- ACCS Outreach Worker

Industrial-Organizational Psychology (IO)

Courses within Industrial and Organizational Psychology (IO) investigate the role of psychology in efficient, effective, and equitable systems and organizations. These courses explore a range of institutions, the psychological processes within each, as well as the individual's place within these group/organizational dynamics. Students will also discuss the psychology behind individual differences and productive, enriching interpersonal relationships.

Industrial and Organizational Psychology involves the application of psychological principles and themes to the field of business, consulting, and human resources.

IO Career Paths

- Product Analyst
- Employee Experience Specialist
- Talent Management Consulting
- Strategic/Brand Planner

Learning Outcomes

Students will be able to:

- Interpret and evaluate psychological phenomena by engaging in scientific reasoning and dynamic problem solving in broad, multi-disciplinary contexts
- Identify and evaluate trustworthy scholarly resources; articulate ways in which context shapes research questions and findings; and interpret basic statistical analyses found within those resources.
- Evaluate and apply the ethical standards of the psychology field in their professional and personal lives.
- Propose solutions to civic, social, and global problems through the creative application of psychological theories and constructs while recognizing society's inherent diversity and the ways in which that diversity impacts those psychological theories and constructs.
- Create effective communication materials in written, oral, and digital formats, including the correct implementation of the APA style.

Fifth Year and Advanced Standing Programs for Boston College Students

Accelerated Program for Boston College Undergraduate Economics Students (Enrolled at the Woods College, Morrissey College of Arts and Sciences, or Carroll School of Management)

Woods College of Advancing Studies is proud to offer Boston College students an option for accelerated completion of the Master of Science in Applied Economics program. This option is available to students with significant previous economics course work, including Economics majors and minors in the Morrissey College of Arts and Sciences as well as to students with Economics concentration in the Carroll School of Management. Students enrolled in the accelerated program will have to complete eight courses in WCAS, which is possible to achieve within one calendar year of entry into the program.

Benefits

- Waiver of application fee
- Waiver of Graduate Record Exam (GRE)
- Preferred admission without the competition of the rest of the applicant pool
- Credit for Microeconomic Theory (ECON2201 or ECON2203) and Macroeconomic Theory (ECON2202 or ECON2204) courses if the courses are completed with a grade of B or better. These credits will count as fulfilling the requirement of taking Applied Microeconomic Theory (ADEC7201) and Applied Macroeconomic Theory (ADEC7200).
- Option to complete the eight remaining course requirements in one additional calendar year

Qualifications

- Anticipated successful completion of a bachelor's degree in May of senior year
- Overall GPA of 3.30 or above
- Grade of B or better in prerequisite courses: Principles of Economics, Statistics, Calculus I, and Calculus II*
- Submission of all Applied Economics application materials by the end of the semester in which the student will graduate. In order to receive priority consideration for WCAS financial aid, students should apply in the fall semester of their senior year.

*Calculus II course can be taken after the admission into the program.

Accelerated Program for Boston College Undergraduate Students (enrolled at the Woods College, Morrissey College of Arts and Sciences, or Carroll School of Management)

Woods College of Advancing Studies is proud to offer Boston College students an option for accelerated completion of the Master of Science in Leadership and Administration program. Students enrolled in the accelerated program will have to complete eight courses in WCAS, which is possible to achieve within one calendar year of entry into the program.

Under the terms of this agreement, qualified students are eligible for:

- Waiver of the application fee;
- Waiver of the Graduate Record Exam (GRE);
- Preferred admission without the competition of the rest of the applicant pool;
- Advanced standing for up to two upper-level courses that student has completed at BC; Graduate Program Director to approve.
- Option to complete the eight remaining course requirements in one additional calendar year.

Qualifications

- Anticipated successful completion of a bachelor's degree from BC in May of senior year
- Overall GPA of 3.30 or above
- Submission of all the application materials by the published Boston College deadline.

Interested students should contact the Program Director of the Masters in Leadership and Administration at Woods College with any further questions.

Academic Honors

Degree with Honors

For information regarding academic honors printed in the Commencement program, visit the Policies and Procedures: Undergraduate Academic Regulations, Degree with Honors section of the catalog.

Undergraduate Graduation Awards

Awards at commencement recognize a distinguished scholastic record, special accomplishments in various academic fields, and qualities of outstanding character, leadership, and demonstrated loyalty to the college.

Dean's List

The Woods College Dean's List recognizes the achievement of undergraduate students semester by semester. Students with a GPA of 3.700 or above in the B.A. programs will be placed on the Dean's List. In order to be eligible for the Dean's List, students must earn at least eight or more credits in courses evaluated with a letter grade. Students must not have withdrawals, pass/fail grades, or incompletes in the semester in question.

Professional Studies Certificates

The Professional Studies Certificate is an end in itself for some students. For others, it may be applied toward completion of a bachelor's degree. Whatever one's ultimate goal, whether to qualify for promotion, initiate a career change, or earn an undergraduate degree, a Professional Studies Certificate can help to achieve that objective.

Professional Studies Certificates may be obtained in Cybersecurity.

Certificate requirements include the following:

- Students must receive at least a grade of C for each course credited toward the certificate.
- Certificate requirements should be completed within two years of initial enrollment for non-degree students, and prior to degree completion for students already enrolled in a degree program; courses are permanently retained on the student record.

A request to apply to a certificate program must be made to the James A. Woods, S.J. College of Advancing Studies.

Cybersecurity Certificate

This Cybersecurity Certificate emphasizes risk management, tolerance and mitigation by implementing security controls and compliance with regulatory requirements that achieve a level of risk tolerance acceptable to the organization.

The Cybersecurity certificate program lays the foundation for security professionals to achieve success providing a robust baseline of skills needed to adapt to changes in business, technology, and threat environments.

Curriculum

Core Courses

Complete the following courses:

- ADIT Cybersecurity Fundamentals

- ADIT2000 Computer Security
- ADIT3010 Technical Writing
- ADIT Computer Networks
- ADIT Systems Analysis and Design

Electives (complete 1 of the following):

- ADIT1985 Python Programming
- ADIT1990 C++ Programming

Minors

The Woods College of Advanced Studies offers a variety of minors open to Woods College students.

Business

Minor Requirements

1. Principles of Economics
2. Financial Accounting
3. Strategic Leadership
4. Management and Org Behavior
5. Elective course

Student Learning Outcomes

- Apply analytical skills in a systematic manner to define business challenges or opportunities, develop potential solutions, and evaluate their success.
- Translate strategic objectives into measurable plans that deploy the necessary resources in the most effective manner to solve business problems within defined constraints.
- Employ data analysis skills to enhance understanding of a business problem and identify solutions that are supported by the data.
- Communicate effectively across business contexts, both in writing and verbally, and give multimedia presentations to large and small groups using a variety of technology applications.
- Apply a working knowledge of risk management strategies to identify and mitigate risks in organizations.
- Examine all situations through an ethical lens and apply principles of ethical decision-making in a business context.
- Develop long-term solutions that optimize the strengths of individuals who make up diverse teams and advance an inclusive and equitable organizational approach and environment.

Criminal and Social Justice

Minor Requirements

1. Introduction to Social Justice
2. Principles of Criminal Justice
3. Criminology or Crime and Punishment
4. Criminal Law and Procedure
5. Elective from the Systemic and Social Challenges or interdisciplinary CSJ electives

Student Learning Outcomes

- Appraise the power dynamics of policy, social norms and biases in determining how criminal laws are made and enforced.
- Apply established and emerging psychological and sociological theories to explain criminal behavior.
- Identify and propose interdisciplinary approaches to resolve critical criminal and social justice issues, recognizing that these issues are both evolving and contested, as demonstrated in real-life case studies.

- Employ oral and written communication to effectively interact within a variety of audiences and contexts.
- Articulate the competing ethical issues surrounding criminality and punishment and advocate for a course of action informed by ethical principles that serve the common good.
- Explain the roles of the key components of the criminal justice system: law enforcement, the courts, and corrections.
- Integrate historic social, cultural, legal, economic, and political events into a coherent explanation of the current state of American institutions.
- Distinguish the constitutional protections of people who are suspected to have committed a crime, those who are accused of having committed a crime, and those who are convicted.
- Explain how legislation and judicial decisions affect criminal justice policies and practices.
- Apply criminal and constitutional law to specific facts employing legal reasoning skills.

Entrepreneurship

Minor Requirements

- ADBM2650 Entrepreneurship
- Four Electives from the following list:
 - ADBM 3101 Business Planning for New Ventures
 - ADBM 3102 Design and Prototyping for Entrepreneurs
 - ADBM 2103 Digital Commerce
 - ADBM 2201 Digital Marketing Strategy
 - ADBM 3103 Funding for New Ventures
 - ADBM 3104 Social Entrepreneurship for Business and Nonprofits
 - ADBM 4001 Strategic Leadership
 - ADCO Marketing Data Analytics
 - ADBM Design Your Entrepreneurship Deep Dive

Non-Degree Students

Applying as a Non-Degree Student

There are two types of non-degree students: 1) students who wish to take courses before they matriculate in a degree or certificate program and 2) life-long learners, those who are taking courses solely for personal enrichment. All non-degree students must complete an application. Once non-degree students have been admitted, they will be assigned to an academic advisor who will assist them in selecting appropriate courses.

Most Woods courses are open to nondegree students (with certain exceptions for courses in specific degree or certificate programs). The non-degree option is not intended for full-time study. Nondegree students will be limited to 2 courses per semester. Should a student wish to take more courses in a semester, they will need to apply to a degree or certificate program.

Non-degree students are not eligible for need-based or merit-based financial aid from Boston College or for most federally and state-funded assistance plans. (See specific assistance programs for exceptions.) However, non-degree work may qualify for reimbursement under employer-sponsored tuition remission development programs.

Continuation as a Non-Degree Student

Non-degree students who wish to take courses before they matriculate in a degree or certificate program may take up to a maximum of 16 credits if they are an undergraduate nondegree student or 2 courses if they are a graduate nondegree student before they are required to matriculate into a degree or certificate program. If students plan on transitioning to a degree or certificate program, they will be required to submit an application. Regardless of when non-degree students begin taking courses, they will be held to the academic program and policies at the time of acceptance into a degree or certificate program.

Life-long learners have no limit to the number of courses they can take as long as they remain in good academic standing. The life-long learner designation is not intended to lead to a degree or certificate.

Academic Standing as a Nondegree Student

Please refer to the "Academic Standing" tab at the top of this page, *Non-Degree Student* section, for details related to Academic Standing.

Summer Session

Boston College Summer Session offers a wide variety of undergraduate courses, which run over two six-week sessions. Our courses are open to anyone with a high-school diploma or the equivalent. Boston College does not issue student visas for Summer Session. We also offer a selection of graduate courses through the Woods College of Advancing Studies master's programs. Summer classes are three or four credits, and the majority of courses take place online. Limited in-person and hybrid courses are also offered.

[Summer Session Website](#)

The Boston College Experience Program

The Boston College Experience provides motivated high school students the opportunity to live and learn as students at Boston College. Through adherence to our Jesuit mission, our programs focus on exposing students to a rich and rewarding college experience through coursework, extracurricular activities, and reflection. Built into the programs are activities that help to prepare students for their college search and the transition into college life. Students will participate in lectures and workshops ranging from the college admissions process, resume writing and networking skills, and cultural and social outings all while enjoying the beautiful city of Boston over the summer.

For more information about dates, requirements, and costs, please visit the Boston College Experience website at bc.edu/bce.

Graduate Programs

Boston College's eight graduate schools offer master's, doctoral, and professional degrees in over ninety disciplines. As scholars at a R1 research institute, Boston College graduate students have the opportunity to engage in the highest level of research activity and intellectual discourse.

Boston College is committed to providing information in a manner that is accessible to all. If you are in need of a printed copy of the material presented in the University Catalog, please contact the [Office of Student Services](#) for a printout of the website.

Boston College Law School

Established in 1929, Boston College Law School is dedicated to the highest standards of academic, ethical, and professional development while fostering a unique spirit of community among its students, faculty, and staff. Boston College Law School is accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

The Law School offers two degrees—the three-year Juris Doctor (J.D.) degree, which is the school’s primary degree, and the one-year Master of Laws (LL.M.) degree, which is designed for students who already hold a law degree from another school.

[Law Courses](#)

[Law Faculty](#)

[Law Website](#)

Juris Doctor (J.D.) Degree

Student Learning Outcomes

Upon graduation from Boston College Law School, graduates shall have acquired competency in the following:

- Knowledge and understanding of substantive and procedural law;
- Legal analysis and reasoning, legal research, problem-solving, and written and oral communication in the legal context;
- Exercise of proper professional and ethical responsibilities to clients and the legal system;
- Other professional skills needed for competent and ethical participation as a member of the legal profession; and
- A readiness for intellectual and professional engagement, whether in local, national, or global settings, that incorporates respect for knowledge and the dignity of the human person.

Registration for Bar Examination

Upon entering law school, some students know the state(s) in which they intend to practice after graduation. Some states require students to register with the Board of Bar Examiners prior to, or shortly after, beginning law school. For further information, contact the secretary of the state’s Board of Bar Examiners for the state where you intend to practice to determine the standards and requirements for admission to practice.

Admissions

Information about admission and financial aid is available on the Law School’s website on the [Admission & Aid](#) page. Other Graduate Courses and Cross Registration

Law students are permitted to take a maximum of four graduate level courses (12 credits) in other departments during their final two years with the consent from Academic and Student Services. Also, students may cross-register for certain courses at Boston University School of Law. Grades for courses taken in other BC departments (and through cross registration at Boston University School of Law) will appear on the student’s transcript, but will not be calculated into the law student’s GPA. All courses taken outside of Boston College and Boston University will appear as transfer credits only. Neither the course title nor grades will appear on the BC transcript. All courses taken as part of a BC Law academic exchange program will appear as transfer credits only.

Information

For more detailed information regarding course offerings, degree requirements, and schedules, applicants should visit the [Course Selection webpage](#) or email Academic & Student Services at lawacastu@bc.edu.

Dual Degree Programs

The Law School offers a variety of dual degree programs. Interested students can obtain detailed information from the Admission Offices of both schools. Students are required to be admitted independently to both schools. Current dual degree students should reach out to the Law School's Academic & Student Services, lawacastu@bc.edu, to learn more about course planning and degree requirements.

Dual Degree Program in Law and Business Administration

Boston College Law School and the Carroll School of Management offer a dual J.D./M.B.A. program. Credit for 12 credits in the M.B.A. program is given towards the J.D. degree, and, similarly, credit from courses at the Law School are counted towards the M.B.A. degree. Both degrees can thus be obtained within four academic years, rather than the five required for completing the two degrees separately.

Dual Degree Program in Law and Social Work

The Boston College School of Social Work and the Law School at Boston College offer a dual J.D./M.S.W. program designed for students interested in serving the combined legal and social welfare needs of individuals, families, groups, and communities. Students may obtain the two degrees in four years, rather than the usual five years.

Dual Degree Program in Law and Education

The dual degree program in Law and Education is designed for students who are interested in serving the combined legal and educational needs of students, families, and communities in our nation. The program reflects the University's mission to promote social justice and to prepare men and women for service to others. The program is particularly designed to prepare students to meet the needs of individuals who have traditionally not been well-served by the nation's schools. The program is designed to serve the needs of persons who wish to combine knowledge about education and applied psychology with legal knowledge and skills to better serve their clients and constituencies. The program offers an opportunity to further the University's goals in promoting interdisciplinary inquiry and integrating the work of service providers.

Students admitted to the program may expect to receive both a master's degree in Education (M.Ed. or M.A.) and the Juris Doctor (J.D.) degree in approximately three years (sometimes requiring additional summer classes), rather than the four or more years such degrees would normally entail if taken separately.

Any student seeking certification, or education or human services licensure must meet all of the requirements in the Lynch School of Education for that certification/licensure.

J.D./M.P.H. Dual Degree Program with Tufts University School of Medicine

Our program, in partnership with Tufts University School of Medicine, gives students the flexibility to pursue a broad range of career opportunities in the legal, health care, and public health fields, while completing their degrees in four years instead of five years if obtained separately. The Tufts medical school curriculum provides a practical expertise in health policy, data analysis, and health care management, and also includes an applied learning experience in the public health field. The demand for health care law and policy expertise encompasses job opportunities at small and large law firms, government agencies, hospitals and other institutional health care providers, public interest and advocacy organizations, international human rights organizations, and in-house counsel departments.

J.D./M.A. in Urban and Environmental Policy and Planning with Tufts University

Land Law and urban and environmental policy and planning open up an array of modern areas of professional practice. In this innovative program, BC students can receive two degrees—a Master of Arts and a Juris Doctor (M.A./J.D.) in just eight semesters. Planning skills (including policy analysis) are critical in guiding development patterns, and law frames the mechanisms and limits of private and governmental roles in this process. Students are immersed in practical skills training; in broad debates and critical thinking about the environment, human settlements, social and environmental justice; corporate responsibility; and public and private land use management—all shaped by constitutional, equitable, and pragmatic principles.

Find out more about the Tufts Program at the [Urban and Environmental Policy and Planning](#) website.

The M.A./J.D. is offered through a collaboration between the Tufts University Department of Urban and Environmental Policy and Planning (UEP) and Boston College Law School. There is currently no graduate program in New England which offers the combined strengths of this program.

In the dual degree program, students meet regularly with the program coordinator and the respective academic advisors from both Schools in planning and implementing an overall course of study that matches the student's background, interests, and requirements of the program. Advisors at both Schools collaborate, under the auspices of an advisory committee, to ensure that students receive accurate and timely support in the dual degree program. Students are eligible for financial assistance based on current policies at each University.

J.D./M.A. or J.D./Ph.D. Philosophy Program

These programs are designed for students who have an interest in legal theory and jurisprudence, and who may eventually wish to go into law teaching in those fields. The J.D./M.A. program may be completed in as few as three years, but it must be completed within six years of enrollment. The J.D./Ph.D. program may be completed in as few as six years, but it must be completed within ten years of enrollment.

Master of Laws (LL.M.) Degree

The LL.M. degree program is designed to expose legal professionals and recent graduates who hold a first degree in law, primarily but not necessarily of foreign origin, to a broad range of subjects in public and private law, including U.S. and international law. The program enables students to explore many cross-cutting issues that engage U.S. and international law from courses in the Law School's extensive curriculum, including both introductory and more advanced courses in their particular fields of interest. The LL.M. curriculum is fully integrated with the J.D. curriculum and we welcome students who seek to engage intellectually, critically and comparatively in the study of law. In addition, LL.M. students receive a tailored introduction to the U.S. legal system and specialized training in legal writing. They also have the option to receive a Certificate of Concentration in one of five areas: Business and Commercial Law, Environmental Law, Human Rights Law, Intellectual Property Law, and Tax Law. The program is intended for students from a variety of legal systems and backgrounds and we value representation from a diversity of regions. Because of our strength in the field of global practice, we are equally interested in applicants pursuing careers in private practice, government service, the judiciary, legal academia, international organizations, and non-governmental organizations. Our past LL.M. graduates have made extraordinary contributions to the law school community, and many do so again, in reverse, upon graduation, in their countries of origin or elsewhere. We invite applicants who have achieved high academic standing in their prior law degree.

Further information is available on the program's website at bc.edu/llm or from the LL.M. Office, Boston College Law School, 885 Centre Street, Newton, MA 02459. Our e-mail address is bcllm@bc.edu.

Boston College School of Social Work

In keeping with the four-century-old Jesuit tradition of educating students in the service of humanity, Boston College established a School of Social Work (SSW) in March 1936. The SSW offers the Master of Social Work (M.S.W.) and the Doctor of Philosophy in Social Work (Ph.D.) degrees. In addition to providing foundation courses for all students, the Master of Social Work program of study affords each student the opportunity to specialize in a social work practice intervention method. The two areas of specialized practice are Clinical Social Work and Macro Social Work on the master's level. Six advanced Fields-of-Practice are offered: Afrocentric Social Work; Children, Youth, and Families; Global Practice; Health; Latinx Communities; and Mental Health. The School also offers a research-oriented Doctoral program that prepares scholars to pursue knowledge that will advance the field of social welfare and social work practice.

Professional Program: Master of Social Work (M.S.W.)

Introduction to the Master of Social Work (M.S.W.)

The M.S.W. Program offers students a choice of specialized practice. Students select either Clinical Social Work Practice or Macro Social Work Practice.

Clinical Social Work is the process of working with individuals, families, and groups to help them deal with intrapersonal, interpersonal, and environmental problems. The process utilizes a bio-psychosocial assessment and intervention model to increase an individual's well-being. Each person, family, or group has a unique story to share, one that is shaped by cherished beliefs, values, and traditions, one that is connected to the larger stories of communities and nations. The complex process of helping others is, fundamentally, one of empowerment. In practicing clinical social work, the aim is to strengthen, support, and accompany clients in their healthy efforts to repair their past and build a future that honors their uniqueness and brings into reality their personal dreams. Our challenging, dynamic, and contemporary program of professional formation transforms compassion into therapeutic empathy. We integrate social work's enduring values, theories, and skills with bold and innovative ways of helping others. This fusion of old and new creates an environment where students learn that interventions, guided by evidence-based practice, become powerfully therapeutic when embedded in a relationship of respect and authentic concern.

Macro Social Work Practice aims to affect change within large systems at the community, organizational, and policy levels. It focuses on social innovation and leadership, emphasizing the development of ideas, mechanisms, and new social arrangements to enhance community capacity to address complex social challenges. Students train in the foundations of participatory community-based social work practice and research and learn recent advances in human-centered design, systems thinking, and other analytical tools to drive innovation, address complex social problems, and enable sustained social impact.

In their coursework and field internships, students gain practice skills that focus on advocacy, leadership and administration, financial management and resource development, and novel approaches to drive social change and advance the common good.

The M.S.W. Program is accredited by the Council on Social Work Education and is designed for completion in either two full-time academic years of concurrent class and field work or in a Three-Year or Four-Year Program. All degree requirements must be fulfilled within a period of five years.

The M.S.W. curriculum is divided into four overlapping components: Foundation, Specialized Practice, Field-of-Practice, and Electives. This configuration allows students to establish a solid foundation in social work practice, choose either Clinical or Macro Social Work Practice as their area of specialized practice, and then choose a Field-of-Practice to gain advanced practice skills in a particular area. The Field-of-Practice choices are: Afrocentric Social Work; Children, Youth, and Families; Global Practice; Health; Latinx Communities; and Mental Health.

Foundation Courses

Seven foundation courses provide the basis for the advanced curriculum. In compliance with the Council of Social Work Education (CSWE) Accreditation Standards, the foundation curriculum includes content on Social Work competencies: professional and ethical behavior, diversity, human rights and justice, research, policy, engagement, assessment, intervention, and evaluation.

The following courses comprise the Foundation curriculum:

- SCWK7701 The Social Welfare System
- SCWK7721 Human Behavior and the Social Environment
- SCWK7723 Re-thinking Diversity: Systems of Oppression and Privilege
- SCWK7747 Research Methods in Social Work Practice
- SCWK7762 Basic Skills in Clinical Social Work
- SCWK8800 Basic Skills in Macro Practice
- SCWK9921 Field Education I

Specialized Practice Courses

Students select one of two areas of specialized practice to focus their acquisition of practice skills: Clinical Social Work or Macro Social Work. Required Clinical courses include an advanced human behavior course, SCWK7722 Psychosocial Pathology, and two methods courses that focus on clinical assessment, practice theory, and evidence-based practice interventions for a variety of problem areas and populations utilizing various treatment modalities—individual, family, and group.

The required Clinical courses are as follows:

- SCWK7722 Psychosocial Pathology
- SCWK8855 Clinical Practice with Children and Families: Assessment, Intervention, and Evidenced-Based Practice
- SCWK8856 Clinical Practice with Adults: Assessment, Intervention, and Evidenced-Based Practice
- SCWK8841 Program Evaluation
- One Advanced Policy Course (SCWK8802 Policy Issues for an Aging Society, SCWK8805 Policy Issues in Family and Children, SCWK8806 Global Policy Issues, or SCWK8817 Health and Mental Health Policy)
- SCWK9932 Field Education II—Clinical Social Work
- SCWK9933 Field Education III—Clinical Social Work
- SCWK9934 Field Education IV—Clinical Social Work

Required Macro courses include an advanced human behavior course, SCWK8889 Social Innovation, and two method courses that focus on organizational functioning with a focus on leadership for change and skill development in bringing about social change through collective action.

The required Macro courses are as follows:

- SCWK8833 Leadership and Social Transformation
- SCWK8888 Community Engagement for Social Change
- SCWK8889 Social Innovation
- SCWK8841 Program Evaluation
- One Advanced Policy Course (SCWK8802 Policy Issues for an Aging Society, SCWK8805 Policy Issues in Family and Children, SCWK8806 Global Policy Issues, or SCWK8817 Health and Mental Health Policy)
- SCWK9942 Field Education II—Macro Social Work
- SCWK9943 Field Education III—Macro Social Work
- SCWK9944 Field Educaiton IV—Macro Social Work

Fields-of-Practice

Students entering their final full-time year will choose a Field-of-Practice. Each Field-of-Practice consists of an advanced practice course. All Fields-of-Practice require either SCWK9933–9934 Field Education III–IV—Clinical Social Work or SCWK9943–9944 Field Education III–IV—Macro Social Work.

Afrocentric Social Work

The Afrocentric Social Work Field-of-Practice centers on the African Diaspora and Black experiences, inclusive of continental Africa, the Caribbean, Latin America, Central America, and the United States. The Afrocentric perspective places African people as participants and agents shaping their life chances and experiences. It will equip M.S.W. students with a holistic approach towards a critical examination of social work from an African-centered perspective. Students will be exposed to Afrocentric thinking and practice modalities—clinical and macro—that function as staples of social work with Black communities. Required course includes:

Clinical Social Work and Macro Social Work

- SCWK8846 Advanced Practice in Afrocentric Social Work

Children, Youth, and Families

The Children, Youth, and Families Field-of-Practice prepares students for professional practice with children, adolescents, and families seen across multiple settings. Clinical students will be proficient in practice with child and adolescent mental health intervention, including individual, group, and family modalities. Macro students will develop competence in leadership and administration, including personnel management, grant writing, and financial management within the context of community-based nonprofit organizations and public systems. Required courses include:

Clinical Social Work

- SCWK8872 Advanced Clinical Practice with Children, Youth, and Families

Macro Social Work

- SCWK8885 Management of Organizations Serving Children, Youth, and Families

Global Practice

The Global Practice Field-of-Practice prepares students to become effective international social workers. Students learn how to collaborate with local partners around issues of humanitarian aid, social development, and capacity-building. Guiding principles are human rights, global justice, and diversity. Final year field placements will be managed in partnership with international organizations. Required course includes:

Clinical Social Work and Macro Social Work

- SCWK7797 Frameworks and Tools of Global Practice

Health

The Health Field-of-Practice prepares students for clinical or macro practice in healthcare settings by providing specialized knowledge and skills in assessment, interventions, and health and mental health policy.

Clinical Social Work students, with knowledge of diagnostic assessment and evidence-based interventions, will focus on treatment with individuals, couples, families, and small groups that are aimed at dealing with the impact of illness on the client system in culturally diverse environments within medical/healthcare settings.

Macro Social Work students, with knowledge of community engagement, leadership, and social innovation, will focus on skills in planning, designing, and funding for innovating and sustaining current programs within medical/healthcare settings. Required courses include:

Clinical Social Work

- SCWK8873 Integration of Behavioral Health and Medical Care Practice

Macro Social Work

- SCWK8897 Planning for Health and Mental Health Services

Latinx Communities

The Latinx Communities Field-of-Practice trains M.S.W. students to work with Latinx communities in the U.S. and around the world. Our innovative program includes: culturally-centered coursework and field placements, tailored mentoring, self-advocacy training, and career development guidance.

From an asset-based approach, students will develop a nuanced understanding of the barriers Latinx populations encounter in accessing equitable education, social services, and health care, as well as a deep understanding of how to implement evidence-based interventions that address systemic inequities.

Following a cohort model, students will take core classes taught in Spanish and intern at a field placement with one of our many partners in the Greater Boston area that serve the legal, medical, behavioral health, immigration, and educational needs of the Latinx community. Required course includes:

Clinical Social Work and Macro Social Work

- SCWK8837 Social Services with Latinx Populations in the U.S.

Mental Health

The Mental Health Field-of-Practice prepares students for clinical or macro practice in mental health settings by providing specialized knowledge and skills in assessment, interventions, and health and mental health policy.

Clinical Social Work students, with knowledge of diagnostic assessment and evidenced-based interventions, will focus on trauma in culturally diverse environments within mental health settings and select from a broad range of elective courses in various practice modalities.

Macro Social Work students, with knowledge of community engagement, leadership, and social innovation, will focus on skills in planning, designing, and funding for innovating and sustaining current programs within mental health settings. Required courses include:

Clinical Social Work

- SCWK8874 Adult Psychological Trauma

Macro Social Work

- SCWK8897 Planning for Health and Mental Health Services

Field Education

Students complete a total of 1200 hours of field education (480 hours in Field Education I and II and 720 hours in Field Education III and IV). Students participate in Field Education 2 days per week in Field Education I and II and 3 days per week in Field Education III and IV.

Electives

Students take five electives to round out their knowledge and skill-building with courses that offer advanced training in a particular area or provide new knowledge and skills in an area of interest to the student. The required Field-of-Practice advanced practice courses may be

taken as electives by students from other Fields-of-Practice on a space-available basis. Elective courses are offered pending sufficient enrollment. The following courses may be offered as elective options:

- SCWK7719 Group Independent Study: International Policy
- SCWK7724 Neurobiology of Stress and Resilience in the Life Course
- SCWK7725 Families Impacted by Military Service
- SCWK7726 Neuroscience of Human Relationships and Development
- SCWK7727 Substance Use Disorders
- SCWK7729 Public Health Social Work
- SCWK7733 Working with Lesbian, Gay, Bisexual, Transgender, and Questioning Youth, Families, and Adults
- SCWK7735 Social Determinants of Health and Mental Health
- SCWK7777 Services to Migrants: A Border Perspective
- SCWK7794 Immigrants and Refugee Issues
- SCWK8807 Global Migration and Forced Displacement: Debates and Responses
- SCWK8820 Trauma Informed Psychological Perspectives in Settings of Adversity: Global and Domestic Perspectives
- SCWK8822 Child and Adolescent Trauma: Clinical Assessment and Treatment
- SCWK8823 Practice in Health and Mental Health Setting with Older Adults
- SCWK8828 Wraparound Systems of Care for Youth and Families
- SCWK8830 Social Work and Spirituality
- SCWK8831 Dying, Grief, and Bereavement
- SCWK8836 Psychodynamic Theories of Individual Development
- SCWK8838 Dismantling Organizational Bias through Evidence-Based Practice
- SCWK8840 Climate Change and Environmental Justice: Implications for Social Work
- SCWK8843 Theories in Design Thinking for Social Change
- SCWK8844 History of Activism in the Black Community
- SCWK8845 Afrocentric Organizations
- SCWK8847 Creating the Inclusive Workplace: Concepts in Organizational Justice
- SCWK8848 Practicing Design Thinking for Social Change
- SCWK8853 Global Humanitarian Practice
- SCWK8854 Advanced Clinical Practice with Latinx Populations
- SCWK8857 Group Therapy for Children and Adolescents
- SCWK8858 Clinical Social Work Practice in Schools
- SCWK8860 Couples Therapy
- SCWK8862 Cognitive Behavioral Therapy
- SCWK8863 Cross-Cultural Social Work
- SCWK8864 Group Therapy
- SCWK8865 Family Therapy
- SCWK8867 Internal Family Systems Therapy
- SCWK8868 Dialectical Behavioral Therapy
- SCWK8876 Solution-Focused Therapy
- SCWK8877 Narrative Therapy
- SCWK8879 Advanced Trauma Theory and Treatment Modalities
- SCWK8880 Social Work Practice in Child Welfare
- SCWK8881 School Social Work: Program Development and Educational Policies
- SCWK8884 Strategic Planning for Public and Nonprofit Organizations
- SCWK8886 Financial Management and Resource Development
- SCWK8887 Global Child Protection

Dual Degree Programs

The Boston College School of Social Work has instituted three dual degree programs with other graduate departments of Boston College and one dual degree program with the undergraduate Morrissey College of Arts and Sciences and the Lynch School of Education and Human

Development. A description of the programs is available from the respective admission offices. Candidates must apply to, and be accepted by, each of the relevant schools independently.

Established in 1980, the M.S.W./M.B.A. Program, in cooperation with the Carroll School of Management Graduate Programs, involves three full-time years—one each in the foundation years of both schools, and the third incorporating joint class and field education.

The four-year M.S.W./J.D. Program, inaugurated in 1988 with Boston College Law School, requires a foundation year in each school followed by two years of joint class and field instruction with selected emphasis on such areas as family law and services; child welfare and advocacy; and socio-legal aspects and interventions relating to poverty, homelessness, immigration, etc.

The three-year M.S.W./M.A. (Theology and Ministry), in conjunction with the Boston College's School of Theology and Ministry, began in 1989. Three options for completing the M.S.W./M.A. include a foundation year in each curriculum with a third year of jointly administered class and field instruction; a program of summer courses taken in STM and a two-year academic program in the SSW; or an integrated program of study with courses taken in STM and the SSW during three years of study. Areas of focus include clinical work in hospitals and prisons, organizational services/administration, and parish social ministry.

In cooperation with the Morrissey College of Arts and Sciences and the Lynch School of Education and Human Development, the Boston College School of Social Work has instituted an Accelerated B.A./M.S.W. Program that enables Psychology, Sociology, Applied Psychology and Human Development and Transformative and Educational Studies majors to complete the Social Work foundation courses during their junior and senior years. Students receive the B.A. at the end of four years, and then apply for admission to the School of Social Work for a final year of study in the M.S.W. Program. For sophomore prerequisites and application information, undergraduates should call the School of Social Work Assistant Dean of Enrollment Management at 617-552-4025.

The school also offers an upper-division introductory course that is not applicable to the M.S.W. degree: SCWK6600 Introduction to Social Work is cross-listed with the departments of Psychology and Sociology in the Morrissey College of Arts and Sciences.

Doctor of Philosophy Degree Program

Introduction to Doctor of Philosophy Degree Program

The school offers a research-oriented Ph.D. program that prepares scholars committed to pursue knowledge that will advance the field of social welfare and social work practice. Students master a substantive area of scholarship and gain methodological expertise to excel as researchers and teachers in leading academic and social welfare settings throughout the world. Grounded in core values of human dignity and social justice, the program nurtures independence and originality of thought in crafting innovative research and policy agendas for constructive social change.

The School of Social Work doctoral program offers one program of study: a Ph.D. in Social Work. The Ph.D. in Social Work is designed for students with an M.S.W. or equivalent degree.

Program of Study—Social Work

Research training is at the core of the program. Students acquire expertise in applied social and behavioral science research methodologies that are especially appropriate for investigating critical policy and practice questions. This set of courses emphasizes analytic skills needed to understand, appraise, and advance knowledge in social work. The learning process involves more than classroom instruction. Students are expected to work closely with faculty mentors in their roles as scholars and researchers. Besides required courses, students can select from an array of elective academic courses, independent studies, research internships, and teaching practicums.

A minimum of 51 credit hours are required to complete the degree: 45 credits for academic courses and six credits for the dissertation. Among the 18 elective credits, three elective credits are specified to be an advanced social or behavioral science theory course, and 12 credits are specified to be a methods course. Students must pass the qualifying examination at the end of year two. For the qualifying exam, students need to produce and defend an area statement. Before beginning research on the dissertation, the student must complete all required courses and the area statement. Required courses include the following:

- SCWK9950 Professional Development Seminar
- SCWK9951 Survey of Research Methods in Social and Behavioral Science
- SCWK9956 The Dialectics of Social and Behavioral Theory
- SCWK9960 Regression Analysis for Social and Behavioral Sciences
- SCWK9964 Introduction to Statistics and Data Analysis
- SCWK9991 Doctoral Teaching Practicum
- SCWK9992 Theories and Methods of Teaching in Professional Education
- SCWK9993 Research Internship
- SCWK9994 Integrative Dissertation Seminar

Total Credits

The 51 credits are a minimal requirement. The actual number of courses taken by an individual student varies according to prior educational background and coursework.

Doctoral Funding

There are five major sources of funding available for students in the Doctoral Program in Social Work at Boston College:

- The Boston College Doctoral Fellowship in Social Work is awarded each year on a competitive basis to full-time doctoral students in social work. Full tuition and a stipend are provided for four years as long as the student maintains good academic standing and demonstrates progress toward the Ph.D.
- Two Fellowships are awarded each year on a competitive basis to full-time doctoral students to provide additional financial support to help encourage them to successfully complete their studies.
- Research Assistant positions are provided through faculty research and training grants.
- Teaching Assistant positions are available for some doctoral and M.S.W. courses.
- Additional grants and scholarship opportunities are available on an individual basis.

In addition to the financial assistance directly available from Boston College, SSW doctoral students are encouraged to apply for nationally competitive fellowships from private foundations and federal agencies.

For More Information

For a more detailed description of course offerings, the applicant should consult the Boston College School of Social Work Bulletin, which may be obtained by e-mailing swadmit@bc.edu or by writing to the Assistant Dean of Enrollment Management, Boston College School of Social Work, McGuinn Hall, Chestnut Hill, MA 02467.

Clough School of Theology and Ministry

The Boston College Clough School of Theology and Ministry (CSTM) is an international theological center that serves the Church's mission in the world as part of a Catholic and Jesuit university. The school prepares its students for ministries that are as diverse as the composition of the student body—Jesuits and other candidates approved for ordination studies, women and men for lay ecclesial ministries and for service rooted in faith. The CSTM is committed to the Catholic theological tradition, rigorous academic inquiry, interdisciplinary study, ecumenical and interreligious dialogue, and the engagement of faith and culture. The CSTM offers graduate degrees, including civil and ecclesiastical degrees, and certificate programs in theology and ministry that integrate intellectual, spiritual, pastoral, and personal formation. The CSTM reaches out to larger theological and pastoral communities through the publication of New Testament Abstracts and through a variety of continuing education programs (online and on campus) that provide access to world-class theological and pastoral scholarship. For more information, visit the CSTM website at bc.edu/clough.

[Theology and Ministry Website](#)

Admissions and Financial Aid

Applying to the Clough School of Theology and Ministry is straightforward; however, each program has specific requirements. Be sure to review carefully the requirements for your program of study. Access to the online application can be found through the CSTM website at bc.edu/stmapply.

Application Deadlines

Fall Admission

- Ph.D. and S.T.D.: January 15
- All other degrees: January 15 (for priority financial aid consideration)

Summer Admission

- Post-Master's Certificate in Spiritual Formation and Courage to Preach: March 1 (early action deadline; rolling admissions after this date)
- Intensive on the 19th Annotation of the Spiritual Exercises: March 1 (early action deadline; rolling admissions after this date)
- M.A. and Non-Degree Programs: June 1 (for priority financial aid consideration)

Spring Admission (Except Ph.D. and S.T.D.)

- November 1 (for priority financial aid consideration)

Note: With the exception of the Ph.D. in Theology and Education and the S.T.D., applications are still considered after the priority deadline, as space allows.

Admission Materials

Application Form

The application form to CSTM must be completed online. In addition to demographic and academic information, applicants should upload their personal statement, resume, and transcripts at the time they submit their application forms.

Applicants are encouraged to submit their application materials as soon as possible and before the posted deadlines. You do not need to wait until you have gathered all of your supporting materials to submit the application form.

Supporting Materials

- **Application Fee**

A non-refundable fee of \$75 is required for every degree and non-degree application submitted. Fee waivers are automatically granted to the following applicants: Jesuits, applicants currently completing a year of service or who are Pell Grant-eligible, veterans, and current CSTM students. We do not waive the application fee for other reasons.

- **Personal Statement**

The personal statement must be uploaded as part of the Application Form. Your statement should be three pages double-spaced and address the following:

- The academic, professional, and personal development that has motivated you to apply to the CSTM. Include a sketch of your educational background and interests, any experience you have in ministry and/or religious education, and any other relevant professional and volunteer experience;
- Your understanding of theological education and/or ministry in the context of the Church's mission;
- How you plan to apply your theological education;
- Given your experience, how you assess your principal strengths for theological education and/or ministry as well as your areas of needed development;
- For the Ph.D., S.T.D., S.T.L., and Th.M. programs, please provide information outlining your specific area and field of academic interest, a proposed topic(s) for your research and dissertation/thesis, how your previous academic, professional, and/or pastoral experience has prepared you for studies within that particular field, and the CSTM faculty member(s) with whom you would like to work;

- **Resume or Curriculum Vitae**

- **Letters of Recommendation**

Degree applicants are required to submit three recommendations using the online application system. Certificate applicants are required to submit at least one recommendation. Each recommender should be familiar with the applicant's academic competence. For applicants who have been out of school for a significant amount of time, the recommenders should be familiar with the applicant's professional competence. For M.Div. and M.A. applicants, one recommender should be familiar with the applicant's ministerial potential and experience.

- **GRE Scores**

GRE scores are optional, but preferred if an applicant feels that their transcripts do not reflect their capacity for success in graduate studies, or if they do not have a background in the humanities. For students who send scores, they need to be received directly from ETS. Our GRE code is 2508. Please reach out to the admissions office if you have questions.

- **Personal Interview**

A personal interview is required of master's applicants. The Admissions Office will contact applicants to set up an interview virtually.

- **Writing Sample**

A writing sample is required of Ph.D., S.T.D., and S.T.L. applicants only. The writing sample must be uploaded as part of the Application Form. The sample should be an academic paper, usually no less than 10 pages, not to exceed 25 pages. S.T.D. applicants are also required to submit a copy of their S.T.L. thesis upon its completion.

- **Transcripts**

One copy of each transcript is required from all colleges, universities, seminaries, or theological schools that an applicant has attended. If a college or university will send official transcripts electronically, they can be emailed to stmadm@bc.edu. Unofficial copies of transcripts may be uploaded by the applicant with the Application Form. If transcripts must be mailed, they can be sent to the address below. If an official transcript is not English, a translation should be provided with the official document. Please alert us if your transcript will be arriving with a different name than the one you are using on your application.

For supporting material sent by the U.S. Postal Service, please use the following address:

9 Lake Street
Brighton, MA 02135-3841

Jesuit Applications

Jesuit scholastic applicants must follow the instructions above. Jesuits requiring financial assistance should have their provincial be in touch with the Rector of the St. Peter Faber Jesuit Community as soon as possible, so he may submit names to the U.S. Jesuit Conference. The provincial will need to indicate an intent to mission the student to CSTM, request housing, and indicate if financial funding is needed. The rector will then let an applicant and his provincial know what steps need to be completed. All Jesuit scholastic applications are reviewed by the Admissions Committee.

In addition, Jesuit applicants are asked to complete a FERPA release form as part of the application process. This form will be sent by the admissions office and allows us to communicate with the rector of the Saint Peter Faber Community and other religious superiors about your application and, potentially, academic and financial matters while you are a student at Boston College.

Non-Jesuit Religious Applicants

Religious applicants who are not Jesuits must also follow the instructions above. Religious applicants requiring scholarship and parish or convent housing assistance should apply by January 15 for the fall semester. All religious applicants are reviewed by the Admissions Committee. Lastly, if accepted, the Office of Admissions will work with the Office of International Students and Scholars to process all visa documentation for international applicants.

In addition, non-Jesuit religious applicants are asked to complete a FERPA release form as part of the application process. This form will be sent by the admissions office and allows us to communicate with your vocation director and/or other religious superiors about your application and, potentially, academic and financial matters while you are a student at Boston College.

Additional Information

No materials submitted as part of the application for admission can be returned or forwarded to a third party. The Admissions Committee will not consider an application until it is complete.

The Admissions Committee takes into account all of the material submitted with the application: grade point average (GPA), GRE or other standardized test scores (if applicable), TOEFL (for international students), letters of recommendation, work and/or volunteer experience, and personal statement—where we look for a high level of intellectual, social, and religious maturity.

Acceptance to an CSTM degree program is not guaranteed and is very competitive. Therefore, estimates of the likelihood of acceptance cannot be given to any applicant.

Scholarship and Grant Funding

As an international theological center providing outstanding academic resources and an intimate community for its members, we want to help you finance your studies and make it possible for you to join us. Boston College Clough School of Theology and Ministry (CSTM) offers generous funding through several types of financial assistance. When you complete the CSTM Application, you are automatically considered for all financial assistance for which you may be eligible from the CSTM.

Tuition scholarships are based on considerations of academic achievement, potential for ministry, demonstrated leadership, and financial need. Funding is generally renewable at the same level in years following the student's initial award year, assuming the student's need and

academic standing do not change markedly. Prospective students are encouraged to contact the admissions office for questions regarding the funding of their studies.

Federal Student Loans

In addition to scholarship and grant funding, the University participates in the Federal Direct Loan Program. Students can borrow up to the total cost of attendance, minus any funding they are receiving from the CSTM through the Direct Loan Program. To apply for the Stafford loan, you will need to submit a Free Application for Federal Student Aid (FAFSA), and also complete and submit the Boston College Graduate Financial Aid Application/Validation. Information and forms are available through the Boston College Office of Student Services located in Lyons Hall. Go to bc.edu/gradaid or call 617-552-3300 for more information. Please note that Federal Stafford loans are only available for U.S. citizens and residents. Please also note that Federal loans are not available to S.T.B., S.T.L., or S.T.D. degree seeking students, certificate seeking students, or non-degree seeking students.

Notification of your funding will occur after a decision is made regarding your admission into the CSTM.

Please note that if you receive a scholarship after you receive your loan package, your loan package may have to be adjusted. Federal regulations limit the total amount of aid (including student loans) a student can receive. Contact the Boston College Office of Student Services if you have any questions about Federal loans.

International Student Admission Requirements

As an international theological center, CSTM represents the changing landscape of the Catholic Church on the global stage by training priests, lay ministers, and theologians from over forty nations. While we continue to attract and train students from North America and Europe, more and more, the future leadership of the Church is emerging from South America, Africa, India, and Asia. CSTM is a part of this movement, training some of the first indigenous professors of seminaries, universities, and theological centers in those regions.

We encourage clergy, religious men and women, and lay students from all countries to apply to our programs. Below is important information that you should consider before applying.

Visa Process

When Applying

Applicants only start securing a visa after they have been accepted to a program. No work on the part of the international applicant needs to be done toward a visa until after they receive a letter of admission, have confirmed intent to enroll, and have proven financial ability for studies. (See next page.)

After Being Accepted

After being accepted, the Admissions Office will send you the Declaration and Certification of Finances form for the I-20 document. Filling out and returning these forms to the CSTM Admissions Office will start the process of obtaining an F-1, or student, visa to study in the United States, as long as you meet the financial and English language requirements.

International students, who are also Diocesan priests, must obtain priestly Faculties to serve as priests in the Boston Archdiocese. The student's bishop or major superior must write to the Archbishop of Boston, requesting housing and facilities to function as a priest in the area. A copy of this letter should be sent to CSTM. Boston College can only issue an I-20, after such facilities have been secured.

Additional Requirements

All applicants for whom English is not their native language must demonstrate proficiency in the English language. This can be demonstrated by an acceptable score on the TOEFL or IELTS exams or by receiving a degree from a college or university at which English is the language of instruction.

Acceptable scores can be found below. Students cannot be accepted into any CSTM program without an acceptable score:

- TOEFL: 85. When taking the exam, include CSTM's institutional code—3971—so that your scores may be sent directly to the school.
- IELTS: 7.5 (band score)

These tests are not required if:

1. You are a citizen of Australia, Canada (except Quebec), Great Britain, Ireland, New Zealand, Guyana, an Anglophone country of Africa, or an English-speaking country of the Caribbean.
2. You earned your prior college or university degree in the U.S. or one of the countries listed above.
3. You are currently enrolled as a full-time student in a U.S. degree-granting program or at an American or English-speaking school in one of the countries listed above and will have completed two academic years of college/university work before beginning your studies at Boston College.

GRE Exam

For those who choose to submit GRE scores, CSTM's GRE code is 2508.

Educational Testing Service

P.O. Box 6000

Princeton, NJ 08541

gre.org

Permission of Superior

All diocesan priests and members of religious orders must submit a letter of approval and financial support from their bishop or major superior. The letter must indicate complete knowledge and support for your studies indicating degree and semester of initial enrollment. The letter must be on official letterhead and signed by your superior or bishop. The letter should be addressed to the Associate Dean, Graduate Enrollment Management and must contain contact information.

Costs

The United States Government requires all international students to prove that they have the financial means to support themselves while studying in the United States. If you are a member of the clergy or a religious, you need to document by either a bank statement or letter of support from your bishop or congregation that you have funds to live and study in the U.S. The U.S. Embassy will not issue you a visa if you do not have the necessary funds. Any tuition costs not covered by CSTM scholarship funds must be documented.

Financial Aid Scholarships

The cost of higher education in the United States is high. CSTM awards partial tuition grants to international students, depending on availability, to help ease their financial burden. Students must be enrolled in a degree seeking program. Students must exhibit an exemplary academic record and personal potential. Students should be aware that, even if receiving a tuition grant, they still must obtain support to pay for their living expenses. Unfortunately, Federal loans are not available to those who are not U.S. citizens or permanent residents.

All international students must show that they have sufficient funds or resources to pay for their tuition and living expenses during the course of their studies, whether support comes in the form of scholarships, grants, or support from a religious order or personal bank account. Applicants do not need to supply evidence of sufficient resources with their applications. Once accepted, the admissions office will send a form where one can document resources. No additional funding will be available to international students once they arrive in the United States.

Housing

Boston College does not offer on-campus housing for graduate students. International lay students are encouraged to contact the CSTM admissions office and the Boston College's Off-Campus Housing Office, if they are interested in learning more about resources to help them

locate housing. International diocesan priests and members of religious orders usually find housing with area parishes or religious communities. International religious sisters are encouraged to contact the admissions office if they are in need of housing.

Graduate Degree Programs

The Clough School of Theology and Ministry offers graduate students a number of degree-granting programs. Our degree programs prepare students for ministries that are as diverse as the composition of the student body—Jesuits and other candidates approved for ordination studies, women and men for lay ecclesial ministries and for service rooted in faith, and scholars preparing for a career in academia.

Master of Divinity (M.Div.)

The School's most comprehensive program, the three-year M.Div. program offers a course of theological, pastoral, and spiritual formation to prepare students for ordained ministry, professional lay ecclesial ministry, or doctoral studies. M.Div. students at the CSTM have a demonstrated passion for ministry and service to the world, and often go on to careers in parish ministry, campus ministry, chaplaincy, teaching, and non-profit work.

Student Learning Outcomes for the M.Div. Program

Upon completion of the M.Div. Program, students will be able to:

1. Demonstrate an understanding of the Catholic theological tradition.
2. Bring the insights of the Catholic theological tradition into dialogue with contemporary social and religious issues.
3. Integrate theological thinking and ministerial practice.
4. Demonstrate capacities conducive to effective ministry.

Master of Arts in Theology and Ministry (M.A.)

The M.A. in Theology and Ministry prepares students for a wide variety of ministries. Designed for students of all ages and career backgrounds, this two-year program combines theological study with the pastoral arts. Graduates of the program go on to careers in parish ministry and administration, ministry in Hispanic and/or multicultural communities, campus ministry, religious education, high school religion teaching, spiritual direction, faith-based social service, and hospital chaplaincy, among others.

There are three ways to complete the M.A.T.M. program:

- **M.A.T.M. 48-credits: for on-campus students, with or without a concentration**
 - Ideally suited for full- and part-time students who want to take most courses on-campus. The 48-credit M.A.T.M. can be completed with or without a concentration and includes an internship.
 - M.A.T.M. Concentrations
 - Religious Education
 - Latino/Hispanic Christianity and Ministry
 - Spirituality
 - Faith and Public Life
 - Theology and the Arts
 - Theology and Women's Studies
- **M.A.T.M. 36-credits, summer and online combination**
 - Designed for those currently engaged in active ministry and/or who have extensive experience in ministerial settings or faith-based contexts, the 36-credit M.A.T.M. is completed through three-week summer residencies during CSTM Summer Session 2 and online or on-campus courses during the academic year. The M.A.T.M. 36 credit program does not require an internship and does not have an option for concentrations.
- **M.A.T.M. Dual Degree with options in counseling, education, business, and social work**
 - Dual Degree programs at the CSTM pair our M.A.T.M. degree program with one of four master's programs in other professional schools at Boston College (M.S.W., M.B.A., M.A. in Mental Health Counseling, and M.Ed. in Curriculum and Instruction). Through integrative inquiry, these programs form students to become agents of change and transformation in a

variety of fields, prepared to address sensitive and complex challenges with compassion, faith, and courage. Dual-degree students may choose to enroll in either the M.A.T.M. 48-credit program or the M.A.T.M. 36-credit program.

Student Learning Outcomes for the M.A. in Theology and Ministry

Upon completion of the M.A. program, students should be able to:

1. Bring informed theological, biblical, and pastoral resources to interpret and to enhance the life and ministry of faith-based communities and programs of service;
2. Embody the intellectual, pastoral and spiritual formation that is needed to provide leadership and empowerment to diverse communities of faith through various functions of education, ministry and service;
3. Demonstrate leadership (ecclesial, educational, ministerial, and public) that is well grounded in theological and pastoral studies, and that affirms the values of justice and diversity, enabling persons and communities to integrate life and Christian faith in accord with these values;
4. (Dual Degree Only) demonstrate the ability to integrate their studies in theology and ministry with their other fields of study

Master of Theological Studies (M.T.S.)

The two-year M.T.S. program (48 credits) offers a broad study of theology with the option to specialize in an area of particular interest. With a flexible curriculum and a special focus on scholarship, the M.T.S. is especially appropriate for students who intend to pursue doctoral studies in theology. The program is also appropriate for students seeking personal reflection and theological development.

Student Learning Outcomes for the M.T.S. program:

Upon completion of the M.T.S. program, students should be able to:

1. Demonstrate knowledge of the Bible, its historical contexts and methods of interpretation;
2. Articulate methodologies of moral reasoning in relation to Scripture, Tradition, and experience, demonstrated by literacy in a specific area of interest;
3. Demonstrate knowledge of Christian tradition, articulated in systematic thought on Christology, ecclesiology, or fundamental theology;
4. Demonstrate critical knowledge of the historical development of the Christian church, its institutions, practices and teachings; and
5. Articulate methodologies of pastoral studies and practical theology, and demonstrate a capacity for interdisciplinary and contextual analysis for Christian discipleship.
6. Articulate the value of engaging the contributions of scholars of non-dominant races, ethnicities, genders, and nationalities in order to examine a social issue in light of justice.

Master of Theology (Th.M.)

The Th.M. is a one-year, post-master's degree (24 credits) that is intended to deepen and focus a student's foundational knowledge of theological disciplines and ministerial practice. Th.M. graduates come from various backgrounds and go on to use their experience in a diverse array of professions. Graduates take their Th.M. education and serve as teachers, administrators, medical doctors, advocates for refugees and human rights, and ecumenical ministers, as well as in numerous other capacities. Lay students who have already completed a master of divinity and who are interested in pursuing doctoral work, but believe they need additional course work, might also consider the master of theology.

Student Learning Outcomes for the Th.M. Program

Graduates of the Th.M. program will be able to demonstrate:

- At the completion of the Th.M. in Advanced Theological Study, a student will be able to demonstrate competence in a particular area of theological studies beyond the Master's level (i.e. at the level of an advanced master's degree). (THM-ATS)
- At the completion of the Th.M. in Ministerial Practice, a student will be able to articulate an advanced theological understanding of and demonstrate competence in a focused area of ministry. (THM-MP)

Doctor of Philosophy, Theology and Education (Ph.D.)

The Ph.D. program educates scholars in the interdisciplinary field of religious education. Participants take courses in theology, education, and religious education; faculty members from each of these areas serve on both the comprehensive examination committee and on the dissertation committee.

Ecclesiastical Degrees

The ecclesiastical degrees are part of a three-degree cycle offered by an ecclesiastical faculty and granted in the name of the Holy See. The degrees provide training in advanced theological areas, preparing students to teach in a seminary or for religious and lay leadership positions in the Catholic Church.

The **Bachelor of Sacred Theology (S.T.B.)** is a first-level, three-year ecclesiastical degree granted in the name of the Holy See through the ecclesiastical faculty of the Clough School of Theology and Ministry (CSTM) by virtue of its status as an Ecclesiastical Faculty accredited by the Vatican Congregation of Catholic Education. Admission to the S.T.B. Program requires two full years of coursework in philosophy (30 credit hours). The S.T.B. Curriculum is fundamentally academic with an established curriculum of required courses determined by Veritatis Gaudium. Unlike the M.Div., it does not include electives or course work in Pastoral/Ministerial Studies, other than those courses specifically required for ordination. It prepares one to pursue the Licentiate of Sacred Theology (S.T.L.), a second-level, research-oriented ecclesiastical degree also offered by the CSTM.

Student Learning Outcomes for the S.T.B. Program

1. Demonstrate an understanding of the Word of God and the Catholic theological tradition.
2. Demonstrate an ability to bring the insights of the Catholic theological tradition into dialogue with contemporary social and religious issues.
3. Integrate theological thinking with spiritual and pastoral practice.

The **Licentiate in Sacred Theology (S.T.L.)** is the second degree in a three-degree progression of ecclesiastical degrees. The S.T.L. enables students to build upon previous work and focus more on a particular subject or field within a Catholic context. An advanced degree, it provides students with two full years of work above and beyond the S.T.B. or M.Div. Students use the S.T.L. to continue work in Catholic theological studies, prepare for doctoral work, or teach or build competence for working within the Church. Officially, it is “the academic degree which enables one to teach in a major seminary or equivalent school.” The S.T.L. can open many doors for service in the Church, and in a number of official capacities within dioceses, religious communities, and institutions of higher learning.

Student Learning Outcome for the S.T.L. Program

Students will be able to demonstrate advanced mastery of a particular area of theological studies beyond the first cycle Ecclesiastical degree.

1. Students will employ the hermeneutical principles and research methods germane to their selected area of concentration.
2. Students will employ historically, philosophically, and critically informed knowledge of the Catholic tradition in assessing theological positions.
3. Students will demonstrate understanding of the interplay between faith and culture including, where appropriate, underrepresented voices and contextual perspectives in addressing theological and/or ministerial issues.
4. Students will demonstrate an understanding of the relationship of their academic studies to the advancement of the Church’s mission in the world.

The **Doctor of Sacred Theology (S.T.D.)** is the culminating step in the three-degree ecclesiastical program. The purpose of the S.T.D. program is to create scholars who combine broad knowledge of a certain area, a critical knowledge of theological methodology, and an ability to contribute original research in a chosen field of study. Most students who complete the S.T.D. go on to teach in university faculties, seminaries, and theological centers. They also contribute to Church administration and pastoral work, using their extensive study, training, and expertise as resources for their community. Students interested in the S.T.D. usually have discerned a vocation of working within the Catholic Church or a related environment. As with the S.T.L., the S.T.D. can open many doors for service in the Church, and in a number of official capacities within dioceses, religious communities, and institutions of higher learning.

Student Learning Outcomes for the S.T.D. Program

At the end of the S.T.D. program, students will be able to demonstrate the skills necessary

1. To teach at the post-secondary level
2. To engage in scholarly research in preparation for teaching and publication
3. To demonstrate a sufficient level of mastery in a particular discipline, which corresponds to the expectations of the academy of the completion of a terminal degree

Non-degree Programs

The Clough School of Theology and Ministry is committed to providing the opportunity for professional development and ongoing formation for today's Church. Every person interested in exploring the important issues of the Church today can find a workshop, lecture, or course to meet his or her interest—whether professional or personal. Our programs are designed to fit into a variety of schedules, with day, evening, weekend, and online programs during the academic year, as well as one- or three-week courses held during the summer at CSTM.

Academic Certificate Programs

Post-Master's Certificate in Spiritual Formation

The Post-Master's Certificate prepares ministers with a prior master's degree in theology or a related field to be spiritual mentors for persons and Christian faith communities. This program highlights three themes—prayer and discernment, the art of spiritual direction, and working within faith communities.

Post-Master's Certificate in Scriptural Interpretation and Preaching: Courage to Preach

The Post-Master's Certificate prepares ministers with a prior master's degree in theology or a related field, to read and interpret Scripture and use it as a foundational collection to preach on contemporary issues, such as racial, economic, and environmental justice. The program will teach methods for preaching and teaching diverse audiences. It is especially attuned to the various opportunities, contexts, and media that can be most effective for reaching young adults.

Theology and Ministry Certificate

The Theology and Ministry Certificate is a flexible 18-credit program for individuals who wish to study either a specialized area of ministry or an expansive range of theological areas, but not enroll in a full master's program.

Religious Education Certificate

The Religious Education Certificate is an 18-credit program for individuals who wish to study religious education, but not enroll in a full master's program. Intended for educators in Catholic high schools and catechists in parishes who want to concentrate their knowledge, this certificate program is designed to adapt to student's needs.

Hispanic Ministry Certificate

The Hispanic Ministry Certificate is an 18-credit program designed to prepare students, ministers, and educators who are already working or are interested in doing so in the context of Hispanic communities anywhere in the U.S.

Christian Spirituality Certificate

The Christian Spirituality Certificate is an 18-credit program that enables persons who are personally or professionally interested in the study of Christian spirituality to delve into historical and contemporary Christian spiritual traditions, themes, and practices with an eye toward effective spiritual leadership today. Teachers, pastors, ministers, and those drawn to spiritual formation work will benefit from this focused study of Christian Spirituality.

Ignatian Spirituality Certificate

The Ignatian Spirituality Certificate is an 18-credit program that prepares persons to assume leadership in specifically Ignatian spiritual formation. It makes possible careful study of a highly influential Christian spiritual tradition, giving sustained attention to Ignatian and Jesuit spiritual themes and practices, pedagogy and leadership.

Spiritual and Pastoral Care Certificate

The Spiritual and Pastoral Care Certificate is an 18-credit program that provides nurses, counselors, social workers, and parish pastoral care givers with an opportunity to explore the intersection of Spirituality Studies and Pastoral Care in ways that deepen their ministerial and faith-based service.

Summer at CSTM

The CSTM offers an array of courses that can be used toward a degree program or taken for personal or professional development. We offer online and in-person courses, as well as one-credit options that take place over a one-week period. Students in the M.A. Hybrid program often complete much of their in-person coursework during the summer session.

Individual Courses

Special Student

Special Students at Boston College are those students wishing to take one or more classes in the academic year. As a Special Student at CSTM you may earn academic credit without enrolling in a degree program. Regular tuition applies and up to 12 credit hours may be taken. Should you later enroll in an CSTM degree program, the credits you earn will count toward your degree. Special Students may cross-register at other BTI schools, as long as they take one course at CSTM. Special Students are also allowed to take select courses for audit for one-half of the credit cost.

Minister-in-the-Vicinity

Boston College CSTM offers a special audit rate for those currently engaged in full-time ministry (ministers, lay ecclesial ministers, priests, rabbis, and others) who live in the vicinity and who hold a theological degree. Minister-in-the-Vicinity students can audit one course per semester at the rate of \$100 per credit hour.

Academic Policies and Procedures

Academic Integrity at Boston College

Academic integrity is taken quite seriously at Boston College and by the dean and faculty of the Clough School of Theology and Ministry in particular. CSTM abides by the University policy on academic integrity to be found in the Policies and Procedures section of this Catalog. The roles and responsibilities of students, faculty, and deans with regard to promoting academic integrity can be found there as well. CSTM students are strongly encouraged to become familiar with these policies and procedures, as they are held responsible for this knowledge. Students with questions regarding what constitutes a violation of Boston College's Academic Integrity Policy, especially with regard to specific courses and assignments, are invited and encouraged to ask these questions of their professors and the Associate Dean for Academic Affairs.

CSTM Academic Integrity Procedures and Tutorial

Each member of the Clough School of Theology and Ministry (CSTM) community is responsible for supporting a teaching and learning environment that cultivates the necessary habits of heart and mind that are rooted in the Gospel. Because each violation of academic integrity—whether intentional or unintentional—harms our common goal to create an academic culture of honesty, all violations are taken seriously at the CSTM. Faculty members are responsible for promoting academic integrity in their courses by including a clear statement in their syllabi of the school's policy and by discussing this policy in class at the beginning of the semester. Faculty are also responsible for promptly reporting violations of academic integrity as they occur. Consistent with the expectations set forth at Boston College, CSTM students are personally responsible for upholding academic honesty in all aspects of their work and should hold their peers accountable

when they suspect that a questionable act of academic dishonesty has taken place, either by directly addressing the violation as it is happening or by informing the appropriate individuals (a trusted faculty member or dean).

Violations of academic integrity include, but are not limited to, plagiarism. Students are responsible for educating themselves about what constitutes plagiarism and the inappropriate use of sources in an academic context. Any reference to the ideas or insights of others, either in direct quotation or in paraphrase, should be given explicit and clear attribution; to fail to do so is intellectually dishonest. Other instances of academic dishonesty include:

- Unauthorized collaboration on papers, presentations, assignments, and exams
- Unauthorized use of materials and sources in assignments and examinations
- Collusion with the intent to deceive
- Knowingly allowing your work to be used by others in an academically dishonest way
- Submitting the same work for two different courses
- Misrepresenting work that has been purchased or written by someone else as your own
- Lying in order to secure an extension on an assignment, to reschedule an exam, or to manipulate an outcome of a course requirement
- Cheating or copying from another student
- Fabricating stories or otherwise misrepresenting data in conversations related to training in counseling, CPE, and spiritual direction
- Inappropriate use of confidential information and inappropriate use of privileged access to spaces or information

In order to cultivate an academic culture of honesty, faculty are asked to document all instances of academic dishonesty, even if the assignment itself is not graded or the violation did not result in a grading penalty. Violations of academic integrity are taken seriously because of the mission of the CSTM to prepare students for leadership in teaching and active ministry in the global Church where students will be expected to promote a culture of integrity after leaving the CSTM.

CSTM Review Process

Cases are reviewed by the Academic Integrity Committee (AIC), which is constituted by (usually four) members of the faculty, one student, and the associate dean for academic affairs (hereafter “academic dean”). The chair of the AIC is a faculty person appointed by the Dean of the CSTM. All cases are handled with strict confidentiality. When a faculty member determines that a student’s work violates the standards of academic integrity, that faculty member should discuss the violation with the student, ideally in person, or in writing. The violation should be described and documented in a letter and sent to the academic dean along with the following supporting documents:

- Course syllabus with the instructions for the assignment highlighted
- The student’s work
- Evidence that a violation has taken place (e.g., copy of the original publication)

Along with the supporting documentation, the faculty person should clearly state if the violation will or will not incur a grade penalty, and, if so, what the faculty member thinks that penalty should be.

For instances where there is no grade penalty, either because the assignment itself is not graded or because it is a low-weighted assignment, faculty should submit the necessary documentation and a clear explanation for why no penalty was issued in a confidential sealed envelope addressed to the academic dean. The chair of the AIC and the academic dean will meet to determine whether or not a violation has taken place. For these instances where a violation does not incur a grading penalty, an individual meeting between the student and the academic dean may or may not be scheduled. The academic dean will issue a warning letter documenting the violation to the student and to the faculty member. All paperwork associated with the violation will be archived in the office of the academic dean in a confidential file until the student graduates, at which point it will be destroyed. Such instances are considered to be minor violations or warning violations.

If the faculty member decides that the violation is serious enough to warrant a grade penalty, the following procedure will be followed: The faculty person should meet with the student in person or explain the situation by email. This communication should discuss the nature of the academic integrity violation and also how to avoid such violations in the future. There should be a clear statement about the grade for the work without the violation and the additional penalty that is being imposed for the violation. The penalty for the academic integrity violation should take into account the severity of the violation, the complexity of the assignment, and the weight of the assignment. Grade penalties for students found guilty of academic integrity violations should also consider the degree of premeditation involved. If violations of academic

integrity occur towards the end of the semester, faculty should issue the final course grade of “I” until the AIC review process has been completed. The faculty person should document, in a letter addressed to the AIC, the meeting with the student, and the grade and grade penalty for the assignment, and forward this letter and all supporting documentation to the academic dean in a confidential file.

Every violation that incurs a grade penalty will fall under full review by the AIC and the academic dean. Upon receiving a report of an academic integrity violation, the academic dean will notify the student of the allegation and set up a meeting with him or her. The student will receive the report of the academic integrity violation report that has been submitted by the faculty member and the grade penalty for the violation. The student will have the chance to respond to the faculty member’s report in an individual meeting with the academic dean, and also be invited to submit his or her response in writing, so that it can be reviewed by the AIC. While a case is pending, the student may not withdraw from the course or program or change status in a course. The academic dean will serve as a non-voting member of and administrative resource for the AIC, acting as a liaison between the student and the AIC and maintaining the committee's record of notifications and relevant materials. In cases involving students from more than one school or students enrolled in joint or dual degree programs, the academic dean will coordinate the relevant academic integrity committees to participate in the review process.

The academic dean will notify the faculty member who reported the violation and the student(s) that the case is under full review by the AIC. Members of the AIC are held to strict confidentiality and may not discuss any case that is under review, even with the student(s) involved. At its discretion, the AIC as a whole may interview any individual, including the student, with knowledge pertinent to the case.

The AIC will review all cases involving a grade penalty. First, the AIC will determine whether or not a violation of academic integrity has taken place by a simple majority vote. Then, the AIC will assess the reasonableness of the penalty that has been given by the faculty member and either approve or reject the grade penalty. The AIC always reserves the right to make its own recommendation for a grade penalty based on the confidential information that it has about the student’s previous record of violations. Because academic integrity is a serious matter at the CSTM, instances of multiple violations are handled severely and may even result in dismissal from the School. The AIC may recommend a different grading penalty and/or impose additional administrative penalties, such as university probation, suspension, or expulsion, all of which become part of a student’s academic record and will be reported to graduate/professional schools and outside agencies. The academic dean is responsible for communicating the decisions of the AIC in writing to both the student and the faculty member.

The academic dean is also responsible for tracking all violations of academic integrity. A complete file of each case will be kept in a confidential file in the academic dean’s office until the student leaves the school or graduates. Unless the penalties include an action which is by its nature public (see examples above), the case will not be reported to outside agencies or institutions.

Appeal of the committee’s decision may be made by written request to the Dean of the CSTM no later than ten days following notice of the committee’s decision. The Dean's decision will be final.

CSTM Academic Integrity Tutorial

This online tutorial, developed by CSTM faculty, students, and administrators (with assistance from offices across the University) reviews different instances where academic integrity is in question and introduces students to the academic culture at the CSTM. As well, the tutorial serves as an introduction to good research practices and resources in theology and ministry at the graduate level. The tutorial is required of all new CSTM degree and certificate students in their first semester or summer of study. Students who do not complete the tutorial by the deadline set each semester by the Associate Dean for Academic Affairs will not be able to register for courses for the following term. Information regarding the administration of the tutorial will be given at new student orientation and by e-mail from the Associate Dean of Academic Affairs.

University Communication Policies and Student Responsibilities

The CSTM follows the policies set forth in the Policies and Procedures section of this Catalog.

Absences for Religious Reasons

The CSTM follows the policy set forth in the Policies and Procedures section of this Catalog.

Academic Advising

Students are free to form mentoring relationships with all CSTM faculty, including but not limited to their assigned advisors, and are encouraged to form these relationships particularly with those faculty working in the student's area of academic or ministerial interest. CSTM faculty welcome the opportunity to mentor students.

All students are assigned a faculty advisor for the purpose of course selection upon entry into an CSTM degree program. Students are strongly encouraged to meet with their advisors once per semester to choose courses for the following semester. Consulting the advisor ensures that when it comes time for graduation the student will have fulfilled the requirements of his or her program. Conversely, students who do not consult advisors risk not having fulfilled their requirements and then needing to take extra courses in order to do so before they graduate. Please consult the [CSTM Academic Advising Student Resource Guide](#) for course selection information, advising resources, and tips and tools to make the most out of your advising session.

Faculty advisors are assigned based on the student's degree program and an equitable distribution of advising among the faculty. Because advising is so important to the student's academic success, students should feel comfortable with their faculty advisors. Students who wish to change their advisor may do so by contacting the Associate Dean for Academic Affairs, requesting and giving the reason for the change, and identifying the faculty person whom the student wishes to have as his or her advisor moving forward. The Associate Dean will handle the matter in a way that is respectful to all parties.

Academic Grievances

I. Preamble

The Academic Grievance Policy of the Clough School of Theology and Ministry provides a procedure for the constructive and timely resolution of serious academic grievances of students against faculty members. An academic grievance is defined as a complaint by a currently enrolled graduate student against a member of the faculty related to a serious academic matter that has had an adverse effect on the student's learning or ability to perform to the best of his/her ability.

Ordinarily, questions related to a course grade are not considered cause for setting in motion an academic grievance, unless the disputed grade is judged to be evidence of a broader issue or concern related to instruction, communication, access, availability, accountability and/or fairness on the part of the professor. If a student's only issue is the grade itself, the matter should be addressed directly with the professor either in person or in writing. It is the professor's prerogative to alter or uphold the grade. In this case, the decision of the professor is final. If a student wishes to dispute a grade based on one of the alleged broader issues named above, a student may use the Academic Grievance Process to do this. The decision-makers in the Academic Grievance Process will consider only how the broader issues affected the student's grade; they will not abrogate the professor's prerogative to evaluate the academic quality of the student's work.

Resolution of grievances should involve all parties working cooperatively and respectfully to obtain resolutions acceptable to all parties involved. The grievance process first strives for mediated outcomes and only moves to directed outcomes when such efforts at mediation fail. All parties should seek resolutions at the lowest possible administrative level. The grievance should be initiated no later than the end of the sixth week of the semester immediately following the one in which the action giving rise to the complaint occurred—for example, a grievance arising from spring semester must be initiated before the end of the fall semester.

II.

Any student who believes he or she has a grievance should communicate with the faculty member(s) immediately involved as soon as possible after the action being grieved, but by no later than the close of the fall or spring semester immediately following the term in which the action giving rise to the complaint occurred. If communication results in a mutually acceptable solution, the matter shall be considered closed. If either party wishes to have a written statement of the outcome, the parties shall put the solution in writing, sign it, and each retain a copy.

III.

If, however, a resolution acceptable to all parties is not achieved, the student may present the matter in writing in a timely manner—ordinarily, “a timely manner” suggests no more than ten business days; in this case, that means ten business days from the date of the

unsuccessful effort to achieve a negotiated resolution—to the chairperson of the department in which the faculty member(s) resides administratively. The written statement must clearly specify: (a) the nature of the complaint and (b) the remedy requested. The chairperson should proceed in the following manner. If the chairperson is a party to the grievance, the Associate Dean for Academic Affairs shall act in his/her stead:

(A) After consultation with both the student and the faculty member(s) affected, the chairperson should proceed in a timely manner either to mediate the matter personally or assign it for mediation to one or more members of the department.

(B) The chairperson or designated faculty mediator(s) shall then meet formally with the faculty member(s) involved and obtain a written answer to the grievance with a full explanation of the faculty member(s)' position. After a full investigation, the chairperson or assigned mediator(s) should meet again with the faculty member(s) and student involved, either separately, or jointly, or both, in order to work out a settlement of the problem. If the chairperson or assigned mediator(s) succeeds in resolving the grievance, he/she shall put the agreement in writing, obtain the signatures of all parties to the document, and provide copies of the agreement to all parties involved in the process.

Should the chairperson or assigned mediator not obtain a resolution, the chairperson, after conducting such further proceedings as he/she may determine to be necessary or desirable in his/her sole discretion, shall prepare a written decision and provide a copy of it to the student and the faculty member(s) involved.

IV.

A student grievant may appeal a decision of the department chairperson to the Dean. The appeal must be made in writing within ten business days of the decision of the department chairperson and must specify clearly: (a) the nature of the grievance; (b) the remedy sought; and (c) the reason or reasons why the proposed resolution emanating from step (III) above is not acceptable. Upon receiving the written appeal, the Dean or the Dean's designees must meet with the chairperson, faculty member(s) and student involved, separately or jointly, to seek a timely solution to the issues. If such procedures produce a resolution acceptable to all parties involved, it shall be put in writing and copies given to all of the parties.

If no resolution acceptable to all parties is achieved, the Dean or the Dean's designees shall expeditiously gather all written statements and evidence accumulated up to that point and conduct such review or such further proceedings, including hearings, as the Dean or the Dean's designees may determine in their sole discretion to be reasonably necessary to reaching an ultimate disposition of the issue(s). In the event of a hearing, the faculty member(s) and student shall each be entitled to bring, for consultative purposes only, an advisor from the Clough School of Theology and Ministry or the wider Boston College community. If the above process achieves a resolution acceptable to all parties, the Dean or the Dean's designee(s) must put the agreement in writing, obtain the signatures of all parties to the document, and provide copies of the agreement to all of the parties.

If the Dean or the Dean's designee(s) does not achieve a resolution acceptable to all parties, the Dean shall in ten working days convey his/her decision and report (or the report of his/her designee(s) as applicable) to the chairperson and the parties involved. The Dean's decision shall be final.

Attendance

University Policy

Students are responsible for being familiar with and following the attendance policy in the Policies and Procedures section of this Catalog. In addition, each instructor has the right to specify their own, more stringent, attendance policy for a course, provided it is clearly defined in the syllabus.

CSTM Policy

In order to complete and achieve successfully the objectives of an CSTM course, students must attend the course meetings in order to engage the professor and fellow students in the teaching and learning dynamic. Unless other arrangements are made with the instructor, a student must withdraw from a course in which he or she has been absent for any reason for 25% or more of class meeting time. If a student with 25% or greater absence rate does not withdraw from the course, the student will be given a failing grade for the course.

Audits

Students enrolled in CSTM degree and certificate programs may audit courses and will be charged half the per-credit tuition rate. Students will not receive financial aid/tuition remission for audited courses and audited courses will not count toward degree programs (but may be counted toward certificate programs).

Students not enrolled in CSTM degree or certificate programs can apply through the Admissions Office to audit CSTM courses for half of the credit rate per course.

The CSTM has a reduced audit rate for Ministers-in-the-Vicinity. Please contact the Admissions Office for more information. The rate is limited.

Students cannot register to audit courses through their Agora accounts. Students should contact the STMCSTM Service Center or the Assistant Director, for Financial Aid and Academic and Student Services in order to register to audit a course.

For summer courses, students wishing to switch from credit to audit status must do so within one week of the start of the course.

Bias-Related Incidents: Reporting

As a graduate and professional school of Boston College, the Clough School of Theology and Ministry [rejects and condemns](#) all forms of harassment, wrongful discrimination, and disrespect that occurs on the basis of race, color, national origin, sex, religion, disability, age, marital or parental status, sexual orientation, military status, or other legally protected status. In order to foster an open and respectful educational environment, the CSTM is committed to responding to any incident that impedes a student's ability to learn, coexist peacefully, express ideas, or which impedes any other right listed in the [Code of Student Conduct](#). This includes bias-related incidents that may occur between faculty or staff and students or between students themselves.

Students at the CSTM are encouraged to report bias-related incidents to Dr. Jennifer Bader, Associate Dean, Academic Affairs or Jacqueline Regan, Associate Dean, Student Affairs and Career Services. Students should also familiarize themselves with Boston College's [Hate Crimes and Bias-Related Incident Protocol](#) for information on the different kinds of incidents, the process for reporting them, and the University's responses to them. Students may also report bias-related incidents directly to the Office of Institutional Diversity using the [Boston College Bias-Related Incident Report Form](#) or through any of the other [support resources](#) at Boston College, such as [University Counseling Services](#) or the [Office of Dean of Students](#). Students should also be aware that each member of the faculty and staff may have reporting obligations under our sexual misconduct policy.

For more information concerning the University's policies surrounding harassment and incidents of bias, refer to the Boston College [Notice of Nondiscrimination](#) or visit the [Policies and Compliance](#) section of the [Office of Institutional Diversity](#) website.

Childbirth and Adoption Accommodation Policy

Boston College recognizes the importance of family issues to its graduate students. Eligibility requirements for this accommodation for students in the Clough School of Theology and Ministry are as follows:

- The student must be the primary caregiver of a newborn child or an adoptive child under the age of 13 newly placed in the home.
- The student must be receiving a service stipend for work done at the Clough School of Theology and Ministry.
- The student must be enrolled in courses full-time.
- The student must be in good academic standing.
- This student accommodation is not an employee medical leave or a leave of absence from the academic program.
- In connection with the birth of a child, a student is eligible for an accommodation extending for a period of up to eight consecutive weeks. A student who is the primary caregiver for an adoptive child under the age of 13 is eligible for an accommodation extending for a period of up to eight consecutive weeks immediately following the placement of the child in the home.
- During the accommodation period, the student will be relieved of the service requirements that accompany the student's funding. During the remainder of the semester (before and/or after the accommodation period), the student's supervisor will assign service duties consistent with the academic and/or administrative nature of the work for which the student was offered the stipend.

- During the accommodation period, the student may attend classes and work on course assignments to the extent possible. The student and the Associate Dean, Academic Affairs should work with the professors in these courses to adjust, to the extent reasonably possible, attendance requirements, assignment deadlines, and exam dates during the accommodation period. The Associate Dean and faculty instructors should work with the student to establish appropriate timetables for completing coursework and exams during the semester in which the accommodation is taken.
- Funding provided by the University, including funding for health insurance, if any, will continue during the accommodation period.
- The accommodation policy will not extend the total number of years of funding available to a student.
- For students with 9-month stipends, funding is for the academic year only.
- A student anticipating a childbirth or adoption accommodation must notify their faculty advisor and submit a written request to the Associate Dean for Academic Affairs or the Associate Dean for Finance and Administration. The Associate Dean will inform the other Associate Deans and the Dean of the CSTM of all such requests. Requests for accommodation should be made no less than three months before the expected start of the accommodation period in order to allow appropriate arrangements to be made to cover any administrative, teaching, TAing, or research responsibilities. The CSTM will work out specific arrangements with students, on a case-by-case basis, within the broad framework of this policy.
- Students funded by government grants or other external sources must follow the policies of their funding agency. If external funding is suspended or reduced during the accommodation period, the university will assume funding responsibility for the accommodation period. Details of the arrangement should be worked out in writing among the student and the Associate Deans for Academic Affairs and Finance and Administration, and reported to the Dean of the CSTM before the accommodation period begins.

Comprehensive and Synthesis Exams

Doctoral Students: S.T.D.

Consult the S.T.D. Handbook for more information about policies and procedures for comprehensive examinations. During the semesters in which a student is not registered for coursework but is preparing for and taking comprehensives, a student must be registered in TMST8528 S.T.D. Specialized Research. In accordance with the University policy on grading, comprehensive exams are graded Pass with Distinction, Pass, and Fail.

Doctoral Students: Ph.D.

Consult the Ph.D. Prospectus for more information about policies and procedures for comprehensive examinations. During the semesters in which a student is not registered for coursework but is preparing for and taking comprehensives, a student must be registered in TMST9911 Doctoral Continuation. In accordance with the University policy on grading, comprehensive exams are graded Pass with Distinction, Pass, and Fail.

M.Div. Students: Synthesis Exams

Synthesis exams are taken in the third (or for part-time students, the last) year of the M.Div. program. Consult the M.Div. Handbook and the M.Div. Program Director for more information about policies and procedures for the synthesis exams.

M.A. Students: Capstone Projects

For M.A. students, the Capstone Project serves as the comprehensive exam. Students wishing for more information about the Capstone Project should consult their faculty advisor. In accordance with the University policy on grading comprehensive exams, Capstone Projects are graded Pass with Distinction, Pass, and Fail.

Course Loads

M.Div. students may not enroll for more than fifteen (15) credits in any one semester. The Associate Dean for Academic Affairs will monitor compliance with this policy. Exceptions are given for M.Div. students wishing to register for a 1-credit module. Students should discuss the rationale for this choice and timing with their academic advisor prior to registering for the module.

For summer course loads, please see the policy on [Summer Courses](#).

Course Numbering

CSTM course numbers reveal two things about the course: the subject area and the level. The following is a key to CSTM Course Numbering:

- TMCE: Christian Ethics
- TMHC: History of Christianity
- TMNT: New Testament
- TMOT: Old Testament
- TMPS: Pastoral Studies
- TMPT: Practical Theology
- TMRE: Religious Education
- TMST: Systematic Theology
- TMTM: Courses that do not fit into a particular area listed above, (e.g., cross-listed courses and languages).

All courses offered at the BC CSTM are rigorous, graduate courses appropriate for students in graduate degree programs. They presuppose graduate level academic scholarly work. Students wishing to take a course, but having questions about whether the course will be taught at an appropriate level for their needs should contact the instructor of the course directly.

- NP = No Prerequisites Required (course numbers 7000–7999)
This course is appropriate for students taking their first graduate course in a theological (sub) discipline or with topics or sources that are new to the students. No Prerequisites are required.
- P = Prerequisites Required (course numbers 8000–8499)
This course is appropriate for students seeking further study in a theological (sub) discipline or with theological topics or sources. The course has prerequisites, either in terms of general background (e.g., “a year of graduate studies in theology”) and/or course work (e.g., “one course in Christology” or “fundamental moral theology”). The prerequisites are indicated by the professor.
- D = Doctoral Seminar (course numbers 8500 and above)
This course is a doctoral level seminar. It may also be appropriate for S.T.L. and Th.M. students. Other advanced graduate students may apply. Department permission required.

Cross-Registration

In consultation with their faculty advisors, CSTM students may cross-register into courses at other universities and schools of theology through the following consortia: the Boston Theological Interreligious Consortium (BTI), the Consortium, and Consortium for Graduate Studies in Gender, Culture, Women, and Sexuality. More information is available in the Policies and Procedures section of this Catalog. Students can register for courses at BTI institutions by visiting the BTI website: bostontheological.org. *Note that 50% of coursework required for a Boston College degree must be taken at Boston College, and that 50% of coursework for an ecclesiastical degree (S.T.B., S.T.L., S.T.D.) must be taken with the Ecclesiastical Faculty of the CSTM.*

Degree Switch

A student seeking to change degree programs should consult with their academic advisor and the degree program directors, if appropriate, and then make an appointment to discuss the matter with the Associate Dean for Academic Affairs. Please download and follow the steps as indicated on the [Degree Switch Checklist](#).

Directed Readings and Research

Directed readings and research may be pursued on a specialized topic not currently covered in the course offerings in the same year, depending on the availability of faculty to work with a student. Ordinarily, only one such project may be undertaken in the course of a master’s program. Subject matter and requirements must be worked out with the professor. The agreement must be put in writing on a [Readings and Research form](#), signed by both the student and faculty member, and approved by the Associate Dean for Academic Affairs.

Doctoral Candidacy and Continuation

The CSTM follows the policy set forth in the Policies and Procedures section of this Catalog. To register for doctoral continuation, Ph.D. students register for TMST991101 and S.T.D. students register for TMST852801.

Doctoral Dissertation Submission

In order to graduate, your graduation date must match your graduation date listed in Agora. If not, you must contact CSTM's Assistant Director, Academic and Student Services to have this corrected. To qualify for graduation, you must deposit your completed dissertation with the University by the date indicated on the [University Academic Calendar](#).

Submitting your Ph.D. Dissertation

Ph.D. students should consult the office or the website of the Graduate School of the Morrissey College of Arts and Sciences for [further instructions on how to submit their dissertation](#) and for policies related to Open Access and embargoes.

Submitting your S.T.D. Dissertation

Please review the CSTM Ph.D. Handbook for instructions on formatting and submitting your dissertation. Additional information on how to submit your dissertation is available at the [Electronic Theses and Dissertations](#) web page.

Open Access Policy for S.T.D. Dissertations

Upon submission of a completed S.T.D. dissertation in the Clough School of Theology and Ministry, a student may request an embargo for not more than two years without special permission. To request an extension beyond two years, but for no more than five years, a student must submit a written rationale to the Associate Dean for Academic Affairs. Requests for more than five years will be granted only for extraordinary reasons.

Enrollment Status

The CSTM follows the policies set forth in the Policies and Procedures section of this Catalog.

Graduate full-time enrollment is as follows:

Clough School of Theology and Ministry—9 or more credits

All students are considered half-time with 6 credits.

Students completing degree requirements in their final semester may be given exceptions to the school's minimum credit standard for full-time status by their academic dean.

The credits amounts listed above are used to determine a student's enrollment status for loan deferments, immunizations, medical insurance requirements, and verifications requested by other organizations.

Graduate students in the Clough School of Theology and Ministry are full-time if enrolled in TMST8053, TMST8054, TMST8101, TMST8526, TMST8528, TMST8529, TMST8530, TMST8543, TMST8546, TMST9901, or TMST9911. MTS students can enroll in TMST8053 (MTS Thesis) in the last semester and should be considered full-time. Doctoral students are considered full-time if they are Graduate Assistants for academic departments, Teaching Fellows, or Research Assistants.

Final Examinations and Finals Week

Except where noted below, The CSTM follows the policies set forth in the Policies and Procedures section of this Catalog.

Policies include information regarding the following:

- Exam schedules
- Students' responsibilities
- Obtaining permission for alternate arrangements if granted permission to do so

CSTM Finals Week will be the 16th week of the semester for both Fall and Spring semesters (not counting spring break). Final student assessments are not to be due before the Monday of Finals Week. A final assessment is defined as the very last assignment or piece of an assignment that a student is required to do for the class.

Classes do not meet during Finals Week, with the exception of Monday classes in the spring when Easter Monday and Patriots Day are on different days.

In-class final exams must be given during the regular class time during Finals Week. To spread out due dates for students, whenever possible it is recommended that the take-home final due date be set for the same weekday on which the class met throughout the semester.

Foreign Language Requirements

Students should consult individual degree program handbooks/prospectuses for program-specific requirements.

See also the section below, *Pass/Fail Policy: Language Courses Offered Through the CSTM*.

Good Standing

A student in one or more of the following situations is considered under academic review:

1. The student's cumulative grade point average (GPA) falls below 3.0;
2. The student receives a grade of "incomplete" for one-half or more of the courses taken in a single semester;
3. The student has any incompletes that are not resolved by the end of the semester following the one in which the incomplete was obtained; and/or
4. The student has two or more grades that are below what is considered "Passing" for his or her degree program.

If a student is under academic review, the student will be notified in writing by the associate dean for academic affairs. The student will have until the end of semester in which she or he receives this notice in writing to bring his/her GPA up to 3.0, to complete all incompletes, and/or to develop a plan to make up the work not passed. If a student does not do these things, the student loses good academic standing. The associate dean will engage the student's faculty course selection advisor, the relevant department chair, and the associate dean for student affairs in a discussion as to whether and under what conditions the student may continue in his or her degree or certificate program.

The associate dean for academic affairs will also notify the associate dean for enrollment management of the names of all students who have lost good academic standing. As a result of these conversations, the student may be prevented from enrolling in further coursework, lose his or her financial aid, be dismissed from the University, or be given further conditions to meet in order to remain enrolled in the CSTM. The associate dean for academic affairs will communicate this information to the student in writing as soon as possible after the meeting.

Grading

Grades in the CSTM reflect the Academic Policies of Boston College for Graduate Courses as outlined in the Policies and Procedures section of this Catalog. In addition, the CSTM faculty has adopted the following grading guidelines:

The CSTM's policy is articulated in relation to individual assignments; the principles, however, apply to the overall grade for a course.

- A (4.0) (94–100)

This is the highest grade awarded for individual assignments, and for a course as a whole. “A” indicates that a student’s work not only meets, but exceeds the requirements specified for an assignment, and does so in an exemplary manner. As such it should be rare and granted for exemplary work. The outstanding quality of the work includes, but is not limited to, evidence of breadth and depth in reading, insightful engagement with primary and secondary sources, and a well-constructed argument that is creative in its analysis and, where appropriate, underscores the pastoral implications of a topic. To receive an “A,” the assignment would be written in a way that is concise and compelling, while also conforming to accepted academic methodologies for the citation of sources.

- A- (3.67) (90–93)

This grade indicates that the work significantly exceeds the standards for a “B.” The professor’s comments will identify the area/s in which the assignment significantly exceeds the standards, such as its argument, methodology, range of reading, or its structure/expression.

- B+ (3.33) (87–89)

This grade indicates that the work exceeds the standards for a “B.” The professor’s comments will identify both what aspect/-s of the paper went beyond “B” and what would have enhanced the paper’s argument or presentation.

- B (3.0) (84–86)

This grade indicates that the assignment satisfies requirements specified for the particular task and does so in a competent manner; as such, the work meets expectations at the graduate level. As such it should be seen as the standard grade for satisfactory completion. “B” confirms that an assignment demonstrates a sound understanding of relevant material, is constructed coherently, and communicates ideas in a clear and accessible manner, while also being properly attentive to the norms governing the citation of references. While the B grade recognizes competency in the area covered by the assignment, the grade also suggests that greater breadth or depth was possible in fulfilling the assignment; this implies, for example, the need for wider or deeper reading, a better sequencing of ideas, or greater attentiveness to written expression in order to enhance clarity.

- B- (2.67) (80–83)

This grade indicates that the work approaches the standards for a “B,” but does not fulfill all the requirements of that grade. The professor’s comments will indicate whether the deficit resides in one particular aspect of the paper—ideas, methodology, works consulted, or its structure/expression—or whether more than one aspect of the paper fell below the standard for a higher grade.

- C+ (2.33) (77–79)

This grade indicates that the work significantly fails to meet the standards for a B,” but is more than marginally acceptable. The professor’s comments will identify both what aspect/-s of the paper were insufficient and what would have enhanced the paper’s argument or presentation.

- C (2.0) (74–76)

This grade applies to work that is no more than marginally acceptable at the graduate level. The grade makes clear that the work does not rise to the level of competency in the topic covered by the assignment; the deficits could be in any or all of the work’s ideas, research, methodology, or structure/expression. “C” indicates that satisfactory completion of the course will require significant improvement in the areas specified by the professor’s comments.

- F (0.0)

An assignment that receives this grade is unsatisfactory in all of the areas that demonstrate competency for a graduate student. There are no other gradations between C and F. All work below C is unsatisfactory.

Grade Changes

The CSTM follows the policies set forth in the Policies and Procedures section of this Catalog.

Graduation

For graduation policies and procedures, please visit the Policies and Procedures section of this Catalog.

Walking in the CSTM Diploma Ceremony: Students who have completed all their requirements for their degrees on or before the Wednesday just prior to May graduation may participate in the CSTM diploma ceremony, even if they have not met the university deadlines for graduation (and, thus won't be actually receiving diplomas). Students who have not completed their requirements by the Wednesday before graduation may not participate in the CSTM diploma ceremony. Exceptions to this policy are rare and are granted solely at the discretion of the dean of the CSTM.

Incompletes

A student may, with adequate reason and at the discretion of the instructor, take an incomplete in a course. A formal request form must be completed by the student and signed by the professor and the Associate Dean for Academic Affairs. For approval to be granted, a date for completion must be agreed upon between the student and the professor. Except in extraordinary cases, all such "I" grades will automatically be changed to "F" according to the following University-dictated schedule:

- Spring: August 1
- Fall: March 1
- Summer: October 1

See the [CSTM Good Standing policy](#) for the number of incompletes a student may take in a given semester or summer and remain in good academic standing.

Language Courses for Master's Students

With their advisor's approval, CSTM will cover up to 6-credits of language coursework (at the rate of the student's CSTM scholarship) for M.T.S., M.Div., and M.A. students if taken at Boston College. This would be in addition to the degree requirements (i.e. an M.T.S. student's financial aid would apply to the 48 credits of the M.T.S. degree in addition to 6 credits of language coursework). Students who wish to complete language coursework within their degree credits are still welcome to do so. After receiving their advisor's approval, a student should email the associate dean for graduate enrollment management and copy their advisor.

Leave of Absence and Readmission after a Leave of Absence

The CSTM follows the policies set forth in the Policies and Procedures section of this Catalog.

Students are not eligible for CSTM financial aid or funding while on leave. When they return to the CSTM, students continue to receive the tuition remission that they were granted upon entrance into their degree program.

Students wishing to take courses at theological institutions outside of Boston College and the BTI while on leave of absence from Boston College are strongly advised to discuss this plan with their faculty advisor, the relevant department chair and the Associate Dean for Academic Affairs to make sure that the courses they are planning to take will transfer into and be counted toward their CSTM degree program. Please see the Transfer of Credit policy for more information.

In some cases, the Associate Dean may require that the student work out a plan of study for the following semester or for the completion of the degree as a condition of re-admission after a leave of absence.

Masters' Theses and Capstone Projects

All M.A. students are required to complete a non-credit Capstone Project in or prior to the last semester of their programs. Students seeking more information about the thesis should consult the [MATM Program Handbook](#).

M.T.S. students have the option of using one of their electives to do a 3-credit thesis. Students seeking more information about the thesis should consult the M.T.S. Handbook and/or consult the M.T.S. Program Director. Students should be registered for TMST8053 M.T.S. Thesis.

Th.M. in Advanced Theological Studies students enroll in a 6-credit thesis course during their final semester; these 6 credits are part of the 24 required for the degree. Students seeking more information about the thesis should consult the Th.M. Program Director.

Online Courses

Students wishing to take online courses should note the following degree-specific policies:

- M.A. students doing the M.A.T.M. doing the 36-credit track M.A. in hybrid mode may take up to 8 courses online toward their degrees (not including Contextual Education).
- M.A. students doing the 48-credit track M.A. option in hybrid mode may take up to 11 courses online.
- M.A. students not doing the degree in hybrid mode may take up to 4 courses online.
- M.T.S. students may take up to two online courses toward their degree.
- M.Div. students may take up to three online courses toward their degree.
- Th.M. and S.T.L. students may ordinarily not take online courses toward their degrees. By way of exception, the program director may grant permission to those students with a concentration in Spirituality Studies for 1 online course offered in conjunction with the Institute for Advanced Jesuit Studies.
- S.T.D. students may not take online courses toward their degree.
- Ph.D. students wanting to take a particular online course should consult their faculty advisors about whether and under what circumstances that course would be appropriate for their degree.

Pass/Fail: Degree Limits and Student Election Policies

Pass/Fail courses come in two types: those that a professor designates as P/F and those a student elects to take P/F. Whenever a student elects to take a course P/F, the procedure is as follows.

Students may elect to take a graded course Pass/Fail. Degree limits on student-elected P/F courses are listed below. Requests must be made with the approval of the faculty member teaching the course, and the Associate Dean for Academic Affairs.

Student requests to designate a course P/F normally happen during the add/drop period. Requests made after the add/drop period must be submitted to the faculty instructor of the course by the dates listed below.

- Fall Semester: November 1
- Spring Semester: April 1
- CSTM Summer Session: the deadlines for submission of P/F requests to the instructor of the course must be made according to the dates published by the University.

In order to receive a grade of Pass, a student must complete all assignments in the course, is subject to the same attendance policy as all other students in the course, and must earn a final grade in the course of C or above. A Pass will then be entered as the grade for the course instead of a letter grade.

- M.A. students may elect to take 2 courses P/F beyond those designated as such.
- M.Div. students may elect to take 3 courses P/F beyond those designated as such.
- M.T.S. students may elect to take 2 courses P/F beyond those designated as such.
- Th.M., S.T.L., and S.T.D. students may not elect to take any courses P/F.
- Ph.D. students should consult the Dean's Office of the Graduate School of the Morrissey College of Arts and Sciences.

Note: Some CSTM courses are designated as Pass/Fail by the faculty and do not fall under the degree limits stated above.

See also: Pass/Fail Policy for Language Courses Offered through the CSTM.

Pass/Fail Policy: Language Courses Offered Through the CSTM

All language courses offered through the CSTM are, by default, Pass/Fail. With the permission of the instructor, students have the option to take the course for a letter grade. Students should make this request via an e-mail to the Associate Dean, Academic Affairs by the end of the add/drop period (please note that for summer courses, the add/drop period ends the second day of class).

Please note that language courses offered through any other department or school at Boston College do not fall under this policy; students are responsible for inquiring about the grading policies of those courses with the sponsoring department (e.g., Romance Languages and Literature department for FREN106501 Intensive Reading in French). If you don't know whether a language course is offered by the CSTM or not, please contact the Assistant Director, Academic, and Student Services.

Prerequisites

TMST7081 Writing and Research for Theology and Ministry: International students with little or no background in writing graduate-level papers in the U.S. education system and/or students for whom English is a second language, the Admissions Committee may decide to recommend or require TMST7081 Writing and Research for Theology and Ministry as a condition of admission into a master's or certificate program. TMST7081 is taken in addition to the credit hours required for the degree, and the cost is covered at the student's tuition remission rate.

M.Div. students who have not met the degree's prerequisite for philosophy studies should enroll in two 3-credit philosophy courses, ordinarily within their first year of studies. One of these 3-credit courses should be **TMST7215 Philosophy for Theological Studies**, offered at the CSTM. The other course should be chosen, in consultation with their academic advisor, from among a recommended selection of Boston College Philosophy courses.

Professional Ethics in Ministry Workshop

CSTM's Professional Ethics in Ministry Workshop, required for all CSTM students, is intended for students as they begin their programs at CSTM. The workshop considers ministerial ethics in theological, pastoral, and legal perspectives and invites students into an ongoing, school-wide conversation and reflection on the nature of ministerial roles and the power dynamics and ethics that attend them. Students in ministerial degree programs with a field education requirement (Contextual Education or Supervised Ministry) must fulfill this requirement before they begin their placements. All other students must complete the requirement before they graduate. Information about when the Professional Ethics in Ministry Workshop is offered is distributed with admission materials. Students who have not fulfilled the requirement in their first year of study will be notified of the next available date to fulfill the requirement by the Associate Dean for Academic Affairs.

Readmission after a Lapse in Enrollment

All students are required to keep their University status current. If a student does not do so, s/he must seek approval from the CSTM to be re-admitted to the degree program.

Each degree has a term limit—a number of years from the date of matriculation into the degree program by which a student must finish the degree. These term limits are the following:

- M.A.: 5 years
- M.T.S.: 4 years
- M.Div.: 6 years
- Th.M.: 2 years
- S.T.L.: 4 years

If a student seeks readmission before the term limit expires, s/he must write the Associate Dean for Academic Affairs to request readmittance before the start of the semester in which the student wishes to return. If granted, all courses taken towards the degree thus far will count toward the degree.

If a student seeks readmission after the term limit has expired, the student must reapply through the Office of Admissions. To begin this process, the student should e-mail the Associate Dean for Enrollment Management. If the student is readmitted to the program, a decision will be made on a case-by-case basis by the Associate Dean for Academic Affairs as to (1) which and how many courses already taken will count toward the degree; and (2) any changes in requirements for graduation with the degree. The decision to re-admit a student will be based on a consideration of the best interests of both the student and the University.

S.T.L. Thesis Submission

A template for formatting your thesis can be found on the [CSTM Doctoral Student Resources](#) webpage of the TML website. Please follow the guidelines within that template to format your thesis, including the title page, copyright page, abstract, table of contents, and bibliography. Additional Information can be found in the S.T.L. Handbook. For instructions on submitting your dissertation to the BC Libraries, please follow the guidelines as stated in the S.T.L. handbook.

Open Access Policy for S.T.L. Theses

Upon submission of a completed S.T.L. Thesis in the Clough School of Theology and Ministry, a student may request an embargo for not more than two years without special permission. To request an extension beyond two years, but for no more than five years, a student must submit a written rationale to the Associate Dean for Academic Affairs. Requests for more than five years will be granted only for extraordinary reasons.

CSTM Style Guide

The CSTM faculty has unanimously adopted the [CSTM Style Guide](#) for all written assignments.

Summer Courses

M.A. students as well as students enrolled in Certificate studies may take summer courses at any time during their studies. Enrollment policies are as follows:

- Students who have not completed a semester or summer at the CSTM may take up to two on-campus courses (6 credits) per summer, with a maximum of one course (3 credits) per summer session.
- In subsequent summers, students who have and maintain a 3.5 GPA may take up to two on-campus courses (6 credits) per session. This is an intensive schedule and not recommended for all students. Students wanting to take more than one course a session should check with their advisors before registering.
- For Hybrid MA students Spiritual Formation and Contextual Education may be taken in addition to the guidelines set above.

Ph.D. students should consult with their academic advisor before enrolling in summer courses.

M.Div. and M.T.S. students are eligible to take summer courses after at least one semester of study during the Academic Year.* Currently enrolled M.Div. and M.T.S. students may take up to two courses (6 credits) per summer, with a maximum of one course (3 credits) per summer session. With permission, M.Div. students may take a 1-credit module, in addition to one or two other summer courses in the same summer. Students should discuss the rationale for this choice and timing with their academic advisor prior to registering for the module.

For Th.M., S.T.L., S.T.D. students, permission of the program director is required before enrolling in summer courses.

*With permission of the program director, incoming biblical studies students have the option of beginning their language courses in the summer term prior to their first semester, not to exceed a total of 6 credits during that summer term.

For students in all CSTM degree programs, summer courses in languages are acceptable if they conform to the requirements of the degree program to which they are to be applied; the student should contact the relevant program director to determine such suitability before enrolling in a summer language course.

Summer Course Registration

All students must be registered for class before the class begins. Please note: all tuition and housing charges must be paid prior to the first class. Students who have not paid their tuition and housing charges will not be admitted to class until the charges are paid. Persons with questions about this policy should contact the CSTM's associate dean for academic affairs.

Supervised Ministry: Criteria for Enrollment

Upon beginning their ministerial studies at the CSTM, students are responsible for knowing and following the guidelines for their respective degree programs regarding supervised ministry requirements. Cultivating a positive working relationship with the appropriate faculty director of supervised ministry is essential to the dynamic and interrelated processes of conscientious self-assessment, enrollment in the supervised ministry course, the appropriate selection of sites and supervisors, the development and implementation of learning goals and objectives, and rigorous, constructive and formative evaluations.

Mindful of the fact that students admitted to ministerial degree programs at the CSTM are expected to manifest the faith and religious commitment, the personal responsibility, the emotional maturity, the capacity for collaboration and perspective-taking, and the resiliency, resourcefulness and integrity that a program of preparation for professional ministry presupposes, the faculty members and administrators of the CSTM take extremely seriously their collective institutional responsibility for guaranteeing that these expectations, among others, are met and verified before any student's enrollment in a supervised ministry course is approved. Associated with such responsibility is ongoing accountability to those supervised ministry sites and supervisors with whom the CSTM works in partnership.

In the light of such responsibility, when a faculty director of supervised ministry and/or the associate dean for academic affairs is provided with substantive evidence indicative of a student's lack of readiness or suitability for undertaking supervised ministry in general or a specialized supervised ministry in particular, it is the responsibility of the directors for supervised ministry and the associate dean for academic affairs to delay or deny enrollment in the supervised ministry course. In obtaining and evaluating such evidence, the faculty directors and the associate dean may consult with other Boston College personnel, who may reveal relevant information as permitted by law. In addition, the appropriate faculty director and/or the associate dean are responsible for providing the student with adequate feedback regarding the reasons for the decision as well as support and guidance regarding subsequent steps. Such advice may include referring the student to appropriate avenues of personal and professional development, inviting the student to apply for supervised ministry at a future time, encouraging the student to consider a change of degree program, or recommending (or in some cases mandating) a leave of absence or withdrawal from the CSTM.

Syllabi: CSTM Policies and Student Information

While students should be familiar with all of the [CSTM academic policies and procedures](#), and where to find them, faculty are asked to highlight the following information on every syllabus, usually by providing a link to the [CSTM Syllabi: CSTM Policies and Student Information](#) document.

- Academic integrity
- Bias-neutral and inclusive language
- Grading policy
- Recording class sessions in online synchronous courses
- Students with disabilities
- Writing Companions Corner (WCC) for writing assistance

Taping of Lectures and Presentations

Except in cases where a student has a documented disability that requires an accommodation, presentations and lectures given by faculty, students, or others in the classroom cannot be recorded or distributed for any purpose (including use by enrolled students) without the presenter's permission. If a class is being recorded, the instructor must inform the class that the class is being recorded (without breaking the confidentiality of a student with a disability).

Students who wish to record a lecture or presentation must ask for and receive the permission of the presenter prior to recording. Recording of lectures of class presentations made with the presenter's advance consent is authorized solely for the purposes of individual or group study with students enrolled in the same class unless the instructor has explicit written consent for other uses. The recording may not be reproduced or distributed in any manner, including the Internet, without the instructor's explicit prior written consent.

Time-to-Degree Completion and Extensions

Each degree has its own time limit for graduation from the date of matriculation into the degree program.

- M.A.: 5 years
- M.T.S.: 4 years
- M.Div.: 6 years
- Th.M.: 2 years
- S.T.B.: 6 years
- S.T.L.: 4 years
- S.T.D.: 5 years, with one year extension possible

Students must petition the CSTM for an extension if they will not complete the degree in the time frame indicated above. Normally, only one extension will be granted per student. Students should send a letter by U.S. mail or e-mail to the Associate Dean for Academic Affairs, detailing (1) the reason the extension is needed and (2) giving a completion date for the degree. The Associate Dean will circulate the petition for extension to the student's faculty advisor and program director for approval before making a final decision on an extension. The Associate Dean will notify the student as to whether the petition has been approved and the student's new graduation term.

Transcripts and Transcripts/Diploma Holds

The CSTM follows the policies set forth in the Policies and Procedures section of this Catalog.

Transfer of Credit

Students may apply coursework taken at another regionally accredited or ATS-accredited university or school of theology towards their degree programs at the Clough School, subject to the following criteria:

- Credits cannot have been used toward any prior degree program;
- Only graduate-level coursework, in which the student earned a grade of "B" or better, will be considered;
- credits may be no more than five years old at the time of the student's graduation from said institution; *with exception*: credits transferred into the MDIV program may be no more than 6 years old at the time of the transfer of credit request.
- coursework must be relevant to the student's CSTM degree program.

Degree Specific Limitations:

- Students in the MA, MTS, STL, STD, and PhD programs may transfer a total of six (6) graduate credits.
- M.Div. students, including Jesuit scholastics transferring courses from First Studies, may transfer up to 18 credits toward their degree program.

Procedure - Student Responsibilities

1. Gather the syllabi for courses you wish to transfer into your CSTM program.
2. Complete the non-signature sections of the [Transfer of Credit](#) form.
3. Meet with your advisor to discuss how these courses fit within your program of study.
4. Obtain the Advisor's signature.
5. Deliver your syllabi and the Transfer of Credit form, signed by your advisor, to the Academic Services Specialist, who will determine if a transcript is on file or if a new transcript must be requested.

Procedure - Associate Dean, Academic Affairs Office Responsibilities

1. Academic Services Specialists will attach the transcript to the form and circulate to obtain signatures from the student's advisor, department chair, the associate dean, and Academic Affairs.
2. Academic Services Specialists will forward the fully signed credit transfer request (including transcript) to student services for entry into the student's record.

Special Circumstance: Credits completed as part of a non-degree program at the CSTM

Up to 12 credits of non-degree coursework, completed at the CSTM prior to matriculation into a CSTM degree program, may be applied toward the aforementioned degree program. Upon admission into a CSTM degree program, students wishing to explore this option should contact the Associate Dean for Academic Affairs.

Withdrawal from a Course

The CSTM follows the policies set forth in the Policies and Procedures section of this Catalog.

If you decide to drop a course after the posted add/drop period, you will be responsible for paying whatever portion of the course is not refunded based on the withdrawal date and according to the [University's tuition refund schedule](#). Please note, if you are receiving tuition remission funding, it will be cancelled for the dropped course and you will be responsible for the payment.

Withdrawal from Boston College

The CSTM follows the policies set forth in the Policies and Procedures section of this Catalog.

Carroll School of Management

Boston College's Carroll School of Management, Graduate Programs are recognized for offering innovative programs uniquely suited to today's challenging management environment. The School enrolls approximately 900 students in five highly regarded degree programs: the Master of Business Administration (M.B.A.), emphasizing hands-on, group learning and a global outlook; the Master of Science in Accounting (M.S.) providing students with the advanced quantitative tools and understanding of the important role of accounting in business; the Master of Science in Finance (M.S.), a rigorous ten-course curriculum providing advanced financial skills; the Ph.D. in Management with a concentration in Finance; the Ph.D. in Management with a concentration in Organization Studies; and the Ph.D. in Accounting, offering doctoral-level education for individuals interested in research and teaching. The Carroll School of Management, Graduate Programs have developed many exciting options that enable students to individualize their management education including several dual degree programs. Among those options are the Master of Business Administration/ Master of Science in Finance (M.B.A./M.S. in Finance); the Master of Business Administration/Juris Doctor (M.B.A./J.D.); and the Master of Business Administration/Master of Social Work (M.B.A./M.S.W.).

Master of Business Administration

Full-Time M.B.A.

For today's complex business environment, companies and organizations actively seek individuals who possess both highly developed management skills and advanced training in a specific discipline. An M.B.A. from Boston College offers you the skills and experience you need for an impactful career. Our Full-Time M.B.A. Program combines carefully sequenced courses with a variety of experiential learning components. Summer and academic year internships provide opportunities to apply classroom learning directly to professional practice. The M.B.A. prepares you to become a distinguished leader in business, acquire the tools employers demand from our world-class faculty, and connect with a powerful network of leaders and innovators at Boston College.

Requirements and Schedule

In the first year, students progress through the core curriculum as a cohort, developing a broad foundation of business knowledge and capabilities while forming meaningful connections with classmates. The second year of the program allows you to strengthen your skills in functional disciplines of your choice. Through the pursuit of elective courses, you can ready yourself for success in your desired field. Full-time M.B.A. students complete 57 credits of coursework.

The Carroll School is committed to instilling a strong sense of community service in its students. In an effort to align this commitment with the Program, all M.B.A. students must fulfill a requirement of 20 hours of service to others through meaningful work as volunteers.

Full-Time M.B.A. students should plan on academic sessions from 8:30 a.m. to 5:00 p.m., Monday through Friday during the first year of study.

Second year elective courses are taught in the late afternoon and evening, and full-time students take their electives with Part-time Program students whose participation adds a wider range of knowledge and experience to class discussions and projects. Most classes meet once a week from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m.

For current course listings and schedules, visit [Course Information and Schedule](#).

Part-Time M.B.A.

Part-Time M.B.A.

As a working professional, the Part-Time M.B.A. Program at Boston College offers you the flexibility you need to earn your degree while advancing your career. You will benefit from the opportunity to apply what you learn in the Program directly to your work.

As a Part-Time M.B.A. student, you develop managerial, analytical, and practical management skills through the completion of a strong set of core courses that emphasize experiential learning. The program attracts a diverse mix of highly motivated individuals from the vibrant and diverse regional business community, helping you grow your network as you develop and learn new skills.

Requirements and Schedule

The Part-time program is self-paced. Students generally take two courses in the fall and spring semesters and one to two classes during the summer. Part-time students must complete 57 credits of course work as well as 20 hours of community service. Most Part-time M.B.A. program classes meet once a week from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m. Summer courses meet twice a week from 6:30 p.m. to 9:30 p.m. Part-time M.B.A. students typically complete their degrees within four years.

Advanced Standing and Equivalency for Graduate Degrees (M.B.A.)

Advanced Standing and Equivalency for Graduate Degrees (M.B.A.)

M.B.A. students may be eligible to waive courses based upon prior coursework and/or professional certifications (such as CPA or CFA). Waiver policies vary according to program.

Advanced Standing Credit: Students may waive a class and will also reduce the overall credit requirement for the degree.

Equivalency: Students may waive a class but will be required to replace it with an elective. Equivalency applies to core courses only.

Transfer Credit: Under certain circumstances, students may receive approval to take graduate courses at other AACSB-accredited colleges or universities. Grades received for transferred courses are not calculated into the student's Boston College GPA.

M.B.A. Part-Time

All students accepted into the part-time M.B.A. program will be evaluated to determine their eligibility for Advanced Standing Credit. If not included in their application materials, students may be required to provide official transcripts and other relevant course information necessary to facilitate the review of their academic record. Shortly after receipt of their acceptance letter, students will receive notification of their eligibility to waive courses.

- The maximum amount of Advanced Standing Credit that a Part-time M.B.A. student may receive is 15 credits.
- Advanced Standing Credit will only be granted for courses in which the student has earned a grade of "B" or better, at an accredited institution, within the five years prior to enrolling in the Boston College Part-time M.B.A. program.
- The combination of waived credits and transfer credits may never exceed 1/3 of the course requirements for the degree.
- Students who have recognized professional certifications (i.e., CPA, CFA) may receive Advanced Standing Credit. A copy of the exam results will be required.
- Once an accepted student has been notified of eligibility to waive a course(s), he/she must respond with his/her intent to accept the Advanced Standing Credit, in writing, no later than Drop/Add Deadline for the semester in which he/she is enrolling.
- Students may contest waiver decisions within 30 days of the date of the initial decision. Course waivers will not be granted after this date.
- Once a student has accepted Advanced Standing Credit for a course, he/she may not take the course and receive credit.
- Professional experience alone will not make a student eligible to waive a course.
- Current Part-time M.B.A. students, who wish to take a course outside of the Carroll School of Management, must submit their request, in writing, at least 30 days prior to the start of the semester in which the student wishes to enroll in the outside course. Transfer credit will only be granted for courses related to the degree and is subject to approval by the Graduate Programs Office. Students must have completed a minimum of two semesters before they can submit a request to take a course outside of the Carroll School of Management. This includes courses taken through the Jesuit M.B.A. Network.
- Except under extenuating circumstances, students will not be approved for transfer credit if a comparable course is offered in the Carroll School of Management during the same academic year.
- Part-time M.B.A. students may cross register for one course each semester (not including Summer) at Boston University and Tufts, through the Consortium. Students interested in cross-registering for courses through the Consortium must first seek approval from the Graduate Programs Office and complete the necessary cross-registration forms, available through the University's Office of Student Services (Lyons Hall). Per the Consortium agreement, tuition will be billed through the student's Boston College account, at the Carroll School of Management's tuition rate.

Undergraduate Course Work

Part-time M.B.A. students who have demonstrated mastery in a core subject area may receive Advanced Standing Credit for up to five courses (15 credits).

Mastery typically entails either an undergraduate major in a core course area or at least two intermediate to advanced undergraduate courses with grades of B or higher.

Students may only receive Advanced Standing Credit for core courses, based upon undergraduate coursework.

Graduate and Professional Course Work

Part-time M.B.A. students who have a prior graduate degree in a relevant field or have completed graduate management courses at other AACSB-accredited institutions may receive Advanced Standing Credit for a maximum of five courses (15 credits).

Students may receive Advanced Standing Credit for core courses and elective courses, based upon graduate coursework.

Full-Time M.B.A. Program

Students accepted to the full-time M.B.A. program may apply to waive core courses based upon prior course work. If a full-time M.B.A. student is deemed eligible to waive a course, he/she will receive Equivalency. Equivalency requires the student to replace the waived course with an elective; therefore, it does not decrease the credit requirement for the degree. Full-time M.B.A. students who wish to be evaluated for course waiver eligibility must submit a Course Waiver Form. Students may be required to provide official transcripts and other relevant course information necessary to facilitate the review of their academic record. Students enrolled in the full-time M.B.A. program must maintain their full-time status for four continuous semesters (with the exception of students enrolled in approved dual degree programs outside of the Carroll School of Management).

- Full-time M.B.A. students may receive Equivalency for up to three core courses.
- Equivalency will only be granted for courses in which the student has earned a grade of “B” or better, at an accredited institution, within the five years prior to enrolling in the Boston College Part-time M.B.A. program.
- The combination of waived credits and transfer credits may never exceed 1/3 of the course requirements for the degree.
- Students who have recognized professional certifications (i.e., CPA, CFA) may receive Equivalency. A copy of the exam results will be required.
- Once an accepted student has been notified of eligibility to waive a course(s) and receive Equivalency, he/she must respond, in writing, his/her intent to accept the Equivalency no later than the drop/add deadline for the semester in which he/she is enrolling.
- Students may contest waiver decisions within 30 days of the date of the initial decision. Course waivers will not be granted after this date.
- Once a student has accepted Equivalency for a course, he/she may not take the course and receive credit.
- Professional experience alone will not make a student eligible to waive a course.
- Current full-time M.B.A. students who wish to take a course outside of the Carroll School of Management, must submit their request, in writing, at least 30 days prior to the start of the semester in which the student wishes to enroll in the outside course. Transfer credit will only be granted for courses related to the degree and is subject to approval by the Graduate Programs Office. Students must have completed a minimum of two semesters before they can submit a request to take a course outside of the Carroll School of Management. This includes courses taken through the Jesuit M.B.A. Network.
- Courses taken outside of Boston College will not reduce the student’s flat-rate M.B.A. tuition for that semester.
- Except under extenuating circumstances, students will not be approved for transfer credit if a comparable course is offered in the Carroll School of Management during the same academic year.
- Full-time M.B.A. students may cross register for one course each semester (not including Summer) at Boston University and Tufts, through the Consortium. Students interested in cross-registering for courses through the Consortium must first seek approval from the Graduate Programs Office and complete the necessary cross-registration forms, available through the University Office of Student Services (Lyons Hall). Per the Consortium agreement, tuition will be billed through the student’s Boston College account, at the Carroll School of Management’s tuition rate.

Undergraduate Course Work

Full-Time M.B.A. students who have demonstrated mastery in a core subject may be eligible for equivalency for up to five courses (15 credits).

Mastery typically entails either an undergraduate major in a core course area or at least two intermediate to advanced undergraduate courses with grades of B or higher.

Students may only receive Equivalency for core courses, based upon undergraduate coursework.

Graduate and Professional Course Work

Students who have a prior graduate degree in a relevant field or have completed graduate management courses at other AACSB-accredited institutions may be eligible for equivalency.

The CPA and CFA certifications will make a student eligible for equivalency.

Professional experience alone will not make a student eligible to waive a course.

For more information, please contact the Office for Graduate Programs, at (617) 552-3773.

Master of Science Programs

M.S. in Accounting

M.S. in Accounting

The Master of Science in Accounting program at Boston College cultivates students' analytical abilities and promotes an in-depth understanding of the role of accounting in the world at large. The Master of Science in Accounting prepares students to excel in the pursuit of their CPA and provides a strong foundation for a thriving career. The M.S. in Accounting program is only offered on a full-time basis. Required coursework is determined by faculty through the review of the student's academic transcript.

Curriculum

The Master of Science in Accounting Program offers a flexible curriculum that is tailored to your academic background. Courses focus on concepts that can be practically applied to professional accounting practice, and you learn from an accomplished faculty possessing valuable experience in the industry.

Upon completion of the Master of Science in Accounting Program, you will have a thorough understanding of the audit process. You will be proficient with firms' strategic cost management and management control decisions. You will be proficient with respect to financial statement analysis. And you will gain an in-depth understanding of the role taxes play in business decision making.

Each student receives a personalized course worksheet upon entering the Program that lists the specific courses you need to take to fulfill the Master of Science in Accounting degree. Completion of the Program requires a minimum of ten courses (30 credit hours) and at least six accounting classes, including the three Master of Science in Accounting core courses.

In addition to the academic requirements, all M.S. in Accounting students must complete ten hours of Community Service to fulfill their degree requirements.

Students are responsible for meeting the individual state requirements for taking the CPA exam. In some states, these requirements may result in additional courses.

M.S. in Finance

M.S. in Finance

The Master of Science in Finance offers you a comprehensive curriculum grounded in fundamental economic principles to develop specialized knowledge and skills as well as insights into innovative methodologies.

Two scheduling options are available. The full-time option allows you to complete the Master of Science in Finance in one full year of study, while the part-time option offers a part-time curriculum for students who wish to continue their careers.

All Master of Science in Finance candidates must meet certain prerequisite requirements prior to entering the program.

Curriculum

The traditional 30-credit M.S. in Finance Program comprises seven core courses and three electives. All M.S. in Finance students first master the sophisticated framework of financial understanding, techniques, and analysis taught in Investments, Corporate Finance, Financial Econometrics, and Management of Financial Institutions, which are the prerequisites for subsequent core courses and all finance electives. Knowledge and skills acquired in the initial courses inform advanced discussions and exploration of innovative methodologies in Derivatives and Risk Management, Advanced Corporate Finance, and Active Portfolio Management. Learning is engineered to be cumulative and reinforcing.

The Quantitative Track 30-credit M.S. in Finance Program comprises eight core courses and two electives. This track is STEM designated and provides M.S. in Finance students with a highly quantitative focus with an emphasis on financial analytics. The STEM designation will enable students graduating from the Quantitative Finance Track to gain vital career experience and bring quantitative skills to workplaces in Corporate Finance, Asset Management, and Investment Banking.

In addition to these 30 credits, all M.S. in Finance students must complete 10 hours of Community Service to fulfill their degree requirements.

The M.S. in Finance Program is designed to meet the varied needs of finance professionals. Most classes meet from 7:00 p.m. to 9:30 p.m. during the academic year, with a limited number meeting from 4:30 p.m. to 6:50 p.m. Summer term courses meet twice a week from 6:30 p.m. to 9:30 p.m.

M.S. in Finance Program Options

Cohort (Accelerated) Option

Students are drawn from across the country and around the world to participate in the Carroll School's accelerated M.S. in Finance Program, which can be completed in one full year of study. Students take four courses in the fall and spring terms and two courses in the summer term when they may also choose to pursue an internship. Students progress through the program as a cohort. Taking all courses together not only fosters exceptional camaraderie, but also creates a supportive network—one that continues long after the Program comes to an end.

Self-Paced Option

The self-paced option is designed to meet the needs of individuals who wish to continue in their careers while pursuing advanced study. While course enrollment is flexible, self-paced students typically complete the Program in twenty months by taking two courses in the fall, spring, and summer semesters respectively.

M.S. in Finance Curriculum, Cohort Option

Core Courses

- MFIN8801 Investments
- MFIN8807 Corporate Finance
- MFIN8820 Management of Financial Institutions
- MFIN8852 Financial Econometrics
- MFIN8860 Derivatives & Risk Analytics
- MFIN8881 Advanced Corporate Finance
- MFIN8803 Quantitative Portfolio Management

Three electives:

- Any 6600- or 8800-level Finance elective

M.S. in Finance Curriculum, Quantitative Track (available only as full-time cohort)

Core Courses

- MFIN8801 Investments
- MFIN8807 Corporate Finance

- MFIN8820 Management of Financial Institutions
- MFIN8852 Financial Econometrics

Four of the five following:

- MFIN8XXX Data Analytics (course number TBD)
- MFIN8803 Quantitative Portfolio Management
- MFIN6640 Finance Seminar: Simulation and Optimization in Finance
- MFIN8860 Derivatives and Risk Analytics
- MFIN8880 Fixed Income Analysis

Two electives:

- Any 6600- or 8800-level Finance Elective

M.S. in Finance Curriculum, Self-Paced Option

Core Courses

- MFIN8801 Investments
- MFIN8807 Corporate Finance
- MFIN8820 Management of Financial Institutions
- MFIN8852 Financial Econometrics
- MFIN8860 Derivatives & Risk Management

One of the following:

- MFIN8803 Active Portfolio Management
- MFIN8880 Fixed Income Analysis

One of the following:

- MFIN8808 Financial Policy
- MFIN8881 Advanced Corporate Finance
- MFIN8821 Corporate Valuation and Restructuring

Three electives:

- Any 6600- or 8800-level Finance elective

Doctor of Philosophy Programs

Ph.D. in Accounting

Ph.D. in Accounting

Ph.D. students in accounting complete a five-year program that is based on a thorough grounding in fundamental economic principles and rigorous statistical skills. Students will develop an appreciation of the institutional details that characterize accounting research and will concentrate on developing skills in econometrics as well as contracting and capital markets theory.

Course Requirements

Accounting Ph.D. students complete a program of study that begins with coursework in accounting, quantitative methods, economics, and finance. Through seminar courses, students will become fluent on the existing state of research literature, appropriate research methods, and proper management of the publication process.

Course requirements are typically satisfied in the first two years of the program. In addition to doctoral seminars, Ph.D. students will take courses in the departments of finance and economics and are encouraged to explore inter-disciplinary pursuits (visit the [Ph.D. in Accounting](#) website for more details).

Comprehensive Examination

A comprehensive examination will be administered at the conclusion of the second year in the program. Satisfactory performance on the exam marks the transition from coursework to full-time thesis research.

Research

Doctoral students engage early in the research process. The completion of a first-year paper, which can be a replication or an extension of a previous study, provides an early hands-on experience in research design, programming, data-management, and statistical analysis. In addition, students complete a second-year paper based on an original research idea, and submit a research proposal at the end of the third year. The proposal is the precursor to the dissertation: a substantial, significant, and original contribution to the field.

Assistantships

Doctoral Students at the Carroll School are expected to serve as research or teaching assistants throughout their studies. Typically, students will serve as research assistants for the first two years of the program and act as teaching/research assistants in the following years. In exchange, students receive full tuition remission and a stipend.

Ph.D. in Finance

Ph.D. in Finance

The Ph.D. program in Finance at Boston College is internationally known for a rigorous curriculum that combines theory with applied research and pedagogy. Finance faculty at Boston College are experts in their disciplines and globally acclaimed for their scholarship, research, and mentorship. In our collegial environment, students typically collaborate with one another and with faculty to produce groundbreaking research. The academic program begins with systematic, rigorous training in quantitative methods, economics, and finance. In addition, students complete a major research project, serve as research and teaching assistants, and write a doctoral dissertation. Graduates of the program are leaders in the field of finance who have the knowledge and analytical skills they need to conduct research and teach at the highest level.

The Ph.D. Program contains five components:

- Course Requirements
- Research Paper
- Comprehensive Examination
- Dissertation
- Research/Teaching Requirements

Each of these requirements is described below. Detailed standards for the Ph.D. candidate are published and provided to all students.

Course Requirements

Students complete a program of study that leads to competency in three areas: quantitative methods, economics, and finance. Ph.D. candidates in finance must complete four doctoral courses in quantitative methods, two in microeconomics, four in finance, and one in accounting. These requirements are typically satisfied in the first three years of the program (visit the [Ph.D. in Finance](#) website for details). In some cases, coursework completed prior to entering the program may be substituted for required courses.

Research Paper

Students are expected to engage in research early in the program. All students work as research assistants for fifteen hours per week for the first two years of the program. By May 31 of their third year, students are required to submit a research paper. A more detailed description of the research paper, its standards and criteria used to evaluate it is available from, maintained, and updated by the Ph.D. Committee.

Comprehensive Examination

Satisfactory performance on a written comprehensive examination marks the student's transition from coursework to thesis research. The examination is intended to allow the student to demonstrate substantial knowledge of financial economics. The examination is taken within two months of the completion of the first year of the program.

Dissertation

The doctoral dissertation is expected to be a substantial, significant, and original contribution to knowledge. It is prepared under the guidance of a thesis committee of three or more faculty members selected by the candidate in consultation with his or her thesis advisor. Early in the process, the candidate submits a thesis proposal. The proposal is presented in a seminar to which the finance faculty and doctoral students are invited. The purpose of the presentation is to give the student an opportunity to hear the suggestions and comments of members of the Boston College finance community while the research plan is still fluid. A thesis-defense seminar, open to the Boston College community, is held when the research is completed.

Student Support and Research/Teaching Requirement

Doctoral students are offered financial support at a competitive rate. A student in good standing may receive this support for four years. Financial support beyond the fourth year is conditional on the student's performance and may vary in amount. In return for this support, the student acts as a research assistant for the first two years of the program, then acts as a teaching assistant in the following years of the program. This generous level of support is based on the fact that students are expected to devote their full energies to the program during the entire calendar year, not just the academic year.

Ph.D. in Organization Studies

Ph.D. in Organization Studies

Designed to prepare students for academic careers, the Ph.D. program in Organization Studies at Boston College is recognized worldwide for its rigorous curriculum and exceptional faculty who are leaders in their fields. The program emphasizes a strong foundation in organizational theory, research methods, and statistics. Students begin the program with a set of complementary courses in micro- and macro-organizational theory, qualitative and quantitative research methods, statistics, and teaching skills. In the third year, students complete a major empirical research project and teach a course of their own. Throughout the Ph.D. program, students pursue research on their own and in collaboration with faculty. All students are encouraged to deliver papers at national and international professional conferences, as well as to submit articles for publication in top-tier research journals. Our graduates emerge as creative, independent scholars who can craft and pursue their own research agendas.

Ph.D. in Management with a Concentration in Organization Studies Curriculum

Course Requirements

Ph.D. students who have previous education in management take a total of 19 courses during the program; students without management education take two additional M.B.A. courses, for a total of 21 courses. All students begin the organization studies program with a set of complementary courses in micro- and macro-organizational theory, qualitative and quantitative research methods, statistics, and teaching skills. For course details, see Curriculum.

Comprehensive Examination

The comprehensive examination is given at the end of the second year. To pass the exam, students must demonstrate a substantial knowledge of theory and methods involved in the study of organizational behavior and theory.

Research Project and Dissertation

By the end of the third year, students complete a research paper demonstrating the ability to conduct innovative research in organizational studies. The culmination of the program is the dissertation: a substantial, significant, and original contribution to the body of knowledge in organizational studies that is prepared under the guidance of a dissertation committee of three faculty members.

Assistantship Requirement

Doctoral students at the Carroll School are expected to serve as research or teaching assistants throughout their studies. Typically, a student works as a research assistant for 15 hours a week during the first two years of the program, then teaches one course per semester or acts as

a research assistant in the third and fourth years. In exchange, the Carroll School provides financial support for doctoral students in the form of a stipend and tuition remission.

Dual Degree Programs

The Carroll School of Management, Graduate Programs collaborate with other outstanding graduate schools and programs at Boston College to offer over highly regarded dual degree programs. Students are generally able to complete the requirements of a dual degree program in less time than it would take to pursue each program separately. Interested applicants must apply and be admitted to both schools involved with a program. Dual degree programs have varying requirements and, while most take three years to complete, program lengths vary from two to four years of full-time study.

Students interested in dual degree programs must apply and be admitted to both the Carroll School of Management, Graduate Programs and the participating school within the University.

Applicants should contact both admissions offices to learn about admission requirements, deadline dates, and appropriate entrance tests.

Admission Information

Read below for more information on how to apply.

Master of Business Administration

Master of Business Administration

Boston College's M.B.A. program welcomes applications from graduates of accredited colleges and universities. The Admissions Committee considers applicants with academic backgrounds from virtually all areas of study, including liberal arts, business administration, social sciences, physical sciences, engineering, and law.

Courses in business administration or management are not required for admission to the M.B.A. program. However, students are expected to be proficient in communication skills and mathematics. In addition, all applicants are required to take either the GMAT or GRE.

The Admissions Committee looks for evidence of sound scholarship and management potential. Work experience and academic excellence are significant criteria in their evaluation. With few exceptions, students enter the program after at least two years of full-time work experience. Leadership and community involvement are also important factors in admissions decisions.

Additional information can be found at bc.edu/mba.

Master of Science in Accounting

Master of Science in Accounting

The M.S. in Accounting Program welcomes applications from graduates of accredited colleges and universities. The Admissions Committee considers applicants with academic backgrounds from virtually all areas of study, including liberal arts, business administration, social sciences, physical sciences, engineering, and law.

Courses in business administration or management are not required for admission to the M.S. in Accounting Program. All applicants are required to take either the GMAT or GRE.

The Admissions Committee looks for evidence of superior intellectual ability, excellent communication and interpersonal skills, and the potential for a successful career in the accounting profession. Sound undergraduate scholarship, together with internship/work experience and leadership and community involvement, are significant criteria in their evaluation. Work or internship experience is not required to apply to the program; however, it can strengthen a candidate's application.

Additional information can be found at the [M.S. in Accounting](#) website.

Master of Science in Finance

Master of Science in Finance

The M.S. in Finance Program welcomes applications from graduates of accredited colleges and universities who have a strong interest in finance. Applicants with undergraduate or graduate degrees in other subject areas are encouraged to apply early so that they will have the

opportunity to fulfill prerequisites that may be required. The Admissions Committee focuses on evidence of strong academic and professional success in all aspects of the application. An applicant's quantitative ability is carefully considered due to the rigorous nature of the curriculum. The Committee also considers leadership and community involvement factors in the admissions process. All applicants are required to take either the GMAT or GRE. Additional information can be found at the [M.S. in Finance](#) website.

M.B.A. Dual Degrees: Master of Science in Finance or Master of Science in Accounting

M.B.A. Dual Degrees: Master of Science in Finance or Master of Science in Accounting

Students must be admitted to both the M.B.A. and M.S. in Finance or M.S. in Accounting programs to enter the Dual Degree program. The M.B.A./M.S. in Finance program is highly analytical, and an applicant's quantitative skills are weighed heavily in the admission decision. Students are expected to be proficient in English and mathematics. All applicants are required to take either the GMAT or GRE.

The M.B.A./M.S. in Accounting program is for individuals interested in careers in public accounting, financial analysis, or financial management in a corporate or not-for-profit environment. Students are expected to be proficient in English. All applicants are required to take either the GMAT or GRE.

Ph.D. in Finance

Ph.D. in Finance

Admission to the Ph.D. program in Finance is open to applicants who show evidence of strong intellectual abilities, a commitment to research and teaching, and previous preparation in an analytical field. Students are required to have demonstrated competence and basic knowledge of finance. A student entering the program without such a background may be required to take additional courses. The GMAT or GRE is required for admission.

Ph.D. in Organization Studies

Ph.D. in Organization Studies

Admission to the Ph.D. program in Organization Studies is open to applicants who show evidence of strong intellectual capabilities, a commitment to research and teaching, and previous academic preparation in fields related to management. Students are required to have demonstrated competence in the functional areas of management. Applicants who have not already received an M.B.A. or have not completed the equivalent of the M.B.A. core curriculum prior to entering the program may be required to take additional courses. The GMAT or GRE is required for admission.

Ph.D. in Accounting

Ph.D. in Accounting

Admission to the Ph.D. program in Accounting is open to applicants with outstanding potential for leadership and academic excellence. While notable for their individual achievements, competitive candidates will demonstrate a consistent record of taking initiative in their academic and professional pursuits, and aptitude for conducting research at its highest levels, and a desire to make an impact on the world. Applicants are required to take the GMAT or GRE.

International Students

International Students

All applicants who completed their undergraduate course work outside the United States must have the equivalent of an American bachelor's degree or American master's degree (equivalency to be determined by the Graduate Dean of the School). In addition, all students whose first language is not English are required to submit TOEFL, PTE, IELTS, or Duolingo scores from within the past two years. This requirement is waived for applicants who have completed a four-year course of study or have been enrolled for the past two years in a college or university in the United States, Canada, Great Britain, Australia, or New Zealand. An official score report should be sent to Boston College, The Carroll School of Management, Graduate Programs, Carney Hall, 175, 140 Commonwealth Ave., Chestnut Hill, MA 02467-3808, United States.

Accepted international applicants must provide financial certification for two years for the M.B.A. Program and one year for the M.S. in Finance or M.S. in Accounting Program.

Financial Assistance

See below for more information on financial aid.

Graduate Assistantships and Scholarships

Graduate Assistantships and Scholarships

The Carroll School of Management offers a range of graduate assistantships and scholarships to graduates enrolled in its programs. Assistantships and scholarships are merit-based awards and are made only at the time of admission. These awards range in value and are typically awarded to exceptionally strong candidates. These institutional awards are determined by committee and administered at the point of admission.

NOTE: All applicants are automatically considered for merit-based awards. They do not have to apply separately.

M.B.A. students who receive a scholarship and/or assistantship during the first year of the M.B.A. program and remain in good standing will be renewed in the second year.

Ph.D. in Finance candidates, upon completion of any necessary prerequisite courses, receive full tuition remission and an annual stipend for up to five years of full-time study. In return, each candidate works as a research assistant the first two years and as either a research assistant or teaching assistant for the second two years.

University-Administered Financial Aid

University-Administered Financial Aid

In addition to the assistantships and scholarships offered through the Carroll School of Management, Graduate Programs, the Office of Student Services offers a variety of programs to help students finance the potential for a successful career in the accounting profession. Sound undergraduate scholarship, together with internship/work experience and leadership and community involvement are significant criteria in their evaluation. Work or internship experience is not required to apply to the program; however, it can strengthen a candidate's application.

Additional information can be found at the [Graduate and Law Financial Aid](#) website.

Career Development, Accreditation, and More Information

Career Development

Career Development

The Office of Graduate Management Career Development supports students in achieving their career goals through placement initiatives, career coaching, recruiting, and other services. In addition, the office serves as a bridge to corporations through its outreach activities and links to Boston College's worldwide alumni network. Specific services include the following: recruiting program, corporate presentations and informational sessions, interview preparation, resume books, corporate outreach, and other relevant Career Resources.

Accreditation

Accreditation

The Carroll School of Management is accredited by the Association to Advance Collegiate Schools of Business (AACSB). The School is also a member of the Graduate Management Admission Council (GMAC) and the New England Association of Graduate Admission Professionals.

For More Information

For More Information

Prospective students should direct inquiries for the M.B.A., M.S. in Finance, M.S. in Accounting, or Ph.D. Programs to the Graduate Management Admissions Office at Boston College, Carney Hall, Room 175, Chestnut Hill, MA 02467-3808; telephone: 617-552-3920; fax: 617-552-8078; bc.edu/carroll.

Connell School of Nursing

The William F. Connell School of Nursing offers a Master of Science (M.S.) degree program, preparing individuals to become advanced generalists or nurse anesthetists; a Doctor of Nursing Practice (DNP) degree program, preparing individuals for advanced nursing practice as nurse practitioners or nurse anesthetists; and a Doctor of Philosophy (Ph.D.) degree program, preparing highly qualified individuals for research and leadership roles in nursing, health care, research, and academic settings.

Accreditation

The Connell School of Nursing programs are nationally accredited by the Commission on Collegiate Nursing Education (CCNE). For additional information, visit the [CCNE website](#). The Nurse Anesthesia program is accredited by the Council of Accreditation of Nurse Anesthesia Educational Programs.

Doctor of Philosophy Degree Program with a Major in Nursing

The Ph.D. in Nursing Program emphasizes knowledge development and research to advance nursing science and improve the health of individuals, families, and communities. For the program objectives, please refer to the student handbook.

The Ph.D. program includes two phases: coursework and dissertation. After finishing the required coursework, the student completes a comprehensive examination. The purpose of the Ph.D. Comprehensive Examination is to demonstrate mastery of the program objectives through written and oral responses to questions related to knowledge development, research methods, substantive knowledge, ethical judgment, nursing/healthcare issues, and health policy. After successful completion of the Ph.D. Comprehensive Examination, the student moves to the dissertation phase, in which the student develops and conducts original dissertation research. The Ph.D. program and defense of the final dissertation must be completed within eight years of initial enrollment. Policies and procedures are consistent with those of the University.

Consistent with the recommendations of leading professional organizations, full-time doctoral study is highly recommended. Fellowships, scholarships, and other financial resources are available to full-time Ph.D. students through the Connell School of Nursing (CSON), Boston College, professional nursing organizations, and governmental agencies (e.g., HRSA, NIH, and NINR). The full-time plan of study allows students to complete required coursework in two years; some students may take longer to complete required coursework or may need to take additional coursework. Most full-time students complete the entire Ph.D. program in four to five years. Part-time students usually take longer to complete the degree. The entire Ph.D. program, including dissertation research and defense, must be completed within eight years.

Low student-to-faculty ratios and research mentorship facilitate student success and program completion in a reasonable amount of time. Multiple resources for scholarly development are available within the Connell School of Nursing, the University, our consortium University partners, and through research collaborations with research and clinical academic centers of the Greater Boston area. The Ph.D. program offers a variety of learning opportunities through course work, CSON forums, interdisciplinary colloquia, and collaborations through the Harvard Catalyst, independent study, and research practice. An individualized plan of study is developed according to the student's educational background, research interests, and stage of development in scholarly activities.

Program of Study

A minimum of forty-seven (47) credits are required to complete the Ph.D. degree. Additional credits and course work may be needed, depending upon the student's background, previous graduate training, and area of research interest. Substantive content expertise is acquired by taking cognates and elective courses in the area of interest. The research component of the program includes qualitative and quantitative research methods, statistics, research seminars, research practice and experiences, and dissertation development and advisement.

The list of courses in the Ph.D. program of study can be found in the [CSON Graduate Student Handbook](#).

Ph.D. Funding

There are three major sources of funding for full-time students in the doctoral program in nursing at Boston College.

1. University Fellowships are awarded to eligible full-time students each year on a competitive basis. Full tuition and a stipend are provided for up to three years as long as the student maintains good academic standing and demonstrates progress toward the Ph.D.
2. Research Assistant positions may be available through faculty research grants.
3. Teaching Assistant positions are available within the Connell School of Nursing.

Additional grants and scholarship opportunities are available on an individual basis. Students are encouraged to apply for a competitive individual National Research Service Award to assist with tuition and to provide a stipend.

Career Opportunities

Graduates of the Ph.D. program often seek positions in academic settings or in health care, industry, government, or other settings where research is conducted. Some Ph.D. graduates continue on to complete post-doctoral fellowships at research centers located at universities, government, or health care agencies.

Doctor of Nursing Practice Degree Program

The Doctor of Nursing Practice (DNP) program is a terminal nursing practice degree emphasizing holistic and compassionate care in the preparation of advanced practice nurses. The DNP program prepares advanced practice nurses with the knowledge and skill for providing comprehensive primary care to patients, families, communities, and populations within our complex and ever-changing health care system. With a focus on innovative and effective leadership, evidence-based practice, quality improvement, and a systems approach to care, the DNP advanced practice nurse is equipped to become an expert nurse leader in improving health outcomes.

The DNP program builds upon and integrates core course work in Epidemiology, Health Care Policy for Nursing Practice Leaders, Healthcare Information Technology Management, Program Planning and Evaluation for Population Health, Healthcare Quality Management, as well as the three P's (Advanced Physiology and Pathophysiology Across the Life Span, Advanced Health/Physical Assessment Across the Life Span, Pharmacotherapeutics in Advanced Practice Nursing) throughout the curriculum and clinical practicum courses. A focus on the history of nursing science, nursing's ethical responsibilities, as well as a strong foundation in evidence-based practice, culminates in the development of a student-led, innovative practice improvement or change project (DNP project).

DNP Areas of Specialization

Adult-Gerontology Primary Care Nurse Practitioner

A graduate of the Adult-Gerontology Primary Care Nurse Practitioner specialty program is able to manage the health care of adolescents, adults, and older adults, providing interventions to promote optimal health across a wide range of settings. Graduates serve as advanced practice nurses in a variety of health care settings including hospitals, clinics, health maintenance organizations, hospices, home care, and

community-based medical practices, and they can pursue national certification (through organizations such as the American Nurses Credentialing Center) as an Adult-Gerontology Primary Care Nurse Practitioner.

Certified Registered Nurse Anesthetist (CRNA)

The Nurse Anesthesia Program is a collaborative effort between the William F. Connell School of Nursing and Anesthesia Associates of Massachusetts. The curriculum design takes advantage of the core courses common to all DNP nursing specialties. In addition, students learn the advanced physiologic and pharmacologic principles specific to nurse anesthesia practice. The Nurse Anesthesia program of study includes 49 credits of core courses and 51 credits of specialty and theory clinical practicum. Clinical practices take place at the varied facilities where Anesthesia Associates of Massachusetts provide services and give students broad hands-on experience. The thirty-six month full-time curriculum is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs; graduates are eligible to sit for the National Certification Examination of the Council on Certification. The Nurse Anesthesia Program is accredited through June 2026 by the Council on Accreditation (COA) for Nurse Anesthesia Programs. The list of courses can be found in the [Nurse Anesthesia Graduate Student Handbook Addendum](#).

Family Nurse Practitioner

A graduate of the Family Nurse Practitioner specialty program is able to deliver primary care to individuals, families, and communities across a broad range of racial/ethnic, socioeconomic, geographic, and age/development strata. Graduates can serve as Family Nurse Practitioners in a variety of health care settings, including ambulatory settings, wellness centers, home health agencies, occupational health sites, senior centers, homeless shelters, and migrant camps. Graduates can pursue national certification (through organizations such as the American Nurses Credentialing Center) as a Family Nurse Practitioner.

Pediatric Primary Care Nurse Practitioner

A graduate of the Pediatric Primary Care Nurse Practitioner specialty program is able to provide a wide range of primary and secondary health services for children from infancy through adolescence. Graduates can serve as a Pediatric Nurse Practitioner in a variety of health care agencies and community settings. Graduates can pursue national certification (through the American Nurses Credentialing Center or the National Certification Board of Pediatric Nurse Associates and Practitioners) as a Pediatric Primary Care Nurse Practitioner.

Psychiatric-Mental Health Nurse Practitioner

A graduate of the Family Psychiatric-Mental Health Nurse Practitioner specialty program is able to conduct psychotherapy with individuals across the life span, groups, and families. Graduates can also function as case managers for persons with psychiatric disorders, provide psychiatric consultation to primary care providers, serve as Psychiatric-Mental Health Specialists in a variety of settings, including out-patient, partial hospitalization, day treatment, and community-based intervention programs. Graduates are eligible to seek national certification (through organizations such as the American Nurses Credentialing Center) as a Family Psychiatric-Mental Health Nurse Practitioner or Psychiatric-Mental Health Nurse Practitioner and can apply for prescriptive authority in many states (including Massachusetts).

Women's Health Nurse Practitioner

A graduate of the Women's Health Nurse Practitioner specialty program is able to provide direct care to meet women's unique concerns and health needs across the life span. Graduates can also serve as a Women's Health Nurse Practitioner inside or outside of formal health care agencies and institutions. Graduates can pursue national certification as a Women's Health Nurse Practitioner offered by national programs such as the National Certification Corporation.

Program Entry Options

Direct Entry Doctor of Nursing Practice (DNP)

The Direct Entry Doctor of Nursing Practice program is an accelerated program designed for individuals who have a baccalaureate degree or higher in fields other than nursing who wish to pursue preparation as an advanced practice nurse. The Direct Entry DNP provides a seamless, integrated curriculum to prepare students for license as registered nurses and for certification as advanced practice nurses. In this program, students complete extensive prerequisite courses prior to enrollment. They study and complete advanced generalist nursing requirements on an intensive full-time basis during the first five semesters of the program.

Students will meet both the AACN Essentials of Baccalaureate Education for Professional Nursing Practice and the AACN Essentials of Master's Education in Nursing during the five semester pre-licensure portion of the program. A Master of Science in Nursing as an Advanced Generalist is conferred upon successful completion of the pre-licensure coursework, whereupon students are eligible to sit for the National Council Licensure Examination (NCLEX-RN). The pre-licensure component of the program consists of 57 academic credits.

After passing the NCLEX-RN exam and receiving a license as a registered nurse, students then proceed into the doctoral level coursework in one of the following nurse practitioner specialty areas of practice: Adult-Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women's Health Nurse Practitioner. In order to progress to nurse practitioner study (doctoral level), students must be in good academic standing and be licensed as registered nurses. The program includes a clinical project associated practicum, a minimum of 750 direct patient care clinical hours, and an additional 49 credits following conferral of the pre-licensure master's degree.

Applicants are reviewed and accepted into the clinical specialty program to which they apply and are assigned a clinical placement year at that time. Students are permitted to slow down and attend part-time during the nurse practitioner component. To do so, they should contact the graduate office to find out when a clinical seat would be available. Students who wish to change specialty programs must contact the graduate office, the two program directors, and must apply to the new specialty. Acceptance is not guaranteed and may slow completion of the degree as the clinical year is assigned on a space available basis.

Direct Entry program students are not eligible to apply to the nurse anesthesia program because admission to this program requires a minimum of one-year of experience as a registered nurse in an intensive care (ICU) setting.

Post-Baccalaureate Doctor of Nursing Practice (DNP)

The Post-Baccalaureate DNP provides a seamless, integrated curriculum to prepare registered nurses for certification as advanced practice nurses. This program is designed for individuals who hold baccalaureate degree in nursing and wish to specialize in one of the following specialty practice areas: Adult-Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women's Health Nurse Practitioner, can be completed on a full or part-time basis. The program includes a clinical project associated practicum, a minimum of 750 direct patient care clinical practice hours, and 73 academic credits.

Post-Master's Doctor of Nursing Practice (DNP)

The Post-Master's DNP program is designed for currently practicing master's prepared advanced practice nurse practitioners who wish to complete a terminal practice degree program. Following a complete portfolio review and building on prior clinical knowledge and experience, students will focus on innovative core class work in healthcare quality, safety, informatics, and policy. Building on a foundation of evidence-based practice knowledge, students will develop and lead an innovative practice improvement or change project. The program includes a project associated practicum which is individualized based on the results of the portfolio review and a minimum of 34 academic credits.

RN (ASN) to Doctor to Nursing Practice (DNP)

The RN to DNP program is designed for the associate degree prepared registered nurse who wishes to become an advanced practice nurse and specialize in one of the following specialty practice areas: Adult-Gerontology Primary Care Nurse Practitioner, Family Nurse Practitioner, Pediatric Primary Care Nurse Practitioner, Psychiatric-Mental Health Nurse Practitioner, and Women's Health Nurse Practitioner. Following a complete portfolio review, an individualized curriculum of classroom and clinical content will be developed. Students entering by this route will be required to complete bridge course work prior to beginning the DNP curriculum. This program can be completed on a full or part-time basis. A minimum of 750 direct patient care hours and another 250 of indirect care hours which will be included in the DNP project. Credit hours are dependent on results of the individual portfolio review.

Master of Science Degree Program with a Major in Nursing

The graduate of the master's program is prepared as an advanced generalist nurse with disciplinary knowledge and skill to provide culturally sensitive, safe, and high-quality care. The graduate will improve the delivery of care through leadership, mentorship, and evidence-based practice. The graduate will have met the AACN Essentials of Master's Education in Nursing. The graduate without a baccalaureate degree in

nursing will have met the AACN Essentials of Baccalaureate Education for Professional Nursing Practice and will be eligible to sit for the National Council Licensure Examination (NCLEX-RN). Program objectives can be found in the [Master's Student Handbook](#).

Program Entry Options

Post-Baccalaureate Advanced Generalist

The Post-Baccalaureate Master of Science in Nursing, Advanced Generalist is designed for bachelor's prepared registered nurses. This program is designed for current nurses to advance into nursing leadership roles. Students will meet the AACN Essentials of Master's Education in Nursing. The Advanced Generalist Master's (AGM) program utilizes evidence-based practice to improve the delivery of care through leadership and mentorship culminating in a clinical experience in advanced generalist practice. This program consists of 32 credits.

Direct Entry Advanced Generalist

The Direct Entry Master of Science in Nursing, Advanced Generalist program is an accelerated program designed for individuals who have a baccalaureate degree or higher in fields other than nursing who wish to pursue preparation as a registered nurse. The Direct Entry Advanced Generalist Master's (AGM) program provides a seamless, integrated curriculum to prepare students for license as registered nurses with enhanced content in healthcare quality, informatics, nursing leadership and policy. In this program, students complete extensive prerequisite courses prior to acceptance and enrollment. They study and complete generalist nursing requirements on an intensive full-time basis during the five semesters of the program.

Students will meet both the AACN Essentials of Baccalaureate Education for Professional Nursing Practice and the AACN Essentials of Master's Education in Nursing during the five semester program. A Master of Science in Nursing as an Advanced Generalist is conferred upon successful completion of the pre-licensure coursework, whereupon students are eligible to sit for the National Council Licensure Examination (NCLEX-RN). The pre-licensure component of the program consists of 58 academic credits. The list of courses in the Direct Entry Master's Advanced Generalist program can be found in the Master's Student Handbook. For further details, please visit bc.edu/nursing.

RN (ASN) to M.S., Advanced Generalist

The RN to Master of Science in Nursing, Advanced Generalist is designed for associate's prepared registered nurses. This program is designed for current nurses to advance into registered nurse leadership roles. Students will meet the AACN Essentials of Master's Education in Nursing. The Advanced Generalist Master's (AGM) program utilizes evidence-based practice to improve the delivery of care through leadership and mentorship culminating in a clinical experience in advanced generalist practice. Following a complete portfolio review, an individualized curriculum of classroom and clinical content will be developed. Students entering by this route will be required to complete bridge course work prior to beginning the master's curriculum. Credit hours are dependent on the results of the individual portfolio review.

Certified Registered Nurse Anesthetist (CRNA)

The Nurse Anesthesia Program is a collaborative effort between the William F. Connell School of Nursing and Anesthesia Associates of Massachusetts. The curriculum design takes advantage of the core courses common to all master's degree nursing specialties. In addition, students learn the advanced physiologic and pharmacologic principles specific to nurse anesthesia practice. The Nurse Anesthesia program of study includes 21 credits of core courses and 49 credits of specialty and theory clinical practicum. Clinical practica take place at the varied facilities where Anesthesia Associates of Massachusetts provide services and give students broad hands-on experience. The 27-month full-time curriculum is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs; graduates are eligible to sit for the National Certification Examination of the Council on Certification. The Nurse Anesthesia Program was re-accredited in 2015 by the Council on Accreditation (COA) for Nurse Anesthesia Programs. The list of courses can be found in the [Master's Student Handbook](#).

Electives

Elective course options within the Connell School of Nursing include: NURS7524 Master's Research Practicum; NURS7525 Integrative Review of Nursing Research; and graduate level independent study. Additional elective courses are offered in forensic nursing, global health, sexual health, and interdisciplinary approaches to palliative care. Other relevant graduate level elective courses are available in other schools or

departments at Boston College. Independent Study is recommended for students who have a particular interest that is not addressed in required courses in the curriculum. Other electives are available through the consortium.

Non-Degree (Special Student)

The Special Student status is for non-matriculated students with a bachelor's degree in nursing who are not seeking a degree but are interested in pursuing course work at the graduate level. Persons interested in this option must apply and be admitted as a non-degree student to the Connell School of Nursing, Graduate Programs before registering for courses. Some courses are restricted to matriculated students only; other courses allow enrollment on a space-available basis.

Cooperating Health Agencies

Our programs utilize numerous and diverse practice settings in the city of Boston, the greater metropolitan area, and eastern New England. Sites are selected to offer rich experiences for developing advanced competencies in the nursing specialty. Community agencies include the Boston VNA, mental health centers, general health centers, community health centers, college health clinics, public health departments, visiting nurse associations, health maintenance organizations, nurse practitioners in private practice, and home care agencies. Additional settings include hospice, homeless shelters, schools, prisons, and Boston Veterans Administration (VA) health services. Selected major teaching hospitals used include Massachusetts General Hospital, Beth Israel-Deaconess Medical Center, McLean Hospital, Brigham and Women's Hospital, Boston Medical Center, and Boston Children's Hospital.

Admission Requirements

For all admissions requirements, please visit the Connell School of Nursing website at the [How to Apply](#) page.

General Information

Read below for more information regarding graduate study at the Connell School of Nursing.

Graduate Academic Policies in the Connell School of Nursing

Academic Integrity

Students are expected to have high standards of integrity in both the academic and clinical settings. CSON adheres to the Boston College policies surrounding academic integrity. This policy may be accessed online at the Policies and Procedures section of this Catalog.

Expected ethical behavior in clinical situations is based on the American Nurses' Association Code of Ethics for Nurses (ANA, 2001, 2010). Students are expected to protect patients' confidentiality at all times, and to be honest in any documentation regarding the patient's condition and their own assessments and interventions. Students are expected to maintain high professional standards, including being physically, intellectually, emotionally, and academically prepared when caring for patients. Unprofessional conduct is considered serious and may result in dismissal from the school.

Graduate Academic Standing and Progression Policies

The Graduate Academic Standards and Progression Committee, composed of professors responsible for the nursing (NURS) courses and courses in the MS and DNP (nursing) program, meets at the end of each semester to review the records of graduate students with course failures, course deficiencies, low GPAs, or other academic concerns. The Committee may also meet at any time during the academic year in exigent circumstances upon faculty request (i.e., unprofessional conduct or clinical safety concerns). Students will be promptly notified before undergoing Committee review. This Committee makes recommendations about progression in the program in accordance with the policies described below and other relevant university policies. Final progression decisions are made and implemented by the Associate Dean for Graduate Programs.

Graduate students are expected to maintain good academic standing at all times and progress through their program of study in accordance with program standards and performance expectations. Those who are not in good academic standing or are not progressing are subject to review by the Graduate Academic Standards and Progression Committee.

Grade Point Average

All graduate students in the Connell School of Nursing are expected to maintain a cumulative GPA of 3.0 in order to remain in good academic standing. If a student has a GPA of less than 3.0, the Graduate Academic Standards and Progression Committee will be convened to hear the case.

Pre-licensure Coursework

If a student receives a grade of B- (80%) or above in a pre-licensure course they will pass the course. If a graduate student receives a C (74-79%) on a NURS pre-licensure course (listed below), the Graduate Academic Standards and Progression Committee will be convened to hear the case.

- NURS 8001 Pharmacology and Nutrition
- NURS 8004 Direct Entry Adult Nursing Clinical with laboratory
- NURS 8005 Direct Entry Psychiatric Mental Health Nursing Theory
- NURS 8006 Direct Entry Psychiatric Mental Health Clinical
- NURS 8007 Direct Entry Child Health Theory
- NURS 8008 Direct Entry Child Clinical
- NURS 8009 Direct Entry Childbearing Theory
- NURS 8010 Direct Entry Childbearing Clinical
- NURS 8011 Nursing Synthesis Practicum
- NURS 8012 Population Health Clinical
- NURS 8013 Direct Entry Adult Health Theory

The Graduate Academic Standards and Progression Committee will determine the best course of action. The student will be placed on academic notice and remedial steps may require the graduate student to:

- Contact the Connors Learning Center to receive support and/or tutoring;
- Achieve >83 on a course-specific NCLEX preparation platform approved by the Graduate Dean.

If a graduate student receives a failing grade F (< 74%) on a NURS pre-licensure course or strategically withdraws from the course (i.e., withdraws from the course on a date later than the course withdrawal deadline to avoid failure from the course), the Graduate Academic Standards and Progression Committee will be convened to hear the case and determine the best course of action. The student will be placed on academic notice and at minimum, be required to retake the course before advancing in the curriculum. Students have only one opportunity to repeat a nursing course after course failure or strategically withdrawing from the course. All above NURS courses must be taken at Boston College.

Graduate Coursework

The minimum acceptable passing grade for graduate courses (other than the NURS pre-licensure courses listed above) is a B- (80%). If a student receives a grade below B- in any graduate course other than the above NURS pre-licensure courses or strategically withdraws from a course, the Graduate Academic Standards and Progression Committee will be convened to hear the case. The student will be placed on academic notice and at minimum, be required to retake the course before advancing in the curriculum. Graduate students have only one opportunity to repeat a nursing course after strategically withdrawing from the course or not achieving a B- (80%).

If a graduate student has more than one grade below B- (80%), more than one strategic withdrawal, or a combination of a grade below a B- and a strategic withdrawal (in any graduate nursing course other than the pre-licensure courses listed above), the Graduate Academic Standards and Progression Committee will be convened to hear the case and determine the best course of action, including up to dismissal from the nursing program.

Any graduate student who, by the faculty's evaluation, is deemed to have engaged in unsafe clinical practice or who otherwise demonstrates unprofessional conduct in the clinical setting, will be removed from the setting immediately. These behaviors are grounds for failure in any clinical course. In such cases, the Graduate Academic Standards and Progression Committee will be convened to hear the case and determine the best course of action, including up to dismissal from the program.

If a graduate student demonstrates unprofessional conduct in the classroom and/or interactions with BC faculty or staff, or engages in academic dishonesty and/or other ethical violations, including in the conduct of academic research, they will be reviewed by Graduate Academic Standards and Progression Committee to hear the case and determine the best course of action, including up to dismissal from the program.

The Associate Dean of Graduate Programs will notify the student of the outcome of academic review as soon as possible. A student may submit a formal appeal if they believe there has been a procedural violation, a mistake of fact, or an arbitrary or unethical evaluation. See Graduate Students Rights & Grievances – Formal Appeals.

Graduate students who are on notice are not eligible for teaching assistantships, research assistantships, fellowships and/or any type of merit-based tuition remission award.

For the procedure for graduate student grievances and the formal appeals procedure, please refer to the student handbook:

[CSON Graduate Student Handbook 2022-2023](#)

Transfer of Credits

Matriculated graduate students may request permission to transfer in up to 6 credits of graduate course work completed at another regionally accredited graduate university.

To request to have an outside course considered for transfer, the student must email a copy of the course description for electives and course syllabus for core courses to the graduate office. To be considered for transfer, the course must meet all of the following criteria:

1. The course was completed within the past five years.
2. The course was not applied to a prior degree*
3. The student earned a grade of 80% (B-) or better in the course.
4. The CSON TOR and Graduate Associate Dean deem the course equivalent.

*if the course was applied to a prior degree, the student may be approved to Opt-Out of the course, and would have to replace the credits with electives.

If approved for course transfer, the student must submit an official transcript documenting a grade of 80% (B-) or better to the graduate office for processing. The transfer course and credit will be recorded on the student's transcript after the completion of one full semester at Boston College. Once matriculated, only graduate courses taken at Boston College (or consortium) will count towards degree requirements. Core courses (i.e., Boston College Graduate nursing courses) that were taken prior to matriculation may be considered on a case-by-case basis (i.e. an Ethics course completed at BC).

Time to Degree Completion

Students in the M.S. program have five (5) years from initial enrollment to complete their program of study. Students in the DNP program have eight (8) years from initial enrollment to complete their program of study. Students in the Ph.D. program have eight (8) years from initial enrollment to complete all degree requirements, including defending and submitting the final version of the dissertation.

Graduate students may apply for a leave of absence (LOA) for personal reasons, health reasons, or other extenuating circumstances. LOAs are usually granted for one semester; a two semester LOA may be granted under unusual circumstances. Leaves of Absence do not “stop the clock” or extend the program time limits. An exception is made for graduate students who require an LOA due to active military service. Students should contact the Graduate Associate Dean. Graduate students who exceed the program time limits or who fail to make progress

towards their degree will be reviewed by the Graduate Academic Standards and Progressions Committee and may be subject to dismissal from the program.

Financial Aid

Applicants and students should refer to the Connell School of Nursing web page for Financial Aid resources at the [Admission and Aid](#) page. Refer to the Financial Aid section of this Catalog for additional information regarding other financial aid information.

Housing

The Boston College Off-Campus Housing Office offers assistance to graduate students in procuring living arrangements. Please refer to the [Off-Campus Housing](#) website.

Transportation

Precepted clinical practices are held in a wide variety of hospitals, clinics, and health-related agencies and are a vital part of the graduate nursing program. Most of the clinical facilities are located in the greater Metropolitan Boston area, although some are located in the suburbs, eastern Massachusetts, southern New Hampshire, and Rhode Island. Students are responsible for providing their own transportation to and from the clinical facilities.

Graduate Program Contacts in the Connell School of Nursing

The Dean of the School of Nursing is responsible for the overall administration of the school.

Katherine E. Gregory, Ph.D., RN, FAAN

Dean

Office: Maloney 294

Telephone: 617-552-4251

The Associate Deans are responsible for academic and financial administration.

M. Colleen Simonelli, Ph.D., RNC

Associate Dean for Student Services and Professor of the Practice

Office: Maloney 218

Telephone: 617-552-3232

Christopher Grillo

Associate Dean for Finance and Administration

Office: Maloney 294

Telephone: 617-552-8531

The Program Directors are responsible for the direct oversight of their respective APRN programs.

Graduate Clinical Specialty Program Directors

Adult-Gerontology Primary Care Program:

Kellie LaPierre, DNP, GNP-C

Office: Maloney 370

Telephone: 617-552-4270

Family Primary Care Program:

Susan Emery, Ph.D., CRNA
Office: Maloney 234
Telephone: 617-552-6844

Lynch School of Education and Human Development

To enhance the human condition, expand the human imagination, and make the world more just—that’s the mission driving the work of our faculty and students.

We put our mission into action through teaching, research, and service—informing policy, improving practice, and preparing students to serve diverse populations in a variety of roles.

And we define education expansively—as an opportunity to shape the future of humanity and our society. Toward that end, the Lynch School employs the Jesuit, Catholic holistic approach to student formation. We educate our students as whole people so they, in turn, can empower others to prosper and lead full lives.

Enhancing the Human Condition

We recognize that people develop and flourish across many interrelated dimensions: cognitively, emotionally, morally, socially, and spiritually. We prepare our students to transform others’ lives across each of these dimensions and at their intersections.

Expanding the Human Imagination

By providing us with new paradigms and new information, universities have the capacity to spur people to think differently, expanding our approaches to problems and potential solutions. Through education, we progress beyond conventional ways for understanding the world and discover unexpected patterns.

Making the World More Just

As a community of scholars and practitioners, we have an obligation to help people realize their aspirations, increase access to societal opportunities, and lift up those who have fewer advantages. We engage in individuals’ lives and build social contexts that promote justice, equality, and a sense of community.

Introduction to Graduate Programs

Consistently ranked among the top 25 schools of education and as the top-ranked Catholic school of education in the country, the Lynch School at Boston College offers 22 master’s programs, eight doctoral programs, and five dual-degree programs. Theory, research, and practice are integrated across programs, which also leverage the robust practicum opportunities available in schools, hospitals, mental health

centers, and universities in the Boston metropolitan area. The Lynch School's focus on expanding social justice is a hallmark of our programs and the work of our students and faculty.

Admission Information

Information about admission is available on the Lynch School website at bc.edu/lynchschooll. You may also write to: Boston College, Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

The Lynch School admits students without regard to race, ethnicity, religion, age, sex, sexual orientation, marital or parental status, national origin, veteran status, or disability. The Lynch School welcomes the presence of multiple and diverse cultural perspectives in its scholarly community.

Students must be formally admitted to the Lynch School Graduate Programs by a committee composed of faculty and administrators. Students may apply to degree programs or to study as a non-degree or certificate student. Consult the Lynch School admissions website for complete information.

Official notification of admission is made by a written announcement—an online offer of admission—from the Lynch School. Students should not presume admission until they receive this announcement. Admitted students are required to submit a non-refundable deposit of \$250 by the date stipulated in the admission letter. The deposit is applied to tuition costs for the first semester of study.

Application Deadlines

All admission deadlines are posted on the Lynch School website at bc.edu/lynchschooll. In some cases, master's program applications are considered beyond the deadline. While official deadlines are posted for summer/fall start, some programs may consider a spring start. Non-degree applications are considered for summer, fall, and spring start dates. Call the Office of Graduate Admission, Financial Aid, and Student Services at 617-552-4214 or e-mail gsoe@bc.edu for more information.

Deferral of Admission

Admission may be deferred for up to one year for those admitted to master's degree programs. Deferral of admission to doctoral programs is at the discretion of the admitting faculty. Requests to defer admission must be submitted in writing to the Assistant Dean of Graduate Enrollment in the Office of Graduate Admission, Financial Aid, and Student Services and must be approved and confirmed by the Lynch School.

The number of students admitted to Lynch School graduate programs each year is dependent upon the number of deferred students who will be matriculating in a given year. For this reason, the Lynch School requires that students who wish to defer for a semester or a year indicate this at the point of admission and return the response form with a deposit of \$250. This will hold a space in the following year's class and will be credited toward the first semester of study.

Due to the volume of applications received each year by the Lynch School, there can be no assurances of deferred admission or that scholarship aid awarded at the original time of admission will remain available.

Admission for International Students

International Students (non-U.S. citizens who are not permanent U.S. residents) may find information about admission and an online application on the Lynch School website at bc.edu/lynchschooll. Prospective students may also write to: Boston College, Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Ave, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. All international student applicants for whom English is not their first language, or who do not hold a degree from an English-speaking university, must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) examination and request that their score be forwarded to the Lynch School of Education and Human Development by the Educational Testing Service (ets.org). The Lynch School of Education and Human Development's TOEFL code is 3240. Ordinarily, the Lynch School expects a minimum score of 100 on the internet-based TOEFL or a minimum score of 7.0 on the IELTS. Information on exemptions from the English proficiency exams, as well as additional testing information, is

contained in the graduate application materials available on the Lynch School website. Information about these examinations also may be obtained from the Educational Testing Service (ets.org).

Non-Degree Status

Students not seeking a degree, but interested in pursuing course work at the graduate level, may apply for admission as a Non-Degree Student. While there is no guarantee of later admission to a degree program, many individuals choose Non-Degree Status either to explore the seriousness of their interest in studying for an advanced degree and/or to strengthen their credentials for later application for degree status. Others are interested in taking graduate course work for personal enrichment or professional development. Included among those taking courses are school counselors, teachers, administrators, and psychologists who are taking classes as a means of fulfilling professional development requirements or continuing education units.

Students seeking Non-Degree Student status must submit the online application form on the Lynch School admissions web page.

Although there is no limit on the number of courses Non-Degree Students may take, no more than four courses (12 semester hours), if appropriate, may be applied toward a degree program in the Lynch School. Courses taken as a Non-Degree Student may be applied to a degree program only after official acceptance into a degree program and with the consent of the student's advisor.

Due to space limitations, all courses may not be available to Non-Degree Students. Practicum coursework associated with teacher licensure or counseling psychology licensure is reserved for matriculated degree students in these programs. Students who wish to become certified or licensed must gain admittance to a graduate degree program in the desired area. Other courses are restricted each semester to maintain class size. Individuals considering Non-Degree Student status may seek advising from the Office of Graduate Admission, Financial Aid, and Student Services. Non-Degree Students are not eligible for University sponsored sources of financial aid or any financial aid that requires matriculation in a degree program.

Fifth Year/Early Admit Programs

The Fifth Year Program and Early Admit Program offer academically outstanding Boston College juniors a unique opportunity to begin graduate study during their undergraduate senior year, allowing them to graduate with a bachelor's and a master's degree in a shortened amount of time. All undergraduate juniors in the Lynch School of Education and Human Development, Morrissey College of Arts and Sciences, Connell School of Nursing, and Carroll School of Management are eligible to apply for these programs.

In consultation with an advisor, students have the ability to take up to two graduate-level courses in their senior year. In addition to the time advantage, there is a considerable savings involved. Students accepted in the Fifth Year/Early Admit program will be able to apply two approved graduate courses (6 credits) towards both their bachelor's degree (120 credits) and their master's degree (30 credits or more).

Upon successful completion from the undergraduate program, senior year coursework and the additional graduate-level courses are reviewed and a determination about formal admission into the graduate program is made. In the spring semester of their senior year, Fifth Year/Early Admit students will receive an official offer of admission to the Lynch School Graduate Program.

Students interested in the Fifth Year/Early Admit Program should contact the Office of Graduate Admission, Financial Aid, and Student Services in Champion Hall 135 or at 617-552-4214. Students can also e-mail gsoe@bc.edu and learn more at the [Fifth Year/Early Admit Program](#) page.

Financial Aid

Students admitted to Lynch School graduate programs are eligible to access several forms of financial aid opportunities, including Lynch School scholarships and fellowships, graduate assistantships, research assistantships, teaching fellowships, teaching assistantships, Federal loans and work-study, and private loans.

Lynch School scholarships and fellowships are tuition remission scholarships offered to incoming students that have been identified for being exceptionally promising in their chosen fields of study and for contributing to our student body's diversity—including intellectual, economic, racial, cultural, geographical, and gender.

Scholarship and fellowship awards are offered at the time of the admission decision and are based solely on materials submitted in a completed application. No additional application or materials are required.

Applicants that have submitted a complete application by the December 1 or early January deadlines will receive the strongest consideration for these awards.

Many offices and departments in the Lynch School and across campus hire graduate students and provide assistantships for work in their area. The work varies by department, but may include a stipend, tuition remission, or both. The levels of stipend and/or tuition remission vary by individual roles. Because each individual assistantship is supervised by a specific department on campus, deadlines vary based on the needs and availability of individual supervisors and/or departments.

The University's Financial Aid Office administers the Federal loan programs, which include Unsubsidized Stafford loans, Perkins loans, and work-study. If you are applying for any of these loan programs through Boston College, please consult the [Office of Student Services Graduate Financial Aid](#) web page.

Sources of external scholarship funding may be obtained through outside sources such as local civic organizations, religious organizations, educational and research foundations, or banks. Applicants are advised to do an internet search for potential external scholarships.

Urban Education Funding

Donovan Urban Teaching Scholars Program

Donovan Urban Teaching Scholars is an intensive one-year master's degree program in teacher preparation. Each year, the program recruits and supports a cohort of up to 30 graduate students. Students in this program:

- Receive tuition remission covering a minimum of 50% to a maximum of 100% of tuition costs for the M.Ed. degree
- May be eligible for the Sharp Urban Teaching Scholarship, which provides additional financial support to highly talented graduate students who are from underrepresented groups and are committed to teaching in urban schools.

Details on the Donovan Urban Teaching Scholarship can be found on the Lynch School [Donovan Program](#) website.

Urban Catholic Teacher Corps (UCTC)

Urban Catholic Teacher Corps is an academically rigorous and experientially rich, Catholic school teacher preparation program that prepares students to be excellent Catholic school teachers who are actively engaged in the ministry of teaching urban students in the Roman Catholic Archdiocese of Boston. Participants live together, actively engaging in an intentional faith-based living and learning community where faith is actively incorporated, individuals are loved and supported, and all experiences and perspectives are shared and respected. All students in this program:

- Receive 100% tuition coverage for the M.Ed. degree in Curriculum and Instruction
- Have all rent and utilities paid for in the required UCTC community housing.
- Receive a \$600 pre-tax stipend per month over the two years of program participation to cover living expenses. The Lynch School Catholic Education Award provides partial tuition assistance to students who are currently working in Catholic schools.

There is a separate application and additional requirements for UCTC. Please note that the application deadline is also earlier than the normal deadline for teacher education programs.

Licensure and Program Accreditation

Many of the teacher education and administration programs offered by the Lynch School have been designed to comply with current standards leading to initial and professional licensure for educators in the Commonwealth of Massachusetts. Through the University's accreditation by the Interstate Certification Compact (ICC), a program of study preparing for educator licensure in Massachusetts, will also provide graduates, through reciprocity, with facilitated opportunities for licensure in most other states. Licensure is granted by the state, and requirements for licensure are subject to change by the state. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL). Especially in the case of out-of-state students, it is the responsibility of the student to plan a program

that will lead to licensure in a given state. Staff in the [Office of Field Placement and Partnership](#) Outreach (Campion 102, 617-552-4206, prac@bc.edu) can help with most teacher and administrator licensure questions. The teacher education programs at Boston College are accredited by both the Commonwealth of Massachusetts Department of Elementary and Secondary Education (DESE) and nationally by the Teacher Education Accreditation Council (TEAC).

Mental health and school counselor licensure questions should be addressed to the Office of Graduate Admission, Financial Aid, and Student Services at 617-552-4214. The 60-credit M.A. in Mental Health Counseling fulfills the educational requirements for licensure as a mental health counselor in Massachusetts, and the M.A. in School Counseling meets the educational requirements for licensure in school counseling in Massachusetts. Students seeking school counseling licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL). Students are encouraged to check the requirements for the states in which they eventually hope to obtain licensure.

The School Counseling sequence is designed to meet the professional standards recommended by the Interstate Certification Compact (ICC), Massachusetts Department of Education. This sequence is designed to meet the educational requirements for licensure as a school counselor in the state of Massachusetts. Licensure is granted by the state Department of Education and requirements are subject to change by the state. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure.

The 60 credit-hour Mental Health Counselor sequence of study reflects the professional standards recommended by the American Counseling Association and the Massachusetts Board of Allied Mental Health and Human Services Professionals. This sequence is designed to meet the pre-master's educational requirements for licensing as a Mental Health Counselor in the state of Massachusetts. Licensing is granted by the Massachusetts Board of Allied Mental Health and Human Service Professionals and the requirements are subject to change by the state. Students, for all programs, should check the requirements in other states where they may choose to live and work.

The doctoral program in Counseling Psychology is fully accredited by the American Psychological Association.

Degree Programs

Through its various graduate programs, the Lynch School offers the M.Ed., M.A., M.S., M.A.T., M.S.T., Ph.D., and Ed.D. degrees. The Lynch School also offers programs leading to a Certificate of Advanced Educational Specialization (C.A.E.S.). Our graduate programs serve a dual purpose:

- Research: Preparing students in research-based knowledge of their profession with specialized competence in the evaluation of educational and psychological innovations, and in basic and applied quantitative and qualitative research methodologies.
- Practice: Preparing students to apply knowledge in appropriate areas of specialization to practice in both academic and nonacademic settings.

Doctoral Degree Programs

General Requirements for the Degree of Doctor of Philosophy

The Ph.D. is granted for distinction attained in a special field of concentration and demonstrated ability to modify or enlarge a significant subject in a dissertation based upon original research. Doctoral studies are supervised by the student's advisor, department chairperson, and the Associate Dean of Students. The Ph.D. is granted in the Lynch School in the following areas:

- Curriculum and Instruction
- Formative Education
- Higher Education
- Counseling Psychology
- Applied Developmental and Educational Psychology
- Measurement, Evaluation, Statistics, and Assessment

Upon admission to a doctoral program, the doctoral student will be assigned an academic advisor. The Doctoral Program of Study should be designed by students in consultation with their advisors during the first or second semester of coursework. A formal Program of Study must be filed with the student's advisor and the Academic Department Office. Programs of Study for all programs are available on the Lynch School's website at bc.edu/lynchschoo.

Doctoral students in the Lynch School, in addition to coursework, complete comprehensive exams before being admitted for doctoral candidacy. Doctoral students also complete a doctoral dissertation. Current information on policies and procedures regarding doctoral degree programs is provided online at the [Doctoral Policies and Procedures](#) page.

General Requirements for the Degree of Doctor of Education

The Professional School Administrator Program (PSAP) provides an opportunity for full-time administrators to obtain their Massachusetts superintendent licensure and a Doctor of Education (Ed.D.) degree in Educational Leadership. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for learning, social justice, diversity, anti-racism, and community building.

The intensive, three-year program is taught by full-time university faculty and knowledgeable, skilled school leaders, with personalized support for students from mentor superintendents.

The Executive Ed.D. in Higher Education develops justice-minded leaders with the skills, mindsets, and technical knowledge to match the changing pace of higher education. The innovative, data-informed curriculum emphasizes socially just leadership that is transformational, mission-driven, and focuses on iterative design-thinking, which equips graduates with the skills and agility to effect lasting change.

Designed for experienced administrators, with a minimum of five to ten years of experience in higher education, this part-time, three-year program pairs online coursework during the academic year with in-person week-long summer residencies. The program culminates in a practice-based capstone project that integrates content across the curriculum.

Certificate of Advanced Educational Specialization (C.A.E.S.)

The C.A.E.S. course of study is designed for currently practicing educators who already have a master's degree and seek a higher level of specialization in Curriculum and Instruction or professional licensure in administration. For further information on C.A.E.S. programs in Educational Leadership, Special Education, Reading/Literacy, and Curriculum and Instruction, contact Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone at 617-552-4214, or e-mail gsoe@bc.edu.

Master's Degree Programs

While candidates may apply to master's programs while still completing an undergraduate degree, candidates must be graduates of an accredited college or university by their program's start date. The Office of Graduate Admission, Financial Aid and Student Services, Campion 135, provides academic and financial aid services for master's students throughout their studies in the Lynch School.

Master of Education Degree (M.Ed.)

The Master of Education is awarded in the following areas:

- Early Childhood Education
- Elementary Education
- Secondary Education
- Special Education*
- Curriculum and Instruction
- Global Perspectives: Teaching, Curriculum, and Learning Environments
- Educational Leadership and Policy
- Jesuit Education in a Global World

*The M.Ed. program in Special Education includes the following areas of concentration: Moderate Support Needs, Grades Pre-K–8 and Grades 5–12, Students with Extensive Support Needs Pre-K–12.

Master of Arts in Teaching and Master of Science in Teaching Degrees (M.A.T./M.S.T.)

M.A.T. and M.S.T. for Initial Licensure

The M.A.T./M.S.T. Initial Licensure programs are designed for students who have graduated with a major in liberal arts or sciences and who wish to prepare for teaching in the secondary school, for experienced teachers in secondary schools who do not yet hold a license, and for recent college graduates already prepared to teach at the secondary level who want to earn an additional area of expertise and/or licensure. These degrees are coordinated with the appropriate Graduate School of the Morrissey College of Arts and Sciences department and require more coursework in Arts and Sciences than the M.Ed. degree in Secondary Teaching. Only one application to the Lynch School is necessary for admission.

Students may prepare in the following disciplines: Biology, Chemistry, Earth and Space Science, English, History, Mathematics, or Physics.

Programs are described under the section of this manual on programs in Teacher Education/Special Education and Curriculum and Instruction.

Master of Arts Degree (M.A.)

The Master of Arts degree is given in the following areas:

- Higher Education
- School Counseling
- Mental Health Counseling
- Research and Evaluation Methods

Master of Science Degree (M.S.)

The Master of Science degree is given in the following area:

- Applied Statistics and Psychometrics
- Data Science

These programs are described in each departmental section of this catalog.

Course Credit

A minimum of 30 graduate credits is required for a master's degree. Specific programs may require more credits. No formal minor is required. All graduate students cannot transfer more than six graduate credits from another institution. Only courses in which a student has received a grade of B or better, and which have not been applied to a prior degree, will be accepted. If approved, the transfer course and credit, but not the grade, will be recorded on the student's academic record. Credit received for courses completed more than ten years prior to a student's admission to his or her current degree program are not acceptable for transfer. A Masters Transfer Request Form should be completed and signed by the student's academic advisor and then sent, along with an official transcript from the institution, to the Office of Graduate Admission, Financial Aid, and Student Services.

Programs of Study

In the second semester of matriculation, students must complete a Program of Study in consultation with their academic advisor and/or the Associate Director of Student Services in the Office for Graduate Admission, Financial Aid, and Student Services. Program of Study forms are available on the Lynch School website at the [Master's Program](#) page. These forms must be approved and filed with the Associate Dean of Students.

Department of Teaching, Curriculum, and Society

The Department of Teaching, Curriculum, and Society (TCS) prepares educational leaders for instructional and administrative roles in public and private schools, in institutions of higher education, and in related organizations. The intent is to provide a blend of scholarship, disciplined inquiry, and professional experiences that will develop the sound understanding, practical skills, ethical values, and social responsibilities that are required of competent educators.

Student programs are individualized under the guidance of a faculty advisor, with special consideration given to each student's career goals and licensure requirements. The list of specific courses required for each program is available on the Lynch School website under Programs of Study.

Areas of Concentration

Programs and courses in Teacher Education are designed to prepare educators in the areas of elementary and secondary teaching, early childhood education, and special education. In addition, master's programs are available in Curriculum and Instruction and Global Perspectives, along with a doctoral program in Curriculum and Instruction. Teacher preparation programs are designed for individuals interested in working in elementary and secondary schools, both public and private, as well as early childhood and special needs programs and facilities. The Lynch School prepares outstanding teachers in both theoretical and practical dimensions of instruction. The doctoral program in Curriculum and Instruction prepares students for college and university teaching, research positions, and/or school leadership positions.

Master's candidates can include the Teaching English Language Learners (TELL). TELL prepares educators to teach bilingual learners in English-only classrooms, while the certificate requires students to complete EDUC7621 Bilingualism, Second Language and Literacy Development and EDUC6346 Teaching Bilingual Students, as well as requires students to work with English language learners in English-only or Dual-Language classrooms, respectively.

Licensure

Endorsement of candidates for initial Massachusetts teaching licensure is a collaborative effort between the student's Lynch School supervisor and cooperating teacher. The Lynch School offers graduate programs designed to prepare students for teaching licensure at the master's and C.A.E.S. levels. A student seeking licensure must be admitted as a degree candidate. Programs are approved by the Interstate Certification Compact (ICC), allowing students easier access to licensure outside Massachusetts.

The following are licenses available from the state department of Massachusetts through completion of a Lynch School program:

- Early Childhood Teacher
- Elementary Teacher
- Secondary Education Teacher of English, Mathematics, History, Physics, Chemistry, Biology, and Earth Science
- Specialist Teacher of Students with Moderate Support Needs (pre-K–8, 5–12)
- Specialist Teacher of Students with Extensive Support Needs (pre-K–12)

Note: Students who plan to seek licensure in states other than Massachusetts should check the licensure requirements in those states. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL).

Practicum Experiences

Practicum experiences are an essential part of the curriculum in licensure programs and should be planned with the respective faculty advisor early in the student's program. Practicum experiences for licensure in Teacher Education are offered at the Initial Licensure level for Massachusetts. Students seeking licensure in Massachusetts also must pass the Massachusetts Tests for Educator Licensure (MTEL).

All field experiences for students enrolled in Lynch School degree programs are arranged and approved through the [Office of Field Placement and Partnership Outreach](#) (Campion 102, 617-552-4206, prac@bc.edu).

The following are prerequisites for students who are applying for practica and clinical experiences:

- GPA of B or better (3.0 or above)
- Satisfactory completion of required pre-practica or waiver from the Assistant Dean, Field Placement
- Completion of 80 percent of the course work related to required Education courses, including methods courses in the content area and courses required for initial licensure
- Application in the Office of Field Placement and Partnership Outreach

A full practicum is characterized by the five professional standards as required by the Massachusetts Department of Education. Student teachers must demonstrate competence in these five standards during their practicum experience: plans curriculum and instruction, delivers effective instruction, manages classroom climate and operation, promotes equity, and meets professional responsibilities.

If, for any reason, a student is unable to complete the full practicum, an extended practicum (additional time in the field) will be required by arrangement of the Assistant Dean, Field Placement.

Placement sites for local field experiences are in Boston and neighboring areas. Students are responsible for providing their own transportation to and from these schools. Transportation to schools often requires that the student have a car; however, some schools are accessible by public transportation. Carpooling is encouraged. If transportation cannot be independently arranged, students will be given preference for locations that are accessible via public transportation.

Teaching, Curriculum, and Society Programs

Master of Education (M.Ed.) in Early Childhood Education

The master's degree program in Early Childhood Education focuses on developmentally appropriate practices and critical thinking skills. This program is appropriate for students who wish to be prepared to teach children who are typically developing as well as children with moderate disabilities in a general education, pre-K–2 classroom. Students can enter the program without teaching licensure. The prerequisite for either program is a college degree with an Arts and Sciences major or equivalent. Students who have majored in other areas, such as business or engineering, should consult the Office of Graduate Admission, Financial Aid and Student Services.

At completion of the program, students will be able to demonstrate:

- The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.
- The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.
- The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled and collaborative practice.
- The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.
- The teacher candidate will identify policies and practices that contribute to systemic inequities in education and be aware of how his or her own background experiences are influenced by these systems, and recognize a professional responsibility to promote and practice principles of social justice teaching.

Master of Education (M.Ed.) in Elementary Education

The Elementary Education program leads to licensure in grades 1–6. The program stresses a humanistic approach to teaching that is both developmentally appropriate and intellectually challenging. Graduate students participating in the Elementary Education program will learn to promote student development, how to teach for social justice, and how to reflect on practice to improve instruction. They will be prepared to work with students of a variety of backgrounds creating classroom environments that engage all students.

At completion of the program, students will be able to demonstrate:

- The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing the student performance and growth data, using the data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.

- The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, demonstrate cultural proficiency, and knowledge about language challenges in academic settings.
- The teacher candidate will promote the learning and growth of all students through ethical, cultural proficient, skilled, and collaborative practice.
- The teacher candidate will demonstrate an inquiry stance by collecting and reporting data on pupil outcomes for the purpose of assessing, teaching, and modifying instructional practice.
- The teacher candidate will identify policies and practices that contribute to systemic inequalities in education and be aware of how his or her own background experiences are influenced by these systems, and recognize a professional responsibility to promote and practice principles of social justice teaching.

The prerequisite for the program is a bachelor's degree with an Arts and Sciences or interdisciplinary major or equivalent. No prior teaching licensure is required for admission. The program of study includes foundations and professional courses, and practicum experiences. Courses of study are carefully planned with the faculty advisor to ensure that both degree requirements and licensure requirements are fulfilled.

For the applicants seeking a master's in Elementary Education, undergraduate transcripts will be audited for mathematics courses. It is expected that applicants have completed a two 3-credit mathematics course equivalent in Arts and Sciences. If applicants do not fulfill this requirement, they will be advised to take the needed courses.

Master's Programs (M.Ed., M.A.T., M.S.T., and C.A.E.S.) in Secondary Education

Students in secondary education can pursue either a Master of Education (M.Ed.), a Master of Arts in Teaching (M.A.T.), or a Master of Science in Teaching (M.S.T.). These degree programs lead to (8–12) licensure in one of the following disciplines: Biology, Chemistry, Earth and Space Science, English, Foreign Language (Spanish or French), History, Mathematics, or Physics.

Upon completion of the program in Secondary Education graduates will be able to:

- The teacher candidate will promote the learning and growth of all students by providing high-quality and coherent instruction, designing and administering authentic and meaningful student assessments, analyzing student performance and growth data, using this data to improve instruction, providing students with constructive feedback on an ongoing basis, and continuously refining learning objectives.
- The teacher candidate will promote the learning and growth of all students through instructional practices that establish high expectations, create a safe and effective classroom environment, and demonstrate cultural proficiency.
- The teacher candidate will promote the learning and growth of all students through effective partnerships with families, caregivers, community members, and organizations.
- The teacher candidate will promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.
- The teacher candidate will promote an inquiry stance of critical reflection about personal practice through individual and collaborative inquiry in service of improving pupil academic, emotional, and social learning.

The prerequisite for the program is a bachelor's degree with a liberal arts major in the field of desired licensure or an equivalent. Students who do not have the prerequisite courses must take discipline area courses before being admitted into a degree program. All prerequisite courses must be taken before taking the practicum. Check with the Office of Graduate Admission, Financial Aid, and Student Services (617-552-4214; gsoe@bc.edu) if you have questions.

In addition to required courses in the field of education, secondary education master's degrees require a number of courses taken at the graduate level in the Morrissey College of Arts and Sciences department of specialization. M.Ed. students take a minimum of two graduate courses, and M.A.T./M.S.T. students take five graduate courses in their disciplinary area. Courses of study are carefully planned with a faculty advisor. All of the master's programs leading to licensure in secondary education include practicum experiences in addition to coursework. M.A.T./M.S.T. applicants file only one application to the Lynch School. All Lynch School admissions requests should be addressed to Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Master of Education (M.Ed./C.A.E.S.) in Curriculum and Instruction

The master's degree program in Curriculum and Instruction consists of a planned program with a minimum of 30 graduate credit hours. Four courses in Curriculum and Instruction are required. Programs of study are planned in consultation with a faculty advisor to meet each candidate's career goals and needs. A variety of areas of concentration are available for students to select.

This degree program does not lead to licensure, nor are students in this program eligible to apply for supervised practicum experiences. This program is for:

- U.S. students who already possess an initial license and want to enhance learning further in their area of licensure;
- International students who wish to engage with foundational and leading edge thinking and thinkers on curriculum, pedagogy, and educational reform;
- All candidates who want to explore new areas of interest such as policy, teacher leadership, teaching English Language Learners, universal design for learning, assessment, and special education;
- Students interested in Curriculum Design and Instructional Design;
- Private school educators, Boston College students enrolled in the fifth-year program, and educators from areas such as publishing, curriculum design, and museum education;
- Classroom teachers who wish to become educational leaders in their schools and districts.

At the completion of the program, students will be able to:

- Develop and clarify their philosophy of education, in particular, their beliefs regarding the purposes and processes of effective curricular organization;
- Become familiar with different ways to conceptualize a school curriculum and with major curriculum designers, both past and present;
- Assess their own experiences with educational and curricular change as a means to gain greater insight into educational and institutional change processes writ large;
- Examine approaches to multicultural education, anti-racist education, and inclusion that aim to transform the curriculum;
- Explore the tensions and possibilities that face teachers day-in and day-out in the current social and political context;
- Learn alternative strategies for assessment that provide multiple and authentic measures of student learning;
- Analyze existing curricula in terms of various philosophical orientations;
- Examine implications and applications of learning theories as drawn from teachers in elementary and secondary schools as well as from professionals working in higher education and contexts outside of formal schooling;
- Consider how school curricula and pedagogical practices can be structured to promote social justice and democratic citizenship.

Special Education Licensure Programs

Master of Education (M.Ed./C.A.E.S.) in Special Education in Moderate Support Needs, Grades Pre-K–8 and Grades 5–12

This program prepares teachers to work with students with mild to moderate disabilities (also known as high incidence disabilities) such as: attention deficit/hyperactivity disorder, specific learning disability, emotional and behavioral disorders, and mild developmental disabilities—including autism spectrum disorders. Based on the program option they select, students will learn about assessment and instructional practices at the elementary or secondary schooling levels, consistent with teacher licensure options in Massachusetts and many other states.

The goal of the program is to prepare teachers to work in a variety of roles including: lead teacher, special education teacher, and learning specialist, as well as to collaborate with general education regular teachers and educators, other services providers and parents. The program leads to initial licensure. Students who have not earned general education licensure will be required to take additional courses. At completion of the program, students will be able to demonstrate:

- How to develop learning goals and experiences responsive to the developmental and learning needs of students with special needs, including ways that are responsive to language, cultural, and family backgrounds;
- How to work collaboratively with students and professional colleagues in a variety of instructional settings;
- How to plan individually-appropriate curriculum through the IEP as well as in inclusive classroom settings;

- How to use formal and informal assessments to plan instruction for pupils in ways that reduce bias and to monitor learning progress;
- How to use evidence-based practices to advance the learning of students with disabilities. Practices will include uses of technology and augmentative and alternative communication;
- How to plan for and work with students and colleagues for successful transition preparation;
- How to use ethical and professional practices that respond to language, cultural, and familial diversity.

Applicants who have completed a regular education preparation program can enter directly into the program. Applicants with no previous regular education preparation program must apply for both regular and special education programs. For this reason, students become licensed in regular and special education. Financial aid is available in the form of paid internship experiences in local school systems and in some private schools.

Master of Education (M.Ed./C.A.E.S.) in Special Education for Extensive Support Needs, Pre-K–12

The Boston College program in Severe and Multiple Disabilities prepares teachers to work with students who have moderate to severe intellectual disability, autism, and additional disabilities (such as visual impairment, deafness, cerebral palsy, and medical conditions). The program leads to eligibility for the Massachusetts teaching license in Severe Disabilities. A specialization in autism is available. No prior teaching license is required for admission. The Program of Study includes two routes, one for those who already have a teaching license (in any area) and one for those who do not. The Severe and Multiple Disabilities Program is founded on close linkages between current research and best practices in teaching. Students may be enrolled on a full or part-time basis. At completion of the program, students will be able to demonstrate:

- How to teach to the strengths and needs of all students with severe disabilities, including those with additional sensory disabilities;
- How to implement evidence-based practices and best practices to apply when assessing and teaching children with severe and multiple disabilities;
- How to be fully competent in writing the appropriate sections of the Individualized Education Plan (IEP) and as a participant in associated meetings;
- How to select assessment instruments appropriate to each child and to conduct assessments to produce findings that support valued and meaningful instruction;
- How to engage parents in the planning and generalization of their child’s educational program;
- How to plan, implement, and evaluate comprehensive communication systems in collaboration with others;
- How to teach content from the general curriculum as well as functional academics, skills of daily living, prevocational and vocational skills, play and social-emotional competencies to address the needs of the whole child;
- How to keep meaningful data on student learning and behavior and to make data-based decisions;
- How to create learning environments that promote engagement and learning;
- How to promote the learning and growth of all students through ethical, culturally proficient, skilled, and collaborative practice.

For those students employed in approved Intensive Special Needs programs, practicum requirements are individualized and may be completed within the work setting. The program of study expands on and builds upon a prerequisite education foundation through the development of competencies that are research and field-based and consistent with the highest professional standards of the field.

Master of Education (M.Ed.) in Global Perspectives: Teaching, Curriculum, and Learning Environments

This program is for teachers who see how the world is changing. They believe deeply in the mission and potential of equitable education and want to be able to prepare their students for the future. The program will explore educational viewpoints across a wide range of cultures and countries. Based on these perspectives, graduates will learn how to design effective curriculum to serve diverse and increasingly globalized student populations and improve the common good. Through conducting a problem-solving form of research involving one or more cycles of

actions and reflection—drawing both on international research perspectives and generating solutions in local contexts—graduates will develop valuable collaborative action research skills. The program welcomes the participation of individuals or teams of educators ready to collaborate. Teachers and other educational professionals with a bachelor's degree and two or more years of professional experience in schools and other educational related settings preferred. The program can be completed totally online. Graduates from the Global Perspectives program will learn to:

- Develop self-knowledge, meaning, and a sense of purpose as an educator;
- Create effective learning environments (through curriculum design and instructional practice) that reflect an increasingly globalized student population;
- Identify, pose, and solve education problems, and assess opportunities;
- Apply action research studies in response to authentic problems encountered in a variety of educational settings;
- Contribute to and access a robust collaborative network of educators working to address today's educational challenges.

Teaching English Language Learners (TELL) Certificate Program

For Candidates in a Licensure Program

All students who successfully complete a teacher licensure program in the Lynch School will earn the required Massachusetts Sheltered English Immersion (SEI) Endorsement. This SEI endorsement meets state regulations for working with bilingual learners/English language learners as a core academic teacher in Massachusetts. In addition, however, Lynch offers the option of the Teaching English Language Learners (TELL) Certificate Program, a deeper and more extensive preparation for working with bilingual learners/English Language Learners. For candidates in a licensure program, this entails adding one course: EDUC7621 Bilingualism, Second Language and Literacy Development for graduates. All TELL certificate program participants are strongly encouraged to work with ELLs in their full practicum sites.

For Candidates in a Non-Licensure Program

Students who are not enrolled in a teaching licensure program may also complete the TELL certificate program. These students complete EDUC7621 Bilingualism, Second Language and Literacy Development as well as EDUC6346 Teaching Bilingual Students and are required to work with English language learners in an instructional setting. The TELL certificate program for students who are not enrolled in a licensure program is ideal for candidates seeking to work with English language learners abroad or in contexts in the United States where Massachusetts SEI Teacher Endorsement is not required. For more information please contact Dr. Mariela Paez, paezma@bc.edu or Dr. Anne Homza, anne.homza@bc.edu.

Donovan Urban Teaching Scholars Program

The Donovan Urban Teaching Scholars program is open to master's students specifically interested in urban teaching. To qualify for the program, students must be accepted into one of the Master of Education licensure programs in teaching listed above. All Donovan Scholars must complete a teacher education program in Early Childhood, Elementary, Secondary, or Moderate Special Needs. A cohort of 30 students is selected each year from students applying to an M.Ed. teacher licensure program and financially supported from the Donovan Scholars program, which provides a minimum of 50% tuition remission.

Master of Education (M.Ed.) in Jesuit Education in a Global World

Boston College's new online master's program prepares students to be excellent teachers in the Ignatian tradition—reinforcing Jesuit values of social justice, formation, and reflection. Students emerge ready to thrive in traditional and non-traditional global education settings.

Jesuit Studies courses prompt students to learn about the Jesuit and Ignatian teaching traditions and inspirations, while Global Perspectives courses provide the international lens that will enable these educators to best meet the needs of their students. The breadth of content in the Global Perspectives courses also allows students to select courses based on their interests and needs.

This program consists of 12 courses for a total of 30 credits and may be completed in one and a half to two years. The program is fully online. Students have the option to take two electives that include in-person experiences. This degree program does not lead to licensure.

Certificate of Advanced Educational Specialization (C.A.E.S.)

The C.A.E.S. course of study is designed for currently licensed educators who already have a master's degree and seek a higher level of specialization in Curriculum and Instruction. For further information on the C.A.E.S. program in Curriculum and Instruction, contact Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135,140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Doctor of Philosophy (Ph.D.) in Curriculum and Instruction

The doctoral program in Curriculum and Instruction is for people who hold, or plan to assume, leadership positions in curriculum, instruction, and teacher education in schools, school systems, or other related instructional environments. It is also designed for candidates who are preparing for a career in curriculum and instruction or teacher education at the college, university, or staff development level.

Courses and related program experiences are designed to develop scholarly methods of inquiry in teaching, teacher education, curriculum development and evaluation, and professional development. There is a complementary emphasis on designing and researching effective instruction. Students who plan to work in school settings may pursue programs that will help them develop expertise in several areas of instruction such as mathematics, literacy, technology, science, history, or combinations thereof. Students who plan to work at the post-secondary level may pursue specialties in curriculum or teacher preparation in a specific subject area.

The program of study requires a research core that will familiarize students with quantitative and qualitative research methodology and develop the candidate's expertise for analyzing and conducting research. Also required are advanced-level core courses in curriculum and teaching theory, research, and practice.

Upon graduation, Ph.D. students in our program should be able to:

- Students will demonstrate knowledge of effective practices regarding college-level teaching and/or professional development with in-service teachers.
- Students will demonstrate the ability to conduct original, empirical and/or conceptual research related to topics in curriculum and instruction.
- Students will participate in regional, national and/or international conferences in the broad areas of curriculum and instruction.
- Students will learn how to create an academic paper at the "publishable" level of quality on a topic related to the student's area of specialization within the broad field of curriculum and instruction.

Programs of study are carefully planned on an individual basis to help candidates meet their goals related to scholarship, professional, and career paths. Throughout their doctoral programs, candidates work closely with faculty in research and teaching activities related to one of four areas of specialization: Language, Literacy, and Culture; Critical Perspectives on Schooling: Race, Class, Gender, Disabilities Specialization; Leadership, Policy, and Educational Change; and Math, Science, and Technology.

Department of Formative Education

An unprecedented venture in American higher education, the Department of Formative Education (DFE) is devoted to the interdisciplinary exploration of questions at once perennial and pressing: How do we educate whole persons for meaningful lives? How do we cultivate community? How do we nurture vision and values? In DFE, faculty conduct groundbreaking research on the cultivation of character, the expansion of imagination, and realization of purpose.

Through An Expansive View of Education, we propose that:

- Education involves both knowing and doing: understanding the world and changing it.
- Education goes beyond the transmission of discrete knowledge and skills to encompass the transformation of the whole person.
- Education must address the full scope of our humanity: intellectual and practical, moral and civic, aesthetic and spiritual.
- Education in school is just one aspect of a life-wide and lifelong formative process.
- Education is not a technical matter of finding efficient means to given ends, but calls for judgment about the worthiness of the ends themselves.

Doctor of Philosophy (Ph.D.) in Formative Education

Drawing faculty from the diverse disciplinary traditions of history and philosophy, anthropology and humanistic psychology, design thinking and the learning sciences, this program prepares future scholars and practitioners to examine the normative dimensions of formal and informal education, the development of the whole human being in sociocultural context, and the grand social challenges that now demand a fuller educational response.

The Ph.D. in Formative Education consists of 14 courses equal to 54 credits and includes an ongoing colloquium. Students with a master's degree are expected to complete the program in 4–5 years. Students without a master's degree are expected to complete the program in 5–7 years.

Department of Educational Leadership and Higher Education

The Department of Educational Leadership and Higher Education prepares educational administrators and leaders of educational institutions ranging from pre-schools, to K-12, public, Catholic, charter schools to universities, to post graduate institutions. Graduates are prepared to bring perspectives from sociology, psychology, history, and philosophy, as well as social justice and public policy to their analysis and articulation of educational issues. Course work and field-based learning experiences develop reflective practitioners who integrate theory with practice. Courses in the department encompass these primary themes:

- Social justice
- Diversity
- Reflective practice
- Partnerships and collegiality

Courses in the various programs of study explore how economic, societal, political, and global forces change the way people think about schooling, educational leadership, and the post-secondary administration. To keep up with the constantly changing world there have been broad shifts in the knowledge and skills required of educational leaders today:

- From technical skills to interpersonal skills
- From command and direction to consensus building and motivating
- From resource allocation to being accountable for learning processes and outcomes
- From campus administrators to coordinator of institutional and community services
- From policy recipient to shaping and informing policy

These shifts have been reflected in courses throughout the Educational Leadership and Higher education programs. The list of specific courses required for each program is available on the Lynch School website under Programs of Study.

Programs in Educational Leadership

Master of Education (M.Ed.) in Educational Leadership and Policy

The Master of Education (M.Ed.) in Educational Leadership and Policy prepares graduates to assume leadership roles both within schools and within the greater community. Prospective applicants are diverse; they include educators, policymakers, religious officials, community-based organizers, and professionals seeking to make meaningful changes in the field of education. Often, applicants have a background in teaching and aspire to expand their leadership beyond the classroom. While teachers work directly with students, educational leaders work to determine the systems serving students.

The program, characterized by discernment and critical reflection, aims to educate the whole person to live a life of meaning and purpose. Drawing on social-justice values and leadership strategies, graduates will inform organizational cultures and processes, boldly improving equitable opportunities for traditionally marginalized students. Graduates, trained in critical inquiry and the use of evidence, will approach student development from a holistic perspective, engaging the whole community to support the whole child. The program can be completed fully online or as a hybrid program.

We serve both students who are seeking a master's degree as well as students who are looking to obtain additional training but do not require a master's degree.

The M.Ed. in Educational Leadership and Policy is a program approved and monitored by the Department of Elementary and Secondary Education in Massachusetts (DESE). Formal learning outcomes were developed by the DESE and apply to all students, whether or not they are seeking licensure. They are as follows:

- **Instructional Leadership:** The school leader promotes the learning and growth of all students and the success of all staff by cultivating a shared vision that makes effective teaching and learning the central focus of schooling.
- **Management and Operations:** The school leader promotes the learning and growth of all students and the success of all staff by ensuring a safe, efficient, and effective learning environment, using resources to implement appropriate curriculum, staffing and scheduling.
- **Family and Community Engagement:** The school leader promotes the learning and growth of all students and the success of all staff through effective partnerships with families, community organizations, and other stakeholders that support the mission of the school and district.
- **Professional Culture:** The school leader promotes success for all students by nurturing and sustaining a school culture of reflective practice, high expectations, and continuous learning for staff.

Graduates from the Educational Leadership and Policy program will learn to:

- Practice critical self-reflection and discernment.
- Foster an ethical, mission-driven school or educational environment/organization.
- Create structures that advance organizational and professional learning.
- Observe, assess, and support effective teaching and instructional practices.
- Advance equity and agency across multiple constituencies.

Certificate of Advanced Educational Specialization Degree Program (C.A.E.S.)

The C.A.E.S. course of study is designed for currently practicing educators who already have a master's degree and who do not plan to pursue a doctoral degree but seek a higher level of specialization or professional licensure in a particular field. For further information on the C.A.E.S. program in Educational Leadership, contact Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135,140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Doctor of Education (Ed.D.) in Educational Leadership (PSAP)

The Lynch School offers a three-year accelerated doctoral program for practicing school administrators—the Professional School Administrators Program (PSAP). This program provides an opportunity for full-time administrators to obtain their superintendent licensure and a Doctor of Education in educational leadership. The Lynch School of Education partners with the Massachusetts Association of School Superintendents and Teachers21 to prepare future superintendents and school leaders for public, Catholic, charter, and independent schools. The program is grounded in the core values of the Lynch School, with coursework focusing on leadership for social justice, school reform, community building, and leadership for learning. Admission to this program is offered in alternate years and the next cohort will be admitted in 2019.

Students who complete the Ed.D. program (PSAP) are expected to demonstrate:

- Competence in instructional leadership (district level leadership; ethics and equity; culturally proficient leadership; needs of diverse learners; collaborative; reflective; open to feedback; strong oral and written communication; self-directed; confident).
- Competence in management and operations (planning and implementing change; budget development; human capital analysis; school committee relationships; strategic thinking; teaming skills).
- Competence in family and community engagement (culturally proficient leadership; educational equity audit and diversity planning; professional development implementation; community relationships; crisis communication).
- Competence in professional culture (self-awareness; culturally proficient leadership; team leadership; reflectiveness and self-assessment of leadership).

- Competence in advanced level data collection, analysis, and interpretation of research in the field of educational leadership.

Applicants must be currently practicing in their administrative area. More information is available from Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Programs in Higher Education

Master of Arts (M.A.) in Higher Education

The master's degree in Higher Education prepares students for entry-level and mid-level positions in student affairs as well as in other professional areas in colleges, universities, and policy organizations. The M.A. program consists of 30 credit hours of required and elective coursework and field experiences. Most students complete the program in two academic years. Students with substantial professional experience have the opportunity to complete the program full-time in one academic year and one summer. It is also possible to complete the program on a part-time basis. In addition to a core of foundational courses in higher education, the program offers students the opportunity to focus on one of the following concentrations:

- **Student Affairs:** This concentration prepares students to work as professionals in functional areas of student affairs such as student activities, residence life, admissions, service learning, orientation, career services, and academic advising. Students gain an understanding of the foundations of higher education and student affairs and are able to link theory and practice through class projects and field experience placements.
- **Higher Education Administration:** This concentration prepares students to work as professionals in colleges and universities, policy organizations, and advocacy organizations. Students gain an understanding of the foundations of higher education with a focus on law, policy, and administration and are able to link theory and practice through field experience placements.
- **Spirituality, Faith, and Formation:** The top-ranked Catholic graduate school of education in the country, the Lynch School offers the only master's degree in higher education that prepares students to shape the policies, practices, and intellectual life of Catholic colleges and universities while supporting the continuing formation of diverse students in their own journey of faith and spiritual development. This course of study integrates theories of student development, sociology of religion, institutional culture, leadership formation, policy development, and theological topics in a Catholic higher education setting.
- **International Perspectives:** As the top-ranked Catholic graduate school of education in the country, the Lynch School offers the only master's degree in higher education that prepares you to shape the policies, practices, and intellectual life of Catholic colleges and universities while supporting the continuing formation of diverse groups of students. This concentration integrates theories of student development with the sociology of religion, institutional culture, leadership formation, policy development, and theology within a Catholic higher education setting.

At the completion of the program, students must demonstrate:

- Knowledge of the important issues facing higher education.
- Knowledge of foundational, methodological and concentration content.
- Demonstrated competence in communication skills, cooperation and teamwork, work quality and quantity, and job knowledge as assessed in the Field Experience Performance Review and Development Plan.

Faculty advisors work with students on an individual basis to design programs of study and applied field experiences according to the individual student's background, interests, and goals.

Doctor of Philosophy (Ph.D.) in Higher Education

The doctoral program is designed to prepare experienced practitioners for senior administrative and policy-making posts and careers in teaching/research in the field of higher education. The program has several programmatic foci that permit students to specialize in an area of interest.

Among these are:

- Administration and policy analysis in higher education
- Student development and student affairs
- International and comparative higher education
- Finance and economics of higher education
- Organizational culture and change
- The academic profession

In addition, students may choose other topics which are relevant to the administration of post-secondary education and to research. Upon completing the program, students should demonstrate:

- Knowledge of the important issues facing high education from a multi-disciplinary perspective (history, sociology, philosophy, psychology, economic, and political science).
- Knowledge of theoretical and empirical knowledge in the field.
- Knowledge of managerial and policy-making issues in the field.
- Knowledge of research methodologies and research ethics and applications.

A special feature is the Center for International Higher Education, linking the Lynch School's Higher Education program with Jesuit colleges and universities worldwide. This initiative, as well as other international efforts, provides a significant global focus to the higher education program.

The doctoral program requires 54 credit hours of coursework, 48 of which must be beyond the 7000 level. At least six credit hours of dissertation direction is needed. The Ph.D. program is organized into several tiers of study. These include a core of foundational studies in higher education; methodological courses; specialized elective courses in higher education and related fields, including research seminars; and research. In the context of a rigorous selection of courses, students are encouraged to pursue their own specific interests in higher education.

Executive Doctor of Education (Ed.D.) in Higher Education

The Executive Ed.D. in Higher Education develops justice-minded leaders with the skills, mindsets, and technical knowledge to match the changing pace of higher education. The innovative, data-informed curriculum emphasizes socially just leadership that is transformational, mission-driven, and focuses on iterative design-thinking, which equips graduates with the skills and agility to effect lasting change.

The program leverages the resources of the Lynch School's prestigious Center for International Higher Education to integrate course topics into the global higher education context. As an extension of Boston College's scholarship in Catholic education, students have the option to pursue a concentration in Catholic Higher Education—currently the only graduate program with this unique degree concentration in the United States.

Designed for experienced administrators, with a minimum of 5–10 years of experience in higher education, this part-time, three-year program pairs online coursework during the academic year with in-person week-long summer residencies. The program consists of 14 courses for a total of 48 credits. The program culminates in a practice-based capstone project that integrates content across the curriculum.

Learning Outcomes

- Critically analyze contemporary issues in American and international higher education to guide data-informed decision making
- Lead change and innovation in higher education through the effective mobilization of physical, financial, technological, and human resources
- Develop a learner-centered, whole-person mindset that advances diversity, equity, and inclusion in higher education
- Resolve complex challenges in higher education through the integration of design-thinking and strategic planning
- Produce professional writing connected to scholarly and research literature that addresses current problems of practice in higher education
- For those pursuing a concentration in Catholic Higher education: Articulate and strategically animate and assess the characteristics of a vibrant Catholic college and university in the twenty-first century

Department of Counseling, Developmental, and Education Psychology

The Department of Counseling, Developmental, and Educational Psychology (CDEP) department promotes psychosocial well-being, positive social change, and social justice through innovative and rigorous teaching, research, and professional training in applied and counseling psychology. The department engages in psychological research and its applications to advance more equitable and socially just policies and practices in partnership with diverse local, national and global communities. CDEP programs prepare students to engage in culturally informed research and practice within and across disciplines and settings.

Programs in Counseling and Counseling Psychology

Programs in Counseling and Counseling Psychology have, as a mission, the preparation of mental health counselors and school counselors at the master's level and counseling psychologists at the Ph.D. level for competent professional practice in schools, universities, and a variety of non-school health care delivery settings.

The primary focus of the multi-level program is the facilitation of healthy functioning in clients and a respect for individual and cultural differences. Competencies are developed in psychological theories of personality and behavior, human development, counseling strategies, and career development. Developmental concepts are integrated with supervised practice through field placements and varied instructional approaches.

The list of specific courses required for each program is available on the Lynch School website under Programs of Study.

Master of Arts (M.A.) in Mental Health Counseling

The Lynch School's Master of Arts program in Mental Health Counseling prepares students for careers as mental health counselors and/or to pursue doctoral studies in psychology or other fields. A core component of the Master's in Psychology and Counseling Accreditation Council's (MPCAC)-accredited program, consistent with the University's broader mission and Jesuit tradition, is an emphasis on social justice. Graduates are prepared to serve the mental health needs of individuals, groups, communities, and systems across contexts and cultures, and to promote and advocate for social change.

The program's training emphasizes both academic and applied experiences that incorporate developmental-contextual and multicultural frameworks to understand and promote mental health and well-being in diverse populations. Students receive a broad background in counseling and mental health theories, develop strong counseling skills, engage in reflective scholarship, gain core professional competencies, and master scientifically informed best practices. They graduate ready to practice contemporary counseling.

The Master of Arts degree in Counseling is a two-year program with two tracks:

- The 60-credit hour program meets the educational requirements for licensure as a Mental Health Counselor (LMHC) in the Commonwealth of Massachusetts. Graduates of this program are ready for entry-level counseling positions and, with postgraduate supervision and experience, prepared to obtain licensure and advanced skills/specialization. Students in the 60-credit sequence are expected to take one required course during the Summer Session. They may also take additional elective courses during the Summer Session if they wish to reduce their course load during the second year in the program. During the first year of the program students complete a year-long course, Foundations of Counseling I and II, which includes an intensive, counseling skills training lab experience. In the second year, students complete a combined Practicum-Internship experience of between 700 and 900 hours in a community setting while completing academic requirements.
- The 48-credit program prepares students for further studies in counseling or fields in which a solid counseling foundation is valuable. Our graduates have gone on to pursue doctoral degrees in psychology and further studies in public policy, law, and business.

The program provides two options for concentration:

- The new Integrated Behavioral Health (IBH) concentration serves as a pathway for students seeking to work as Mental Health Counselors in integrated medical settings. Our courses take a whole-person approach to health and are geared toward triaging clinical care, assessing social determinants of health, and utilizing short-term evidence-based psychotherapies. Integrated behavioral health care, a part of "whole-person care," is a rapidly emerging emphasis of the practice of high-quality health care. Integrated

behavioral health care blends care for medical conditions and behavioral health concerns that affect health and well-being in a single setting, or “medical home”. Students in this concentration will be required to complete a practicum in an integrated behavioral health setting where they will learn practical hands-on skills. The concentration can be taken by students in either the 48-credit or 60-credit track. Students should ensure they are registered for the Foundations of Counseling I & II courses specifically for Integrated Behavioral Health in their first year.

- The Mental Health Counseling Urban Scholars Program builds on the Mental Health Counseling curriculum and clinical training. It will prepare you to work effectively with clients and partners in urban communities, including community mental health centers, public hospitals, and community-based clinics. Throughout your first year, you will receive unique training and monthly seminars on serving clients within urban clinical contexts. In the second year of the program, you will participate in a practicum in an urban mental health setting. MHC Urban Scholars are eligible to receive a scholarship of up to 50% tuition remission.

Each program requires students to complete a practicum experience. Please note: the Boston College M.A. in Mental Health Counseling meets licensure requirements in 47 states. The program does not meet licensure requirements in Kentucky or North Carolina. If you have any questions about licensure, please contact the Counseling Practicum Office at macounselingprac@bc.edu.

At completion of the program, students will be able to:

- Demonstrate foundational training in, and foster identification with, the field of counseling.
- Become competent as practitioners and knowledgeable of the ways in which science influences practice and practice influences science.
- Understand the nature of social justice in their professional work and to infuse this perspective into their practice.

Master of Arts (M.A.) in School Counseling

The School Counseling program is a 48-credit hour track that is accredited by the Massachusetts Department of Elementary and Secondary Education and that meets current Massachusetts requirements for initial licensure as a school counselor at the PreK-8 and/or the 5-12 grade levels. The M.A. in School Counseling is also accredited by the Master’s in Psychology and Counseling Accreditation Council (MPCAC) for the period of March 2017 through March 2027. The first year of the program is devoted primarily to course work; however, School Counseling students do spend one day a week at a school in their second semester to meet pre-practicum requirements. The second year of the program consists of a full-year, 600-hour practicum placement and the completion of remaining academic requirements. At completion of the program, students will be able to:

- To demonstrate foundational training in, and foster identification with, the field of psychology generally, and counseling and school counseling, specifically.
- Become competent as practitioners, and knowledgeable of the ways in which science influences practice and how practice can inform scientific investigation.
- Promote social justice in their professional work.

Doctor of Philosophy (Ph.D.) in Counseling Psychology (APA accredited)

The doctoral program in Counseling Psychology, through advanced course work and supervised internships, builds on prior graduate training and professional experience. Using a developmental framework and a scientist-practitioner model of training, the program helps students acquire the following competencies: ability to comprehend and critically analyze current literature in the field; understanding of major theoretical frameworks for counseling, personality, and career development; skills to combine research and scientific inquiry; knowledge and practice of a variety of assessment techniques; respect for and knowledge of diverse client populations; ability to provide supervision, consultation, and outreach; commitment to the ethical and legal standards of the profession including sensitivity to individual, gender, and cultural differences; and demonstrated competencies with a variety of individual and group counseling approaches in supervised internships.

At the completion of the program:

- Students demonstrate foundational knowledge, and identification with, the field of psychology, generally and counseling psychology, specifically.

- Students demonstrate competency as theorists, researchers, and scholars, who are knowledgeable of the ways in which practice influences science.
- Students demonstrate competency as practitioners and are knowledgeable of the ways in which science influences practice.
- Students demonstrate social justice practices in their professional work.

The doctoral program in Counseling Psychology accepts applications from applicants with a master's degree prior to applying as well as from applicants who wish to pursue their doctoral education directly after their undergraduate education (Direct Admit). The doctoral program (Ph.D.) in Counseling Psychology is accredited by the American Psychological Association (Office of Program Consultation and Accreditation, 750 First Street, NE, Washington, DC 20002; 202- 336-5979) and is designed to qualify candidates for membership in that organization and Division 17 (Counseling Psychology). The program is designed to provide many of the professional pre-doctoral educational requirements for licensure as a Psychologist in the Commonwealth of Massachusetts and for inclusion in the National Register of Health Care Providers. Licensure requirements in Massachusetts include an additional year of post-doctoral supervised experience.

The entering doctoral student who has not completed all of the educational prerequisites for the M.A. in Counseling must complete them during the initial year of enrollment in the doctoral program. Decisions regarding this aspect of the student's coursework will be based on a review of the student's background by the assigned advisor and the director of doctoral training.

Once admitted, doctoral students are required to complete courses in each of the following broad areas that fulfill the basic professional training standards: scientific and professional ethics and standards, research design and methodology, statistical methods, psychological measurement, history and systems of psychology, biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, individual differences, and professional specialization.

The Ph.D. in Counseling Psychology requires a minimum five years of full-time academic study, doctoral comprehensives, and advanced practica, including a year of full-time internship and successful defense of a dissertation. Other departmental requirements for the Ph.D. are discussed above.

Programs in Applied Developmental and Educational Psychology

The theoretical orientation of the programs in Applied Developmental and Educational Psychology is development and learning in sociocultural context. The programs are designed to develop expertise in integrating theory, research, and application to the development of children, adolescents, and adults.

Two degrees are offered: the master's degree in Applied Developmental and Educational Psychology and the doctoral degree in Applied Developmental and Educational Psychology.

The doctoral program in Applied Developmental and Educational Psychology accepts applications from applicants with a baccalaureate or master's degree in psychology or a related field. Most applicants have some research experience as well as practice/education experience in the field.

Doctor of Philosophy (Ph.D.) in Applied Developmental and Educational Psychology

We prepare graduate students to serve diverse populations in a variety of professional roles as teachers and researchers in colleges and universities and as researchers and leaders in applied settings, including schools, government agencies, and health and human services organizations. Faculty situate their work within the mission of the Lynch School, which is to improve human well-being through teaching, research, and service.

The focus of the Applied Developmental and Educational Psychology Program is on development and learning in sociocultural context. Areas of program expertise within the study of child development and child functioning include cognitive and socioemotional development from the preschool years through adolescence. We also have expertise on adult functioning in community settings. Development is examined, in both research and curriculum, across multiple, interactive contexts or levels.

These levels include:

Individual Functioning

- Basic Processes
- Individual Differences
- Developmental Disabilities
- Biological Bases of Behavior

Interpersonal Processes

- Family Relationships
- Peer Relationships
- Parenting

Community, Cultural, and Public Policy

- Schools and Learning Environments
- Poverty
- Race and Ethnicity
- Gender

Upon completion of the Ph.D. program, graduates will be able to:

- Demonstrate knowledge of the major concepts and theories in the field of child development.
- Critically evaluate existing research and integrate research findings across studies.
- Analyze applied and theoretical issues related to child development from different theoretical perspectives and based on prior research findings.
- Develop research questions reflecting basic and applied issues in the areas of education, social policy, and human/community development.
- Use appropriate methodology to design empirical studies addressing research questions.
- Use a variety of quantitative and qualitative techniques for analyzing data.
- Communicate research findings clearly and accurately in publications and presentations for both professional and lay audiences.
- Teach courses in the field and the college and graduate level.

The range of careers available to Applied Developmental and Educational Psychology graduates with a Ph.D. includes university teaching, research, advocacy, consultation, and positions in business, governmental agencies, and human service organizations.

The program guidelines promote active engagement in research with faculty mentors for all students throughout their doctoral program. In addition to this mentored training, the curriculum requires that students take core courses in (1) social, affective, and cognitive development and the contexts of development; (2) qualitative and quantitative research methods and statistics; (3) professional development and teaching preparation; and, (4) application to practice and policy. In addition, students develop expertise in targeted areas of psychology through selected elective courses and through their research and practice experiences. Finally, students with a particular interest in human rights and social justice can obtain a Certificate through the BC-based Center for Human Rights and International Justice.

Department of Measurement, Evaluations, Statistics, and Assessment

Studies in Measurement, Evaluation, Statistics, and Assessment are designed to prepare researchers with specialized competence in testing, assessment, applied statistics, the evaluation of educational programs, and research methodology for the social sciences and human services.

Master of Arts (M.A.) in Research and Evaluation Methods

The Measurement, Evaluation, Statistics and Assessment (MESA) program at the Lynch School combines the study of research design, statistical methods, and testing and assessment with a research focus on major contemporary education policy issues. The program is designed to prepare students for research and academic careers in education, social sciences, and human services.

Upon completion of the M.A., graduates should be able to:

- Understand the theory of research, evaluation, statistics, measurement and assessment methodology.
- Critically analyze published quantitative and qualitative research.
- Interpret and report quantitative and qualitative designs, procedures, and results.
- Communicate research findings effectively.

The master's program prepares graduate students with fundamental skills in testing, assessment, the evaluation of educational innovations, and in quantitative and qualitative social science research methods. A minimum of 30 credit hours and satisfactory performance on a comprehensive examination are required for the M.A. degree.

Master of Science (M.S.) in Applied Statistics and Psychometrics

The Applied Statistics and Psychometrics program at the Lynch School combines the study of research design, statistical methods, and testing and assessment with a research focus on major contemporary education policy issues. The program is designed to prepare students for research and academic careers in education, social sciences and human services.

Upon completion of the M.S., graduates should be able to:

- Understand the theory of applied statistics and psychometrics.
- Conduct analyses using advanced procedures such as multiple regression, multivariate models, hierarchical linear modeling, causal modeling, and longitudinal analyses.
- Interpret and report quantitative and qualitative designs, procedures, and results.
- Design, conduct, analyze, interpret and report both Classical Test Theory and Item Response Theory analyses.
- Communicate research findings effectively.

The MESA Master of Science meets the need for quantitative specialists to conduct statistical analyses, design quantitative research studies, and develop measurement scales for educational, social, behavioral, and health science research projects. This program meets the increasingly higher expectations of applied research organizations and funding agencies, (e.g., the Institute for Education Sciences and the National Science Foundation), for master's-level specialists trained in quantitative designs, statistical procedures, and measurement methodology applicable to a wide variety of projects. A minimum of 30 credit hours and satisfactory performance on a comprehensive examination are required for the M.S. degree.

Master of Science (M.S.) in Data Science

In an era when data-driven decisions and systems influence every sector of business and society, talented professionals who bring an ethical framework to data science are more in demand than ever. The online M.S. in Data Science program empowers you to apply technical methods, employ an ethical lens, and utilize relevant management skills to address the needs of organizations and communities, preparing both experienced professionals and recent college graduates for rewarding careers in one of the world's fastest-growing fields.

This program will enable you to:

- Approach data science with a human-centered mindset by centering ethics, bias, and security and privacy issues that can influence findings and subsequent decision-making.
- Apply ethical problem-framing and problem-solving methods to evaluate organizational and project needs, identify potential issues, and understand production-level solutions within a team focused on meeting their organization's or client's strategic goals.
- Develop appropriate formalizations of project goals and apply statistical, mathematical, and data processing approaches to complex data analytic problems.
- Develop data engineering and applied database management skills while considering ethics, accountability, and data privacy and standards.
- Code in industry-standard programming languages for data science, machine learning, and statistical computing to solve a wide range of data mining and data science problems.
- Apply their experience with statistical analysis, machine learning, and deep learning tools to real-world scenarios to uncover critical insights in data projects for improved decision-making.

- Interpret data and represent findings visually, orally, and in writing through visualizations, reports, and evidence-based storytelling techniques that ask the right questions and provide persuasive narratives to build consensus and improve outcomes.

The program consists of 12 courses for a total of 36 required credits. It is designed as a 2-year fully online program that is completed on a part-time basis of 2 courses per semester. Currently, the open is only available for a fall semester start. In order to ensure that all students graduating from the master's program have a fundamental understanding of the field that they are about to enter, they are required to complete a capstone project as well as a comprehensive examination covering the broad areas of the core courses.

Doctor of Philosophy (Ph.D.) in Measurement, Evaluation, Statistics, and Assessment

This program prepares researchers with specialized competence in testing, assessment, the evaluation of educational innovations, and in quantitative and qualitative social science research methodology.

A student without a master's degree may apply directly to the doctoral program in Measurement, Evaluation, Statistics, and Assessment; however, note that this Direct Admit option is appropriate only when the applicant has demonstrated exceptional academic achievement and has acquired relevant research experience.

Emphasis is on the research methodology and data analysis and includes advanced coursework in research design, statistical methods, and testing and assessment as well as seminars in statistical and measurement topics. MESA students have the opportunity to tailor coursework to their particular interests and background. The doctoral degree requires a minimum of 54 credits beyond a master's and satisfactory completion of comprehensive exams and a dissertation. Students are expected to develop an understanding of modern techniques of test construction and evaluation, design of research and experiments, univariate and multivariate statistical analysis of data, and psychometric theory. Training and experience are provided in the use of specialized computer software for statistical analysis.

Upon completion of the Ph.D., graduates should be able to:

- Understand the theory of research, evaluation, statistics, measurement and assessment methodology.
- Critically analyze published quantitative and qualitative research.
- Construct both cognitive and affective measurement instruments and assessments.
- Conduct original empirical research related to topics in education, evaluation, statistics, measurement, assessment, and policy.
- Interpret and report quantitative and qualitative designs, procedures, and results.
- Communicate research findings effectively.

Since the important issues in these areas require more than technical solutions, the program also attends to non-technical social, ethical, and legal issues. Care is taken to design programs of study and experience according to the individual student's needs, interests, and goals. Students may choose an additional concentration in Developmental and Educational Psychology, Educational Policy and Reform, Curriculum and Instruction, Educational Leadership, or other areas.

Graduates of the program are qualified for academic positions in university departments of education and social sciences. They also are qualified for research and testing specialist positions in universities, foundations, local education agencies, state and regional educational organizations, and in research and development centers.

Dual Degree Programs

The Lynch School offers five dual degree programs in collaboration with the Boston College Law School, the Carroll School of Management, and the School of Theology and Ministry (STM).

Dual Degree Programs—Law and Education

The dual degree programs in law and education are designed for students interested in serving the combined legal and educational needs of students, families, and communities in our nation. They reflect the University's mission to promote social justice and to prepare men and women for service to others. The programs prepare students to meet the needs of individuals who have traditionally not been well served by the nation's schools. The programs are designed to serve the needs of persons who wish to combine knowledge about education and applied

psychology with legal knowledge and skills to better serve their clients and constituencies. The programs offer an opportunity to further the University's goals in promoting interdisciplinary inquiry and integrating the work of service providers.

Students admitted to the program may expect to receive both a master's degree in Education (M.Ed. in Curriculum and Instruction or Educational Leadership or M.A. in Higher Education) and the Juris Doctor (J.D.) degrees in approximately three and a half years, or three years and two summers, rather than the four or more years such degrees would normally entail if taken separately. Students must matriculate and spend at least one semester of residence in the Lynch School.

Students seeking to pursue the J.D./M.Ed. or J.D./M.A. dual degree must file separate applications to, and be admitted by, both their intended Education program in the Lynch School and the Boston College Law School. Any student seeking licensure or human services licensure must meet all of the requirements in the Lynch School for that licensure. Students seeking licensure in Massachusetts must pass the Massachusetts Tests for Educator Licensure (MTEL).

All Lynch School admissions requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. The BC Law School accepts applications from mid-September through March 31 for the class entering in August. Contact them directly for further information at Office of Admissions, BC Law School, 885 Centre Street, Newton Centre, MA 02459, 617-552-8550.

Dual Degree Program—Higher Education and Business Administration (M.A./M.B.A.)

This dual degree program will provide students in higher education with an opportunity for professional training in resource management. The M.B.A./M.A. program will prepare students to assume leadership positions in such areas as financial management, resource planning, and technology management in major universities and policy-making institutions in post-secondary education.

Students admitted to the program may expect to receive both a master's degree in education (M.A. in Higher Education Administration) and the Master of Business Administration (M.B.A.) degrees in three academic years and two summers. Students seeking to pursue the M.B.A./M.A. dual degree must file separate applications to, and be admitted by, both the Higher Education program in the Lynch School of Education and Human Development and the Carroll School of Management.

All Lynch School admissions requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu. All M.B.A. admissions requests should be addressed to the Office of Graduate Admissions, Carroll School of Management, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, 517-552-3920.

Dual Degree Program—Counseling Psychology/Theology and Ministry (M.A./M.A.)

The dual M.A. in Theology & Ministry/M.A. in Counseling Psychology program was developed by the School of Theology and Ministry and the Lynch School. It is designed for individuals who wish to pursue graduate studies that combine theories and practice in counseling and psychology with studies in religion and exploration of the pastoral dimensions of caregiving.

It combines the core studies and faculty resources of the existing M.A. in Theology & Ministry (Pastoral Care and Counseling Concentration), and the M.A. in Mental Health Counseling. It prepares students to seek licensing as professional mental health counselors while also providing them with theoretical foundations for integrating pastoral ministry and counseling techniques. Students seeking to pursue the dual M.A./M.A. program must file separate applications to, and be admitted by, both the Lynch School master's program in Counseling and the School of Theology and Ministry. Any student seeking mental health licensure or school counseling licensure must meet all of the requirements in the Lynch School for that licensure.

All Lynch School admissions requests should be addressed to the Office of Graduate Admissions, Financial Aid, and Student Services, Campion 135, Lynch School, Boston College, Chestnut Hill, MA 02467-3813, 617-552-4214. All Pastoral Ministry admissions requests should be addressed to the School of Theology and Ministry, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3921, 617-552-6506.

Certificate Programs

Students and professionals can enhance their knowledge and advance their careers through several certificate programs. Each program can be completed on its own or as part of a master's degree. Interested applicants or current students may read detailed descriptions on the [Lynch School Certificate Programs](#) web page. All Lynch School Certificate and Specialization Programs requests should be addressed to: Boston College, The Office of Graduate Admission, Financial Aid, and Student Services, Lynch School of Education and Human Development, Campion Hall 135, 140 Commonwealth Avenue, Chestnut Hill, MA 02467-3813, telephone 617-552-4214, or e-mail gsoe@bc.edu.

Certificate Programs Offered:

- Autism Spectrum Disorder
- Child and Family Mental Health
- Early Child Policy and Leadership
- Educational Policy Development
- Global Perspectives in Curriculum and Instruction
- Human Rights and International Justice (interdisciplinary)
- Inclusive Instructional Design
- International Higher Education
- Institutional Research
- Positive Youth Development
- Social Justice Leadership
- Teaching English to Speakers of Other Languages (TESOL)
- Teaching ELL
- Traumatic Stress Studies and Intervention

Morrissey College of Arts and Sciences

The Graduate School of the Morrissey College of Arts and Sciences (GSMCAS) offers programs of study leading to the degrees of Doctor of Philosophy (Ph.D.), Master of Arts (M.A.), and Master of Science (M.S.). In addition, GSMCAS may admit as Special Students those students not seeking a degree who are interested in pursuing coursework for personal enrichment.

The Graduate School of the Morrissey College of Arts and Sciences also offers several dual degree options. The Master of Arts in Teaching (M.A.T.) and Master of Science in Teaching (M.S.T.) are offered in cooperation with the Lynch School of Education Graduate Programs. The Master of Arts/Juris Doctor (M.A./J.D.) and the Doctor of Philosophy/Juris Doctor (Ph.D./J.D.) are offered in cooperation with the Boston College Law School. The Master of Arts/Master of Business Administration (M.A./M.B.A.), and the Doctor of Philosophy/Master of Business Administration (Ph.D./M.B.A.) are offered in cooperation with the Carroll Graduate School of Management. The Graduate School also offers, through select departments, a Fifth Year Master of Arts (M.A.) and Master of Science (M.S.) program for high-achieving BC undergraduates wishing to pursue an accelerated graduate program.

General Information

The Deans' Office of the Graduate School of the Morrissey College of Arts and Sciences in Gasson 108 is open from 9:00 a.m. to 5:00 p.m., Monday through Friday, to assist prospective students with general admissions inquiries and current students with any academic or student services needs. Application information may be found on the Graduate School website: bc.edu/gsas.

The course schedule is available online prior to each semester's registration period at the Course Information and Schedule link at bc.edu/courses. The International Student Office, the Office of the Dean for Student Development, and the Graduate Student Association provide non-academic services for students.

Master's Degree Programs

Requirements for the Degrees of Master of Arts and Master of Science

Acceptance

Candidates for the Master's degree must be graduates of an accredited college and normally must have at least 18 semester hours of upper division work in the proposed area of study. In case of deficiencies, prerequisites may be earned in the graduate school by achieving a minimum grade of B in courses approved for this purpose. Where there is some doubt about a scholastic record, acceptance may be conditional. The candidate will then be evaluated by the department and recommended to the Dean for approval after completing the first semester of coursework or after earning a minimum of six credits.

Course Credits

The number of graduate credits required for the degree varies by department. No more than six graduate credits will be accepted in transfer toward fulfillment of course requirements, as described more fully under "Transfer Credit Policies" under Academic Regulations.

Fifth Year B.A./M.A. and B.S./M.S.

In cooperation with the Morrissey College of Arts and Sciences, the Graduate School offers five year B.A./M.A. and B.S./M.S. programs in some disciplines. See the Undergraduate Morrissey College of Arts and Sciences for further information.

Doctoral Degree Programs

Requirements for the Degree of Doctor of Philosophy

The Ph.D. degree is granted only for distinction attained in a special field of concentration and the demonstrated ability to modify or enlarge upon a significant subject in a dissertation based upon original research meeting high standards of scholarship.

Requirements for the doctoral degree are specific to departments and may be found under departmental listings. Detailed statements of requirements and procedures should be requested directly from the department in which the student has an interest.

Residence

The philosophy of the residence requirement is that a doctoral student should experience the total environment of the University. Residence for at least two consecutive semesters of one academic year, during which the student is registered as a full-time student at the University, is required. A plan of study that meets this requirement must be arranged by the student with the department. Registration in two courses per semester is considered to fulfill the residency requirement for students holding full-year fellowships and assistantships. The residence requirement may not be satisfied, in whole or in part, by summer session attendance.

Interdisciplinary Doctoral Program

Where departmental doctoral programs are unable to satisfy the interests of the student, an interdisciplinary doctoral program remains a possibility. However, students must first be admitted to a departmental program. A student interested in exploring such a possibility should first make an inquiry to the GSMCAS Dean's Office.

Special Students (Non-degree)

Non-degree seeking students, who are interested in pursuing course work at the graduate level, may apply for admission as special students. Many individuals enter departments of GSMCAS as special students—either to explore the seriousness of their interest in studying for an advanced degree or to strengthen their credentials for possible later application for degree study. Others may wish to pursue coursework in keeping with their intellectual interests or for other purposes. Admission as a special student does not guarantee subsequent admission for degree candidacy. Individuals who are admitted as special students and who subsequently wish to apply for admission as degree candidates must file additional application documents and be accepted for degree study. The number of credits one has earned as a special student that may be applied toward the requirements of a degree is determined by the appropriate department in concert with GSMCAS regulations.

Those admitted as special students may take courses only in the department that has recommended their admission. Permission to continue to take courses as a special student beyond the semester for which admission was originally gained must be obtained from the admitting department's Graduate Program Director.

Admission

Eligibility and Application Information

The Graduate School of the Morrissey College of Arts and Sciences is an academic community whose doors are open to all students without regard to race, ethnic or national origin, religion, color, age, gender, marital or parental status, veteran status, disabilities, or sexual orientation. Opportunities and experiences are offered to all students on an equal basis and in such a way as to recognize and appreciate their individual and cultural differences.

Applicants for admission to the GSMCAS must possess at least a bachelor's degree from an accredited institution and give evidence of the ability and preparation necessary for the satisfactory pursuit of graduate studies. This evidence consists primarily, but not exclusively, in the distribution of undergraduate courses and the grades received in them. Please consult your intended department for additional program-specific requirements.

Individuals lacking a bachelor's degree generally are not admitted to GSMCAS classes. In order to attend graduate classes, persons lacking the bachelor's degree should apply for authorization either through the Dean of the Woods College of Advancing Studies or, in the case of Boston College undergraduates, through their appropriate dean and with the approval of the chairperson of the given department. Such students will receive only undergraduate credit for the course taken in the GSMCAS, and the course credit will be entered only on their undergraduate record. For regulations governing the simultaneous master's/bachelor's degree, students should consult their department.

GSMCAS accepts two classes of applicants—degree students (degree-seeking) and special students (non-degree-seeking).

A completed application to GSMCAS includes the application form and official transcripts, as well as any program-specific requirements, e.g., GRE scores, statement of purpose, writing sample, letters of recommendation, etc. For these additional requirements, please consult the requirements of the department to which admission is being sought. All application materials should either be submitted online or sent to the Graduate Admissions Office, Gasson 108.

Applicants for special student status are only required to submit an application form, statement of purpose, and official transcripts. All application materials should either be submitted online or sent to the GSMCAS Admissions Office, Gasson 108.

Degree and special students are not admitted officially until the completed application form with a positive department recommendation has been approved by the Associate Dean of Admissions and Administration. Admission should not be presumed without receipt of official notification from the Associate Dean.

Degree-seeking applicants should consult the department of specialization regarding the specific requirements for the various departmental master's and doctoral programs.

For the necessary application forms and information, students may either address their requests to the department of interest or to the Graduate Admissions Office, Gasson 108.

Information on the GRE and TOEFL tests may be obtained from the Educational Testing Service, Box 955, Princeton, New Jersey 08540 or at gre.org.

All documents submitted by applicants for admission become the property of GSMCAS and are not returnable.

Acceptance

Announcements of acceptance or rejection are usually sent no later than April 15 for September admissions, but may vary by department. Decisions are made on the basis of departmental recommendations and the fulfillment of prerequisites. No student should presume admission until he or she has been notified officially of acceptance by the Associate Dean.

Financial Aid

Academic Awards

Stipends and scholarships are available to aid promising students in the pursuit of their studies, including:

- Graduate Assistantships
- Research Assistantships
- Teaching Assistantships
- Teaching Fellowships
- Tuition Scholarships
- University Fellowships

Individuals whose applications are complete will routinely be considered for financial aid by the department in which they hope to study. No separate application is necessary. The scholastic requirements for obtaining these stipend awards or scholarship awards are necessarily more exacting than those for simply securing admission to GSMCAS.

- Graduate students may not receive University financial aid (stipend and/or tuition scholarships) from two schools or departments simultaneously.
- Graduate students who hold fellowships or assistantships may not be employed full-time without the Dean's approval.

Fellowships and Assistantships

University Fellowships

University Fellowships are available in some departments offering the Ph.D. degree. These awards do not require service to the University.

Teaching Fellowships

Teaching fellowships are available in some departments. Duties, including the nature and number of hours (though in no case to exceed 20 hours), and stipend amounts vary by department.

Graduate Assistantships and Teaching Assistantships

Graduate and Teaching assistantships are available in some departments. Duties, including the nature and number of hours (though in no case to exceed 20 hours), and stipend amounts vary by department.

Research Assistantships

Research Assistantships are available in some departments. Research Assistantship duties, including the nature and number of hours (though in no case to exceed 20 hours), and stipend amounts vary by department. Summer research opportunities are available on some research projects. For further information, contact the department's graduate program director.

Tuition Scholarships

Tuition scholarships are awarded based on academic achievement and promise. These awards do not require service to the University.

Procedures for Financial Aid Recipients

At the opening of each school year, or at whatever other time financial aid may be awarded, recipients of fellowships and assistantships must report to the Human Resources Service Center to complete his/her personnel and tax information forms.

An aid recipient who relinquishes a fellowship, assistantship, or a tuition scholarship must report this matter in writing to the department chairperson and to the Dean. These awards may be discontinued at any time during an academic year if either the academic performance or in-service assistance is of an unsatisfactory character. They may also be discontinued for conduct injurious to the reputation of the University.

Other Sources of Financial Aid

Students interested in other sources of financial aid, such as work-study funds and various loan programs, should inquire in the Office of Student Services where all such aid is administered. Refer to the earlier section on financial aid in this catalog.

Academic Regulations

Full-Time Enrollment Status

Full-time enrollment in the Graduate School of the Morrissey College of Arts and Sciences is 9 or more credits.

All students are considered half-time with six credits.

Students completing degree requirements in their final semester may be given exceptions to the school's minimum credit standard for full-time status by their academic dean.

The credit amounts listed above are used to determine a student's enrollment status for loan deferments, immunizations, medical insurance requirements, and verifications requested by other organizations.

Graduate schools may also define full-time status by a student's course work or role responsibilities as listed below:

- All doctoral candidates in the Graduate School of the Morrissey College of Arts and Sciences are considered full-time students.
- Master's candidates are considered full-time students if they are registered full-time and/or receiving an assistantship or fellowship through an academic unit, e.g., Graduate Assistants, Teaching Fellows, Teaching Assistants, or Research Assistants.

Transfer Credit Policies

Graduate students may request the transfer of no more than six graduate credits. Courses will be considered for transfer if the student has received a grade of B or better and if the course has not been applied to a prior degree. If approved, the transfer course and credit, but not the grade, will be recorded on the student's academic record. Credit received for courses completed more than ten years prior to a student's admission to his or her current degree program are not acceptable for transfer. Students are advised to consult with the procedures and policies of their department or school for exceptions to this policy.

Biology

The Biology Department offers a research-focused program leading to the degree of Doctor of Philosophy. A B.S./M.S. degree is offered to undergraduate students currently enrolled at BC. Students must apply to the B.S./M.S. degree program as juniors and matriculate into the program prior to the start of the senior year. The Master of Science in Teaching (M.S.T.) degree is administered through the Lynch School of Education in cooperation with the Biology Department.

Those seeking admission to the graduate program should have a bachelor's degree and undergraduate coursework in calculus, physics, biochemistry, biology, and chemistry, including organic chemistry. Deficiencies in preparation, as noted by the Admissions Committee, may be made up in the graduate school.

The minimum curriculum for Ph.D. students consists of five Graduate Core Courses (BIOL6410 and BIOL6420 Contemporary Biological Questions and Critical Analysis I and II, BIOL6430 Experimental Methods and Design in Biology, BIOL6440 Molecular and Cellular Control Mechanisms, and BIOL6180 Scientific Proposal Writing), two additional Biology-approved Graduate Elective Courses (e.g., BIOL5000+, BIOL8000+), and a University seminar in Responsible Conduct of Research.

Graduate Research Experience begins with three lab rotations during the first year. After each rotation, students present at the Department Data Club. Rotations allow students the opportunity to explore important questions in different areas of biology and to determine if a particular lab environment is suitable for their thesis research. Students are expected to have joined a permanent lab by the end of the first academic year, with permission of the lab's P.I.

Students are also required to be a Teaching Assistant for at least two semesters, beginning in their first semester. Depending on the availability of funding from their lab P.I., they may be supported by either a Research Assistantship or a Teaching Assistantship in subsequent semesters.

Throughout the academic year, the Biology Departmental Colloquium hosts distinguished researchers in many areas of biology. Attendance is required of all full-time Ph.D. students at both the Seminar Talk and Department Data Club.

For the M.S.T. degree, course requirements vary depending upon the candidate's prior teaching experience; however, all master's programs leading to certification in secondary education include practical experiences in addition to coursework. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. For further information on the M.S.T., please refer to the Lynch School of Education and Human Development section, Master's Programs in Secondary Teaching, or call the Office of Graduate Admissions, Lynch School, at 617-552-4214.

Chemistry

Ph.D. Degree Requirements

There is no total credit requirement for the Ph.D. degree. All entering graduate students are required to take the core graduate courses that are designed to provide a reasonable and broad level of proficiency in the various chemistry disciplines. Additionally, students are encouraged to take at least two advanced courses in the student's chosen focus of research. Core courses may include Mechanistic Organic Chemistry, CHEM5537; Principles of Chemical Biology, CHEM5560; and Physical Chemistry: Principles and Applications, CHEM6676. First year students are required to take a one-semester course, Scientific Communication in Chemistry during the spring term. Advanced course selection will depend on the student's research areas and are chosen in consultation with their research advisor. Every student is expected to attain a GPA of at least 3.0 at the end of his or her second semester in the Graduate School and to maintain it thereafter. If this standard is not met, the student may be required to withdraw from the graduate program.

At the end of the second year, Ph.D. candidates must pass an oral exam that stresses material from their own research specialty and other related areas. Members of the student's thesis committee comprise the exam committee. Students who do not pass this exam will be asked to do one of the following: repeat the oral exam (for a final time), complete the requirements for a Master of Science (M.S.) degree, or withdraw from the program. Students choosing to complete the requirements for an M.S. degree must complete a minimum of 18 graduate credits of coursework and a thesis. Students typically accumulate 12 to 18 credits of coursework during the first year of study. The Comprehensive Examination for the M.S. degree is a private, oral defense of the student's research thesis.

Graduate Curriculum

The curriculum is designed to stimulate intellectual exchange among students as well as faculty members and to train graduate students in communication skills. First-year course requirements provide students with a breadth of knowledge in the traditional fields: organic, chemical biology, physical chemistry, and inorganic chemistry. While a specific number of credits is not required for the Ph.D., students are encouraged to pursue a program of studies—with the approval of their advisor—that is consistent with their individual educational goals. An outline of the curriculum follows:

- Year 1: **Coursework**
- Year 2: **Qualifying Exam**
- Year 3/4: **Student Department Seminar***
- Year 3/4: **Original Proposal***

*Students are expected to complete these two requirements (Department Seminar and Original Proposal) before the end of Year 4, and complete at least one in Year 3.

The M.S. and Ph.D. degrees require a thesis based upon original research, either experimental or theoretical. For the Ph.D. candidate, a thesis project involving a sustained research effort (typically requiring 4–6 years) will begin usually during the second semester of study. An oral defense of the dissertation before a faculty thesis committee and a public presentation complete the degree requirements. Some teaching or equivalent educational experience is required. This requirement may be satisfied by at least one year of service as a teaching assistant or by suitable teaching duties. Arrangements are made with each student for a teaching program best suited to his/her overall program of studies. Waivers of teaching requirements may be granted under special circumstances with the approval of the Director of Graduate Studies or Department Chairperson.

Classical Studies

Candidates must complete 30 credits of coursework at the graduate level. In addition, candidates must complete a departmental reading list of Latin and/or Greek authors, must demonstrate the ability to read a modern foreign language (usually French, Italian, or German), and must complete translation exams in Greek and Latin as well as comprehensive examinations with both a written and oral component. The translation exam includes passages from the reading list, to be translated without the aid of a dictionary. The written component of the comprehensive exam consists of four essays on literature in its cultural and historical context. The oral exam builds on the written component in the form of discussion with the faculty about topics in the history and interpretation of Latin and/or Greek literature.

Incoming students can expect to find major Greek and Latin authors and genres taught on a regular basis. In Greek these include Homer, lyric poets, fifth-century dramatists (Aeschylus, Sophocles, Euripides, and Aristophanes), the historians Herodotus and Thucydides, Plato, and fourth-century orators. In Latin they include Plautus and Terence, the late republican poets Catullus and Lucretius, Cicero, Augustan poetry (Virgil, Horace, Elegy, and Ovid), the historians Livy and Tacitus, and the novel.

Earth and Environmental Sciences

The department offers graduate courses and research programs leading to an M.S. in Geology or Geophysics and a Ph.D. in Earth and Environmental Sciences. Students are encouraged to obtain broad scientific backgrounds by taking courses in geology, geochemistry, geophysics, and environmental geosciences along with the other sciences and mathematics. Through this multidisciplinary approach, our program provides graduates with the credibility and interdisciplinary vision they need to advance careers in academia, government, and the private sector, as well as continued studies toward a Ph.D. for students in our M.S. track.

The Earth and Environmental Sciences department, with approximately 20 graduate students in residence, is housed in Devlin Hall. The department has close ties with the Schiller Institute for Science and Society and additional research facilities at Weston Observatory. Students enjoy close working relationships with faculty while being able to undertake research using modern scientific equipment available. Both the M.S. and Ph.D. programs stress a strong background in the earth sciences, as well as the ability to carry out research.

Research in the department covers a broad range of topics, including: coastal and estuarine processes, sedimentology, geomorphology, earthquake and exploration seismology, tectonics, structural geology, igneous and metamorphic petrology, isotope geochemistry and geochronology, groundwater hydrology, oceanography, paleoclimatology and cryospheric change, marine biogeochemistry, and environmental geology and geophysics. Our students use state-of-the-art research techniques, including modern scientific equipment and instrumentation, performing field-based research across the globe in areas such as the Appalachians, western U.S., Europe, New Zealand, Australia, China, and Greenland, as well as at sea in the Atlantic, Pacific, and Arctic Oceans.

The department offers financial aid in the form of teaching and research assistantships.

Doctor of Philosophy

The doctoral program provides students with the tools they need to perform novel research in the earth and environmental sciences. The program provides our graduates with the disciplinary credibility and the interdisciplinary vision they need to advance careers in academia, government, and the private sector. Students combine course work with advanced research under the supervision a faculty advisor. The doctoral program assumes a basic undergraduate foundation in the geosciences. Students lacking such a background may be required to complete certain additional coursework before or during their graduate program. Ph.D. candidates are expected to have taken two semesters (or equivalent) of a college-level physics or chemistry course before admission, and must complete, or have completed, a minimum of two semesters of college-level calculus before completing their degree. Students are encouraged to obtain broad backgrounds by taking courses in geology, geophysics, and environmental geosciences along with the other sciences and mathematics.

Application

Applicants to the doctoral degree program are typically admitted to work under the guidance of a specific faculty advisor. Prospective students are thus encouraged to contact department faculty members during the application process to explore opportunities for thesis research projects. Upon entering the program students will determine a specific thesis topic in consultation with their advisor. Under certain circumstances students will be admitted to the graduate program without assignment to a thesis advisor. In this case, the student will pick their thesis topic and thesis advisor, with his or her approval, when they start the graduate program. Applicants to the Ph.D. program are expected to have a course background in geology, geophysics, and environmental geosciences along with the other sciences and mathematics before entering the program.

In addition to the normal application forms, applicants should submit transcripts, letters of recommendation, a personal statement of the strengths and weaknesses of their undergraduate education (including course and non-course experience), and their graduate study interests and current post-degree plans. Graduate Record Exam (general) scores are not required, but may be submitted with the application. Applications from those applying for financial aid and assistantships for September should be completed by January 10, our recommended application target date. In exceptional circumstances, late applications will be considered.

Ph.D. Degree Requirements

Ph.D. students are required to complete the equivalent of 24 credit hours of graduate level course work beyond their bachelor's degree. Students admitted to the Ph.D. program who have already earned a M.S. degree in an earth or environmental sciences related field may have

up to twelve course credits approved from their prior graduate course work. All Ph.D. students will take an interdisciplinary course focused on Broader Impacts and Integrated Research. In addition, students must pass an oral qualifying examination by the end of their fourth semester and enter into candidacy by preparing and defending a thesis proposal within one year of passing their qualify exam. Finally, students must complete and defend a research-based thesis, of which one chapter must be devoted to the Broader Impacts of their work.

A summary of the regulations for graduate students in the Department of Earth and Environmental Sciences as well as information for enrolled and prospective graduate students can be found in the [Graduate Student Regulations and Procedures Handbook](#) (updated annually).

Master of Science

The M.S. program includes coursework and a research-based thesis. The curriculum is flexible, and a program that is consistent with the student's background, and professional and research objectives, is developed by the student and his or her faculty advisory committee. Like the Ph.D. program, the M.S. program assumes a basic undergraduate foundation in the geosciences. Students lacking such a background may be required to complete certain subjects at the undergraduate level before or during their graduate program. Master's candidates in geology or geophysics are expected to have taken two semesters (or equivalent) of a college-level physics or chemistry course before admission, and must complete, or have completed, a minimum of two semesters of college-level calculus before completing their degree. Students are encouraged to obtain broad backgrounds by taking courses in geology, geophysics, and environmental geosciences along with the other sciences and mathematics. Multidisciplinary preparation is particularly useful for students seeking future employment in industry.

The program stresses a strong background in the earth sciences, as well as the ability to carry out research. It prepares students for successful careers as geoscientists in the environmental consulting and engineering industries, natural resource exploration, government service, or for continued studies toward a Ph.D. A particularly beneficial aspect of the M.S. program is the opportunity for students to integrate studies in geology, geophysics, and environmental subjects.

Application

Applicants to the Master of Science degree program generally fall into one of the following categories: (1) students well-prepared in geology or geophysics with courses in mathematics, physics, chemistry, and/or biology who are interested in broadening their experience at the M.S. degree level before employment or doctoral studies elsewhere; (2) students well-prepared in mathematics or one of the natural sciences other than geology or geophysics and who wish to use the M.S. degree program to transfer into the earth sciences.

In addition to the normal application forms, applicants should submit transcripts, letters of recommendation, a personal statement of the strengths and weaknesses of their undergraduate education (including course and non-course experience), and their graduate study interests and current post-degree plans. Graduate Record Exam (general) scores are not required, but may be submitted with the application. Applications from those applying for financial aid and assistantships for September should be completed by January 10, our recommended application target date. Later applications will be considered for financial aid if funding is available. Such applications may be made at any time, but, to be assured of consideration for September admission, they should be received by May 1.

M.S. Degree Requirements

No fixed curriculum is prescribed for the M.S. degree. Instead, a course and research program that is consistent with the student's background and professional objectives are developed by the student and his or her faculty advisory committee. The graduate program assumes a basic undergraduate foundation in the geosciences. Students lacking such a background may be required to complete certain subjects at the undergraduate level before or during their graduate program. Master's candidates in either Geology or Geophysics must complete or have completed two-semester (or equivalent) courses in physics or chemistry, and a two-semester, college-level calculus course.

A minimum of ten graduate-level courses, (numbered 3000 or above), approved by the student's faculty advisory committee, must be completed in addition to a research thesis for graduation. Graduate level multidisciplinary Earth Systems Seminars are offered annually by the department on different topics. Beginning graduate students are required to take the Earth Systems Seminar. A maximum of two thesis courses (EESC8801) are allowed for M.S. thesis credit. Normally, no more than one Reading and Research course (EESC7798 or EESC7799) may be applied toward the minimum course requirement. All students are required to maintain at least a 3.0 average in their graduate courses, as well as in all undergraduate courses in the other sciences and mathematics. Passing a comprehensive oral examination is required of each student. A research thesis approved by two faculty members is also required of all M.S. students.

A summary of the regulations for graduate students in the Department of Earth and Environmental Sciences as well as information for enrolled and prospective graduate students can be found in the [Graduate Student Regulations and Procedures Handbook](#) (updated annually).

Dual Degree Program (M.S.-M.B.A.)

In conjunction with the Carroll Graduate School of Management at Boston College, the Department of Earth and Environmental Sciences offers interested students the opportunity to participate in the combined M.S.-M.B.A. degree program. Completion of this program leads to the awarding of both degrees. This program is excellent preparation for careers in industrial or financial geoscience management, including areas such as the environmental and petroleum industries, natural hazard assessment, and natural resource evaluation and investment.

The combined M.S.-M.B.A. program normally takes three years for students with a good science background as an undergraduate— about one year less than pursuing these two degrees independently. Students in this program commonly take their first year entirely within the Department of Earth and Environmental Sciences. During the first summer, the student is expected to begin work on a research M.S. thesis that may be combined with an off-campus internship. The second year of the program is taken at the Carroll Graduate School of Management and the third year is split between both programs. Corporate internships are encouraged.

In applying to the program, students have two options. The first and most desirable option is for the student to apply directly to, and be accepted by, both the Graduate School of the Morrissey College of Arts and Sciences and the Carroll Graduate School of Management at the time of their initial application to Boston College. The GRE and GMAT tests may be requested by the Carroll Graduate School of Management. Students may contact the Department of Earth and Environmental Sciences for information and application materials to both programs (indicate that you are interested in the Dual Degree Program). The deadline for admission to the Department of Earth and Environmental Sciences is January 10 for consideration for financial aid and assistantships, the same as the deadline for M.S. candidates. Applications to the Carroll Graduate School of Management are accepted on a rolling basis.

The second option is for students to apply and be accepted to the M.S. program in the Department of Earth and Environmental Sciences. During the spring of their first year, after consultation with their academic advisor, the student may then choose to apply to the Carroll Graduate School of Management for admission into the dual degree M.S.-M.B.A. program.

Further information on this program and application materials may be obtained from the Department of Earth and Environmental Sciences, Boston College, Chestnut Hill, MA 02467, 617-552-3640, or from Graduate Admissions, Carroll Graduate School of Management, Boston College, Chestnut Hill, MA 02467, 617-552-3920.

Master of Science in Teaching

The Master of Science in Teaching (M.S.T.) program is administered through the Lynch School of Education in cooperation with the Department of Earth and Environmental Sciences. It requires admission to both the Lynch School of Education and the Department of Earth and Environmental Sciences. This program, which is designed for prospective teachers, acknowledges variations in prior background and skills.

M.S.T. Degree Requirements

The five required courses in the earth sciences include Exploring the Earth and Earth Materials, and the following: (1) No more than four credits from Weather, Climate, and the Environment, Oceanography, or Astronomy; and (2) Eight credits from Petrology, Structural Geology or Advanced Structural Geology, Environmental Geology, Environmental Chemistry, Introduction to Geophysics or graduate courses (numbered 3000 or above). Students who have previously taken these courses may substitute other graduate courses within the Department of Earth and Environmental Sciences, with approval. One semester of full-time residency may be necessary. A comprehensive examination is given to each student at the end of the program. This examination is in two parts—one part is oral in the earth sciences, and the other part is given by the Lynch School of Education.

Cooperative Program

The Department is part of a cooperative program with the Department of Earth Sciences at nearby Boston University, as well as the Civil Engineering Department at Tufts University. This program permits degree candidates at Boston College to enroll in courses that are unavailable at Boston College but are available at Boston University or Tufts.

Weston Observatory

Weston Observatory is a geophysical research and science education center of the Department of Earth and Environmental Sciences at Boston College. It is located in Weston, Massachusetts about 10 miles west of BC's Chestnut Hill campus. The Observatory, which has been recording earthquakes since the 1930s, conducts basic research on earthquakes and related processes, provides public information after significant earthquakes occur, contributes to earthquake awareness to help reduce the tragic effects of earthquakes, and educates future generations of geophysicists, geologists, environmental geoscientists and scientifically literate citizens. Seismic monitoring at Weston Observatory is part of a consortium of institutions that operate networks of seismographs throughout the Northeast United States and around the world. The facilities at Weston Observatory offer students a unique opportunity to work on research projects in geophysics and related research areas. For more information, visit the Observatory website: bc.edu/westonobservatory.

Economics

Ph.D. Program

The graduate program in economics is designed for full-time students who are seeking a Ph.D. The program trains economists for careers in academia, policy-making institutions, and the private sector by providing strong backgrounds in economic theory, quantitative research methods, and applied fields. The Ph.D. program has been classified as STEM (CIP Code 45.0603: Econometrics and Quantitative Economics). Requirements include coursework, comprehensive examinations, a thesis, and a one-year residence requirement. The course requirements consist of a first-year core curriculum and eight electives, for a total of 48 credits. The first-year program consists of core courses in Micro Theory (ECON7740–7741), Macro Theory (ECON7750–7751), Mathematics for Economists (ECON7720), Statistics (ECON7770), and Econometric Methods (ECON7772). This second year is devoted to electives. In addition to the Department's own electives, students may take courses in the Carroll School of Management's Ph.D. program in finance. All courses accepted for the degree are worth three credits, with the exception of the spring courses taken in the second semester of the first year: ECON7741, ECON7751, and ECON7772. These three courses are each worth four credits.

Students are required to pass written comprehensive examinations in Micro Theory, Macro Theory, and in two of the following fields: Advanced Micro Theory, Advanced Macro and Monetary Economics, Econometrics, Industrial Organization, International Trade and Political Economy, International Finance and Macroeconomics, Labor Economics, and Finance. Most exams are based on a two-course sequence on the subject matter. The Micro and Macro Theory comprehensives are offered twice each year in late May and late August. Students take them immediately after the first year and begin to write field comprehensives at the end of the second year.

All students accepted to the program are offered financial aid including tuition remission. Students can expect continued financial support for five years as long as they meet all conditions and achieve satisfactory progress toward the Ph.D. More information about the Ph.D. program and financial aid opportunities can be found at the graduate program menu option at bc.edu/economics.

Admission Information

An online application for your convenience is located at the [Graduate School of the Morrissey College of Arts and Sciences Admission](#) website. Any questions regarding admission requirements should be directed to gsasinfo@bc.edu. For further information regarding the Ph.D. program, please contact Alexa Fattrosso at alexa.fattrosso@bc.edu.

English

Master of Arts Program

The Master of Arts in English degree is intended for students who wish to extend and consolidate their knowledge of the field before moving on to work at the Ph.D. level and for students aiming at careers in secondary education, publishing, or related fields that require advanced skills in critical thinking, research, and writing. Candidates pursuing the M.A. degree will be expected to complete courses granting at least 30 hours of graduate credit. Three of these course credits must be in a theory course (ordinarily thought of as a course primarily concerned with the study of texts in literary and/or cultural theory) from among the Department's regular offerings, and three must be in the Introduction to Advanced Research course (or an equivalent Methods course). Students may devote up to six of the required 30 credits to independent work under the supervision of Department faculty, resulting in one or more longer papers. Students who wish to pursue this option should consult with the Program Director early in their graduate careers.

Students must also pass two examinations—a language and a comprehensive examination. The comprehensive exam requires students to demonstrate knowledge about literary periodization and to use close-reading skills. It is three hours in length, is offered in December and May, and must be taken no later than the fall semester of the second year of study.

The language exam is offered at the same time as the comprehensive examination and may be taken at any point in the student's program. A wide range of languages will be accommodated for this requirement, and it may be waived if (1) the candidate supplies an undergraduate transcript showing two courses beyond beginning level in a foreign language with grades of B or above (taken within three years of entering the M.A. program), (2) the candidate successfully completes a 12-week intensive language course administered by the Graduate School of the Morrissey College of Arts and Sciences at Boston College, or its equivalent, or (3) the candidate has native-level proficiency and completed a university degree using that language.

Master of Arts Concentration in Irish Literature and Culture

The concentration in Irish Literature and Culture degree offers English Department M.A. candidates the opportunity to design an interdisciplinary course of study drawing from a wide range of fields, including literature, Irish language, history, women's studies, American studies, fine arts, music, and cultural studies. Candidates seeking the degree must fulfill the course requirements of 30 credits within two years. At least twelve of these must be in Irish literature courses in the English Department, an additional three in an Irish Studies course offered by another University department, and at least six in Irish language. Remaining credits are taken as electives. To complete the degree candidates must pass an oral examination focusing on a specific period, genre, or theme they have chosen in consultation with members of the Irish Studies faculty. Students interested in pursuing the concentration in Irish Literature and Culture should register with Marjorie Howes at the beginning of their second year.

English faculty offering graduate courses in Irish Studies include Professors Marjorie Howes, Joseph Nugent, and James Smith. In addition, the distinguished visiting scholar holding the Burns Library Chair in Irish Studies will teach graduate courses in the program. For further information about the Irish Studies Program, please see the website at bc.edu/irish.

Master of Arts in Teaching

The Master of Arts in Teaching (M.A.T.) degree is administered through the Lynch School of Education and Human Development in cooperation with the Department of English. It requires admission to both the Lynch School of Education and Human Development and to the Department of English. Course requirements vary depending upon the candidate's prior teaching experience; however, all master's programs leading to certification in secondary education include practical experiences in addition to coursework. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. For further information on the M.A.T., please refer to Master's Programs in Secondary Teaching in the Lynch School of Education and Human Development section of the University Catalog or call the Lynch School's Office of Graduate Admissions at 617-552-4214.

Graduate Assistantships and Teaching Fellowships

Students in the first year of the M.A. program are eligible to receive financial aid in the form of tuition remission. Second year students are eligible for Teaching Fellowships and Teaching Assistantships conferring a stipend.

Certificate in Digital Humanities

In our increasingly digitized world, the question isn't whether to use digital technology, but how. Institutions of higher education, as well as employers in many other sectors, recognize that digital humanities skills such as text analysis, mapping, and coding have transformative potential. BC's Graduate Certificate in Digital Humanities offers a coordinated curriculum that is feasible for graduate candidates to complete alongside existing degree requirements. The program combines interdisciplinary methodological training with discipline-specific coursework to provide students with training and institutional recognition of their accomplishments in this fast-growing field.

A joint effort of the History and English Departments and Boston College Libraries, the program offers M.A. and Ph.D. candidates the opportunity to diversify their skill sets and produce projects such as digital archives, data visualizations, online exhibits, and scholarly websites. This project-based approach puts a premium on collaboration and interdisciplinary inquiry. In the process, Certificate holders will enhance their employment prospects in both traditional academia as well as in publishing, government, museums, libraries, archives, and other alt-ac fields.

Eligibility

Candidates wishing to pursue the Graduate Certificate in Digital Humanities must first be enrolled in a graduate degree program at Boston College. They will be able to pursue coursework in accordance with their preparation under any of the following disciplines:

- Classical Studies
- English
- History
- Economics
- Political Science
- Philosophy
- Psychology
- Romance Languages and Literatures
- Sociology
- Theology

Doctor of Philosophy Program

Normally, no more than four candidates will join the doctoral program each year (one additional candidate is sometimes admitted on an Irish Studies fellowship). The small cohorts make a flexible program possible, individually shaped to suit the interests and needs of each candidate.

All candidates accepted into the program receive stipends and tuition remission. Stipends are guaranteed for five years as long as the candidate is making satisfactory progress toward completion of requirements for the degree.

Course Requirements

Four required doctoral seminars are to be taken in consecutive semesters over the first two years of the program. The remainder of the candidate's program may include other graduate courses in the English Department or related disciplines, small reading groups, or individual tutorials shaped around the candidate's preparation for examinations. A candidate-organized pedagogy colloquium accompanies the teaching years, and an advanced professionalization colloquium is taken in the third or fourth year.

Language Requirement

Candidates must demonstrate an ability to read two foreign languages or a working knowledge and application of one foreign language and its literature. The first alternative requires successful performance on two translation examinations in which a short text must be translated adequately (with use of a dictionary) in two hours, or a grade of B or better in two intensive reading summer courses (or one exam and a B in one language course). The second involves submitting a paper in which knowledge of the foreign language is used to work out a literary question or translating a substantial critical or literary text currently unavailable in English.

Examinations

Each candidate will direct a course of study toward completion of three examinations—a minor field exam by the end of the second year, a major field exam by the end of the third year, and a dissertation prospectus exam.

The minor field examination normally runs one and a half hours and may focus on an author, historical period, theoretical field, or genre. The major field examination is broader in scope and consists of a two-hour oral examination usually on a period or genre. The dissertation prospectus exam, one and a half hours long, explores the dissertation topic and a draft of the dissertation prospectus. All examinations are graded according to the university scale for graduate examinations.

Prospectus, Dissertation, and Defense

After completing the dissertation prospectus exam, the candidate finalizes the prospectus in consultation with his or her dissertation director describing the dissertation topic and including a working bibliography. All dissertation committees will have at least three faculty readers (one of whom may, but need not, be a faculty member from outside Boston College). Submission of the dissertation will be followed by an oral defense. Candidates are responsible for acquainting themselves with all university requirements, fees, and deadlines pertinent to dissertation submission and graduation. This information can be obtained from the English Department office or from the Graduate School of the Morrissey College of Arts and Sciences Dean's office.

Teaching

As part of their program, Ph.D. candidates engage in a carefully organized sequence of teaching experiences. In the second year, candidates spend one semester assisting in a course taught by a faculty member. In the third and fourth years, candidates design and teach courses—First-Year Writing Seminar, Literature Core, a self-designed elective in the candidate's own field, and another course selected to provide the best range of teaching experience for each individual candidate. Faculty mentoring is a part of every phase of this program.

Graduate Colloquium

A committee composed of M.A. and Ph.D. candidates organizes and schedules graduate colloquia, at which faculty members, outside speakers, or candidates lead discussions on literary topics. In alternate years, the spring colloquium will be a full-day graduate conference. All graduate candidates and faculty are strongly encouraged to attend.

Good Standing

Candidates for the degree are expected to remain in good standing in accordance with department guidelines set out for the timely completion of the degree. Continued financial support and participation in the program depends on maintaining good standing.

History

Boston College's History Department attracts talented graduate students from around the nation and around the world. We offer M.A. and Ph.D. degrees with training in a number of regional and thematic specialties. For the master's degree in teaching (M.A.T.) program administered by the Lynch School of Education and Human Development, see M.A. Programs in that section.

[History Faculty](#)

[History Website](#)

Doctor of Philosophy in History

The Ph.D. degree in History is offered with concentrations in United States, medieval, early modern European, modern European (including British/Irish/British Empire), Asian, and Middle Eastern history. We also offer course work in African and Latin American history.

Students will be assigned an advisor upon admission to the program. The advisor oversees the student's progress in preparing for comprehensive exams and in developing a dissertation topic.

Course and Residency Requirements: Students entering into the Ph.D. program are required to complete 39 credits, 36 of which are taken prior to comprehensive exams. All students in the Ph.D. program are required to pursue two semesters of full-time study during the first year and must, in the course of their studies, complete at least two seminars and at least two colloquia (preferably one in the major and one in a minor area) in addition to the required Colloquium for Doctoral Studies.

Plan of Study: By the conclusion of the first semester, and after full consultation with their professors and the Director of Graduate Studies, students file a plan of study leading to the comprehensive examination. This plan of study consists of three areas of concentration. Usually faculty require that students take at least some formal coursework in each field and expect students to develop and master a reading list of important books and articles. With the approval of the advisor and the Director of Graduate Studies, students may select a discipline related to History, or a topic within, that cuts across traditional geographical or chronological boundaries. When considered necessary to a student's program, the department may require advanced-level work in a related discipline, either as a minor field or as supplemental work. This plan of study may be reviewed, evaluated, and revised whenever necessary. However, changes must be approved by the faculty advisor and the Director of Graduate Studies.

Language Requirement: The language requirement is specific to Ph.D. candidates' major field of study. Medievalists must pass three language exams, one of which must be in Latin. U.S. historians must pass one language exam. In all other fields (Europe, Asia, Africa, Latin America, Middle East), Ph.D. candidates must pass two language exams. Ideally, students will pass one language exam during the first year in the program, and the second (and third, if applicable) exam before taking the oral comprehensive examination. Students may substitute competency in a field of particular methodological or theoretical relevance to their program of study for competency in a second foreign language. To do so, students must petition the Graduate Committee and explain the nature of the field and its importance to the plan of study, particularly the dissertation. Work done in that field must be documented. The student's faculty advisor is responsible for certifying that the student has satisfactorily acquired the appropriate skills and knowledge.

The Comprehensive Exam: The student's oral comprehensive examination will be conducted by an examining board composed of at least three faculty members. A written examination may be substituted for an oral exam at the joint discretion of the student and the student's committee.

The Dissertation: In the spring semester of the third year, students take the Dissertation Seminar in which they write their dissertation proposals. Dissertation proposals must be approved by the student's advisor and the Director of Graduate Studies. Proposals must be completed by the end of the semester following the passing of comprehensive exams and filed with the department. The completed dissertation must be defended at a public oral defense and approved by the dissertation committee and the Director of Graduate Studies.

Master of Arts Programs

The M.A. degree in History is offered with concentrations in United States, early modern European, and modern European (including British/Irish/British Empire) history. We also offer coursework in Asian, African, Latin American, and Middle Eastern history. The Master of Arts in Teaching (M.A.T.) program for secondary school history teachers is administered by the Lynch School of Education and Human Development. It requires admission to both the Lynch School of Education and Human Development and to the Department of History. For further information on the M.A.T., please refer to the Lynch section on Master's Programs in Secondary Teaching or call the Lynch School of Education and Human Development, Graduate Admissions Office, at (617) 552-4214.

Requirements: M.A. students are required to take a total of 30 credits or 10 courses. Students are required to take at least one colloquium and one seminar, in addition to the required Colloquium for Master's Students. Classes with a number above HIST4000 count toward the degree. Students are not allowed to complete the M.A. program by attending only summer sessions; at least four courses (12 credits) must be taken during the regular academic year.

Plan of Study: All candidates for the M.A. in History are encouraged to pursue an individual course of study developed in conjunction with their faculty advisor and selected by the student during the first year in the program. In selecting courses and seminars, students are urged to widen their chronological and cultural horizons while deepening and specifying one special area of concentration.

Students must choose a major and minor field. As many as seven courses (21 credits) can be taken in the major field. The minor field is made up of a minimum of three courses (9 credits), at least one of which must be at the 7000 level or above. Minor fields can be chosen from the same list of major fields or can be thematic or topical. Such fields, for example, could include social or labor history; environmental history; or could concern race, gender, or sexuality in the writing of history. Minor fields must be approved by the Director of Graduate Studies.

Students may take up to three courses outside the Department of History. Most students take courses in other Morrissey College of Arts and Sciences departments; these do not require approval. If a student wishes to take courses outside of Arts and Sciences, (e.g. the Lynch School of Education and Human Development or the School of Theology and Ministry), then the student must obtain written permission from administrators of that program as well as the Director of Graduate Studies. Boston College is also a member with Boston University, Tufts University, and Brandeis University of the Boston Area Consortium. Students are allowed to enroll in one course per semester at one of these universities.

In addition to the departmental offerings, it is possible to do minor fields in archival management and in cultural heritage/public history through the Graduate School of Library and Information Sciences at Simmons University.

Language Requirement: M.A. candidates are required to pass one foreign language reading examination before graduation. The use of dictionaries is permitted. Students who fail an exam are welcome to retake the exam until they obtain a passing grade.

Exam and Thesis: Students must complete a comprehensive exercise. This can take one of two forms:

1. An oral comprehensive exam administered by the student's advisor and a faculty member from the minor area;
2. A 6-credit thesis in their final year in the program, culminating in an oral defense of the thesis before a committee of two faculty members.

Certificate in Digital Humanities

In our increasingly digitized world, the question isn't whether to use digital technology, but how. Institutions of higher education, as well as employers in many other sectors, recognize that digital humanities skills such as text analysis, mapping, and coding have transformative potential. BC's Graduate Certificate in Digital Humanities offers a coordinated curriculum that is feasible for graduate candidates to complete alongside existing degree requirements. The program combines interdisciplinary methodological training with discipline-specific coursework to provide students with training and institutional recognition of their accomplishments in this fast-growing field.

A joint effort of the History and English Departments and the Boston College Libraries' Digital Scholarship Group, the program offers M.A. and Ph.D. students the opportunity to diversify their skill-sets and produce projects such as digital archives, data visualizations, online exhibits, and scholarly websites. This project-based approach puts a premium on collaboration and interdisciplinary inquiry. In the process, certificate

holders will enhance their employment prospects in both traditional academia as well as in publishing, government, museums, libraries, archives, and other alt-ac fields.

The curriculum for the certificate program consists of three courses: a digital humanities introductory colloquium; one relevant course within the home department; and a digital humanities as public scholarship capstone course.

Applications to the M.A. and Ph.D. Programs

The deadline for applications to the Ph.D. program in history is January 2 and the deadline for applications to the M.A. program is February 1. Ph.D. and M.A. applicants must submit official undergraduate and graduate transcripts, at least three letters of recommendation, a statement of purpose emphasizing intellectual interests, a writing sample (a paper written for a recent course or one written expressly for the application), and all the application forms. Applicants may choose to submit GRE scores as well.

Funding

The History Department has a highly competitive Ph.D. program, but one which guarantees five years of funding to all incoming Ph.D. students contingent upon satisfactory academic performance and progress towards the degree, as well as satisfactory performance in teaching as evaluated by the faculty of the Department of History.

Students interested in the Doctoral or Master's programs should write to:

Director of Graduate Studies
History Department
Boston College
Chestnut Hill, MA 02467
E-mail: k.demeo@bc.edu

Islamic Civilization and Societies

The graduate program in Middle Eastern Studies offers an interdepartmental, interdisciplinary curriculum designed for students who wish to acquire a broad background in Middle Eastern history, cultures, and politics. The program seeks to prepare candidates for a variety of post-graduate opportunities in diplomacy, human rights, government and public service, business, media, non-governmental organizations, and cultural institutions in the United States and abroad. Master's students contribute to the intellectual life of the Boston College community and are encouraged to participate in colloquia and conversations across the University.

The master's program in Middle Eastern Studies (MES) offers two areas of focus: (1) Politics and International Relations and (2) Religion, Culture, and Society. Students have considerable flexibility in designing their programs of study and have access to the resources of all relevant departments, such as Art, Art History, and Film, Music, History, Near Eastern Languages and Literatures, Political Science, Theology, and other departments of the University. In addition to the wide range of courses offered within the MES program, students have the opportunity to utilize the resources of the outstanding network of scholars in the Boston area, including those of our Boston Area Consortium partners at Boston University, Tufts University, and Brandeis University.

This is a two-year program. Students are required to take ten courses (30 credits), three courses per semester. No more than two language courses may be taken without the approval of the director of graduate studies. A written comprehensive exam or a thesis project completes the program. If a student chooses to write a thesis, eight courses are required, and the comprehensive exam is waived. Students who choose to take written comprehensive exams must clear up all "Incompletes" and file an approved copy of their Program of Study. A candidate who fails the Master's Comprehensive Examination may take it only one more time.

Master's students' performance will be reviewed by the graduate committee during the second semester of their first year. To remain in good standing, M.A. students must maintain a grade point average of at least 3.0.

Mathematics

Ph.D. Degree Requirements

The requirements for the Ph.D. fall into five categories: coursework, examinations (Preliminary, Language, and Comprehensive), teaching, a dissertation, and a residency requirement of two consecutive semesters with full-time registration.

Coursework: Students must complete at least 50 credit hours at the graduate level, including the first-year core curriculum, and receive a grade of B- or higher in at least 44 of these. The first-year program consists of core courses in Algebra (MATH8806, MATH8807), Geometry/Topology (MATH8808, MATH8809), Real Analysis (MATH8810), Complex Analysis (MATH8811), Graduate Teaching Seminar (MATH8890), and Graduate Research Seminar (MATH8892). The second year is devoted to electives. Students with prior comparable coursework may be exempted from one or more of the first-year graduate courses, upon approval of the Assistant Chair for Graduate Programs. Up to 18 credit hours of the coursework requirement may be waived for students with prior graduate work, upon approval of the Assistant Chair for Graduate Programs.

Examinations: There are two types of examinations: Preliminary and Comprehensive.

Preliminary: All students must take preliminary exams in two of the three following subjects: Real and Complex Analysis; Algebra; Geometry and Topology. These exams cover the material in the core first-year courses and are taken at the end of May following the first year. They may also be taken in the fall by advanced entering first year students or by second year students who have not already passed all their preliminary exams. Preliminary exams are graded as follows: Ph.D. pass, M.A. pass, or fail. Students are strongly encouraged to complete two preliminary examinations at the Ph.D. pass level by the start of their second year. The following two rules apply: (1) students may retake each preliminary exam once; (2) students must pass two preliminary examinations at the Ph.D. pass level by the end of their second year in order to continue in the program after their second year. Exceptions to these two rules require the approval of the Chair, who will consult the Assistant Chair for Graduate Programs, and the student's instructors before arriving at a decision. Exceptions will be granted when there is clear evidence of potential to complete a degree in a timely way or for special circumstances such as extended illness. A student with advanced preparation may choose to take one or more of the preliminary examinations upon entering Boston College. In such a case, the examination would not count as one of the student's two attempts and failure of the examination would have no negative consequences. Students who wish to take an examination upon entrance should notify the Assistant Chair for Graduate Programs in writing by mid-July that they intend to do so.

Doctoral Comprehensive: After passing the preliminary exams at the Ph.D. level, the student requests that a department faculty member (tenured or tenure-track) serves as his/her research advisor. Upon agreement of the faculty member, the student, in consultation with the research advisor, forms a Comprehensive Examination Committee, consisting of the research advisor and at least two other members. Two members must be from Boston College; the chair must be a tenured or tenure-track member of the departmental faculty. Committee composition is subject to departmental approval. The comprehensive exam can be taken any time after the Comprehensive Examination Committee has been chosen. We recommend that it be taken as soon as possible, to allow time for dissertation research. The doctoral comprehensive exam consists of a research topic and one secondary topic, chosen by the student in consultation with the student's Committee. Typically, these are based on topics courses or independent study completed by the student in the second and third years. The comprehensive exam has both a written and an oral component. In the written part the student is given a week to solve problems or answer questions in the chosen areas. The Committee then reads the student's work and questions the student about it in the oral exam, which may range into related areas. After the oral exam, the Committee grades the entire comprehensive exam as Pass with Distinction, Pass, or Fail. A student who fails the comprehensive exam may take it one additional time, but not sooner than the following semester.

Teaching: In addition to their responsibilities as teaching assistants and teaching fellows, students participate in the required Graduate Teaching Seminar in the fall semester of their first two years. The first-year teaching seminar is for teaching assistants, covering their responsibilities both to their students and their supervisors and providing guidance on leading a classroom for the first time. The second-year teaching seminar is for teaching fellows, providing guidance for teaching their own classes.

Dissertation: Upon satisfactory performance on the Language and Doctoral Comprehensive Examinations, the student is eligible to be admitted to candidacy for the Ph.D. To be admitted, the student formally constitutes a Dissertation Committee which is then approved by the Assistant Chair for Graduate Programs. The Comprehensive Examination Committee will typically become the student's Dissertation Committee; any changes of membership require the department's approval. At this point the student begins research for the doctoral

dissertation. The dissertation must consist of original scholarly work. The Dissertation Committee will read and evaluate the completed dissertation and conduct an oral examination, at which the dissertation is defended in a public meeting. The dissertation is accepted when endorsed on the official title page by the Dissertation Committee after the oral examination. After ensuring that the format of the accepted dissertation conforms to Boston College requirements, the student submits the dissertation to the University.

Qualified students accepted to the program are offered financial aid stipends and tuition remission. It is anticipated that support will be provided for five years of study, given reasonable progress toward the degree and acceptable performance of Teaching Assistant/Fellow duties.

More information about the Ph.D. program can be found at the graduate program menu option at bc.edu/math.

Master of Arts Degree

Students enrolled in the Ph.D. program who receive at least an M.A. pass in two of the three preliminary exams and pass at least 30 credits of mathematics graduate courses, including at least five semesters of the first-year graduate courses in Real and Complex Analysis, Algebra, and Geometry/Topology, will receive an M.A. degree. Advanced undergraduate courses may count towards the 30 credits in meeting the M.A. requirements with the permission of the Assistant Chair for Graduate Programs. Students who skip a first-year course because of advanced preparation may substitute more advanced courses in any area, with the permission of the Assistant Chair for Graduate Programs. A student may receive an M.A. and continue on to a Ph.D. provided the student meets the Ph.D. requirements above.

Master of Science in Teaching Program

The Master of Science in Teaching (M.S.T.) program is administered through the Lynch School of Education and Human Development in cooperation with the Department of Mathematics. Application for the program is made to the Lynch School, and students must be accepted by the Lynch School and approved by the Department of Mathematics.

This program is designed either for experienced teachers or for prospective teachers. It is a two-year program that consists of 46 credits, of which 31 are in Education and 15 are in Mathematics. All master's programs leading to certification in secondary education include practical experiences in addition to coursework. Students seeking certification in Massachusetts are required to pass the Massachusetts Educators Certification Test. Degree candidates draw up an overall plan of study with joint advisement from the Assistant Chair for Graduate Programs in Mathematics and the advisor for the M.S.T. program in the Lynch School. For further information on the M.S.T., refer to the Master's Programs in Secondary Teaching in the Lynch School section of the University Catalog or call the Office of Graduate Admissions, Lynch School, at 617-552-4214.

Of the 15 credits for the mathematics component of the M.S.T., candidates are required to complete MATH8810–8811 Real and Complex Analysis, which should be completed in the first year. The other credits must be earned in MATH courses at or above the 4000-level. Because of certification requirements, unless approved equivalents have been taken previously, these required courses should include the following:

- MATH4451 Euclidean and Non-Euclidean Geometry
- MATH4426–4427 Probability and Mathematical Statistics

Some exposure to the use of computers in mathematics that may be accomplished by any Computer Science major course beyond Computer Science I.

Other courses particularly well-suited for this program are MATH4430 Number Theory and MATH4475 History of Mathematics. M.S.T. candidates must also pass an oral comprehensive examination and submit a brief expository paper in some area of mathematics.

Philosophy

The Department of Philosophy offers M.A. and Ph.D. programs. These programs provide a strong emphasis on the history of philosophy (ancient, medieval, modern, and contemporary) and a special focus on Continental philosophy from Kant to the present. Faculty also teach and conduct research in metaphysics, philosophy of science, philosophy of religion, ethics, aesthetics, and social and political philosophy. Students have considerable flexibility in designing programs of study and have access to the resources of Political Science, Theology, and other departments. If a desired course is not offered, it may be possible to arrange a Readings and Research course on the desired topic (please consult with the appropriate professor if you wish to do so). The department also participates in a Joint M.A. Program in Philosophy and Theology, a Law and Philosophy Dual Degree Program, and an M.A. program in Philosophy, Law, and Policy (see below).

Admission to the doctoral program is highly selective (about five admitted each year from over 150 applicants). Doctoral studies are funded for five years in the form of tuition remission, Research Assistantship and Teaching Fellowship, and a University Fellowship in the last year for the writing of the dissertation free of any other duty. Doctoral students are expected to pursue the degree on a full-time basis and to maintain satisfactory progress toward the completion of degree requirements.

The M.A. program may be taken on a full-time (two years) or part-time basis (five years maximum). Financial aid and tuition remission are not normally available for students seeking the M.A.

All applicants are strongly encouraged to submit the results of the Graduate Record Examination. Students who speak a native language other than English must provide evidence of English proficiency. A score of 100 or higher on the TOEFL iBT test or 7.0 or higher on the IELTS test is required. TOEFL and IELTS scores are considered valid from exams taken a maximum of two years prior to application program deadlines.

For more information on the programs, please consult our website at bc.edu/philosophy.

[Philosophy Courses](#)

[Philosophy Faculty](#)

[Philosophy Website](#)

M.A. Program Requirements

Requirements for the M.A. are as follows:

- Ten courses (30 credits)
- Proficiency in one foreign language
- Qualifying research paper

It is possible, though not common, for students to write an M.A. thesis in place of two courses (six credits).

Ph.D. Program Requirements

Requirements for the Ph.D. are as follows:

- One year of full-time residence
- Sixteen courses (48 credits)
- Proficiency in logic (tested by course or by examination)
- Proficiency in two foreign languages
- One hour and fifteen-minute oral Preliminary comprehensive examination
- Doctoral comprehensive examination
- Dissertation
- Oral defense of the dissertation

- Students entering the program with an M.A. in philosophy may be credited with six courses (18 credits) toward the Ph.D.

The Preliminary comprehensive exam is a one hour and fifteen-minute oral examination on a reading list in the history of philosophy, and it is to be taken at the end of the student's first year. The Doctoral comprehensive exam has two components: writing and oral defense of a qualifying paper; submission and oral defense of a dissertation prospectus. They are to be completed no later than the student's fourth year.

Joint M.A. Program in Philosophy and Theology

The Joint M.A. program is administered collectively between the Philosophy and Theology departments. It is structured around distinct concentrations which address major areas of common concern, such as faith and science, philosophy and religion, foundations in Philosophy and Theology, and Medieval Philosophy and Theology. The degree program has two directors representing each department. Students develop a program of study in discussion with an academic advisor and take courses in the standard graduate programs offered by the Philosophy and Theology departments.

Law and Philosophy Dual Degree Program

These programs are designed for students interested in philosophy of law, legal theory, and jurisprudence, and may eventually wish to go into legal practice or teaching in those fields. Students may complete their master's in philosophy and law degree in four years of joint study or Ph.D. and law degree in seven. Students must apply to both Boston College Law School and master's or Ph.D. program in Boston College Philosophy Department and be admitted in both.

M.A. Program in Philosophy, Law, and Policy

For students interested in relating theory and practice, the M.A. program in Philosophy, Law and Policy offers the opportunity to address policy questions in an integrated way. As a collaboration between the Morrisey College of Arts and Sciences, the Law School, the Lynch School of Education and Human Development, and the School of Theology and Ministry, and housed in the Department of Philosophy, the program provides students with a foundational core in philosophy, law, and social science. In consultation with a program advisor, students then focus their own paths of inquiry by choosing electives across the participating schools and departments.

The Lonergan Institute

Studies related to the work of Jesuit theologian and philosopher Bernard Lonergan (1904–1984) are sponsored by the Lonergan Institute at Boston College. The Institute supports the renowned Lonergan Workshop and other conferences, scholarship assistance, and operates the Lonergan Center, a center for research with an extensive collection of published and unpublished works. For more information, refer to the Research Centers in the "About Boston College" section of this catalog or to the website: bc.edu/lonergan.

Physics

The Department offers comprehensive programs of study and research leading to the degrees of Doctor of Philosophy (Ph.D.), with an interim Master of Science. Students may also obtain a Master of Science in Teaching (M.S.T.) in conjunction with the Lynch School of Education and Human Development. Courses emphasize a strong foundation in the basic principles of physics, preparing the student to undertake advanced research under the supervision of a faculty advisor. Graduate students are encouraged not only to collaborate closely with their research advisor, but also to draw upon the experience of the entire faculty and other graduate students. Our students are trained primarily to carry out independent research at the Ph.D. level, and our graduates have gone on to successful careers in many areas.

[Physics Courses](#)

[Physics Faculty](#)

[Physics Website](#)

Doctoral Program

A student enters the doctoral program upon faculty recommendation after passing the Doctoral Comprehensive Examination and the Research Proposal Examination (RPE). Upon the student's passing performance of the RPE, the student and their advisor, in consultation with the Chairperson, shall establish a doctoral thesis committee consisting of the student's advisor, who will chair the committee, and at least three additional tenure-track or tenured faculty members, with at least two from the physics department.

Requirements

Twelve courses are required for the doctorate degree. These include seven courses that cover the fundamental areas of classical and quantum physics, a graduate seminar, plus four additional distributional courses in distinct areas chosen from the graduate electives of the department or from other graduate departments with the approval of the chairperson. Two courses in condensed matter physics are strongly recommended as two of these four elective courses.

Some teaching or equivalent educational experience is required. This requirement may be satisfied by at least one year of service as a teaching assistant or by suitable teaching duties. Arrangements are made with each student for a teaching program best suited to their overall program of studies.

Comprehensive Examination

The comprehensive examination is a written exam that covers all of physics that a physics graduate student can be expected to know at the end of one year of formal course work in the curriculum; however, it will stress classical mechanics, electromagnetism, quantum mechanics, and statistical physics. The examination is prepared and administered by a faculty committee, appointed by the Chairperson, and the examination is evaluated by this committee with approval of the faculty of the department.

The examination is offered twice a year, the week before the beginning of each semester. The student must pass one of two possible attempts in order to continue in the graduate program before the end of their second year. A student who fails the first attempt must make their second attempt the next time the exam is offered. The first attempt would typically be a fall exam taken a week before the beginning of the student's second fall semester. If unsuccessful, the second try would be a spring exam, one week before the beginning of their second spring semester. With approval, exceptionally well-prepared and qualified students may make their first attempt of the exam either by arriving one week early to take a fall exam or taking a spring exam during their first year. A student choosing to do this who does not pass their first attempt must take the comprehensive examination before the next semester begins.

Research Proposal Examination

Within one year of passing the comprehensive examination, a student shall take the Research Proposal Exam (RPE). The purpose of this oral examination is for the student to assimilate work done in an area of research and to define a research project that addresses one or more open important questions in this area. The RPE will be a 40-minute, public presentation followed by 20 minutes of questions by the exam

committee in private. The proposal should include a detailed explanation for how the student proposes to address the open questions and preferably include preliminary results. The topic of the RPE will be chosen by the graduate student's research advisor and will not necessarily be the student's ultimate thesis topic. The questions will not be restricted to the RPE topic but will also require the student to demonstrate some breadth. The examination will be evaluated by a committee prepared by the student's doctoral thesis advisor and will consist of at least two additional department faculty. The student will have at most two opportunities to pass this exam. Those who do not pass the RPE on the first try must make a second attempt within six months of this time. Students will not advance to Ph.D. candidacy without passing the RPE, and after two unsuccessful attempts will not receive additional TA support from the department.

Thesis Defense

Upon the student's passing performance of the RPE, the student and their advisor, in consultation with the Chairperson, shall establish a doctoral thesis committee consisting of at least four members, including the student's advisor, who will chair the committee, and at least three additional tenure-track or tenured faculty members, with at least two of these from the physics department, in addition to the chairperson. The committee will read and evaluate the completed thesis and conduct an open meeting at which the thesis is defended in an oral examination. The thesis is accepted when endorsed on the official title page by the Doctoral Thesis Committee after the oral examination.

Admissions Information

Financial support for qualified students is available in the form of teaching assistantships. Research assistantships are also available during the summer and academic year, depending on the research area and the extent of current funding. Please see our website regarding requirements related to the GRE Aptitude Test and Advanced Test. Students whose native language is not English must provide evidence of English proficiency.

General Information

Waivers of departmental requirements, if not in violation of graduate school requirements, may be granted by recommendation of the Graduate Affairs Committee with approval of the Chairperson.

Research Information

The Physics Department is strongly research oriented with faculty involved in both experimental and theoretical areas. The department is one of the strongest in materials and optics research, of both fundamental and applied topics. Some areas of current interest are in the condensed matter physics areas of superconductivity, photovoltaics, thermoelectrics, nanomaterials, plasmonics, plasmas, topological states, quantum information science, 2D atomic crystals, and other strongly correlated electron systems. Cutting-edge research facilities are available to our graduate students, including: Scanning Tunneling Microscopy (STM); thin film growth; Raman and Infrared microscopy; thermal and electrical conductivity at low temperatures and in the presence of high magnetic field; Near-Field Scanning Optical Microscopy (NSOM/A-NSOM); x-ray; NMR; materials/nano-materials; (Clean Room) preparation laboratories; graduate and undergraduate computational facilities; and access to the University computing system.

The Department of Physics is constantly enhancing and supplementing these facilities. In addition, the Department has developed strong ties to many outside facilities, including Los Alamos National Laboratory, Argonne National Laboratory, the Institute for Complex Adaptive Matter (ICAM), Brookhaven National Laboratory, the Naval Research Laboratory, and the National High Magnetic Field Laboratory. Boston College's participation in the Boston Area Graduate School Consortium enables students to cross-register for graduate courses at Boston University, Brandeis University, and Tufts University. Students wishing for more detailed information can write to the Physics Department or visit bc.edu/physics.

Political Science

The Department offers advanced study in American Politics, Comparative Politics, International Relations, and Political Philosophy. It displays a distinctive blend of philosophical and practical concerns within a tradition of friendly debate and scholarly exchange. Seminars and courses are supplemented by individual readings and informal gatherings. Both the master's and doctoral programs are flexible as to fields and courses, and they allow students to study in other Boston College departments. Graduate students in the Graduate School of the Morrissey College of Arts and Sciences are eligible to cross-register for one graduate course per semester during the academic year at Boston University, Tufts University (not at the Fletcher School of Law and Diplomacy) and at Brandeis University with the approval of the Graduate Director or the Master's Program Director.

[Political Science Courses](#)

[Political Science Faculty](#)

[Political Science Website](#)

Masters of Arts Degree

The master's program is a two-year program. Students are required to take ten courses (30 credits) with at least one course taken in three of the department's four fields (American Politics, Comparative Politics, International Politics, and Political Theory). The passing of a written comprehensive examination completes the requirements of the program. A student is allowed to take two or, with permission, three courses in other Boston College departments, and may also receive credit for two courses by writing a thesis. If a student chooses to write a thesis, the comprehensive examination is waived. In lieu of a thesis or a comprehensive examination, students also have the option of taking Advanced Directive Study (ADS) with a supervising faculty member. An ADS is a focused final paper project that is based on a paper that a student has already written in a seminar.

Doctor of Philosophy Degree

Fourteen courses (42 credits) are required for students entering the program with no previous graduate work. Students generally take three courses a semester. Of the fourteen courses, three may be in independent study and two (not more than one a semester) in non-graduate courses. This latter option is usually appropriate only when needed to offset a deficiency in a student's undergraduate background in a field. Generally, graduate students taking non-graduate courses are required to do additional work beyond the requirements set for undergraduates in those courses.

Admissions

An undergraduate major in political science is preferred, but not required. Applicants must demonstrate both past performance of exceptional quality in their academic work and promise of sustained excellence in the future. The Department requires the GRE General Test, three letters of recommendation, a Statement of Purpose, transcript, and a sample of scholarly work, such as a term paper (20-25 pages).

- Completed applications for the Ph.D. program should be submitted by January 2.
- Completed applications for the M.A. program should be submitted by February 1.

Financial Aid

The Department is usually able to provide financial support to our doctoral students for a period of four to five years, pending satisfactory performance. This financial support to our doctoral students consists of a service stipend and full tuition remission during the period that the doctoral student is funded. The service stipend is compensation for up to twenty hours per week of research assistance or teaching assistance to members of the faculty or teaching assistance in undergraduate courses. Each year the Department also awards a Thomas P. O'Neill, Jr. Fellowship to one student in American politics in honor of the late Speaker of the House. Students are expected to be in residence to fulfill their service requirement.

Psychology and Neuroscience

The Department of Psychology and Neuroscience at Boston College offers two graduate programs, both research-oriented: a doctoral (Ph.D.) program and a Fifth Year M.A. program. Completion of the doctoral program typically requires four to five years of training after the bachelor's degree. Completion of the Fifth Year M.A. program requires one consecutive year beyond the B.A. or B.S.

The Ph.D. program requires that students devote 100 percent of their time and effort to their studies, including summers. Students are admitted whose interests fall within or bridge one or more of our five areas of concentration, listed below. Our program requires adequate preparation, ability, maturity, and motivation to pursue a demanding program of individual research and scholarship. Because of our emphasis on research and on a mentoring relationship with one member of the faculty, a principal criterion for admission to our graduate programs is that a student's interests be compatible with those of at least one member of the faculty. Each student is admitted to work with a faculty member as his/her advisor.

The Fifth Year M.A. program is limited to students who are majoring in Psychology or Neuroscience at Boston College. The program is designed to allow selected students to earn both a B.A. or B.S. and an M.A. in Psychology in five years. The purpose of the program is to allow students a greater opportunity for concentrated study and research training. Such training is excellent preparation for application to a Ph.D. program in any area of psychology. Undergraduate Psychology and Neuroscience majors may apply to continue their studies and to earn an M.A. with the equivalent of another, consecutive year of full-time study.

The areas of concentration in the Department of Psychology and Neuroscience:

- Behavioral Neuroscience
- Cognitive Neuroscience
- Developmental Psychology
- Quantitative and Computational Psychology
- Social Psychology

Visit the department's website at bc.edu/psychology for additional information on these areas.

General Information

Visit the department's website at bc.edu/psychology and find detailed information about the research interests of individual faculty members and the requirements for completing the program. For application materials or further information, visit the [Graduate School of the Morrissey College of Arts and Sciences Admission](#) website.

The deadline for applications to the Ph.D. program is December 15. Applications are accepted for fall term admissions only. Applicants should submit:

- Application form
- Official transcripts
- Three letters of recommendation
- Statement of research interests
- Application fee

The GRE is optional.

The deadline for applications to the Fifth Year M.A. program is February 1 of the student's junior year. Applicants should submit:

- Application form
- Official transcripts
- Two letters of recommendation
- Statement of research interests

Romance Languages and Literatures

The M.A. Programs

The Department includes the fields of French and Francophone, Italian, and Hispanic (Peninsular and Spanish American) literatures and cultures. The Master of Arts degree is offered in French, Italian, and Hispanic Studies. The degree is meant to prepare students to enter doctoral programs, to teach one of the Romance languages, or to take up professional positions in other fields, such as general education, business, or publishing. For complete information concerning the RLL graduate programs, visit the [Master of Arts Programs](#) page.

Deadlines and Prerequisites for Admission

The M.A. application is due on February 1. Candidates for all Master of Arts programs should have an undergraduate major or its equivalent in the appropriate field, including advanced composition and surveys of the pertinent literatures. Since nearly all courses in the department are conducted in the target language, students must enter the program with sufficient oral and written proficiency to perform with ease in the relevant linguistic environment. For complete information concerning the graduate programs, visit the [Master of Arts Degree in French, Hispanic, or Italian Literature and Culture](#) page.

Master of Arts Degree in French, Hispanic, or Italian Literature and Culture

- Completion of 31 credits of coursework which includes ten RLL courses and the 1-credit Professional and Pedagogical Seminar with a minimum average of B or better
- Completion of the Independent Research Project (see below)
- Participation in the occasional department workshops and “practica” on pedagogy and professional formation, including the department Orientation for new teaching fellows held during the third week of August. At the beginning of each year, the department Director of Graduate Studies will inform students of the schedule of any other workshop and practice to be offered during the academic year.
- Graduate students must take whatever graduate courses are offered in their particular language section before they will be allowed to take courses in other language sections in the department, outside of the department, or another school.
- Graduate students can only earn credit for graduate-level courses (“mixed level” courses open to both graduates and undergraduates are included in this category).

If in a given semester, their language section does not offer sufficient graduate courses, students may obtain credit by taking a graduate course in another section of the department or in another Boston College department, or taking graduate seminars in the target language at Boston University. The written permission of their advisor is required before students can enroll in any of these courses.

Distribution Requirement in French

French student should endeavor to take at least one course from as many different areas of the curriculum as possible (Medieval, Early Modern, Eighteenth Century, Nineteenth Century, Twentieth Century, Francophone).

Distribution Requirement in Hispanic Studies

Over the two-year period of the M.A. program, students will take at least one course in each of the following distribution areas:

- Pre-1800 Peninsular
- Post-1800 Peninsular (including film)
- Pre-1900 Latin American
- Post-1900 Latin American (including film)

Distribution Requirement in Italian

Each semester the Italian section faculty offer two 8000-level graduate seminars (and/or 5000-level advanced courses open to graduate students and qualified undergraduates). M.A. students in Italian are required to take both of these 8000-level or 5000-level courses each semester.

Independent Research Project

- All M.A. candidates in French, Hispanic Studies, and Italian are required to complete the Independent Research Project (IRP) as part of their degree program. During the summer between their first and second years, M.A. students write a paper, in the target language, which represents a significant revision or extension of a paper written in a graduate course taken during the first two semesters of study. The candidate's formal presentation of the paper will be made before the faculty of the section, again in the target language.

Guidelines

- In consultation with the faculty member whose course is at the origin of the project, the student will define a precise topic by the end of the second semester of the first year of study and before the summer break. That same faculty member (in whose specialization the project falls) will serve as the student's IRP director, unless another faculty member with sufficient expertise agrees to assume that role. Students should also inform their academic advisors of their plans for the IRP.
- The principal work on the project will be carried out by the student over the summer between the first and second years, under the guidance of her/his IRP director.
- The paper should demonstrate critical competence in textual analysis, in developing and sustaining an argument, and in appropriate use of evidence and citation of sources. For further guidelines, please consult and follow the instructions contained in the RLL Department's publication, "[The Graduate Research Paper: An Essential Guide.](#)" The IRP will also be judged by the "[Learning Outcomes](#)" established by the department for Masters of Arts students.
- The IRP should be between 20–25 pages in length, including bibliography.
- The IRP deadlines must be strictly adhered to. They are as follows: (1) May 15: IRP topics and outline must be finalized and approved by the IRP director; (2) August 15: first draft of the complete essay must be sent to the IRP director; (3) September 10: no later than this date, students must meet with director to discuss the IRP draft and receive feedback for completion of the final draft; (4) October 10: final draft of the IRP must be submitted to director; (5) November 1: final version of IRP must be submitted to all faculty members in their language section.
- The student who does not meet the November 1 deadline will not be allowed to continue with the IRP and will instead be obliged to take a written, comprehensive exam. This four-hour, Pass/Fail exam will take place in the spring semester (during the week following Spring Break) and will cover all of the student's completed courses.
- Successful completion of the IRP (or the written comprehensive exam) is required for the granting of the M.A. degree. The M.A. degree cannot be granted to those who do not complete a satisfactory IRP within established deadlines (or do not pass the written comprehensive exam in its place).
- Candidate will make a brief but formal presentation (in the target languages) of the finished IRP before the faculty of his/her section, followed by a short discussion with the faculty. The dates of these presentations are to be determined by each section.
- The IRP will be graded on a Pass/Fail basis.
- There will be a department-wide reception/celebration for all IRP writers in the spring semester, once all three sections have completed their formal presentation. On that occasion, students will deliver brief remarks about the process of developing, researching, and writing their IRPs.

Students may apply for the departmental Sue Nyugen Research Travel Prize to engage in research, outside the U.S., related to their IRP. The best essays will be eligible to compete in the annual departmental Sue Nyugen Prize for Academic Excellence in Graduate Studies.

Information about these two Nyugen prizes can be found on our [Graduate Resources page](#).

Boston-Area Consortium

Graduate students in Arts and Sciences are also eligible to cross-register for one course per semester during the academic year (not including summer sessions) at any of the Boston-area consortium universities (visit the [Policies and Procedures](#) page and view the Cross Registration

section for more information). Cross-registration in consortium courses is subject to the approval of the student's BC academic advisor and the RLL Director of Graduate Studies.

Sociology

Master's Program in Sociology and Social Research

The M.A. program provides the foundation for advanced graduate level study toward the Ph.D. while also preparing students for careers in the areas of social research and applied sociological analysis.

Admissions: Superior students, regardless of their undergraduate area of specialization, are encouraged to apply. Applicants should submit, in addition to the usual transcripts and letters of reference, a statement of purpose, a writing sample, and any other information that might enhance their candidacy. GREs are strongly recommended. Apply online at the [Graduate School of the Morrissey College of Arts and Sciences Admission](#) website.

Master's Degree Requirements: To receive the master's degree in Sociology and Social Research, the student must complete 30 credit hours (generally ten courses). The required courses for all students are the following: a course in Methods of Social Inquiry (SOCY7710) in the first semester of study, one semester of Sociological Theory (SOCY7715 or SOCY7716), and two semesters of Statistics (e.g., SOCY7703 and SOCY7704). With permission of the Graduate Program Director, students may complete either a Master's Thesis or a Master's Paper. Students completing a Thesis or Paper are required to take a course in empirical research (SOCY7711) in the second semester of study and a seminar in writing in their second year (SOCY7761); students not writing a Thesis or Paper are required to take an elective research methods course.

Doctoral Program

The Ph.D. program seeks to combine the rigors of scholarly analysis with a commitment to social justice in a wide range of social institutions and settings. It prepares students for careers as researchers and university and college faculty.

Admissions: The primary criteria for admission are academic performance and promise of outstanding independent work. Applicants should submit, in addition to the usual transcripts and letters of reference, a statement of purpose, a writing sample, and any other information that might enhance their candidacy. GREs are strongly recommended. Apply online at the [Graduate School of the Morrissey College of Arts and Sciences Admission](#) website.

Ph.D. Degree Requirements: Coursework for the doctoral degree is fulfilled by completing a three-course series in social research methods and writing (SOCY7710, SOCY7711, and SOCY7761) two courses in sociological theory (SOCY7715 and SOCY7716), two courses in statistics (e.g., SOCY7703 and SOCY7704), at least one additional course in research methods, and additional elective courses for a total of 54 credits. Other requirements include meeting a one-year full-time residency requirement, an M.A. Thesis or Paper, passing two area examinations, completing a doctoral dissertation, and passing an oral defense.

Certificate in Advanced Quantitative Methods

The Certificate in Advanced Quantitative Methods in sociology is designed to provide formal recognition of an M.A. or Ph.D. student's quantitative methods skills. The certificate appears on the M.A. or Ph.D. students' transcript upon graduation.

To meet the requirements to receive the certificate, the student must complete five approved advanced quantitative courses beyond the level of Introductory Statistics (SOCY7702).

Financial Assistance

All candidates accepted to the Ph.D. program who remain in good academic standing are assured of receiving funding for five years (unless they enter with advanced standing due to graduate work completed elsewhere, in which case they will normally be offered support for four years). Financial assistance assumes the form of tuition waivers and living stipends. Stipends are typically tied to work duties, including teaching and research assistantships. No separate applications for financial assistance are necessary.

Theology

Boston College offers extensive resources for Catholic and ecumenical study of theology. Embedded in the culturally rich Boston metropolitan area, the combined faculties of the Morrissey College of Arts and Sciences Theology Department and the School of Theology and Ministry make Boston College a premier international center for the study of theology. The library, courses, and faculty resources available to graduate students at Boston College are further expanded by Boston College's membership in the Boston Theological Interreligious Consortium (BTI), a consortium of theology faculties primarily in the Boston-Newton-Cambridge area, which has as its constituent members the following institutions:

- Boston College's Department of Theology
- Boston College's School of Theology and Ministry
- Boston Islamic Seminary
- Boston University Graduate Program in Religion
- Boston University School of Theology
- Gordon-Conwell Theological Seminary
- Hartford International University for Religion and Peace
- Harvard Divinity School
- Hebrew College
- Holy Cross Greek Orthodox Seminary
- St. John's Seminary and Theological Institute

This consortium offers complete cross-registration in several hundred courses, the use of library facilities in the ten schools, joint seminars and programs, and faculty exchange programs.

[Theology Faculty](#)

[Theology Website](#)

Ph.D. Program in Theology

The doctoral program in theology at Boston College has as its goal the formation of theologians who excel intellectually in the church, the academy, and society. It is confessional in nature and envisions theology as "faith seeking understanding." Accordingly, the program aims at nourishing a community of faith, scholarly conversation, research, and teaching centered in the study of Christian life and thought, past and present, in ways that contribute to this goal. It recognizes that creative theological discussion and specialized research today require serious and in-depth appropriation of the great philosophical and theological traditions of the past, as well as ecumenical, interdisciplinary, inter-religious, and cross-cultural endeavors.

The program is led by an internationally respected ecumenical faculty. Students are encouraged to explore widely and deeply in a variety of Catholic, Protestant, and Orthodox theological and doctrinal traditions, while also engaging in critical and constructive dialogue with other major religions and cultures.

The program is rigorous in its expectation that students develop a mature grasp of the Christian theological tradition and probe critically the foundations, intelligibility, and relative adequacy of various theological positions. Students are expected to master the tools and techniques of research and to organize and integrate their knowledge in order to make an original contribution to theological discussion. Because the program includes faculty members who are experts in the Hindu, Buddhist, Muslim, and Jewish traditions, it also offers a context in which the issues raised by religious pluralism can be explored, responsibly and in detail, and in which a Christian comparative theology can be pursued seriously.

Successful applicants to the Ph.D. Program will generally have in hand an M.Div., a master's degree in religion, theology, or philosophy, or an equivalent degree.

Areas of Specialization

Students in the doctoral program specialize in one of five major areas: Biblical Studies, History of Christianity, Systematic Theology, Theological Ethics, or Comparative Theology.

Biblical Studies focuses on the canonical books of the Bible both within their historical and cultural world and in relation to their reception within the Christian and Jewish traditions. All students will acquire a thorough competency in both the Old Testament/Hebrew Bible and the New Testament including competency in Hebrew, Aramaic, and Greek. They may learn other ancient languages and literatures as their research requires and must acquire a reading knowledge of German and French. The comprehensive exams will cover the whole Bible, with emphasis on either the Old Testament/Hebrew Bible or the New Testament, and will include a specialized exam in an area of study pertinent to the student's dissertation. Students will be expected to pass a general examination on the testament that is not their specialty (which counts as their "minor" area).

History of Christianity (HC) area studies past theological reflection on the faith and practice of the Church, especially in early and medieval Christianity. The HC area strives to appreciate these theological expressions both within their immediate historical contexts (social, cultural, institutional) and within the broader trajectories of theological development in the Christian tradition.

Systematic Theology is the contemporary intellectual reflection on the content of divine revelation as an interrelated whole. The program fosters the capacity to treat theological material systematically, constructively, and contextually, according to methods that attend to the coherence and interconnectedness of the elements of the Christian tradition, to take responsibility for the tradition's ongoing development, and to address diverse cultural situations. Special attention is given to the historical development of Christian thought and doctrine, its intellectual cogency, its role and significance within different cultural contexts, its contemporary expressions from different theological perspectives, and newly emergent questions.

Theological Ethics includes the ecumenical study of major Christian ethicists and attends to the Biblical foundations, philosophical contributions, socio-political contexts, and theological interpretations of ethics. The program encompasses the historical development of traditions in Christian ethics, including the natural law and virtue ethics. It also includes a strong social ethics component as well as offerings in applied ethics. The exploration of contemporary ethics is set in a critical, historical perspective and encourages attention to the global, multicultural, and public character of the Christian community. Interdisciplinary and intersectional work on contemporary ethical problems is also encouraged. Within its Ph.D. program in Theological Ethics, the Boston College Theology Department offers the possibility of a track focused on Catholic Health Care. The purpose of the track is to integrate the comprehensive theological training that characterizes the Ph.D. program in Theological Ethics with two focused internships that will empower students by providing them with expertise regarding health care practices in Catholic health care facilities (both a long-term care facility and an acute care hospital).

Comparative Theology involves faith seeking understanding in constructive dialogue with another religious tradition. Students are expected to acquire significant expertise in a religion other than their own, as well as a solid grounding in a particular area of theology (Ethics, Biblical studies, Historical Theology, or Systematic Theology). Equipped with the methodological tools of the comparative study of religion, as well as a critical self-awareness of theology of religions, students will reflect on a particular theological question or problem in their own religious tradition through constructive engagement with analogous ideas or practices in the other tradition. This will prepare them to teach courses in Christian theology and in their non-Christian religious tradition, as well as in interreligious dialogue and comparative theology more generally. As a minor area of study, Comparative Theology may also expand the theological and professional opportunities of students in any other area of the doctoral program.

Language Requirements

Each doctoral student must pass examinations in at least two languages. These test the student's proficiency in reading languages important for his or her research and must be passed before admission to the comprehensive examinations. Students may take either the departmental translation examinations (offered three times a year) or pass (with a grade of B+ or better) the twelve-week summer intensive language courses offered by the Graduate School of the Morrissey College of Arts and Sciences.

Some areas may require more than a minimum of two languages or more advanced proficiency. Knowledge of various ancient languages may also be required, depending on the student's dissertation topic. Thus, Greek, Latin, and Hebrew may well be required for students working in the early Christian and/or medieval period. Students in Biblical Studies are expected to demonstrate proficiency in appropriate ancient and

modern languages. Students in Comparative Theology are expected to acquire at least an intermediate level of proficiency in a language related to the non-Christian religious tradition they are studying.

Joint M.A. in Philosophy and Theology

If you have questions and interests that lead you into both philosophy and theology, or would like to deepen your understanding of each field by opening it to the other, you might consider pursuing an M.A. in Philosophy and Theology at Boston College.

Drawing on the resources of large major departments and distinguished authorities in each field, and situated at the heart of a prominent Jesuit Catholic university, this program is structured around distinct concentrations that address major areas of common concern to the two fields, and explores their historical, systematic and disciplinary relations. Students develop a program of study in discussion with an academic advisor, and take courses in the standard graduate programs offered by the Philosophy and Theology departments. Concentrations include: Faith, Science and Philosophy; Foundations in Philosophy and Theology; Medieval Philosophy and Theology; and Philosophy and Religions.

This program is designed to address the various interests of students who wish to augment graduate study of philosophy with greater exposure to theology or graduate study of theology with greater exposure to philosophy, consider teaching in private secondary schools, or simply feel in need of intellectual enrichment.

Woods College of Advancing Studies

As one of the schools that make up Boston College, the James A. Woods, S.J., College of Advancing Studies (Woods College) fosters students' rigorous intellectual development coupled with Ignatian, ethical, and personal formation to prepare them to make an impact in the workforce in a global society. Within the context of the Boston College environment, Woods College promotes the care and attention to the human person that is the hallmark of Jesuit Catholic education. In addition, our faculty and students engage in significant applied academics that enriches the culture and addresses important societal needs.

Woods College offers the atmosphere of a small college within the environment of a large university. Students receive personal attention while enjoying access to the many resources of Boston College.

Graduate Programs

The James A. Woods, S.J., College of Advancing Studies offers graduate degree programs that focus on the application of knowledge and skills to professional practice. The graduate programs combine academic and workplace experience to enable students to enhance their professional competencies thereby facilitating career development and advancement. With an applied focus, each graduate program in Woods College offers programs to provide effective and efficient learning opportunities for students to develop complex knowledge and skills with the goal of preparing students to address current and future professional and societal challenges.

Woods College graduate program directors, faculty, and advisors help direct prior learning and work experience toward degree completion and career advancement through coursework and applied projects.

Woods College offers the following Master-level degree programs.

- Master of Science in Applied Analytics
- Master of Science in Applied Economics
- Master of Science in Cybersecurity Policy and Governance
- Master of Healthcare Administration
- Master of Science in Leadership
- Master of Science in Sports Administration
- Dual Master of Science in Applied Economics and Cybersecurity Policy
- Dual Master of Science in Applied Economics and Applied Analytics

Woods College offers graduate-level certificates in the following areas.

Applied Economics Graduate Certificates

- Graduate Certificate in Data Analytics

Cybersecurity Graduate Certificates

- Graduate Certificate in Computer Science
- Graduate Certificate in Cybersecurity Analytics
- Graduate Certificate in Cybersecurity Risk Management & Strategy
- Graduate Certificate in National Security & Global Affairs

Leadership Graduate Certificates

- Graduate Certificate in Corporate Communications and Marketing
- Graduate Certificate in Diversity, Equity, and Inclusion
- Graduate Certificate in Human Resources Management
- Graduate Certificate in Leadership

- Graduate Certificate in Project Management

Sports Management Graduate Certificates

- Graduate Certificate in Executive Sports Leadership
- Graduate Certificate in Sports Analytics
- Graduate Certificate in Student-Athlete Development

Master of Science in Applied Analytics (On Campus and Online)

Program Description

The Master of Science in Applied Analytics offers practical curriculum in advanced analytics with emphasis on Machine Learning and Artificial Intelligence approaches. The focus of the program is to equip students to carry out analytics on a variety of data sets in terms of size and complexity, identify patterns and causal relationships, derive results and turn them into actionable insights, and, ultimately, communicate the insights to a variety of audiences in order to influence business or policy decisions. The curriculum instills analytic rigor, with appreciation for interaction with non-technical audiences and the need for communication and influencing skills. In addition, as a part of Boston College's focus on formation and service to others, the ethical side of analytics is also considered whether directly through the Model Governance course or indirectly through interactions and instruction in other courses.

Graduates of MS in Applied Analytics program will be able to perform cutting-edge analytic work and be able to take data projects through the complete lifecycle from inception to delivery of insights. They will be able to communicate their findings to non-technical audiences and understand the implications of their recommendation on actual business and/or policy actions and outcomes. In short, graduates of the MS in Applied Analytics will do analytics not for sake of analytics, but to drive real impact.

The Master of Science in Applied Analytics is a ten-course degree program. The program can be completed in a twelve-month period, but is designed to be flexible in meeting student needs, allowing students to attend full- or part-time. Applications are accepted on a rolling basis for admission in the Fall, Spring and Summer semesters. All undergraduate majors are encouraged to apply.

Program graduates will be able to:

- Design analytic approaches to solve complex problems
- Understand and deploy advanced analytic techniques in search of actionable insights
- Use machine learning and artificial intelligence tools and approaches to leverage data for business and policy decision-making
- Draw insights from analytics and communicate them clearly to non-technical audiences
- Drive real impact based on results and insights from analytics

Admission Requirements

- Bachelor's degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- GRE (reporting code 7534) or GMAT (reporting code 44X-HX-07) are optional
- Personal Statement
- Letters of Recommendation (Two)
- Resume
- Application Fee
- Prerequisite courses: Statistics and Calculus I*

Note: *CLEP exam score of 56 or higher is acceptable in lieu of a passing grade from an accredited undergrad program.

International Students—Additional Admission Requirements

In addition to the general requirements listed above, international students have the following requirements:

- TOEFL (minimum 90–100 range) (reporting code 3276) or IELTS (minimum 6.5–7.5 range) from within the past two years, unless they have completed their undergraduate degree at a regionally-accredited U.S. institution, or a foreign institution in which English is the medium of instruction.
- Detailed course-by-course transcript evaluation indicating conferral of an undergraduate degree that is equivalent to a U.S. bachelor's degree from an accredited institution (see transcript requirements for international students).

Degree Requirements

Ten courses are required to complete the Master of Science in Applied Analytics.

Foundational Requirements (All Required, 6 Credits*)

- ADAN7220 Mathematical Methods for Machine Learning I
- ADEC7301 Data Analysis

*Students who have taken Linear Algebra in their undergraduate studies can obtain Course Equivalence for ADAN 7220. Students who have completed advanced Statistics courses such as Econometrics in their undergraduate studies can obtain course equivalence for ADAN/ADEC 7310. Course Equivalence does not result in reduction of required credits, but allows students to enroll in electives instead of fundamental courses.

Core Requirements (All Required, 12 Credits)

- ADAN/ADEC7340 AI Algorithms I/Big Data Econometrics
- ADAN7500 Algorithmic Ethics and Governance—from Traditional to AI/ML
- ADAN7350 AI Algorithms II
- ADAN7905 AI/ML Software Tools and Platforms

Project Requirements (All Required, 3 Credits)

- ADAN8888 Applied Analytics Project

Electives Requirements (Selected from the Following, Minimum of 9 Credits)**

- ADAN/ADEC7320 Regression Models/Econometrics
- ADAN7399 Computer Vision
- ADAN/ADEC7460 Predictive Analytics/Forecasting
- ADAN/ADEC7410 Operations Research
- ADEC7421 Applied Econometrics for Causal Inference
- ADEC7422 Economic Modeling for Policy Analytics
- ADAN7431 Natural Language Processing
- ADAN/ADEC7470 Advanced Econometrics
- ADAN7520 Product Management in Machine Learning
- ADEC7910 Software Tools for Data Analysis

*In consultation with their Advisor and/or Program Director, students can take other electives from the Applied Economics program.

**Students who have undergraduate preparation that allows for a course equivalence for Fundamental Courses, can take 6 credit hours of electives and possibly take electives from other programs at WCAS with permission of the Program Director).

Scheduling and Tuition

Program courses are scheduled ordinarily meeting one time per week starting in the late afternoons on weeknights and during the day on Saturdays. Courses meet face-to-face or online in a variety of formats. Students can complete the program in either modality or combine classes according to their schedule.

Information about tuition rates for the 2024–2025 academic year is available on the [Tuition and Fees](#) page. Students are assessed a registration fee each semester they enroll in courses.

Master of Science in Applied Economics (On Campus and Online)

Program Description

The Master of Science in Applied Economics offers a practical and comprehensive curriculum to students interested in acquiring skills related to the analysis and interpretation of data across a variety of fields. Through training in Economic theory, graduates will be equipped to understand the context of data they are analyzing, and through training in cutting-edge analytic techniques, they will be able to analyze the data, interpret and present results to decision makers, and make recommendations bolstered by the results of the data analysis. The focus of the program is on preparing graduates to use rigorous analytic approaches to provide actionable insights for their organization. The program provides individuals with extensive training in the tools and methods necessary for understanding complex policy issues, industry trends, and analytic strategies within fields and industries including health care, finance, marketing, and environmental policy. These skills are developed within a curricular framework that emphasizes reflective, people-centered, ethical decision making reflected in a Jesuit, Ignatian tradition. The program is intended for individuals seeking to begin or advance their careers in industry, policy and government, or non-profit sector.

The Master of Science in Applied Economics is a ten-course degree program. The program can be completed in a twelve-month period, but is designed to be flexible in meeting student needs, allowing students to attend full- or part-time. Applications are accepted on a rolling basis for admission in the Fall, Spring and Summer semesters. All undergraduate majors are encouraged to apply.

Program graduates develop career skills that include:

- Use of economic models to analyze the choices made by consumers, investors, firms, and governments
- Utilizing macro and microeconomic models in order to analyze business, policy, and social issues and decisions
- Interpreting and analyze macroeconomic data to formulate economic policy and to evaluate the impact of macroeconomic events and forces on their organization
- Practical knowledge of data analysis including econometric and non-econometric approaches
- Applying economic models and econometric techniques in the context of economic analysis in order to address practical business or policy issues
- Use of statistical/econometric software packages
- Ability to evaluate the ethical ramifications of economic policy proposals

Admission Requirements

- Bachelor's degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- GRE (reporting code 7534) or GMAT (reporting code 44X-HX-07) are optional
- Personal Statement
- Letter of Recommendation (Two)
- Resume
- Application Fee
- Prerequisite courses: Principles of Microeconomics,* Principles of Macroeconomics,* Statistics,* Calculus I,* and Calculus II**

Notes: *CLEP exam score of 56 or higher is acceptable in lieu of a passing grade from an accredited undergrad program.

**Calculus II may be taken concurrently during your first semester of study. This requirement can also be fulfilled by taking ADEC3510 Mathematics for Economists (these prerequisite courses do not count toward the degree).

International Students—Additional Admission Requirements

In addition to the general requirements listed above, international students have the following requirements:

- TOEFL (minimum 90–100 range) (reporting code 3276) or IELTS (minimum 6.5–7.5 range) from within the past two years, unless they have completed their undergraduate degree at a regionally-accredited U.S. institution, or a foreign institution in which English is the medium of instruction.
- Detailed course-by-course transcript evaluation indicating conferral of an undergraduate degree that is equivalent to a U.S. bachelor's degree from an accredited institution (see transcript requirements for international students).

Degree Requirements

Ten courses are required to complete the Master of Science in Applied Economics.

Core Requirements (All Required, 15 Credits)

- ADEC7200 Applied Macroeconomic Theory
- ADEC7201 Applied Microeconomic Theory
- ADEC7310 Data Analysis
- ADEC7320 Econometrics
- ADEC7500 Ethics, Economics and Public Policy

Electives Requirements (Selected from the Following, 15 Credits)

- ADEC7101 Directed Readings and Research
- ADEC7220 Linear Algebra and Vector Calculus
- ADEC7340 Advanced Urban and Regional Economics
- ADEC7350 Economics of Banking and Insurance
- ADEC7360 Financial Economics
- ADEC7370 Applied Stress Testing for Economists
- ADEC7380 Empirical Health Economics
- ADEC7390 Empirical Money and Banking
- ADEC7460 Predictive Analytics/Forecasting
- ADEC7410 Operations Research in Applied Economics
- ADEC7420 Development Economics
- ADEC7421 Applied Econometrics for Causal Inference
- ADEC7422 Economic Modeling for Policy Analytics
- ADEC7430 Big Data Econometrics
- ADEC7450 Private Sector Development and Economic Growth
- ADEC7500 Ethics, Economics and Public Policy
- ADEC7510 Law and Economics
- ADEC7520 Transfer Pricing
- ADEC7530 Measuring Business Cycles, Trends and Growth Cycles
- ADEC7550 Empirical Labor Economics
- ADEC7810 Empirical Behavioral Economics
- ADEC7820 Economics of Innovation and Entrepreneurship
- ADEC7830 Communication and Leadership in Applied Economics
- ADEC7840 Management of Projects in Applied Economics
- ADEC7910 Software Tools for Data Analysis
- ADEC7920 Market Research and Analysis
- ADEC7930 Fundamentals of Private Equity
- ADEC7940 Environmental and Natural Resource Economics
- ADEC8880 Directed Practicum

*Students can also take electives from the Applied Analytics program in consultation with their advisor and Program Director.

Scheduling and Tuition

Program courses are scheduled ordinarily meeting one time per week starting in the late afternoons on weeknights and during the day on Saturdays. Courses meet face-to-face or online in a variety of formats. Students can complete the program in either modality or combine classes according to their schedule. Students who complete the required courses for the Graduate Certificate in Data Analytics will be awarded the Certificate at the time of conferral of the Master degree.

Information about tuition rates for the 2024–2025 academic year is available on the [Tuition and Fees](#) page. Students are assessed a registration fee each semester they enroll in courses.

Master of Science in Cybersecurity Policy and Governance (On Campus, Hybrid, and Online)

Program Description

The Master of Science in Cybersecurity Policy and Governance provides students with the skills necessary to manage the critical and emerging cybersecurity issues faced by private industry and government. Taught by industry leaders and practitioners, students will learn applied and hands-on methods to identify, assess, and manage cyber risk, and to develop and implement a proactive, comprehensive cybersecurity strategy to effectively defend, mitigate, and recover from a cyber-attack. The program prepares practitioners to design and lead business cases for investment to senior executives, boards of directors, and government officials, and to bridge the communication gap between Information Technology (IT) security professionals and key business stakeholders.

Students will learn to cultivate strategies based on ethical principles informed by company policies and government regulations to protect against and respond to cyber threats. The program emphasizes leadership, critical thinking, analytic problem solving, and strong communication skills. These competencies prepare practitioners to meet and respond to the varying issues presented by a rapidly changing cyber ecosystem.

Senior executives and business managers cannot design, develop, and implement cybersecurity and data privacy business strategies without having an understanding of the varying legal and regulatory requirements (e.g., SEC, FTC, EU GDPR, NIST, NY DFS, among many other national and international laws and frameworks). Depending on their position within the business organization, a deep understanding of subject matter in cybersecurity and data protection and privacy law and compliance is needed. The M.S. in Cybersecurity Policy and Governance program integrates a technology perspective with business strategy and policy knowledge to help students become indispensable leaders for any organization.

The Master of Science in Cybersecurity Policy and Governance is a ten-course degree program that can be completed in a sixteen-month period, but is designed to be flexible in meeting students' needs. The program is intended for individuals seeking skills in cybersecurity, data privacy, national security strategy, leadership, management, and policy to begin or advance their careers in private industry or government, including, but not limited to business and government professionals, executives, managers, privacy advisors, entrepreneurs, business practitioners, compliance officers, and IT professionals. As a working professional, you may wish to attend full- or part-time. Applications are accepted on a rolling basis for admission in the Fall, Spring, and Summer semesters.

Admission Requirements

- Bachelor's degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (Two)
- Resume
- Application Fee

International Students

Applicants requiring a student visa to enroll in this program are currently not eligible to apply for this program.

Program Requirements

Ten courses are required to complete the Master of Science in Cybersecurity Policy and Governance.

Core Requirements (All Required, 15 Credits)

- ADCY6000 Cyber Ecosystem and Cybersecurity
- ADCY6050 Cybersecurity Policy: Privacy and Legal Requirements
- ADCY6300 Network and Infrastructure Security (Prereq: ADCY 6000)
- ADCY6350 Incident Response and Management
- ADCY6500 Organizational Effectiveness: Governance, Risk Management, and Compliance

Elective Requirements

Students may select courses from a track below or 15 credits of any non-core courses.

Cybersecurity Risk Management and Strategy Track

- ADCY6400 Managing Cyber Risk: Mobile Devices & Social Networking
- ADCY6475 Security in the Cloud
- ADCY6600 Cybersecurity: The Role of the CISO
- ADCY6840 Cybersecurity: Strategy and Implementation
- ADCY6925 Cybersecurity: Risk Management & Resiliency

Computer Security and Artificial Intelligence Track

- ADCY 6450 CYBER Investigations & Digital Forensics
- ADCY6475 Security in the Cloud
- ADCY6600 Cybersecurity: The Role of the CISO
- ADCY6810 Cybersecurity: Designing Offensive & Defensive Capabilities
- ADCY6820 Cybersecurity Engineering

National Security and Global Affairs Track

- ADCY6200 International Cybersecurity
- ADCY6450 CYBER Investigations and Digital Forensics
- ADCY6620 Cybersecurity Litigation & Strategy
- ADCY6630 Cyber Crime
- ADCY6640 National Security: Law, Policy, & Government Investigations
- ADCY6650 Role of Intelligence: Enabling Proactive Security

Non-Core Courses

- ADCY 6200 International Cybersecurity
- ADCY 6400 Managing Cyber Risk: Mobile Devices and Social Networking
- ADCY 6425 Cyber Strategy: Innovation, Technology, and Formative Development
- ADCY 6450 CYBER Investigations & Digital Forensics
- ADCY 6475 Security in the Cloud
- ADCY 6600 Cybersecurity: The Role of the CISO
- ADCY 6620 Cybersecurity Litigation & Strategy
- ADCY 6630 Cyber Crime
- ADCY 6640 National Security: Law, Policy & Investigations
- ADCY 6650 Role of Intelligence: Enabling Proactive Security
- ADCY 6700 Privacy Law

- ADCY 6810 Cybersecurity: Designing Offensive & Defensive Capabilities
- ADCY 6840 Cybersecurity: Strategy and Implementation
- ADCY 6900 Ethical Issues in Cybersecurity
- ADCY 6925 Cybersecurity: Risk & Resiliency
- ADCY 6955 Applied Research Project for Non-Profit Organizations

Scheduling and Tuition

Program courses are available on campus during the evening, hybrid, and/or online. Students may take any combination of course delivery that works best for them.

Information about tuition rates for the 2024–2025 academic year is available on the [Tuition and Fees](#) page. Students are assessed a registration fee each semester they enroll in courses.

Master of Healthcare Administration (Online Only)

Program Description

The Master of Healthcare Administration (MHA) program provides a comprehensive perspective of the health ecosystem by incorporating contemporary challenges and emerging trends from across healthcare related industries. The MHA program fosters academic growth, supports career development, and prepares graduates to drive organizational change across the rapidly transforming health ecosystem.

The Master of Healthcare Administration (MHA) is a twelve-course degree program for part-time and full-time students who are at various career stages. Most students choose to take one course every seven weeks (two courses per semester) and complete the program in two years. Some students elect to take more than one course every seven weeks to progress more quickly through the curriculum. The accelerated courses, which are offered in seven-week sessions, help students gain knowledge in core areas and those specific to other health ecosystem industries.

Students come from across the nation, and from a broad range of settings, including health systems management, insurance providers, as well as biotechnology, pharmaceutical, and medical device industries. The program also attracts new graduates, and others who aspire to pivot into healthcare related industries, along with individuals wanting to further develop and/or advance their careers.

With three starting points each year (August, January, and May), applications for admissions are accepted on a rolling basis.

Admission Requirements

- Bachelor's degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (Two)
- Resume
- Application Fee

Note: Applicants whose undergraduate GPA is below 3.0 will be considered for admission. Such applications will be considered holistically, including letters of recommendation, personal statement, and professional experience. Recent college graduates with little to no professional experience must have a 3.0 GPA to be competitive for full acceptance.

International Students

Applicants requiring a university-sponsored student visa to enroll in this program are currently not eligible to apply.

Degree Requirements

Twelve courses are required to complete the Master of Health Administration, nine core courses and three electives for a total of 43 to 46 credits.

Core Requirements (All Required, 34 Credits)

- ADHA7000 Introduction to Healthcare Systems and Organizations (4 credits)
- ADHA7010 Health Policy (4 credits)
- ADHA7015 Leadership in Healthcare (4 credits)
- ADHA7025 Current Issues in Health Economics (4 credits)
- ADHA7035 Healthcare Innovation-Based Strategy: Managing Change (2 credits)
- ADHA7040 Healthcare Quality Management (4 credits)
- ADHA7045 Health Analytics: Assessing & Critiquing Evidence & Decision-Making (4 credits)
- ADHA7050 Healthcare Information Technology (4 credits)
- ADHA7055 Strategic Planning and Marketing (4 credits)

Elective Requirements (three courses selected from the following, 9 to 12 Credits)

- ADHA7005 Management Theory and Organizational Behavior (4 credits)
- ADHA7020 Workforce Development (4 credits)
- ADHA7033 Health Ethics & Law (4 credits)
- ADHA7060 Project Management (3 credits)
- ADHA7065 Product Development and Marketing in the Digital Age (3 credits)
- ADHA7070 Medical Device Regulations (3 credits)
- ADHA7075 Drug Discovery and Product Regulations (3 credits)
- ADHA7101 Readings and Research (1-4 credits)

Scheduling and Tuition

Program courses are offered online asynchronously with an optional weekly discussion hour.

Information about tuition rates for the 2024–2025 academic year is available on the [Tuition and Fees](#) page. Students are assessed a registration fee each semester they enroll in courses.

Master of Science in Leadership (On Campus and Online)

Program Description

The M.S. in Leadership is designed to create the leaders the world needs now. It is based on Ignatian values that translate to leadership excellence. The degree program summarizes this philosophy of leadership excellence in three principles that inspire commitment to and capabilities for transforming one's leadership: enriching one's self; engaging all; and creating the future.

The program's learning outcomes include striving to serve a higher purpose; cultivating self-awareness and commitment to life-long learning and growth; demonstrating care and compassion for all; and thinking critically and comprehensively to formulate and resolve complex, ill-structured challenges and problems.

The M.S. in Leadership consists of six core courses and four elective courses. For the elective options, students may select a concentration (4 courses) or four of the leadership elective courses.

Admission Requirements

- Bachelor's degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed

- Personal essay responding to three prompts
- Two Letters of Recommendation (minimum of one from a former professor)
- Resume
- Application Fee
- Optional—GRE (reporting code 7534) or GMAT (reporting code 44X-HX-47)— recommended for students with lower undergraduate GPA

Tracks

When applying to the MSL, applicants will have to select either the Leadership Track or the Executive Track. Admission to either of the two tracks is dependent on an applicant's level of professional experience.

Leadership Track: The Leadership Track is the pathway for applicants who are early in their careers. Applicants with less than 8 years of full-time work experience should apply for this track.

Executive Track: The Executive Track of the MS in Leadership is the pathway for applicants who have a minimum of 8 years of full-time work experience. Successful applicants to the Executive Track not only have significant years of work experience, but also demonstrated leadership experience including managing people, processes, or projects.

International Students—Additional Admission Requirements

In addition to the general requirements listed above, international students have the following requirements:

- Interview (in person or online)
- TOEFL (minimum 90–100 range) (reporting code 3276) or IELTS (minimum 6.5–7.5 range) from within the past two years, unless they have completed their undergraduate degree at a regionally-accredited U.S. institution, or a foreign institution in which English is the medium of instruction.
- Detailed course-by-course transcript evaluation indicating conferral of an undergraduate degree that is equivalent to a U.S. bachelor's degree from an accredited institution (see transcript requirements for international students).
- Note, because of its online format, the executive track does not support F-1 visas.

Degree Requirements

Core Requirements

Students will complete the core requirements for the track that they were admitted under—leadership or executive.

Leadership Core Requirement (All Required, 18 Credits)

- ADLP7000 Daring to Lead
- ADLP7001 Leadership Fundamentals: Articulating Your Leadership Vision and Values
- ADLP7002 The Self-Aware Leader
- ADLP7003 Leading Change from the Middle
- ADLP7004 Problem Solving Through Critical Thinking
- ADLP7005 Women and Men for Others

Executive Core Requirements (All Required, 18 Credits)

- ADLP7500 Leading Thinking
- ADLP7501 Fostering Dignity and Belonging
- ADLP7502 Emotional and Social Intelligence Deep Dive
- ADLP7503 Leading Change and Execution
- ADLP7504 Strategic Management of Innovation
- ADLP7505 The Just Leader

Elective Requirements

Students choose 12 credits (4 courses) from the following leadership electives or concentrations below to complete their degree program. If a student wants to receive recognition for the completion of a concentration, then they would need to complete 12 credits (4 courses) from a concentration.

Leadership Electives

- ADLP8000 The Art and Science of Strategy
- ADLP8001 Data Driven Decision Making
- ADLP8100 Power, Influence, and Persuasion
- ADLP8101 Flourishing through Inclusion
- ADLP8102 Leading High Performing Teams
- ADLP8201 GenAI for Business Leaders
- ADLP9000 Internship
- ADLP9902 Applied Leadership Project

Corporate Communications and Marketing Concentration

- ADLP8300 Strategies for Communications*
- ADLP8301 Media Relations and Community Engagement
- ADLP8302 Business & Marketing Analytics
- ADLP8304 Social Media Influence and Content Creation
- ADLP8305 Cross Cultural Communication
- ADLP8306 Evolution of Marketing Strategies in the Digital Era

* Required for the concentration

Diversity, Equity, and Inclusion Concentration

- ADLP8400 Fundamentals of DEI*
- ADLP8401 Building Inclusive Organizational Cultures
- ADLP8402 Implementing Successful DEI Strategies
- ADLP8403 Bias in the Workplace
- ADLP8305 Cross Cultural Communication

* Required for the concentration

Human Resources Management Concentration

- ADLP8500 Human Resource Development
- ADLP8501 Talent Management*
- ADLP8502 The Future of Work
- ADLP8503 HR Analytics

* Required for the concentration

Project Management Concentration

- ADLP8600 Project Management*
- ADLP8601 Risk Management/Quality Management
- ADLP8602 Stakeholder Management and Procurement
- ADLP8603 Agile Methodologies
- ADLP8604 Agile Product Ownership

* Required for the concentration

Scheduling and Tuition

Program courses are ordinarily scheduled starting in the late afternoons on weeknights. Courses meet face-to-face and most courses are offered online. All Executive Track core courses are offered online only.

Information about tuition rates for the 2024–2025 academic year is available on the [Tuition and Fees](#) page. Students are assessed a registration fee each semester they enroll in courses.

Master of Science in Sports Administration (On Campus and Online)

Program Description

The mission of the Master of Science in Sports Administration (MSSA) program is to prepare graduate students with skill sets to become the next generation of ethical leaders, decision makers, educators, and managers in the sport industry. The Sport Administration program promotes the pursuit of excellence by providing: curricular and co-curricular educational experiences; faculty with extensive current real-world experience, and opportunities for student engagement and service learning in partnership with Boston College Athletics, regional colleges and universities as well as the Boston professional sport teams.

The Master of Science in Sports Administration program provides opportunities and experiences for students to achieve the following outcomes:

- Apply knowledge and skills to develop best-practice approaches within sports administration
- Apply knowledge gained from coursework to sports administrative experiences
- Demonstrate problem-solving, communication and critical thinking skills reflective of humanistic, Catholic, and Ignatian ideals about personal and social issues within sports-related organizations
- Formulate career opportunities through professional development, networking, and career coaching

Admission Requirements

- Bachelor's degree from a regionally accredited college/university (minimum GPA 3.0)
- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (Two) (one must be from a professor or an academic advisor)
- Resume
- Application Fee
- Optional—GRE (reporting code 7534) or GMAT (reporting code 44X-HX-47)— recommended for students with lower undergraduate GPA

International Students—Additional Admission Requirements

In addition to the general requirements listed above, international students have the following requirements:

- Interview (in person or online)
- TOEFL (minimum 90–100 range) (reporting code 3276) or IELTS (minimum 6.5–7.5 range) from within the past two years, unless they have completed their undergraduate degree at a regionally-accredited U.S. institution, or a foreign institution in which English is the medium of instruction.
- Detailed course-by-course transcript evaluation indicating conferral of an undergraduate degree that is equivalent to a U.S. bachelor's degree from an accredited institution (see transcript requirements for international students).

Course Offerings

Core Requirements (All Required, 15 Credits)

- ADSA7501 Survey of Sports Administration
- ADSA7502 Sports Marketing and Communication
- ADSA7503 Sports Finance
- ADSA7504 Sports Law and Compliance
- ADSA7585 Sports Leadership & Ignatian-based Ethics

Select one of the following:

- ADSA9001 Sports Administration Internship
- ADSA9902 Applied Sports Administration Project

Elective Requirements (Selected from the Following, 12 Credits)

- ADSA7506 Athlete Entrepreneurship: Exploring Opportunities Created by NIL
- ADSA8002 Issues and Challenges Affecting the Student-Athlete
- ADSA8004 Diversity and Inclusion in Sports
- ADSA8005 Health & Wellness in Athletics & Sports Admin
- ADSA8007 Revenue Generation in Sports
- ADSA8008 Sport Psychology
- ADSA8010 Coaching for Performance & Student Athlete Development
- ADSA8012 Sports Media and Public Affairs
- ADSA8015 Sports Analytics
- ADSA8018 The Athletic Director
- ADSA8020 Operations and Event Management
- ADSA8025 Sport Security and Event Management
- ADSA8030 The Business of the NFL
- ADSA9101 Executive Sports Leadership Seminar*
- ADSA9102 Applied Sports Administration Project*
- ADLP7003 Leading Change from the Middle*
- ADLP8102 Leading High Performing Teams*

*Permission of the MSSA Program Director is required to register. At the discretion of the MSSA Graduate Program Director, course may be used as a substitute for a core requirement.

Scheduling and Tuition

Program courses are ordinarily scheduled, meeting one time per week starting in the evenings on weeknights. Courses meet face-to-face, hybrid, and online. Students can complete the program in either modality or combine classes according to their schedule.

Information about tuition rates for the 2024–2025 academic year is available on the [Tuition and Fees](#) page. Students are assessed a registration fee each semester they enroll in courses.

Dual Master of Science in Applied Economics and Cybersecurity Policy and Governance (On Campus and Online)

Program Description

To prepare students to work in the emerging field of Cybersecurity Policy, and to understand the data analytic component of the Applied Economics field, the Woods College offers a dual degree program in Applied Economics and Cybersecurity Policy & Governance.

Application Requirements

Applicants should apply to each program separately and must be independently admitted into both programs. Applicants must satisfy all requirements for admission for both programs, including necessary background courses. Students must also provide required standardized tests for the MSAE program. Additionally, the MSCY program does not accept international applicants.

Course Offerings

MSAE Core Requirements (All Required, 12 Credits)

- ADEC7200 Applied Macroeconomic Theory
- ADEC7201 Applied Microeconomic Theory
- ADEC7301 Data Analysis
- ADEC7320 Econometrics

MSCY Core Requirements (All Required, 18 Credits)

- ADCY6000 Cyber Ecosystem and Cybersecurity
- ADCY6050 Cybersecurity Policy: Privacy and Legal Requirements
- ADCY6300 Network and Infrastructure Security
- ADCY6350 Incident Response and Management
- ADCY6500 Organizational Effectiveness: Governance, Risk Management, and Compliance

Ethics Requirements (Choose One, 3 Credits)

- ADEC7500 Ethics, Economics, and Public Policy
- ADCY6900 Ethical Issues in Cybersecurity and the Ignatian Paradigm

Applied Research Project Requirements (3 Credits)

- Applied Research Project would combine topics in Cybersecurity and Economics.

Electives Requirements (Select Two Courses from MSAE and Two Courses from MSCY, 12 Credits)

- Confirm selections with MSAE and MSCY Graduate Program Directors.

Dual Master of Science in Applied Economics and Applied Analytics (On Campus and Online)

Program Description

To prepare students to work in the field of Analytics and to understand the data analytic component of the Applied Economics field, the Woods College offers a dual degree program in Applied Economics and Applied Analytics.

Application Requirements

Applicants should apply to each program separately and must be independently admitted into both programs. Applicants must satisfy all requirements for admission for both programs, including necessary background courses. Students must also provide required standardized tests for the MSAE and MSAA programs.

Course Offerings

Core Requirements (All Required, 15 Credits*)

- ADAN7220 Mathematical Methods for Machine Learning I

- ADEC7301 Data Analysis
- ADEC7320 Econometrics
- ADAN/ADEC7430 AI Algorithms I / Big Data Econometrics
- ADEC7460 Predictive Analytics/Forecasting

*Students who have taken Calculus II and Linear Algebra in their undergraduate studies can obtain Course Equivalence for ADAN 7220. Students who have completed advanced Statistics courses such as Econometrics in their undergraduate studies can obtain course equivalence for ADAN/ADEC 7310. Course Equivalence does not result in reduction of required credits, but allows students to enroll in electives instead of fundamental courses.

MSAE Core Requirements (All Required, 6 Credits)

- ADEC7200 Applied Macroeconomic Theory
- ADEC7201 Applied Microeconomic Theory

MSAA Core Requirements (All Required, 6 Credits)

- ADAN7905 AI/ML Software Tools and Platforms
- ADAN7603 AI Algorithms II

Ethics Requirements (Choose One, 3 Credits)

- ADEC7500 Ethics, Economics, and Public Policy
- ADAN7500 Algorithmic Ethics and Governance—from Traditional to AI/ML

Applied Research Project Requirements (3 Credits)

- Applied Research Project would combine topics in Analytics and Economics.

Electives Requirements (Select Two Courses from MSAE and Two Courses from MSAA, 12 Credits)

- Confirm elective selections with Graduate Program Director.

Graduate Certificates

The Graduate Programs at Woods College of Advancing Studies offer several graduate certificates. Each certificate requires the completion of several courses that build students' knowledge and skills that are aligned with industry needs.

Prospective students may apply for a certificate program without becoming a Masters' program student. Students who are or will be enrolled in one of the Masters' degrees, may only take a graduate certificate if the certificate is **fully outside** their degree program.

A certificate may be completed at the same time as a degree program only if the certificate and degree program are independent of one another. Once a student is enrolled in a graduate degree program, the certificate, if within the same program, will become a concentration. Students may complete only one concentration in a degree program.

If a student completes a graduate certificate and within 5 years enters a degree program, the graduate certificate may be applied toward the degree program, if those courses are determined to be the equivalent of courses required for the degree.

For more information about the graduate certificates please contact the respective Graduate Program Directors or Graduate Student Advisors.

Admission Requirements

- Bachelor's degree from a regionally accredited college/university (minimum GPA 3.0)

- Official academic transcripts from colleges/universities where courses were completed
- Personal Statement
- Letter of Recommendation (One)
- Resume
- Application Fee

Note: Applicants whose undergraduate GPA is below 3.0 will be considered for admission. Such applications will be considered holistically, including letter of reference, personal statement, and industry experience. For particular applicants, they may take a course within the certificate program as “non-degree student” and, if they pass the course with a B or better, their application to the certificate program may be reconsidered.

International Students

Applicants requiring a student Visa to enroll in the graduate certificate programs are currently not eligible to apply for the graduate certificate. For international students who do not need a student Visa, they may be considered for all the graduate certificates except for the Cybersecurity Graduate Certificates.

Graduate Certificate Completion Requirements

- Students must receive at least a grade of C for each course credited toward the certificate.
- Students must have a cumulative GPA of 3.0 to receive a certificate of completion.
- Certificate requirements should be completed within two years of initial enrollment.

Data Analytics Graduate Certificate (On Campus and Online)

Offered by the M.S. in Applied Economics Program

Offered by the M.S. in Applied Economics Program—All four courses are offered in 7-week terms and can be completed in 8 months. The courses are for-credit and can be transferred into the Boston College [Master of Science in Applied Economics](#) degree program. Students enrolling in this graduate certificate must have completed a college-level statistics course.

Graduate Certificate in Data Analytics

Requirements (All Required, 12 Credits)

- ADEC7301 Data Analysis
- ADEC7320 Econometrics
- ADEC7430 Big Data Econometrics
- ADEC7406 Predictive Analytics/Forecasting

Cybersecurity Graduate Certificates [On Campus & select courses Online]

Offered by the M.S. in Cybersecurity Policy and Governance Program—The courses are for-credit and can be transferred into the Boston College Master of Science in Cybersecurity Policy and Governance degree program.

Graduate Certificate in Computer Security

Core Requirements (All Required, 6 Credits)

- ADCY6000 Cyber Ecosystem and Cybersecurity
- ADCY6300 Network and Infrastructure Security (Prereq: ADCY 6000)

Elective Requirements (2 courses selected from the following, 6 Credits)

- ADCY6450 Cyber Investigations & Digital Forensics

- ADCY6475 Security in the Cloud
- ADCY6810 Cybersecurity: Designing Offensive/Defensive Capabilities (Prereq: ADCY6000)
- ADCY6820 Cybersecurity Engineering
- ADCY6830 Applied Cryptography
- ADCY6840 Machine Learning & Data Analytics
- ADCY6925 Cybersecurity: Risk Management & Resiliency

Graduate Certificate in Cybersecurity Analytics

Core Requirements (All Required, 12 Credits)

- ADCY6050 Cybersecurity Policy: Legal Requirements & Privacy
- ADCY6350 Incident Response & Management
- ADEC7301 Data Analysis
- ADEC7340 Big Data Econometrics

Graduate Certificate in Cybersecurity Risk Management & Strategy

Core Requirements (All Required, 6 Credits)

- ADCY6050 Cybersecurity Policy: Privacy and Legal Requirements
- ADCY6350 Incident Response and Management

Elective Requirements (2 courses selected from the following, 6 Credits)

- ADCY6400 Managing Cyber Risk: Mobile Devices & Social Networking
- ADCY6475 Security in the Cloud
- ADCY6450 Cyber Investigations & Digital Forensics
- ADCY6600 Establishing the Business Case & Resource Allocation
- ADCY6640 National Security: Law, Policy & Investigations
- ADCY6925 Cybersecurity: Risk Management & Resiliency

Graduate Certificate in National Security & Global Affairs

Core Requirements (All Required, 6 Credits)

- ADCY6200 International Cybersecurity
- ADCY6650 Role of Intelligence: Enabling Proactive Security

Elective Requirements (2 courses selected from the following, 6 Credits)

- ADCY6050 Cybersecurity Policy: Privacy and Legal Requirements
- ADCY6450 Cyber Investigations & Digital Forensics
- ADCY6620 National Security: Corporate Law & Policy
- ADCY6630 Counterintelligence: Methods and Process
- ADCY6640 National Security: Law, Policy & Investigations

Leadership Graduate Certificates (On Campus and Online)

Offered by the M.S. in Leadership Program

The courses are for-credit and can be transferred into the Boston College Master of Science in Leadership degree program.

Graduate Certificate in Corporate Communications and Marketing

Core Requirement (3 Credits)

- ADLP8300 Strategies for Communications

Elective Requirements (3 courses selected from the following, 9 Credits)

- ADLP8301 Media Relations and Community Management
- ADLP8302 Business & Marketing Analytics
- ADLP8304 Social Influence and Content Creation
- ADLP8305 Cross Cultural Communication
- ADLP8306 Evolution of Marketing Strategies in the Digital Era

Graduate Certificate in Diversity, Equity, and Inclusion

Core Requirement (3 Credits)

- ADLP8400 Fundamentals of DEI

Elective Requirements (3 courses selected from the following, 9 credits):

- ADLP8401 Building Inclusive Organizational Cultures
- ADLP8402 Implementing Successful DEI Strategies
- ADLP8403 Bias in the Workplace
- ADLP8305 Cross Cultural Communication

Graduate Certificate in Leadership

Requirements (4 courses selected from the following, 12 credits)

- ADLP7000 Daring to Lead
- ADLP7002 The Self-Aware Leader
- ADLP7003 Leading Change from the Middle
- ADLP7004 Problem Solving through Critical Thinking
- ADLP8102 Leading High Performing Teams

Graduate Certificate in Human Resources

Requirements (All Required, 12 Credits)

- ADLP8500 Human Resource Development
- ADLP8501 Talent Management
- ADLP8502 The Future of Work
- ADLP8503 HR Analytics

Graduate Certificate in Project Management

Core Requirement (3 Credits)

- ADLP8600 Project Management

Elective Requirements (3 courses selected from the following, 9 credits):

- ADLP8601 Risk Management/Quality Management
- ADLP8602 Stakeholder Management and Procurement
- ADLP8603 Agile Methodologies
- ADLP8604 Agile Product Ownership

Sports Management Graduate Certificates (Online and Select Courses on Campus)

Offered by the M.S. in Sports Administration Program

The courses are for-credit and can be transferred into the Boston College Master of Science in Sports Administration degree program.

Graduate Certificate in Executive Sports Leadership

Executive Sports Requirements (All Required, 6 Credits)

- ADSA9101 Executive Sports Leadership Seminar
- ADSA9102 Applied Goal Achievement

Leadership Requirement (1 course selected from the following, 3 Credits)

- ADLP7003 Leading Change from the Middle
- ADSA7585 Sports Leadership and Ignatian Based Ethics

Elective Requirements (One course required, 3 Credits)

Confirm elective selections with the Graduate Program Director.

Graduate Certificate in Sports Analytics

Core Requirements (All Required, 9 Credits)

- ADEC7310 Data Analysis
- ADEC7320 Econometrics
- ADSA8015 Sports Analytics

Elective Requirements (One Required, 3 Credits)

- ADSA7501 Introduction to Sports Management
- ADSA7502 Sports Marketing and Communication
- ADSA7503 Sports Finance

Graduate Certificate in Student-Athlete Development

Core Requirements (All Required, 9 Credits)

- ADSA8002 Issues and Challenges Affecting the Student-Athlete
- ADSA8004 Diversity and Inclusion in Sports
- ADSA8008 Sport Psychology

Elective Requirements (One Required, 3 Credits)

- ADSA7504 Sports Law and Compliance
- ADSA7506 Athlete Entrepreneurship: Opportunities Created by Name, Image, and Likeness
- ADSA8005 Health and Wellness in Athletics and Sports Management

Non-Degree Students

Non-degree students are individuals interested in taking graduate courses for academic credit but not in applying for a degree. A brief non-degree application form must be completed and submitted online. Non-degree students may enroll in Fall, Spring, or Summer semesters. Most graduate courses are only available to non-degree students with approval from the respective Graduate Program Director.

Law Courses: Summer 2024

LAWS339701

Summer in Training Seminar

Ross, David G

Summer 2024

Summer in Practice is a one credit course that will focus on professional development, the future of the legal field, and offer opportunities to reflect on your summer work experience. The course will consist of completing two Harvard Business School interactive online cases, and writing a paper that will be due late July/early August. That paper is expected to be 15 pages and will report and reflect on a substantive legal topic on which you worked over the summer, with an emphasis on reflecting on what a student learned. There will be one meeting prior to the summer, to set forth more details.

National Security: Law, Policy, & Government Investigations

Noone, Gregory P;Siegmann, B S

Summer 2024

National security law is often inaccessible and can be particularly hard to follow when divorced from the context of historical tradition, governmental structures, and operational reality in which it functions. This course will examine the law governing national security investigations and related litigation and will provide an in-depth examination of national security from the U.S. Government's perspective. Through class lectures, case studies, and hands-on application, students will learn how Federal intelligence and law enforcement agencies work together (and sometimes not) and their interplay with Foreign intelligence and law enforcement agencies to investigate and prosecute national security crimes, starting with the collection of evidence and proceeding through trial and sentencing. The course will highlight the investigative tools and laws used by intelligence and law enforcement agencies to investigate national security concerns and the varying challenges faced in prosecuting such cases. The class will incorporate guest speakers and experts from government organizations and other stakeholders in the national security field.

Ethical Issues in Cybersecurity

Hurley, Deborah

Summer 2024

Course provides "real life" complex, ethical situations for students to evaluate, as both decision-maker and advisor, by addressing the various issues confronted by senior government and corporate professionals, nation states, and other parties of significance, involving the receipt and protection of critical and sensitive data. Specific topics include standard professional ethical frameworks of beneficence and non-maleficence; rights and justice; and issues related to privacy, intellectual property, and corporate espionage and fraud, while contrasting same with freedom of information and intellectual creativity. The course compares and contrasts global governments' and cultures' differing approaches to ethics, and enhances, from a framework of dialogue, discernment of action, and deliberation, the ability of students to make reasoned and responsible business decisions in a global economy. The course also examines aspirational versus mandatory ethical standards (i.e., the "right thing to do" vs. what is "legal" or "compliant"), through additional frameworks of reference, including review, reflection, and refinement of decisions.

LAWS826301

BC Innocence Clinic

Whitmore, Charlotte H

Summer 2024

Students in BC Innocence clinic work with faculty supervision on post-conviction screening and/or litigation of cases of prisoners who assert their innocence. Case screening involves review of trial transcripts, pre-trial discovery, appellate and post-conviction briefs, and judicial opinions, as well as factual and forensic research, to determine whether scientific testing or other investigative leads could establish a strong likelihood that the prisoner is factually innocent. Students produce a memorandum analyzing the case and making a recommendation as to whether post-conviction litigation should be pursued. Students engaged in litigation research and draft motions for various types of post-conviction relief with supporting memoranda and affidavits. Class component is devoted to case-rounds and development of legal, professional, and ethical skills in the context of post-conviction innocence work. Students spend 10-12 hrs/week outside of class time on casework.

BC Defender Program Clinic

Sato, Lumina

Summer 2024

The BC Defender program is a full-year criminal defense clinic and a weekly seminar class. Practicing under faculty supervision pursuant to SJC Rule 3:03, BC Defenders represent clients charged with crimes and probation violations in the Boston Municipal Court (Dorchester Division). In the course of representing their clients, students broaden their own life experiences and develop professional skills, including interviewing, counseling, investigation, legal research and writing, collaborating, negotiating, oral advocacy, case organization and management, and trial skills.

Immigration Law Clinic

Dept

Summer 2024

Students in the Immigration Clinic represent noncitizens in removal proceedings before the Immigration Court, which involves arguing bond motions for detained clients, conducting examination of witnesses, raising evidentiary objections and arguing points of law. Students represent noncitizens in applications for legal status before the U.S. Citizenship and Immigration Services (CIS) office. Cases vary, but may include asylum and relief based on fear of persecution in the country of removal, waivers of deportation for long-term residents of the U.S., adjustment of status for noncitizens with U.S. citizen or permanent resident family members, visas for victims of violent crimes who have assisted in the prosecution of such crime, relief for noncitizen victims of domestic violence and visas for juveniles who have been abused, abandoned or neglected. Students conduct "Know Your Rights" presentations for noncitizens who are detained by the Immigration and Customs Enforcement (ICE).

Family Justice Litigation Clinic

Dexter, Karen M;Donohue Prono, Claire P

Summer 2024

Students will advise and represent low-income clients in civil and administrative matters related to family law and child welfare. Students will be court-certified as Student Attorneys and will handle all phases of their clients cases, from client interviewing through case planning, fact investigation, discovery, client counseling, negotiation, and courtroom advocacy. Practice Areas in the clinic are family law and administrative advocacy against the state Department of Children and Families (DCF). Cases are primarily in Middlesex County. Clinical faculty provide extensive supervision, assistance and training through every stage of students work on cases, from preparation for tasks and events through retrospective reflection. Student Attorneys meet weekly in a small seminar group. Seminars will cover the practical, strategic, legal, ethical, and interpersonal tensions that are at the heart of litigation practice. In the second hour of seminar, Masters of Social Work students who are placed in the clinic will join the student attorneys for interdisciplinary rounds.

Entrepreneurship and Innovation Clinic

Jones, James T

Summer 2024

The Entrepreneurship & Innovation Clinic (EIC) is a dynamic clinic that provides free transactional legal services to under-resourced clients in the Greater Boston area on issues relating to new and emerging businesses. This innovative clinic provides students with the hands-on, practical experience needed to navigate the rapidly evolving fields of intellectual property and entrepreneurship. Law students working under the supervision of the clinic director provide a broad range of business law, intellectual property and transactional services. Clients include micro-entrepreneurs, technology entrepreneurs, social entrepreneurs, artists, authors, filmmakers and musicians, who may be individuals or for-profit businesses in the Greater Boston area who are in need of transactional legal counsel related to starting or operating their business. The EIC is for students interested in learning to work with organizational clients and learning to represent clients in transactions.

Civil Rights Clinic

Tiwari, Chetan

Summer 2024

The Civil Rights Clinic is a 6-credit experiential learning course embraces a multi-pronged approach to lawyering, working with individuals and community-based organizations to address civil rights issues facing low-wage workers, immigrants, and communities of color in Massachusetts. Students work in teams and each student is assigned to one litigation matter and one community group advocacy matter, exposing them to both individual client representation, as well as community and movement lawyering. In seminar and supervision, students will be encouraged to think critically about the role of the lawyer, client, and community in these different models and the intersection of worker and immigrant rights and racial justice. On the litigation side, representative matters may include lawsuits on behalf of workers, immigrants, and incarcerated individuals who have experienced various forms of exploitation including wage theft, discrimination, and mistreatment. On the community advocacy side, the clinic provides legal, policy and other technical assistance to organizational clients that may include worker centers, local unions, or immigrant advocacy groups, in support of their legislative priorities or other organizing campaigns. Student Attorneys should plan to spend approximately 20-25 hours/week on clinic work and will be handling all phases of their client matters with the close supervision and guidance of the clinic director.

Civil Litigation Clinic: Child Health and Education

Nyce, Ashley

Summer 2024

The Child Health and Education Clinic (CHEC) is a medical-legal partnership that brings together student attorneys and community providers to address a variety of health-harming legal needs that impact children and families in the Boston area. Students participate in every aspect of the client's case, from developing the facts and theory of the case, to case planning and client counseling, to written and oral advocacy. Some of the clinic's cases are directly connected to childhood health while others address legal barriers that negatively impact child and family well-being. Advocacy may occur in a variety of legal areas including education (such as advocacy to secure appropriate special education services), public benefits (such as appealing a denial of essential benefits), or housing (such as advocacy to remediate poor housing conditions resulting in asthma or lead poisoning). Through interdisciplinary casework, close supervision, and weekly seminars students learn to engage in culturally humble client advocacy, reflecting on the structures and systems that intersect each case and developing a variety of advocacy skills while providing critical representation in an area of substantial community need.

Civil Litigation Clinic Class

Billman-Golemme, Kate C

Summer 2024

Students enrolled in the Civil Litigation Clinic also participate in a weekly seminar where issues related to students' actual cases are examined. The practical, legal and ethical issues of lawyering are explored in detail through discussion, simulations, and review of video recorded portions of students' meetings with their clients. In addition to class participation, students draft four reaction papers during the term, reflecting on their lawyering, systemic challenges, and social justice issues which they have observed. Students receive the same grade for both their clinic and seminar work. Pass/fail can only be exercised at the beginning of the term. Selection by lottery.

LAWS898001

Civil Litigation Clinic: Housing Justice

Rice, Edward A

Summer 2024

In this clinical course students advise and represent low-income clients in a variety of housing matters under close, supportive supervision by experienced clinical faculty. Clinic participants are court-certified as Student Attorneys. Their practice is based at the Boston College Legal Services LAB, a law firm within the Law School that is part of the BC Center for Experiential Learning. Student Attorneys handle all phases of their clients cases, from client interviewing through case planning, fact investigation, discovery, client counseling, negotiation, and courtroom advocacy. Through practice and confronting a series of inevitable firsts; students rapidly develop both confidence and competence as lawyers. Housing Justice is geared toward prevention of homelessness, primarily through eviction defense and public housing advocacy. The case docket also includes affirmative civil cases against notoriously unscrupulous landlords to correct deplorable housing conditions, halt discriminatory practices, and protect tenants from other forms of mistreatment. The mixture of housing matters students handle enriches their development in many ways. Students will understand the common legal, factual and ethics patterns that emerge from different types of litigation matters. Courts and administrative agencies before which students appear provide informative contrast. Cases have different paces and cadences. Clients have distinctly different interests and needs. This variety contributes immeasurably to a beginning lawyers professional growth. Clinical faculty provide extensive supervision, assistance and training through every stage of students work on cases, from preparation for tasks and events through retrospective reflection. Student Attorneys receive thorough feedback on all aspects of their work to help them build core lawyering skills, learn from their experiences, and mature professionally. Informal feedback is part of each participants daily experience. Formal feedback is given both at mid-semester and end of term. Student Attorneys meet in a weekly seminar to examine their work closely. Practical, strategic, legal, ethical and interpersonal tensions are the focus of discussion aimed at deriving deepened understanding of the joys and challenges of civil litigation practice.

Law Practice 1

Blum, Joan

Fall 2024

All 1L students in their first semester will be enrolled in this course for which they will receive 3 credits toward satisfaction of the requirement in ABA Standard 303 for 6 experiential course credits. The curriculum will introduce students to the role of the lawyer through legal problem solving in a simulated client context. Students will be provided with instruction in: research and analysis of binding authority; identification of legally significant facts from documents, interviews, etc.; guided instruction in how to read and synthesize the law, the presentation of analysis of the law and application of the analysis to the problem facts; and preparation of office memoranda. The course involves classroom instruction and discussion, group work, and intensive individual feedback and conferencing.

Constitutional Law: Speech and Religion

Greenfield, Harold K, Esq.

Fall 2024

In this course, students will study the First Amendment rights of free speech, religious exercise, and non-establishment of religion. The course will cover the theories of these rights, their original meaning, and how they have evolved over time. Students will also analyze how these rights overlap or conflict. The course will cover the substance of the rights in question as well as the proper claimants, including whether and when corporate entities can bring constitutional claims. Students will gain a sophisticated knowledge of existing law and develop a strong theoretical foundation for evaluating future cases.

Professional and Moral Responsibility of Lawyers

Cassidy, R M

Fall 2024

The first part of this course focuses on central issues of professional responsibility faced by most lawyers in the daily routine of practice, whether in a large firm, a small firm, or a legal services program. Included will be problems of client confidences, conflict of interest, behavior in court, obligations to represent unpopular clients, and other restrictions on a lawyer's own speech and actions. The second part focuses on the fundamental moral responsibility of lawyers, analyzed both in terms of the rules governing attorney conduct and the principles of ethical philosophy. There also will be a discussion of the professional organizations of the bar in a historical context, and their future challenges. Because of the amount and nature of coverage of on the fundamental moral responsibility of lawyers, this class fulfills the Perspectives requirement in addition to the Professional Responsibility requirement.

LAWS323101

Contract Drafting

Martin, David R

Fall 2024

This course provides a foundation for drafting contracts, a skill critical for all lawyers. Lawyers are writers. A big part of that writing consists of contracts, not just for transactional lawyers but also including litigators, family lawyers, regulatory lawyers (both government and private practice), and others. This class covers both the why of various contract parts and technical writing skills. Thus the course will examine contractual covenants, representations and warranties, conditions, remedies, choice of law and other provisions. Technical topics include structuring contracts and crisp drafting of substantive terms and definitions. To meet the upper-level writing requirement, after learning the various topics and drafting techniques, students will draft various contracts from scratch that together meet the 30-page minimum. That will be the primary component of the grading, and there will also be a significant class participation portion of the grade.

Applied Legal Concepts

Williams, Ryan T

Fall 2024

Applied Legal Concepts (ALC) identifies select core legal concepts tested on the Multistate Bar Exam ("MBE") portion of the bar exam, and it develops strategies for applying these concepts effectively particularly in a high-stakes testing environment. Some of the legal concepts may have been introduced in other courses, but the emphasis in ALC is on a review of the most highly tested legal concepts from the MBE subjects through exercises specifically designed and scaffolded to help students develop the strategic mindset essential for success on the multiple choice portion of the bar examination. The ALC courses are offered in the fall and the spring semesters and are reserved for 3Ls. Each course focuses on a different set of MBE subjects and course materials for both courses include access to an online early bar preparation portal. While the materials are similar to the materials that students will use when they are studying for the bar examination after graduation, they contain additional exercises to help students break down the mental process necessary to effectively answer multiple choice questions in a high stakes testing environment. Students have access to substantive outlines, lecture handouts, video lectures, and MBE questions. The course is NOT a substitute for a summer bar prep course, but rather is an opportunity to develop skills essential for success with live professor feedback and at a pace not available during the intense 10 week bar study period.

Legal Analysis for Practice

Noble, Alice

Fall 2024

This course will further develop and strengthen students' legal analysis and problem-solving skills. Using a practice-oriented approach, the class puts students in the position of new associates at a law firm working with a senior partner (the professor). The course focuses on enhancing fundamental lawyering skills such as reading comprehension, rule mastery, issue spotting, outlining, the mechanics of legal analysis, and strong writing. Throughout the course, students will have multiple opportunities for hands-on practice of these skills through focused drills, group exercises, and workbook activities. The course enhances learning by providing students with individual feedback to learn how to evaluate their work and see a clear pathway for consistent improvement. Evaluation will be based on (1) Good faith completion of a Diagnostic Exam; (2) Timely completion of all quizzes, in-class assignments, and homework assignments; (3) Class Participation; (4) Compliance with Attendance Policy; (5) Midterm Exam; and (6) Final Exam.

Selected Topics in White Collar Crime

Dowden, James P, Esq.

Fall 2024

This seminar will examine emerging issues in the prosecution and defense of white collar crimes. We will first examine the concept of white collar crime and its import on other areas of the both criminal and business law. We will next study the concepts of corporate and individual liability. Our examination of white collar crime will also include several substantive offenses including conspiracy, tax fraud, mail/wire fraud, bribery, RICO, and financial crimes (including bank fraud and securities fraud). We will also conduct a study of the grand jury system and its role in both the prosecution and defense of white collar crime. Finally, we will intertwine an analysis of federal sentencing throughout the semester.

Amicus Brief Clinic

Carey, Thomas, Jr.

Fall 2024

The Amicus Brief Clinic will provide students and faculty an opportunity to weigh in on, and attempt to influence, the development of the law and public policy in the courts. In the Amicus Brief Clinic faculty will identify an important legal issue being considered or soon to be considered by a court. Faculty will then guide a small student team in the process of researching, writing, editing, and submitting an amicus brief to the court for consideration. Although the subject matter and faculty leader of each amicus brief will be different, every Amicus Brief Clinic will include instruction and supervision on legal research and writing as well as the rules relating to submission of amicus briefs.

Intellectual Property Survey

Olson, David S

Fall 2024

This survey course emphasizes federal copyright, trademark, and patent law and related state trade secret, rights of publicity, and unfair competition law. It is meant to provide students with a general working knowledge of the various intellectual property doctrines, and an understanding of how the individual intellectual property doctrines compare, contrast, and may be used to complement one another. This course is appropriate for the generalist who wants to understand and be able to analyze IP issues, which are ubiquitous in the modern practice of law. It is also appropriate as the first introductory course for students interested in taking a number of IP courses.

Employee Benefits Law

Shnitser, Natalya

Fall 2024

Retirement plans, health insurance, and other employee benefit plans are central features of the employer-employee relationship in the United States. The legal regulation of such plans is highly relevant for the practice of corporate, labor, tax, trust, domestic relations, and health care law, and is at the forefront of current policy debates about health and retirement security for U.S. workers. The course will survey the main types of health and retirement plans and examine the rules governing coverage, vesting, funding, fiduciary standards, integration with Social Security, claims administration, remedies, and preemption of state law. It will also consider how the decline of traditional pension plans and the recent healthcare reform impact the existing regulatory scheme for employee benefits in both the private and public sectors.

LAWS443301

Labor Policy & Geographic Inequality

Hafiz, Hiba M

Fall 2024

Empirical evidence of employer power in labor markets has drawn national attention and concern. Employers exercise of their buyer power suppresses wages, benefits, and the quality of work for American workers, and impacts workers of color, women, and low-wage workers most. But employer power is particularly pervasive and intractable in distressed and rural labor markets. Distressed and rural labor markets in rural areas and deindustrialized cities, suburbs, and towns that have suffered declining growth or contraction are characterized by high labor market concentration levels, scarce employment, and low levels of labor market regulation that entrench employer power. These characteristics present unique legal and regulatory challenges that this seminar will explore. The course materials and seminar discussions will concentrate on the limitations of current law and labor market regulation in these markets and consider a suite of legal and policy solutions to combatting employer power and strengthening worker power as well as establishing work as a means of accessing economic opportunity in the context of geographic inequality. In analyzing the limitations of current legal protections, the seminar will concentrate both on substantive rights and obligations imposed by current law as well as the role and ability of labor market institutions governmental agencies, unions, corporate forms, non-profits, and civil society organizations in ensuring or undermining those rights and obligations.

LAWS443601

International Human Rights Law

Young, Katharine

Fall 2024

This course provides a place to learn about, discuss, interrogate, build upon, and critique the international law of human rights. It surveys the substantive legal doctrines that protect against state-activated oppression, in the United Nations human rights regime and in other global, regional and national institutions. These developments are presented against a backdrop of postwar, decolonization, postcommunist and constitutionalization processes. In particular, the reading examines the capacity of human rights law to address such pressing normative ideals as global justice, gender equality, racial equality, sexual and reproductive rights, economic security, corporate and regulatory responsibility, and collective responses to climate change. The course approaches these questions from the perspective of international human rights law, comparative human rights law, law and political economy, law and development, and law and social change. A recurrent theme will be where, when and how the United States contributes to this evolving field of law. The open source textbook is available at <https://humanrightstextbook.org/digital-book>

Environmental Law: Teaching Seminar

Tierney, Michael P

Fall 2024

A seminar providing law students the opportunity to teach a University course in Environmental Law to graduate and undergraduate non-law students. Enrollment limited to eight law students selected from two area law schools--BC and BU. Teachers are given Boston College faculty status [but unsalaried!]. With the professor's advisory participation, two-person teams of law students teach an individually-designed section of a spring semester course in Environmental Law and legal process, each team's class enrollment comprising fifteen to thirty-five students from a wide variety of majors. A weekly law school seminar in the spring semester coordinates the research and teaching preparation. (Six preparatory sessions are required during the fall semester.) 2 pass/fail credits will be awarded in the Fall; 3 pass/fail credits will be awarded in the Spring; and there is the option for a 1-credit graded independent study in the Fall or Spring semester.

Fall 2024

A criminal prosecutor must reconcile the ethical obligation to "seek justice" with personal incentives to "win" cases and professional obligations to protect the public. We will examine the areas of prosecutorial decisionmaking that bring these competing goals into sharpest conflict. Topics will include the use and abuse of the grand jury; issues of overcharging and selective prosecution; discovery practice; the use of informants; pretrial publicity; plea negotiations; jury selection; trial conduct; and prosecutions of mental health cases. Class participation is considered in the final grade.

Energy Law and Deregulation

Duffy, Dennis J;Moskal, John F

Fall 2024

This survey course focuses on the law and public policy of electricity and natural gas, with discussion of both market and environmental regulation. The course will examine the frequent tensions between economic and environmental regulation. There will also be analysis of the Constitutional law applicable to the energy industries, including Commerce Clause and Supremacy Clause limitations upon state energy policies. Class time will also involve review of ongoing political and industry developments. There will be particular focus upon the development and financing of renewable energy resources.

LAWS448201

Advanced Legal Writing - Judicial

Connor, Jennifer L

Fall 2024

In this course, we will explore how courts reach and express their opinions. We will consider writings about the appropriate role of the court and individual judges in issuing opinions; we will also examine opinions to assess how the court reached its judgment and how it chose to construct its opinion. The class will engage in close readings of opinions to understand their style and structure. As a part of this process, you will learn to assess the arguments advanced by the parties in briefs, for substance and accuracy. To do this, you will practice identifying and applying the correct standard of review. You will also need to locate and evaluate precedent and handle factual questions. In addition, you will sharpen your writing style and write judicial opinions yourself. The class will practice using simple arguments, as well as procedural and other non-substantive reasons, to underpin judicial opinions. For litigators, this is your opportunity to learn the value of giving the court an appealing basis for its decision.

Advanced Legal Writing: Appellate Litigation

Buttaro, Andrew M

Fall 2024

This course will provide an overview of the basics of appellate procedure and introduce participants to the nuances of appellate writing offering students the opportunity to hone their writing skills in the process. Over the course of the semester, students will research and author their own appellate brief on a fixed record presenting a discrete legal topic. Throughout the drafting process, we will walk through the constituent parts of a brief and describe best practices. Beyond the drafting specifics, the course will introduce students to big-picture issues in appellate writing. We will cover the substantive (how the standard of review influences the entire brief) to the stylistic (typography and the great font debates) and everything in between (how to structure and style argument headers to create an effective table of contents). We will review standout examples of legal writing, dissecting good briefs to examine what makes them work so well. We will also review ineffective briefs to illustrate potential pitfalls. Finally, we will discuss common issues encountered in appellate writing everything from recurring grammatical issues to effectively managing jargon and defined terms. This course is an ideal fit for students interested in judicial clerkships, appellate practice, or further developing their research and writing skills. Ideally, by the course's end, students will have a firm grasp of the fundamentals of appellate writing and a polished writing sample on a sophisticated legal topic.

Advanced Legal Writing

Kraner, Rita

Fall 2024

This course focuses on legal analysis and writing with a particular focus on the audience and purpose of written legal communications. The primary purpose of this course is to assist students in becoming practice ready attorneys. Students will continue to build on the skills gained in their First Year Legal Research and Writing course and need only an interest in bettering their writing skills, including their editing skills. Using hypothetical client problems and a simulated court record, students will write client communications, including client letters and electronic communications, as well as pretrial civil litigation documents, such as legal briefs. Students will spend course time discussing each written assignment, reviewing drafts and collaborating on in-class exercises.

The United States Legal System

Campos, Sergio

Fall 2024

This course is required of LL.M. students who do not hold a U.S. J.D. degree. The course has several objectives: exposing students to fundamental concepts underlying the U.S. legal system, providing survival skills for the LL.M. year, exposing students to key doctrinal areas, and offering a frame of reference for comparing the U.S. legal system with students' own. The course is divided into three units: (a) an overview of our basic legal institutions, including the adversary system, the Constitution, and the Bill of Rights; (b) a case study in product liability law, as both substantive exposure to private law and an exercise in identifying and manipulating legal doctrine; and (c) an examination of how the structure of the legal profession and different modes of lawyering contribute to the functioning of the U.S. legal system as a whole.

Legal Research and Writing for LL.M'S

Ang, Kimberly

Fall 2024

Legal Research and Writing for LL.M.'s is a two-credit course that is recommended for LL.M. students who do not hold a degree from a U.S. law school. The course has several complementary objectives: exposing students to the most widely used techniques of U.S. legal research; teaching students to locate primary legal materials from electronic research sources; helping students identify authority that is relevant to a given fact situation; strengthening students' skills in U.S. legal analysis; and improving students' English language writing skills. The course builds on writing and analytical skills students have developed in the U.S. legal system.

LAWS626501

Law and Public Finance

Cole, Felipe

Fall 2024

A hopelessly indebted satirist once wrote that "those who made the laws have apparently supposed that every deficiency of payment is the crime of the debtor." In no relation between debtor and creditor has this claim borne out more clearly than the relation between government debtors and their many creditors. This seminar will explore how interactions between creditors and debtor governments defined the theory and practice sovereignty, the legal and political basis of the power of cities, states/provinces, and nations. Moving between the historical past and present and comparing across jurisdictions, we will explore how public debt shaped the sovereignty in the context of U.S. federalism, international law, and international investment law. We will engage questions in contract law, international law, international investment law, and corporations together with empirical studies from history, economics, and political science. Along the way, we will see how the laws distribution of power between public debtors and creditors absorbed theories of racial inferiority, financial capitalism, and democracy and produced (and reproduce into the present) the structures of racial capitalism and globalized inequality.

Nonprofit Organizations

Tarrant, Susan M

Fall 2024

This is a course in the law and theory of charities and other not-for-profit organizations. Our primary emphasis is on understanding the state and federal law governing these organizations, together with the rights and responsibilities of their members, officers, and directors. For example, we will explore what is a qualifying "charitable" activity, limits on the commercial and political activities of nonprofits, and operational elements such as governance, fundraising, management and leadership. Our legal discussion will be informed by an exploration of the purposes of charity, whether it has a unique social mission, and what implications those theories have for the proper governance of the sector. Grading is based on participation, written assignments, and a 15-page paper.

LAWS662101

Cybersecurity Litigation & Strategy

Meal, Douglas Harlan

Fall 2024

Criminal cyberattacks, which were essentially unheard of two decades ago, have now become daily events in the U.S. and around the world. And equally predictable and pervasive is the litigation that today inevitably flows from major cyberattacks, whether brought by means of a civil lawsuit or a regulatory enforcement proceeding. The stakes in such cybersecurity litigation are extremely high, with millions of dollars of damages liability and/or regulatory fines and penalties regularly being claimed. This course will explore the key issues that regularly arise in U.S. litigation arising from major cybersecurity events. It will be taught by a former private practitioner who has long been recognized as the leading privacy and cybersecurity litigator in the country. Students will learn about the various U.S. legal regimes that govern cybersecurity; how private litigants and government regulators seek to enforce those regimes in the context of major cybersecurity events; and how the targets of such enforcement efforts defend against the claims they are facing by reason of the cybersecurity event in question. The course will be structured around the various phases of a typical cybersecurity litigation, whether brought by a private litigant or a government regulator. The course will start with an overview of the theories of liability and injury, and the corresponding defenses to those theories, that are most often advanced by parties to a cybersecurity litigation. The course will then move to the discovery, class certification, and expert testimony issues that are unique to cybersecurity litigation. Along the way the class will take deep dives into some of the core issues in cybersecurity law such as what constitutes reasonable cybersecurity for personal information of another and what sort of injury must be shown in order for a private litigant or a regulator to be able to make a federal case out of a cybersecurity event. Throughout the focus will be on providing students with an understanding of both the key legal issues that tend to become focal points of cybersecurity litigation in the United States and the practical considerations that parties to cybersecurity litigation and their counsel must weigh in deciding how to address those issues in the particular case at hand.

Cyber Crime

D'Addio, David J;Queenin, Mackenzie A

Fall 2024

Our increasingly digital world has led to a wealth of opportunities for cybercriminals and other bad actors. This class, taught by a current and former federal prosecutor, will provide an in-depth examination of cybercrime, including the federal statutes implicated in computer hacking and other computer-based crimes, such as network attacks, identity and data theft, and cyberstalking. Through illustrative case studies, students will learn how federal law enforcement investigates and prosecutes cybercrime, starting with the collection of digital evidence and proceeding through trial and sentencing. The course will highlight the investigative tools law enforcement uses as well as the current challenges law enforcement faces in prosecuting cybercriminals. We will examine legal, procedural, and policy issues surrounding the search and seizure of digital evidence. The class will incorporate guest speakers from government organizations and other stakeholders in the cybersecurity arena.

National Security: Law, Policy, & Government Investigations

Noone, Gregory P

Fall 2024

National security law is often inaccessible and can be particularly hard to follow when divorced from the context of historical tradition, governmental structures, and operational reality in which it functions. This course will examine the law governing national security investigations and related litigation and will provide an in-depth examination of national security from the U.S. Government's perspective. Through class lectures, case studies, and hands-on application, students will learn how Federal intelligence and law enforcement agencies work together (and sometimes not) and their interplay with Foreign intelligence and law enforcement agencies to investigate and prosecute national security crimes, starting with the collection of evidence and proceeding through trial and sentencing. The course will highlight the investigative tools and laws used by intelligence and law enforcement agencies to investigate national security concerns and the varying challenges faced in prosecuting such cases. The class will incorporate guest speakers and experts from government organizations and other stakeholders in the national security field.

Foundations of Western Law

Kohler, Thomas C

Fall 2024

This seminar will place students into a conversation with some of the key thinkers who have shaped our modern Western legal traditions. In addition to Plato and Aristotle, the readings will be drawn from 17th, 18th, and 19th century English, French and German political philosophers. Themes include: how these authors influenced common and civil law systems; the relation among religion, law and morality and the problem of human knowing; the concepts of "law", "reason", "human nature" and the foundations of rights theory; the shift from the good to legitimacy; the rise of individualism and the problem of community.

LAWS668201

Commercial Law: Secured Transactions

Hillinger, Ingrid M

Fall 2024

A massive amount of commercial and consumer transactions involve taking personal property as collateral. Article 9 of the Uniform Commercial Code governs nearly all of these. From car loans, to multi-billion-dollar subprime mortgage lending. From restaurant equipment, to commercial and private jets. From nonprofit hospitals, to crypto-assets. And from financing business day-to-day operations, to the largest leveraged buyouts. Article 9 is at the center of it all. We will study Article 9 extensively, as well as certain other statutes. The goal is to learn technical reading of the statute -- and statutes in general -- and practical implementation of this for lending lawyers. In addition to the traditional types of collateral, we will also look at increasingly important types of collateral such as intellectual property, certain financial instruments, and specialized contracts that are core to the healthcare industry.

Corporate Compliance: Building a Strong Compliance Culture

Caron, Gerard A

Fall 2024

This course will provide students with an understanding of the primary aspects of designing, implementing, and maintaining effective corporate compliance programs that will withstand the test of time. The course will examine the key aspects that make up an effective program and comply with the Department of Justice (DOJ) expectations for such programs. Students will examine recent high profile case studies involving companies whose compliance programs were tested by courts, prosecutors, and the public at large. The course will also explore the public policy interests associated with giving corporations favorable consideration by prosecutors for having in place strong compliance programs in exercising prosecutorial discretion. Regular attendance, preparation, and participation in class will be required. The reading materials will be available via the course website. Class participation will count towards 20% of the final grade. There will be a take-home exam at the end of the semester.

Introduction to Canon Law

Ponzone, Andrea

Fall 2024

This course examines the nature, history, and sources of Canon Law in the Catholic Church. It presents an overview of the norms provided in the 1983 Code of Canon Law and relevant complementary canonical legislation. This course will focus on general norms (Book I), the People of God (Book II), the teaching munus of the Church (Book III), temporal goods (Book V). Given the current circumstances and issues about the Catholic Church's sexual abuse crisis, a brief presentation of penal law (Book VI) and processes (Book VII) will be offered. This course is recommended as a foundational background for "Canon Law of the Sacraments."

LAWS764501

Election Law

Brown, George D

Fall 2024

This course focuses on issues relating to the franchise. The franchise is central to a democratic republic. Voting not only determines who will be in the government, it establishes the legitimacy of any government that flows from accountability to the governed. Thus, a government must establish and protect a franchise that is fairly available and fairly administered. However, this seemingly simple goal masks a wide range of problems. Some examples are redistricting and gerrymandering (both partisan and racial), questions of voter suppression, including voter ID and "purging" of rolls, campaign finance, and bribery of candidates. The course is given in seminar form for 2 credits. The grading instrument is a paper of 25-30 pages in length. Students work closely with the instructor in developing and researching a topic.

Legislative and Public Policy Advocacy

Mitchell, Thomas

Fall 2024

This course covers several matters pertaining to legislative and public policy ideas that are developed and designed to address a range of societal issues and the advocacy work that is required in seeking to have these ideas actually become law whether as a legislative act or as an adopted policy within an executive branch agency. The course seeks to familiarize students with the life cycle of a legislative act or adopted public policy. The life cycles can progress from the stage of idea generation to vetting the idea to building support for the proposed legislative act or public policy to drafting a proposed legislative bill or agency public policy to navigating the bill or public policy through various official channels whether in a legislature or in an executive agency and can continue through to certain post-adoption matters such as those designed to maximize the effectiveness of the act or policy. The course will have a diverse set of guest speakers who work on legislative and public policy matters in a number of different capacities, including speakers from advocacy groups and organizations that develop model legislation, lobbyists, legislators and those who work in executive agencies.

Constitutional Theory

Barrozo, Paulo D

Fall 2024

Great constitutional questions always evoke constitutional theory. This course focuses on the great constitutional questions of our time, from the institutional design of electoral systems to the future of the separation of powers; from the constitutionalization of the economy to the constitutionalization of the environment; from the constitutionalization of the family to the constitutionalization of entertainment; from the clash between information and privacy to the tension between constitutional stability and cultural change. Students read landmark judicial decisions as well as the most fecund constitutional scholarship. Graded on final paper. No knowledge of constitutional doctrine or of legal theory assumed. Students and auditors from across the university are welcome. No pre- or corequisites. Meets the Law School's Perspectives Requirement.

Constitutional Theory

Barrozo, Paulo D

Fall 2024

Great constitutional questions always evoke constitutional theory. This course focuses on the great constitutional questions of our time, from the institutional design of electoral systems to the future of the separation of powers; from the constitutionalization of the economy to the constitutionalization of the environment; from the constitutionalization of the family to the constitutionalization of entertainment; from the clash between information and privacy to the tension between constitutional stability and cultural change. Students read landmark judicial decisions as well as the most fecund constitutional scholarship. Graded on final paper. No knowledge of constitutional doctrine or of legal theory assumed. Students and auditors from across the university are welcome. No pre- or corequisites. Meets the Law School's Perspectives Requirement.

International Investment Law: Evolution and Challenges

Cole, Felipe

Fall 2024

In this seminar we will explore the historical origins of international investment law (IIL), the body of law that governs foreign direct investment and the resolution of disputes between foreign investors and sovereign states. We will draw on an array of historical sources, cases, and the multidisciplinary scholarly literature to analyze how the norms and practices governing centuries of cross-border investment coalesced into a body of law during the late twentieth century. From a global perspective (focusing on the U.S., Latin America and the Caribbean, and Europe in particular) we will study the influence on ILL exerted by theories of race, economic development, legacies of colonialism and empire, pressures of globalization, and generations of IIL practitioners. We will build on these historical explorations to consider new critiques, theories, and practice-relevant aspects of IIL. Topics include the evolution of standards of treatment for foreign investors, the proliferation of bilateral investment treaties, the rise of investor-state arbitration, the role of large law firms, and various proposals for IIL reform designed to achieve greater equity and fairness.

Partnership: Transactions, Planning, and Tax

Repetti, James R

Fall 2024

This course will examine tax and economic issues associated with partnerships and limited liability companies. There will be occasional reference to substantive state partnership law as necessary to understand other concepts. Aimed at students interested in small business, venture finance, real estate, or general transactional work as well as taxation.

Anatomy of a Cross-Border Insolvency

Keach, Robert J

Fall 2024

The purpose of this course will be to take the students through a series of cross-border cases of varying types from beginning to end. The course will illustrate the difficult legal, political, and practical problems faced by practitioners in these cases. As a result of that journey through the case(s), the students will be taught concepts of extraterritoriality (and its limits); jurisdiction over foreign persons and entities (and its limits); the doctrine of forum non conveniens in the international context; and comity (and its limits). The students will learn the unique challenges and critical issues in filing a U.S. chapter 11 case for a foreign entity. The students will also learn the mechanics of chapter 15 (and its international counterparts) and its critical substantive and procedural components, all of which come into play when seeking recognition of insolvency proceedings in another country. Through the use of case studies, the students will be exposed to how these concepts and issues arise and are dealt with in an actual case, rather than being exposed only to theoretical problems. Using in-class experiential learning opportunities, the students will be placed in the position of the various parties and their counsel, with the attendant need to argue relevant positions and solve the problems it presented. At the end of this course, students should acquire a detailed understanding of how a cross-border case works procedurally and substantively, through various structures; a working knowledge of chapter 15 and cross-border protocols; a thorough understanding of principles of comity, extraterritoriality, personal jurisdiction and forum non conveniens as they relate to cross-border insolvency cases; and an understanding of how such cases can handle mass tort, environmental, and other mass-claim contexts.

Copyright

Liu, Joseph

Fall 2024

This course will give you an introduction to copyright, including a foundation in the theories underlying copyright law, an understanding of the current contours of copyright protection, the basic elements of proving infringement, the fair use defense to and remedies for infringement, and familiarity with related forms of liability such as secondary and vicarious liability. Each class meeting will consist of a combination of lecture and class discussion. Our discussions will sometimes focus on dissecting a landmark case and other times on working through the dynamics of a transaction or a policy question based on your reading. We'll also work through hypotheticals based on real-world examples and explore scenarios that will require you to think from a variety of different perspectives.

LAWS774901

Immigration Law

Kanstroom, Daniel

Fall 2024

U.S. immigration law involves such technical questions as how to obtain a visa, a "green card," citizenship and who is subject to deportation. It is also "a magic mirror" in which the highest aspirations and the deepest biases of American legal culture and history are reflected. This course explores both aspects of this complex area of law: the technical/legal and the political/philosophical. It involves constitutional law, administrative law, statutory interpretation, among other disciplines. There are traditional lectures, class discussions, in-class exercises, outside speakers, films, and court visits. The three-credit course requires class attendance, participation, and a final exam. More detailed information will be available in the first class. It is a pre- or co-requisite for the Immigration Clinic.

Labor Law

Hafiz, Hiba M

Fall 2024

What do the NFL, Major League Baseball and other professional sport leagues, the entertainment industry, the Writers' Guild, as well as large portions of the health care, hospitality, service and manufacturing industries, to name a few, have in common? Collective bargaining and the law governing that process regulates employment relations in all these industries. This course examines the Nation's basic collective bargaining statute, the National Labor Relations Act, the statute that provides the basic model for public-sector labor relations as well. Among other issues, this course examines the legal framework for bargaining, for dispute resolution through the grievance-arbitration process, the regulation of economic pressure tactics, union organizing and a series of Constitutional issues affecting this area. Current trends are highlighted and existing doctrine is studied in light of its demonstrated or likely impact. Evaluation by examination.

Taxation II

Repetti, James R

Fall 2024

Tax II explores the taxation of corporations. After a brief review of the other common forms for organizing a business and their distinctive tax treatments, the course focuses on the most important federal income tax issues relating to the organization, operation, liquidation and reorganization of publicly-traded corporations (and other "C" corporations). This includes the relationship between corporations and shareholders and the treatment of dividends and redemptions. The course is important for any student thinking of practicing in the general business area, even if she or he does not intend to become a "tax specialist".

Legal Scholarship Workshop: Regulation and Business

Ring, Diane;Shnitser, Natalya

Fall 2024

This workshop will feature presentations by five or six invited legal scholars of their works-in-progress concerning law, business, and the regulation of economic activity, broadly construed. Students will meet with one or more BC faculty conveners the week before each presentation to discuss the paper. Students will prepare one-page response papers for each work-in-progress presented. Response papers will be shared with the authors. This workshop is designed for students who are interested in publishing during law school and in legal scholarship more generally. It is also well suited for students with an interest in economic regulation, business, and corporate governance. 1 credit, pass/fail. (The course is repeatable.)

International Law

Wirth, David

Fall 2024

This course is designed to familiarize students with the operation and institutional structure of the international legal system, the law of nations that govern relations among states. The first portion of the course, consisting of somewhat more than half of the semester, will address the principal attributes of the international legal system, including (1) sources of international law; (2) subjects of international law; (3) jurisdiction of states; (4) international adjudication and dispute settlement; and (5) the law of treaties. The remainder of the course, as time permits, will be devoted to special topics, including such subject matter as the law of the sea; the international law of human rights; the use of force in international law; and diplomatic and consular immunity.

Entertainment Law

Brown, Christopher L

Fall 2024

Most entertainment law practitioners agree "Entertainment Law" has no set definition, but includes a hybrid of distinct areas of the law, including but not limited to, copyright, trademark, contracts, wills, estate planning, real estate, bankruptcy and intellectual property. Course focuses on the protection of IP and the contractual relationships between various parties in the Entertainment and Music Industry. A major focus will be analysis of the Copyright Act of 1976, as amended, the Digital Millennium Copyright Act, and the protection of IP and contractual rights in TV, film, music, books, etc. The relationship between the artist and his/her manager, agent, lawyer, and record company will be explored in great detail. Course will cover representation of artists and music labels and the problems they encounter. Students will participate in a group exercise where they negotiate a record deal on behalf of either the artist or the record label, and report back their terms to instructors.

Federal Courts

Williams, Ryan C

Fall 2024

The Constitution assures that the separate powers conferred upon each of the branches of the federal government serve as a check and balance to prevent abuse of power by any single branch, and that the aggregate of federal power, while supreme, is limited in scope, thereby serving to bind the union and simultaneously respect state sovereignty. This course will explore these two themes as they relate to the role of federal courts. Among the topics to be covered: separation of powers, federalism, congressional power to curtail federal jurisdiction, the case and controversy requirements as it relates to doctrines of standing, ripeness, and mootness, sovereign immunity, Congressional power to abrogate Eleventh Amendment immunity, Ex Parte Young doctrine, section 1983 litigation, absolute and qualified immunity in suits against state and federal officers, abstention doctrines, inter-system preclusion, and Rooker-Feldman doctrine. Evaluation will be by an in-class exam.

LAWS780501

The Courts and the LGBT+ Movement: A Critical Assessment

Ward, John P

Fall 2024

The seminar will examine the role of the courts in both enabling and hindering the remarkable social/political/cultural shifts that have made it possible for many lesbian, gay, bisexual and transgender Americans to participate more fully in our common life while being as open as they choose about who they are, creating for many of us a changed landscape impossible to have imagined a just a few decades ago. The First Amendment will be a primary focus, although the questions posed will inevitably spill over into considerations of the Due Process and Equal Protection provisions of the Fourteenth Amendment. Our perspective will be critical, recognizing evolving openness in the courts where it appears and at the same time calling out the conscious, unconscious and systemic bias that continues to pervade the law. The plan is to begin with the unlikely emergence of the First Amendment as a friend to LGBT+ folk in the otherwise hostile legal landscape of the Fifties. Then, we will track how, fertilized by the African-American civil rights and feminist movements of the Sixties and early Seventies, the right to speak burgeoned into the right to participate openly in civic venues that were formerly off limits. We will look at how, and to what extent, the role of the state as guardian of gender conformity lost much of its power to impede openness and equality for people who had historically been regarded as simply beyond the pale of community. We will examine the redlines that queer people were forbidden to cross, like the scouts, the military, athletics, parenting and marriage; and the extent to which those lines have eroded or become more rigid. We will assess the blowback, such as the spate of laws forbidding discussion of sexual orientation and gender identity in the schools; laws targeting transgender individuals; and the increasing use of the First Amendment to create exemptions to public accommodation laws. Finally, we will think together about the advantages and possible drawbacks of the strategies employed to advance equality for LGBTQ+ folks as these strategies relate to the larger struggle for human liberation and for the fostering of an environment that makes it easier for the planet and its inhabitants to thrive. To help facilitate this discussion, one or more sessions will, if feasible, include practicing attorneys working in this area of the law. There will be a final paper in lieu of an examination. Grades will be based on the paper and class participation, including weekly response papers to the material covered in our weekly sessions.

The History of Education Rights from Slavery to Black Power

Horwitz-Willis, Rebecca C

Fall 2024

This seminar analyzes the long movement for education rights in the United States through the advocacy and legal reasoning of African American parents, students, and civic leaders. Students will gain a stronger understanding of the historical relationship between education, law, and freedom in the Black community, as well as a more nuanced understanding of legal movements for school desegregation and community control from the antebellum era of the 19th century to the Black Power era of the 20th century. This seminar will pair readings with primary source documents, enabling students to contextualize the long struggle for education rights through the words of historical actors.

Reimagining the Reconstruction Constitution

Ferguson, Lucien M

Fall 2024

This weekly, two-credit seminar introduces students to the history, theory, and contemporary application of the Reconstruction Constitutionthe Thirteenth, Fourteenth, and Fifteenth Amendments. These Amendments abolished slavery, established birthright citizenship, nationalized a set of fundamental rights, and expanded the right to vote. What these Amendments mean for us today, however, remains an open and intensely debated question. Does the Thirteenth Amendment only abolish chattel slavery, or does it do more? What exactly does the Fourteenth Amendments Equal Protection Clause require of us? And what does our right to vote actually entail? In this course, we will study the meaning of the Reconstruction Constitution and critically reflect on its implications for contemporary legal practice. To do so, we will examine the original historical documents of the public debates surrounding the framing, passage, and ratification of the Thirteenth, Fourteenth, and Fifteenth Amendments. Special focus will be given to the constitutional legacies of the abolitionist, womens rights, and long civil rights movements, as well as the constitutional theories that shape the way we understand our Reconstruction Constitution today.

Advanced Legal Research

Davis, Laurel E

Fall 2024

Advanced Legal Research offers an in-depth, hands-on experience with the process of legal research. Students use a wide range of legal materials and devise practical techniques and strategies for using these materials competently and effectively. The goal of the course is to create self-sufficient legal researchers capable of analyzing and resolving legal problems effectively. Emphasis is placed on the types of legal sources and research not covered in the first year of law school (e.g., treatises, forms sources, administrative law, statutory research, legislative histories and legal practice materials). Both print sources and free and fee-based electronic sources are explored and critiqued. The course covers Westlaw, LexisNexis, BloombergLaw and other electronic sources

LAWS813401

Administrative Law Research

Breda, Karen;Bruce, Amy

Fall 2024

Administrative Law Research is a two-credit simulation-based course that qualifies as an experiential course under the ABA requirements. In this course, students will develop legal research skills but also other lawyering skills such as organization and management of legal work, professional ethics, and collaboration. Through the use of realistic fact patterns, we will work together to approach and solve research problems that implicate administrative law. Students will explore the general structure of the administrative state in the U.S. and how to research the materials generated within that structure. This includes how administrative regulations are promulgated, how agency decisions are made and reviewed, and how guidance is issued. The class will focus on immigration, securities, and tax law. However, students will learn skills that they can apply to other heavily regulated areas of practice. Grade will be based on class attendance, participation and graded assignments.

Government Externship Seminar

Barnico, Thomas A

Fall 2024

The purpose of this seminar is to teach basic concepts of administrative law and practice that will aid the student in his or her co-requisite externship in a local, state, or federal agency. The seminar will present: (1) elements of a successful externship; (2) common ethical issues for government lawyers; (3) a brief summary of the law governing the Executive Branch of federal and state governments; (4) an introduction to and comparison of the offices of state and federal attorneys general; (5) an exploration of issues confronted by counsel within the Executive Branch; and (6) the perspective of counsel for an entity regulated by the federal and state governments. Through journals, class discussions, and oral presentations, the seminar will provide students with opportunities for reflection about their externships and for the exchange of student views on subjects related to the practice of law within the Executive Branch.

LAWS826301

BC Innocence Clinic

Beckman, Sharon L, ESQ.

Fall 2024

Students in BC Innocence clinic work with faculty supervision on post-conviction screening and/or litigation of cases of prisoners who assert their innocence. Case screening involves review of trial transcripts, pre-trial discovery, appellate and post-conviction briefs, and judicial opinions, as well as factual and forensic research, to determine whether scientific testing or other investigative leads could establish a strong likelihood that the prisoner is factually innocent. Students produce a memorandum analyzing the case and making a recommendation as to whether post-conviction litigation should be pursued. Students engaged in litigation research and draft motions for various types of post-conviction relief with supporting memoranda and affidavits. Class component is devoted to case-rounds and development of legal, professional, and ethical skills in the context of post-conviction innocence work. Students spend 10-12 hrs/week outside of class time on casework.

International Human Rights Practicum

Urosa, Daniela

Fall 2024

This course focuses on appellate submissions to regional and international courts and other legal organizations that address international human rights issues. For spring 2020, students will work on submissions to the Inter-American Court of Human Rights (IACtHR) and the Inter-American Commission on Human Rights (IACHR). The Inter-American System for the protection of human rights (IASHR) is the regional system responsible for monitoring, promoting, and protecting human rights in the countries that are members of the Organization of American States (OAS). Currently, it is one of the strongest regional human rights protection systems in the world. This clinic will include two components. (1) The practicum will provide students with practical experiences in advocacy for the promotion of international protection of human rights through amicus briefs before the IACtHR; drafting of legal reports, protocol proposals, and hearings before the IACHR; and the possibility of submissions to other human rights tribunals around the world. (2) The accompanying seminar will provide an overview on the study of the IASHR, including its normative framework, mechanisms, rights protected and its principal entities. Possible practicum fieldwork at the IACHR (Washington DC) or the IACtHR (San Jos, Costa Rica) during spring break. Previous course work in International Law, International Human Rights, and/or International Legal Research is not required, but may provide an enriched perspective.

Community Enterprise Clinic

Teuscher, Carlos M

Fall 2024

This course introduces students to transactional legal work on behalf of low- and moderate-income entrepreneurs, small businesses, nonprofit organizations, and first-time home buyers. The fieldwork is based at the Law Schools Legal Assistance Bureau located in the new Center for Experiential Learning on campus. Students will perform all of the legal work and interact with the clients. Students will be assigned to work with entrepreneurs with business-related legal needs; with emerging, community-based small businesses facing corporate, employment or similar legal issues; with nonprofit organizations or groups seeking assistance to establish a tax-exempt organization; and first-time home buyers. For fieldwork purposes students will be assigned seven or ten office hours per week at the clinic, depending on the number of credits chosen by the student. A weekly seminar will address substantive law, ethical issues, and legal skills. The fieldwork is complemented by a weekly seminar.

LAWS830801

BC Defenders: Lifer Parole and Medical Release Clinic

Herrmann, Francis R, SJ

Fall 2024

Prisoners who have become eligible for parole after serving at least fifteen years in prison on a life sentence (lifers) often appear before the Massachusetts Parole Board without representation. Students in teams will help prepare lifers for their parole release hearings and will represent them at the hearings. Representation entails learning about the clients life before the underlying crime, the facts of the underlying crime, and the clients institutional history contained in Department of Correction and Parole Board records. Until Covid-19 risks abate, students will conduct interviews with clients via Zoom, email, and postal correspondence rather than by visiting the prison in person. Students will prepare a memorandum in support of parole, including a re-entry plan (with the help of social work students); and prepare the client and support witnesses to testify at the hearing. The Parole Board conducts all hearings virtually during the pandemic. Students will appear virtually at the Lifer Parole Hearing with the client and will deliver an opening statement and closing argument. Under the Massachusetts Criminal Justice Reform Act, prisoners serving state sentences at the Massachusetts Department of Correction who are suffering from terminal illnesses or from irreversible physical or cognitive incapacitation may be eligible for medical release ("compassionate release"). Whenever such cases are referred to the Clinic, students will help prepare a petition for release and an accompanying medical parole plan with the assistance of social work students and nursing students. Students will first advocate with the Department of Correction for release. If not successful, appeal can be taken to the Superior Court. Students will learn about the clients underlying crime, the clients institutional record, the clients physical, medical, mental health condition and the clients risk to re-offend in light of the client's condition.

Immigration Law Clinic

Holper, Mary P

Fall 2024

Students in the Immigration Clinic represent noncitizens in removal proceedings before the Immigration Court, which involves arguing bond motions for detained clients, conducting examination of witnesses, raising evidentiary objections and arguing points of law. Students represent noncitizens in applications for legal status before the U.S. Citizenship and Immigration Services (CIS) office. Cases vary, but may include asylum and relief based on fear of persecution in the country of removal, waivers of deportation for long-term residents of the U.S., adjustment of status for noncitizens with U.S. citizen or permanent resident family members, visas for victims of violent crimes who have assisted in the prosecution of such crime, relief for noncitizen victims of domestic violence and visas for juveniles who have been abused, abandoned or neglected. Students conduct "Know Your Rights" presentations for noncitizens who are detained by the Immigration and Customs Enforcement (ICE).

Family Justice Litigation Clinic

Donohue Prono, Claire P

Fall 2024

Students will advise and represent low-income clients in civil and administrative matters related to family law and child welfare. Students will be court-certified as Student Attorneys and will handle all phases of their clients cases, from client interviewing through case planning, fact investigation, discovery, client counseling, negotiation, and courtroom advocacy. Practice Areas in the clinic are family law and administrative advocacy against the state Department of Children and Families (DCF). Cases are primarily in Middlesex County. Clinical faculty provide extensive supervision, assistance and training through every stage of students work on cases, from preparation for tasks and events through retrospective reflection. Student Attorneys meet weekly in a small seminar group. Seminars will cover the practical, strategic, legal, ethical, and interpersonal tensions that are at the heart of litigation practice. In the second hour of seminar, Masters of Social Work students who are placed in the clinic will join the student attorneys for interdisciplinary rounds.

Entrepreneurship and Innovation Clinic

Tarrant, Susan M

Fall 2024

The Entrepreneurship & Innovation Clinic (EIC) is a dynamic clinic that provides free transactional legal services to under-resourced clients in the Greater Boston area on issues relating to new and emerging businesses. This innovative clinic provides students with the hands-on, practical experience needed to navigate the rapidly evolving fields of intellectual property and entrepreneurship. Law students working under the supervision of the clinic director provide a broad range of business law, intellectual property and transactional services. Clients include micro-entrepreneurs, technology entrepreneurs, social entrepreneurs, artists, authors, filmmakers and musicians, who may be individuals or for-profit businesses in the Greater Boston area who are in need of transactional legal counsel related to starting or operating their business. The EIC is for students interested in learning to work with organizational clients and learning to represent clients in transactions.

Project Entrepreneur

Gennari, Lawrence H

Fall 2024

This course is centered on using entrepreneurship to foster the successful reentry of formerly incarcerated individuals back into society, igniting a new beginning for their families, and invoking positive change in their communities. The mission of Project Entrepreneur is to equip formerly incarcerated people in the Greater Boston area with the tools necessary to be successful entrepreneurs through networking and mentorship and the completion of an important "entrepreneurial fundamentals" class focused on business development, operations, sales and marketing, and strategy. Format: First, under the supervision of Professor Gennari, you will concentrate on the development of legal knowledge and counseling skills related to the advising of new businesses. Second, you will meet with the entrepreneurs and would-be business owners, who will become clients of BCLaw's Community Enterprise Clinic for purposes of the class. Third, together with graduate student colleagues from the CSOM and the GSSW, you will coordinate an eight-week course called "Project Entrepreneur" for the enrolled entrepreneurs, which will be focused on the legal and business aspects of creating and managing new ventures. Fourth and finally, you will be part of a multidisciplinary team that will meet throughout the semester, and primarily after each Project Entrepreneur class and as appropriate with the would-be business owners, to work through questions, challenges, and opportunities for the new venture.

In House Externship Seminar

Peiczarka, Janelle L

Fall 2024

This seminar is for students who are externing with an in-house legal department and will cover various topics such as: the role of in-house counsel, working with outside counsel, identifying ethical issues when representing an organization, intellectual property & privacy concerns, communication strategies when engaging and working with business teams and other departments throughout the company or organization, etc. The faculty member will work with students to develop personal learning goals that include concrete strategies the students will use to achieve each goal and how they will measure their progress. The seminar is designed to be practical, reflective and interactive. Students will be encouraged to discuss and the faculty member will advise on common workplace challenges such as managing their time, structuring legal research for business settings, communicating with supervisors, collaborating on work assignments, and learning appropriate workplace etiquette. The seminar meets every other week throughout the semester. It is a one credit class. Students will be required to complete assigned reading, submit journal entries, and participate in class discussions.

Mediation

Hanify, John D, ESQ

Fall 2024

An introduction to the theory and practice of mediation necessary to understand the mediation process from the perspective of a mediator or as an advocate representing clients in the mediation process. Mediation is an assisted negotiation with the mediator acting as a third party neutral facilitator. Beginning with a review/overview of interest based negotiation, mediation theory, and the role of mediation in the legal system, then course progresses to include a skills training component of simulate cases with students participating as mediators and parties. The mediation process is examined and various skills and techniques of the mediator are taught. Understanding ethical practice and legislating related to mediation is an integral part of the course.

Advocacy Competitions

Daly, Rosemary

Fall 2024

This is the companion class to the national moot court teams. Enrollment and attendance in this class is mandatory for all members of a national team. The goal of the class is to help prepare students for not only for their individual competitions but also for litigation practice. The class is divided into three parts: overview of the moot court experience, appellate written advocacy and oral advocacy. The class will meet formally during the Fall semester until Oct 15. The class will reconvene in the first half of the Spring with their team coaches for oral advocacy/moot sessions until the competitions are complete. Students should expect an "incomplete" grade until they have completed their moot court experience (February/March).

Trial Practice

Locke, Jeffrey A

Fall 2024

There are several sections of trial practice, which are taught by adjunct faculty who are judges or practitioners. Each instructor selects his/her own readings and exercises, but the coverage of the sections is quite similar. All require students to prepare and to perform aspects of jury trial -- opening and closing arguments, and direct and cross-examination. The course is designed to develop practical skills and to build an appreciation for the relationship between substantive law and strategy and tactics in litigation. This section includes both civil and criminal trial exercises. Students also participate in a mock trial held in a real courtroom. All sections focus on trial advocacy; some also consider some pre-trial skills, such as discovery depositions. All sections have limited enrollments. Evidence is a prerequisite.

International and Foreign Legal Research

Farne, Stephanie J

Fall 2024

International and Foreign Legal Research aims to provide students with in-depth and hands-on experience with the general process and sources of international and foreign legal research. Students will learn to use a variety of specialized legal research tools, both online and in print, to locate and evaluate the major sources of public international law, i.e., treaties, customary international law, and general principles of law. Decisions of international courts and tribunals, and official documents of international organizations (United Nations, European Union, WTO, etc.) will also be examined. The course will also cover special topics in international law, e.g., private international law, international human rights, international trade law and commercial arbitration. Grades will be based on 3 take-home assignments. Recommended for students interested in international legal practice, members of the Jessup Moot Court team, and the staff of the BC ICLR.

Criminal Process Clinic Seiminar

Sarda, Evangeline;Sato, Lumina

Fall 2024

The Criminal Process Clinic seminar brings together students enrolled in the BC Defender Program and the BC Law Prosecution Program for a weekly class in which they share their insights and experiences, compare professional roles, and examine the functioning of the criminal justice system and measure it against conceptions of fairness and justice. Students and faculty from both programs participate together in skills training simulations, presentations, field trips, and conversations with experienced criminal justice professionals. In addition to readings and other assignments, students write weekly journals reflecting on and integrating their clinical and classroom experiences.

LAWS890001**Real Estate Transactions, Development and Finance****Levine, Howard A****Fall 2024**

The course, clinical and practical, explores a lawyer's role and responsibilities, and the myriad of transactional documents and agreements, in residential and commercial real estate transactions from offers through acquisition and loan closing. The course examines, dissects, and teaches how to represent buyers, sellers, and lenders during the due diligence, development and permitting, and the financing phases of a real estate transaction. The course teaches practical lawyering skills such as drafting, negotiation, and problem solving. A variety of ethical issues are reviewed. Commercial leasing transactions, zoning, environmental and due authorization opinion letters, and zoning and environmental law and considerations in sale, lease, and finance transactions are taught. Case studies are presented and negotiation exercises conducted to summarize the areas of real estate law studied and to explain how the legal principles, cases, and issues work in real-life situations.

Dispute Negotiation

Crane, Daniel C

Fall 2024

This is an experiential course in which students will be active participants, negotiating cases on a weekly basis. The subject matter of the disputes will include: commercial transactions, gender bias issues, criminal plea bargaining, family law matters, personal injury cases, and other disciplines. Students will be introduced to the art of negotiating, reading body language and micro-messages, interviewing clients and reaching common ground with adversaries. The work will be critiqued as actual student negotiating sessions are taking place, all in an effort to familiarize students with various techniques, strategies, tactics, persuasive skills, and effective demeanor involved in successful negotiations. Although there will be some lectures, the emphasis of the course is "learn by doing."

Civil Rights Clinic

Parikh, Reena

Fall 2024

The Civil Rights Clinic is a 6-credit experiential learning course embraces a multi-pronged approach to lawyering, working with individuals and community-based organizations to address civil rights issues facing low-wage workers, immigrants, and communities of color in Massachusetts. Students work in teams and each student is assigned to one litigation matter and one community group advocacy matter, exposing them to both individual client representation, as well as community and movement lawyering. In seminar and supervision, students will be encouraged to think critically about the role of the lawyer, client, and community in these different models and the intersection of worker and immigrant rights and racial justice. On the litigation side, representative matters may include lawsuits on behalf of workers, immigrants, and incarcerated individuals who have experienced various forms of exploitation including wage theft, discrimination, and mistreatment. On the community advocacy side, the clinic provides legal, policy and other technical assistance to organizational clients that may include worker centers, local unions, or immigrant advocacy groups, in support of their legislative priorities or other organizing campaigns. Student Attorneys should plan to spend approximately 20-25 hours/week on clinic work and will be handling all phases of their client matters with the close supervision and guidance of the clinic director.

LAWS898001

Civil Litigation Clinic: Housing Justice

Minuskin, Alan D

Fall 2024

In this clinical course students advise and represent low-income clients in a variety of housing matters under close, supportive supervision by experienced clinical faculty. Clinic participants are court-certified as Student Attorneys. Their practice is based at the Boston College Legal Services LAB, a law firm within the Law School that is part of the BC Center for Experiential Learning. Student Attorneys handle all phases of their clients cases, from client interviewing through case planning, fact investigation, discovery, client counseling, negotiation, and courtroom advocacy. Through practice and confronting a series of inevitable firsts; students rapidly develop both confidence and competence as lawyers. Housing Justice is geared toward prevention of homelessness, primarily through eviction defense and public housing advocacy. The case docket also includes affirmative civil cases against notoriously unscrupulous landlords to correct deplorable housing conditions, halt discriminatory practices, and protect tenants from other forms of mistreatment. The mixture of housing matters students handle enriches their development in many ways. Students will understand the common legal, factual and ethics patterns that emerge from different types of litigation matters. Courts and administrative agencies before which students appear provide informative contrast. Cases have different paces and cadences. Clients have distinctly different interests and needs. This variety contributes immeasurably to a beginning lawyers professional growth. Clinical faculty provide extensive supervision, assistance and training through every stage of students work on cases, from preparation for tasks and events through retrospective reflection. Student Attorneys receive thorough feedback on all aspects of their work to help them build core lawyering skills, learn from their experiences, and mature professionally. Informal feedback is part of each participants daily experience. Formal feedback is given both at mid-semester and end of term. Student Attorneys meet in a weekly seminar to examine their work closely. Practical, strategic, legal, ethical and interpersonal tensions are the focus of discussion aimed at deriving deepened understanding of the joys and challenges of civil litigation practice.

Hines, Geraldine S

Fall 2024

The well documented phenomenon of police violence against African-Americans and other people of color now stands out as one of the most vexing and intractable social justice issues in the United States. Viral videos have shined a light on the pervasive brutality of racialized policing, a problem that once was visible only to the victims and the communities where it occurred. Legal scholars and practitioners have been drawn into the lively public debate about how, under a legal system ostensibly guided by principles of equal justice under the law, such behavior is allowed to continue without consequences for the perpetrators. The question central to this debate is whether the Constitution and established legal procedures provide a sufficient and reliable restraint on racialized police violence against people of color. Some activists, distrustful of a legal system that too often fails to hold police officers accountable for conduct that violates a persons civil and human rights, doubt the vitality of existing legal and policy responses to the issue. In the alternative, they tout remedies that include defunding or abolishing the police altogether. Others, advocating a more moderate approach, insist that by reforming existing law, policy and practices, the problem of police violence can be sufficiently mitigated. In this course, the readings and discussion will focus broadly on this debate over the role of the law in combating racialized policing. First, students will consider the extent to which the Fourth Amendment (which defines the rules of engagement for threshold encounters between the police and civilians) and the Equal Protection Clause (which prohibits discrimination based on race) offer viable protections from racialized police violence. For this segment of the course, the class discussion will highlight *Terry v. Ohio* and *Whren v. United States* as students consider whether neutral Fourth Amendment principles like reasonable suspicion to justify a stop and frisk may be implicated in the prevalence of racial profiling and other forms of racialized policing. In the second segment of the course, students will explore established accountability measures, including criminal prosecutions under state and federal law, departmental discipline, civil rights actions under 42 U.S.C. 1983 and federal consent decrees under 34 U.S.C. 12601, with the goal of understanding the limitations of each as a check on racialized police violence. In the last segment of the course, students will review a sampling of the post-George Floyd proposals for reimagining policing and insuring accountability for wrongful conduct. Here, the discussion will challenge students to critique the broad expanse of ideas emanating from the reform movement, the proposals for defunding the police and the demands for abolition of the police altogether.

LAWS992401**Inclusion and Exclusion in American Law****Rana, Aziz F****Fall 2024**

Who counts as a full member of the U.S. polity? And how has law structured the benefits of such membership as well as the conditions for exclusion? Moreover, how have these terms changed and remained consistent throughout American history? This course will use a variety of landmark cases as a jumping off point for assessing the linkages in the U.S. between full inclusion and judgments about race, gender, Indigeneity, sexuality, class, religion, and immigration. In the process, the course will explore decisive periods of conflict over the meaning of membership from the founding and the Civil War to the Great Depression, the Civil Rights Movement, and more recent struggles regarding equality and freedom. Alongside court-based disputes, we will also assess how inclusion and exclusion interact with basic questions of legal-political institutional design and democratic legitimacy.

LAWS992601

Taxation I (Individual Income Taxation)

Ring, Diane

Fall 2024

Taxation I is the basic introductory course in federal income taxation. In contrast to courses in the first year, it is principally a statutory course, dealing with the Internal Revenue Code and the Regulations. The focus of the course is divided between mastery of the technical tax principles and understanding of the basic policy judgments which are implicit in those principles. For a student who takes no additional tax courses, Taxation I should provide an overall understanding of how the federal income taxation system functions. For students desiring to continue their studies of tax, Taxation I develops the themes which will be recurring in later courses and forms the basis on which the subsequent tax courses build.

LAWS994301

Criminal Procedure

Bloom, Robert M

Fall 2024

This course will focus on constitutional limitations on police practices. The 4th, 5th, and 6th Amendments are examined as they affect the warrant process, searches and seizures, interrogations, confessions and identification. The course considers in depth the exclusionary rule and other legal controls on police conduct. The course presents a unique opportunity to explore and contrast various judicial philosophies within the Supreme Court regarding criminal procedural protection. Teaching methodology is a combination of lecture, discussion, videos, and Socratic dialogue.

Sports Law

Yen, Alfred C

Fall 2024

This course offers the study of selected topics in the application of law and legal thinking to sports. Particular attention is paid to how law or legal thinking shapes the business of sports and the behavior of those who run, play in, or regulate sports. Topics include league governance, merchandising, media rights, antitrust, labor law, and tort law. The class also includes on major simulation about the movement of college football teams to new conferences. The class requires a substantial research paper on a topic of the student's choice.

Environmental Law

Madeja, Jamy B

Fall 2024

Students will learn foundational existing federal environmental laws and some sample state and local environmental laws, including statutes, regulations, executive orders and precedential cases, as well as policies and guidelines which act like laws in practice. Students will learn practical applications for addressing client or societal goals (for profit and not for profit clients) through interactive class discussion. International law will be addressed regarding climate change and climate change adaptation matters. Several guest speakers will assist students in putting law and policy themes in practical context, including addressing scientific environmental challenges when no law yet exists or existing law is inadequate and understanding law in its social context. Teams of students will work together in class to mirror the reality of practicing law. Interdisciplinary thinking will be advantageous, especially in the context of supporting or opposing development projects. Assignments will include participation in on-line public hearings when possible.

LAWS997101

Banking Regulation

McCoy, Patricia A

Fall 2024

This course examines why the banking industry is one of the most heavily regulated U.S. industries and how federal safety and soundness regulation works from cradle to grave. The course begins by providing a historical overview and analyzing the rationales for government intervention in banking. The remainder of the course examines the techniques used by the government to constrain the risk of bank panics, including entry controls (through chartering), activities restrictions, prohibitions against mixing banking and commerce, minimum capital and other prudential requirements, and limits on risky activities by bank conglomerates. Special attention will be devoted to federal deposit insurance and the FDIC's procedures for resolving insolvent banks. Students will consider how well these rules work and the reforms enacted after the financial crisis of 2008. This course does not cover consumer financial protection or provisions of the Uniform Commercial Code.

LAWS218501

Law and Religion

Kohler, Thomas C

Spring 2025

Law and religion are fundamental organizing principles across societies, while work is a basic human activity that operates as our chief claim on status and resources. In a multicultural society based on liberal principles, how employers, the law, and society handle religion in the workplace has become a fundamental and ongoing problem. In this comparative seminar, we will investigate how U.S. law tries to accommodate religious belief and practice in the workplace; problems employers face in accommodation claims; the impact of the law on religious minorities, among other issues. Our investigation will include an examination of how European Union law and German law approach such questions. This provides an opportunity to deepen knowledge of U.S. law by studying it in contrast, while providing students an orientation to how two key foreign systems approach like issues. The seminar will include presentations and discussion by leading European scholars. Students will be expected to develop and complete a substantial writing project on a topic of their choosing in the field of law and religion.

Professional Responsibility

Silveira, Stacy J

Spring 2025

This course focuses on central issues of professional responsibility faced by most lawyers in the practice of law, whether in the public or private sector. Included may be problems of client confidences, conflicts of interest, behavior in court, obligations to represent unpopular clients and other restrictions on a lawyer's own speech and actions. Other topics focus on the fundamental moral responsibility of lawyers, analyzed in terms of the rules governing attorney conduct, principles of moral philosophy and the pressures that create ethical blindness.

Professional and Moral Responsibility of Lawyers

Van Neste, Maureen R

Spring 2025

The first part of this course focuses on central issues of professional responsibility faced by most lawyers in the daily routine of practice, whether in a large firm, a small firm, or a legal services program. Included will be problems of client confidences, conflict of interest, behavior in court, obligations to represent unpopular clients, and other restrictions on a lawyer's own speech and actions. The second part focuses on the fundamental moral responsibility of lawyers, analyzed both in terms of the rules governing attorney conduct and the principles of ethical philosophy. There also will be a discussion of the professional organizations of the bar in a historical context, and their future challenges. Because of the amount and nature of coverage of on the fundamental moral responsibility of lawyers, this class fulfills the Perspectives requirement in addition to the Professional Responsibility requirement.

Applied Legal Concepts II

Williams, Ryan T

Spring 2025

Applied Legal Concepts (ALC) identifies select core legal concepts tested on the Multistate Bar Exam ("MBE") portion of the bar exam, and it develops strategies for applying these concepts effectively particularly in a high-stakes testing environment. Some of the legal concepts may have been introduced in other courses, but the emphasis in ALC is on a review of the most highly tested legal concepts from the MBE subjects through exercises specifically designed and scaffolded to help students develop the strategic mindset essential for success on the multiple choice portion of the bar examination. The ALC courses are offered in the fall and the spring semesters and are reserved for 3Ls. Each course focuses on a different set of MBE subjects and course materials for both courses include access to an online early bar preparation portal. While the materials are similar to the materials that students will use when they are studying for the bar examination after graduation, they contain additional exercises to help students break down the mental process necessary to effectively answer multiple choice questions in a high stakes testing environment. Students have access to substantive outlines, lecture handouts, video lectures, and MBE questions. The course is NOT a substitute for a summer bar prep course, but rather is an opportunity to develop skills essential for success with live professor feedback and at a pace not available during the intense 10 week bar study period.

Strategies for Effective Legal Analysis

Murphy, Marlene

Spring 2025

This course is designed to provide students with an opportunity to hone critical reasoning, essay writing and test taking skills. This course focuses on the development of legal analysis skills, test performance techniques and a strategic mindset. The course will also provide early preparation for the Bar Exam, specifically the Multistate Bar Exam (MBE), the Multistate Essay Exam (MEE), and the Multistate Performance Test (MPT), which are exams created by The National Conference of Bar Examiners (NCBE). While this course will have a skills approach it will also focus on select topics of law within two substantive subjects tested on the MBE and the MEE. The course will benefit any student who plans to take the bar exam. It will be especially helpful for those seeking to strengthen their legal analysis or legal writing skills. The course will include regular assessments, including an opening test (a "pre-test"), in-class quizzes, a mid-term exam and a final exam. This course is offered on a Pass/Fail Basis only. Students will have to achieve a minimum score on assessments to receive a passing grade. Course materials will be provided by instructor. This course is limited to second semester third-year students who plan to sit for the bar exam in the summer immediately following graduation. This course is not intended to replace the need for a post-graduate full bar review preparation course. Students should plan to also take a full bar review course after graduation.

LAWS334701

Federal Criminal Civil Rights Laws: Their Development and Enforcement

Curran, Stephen J;Merritt, S Theodore

Spring 2025

This course examines the legal underpinnings and enforcement strategy of federal criminal civil rights laws, and explores how they have responded over time to changing societal mores. The areas of focus include (1) the willful deprivation of constitutional rights by officials acting under color of law e.g. police brutality; (2) federal hate crime laws; (3) violent interference with reproductive rights; and (4) human trafficking. In each of these areas, the course will examine the laws that have been passed to address the protection of these rights from criminal interference. In particular, significant Supreme Court and other appellate court cases that have shaped the application of these statutes will be studied. For example, the course will address the history of Title 18 U.S.C. 241 and 242, which emanate from the Civil Rights Act of 1866 and the Supreme Courts constitutional interpretation of those statutes; the passage in 1968 of modern federal hate crimes laws and judicial interpretation of those laws; and the statutory evolution of hate crime and anti-trafficking laws, highlighted by the enactment of the 2000 Trafficking Victim Protection Act and the 2009 enactment of the Shepard-Byrd hate crime law, the first hate crime law to cover sexual orientation, gender identity and disability. As new legislative initiatives emerge, the course will incorporate any relevant changes to existing federal and Massachusetts laws. The course will also explore the federal enforcement effort of these criminal laws with an eye towards the role played by the Criminal Section of the Department of Justices Civil Rights Division where both Instructors worked. In particular, there will be a focus on the implementation of the policy of successive federal prosecutions to vindicate rights after failed state prosecutions, such as the landmark cases of the beating of Rodney King and the killing of Vincent Chin. It will also examine more contemporary direct federal prosecutions initiated after the racially-biased killings at the AME Church in Charleston, S.C. and in Charlottesville, VA. Besides the Instructors' personal involvement in some of these cases, other guest speakers with experience in criminal civil rights enforcement are expected. Students will also be asked to participate in mock trial openings and closings in cases which highlight the issues of proof endemic to these types of prosecutions.

Law and Economics

Johnston, Mitchell

Spring 2025

This course is about economic analysis of law. Students will learn to apply basic economic analysis to legal rules. The course will enable students to think critically about the desirability, efficiency, and effectiveness of laws and regulations in light of economic analysis of legal rules. The course will review the basics of microeconomic theory, survey the structure of the legal system and its primary regulatory actors, and explore the substance of a number of relevant legal rules and regimes. The course will then examine and analyze the legal system in light of foundational topics and emerging concepts in the economic analysis of law (including behavioral economics). This course will also explore the implications of economic analysis for the design and practice of law and regulation, particularly laws and regulations that affect commercial and economic activity. It will consider questions about the appropriate scope, and effective design, of such law and regulation.

Blockchain, Cryptocurrencies, and Digital Assets

Tomunen, Mari H

Spring 2025

Welcome to a course where blockchain assets meet law. This course is designed to give the students an understanding of blockchain technology as well as cryptocurrencies and other digital assets, and their interaction with law and the legal practice. The course will explore the legal issues arisen by the innovative business models utilizing peer-to-peer networks and distributed ledger technology. During the course, we will analyze several major cryptocurrency issuances (e.g., Bitcoin and Ether) and the benefits of tokenizing or digitalizing other assets, like gold, art or equity, as well as the business and legal issues connected to trading them. Moreover, students will learn about non-fungible tokens (NFTs), stablecoins and central bank digital currencies.

Class Action Law

Frederico, Donald R

Spring 2025

This course is designed to provide students a working familiarity with the key principles and precedents that guide practitioners in their handling of class actions and similar forms of complex litigation. It also seeks to instill a practical understanding of the life of a class action, from before a case is filed until all appeals have been exhausted. We will examine the evolving law of class actions, including an analysis of Rule 23 of the Federal Rules of Civil Procedure, the Class Action Fairness Act, key Supreme Court decisions, and significant trends and developments in lower federal and selected state appellate courts. We also will examine the strategies and tactics practitioners employ in prosecuting and defending class action cases. The course will employ lecture and break-out sessions, and will occasionally include outside speakers. A small number of sessions may be taught remotely.

LAWS368001

Mindfulness and Contemplative Practices for Lawyers

Anzalone, Filippa M

Spring 2025

Law practice is by nature a demanding profession that requires critical thinking, has lots of deadlines, and requires both cognitive and emotional intelligence. As a result of the demands of their chosen vocation, lawyers, and law students experience higher levels of depression than the general population due to ubiquitous overwork and feelings of being overwhelmed by the constant stresses of their work and its burdens. Setting aside time for reflection and contemplation is hard to come by. The goal of this course is to introduce students to the concept of mindfulness and to explore ways that contemplative practices will enhance and enliven the skills that they will need as lawyers. To be successful and healthy, lawyers need to develop sustainable ways of coping that will help them better withstand the rigorous demands of the legal profession. Throughout the semester, we will be using mindfulness practices for stress reduction, self-awareness, compassion for self and others, focus, resilience, and leadership. This course is practical. By taking it, you will learn about concrete tools to better deal with the problems that you will encounter in the legal profession.

Employment Law

Kohler, Thomas C

Spring 2025

This course addresses the legal regulation of employment of those without any form of collective representation, including executives, hourly and contingent employees. It addresses three major areas: (1) The common law regulation of the employment relationship. This includes formation of the employment relationship; common law exceptions to the at-will rule; privacy and dignitary protections (including electronic media); trade secrets and other intellectual property concerns; restrictions on competition; the use of arbitration as a means to avoid jurisdiction of common law courts. (2) The second area covered is federal regulation of wages and hours pursuant to the terms of the Fair Labor Standards Act (an area of substantial growth and litigation). (3) The law under the Occupational Safety and Health Act. This is a dynamic and controversial area of the law. Consideration of current developments and trends, economic and social, as well as comparative legal approaches, are included.

Law of Philanthropy

Bagley, William F, Jr.

Spring 2025

The study of law and philanthropy is lively capable of fascinating classroom consideration and of real value to legal careers. For those who anticipate a career in private practice (including wealth management), who might sit on foundation or non-profit boards, who might advise corporations in their philanthropy or who might find careers involving public policy or taxation and in so many other ways, this journey through the topic can offer much. This course considers the connection between the law (legislation and statutes, case law and regulation) and charitable giving. It is a rapidly changing field and this years edition of the course will have much to address as changes in state and federal statutes and regulations arise, as important aspects tax reform in 2025 and 2026 stand to impact charitable giving and as new philanthropic structures redefine the very landscape of charitable giving. Specifically, in addition to familiar vehicles for charitable giving (cash, trusts and more), the course will look at new and emerging fields of philanthropic activity (as with donor advised funds, philanthropic mutual funds, venture philanthropy, social impact bonds, B corporations and others) as well as the shifting legal terrain occasioned by newly proposed tax reform, new state and federal legislation and the very creative uses of the law to introduce philanthropy outside of the orbit of the tax code. Students with questions can contact Prof. Bagley (bagleyw@bc.edu).

Introduction to Human Rights, Refugee, & Humanitarian Law

Kanstroom, Daniel

Spring 2025

This class will examine legal understandings of and responses to some of the most compelling human rights challenges of our times. We will explore torture, forced migration, religious freedom, refugee and humanitarian protections, the human rights of migrants, human trafficking, and criminal prosecutions of alleged war criminals and those who commit crimes against humanity. We will engage critically with ideas of gender, culture, ethnicity, legal status, and race. There will be guest speakers, engagement with the BC Center for Human Rights and International Justice <https://www.bc.edu/bc-web/centers/chrij.html>, and (if possible) field trips to observe human rights in action. We will consider: -- Western ideas of human rights and how those ideas differ from other conceptions;--The international law, treaties, instruments, customary norms, etc. that create and protect human rights, including economic and social rights, rights against racial, ethnic, religious, and gender discrimination, rights to self-determination, and the rights of children;--The institutions that monitor and enforce human rights law, including regional systems such as those of Europe and the Inter-American system. Grading will be based on class participation (including in-class simulations and presentations, and a guided research paper of approximately 15 pages on a topic chosen by each student in consultation with Prof. Kanstroom.

LAWS443501**Insurance Law****McCoy, Patricia A****Spring 2025**

Insurance is of pervasive importance on the modern world, whether in the manufacture and sale of a product, in the ownership of a house or a motor vehicle, in the need for life insurance, in the practice of a profession, in serving as an officer or director of a company, in protection against medical expenses or the consequences of personal injury, and, of course, in the litigation of contract and tort claims. Insurance coverage is often a major influence on litigation. No litigator or representative of an enterprise can avoid having an understanding of insurance principles, including the obligation of insurers to treat claimants fairly. This course covers general principles of insurance, the regulation of insurance, various kinds of insurance (property, life, health, liability and motor vehicle), ethical considerations for lawyers, and relationships between insurers.

LAWS444401

Local Government Law

Alexander, Lisa

Spring 2025

This course examines the most pervasive and complex form of public law in the United States--the law of local governments. In examining the doctrine (and lack thereof) defining local government law, the course provides a foundation for the many areas of legal practice that deal with local issues, disputes, and concerns. More broadly, the course asks whether local governments serve or impede broader commitments to equality, democracy, inclusion, and participation. We will focus on issues such as federal and state control of city decision-making, the conflict between central cities and suburbs and among the suburbs themselves, alternatives to city-delivered services and to city taxation as a source of local revenue, and the ways in which racial and ethnic division fracture American metropolitan areas. Above all, this is a course about local democracy. For that reason, among others, active class participation is an integral part of the course and will be expected of every student enrolled in it.

International Litigation and Arbitration

Webb, Isaac

Spring 2025

This course serves as an introduction to international dispute resolution through litigation and arbitration. It covers the core international law principles governing international disputes, focusing primarily on three forms of dispute settlement: State-State disputes at the International Court of Justice and other international courts; investor-State disputes adjudicated by arbitral tribunals constituted under the auspices of the International Centre for Settlement of Investment Disputes (ICSID), pursuant to the Rules of the UN Commission on International Trade Law (UNCITRAL), and in accordance with other similar regimes; and international commercial disputes adjudicated by ad hoc panels in a variety of fora. The course also addresses the enforcement of arbitral awards and other post-award proceedings in U.S. courts, a major source of work for international arbitration practitioners today. There are no pre-requisites for the course, though it will be helpful for students to have taken International Law, Contracts, and Civil Procedure.

State Constitutional Law

Moore, Michael P, JR.

Spring 2025

Many of the most important constitutional questions of recent times are being decided by state courts interpreting state constitutions. Regularly appearing on state court dockets are novel constitutional issues regarding abortion, gay marriage, the death penalty, education, the environment, health care, privacy, property rights, search and seizure, separation of powers, and state budgeting in times of fiscal crisis. As the Roberts Court reshapes the federal constitutional landscape, we can also expect significant changes from the state supreme courts, given the dynamic relationship that has developed between state and federal constitutional law. This course will cover the fundamental principles of state constitutional interpretation and apply those principles to current cases and controversies. The course will explore the history, text and structure of state constitutions and draw comparisons to the U.S. Constitution. The class will be taught in a seminar format with students having a

Global Business Law

Garcia, Frank J

Spring 2025

This is a course on the globalization of private economic relationships and the global regulation of such activity. In particular, the course will focus on identifying and solving the legal problems affecting cross-border transactions in a global regulatory environment. Students will become familiar with the nature of globalization and the global economy; fundamental patterns of business activity across national boundaries; the international legal framework for regulating such activity; and the unique issues raised by sales of goods, licensing, foreign investment and dispute resolution. Private and public law aspects of international business transactions will be examined, including conflicts of law, foreign law, and select issues in WTO, NAFTA and EU law.

Transactions and Environmental, Social, and Governance (ESG)

Caron, Gerard A

Spring 2025

This course will focus on the fundamentals of lawyers transactional practice (i.e., doing deals both corporate and real estate) and strategies to assess and manage emerging environmental, social and governance (ESG) risks and opportunities in transactions. The course will address how to evaluate longer term value creation in transactions incorporating ESG considerations, including assessing impacts to the acquiring company relative to sustainability goals, including climate neutrality or net zero ambitions, circularity, and ESG expectations of other stakeholders. ESG risk mitigation strategies, including changing the structure of the deal, acquiring insurance, and carve outs, will be explored in detail. Students will also learn the fundamentals of how to conduct ESG due diligence in transactions, including setting up and reviewing virtual data rooms (VDRs), retaining consultants, and evaluating environmental and other ESG reports and data. The course will address unique challenges presented by cross border transactions from compliance and ESG perspectives. Students will learn how to manage post-closure integration of new businesses and mitigate ESG risks relating to newly acquired properties and businesses.

Constitutional History: The Framing of the Constitution

Bilder, Mary

Spring 2025

This seminar will focus on the framing period of the U.S. Constitution as a political, legal, historical, cultural, intellectual, and literary process. We will consider a range of topics using primary and secondary sources, including, e.g., the idea of a constitution; the narrative of the Convention; the reliability of the sources; the various initial plans and strategies; issues of representation and slavery; the conception of the executive and judiciary; the role of committees and drafts; ratification; the process of amendment; American constitutional culture. As a 3 credit seminar, expectations include class assignments related to class reading and the writing process, and completion of a research paper on an approved topic related to an aspect of constitutional history, politics, or constitutionalism broadly conceived (e.g., history, biographical, American, global, comparative etc.). The seminar includes weekly exercises designed to support the writing of the research paper.

Advanced Family Justice Litigation Practice

Donohue Prono, Claire P

Spring 2025

The Advanced Family Justice Litigation Practicum allows students who have taken the Family Justice Litigation Clinic the opportunity to develop advanced and/or new lawyering skills while working under faculty supervision. Representative activities include drafting pleadings, motions, and appeals with supporting memoranda of law, negotiations with opposing parties, court appearances, and collaborating with community partners on local law reform on issues of third party custody and pre-petition advocacy. Students, with permission of the Clinic Director, can earn 2 or 3 credits requiring 85 or 127.5 hours (respectively) of work during the semester.

Justice, Development, and the Global Economy

Garcia, Frank J

Spring 2025

How is globalization changing the nature of international law, international society and global governance? What would it take to construct a just global economy? How can international economic law and institutions be reformed towards this end? These are a few of the questions considered in this seminar, through an introduction to the phenomenon of globalization and to some of the principal theoretical perspectives (i.e., political philosophy, sociology, economics, etc.) currently being applied in the study of these developments. Together we apply these and other theoretical perspectives to select issues in globalization studies and the operation of international economic law institutions, particularly the work of the WTO, IMF and World Bank. The seminar also affords students an opportunity to research, write, and present a substantial paper (30-45 pages) of publishable quality concerning an issue of globalization and contemporary international economic law.

LAWS625401

Introduction to Business Strategy for Lawyers

Martin, David R

Spring 2025

This course is about understanding what your client is trying to do when they call you, and the backdrop against which they will make all their legal decisions. Business clients call lawyers when the law intersects with their business. Understanding the opposing sides business goals is equally as critical to delivering the best legal advice. Many lawyers who dont think of themselves as corporate lawyers are in the same position, for example: litigators addressing business activities of clients, health care lawyers for nonprofit hospitals (which are themselves businesses), and trust and estates lawyers when a family business is involved. This course will use law- and business-school materials to learn how to understand your clients goals. This will include examination of a businesss market, competition, strategic decision making, growth by business acquisition, reading a clients financial statements and valuation as a non-expert, and the business of law firms (solo practitioner to large firms). We will investigate how specific legal specializations, such as antitrust and intellectual property fit into business strategy. Course grading will be based on written materials analyzing real and hypothetical business situations, a class presentation in groups, and a final exam. This course is designed for those with no prior understanding of how businesses work. Those with an undergraduate degree, or minor, in business or economics, an MBA, or in a joint MBA program may not take this course.

Fiduciary Obligations and the Law

Shnitser, Natalya

Spring 2025

Fiduciary obligations arise in a multitude of private relationships, including business organizations, agency, guardianships, trusts, and professional relationships of various kinds. This seminar will consider fiduciary law as a distinctive legal category and explore fiduciary principles across a wide range of legal subjects. Through the study of statutory and common law fiduciaries including trustees, corporate directors and officers, partners, agents, lawyers, physicians, money managers and advisers the seminar will explore why fiduciary duties arise and how obligations and remedies vary for different types of fiduciaries. The seminar will also assess the use of fiduciary law in financial regulation, and the challenges of fiduciary governance in a global business environment. Finally, the seminar will consider how fiduciary principles might be applied to public officials and public institutions.

LAWS661001**Native Americans and the Law****Hoffmann, Hillary M****Spring 2025**

This course will focus on the constitutional, statutory and jurisprudential rules that make up the field of Federal Indian Law. The course begins with the historical framework from which the rules were derived, then traces the development of the underlying legal doctrines that are prominent today, including tribal sovereignty, tribal jurisdiction, treaty rights, and state authority over tribal lands. The second half of the course focuses on subject-specific areas: hunting and fishing rights, reserved water rights, stewardship of natural resources, economic development (including tribal gaming and natural resource development), protection of tribal religious and cultural practices, and the laws related to cultural harms caused by mascots, theft of cultural belongings (including human remains), and cultural appropriation.

Law, Technology, and Society

Fang, Yan

Spring 2025

This weekly seminar examines how our social worlds, particularly our laws and legal institutions, shape and are shaped by technology. Through engagement with scholarship spanning law, sociology, political science, and history, students will learn to use and critique foundational legal, sociolegal, and sociotechnical perspectives on the relationships between law, technology, and society. Potential topics of study include the impact of automobiles on criminal procedure, the incorporation of monitoring technologies in administrative and criminal law enforcement, the role of data brokers in constructing legal information, and the use of government databases in healthcare. Throughout the semester, students will focus on forming and refining their individual viewpoints, culminating in a final essay that draws on course materials and insights from readings and discussions.

Jurisprudence

Perju, Vlad

Spring 2025

This course introduces students to select legal theories and schools of jurisprudence. It invites them to reflect on the deeper forces that shape legal doctrine and to master a theoretical vocabulary that will strengthen their ability to interpret law and to argue about its meaning. The course asks questions such as: What is the relation between law and politics? How does law relate to morality? When is law legitimate or just? What are the sources of law's authority? Students will engage with the traditions of legal thought that understand law as primarily a matter of reason, will, morality, politics, history, power, culture, ideology, social order, emotion, language or professional practice. Approaching jurisprudence from this perspective helps to contextualize the map of modern legal theory (formalism, American legal realism, legal positivism, natural law, critical legal studies, among others). Readings will include: Savigny, von Ihering, Austin, Bentham, Holmes, Hohfeld, Pound, Fuller, Hart, Kelsen, Raz, Dworkin, Finnis, Kennedy, MacKinnon, Waldron, Crenshaw. For their final grade, students will have over one month to answer three questions from a list of over twenty questions that the instructor will circulate well before the end of the semester. No background in philosophy is expected or necessary. No other pre-requisites. The course meets the Perspectives requirement.

LAWS663901

Senior Mock Trial Team

Van Dyke, Steven B

Spring 2025

This course is designed for students returning to the schools mock trial team after competing in a prior academic year. This will be a pass/fail course limited to a maximum of four students (two teams of two students). To complete all the work listed below, students will be required to dedicate a minimum of 127.5 hours, thus earning 3 academic credits, under the supervision of Prof. Van Dyke. Because there is no official seminar component, this course will not count for experiential learning credit pursuant to ABA standard 304. Students will draft and finalize at least two motions, each of which will be above 10 pages in length. Students will also lead a class discussion in which they will present the results of their research to the team. This course is designed to help returning mock trial team members take their trial advocacy to the next level. It will involve responsibilities above and beyond the already-rigorous training schedule, comprised of 40+ hours of experiential learning. Applying the federal rules of evidence, and federal caselaw, students in this class will draft motions in limine on several of the major evidentiary issues implicated by the case problem used at the mock trial competition. The case problem alternates from year to year between a criminal and civil case. Given that the students will have to try the case from both sides, they will be tasked with drafting motions, seeking to admit or exclude evidence, from each of those vantage points. This course adds an element of verisimilitude to the mock trial process. The competition itself does not allow for the submission and argument of substantive written motions in limine. Nevertheless, it does require students to make objections. The preparation of those motions will enable students to prepare for major evidentiary issues and make more informed objections throughout the course of the trial. Specifically, this exercise will provide opportunities for learning and applying the rules of evidence; how to make proffers about anticipated evidence; and how to return to, and draw on, those same arguments throughout the course of the trial in response to developments at the trial. Participants in the senior mock trial team will improve the prospects of the team. First, they will help to create a culture in which the team welcomes back returning participants. This has been a recipe for success for many other mock trial teams in our region. Second, by sharing their research with other team members, and modeling how to incorporate it into objections throughout the course of the trial, students in this course will help to improve the performance of the team. Given that there are few in limine arguments at the competition, students will have to make arguments on their feet at (constructive) side bars. They will be scored, in part, on how they craft and pursue those objections. For this reason, the work done by the students in this course, which enables the team to cite federal case law and make more sophisticated arguments, will improve the team's prospects.

National Security: Law, Policy, & Government Investigations

Noone, Gregory P;Siegmann, B S

Spring 2025

National security law is often inaccessible and can be particularly hard to follow when divorced from the context of historical tradition, governmental structures, and operational reality in which it functions. This course will examine the law governing national security investigations and related litigation and will provide an in-depth examination of national security from the U.S. Government's perspective. Through class lectures, case studies, and hands-on application, students will learn how Federal intelligence and law enforcement agencies work together (and sometimes not) and their interplay with Foreign intelligence and law enforcement agencies to investigate and prosecute national security crimes, starting with the collection of evidence and proceeding through trial and sentencing. The course will highlight the investigative tools and laws used by intelligence and law enforcement agencies to investigate national security concerns and the varying challenges faced in prosecuting such cases. The class will incorporate guest speakers and experts from government organizations and other stakeholders in the national security field.

Genetics and Reproductive Technologies

Simana, Shelly

Spring 2025

This course explores the legal and ethical challenges posed by advancements in reproductive technologies and genetics. Topics include the law and ethics of buying and selling sperm, eggs, and embryos, sperm donor anonymity, surrogacy, embryo disposition, posthumous reproduction, wrongful birth and wrongful life, genetic testing and the obligations of family members to disclose genetic risks, gene editing, the intersection of genetics and criminal justice, and the ownership of genetic tissue and data. Through case studies, legal opinions, and scholarly articles, students will critically evaluate how new and emerging technologies reshape legal frameworks and push ethical boundaries in modern society.

LAWS667301

Law of War in Historical and Political Contexts

Chopas, Mary E

Spring 2025

This course is divided into two parts: (1) an introduction to the use of force in international law, first through a historical study of the origins of jus ad bellum in Greco-Roman thought and just war theories of the late Middle Ages through the Religious Wars, and next through a look at contemporary law governing the commencement of hostilities; and (2) jus in bello or the law of armed conflict, covering topics in international humanitarian law, the law of genocide, and U.S. law of war. The majority of this course will be devoted to the law of armed conflict as topics are discussed in their legal, historical, and political contexts. We will consider what is lawful in combat and treaty protections for civilians, the wounded, prisoners of war, and other noncombatants. After a study of the Nuremberg Trials, we will turn to the topics of detention, interrogation, and torture, considering historical examples and the policies of the Bush and Obama administrations post 9/11. We will then discuss the regulation of weapons in warfare and analyze case studies of how specific new technologies like remotely controlled unmanned aircraft (drones) and autonomous weapon systems challenge traditional understandings of the law of armed conflict. Later in the course we will cover the subject of genocide how it is defined, historical and contemporary examples, applicable law, and how the International Criminal Courts have applied the law. Our final topic will be cyberwar, AI, and the future of the law of war.

International Environmental Law

Wirth, David

Spring 2025

This course addresses the nature, content and structure of international environmental law. The course commences with an introduction to international environmental problems, together with basic principles of international law and environmental regulation. Specific topics include global warming, stratospheric ozone depletion, and exports of hazardous substances. Other topics may include marine pollution, transboundary pollution, trade and environment, and development and environment. The course evaluates the role of international and non-governmental organizations; the interrelationship between international legal process and domestic law; and the negotiation, conclusion, and implementation of international environmental agreements.

Mergers and Acquisitions

Quinn, Brian Jm

Spring 2025

This course is an introduction to the legal rules and principles governing corporate transactions including mergers and negotiated acquisitions. We will begin with an examination of the deal structures used in most common transactions, focusing on statutory requirements and relevant Federal regulations. We will then turn to questions of the Delaware common law and the fiduciary duties of selling directors in the context of mergers and acquisitions. Finally, we will turn to the merger agreement. In that setting, we will study the structure of the merger agreement and typical provisions negotiated in merger agreements. The object of this final section will be to understand the incentives addressed by each such provision and the legal limits to their use.

Environmental Lawyering: Practice for Sustainability

Doliner, Harlan M

Spring 2025

This course aims at helping students realize the huge potential for meaningful environmental-legal practice made possible by newer concepts in sustainability principles, environmental management and the globalization of our economy. Multi-jurisdictional and international examples are included. American-style liability minimization strategies, brownfields approaches, investment strategies, site assessment and remediation techniques, financial and insurance products are covered, including how they relate to various foreign legal systems and business environments. Students learn about integrating sustainability and other environmental considerations into designing internal management systems to enhance clients value while addressing governmental regulation, liability management, investment strategies, and insurance issues; supervising regulatory audits of clients industrial, research or medical facilities; and due diligence for mergers, acquisitions and other transactions. By engendering skills in working with statutes, regulations, policies, guidance and related administrative procedures while learning principles of U.S. and foreign environmental law in a context of simulated client counseling, students become empowered to integrate these environmental factors into transactional and advocacy practice, whether or not they go on to concentrate in environmental matters. The teaching style for the course is informal lecture and discussion, supplemented by student simulated client counseling and guest speaker presentations. There are no pre-requisites. 3 credits, based on two in-class group exercises and a final paper addressing a transactional subject that should double as a job search writing sample. The course may be taken on a pass/fail basis. The courses exercises will include a project in a focus area selected with class input. For example, a past years project was a hypothetical U.S. corporate client that engaged the class team to advise and assist it complying with applicable environmental-legal requirements involved in the manufacturing, distribution and sale of medical devices in the European Union. The students selected potential target countries, identifying applicable legal, business and environmental issues, including site acquisition, financing and investment, negotiation of host government location and sustainability incentives, environmental permitting and facility operation. There will also be an optional field trip: see the syllabus. Finally, I will have office hours to discuss the course, review drafts of the final paper, and/or help with job searches/professional networking.

Corporate Governance - In House Practice

Berube, Brian A

Spring 2025

This practice-oriented course will provide a real-world perspective on in-house practice and the unique issues faced when advising management and the boards of directors of corporations. The course is intended for students who want to understand what is involved in an in-house" practice as well as those who want to advise companies and their boards of directors, as outside counsel. The course will draw up learnings from traditional law school classes (e.g., Contracts, Corporations, Securities, etc.), and apply them in a practical business environment, in which a broad number of competing, non-legal issues are considered. The course is intended to provide an understanding of the practical skills needed and issues faced by in-house lawyers, as well as those who advise corporations as outside counsel. The course will start with an overview of in-house practice and the elements that differentiate it from other practice areas. It will then provide a more in-depth focus and discussion of various topics and issues often faced by in-house counsel in today's business world. The course will utilize various reading materials and case studies, as background for in-class discussion of the various topics. To create a true understanding of in-house practice, students will be asked to draft various memorandum and engage in in-class simulations, with a focus on effective analysis and communications skills.

Startup Company Governance: Taming Unicorns

Jones, Renee M

Spring 2025

This seminar will focus on understanding and analyzing governance problems that arise at "unicorns," large private companies valued at \$1 billion or more. We will first study the conventional financing process for startup companies, and how these practices have changed in recent years. We will examine market trends and legal reforms that have contributed to these developments. We will then focus on the challenges the new legal framework creates for unicorn founders, investors, and employees. We will also explore how the new unicorn governance model impacts consumers and society. Students will write research papers on topics of their choosing related to issues discussed in the course. The course satisfies the Upper Level Writing Requirement. Prerequisites: Corporations.

Compliance and Risk Management

Dowden, James P, ESQ.;Weisman, Scott F

Spring 2025

Business organizations and their directors/executives often face a complex, onerous, and global regulatory landscape, particularly for public companies and businesses operating in financial services, health care, consumer products, and other highly-regulated industries. As numerous corporate scandals have illustrated, the risk of fraud or regulatory breach can lead to civil and criminal liability, heavy sanctions, and significant reputational damage to companies and individuals. Against this backdrop, compliance has emerged as the growing, dynamic practice of identifying and mitigating legal risks through prevention, detection, and remediation. Students will learn the history and legal underpinnings of corporate governance, compliance, and risk management standards particularly as applied to public companies and regulated financial services firms. Topics will include fiduciary duties; the roles and interactions of board directors, executives, lawyers, compliance officers, auditors, regulators, and enforcers; compliance program effectiveness; internal investigations; corporate and individual liability; and ethics considerations. Students will also gain practical experience through case studies on high-profile compliance and risk management failures.

Media Law and Litigation

Pyle, Jeffrey J

Spring 2025

This course offers an in-depth study of First Amendment media and defamation law, together with a clinical component designed to develop litigation skills. The seminar will cover such issues as the evolving concept of what constitutes defamation, the public figure doctrine, the opinion defense, confidential sources, burden of proof, Internet and social media, and related issues. Students will draft pleadings in a hypothetical case and take the depositions of the parties, witnesses and an expert. Heavy emphasis will be placed on class participation. In lieu of a final exam, students will be required to prepare a summary judgment memorandum based on both the case law and the discovery information developed during the course, using transcripts of the depositions.

Dangers of the Administrative State: Advanced Topics in Administrative Law

Shah, Bijal

Spring 2025

This seminar course will focus on important debates and real-world controversies relating to administrative and structural constitutional law. It will examine from practical, constitutional, and rule-of-law perspectives central features of the modern administrative state, including as characterized by some of its strongest critics. Are various aspects of federal agencies genuinely worrisome, or reflective of the complexity of governance? What forces have driven the evolution of government agencies? And what have critics of relevant constitutional doctrine and administrative law gotten wrong? Our primary aim is to foster fruitful discussion about whether the administrative state is lawful, based on both theoretical material and materials from popular discourse (such as long-form journalism and visual media). Our meetings will cover topics such as whether the administrative state is revolutionary, unlawful, or immoral; presidential power and the New Deal; the separation of powers; the legislature and independent agencies; administrative due process; and governmental involvement in immigration, healthcare, and financial regulation. Major themes will include the intersection of law and politics, the role of agencies in relation to the branches of government, and the criteria for understanding whether the administrative state is succeeding or failing. Prior background is welcome but not assumed; all are welcome to enroll. Students will be evaluated based on class participation and a final seminar paper.

Advanced Human Rights Practicum

Urosa, Daniela

Spring 2025

The Advanced Human Rights Practicum is a 3-credit pop-up clinic that allows students who have completed the International Human Rights Practicum the opportunity, with permission of the Clinic Director, to stay engaged in the Clinic's long-term matters and experience new lawyering responsibilities. The representative matters include litigation in compliance procedures of integral reparations and non-repetition measures decisions in cases before the Inter-American Court of Human Rights and policy advocacy projects with the Inter-American Commission on Human Rights. Advanced International Human Rights Practicum students will work alongside students in the International Human Rights Practicum and be supervised by the Clinic Director.

Women's Health Law, Policy and Politics

Chirba, Mary Ann

Spring 2025

Women in the United States currently face health risks that are simultaneously unprecedented, predictable, and readily preventable. This course should be of interest to ALL because women's health affects the lives of their partners, children, and communities. This course will examine the ways in which law, policy and politics operate separately and collectively to protect and/or impede the individual and public health of women. Specific issues may include: 1) how the Dobbs Courts 2022 erasure of longstanding abortion protections has increased maternal and infant mortality by curtailing federally mandated emergency miscarriage care, and also jeopardized access to ACA-required coverage of free contraceptives and preventive screenings; 2) why women as healthcare providers face formidable, inequitable and mounting barriers to professional entry, necessary training and continued advancement; and 3) why, as patients, women particularly pregnant women of color face potentially insurmountable barriers to medically necessary and culturally appropriate care. In addition, because women's health transcends reproductive concerns, this course will analyze how law and politics can exacerbate and/or mitigate problems such as: a) women's under-representation in clinical trials; b) gender bias in diagnosis and treatment; and c) undue product liability risks from inadequately tested medical devices and toxic hormone disruptors in gender-targeted personal care products.

Remedies

Olson, Andrea

Spring 2025

This remedies course will focus on what courts do for civil litigants who have been or who fear a legal wrong. While most law school courses focus on liability, or what counts as a violation of the substantive law in some area, remedies is about what happens after the substantive law has been violated. The course will cover standard remedies including damages, injunctive relief, declaratory judgments, restitution, and punitive civil remedies, and will consider them in both private and public law settings. But it will also explore remedial goals, remedial mechanisms, and the theoretical questions surrounding the relationship between liability and remedy across diverse areas of law.

Estate Planning

Madoff, Ray D

Spring 2025

This course provides a practical approach to estate planning, the process by which lawyers work with their clients to provide for the transfer property during life and upon death. Estate planning involves wills as well as trusts to provide for the care of minor children, establish charitable bequests and obtain favorable tax treatment. It also involves planning for succession of businesses and planning for retirement benefits and life insurance. We will be focusing on practical estate planning techniques as well as how an estate planner prepares documents to create a complete estate plan. Estate and Gift Tax is recommended, however, students can also take course with permission of the professor.

Land Use Law and Planning

Madeja, Jamy B

Spring 2025

This course will provide participants with a detailed and national review of the techniques used by local and regional governments to regulate the development of real property. Strong emphasis will be placed on the relationship among land use planning, land use law, and natural resources. We will focus in detail on numerous traditional land use planning controls (zoning, subdivision control, and health regulations) but spend considerable time analyzing the legal issues involved in the use of more innovative land use regulations (transfer of development rights, exactions, impact fees, and development agreements). Participants will become well-versed in all aspects of local, regional, and state land use controls and permitting procedures for residential and non-residential development.

LAWS776401

Islamic Law

Zulfiqar, Adnan

Spring 2025

This course aims to provide a broad introduction to Islamic law in both theory and practice. Islamic law consists of positive law and legal theory based on Islam's foundational sources, the Quran and Prophetic tradition, collectively known as the Sharia. The course will consist of two main sections. The first will provide a historical and conceptual background on Islamic law, looking primarily at its origins, theoretical foundations, structure and interaction with the state. The next section will focus on substantive law in the core areas of criminal, commercial, labor and family law. The course will also extend beyond those areas to examine how Islamic law operates in the context of war, revolution and protest, as well as how it addresses modern ideas such as human rights. While Islamic law is relevant to both the personal practice of Muslims and systems governing various populations, this class will focus almost exclusively on the latter with the aim of giving students a sense of how Islamic law operates in the public domain. In the process, the course will help expand students' conception of law in the sense of enforceable rights and duties to facilitate their ability to engage in more robust comparative analysis.

Taxation II

Moran, Beverly

Spring 2025

Tax II explores the taxation of corporations. After a brief review of the other common forms for organizing a business and their distinctive tax treatments, the course focuses on the most important federal income tax issues relating to the organization, operation, liquidation and reorganization of publicly-traded corporations (and other "C" corporations). This includes the relationship between corporations and shareholders and the treatment of dividends and redemptions. The course is important for any student thinking of practicing in the general business area, even if she or he does not intend to become a "tax specialist".

Tax Policy

Shay, Stephen E

Spring 2025

This course examines legal, economic, political, and diplomatic considerations relevant to the formulation and implementation of U.S. federal tax policy. The class will be based on readings on longstanding and current tax policy issues, including whether to tax consumption, income and/or wealth (and related transition issues); how constraints on tax policy, including constitutionality, institutional capacity, international considerations, transition effects, and domestic politics, affect the design of tax policy and the ability to achieve its objectives. The courses coverage of selected tax policy literature is intended to equip students to critically assess the U.S. tax system (including tax law provisions that are novel in one or more respects), the effect of international tax developments, and recent or anticipated tax policy proposals.

Legal Scholarship Workshop: Regulation and Business

Shnitser, Natalya

Spring 2025

This workshop will feature presentations by five or six invited legal scholars of their works-in-progress concerning law, business, and the regulation of economic activity, broadly construed. Students will meet with one or more BC faculty conveners the week before each presentation to discuss the paper. Students will prepare one-page response papers for each work-in-progress presented. Response papers will be shared with the authors. This workshop is designed for students who are interested in publishing during law school and in legal scholarship more generally. It is also well suited for students with an interest in economic regulation, business, and corporate governance. 1 credit, pass/fail. (The course is repeatable.)

LAWS784001

Patent Law

Olson, David S

Spring 2025

This course covers the major doctrines and policies at work in modern patent law. While current law will be taught in detail (both the 1952 Act and the America Invents Act), the course will also focus on enough history and policy so that students are equipped to deal with, and make predictions about, the rapid changes in patent law that we have witnessed recently and that we will continue to see. The course also has a skills component. Students will learn to review prior art, analyze the validity and novelty of particular patents in the form of claim construction charts, and make oral arguments for summary judgment on issues of validity, novelty, and claim construction in front of patent practitioners in the field.

Critical Race Theory Reading Group

Davis, Laurel E;Sarda, Evangeline

Spring 2025

This one-credit, pass-fail seminar offers participants an introduction to Critical Race Theory (CRT) as well as an opportunity to delve more deeply into an area of interest. The class will meet for 90-minutes for ten classes during the spring semester. In the initial five classes, we will explore seminal articles within Critical Race Theory. Students are then responsible for choosing topics and assignments for the next five sessions, which enables students to develop an area of interest while deepening their understanding of CRT. Students will work in pairs throughout the semester to lead class discussions. Attendance and participation are required to pass. There is a variable 2-credit option available for those who complete an additional paper. Contact Professor Sarda for more information (sarda@bc.edu). Limited enrollment.

Introduction to Mergers & Acquisitions Practice

Min, Stuart Kevin

Spring 2025

This course will provide an introduction to mergers & acquisitions (M&A) practice from the perspective of a lawyer working on an M&A transaction. After acquainting students with the basics of M&A such as the different types of M&A transactions, the course will follow the actual life cycle of an M&A deal, starting with important preliminaries such as conflicts clearance, progressing through due diligence and drafting and negotiating a transaction agreement, and concluding with the obstacles that could arise to successful closing of a deal. There will be several opportunities for practical and interactive exercises, as students will be divided into teams representing either the acquirer or the target company, and will then go through the actual steps where lawyers interact with one another during the course of a deal.

Introduction to Transactional Lawyering

Jones, James T

Spring 2025

This course is designed to acquaint students with some of the legal issues associated with starting up and operating a business or venture, examining the role of a transactional lawyer and learning basic practice skills. The objective is to give first year students an introduction to legal issues that lawyers are likely to encounter in an entrepreneurial setting, how the process works, decisions that need to be made and all of the various legal issues during the life cycle of a start-up. These issues include choice of entity, selection of a company name and trademark, protecting the intellectual property of a new company or venture, financing arrangements, operating issues including employment and general business agreements and exit strategies. The course will use simulation and role-plays to explore the legal issues relevant to transactional lawyering.

Introduction to Immigration Practice

Holper, Mary P

Spring 2025

Immigration Practice focuses on the practice of immigration law and in particular the intersection of criminal and immigration law. Students will advocate for hypothetical clients whose cases deal with cutting-edge issues of bond, the intersection of immigration law and crimes, and discretion. In-class hearings include client interview, client counseling, a bond hearing, and a portion of a removal defense case.

LAWS805601

Introduction to Criminal Law and Trial Practice

Wiseman, Suzanne Marie

Spring 2025

This course will take a hands-on approach to being introduced to criminal law; taking a criminal domestic violence case all the way from arraignment through trial. This practical simulation class will allow students to delve into both the prosecution and defense sides of bail arguments, motions to suppress, discovery motions, trial strategy as well as conducting mock opening statements, direct and cross exams, and closing arguments. During the course, students will be introduced to Massachusetts criminal law pertaining to bail, discovery and evidence, with emphasis on the effects of bail on diverse populations, the intersection of the criminal justice system on victims and witnesses of violent crime, ethical considerations pertaining to exculpatory evidence and effective trial strategies in criminal cases. Students will be encouraged to participate in the class activities from both a prosecution and defense approach.

Advanced Legal Research

Farne, Stephanie J

Spring 2025

Advanced Legal Research offers an in-depth, hands-on experience with the process of legal research. Students use a wide range of legal materials and devise practical techniques and strategies for using these materials competently and effectively. The goal of the course is to create self-sufficient legal researchers capable of analyzing and resolving legal problems effectively. Emphasis is placed on the types of legal sources and research not covered in the first year of law school (e.g., treatises, forms sources, administrative law, statutory research, legislative histories and legal practice materials). Both print sources and free and fee-based electronic sources are explored and critiqued. The course covers Westlaw, LexisNexis, BloombergLaw and other electronic sources

Business Law Research for the Transactional Practitioner

Bruce, Amy

Spring 2025

Business Law Research is a simulation class in which students develop primarily their legal research skills, but also other lawyering skills such as organization and management of legal work, professional ethics, and collaboration. Students will educate themselves on critical research skills for transactional law practice through legal compliance scenarios that apply state, federal, and local law. Students in this class will also develop key business law research skills needed for drafting contracts and working on other important transactional tasks, such as due diligence for business combinations. Most initial research instruction takes place outside the classroom so that students can work on simulations in the classroom and receive guidance from the instructor. There are multiple opportunities for self-evaluation as well as extensive feedback on a regular basis from the instructor.

Government Externship Seminar

Barnico, Thomas A

Spring 2025

The purpose of this seminar is to teach basic concepts of administrative law and practice that will aid the student in his or her co-requisite externship in a local, state, or federal agency. The seminar will present: (1) elements of a successful externship; (2) common ethical issues for government lawyers; (3) a brief summary of the law governing the Executive Branch of federal and state governments; (4) an introduction to and comparison of the offices of state and federal attorneys general; (5) an exploration of issues confronted by counsel within the Executive Branch; and (6) the perspective of counsel for an entity regulated by the federal and state governments. Through journals, class discussions, and oral presentations, the seminar will provide students with opportunities for reflection about their externships and for the exchange of student views on subjects related to the practice of law within the Executive Branch.

Legal Practice Seminar

Lyons, Crystal L

Spring 2025

This seminar will support students to be successful in their legal externships and will encourage sharing and cooperation among students in self-evaluation, providing feedback, and navigating ethical considerations. The course will cultivate students professional development through the exploration of different legal career pathways and through critical evaluation of external and internal influences on individual and organizational practice. Students will be equipped to engage in authentic and impactful legal practice, and will develop skills to help them support both client and attorney well-being.

BC Innocence Clinic

Beckman, Sharon L, ESQ.

Spring 2025

Students in BC Innocence clinic work with faculty supervision on post-conviction screening and/or litigation of cases of prisoners who assert their innocence. Case screening involves review of trial transcripts, pre-trial discovery, appellate and post-conviction briefs, and judicial opinions, as well as factual and forensic research, to determine whether scientific testing or other investigative leads could establish a strong likelihood that the prisoner is factually innocent. Students produce a memorandum analyzing the case and making a recommendation as to whether post-conviction litigation should be pursued. Students engaged in litigation research and draft motions for various types of post-conviction relief with supporting memoranda and affidavits. Class component is devoted to case-rounds and development of legal, professional, and ethical skills in the context of post-conviction innocence work. Students spend 10-12 hrs/week outside of class time on casework.

International Human Rights Practicum

Urosa, Daniela

Spring 2025

This course focuses on appellate submissions to regional and international courts and other legal organizations that address international human rights issues. For spring 2020, students will work on submissions to the Inter-American Court of Human Rights (IACtHR) and the Inter-American Commission on Human Rights (IACHR). The Inter-American System for the protection of human rights (IASHR) is the regional system responsible for monitoring, promoting, and protecting human rights in the countries that are members of the Organization of American States (OAS). Currently, it is one of the strongest regional human rights protection systems in the world. This clinic will include two components. (1) The practicum will provide students with practical experiences in advocacy for the promotion of international protection of human rights through amicus briefs before the IACtHR; drafting of legal reports, protocol proposals, and hearings before the IACHR; and the possibility of submissions to other human rights tribunals around the world. (2) The accompanying seminar will provide an overview on the study of the IASHR, including its normative framework, mechanisms, rights protected and its principal entities. Possible practicum fieldwork at the IACHR (Washington DC) or the IACtHR (San Jos, Costa Rica) during spring break. Previous course work in International Law, International Human Rights, and/or International Legal Research is not required, but may provide an enriched perspective.

Community Enterprise Clinic

Teuscher, Carlos M

Spring 2025

This course introduces students to transactional legal work on behalf of low- and moderate-income entrepreneurs, small businesses, nonprofit organizations, and first-time home buyers. The fieldwork is based at the Law Schools Legal Assistance Bureau located in the new Center for Experiential Learning on campus. Students will perform all of the legal work and interact with the clients. Students will be assigned to work with entrepreneurs with business-related legal needs; with emerging, community-based small businesses facing corporate, employment or similar legal issues; with nonprofit organizations or groups seeking assistance to establish a tax-exempt organization; and first-time home buyers. For fieldwork purposes students will be assigned seven or ten office hours per week at the clinic, depending on the number of credits chosen by the student. A weekly seminar will address substantive law, ethical issues, and legal skills. The fieldwork is complemented by a weekly seminar.

Statutory Interpretation

Laplante, Joseph N

Spring 2025

This two-credit course, taught by the Chief Judge of the U.S. District Court for the District of NH, offers instruction in statutory interpretation, with emphasis on its practice (advocacy in litigation, and judicial opinions), doctrines (textual and substantive canons of construction), and competing theories: textualism, intentionalism, purposivism (legal process theory), pragmatism, and "dynamic statutory interpretation." Despite its theoretical aspects, this is a highly practical course.

BC Defender Program Clinic

Sato, Lumina

Spring 2025

The BC Defender program is a full-year criminal defense clinic and a weekly seminar class. Practicing under faculty supervision pursuant to SJC Rule 3:03, BC Defenders represent clients charged with crimes and probation violations in the Boston Municipal Court (Dorchester Division). In the course of representing their clients, students broaden their own life experiences and develop professional skills, including interviewing, counseling, investigation, legal research and writing, collaborating, negotiating, oral advocacy, case organization and management, and trial skills.

BC Defenders: Lifer Parole and Medical Release Clinic

Herrmann, Francis R, SJ

Spring 2025

Prisoners who have become eligible for parole after serving at least fifteen years in prison on a life sentence (lifers) often appear before the Massachusetts Parole Board without representation. Students in teams will help prepare lifers for their parole release hearings and will represent them at the hearings. Representation entails learning about the clients life before the underlying crime, the facts of the underlying crime, and the clients institutional history contained in Department of Correction and Parole Board records. Until Covid-19 risks abate, students will conduct interviews with clients via Zoom, email, and postal correspondence rather than by visiting the prison in person. Students will prepare a memorandum in support of parole, including a re-entry plan (with the help of social work students); and prepare the client and support witnesses to testify at the hearing. The Parole Board conducts all hearings virtually during the pandemic. Students will appear virtually at the Lifer Parole Hearing with the client and will deliver an opening statement and closing argument. Under the Massachusetts Criminal Justice Reform Act, prisoners serving state sentences at the Massachusetts Department of Correction who are suffering from terminal illnesses or from irreversible physical or cognitive incapacitation may be eligible for medical release ("compassionate release"). Whenever such cases are referred to the Clinic, students will help prepare a petition for release and an accompanying medical parole plan with the assistance of social work students and nursing students. Students will first advocate with the Department of Correction for release. If not successful, appeal can be taken to the Superior Court. Students will learn about the clients underlying crime, the clients institutional record, the clients physical, medical, mental health condition and the clients risk to re-offend in light of the client's condition.

Immigration Law Clinic

Holper, Mary P

Spring 2025

Students in the Immigration Clinic represent noncitizens in removal proceedings before the Immigration Court, which involves arguing bond motions for detained clients, conducting examination of witnesses, raising evidentiary objections and arguing points of law. Students represent noncitizens in applications for legal status before the U.S. Citizenship and Immigration Services (CIS) office. Cases vary, but may include asylum and relief based on fear of persecution in the country of removal, waivers of deportation for long-term residents of the U.S., adjustment of status for noncitizens with U.S. citizen or permanent resident family members, visas for victims of violent crimes who have assisted in the prosecution of such crime, relief for noncitizen victims of domestic violence and visas for juveniles who have been abused, abandoned or neglected. Students conduct "Know Your Rights" presentations for noncitizens who are detained by the Immigration and Customs Enforcement (ICE).

The Entrepreneurship & Innovation Clinic (EIC) is a dynamic clinic that provides free transactional legal services to under-resourced clients in the Greater Boston area on issues relating to new and emerging businesses. This innovative clinic provides students with the hands-on, practical experience needed to navigate the rapidly evolving fields of intellectual property and entrepreneurship. Law students working under the supervision of the clinic director provide a broad range of business law, intellectual property and transactional services. Clients include micro-entrepreneurs, technology entrepreneurs, social entrepreneurs, artists, authors, filmmakers and musicians, who may be individuals or for-profit businesses in the Greater Boston area who are in need of transactional legal counsel related to starting or operating their business. The EIC is for students interested in learning to work with organizational clients and learning to represent clients in transactions.

Introduction to Work Law: Theory and Practice

Hafiz, Hiba M

Spring 2025

This course introduces students to the principal statutes and common-law doctrines governing the workplace and the employment relationship. Workplace violations and disputes typically give rise to multiple claims arising under different sources of law, so commanding knowledge of a variety of statutes and doctrines is crucial for legal practice. This survey course will introduce the history of workplace regulation and the evolution of modern employment practices. It will familiarize students with: common law doctrines including employment-at-will and its contract- and tort-based exceptions; the law governing employee mobility, including non-compete agreements and employers rights in trade secrets; employees speech and privacy rights; labor law; wage and hour laws; workplace safety; and, time permitting, employment discrimination and sexual harassment law. The course will also address procedural matters that emerge in work law practice, including class action litigation and mandatory arbitration. The course will involve theoretical and experiential components, coupling rigorous analysis of and thought about workplace regulation while also learning core aspects of legal practice in representing workers and employers. To this end, in addition to assigned cases, statutes, and secondary materials, students will be given a number of practice assignments for drafting legal work product applying what they have learned from the reading materials.

In House Externship Seminar

Peiczarka, Janelle L

Spring 2025

This seminar is for students who are externing with an in-house legal department and will cover various topics such as: the role of in-house counsel, working with outside counsel, identifying ethical issues when representing an organization, intellectual property & privacy concerns, communication strategies when engaging and working with business teams and other departments throughout the company or organization, etc. The faculty member will work with students to develop personal learning goals that include concrete strategies the students will use to achieve each goal and how they will measure their progress. The seminar is designed to be practical, reflective and interactive. Students will be encouraged to discuss and the faculty member will advise on common workplace challenges such as managing their time, structuring legal research for business settings, communicating with supervisors, collaborating on work assignments, and learning appropriate workplace etiquette. The seminar meets every other week throughout the semester. It is a one credit class. Students will be required to complete assigned reading, submit journal entries, and participate in class discussions.

Advanced Evidence and Advocacy

Kazanjian, Helene

Spring 2025

This course will bring together courtroom practice with an advanced study of evidence. The emphasis will be on integrated legal evidence theory with the professional skills students need to advocate in the courtroom. Students will engage in self-critique and will also receive feedback from fellow classmates and the instructor. The instructor will utilize the student exercises to teach the law of evidence at a level beyond the introductory evidence course and advocacy skills. All students will draft and argue motions in limine and prepare and perform examinations of witnesses.

Advanced Evidence: Trial Objections

Carris, Eugenia M;Crowley, Michael

Spring 2025

The goal of this course is for students to understand how the rules of evidence operate in practice by providing them with the experience of trying to admit or to keep out evidence in a mock trial setting. This is done through a problem approach with particular attention paid to laying the foundation for admission of evidence during examination of witnesses. Topics include exceptions to the hearsay rules (admitting business records, prior recollections, etc.); laying foundation for the admissibility of expert and lay opinion; impeaching witnesses through character evidence and prior inconsistent statements; authenticating physical exhibits; and using chalks, demonstrative aids and diagrams. Students will perform weekly in-class simulations .

Advocacy Competitions

Daly, Rosemary

Spring 2025

This is the companion class to the national moot court teams. Enrollment and attendance in this class is mandatory for all members of a national team. The goal of the class is to help prepare students for not only for their individual competitions but also for litigation practice. The class is divided into three parts: overview of the moot court experience, appellate written advocacy and oral advocacy. The class will meet formally during the Fall semester until Oct 15. The class will reconvene in the first half of the Spring with their team coaches for oral advocacy/moot sessions until the competitions are complete. Students should expect an "incomplete" grade until they have completed their moot court experience (February/March).

Trial Practice

Wilson, Paul

Spring 2025

There are several sections of trial practice, which are taught by adjunct faculty who are judges or practitioners. Each instructor selects his/her own readings and exercises, but the coverage of the sections is quite similar. All require students to prepare and to perform aspects of jury trial -- opening and closing arguments, and direct and cross-examination. The course is designed to develop practical skills and to build an appreciation for the relationship between substantive law and strategy and tactics in litigation. This section includes both civil and criminal trial exercises. Students also participate in a mock trial held in a real courtroom. All sections focus on trial advocacy; some also consider some pre-trial skills, such as discovery depositions. All sections have limited enrollments. Evidence is a prerequisite.

Introduction to Appellate Judging

Grainger, Andrew R

Spring 2025

1L Elective. This course will provide students with a "view from the bench" by providing the opportunity to assume the role of an appellate judge in oral argument. At each class, on a rotating basis, two students will present oral argument on opposing sides of a legal issue, seeking affirmance or reversal of decisions rendered in recent state and federal cases. The legal issues will generally be taken from first year/first semester required course subjects or involve principles of statutory construction. Students not scheduled for an argument on a particular day will perform the role of an appeals court panel, probe the strengths and weaknesses of each presenting attorney, and deliver a ruling.

Introduction to Administrative Practice

Why, Geoffrey G

Spring 2025

1L Elective. This course focuses upon the skills needed to practice law in front of administrative agencies. Much of law school focuses upon statutory interpretation and courtroom practice. But state and federal agencies make far more rules each year than legislatures, and adjudicate far more cases than the judiciary. Agencies develop much of the law that governs our daily life, including many high-profile issues such as immigration, financial reform, and environmental protection. In this course, you will learn about agency rulemaking and adjudication through simulated proceedings, which will culminate in each student filing comments in a live proceeding before a federal or state agency.

LAWS870201

Introduction to Government Oversight

Cunha, Glenn A

Spring 2025

Government oversight is essential to holding public officials and government employees accountable. This course introduces students to the role of inspectors general who conduct oversight of publicly funded agencies and entities. Typically created by statute, inspectors general are charged with preventing and detecting fraud, waste and abuse in the expenditure of public funds. By any measure, this is a broad mandate. With a case study as a guide, students will learn and practice issue spotting exercises, witness interview techniques, and how to draft letters and present recommendations to government officials. Understanding the principles of government oversight will expand the knowledge base for first year law students particularly those who have an interest in criminal law, regulatory and compliance practice, and in-house counsel work.

Negotiations

Grinspoon, Joshua Samuel

Spring 2025

This will be an interactive course on both the theory and practice of negotiation, in which students will read portions of the required texts on a weekly basis and will participate in a series of exercises and assessments (teacher, peer and self) of negotiation strategies. Through role-playing simulations, class discussions, reading assignments, and regular writing exercises, the course will examine the basic stages of a negotiation; the major tensions at play in negotiations; specific topics such as distributive bargaining, interests versus positions, and power dynamics; value-creating, active listening, empathizing with the other parties position, and problem-solving techniques; ethical issues that may arise; and the management of communication and emotional aspects of negotiations. There will also be an emphasis on effective drafting of negotiated agreements. Students who took Intro to Negotiations in their 1L year cannot take this course.

Introduction to Negotiation

Kamm, Carol E

Spring 2025

The goal of this course is to teach you to think about negotiation as an opportunity to solve a problem that exists, or create new value where there is none, or try to make a bad situation a bit better. I hope to enhance your ability to think creatively and synthetically as well as analytically. You will also learn that planning is essential and can sometimes make up for your status as a new legal negotiator. The skills you will learn include analysis, persuasion, creativity, listening, interviewing, counseling, question framing, and the use of law and legal principle. We will also explore the moral and ethical issues implicated in negotiation--honesty, integrity, character, reputation and personal identity

Introduction to Landlord Tenant Practice

Sherring, Neil

Spring 2025

This course is a one semester course combining substantive law surrounding the relationship between residential real estate owners and/or lessors and their lessees with practical applications including a wide range of lawyering skills such as how to prepare for and conduct an initial client meeting, client communications, court hearings with an emphasis on ethical issues, research and investigations, strategic counseling, and courtroom performance. Students will examine strategic approaches to: (1) eviction bench trials with defenses and counterclaims including discrimination, retaliation, breach of warranty, breach of contract, and violations of the Massachusetts Consumer Protection Law (Chapter 93A), (2) injunctions seeking to void the tenancy based upon criminal conduct, and (3) temporary restraining orders seeking to compel landlords to remedy health code violations or stop a move out. This class will provide students with the practical skills needed for engaging in mediation and alternative dispute resolution, preparing for an eviction bench trial, evidentiary hearings and motions. We will examine the development of Housing Law during the current pandemic and legislative moratorium on certain evictions, virtual hearings/trials, access to justice, pro se litigants, and the legalization of marijuana in the areas of reasonable accommodation and federally subsidized housing.

IP Research

Shear, Joan

Spring 2025

This course is designed as an in-depth look at the legal resources and research techniques used in the practice of intellectual property law. Course will cover basic legal research techniques involving the U.S. Constitution, statutes, cases, and regulations and how they relate to IP practice. IP specific research tools and techniques involved in patent and trademark practices will also be included. Students are exposed to practical techniques and strategies for using these materials competently, effectively, and economically in the research process to enable them to develop research skills necessary to be a successful lawyer in an IP practice.

Civil Rights Clinic

Parikh, Reena

Spring 2025

The Civil Rights Clinic is a 6-credit experiential learning course embraces a multi-pronged approach to lawyering, working with individuals and community-based organizations to address civil rights issues facing low-wage workers, immigrants, and communities of color in Massachusetts. Students work in teams and each student is assigned to one litigation matter and one community group advocacy matter, exposing them to both individual client representation, as well as community and movement lawyering. In seminar and supervision, students will be encouraged to think critically about the role of the lawyer, client, and community in these different models and the intersection of worker and immigrant rights and racial justice. On the litigation side, representative matters may include lawsuits on behalf of workers, immigrants, and incarcerated individuals who have experienced various forms of exploitation including wage theft, discrimination, and mistreatment. On the community advocacy side, the clinic provides legal, policy and other technical assistance to organizational clients that may include worker centers, local unions, or immigrant advocacy groups, in support of their legislative priorities or other organizing campaigns. Student Attorneys should plan to spend approximately 20-25 hours/week on clinic work and will be handling all phases of their client matters with the close supervision and guidance of the clinic director.

LAWS898001

Civil Litigation Clinic: Housing Justice

Rivera, Ana M

Spring 2025

In this clinical course students advise and represent low-income clients in a variety of housing matters under close, supportive supervision by experienced clinical faculty. Clinic participants are court-certified as Student Attorneys. Their practice is based at the Boston College Legal Services LAB, a law firm within the Law School that is part of the BC Center for Experiential Learning. Student Attorneys handle all phases of their clients cases, from client interviewing through case planning, fact investigation, discovery, client counseling, negotiation, and courtroom advocacy. Through practice and confronting a series of inevitable firsts; students rapidly develop both confidence and competence as lawyers. Housing Justice is geared toward prevention of homelessness, primarily through eviction defense and public housing advocacy. The case docket also includes affirmative civil cases against notoriously unscrupulous landlords to correct deplorable housing conditions, halt discriminatory practices, and protect tenants from other forms of mistreatment. The mixture of housing matters students handle enriches their development in many ways. Students will understand the common legal, factual and ethics patterns that emerge from different types of litigation matters. Courts and administrative agencies before which students appear provide informative contrast. Cases have different paces and cadences. Clients have distinctly different interests and needs. This variety contributes immeasurably to a beginning lawyers professional growth. Clinical faculty provide extensive supervision, assistance and training through every stage of students work on cases, from preparation for tasks and events through retrospective reflection. Student Attorneys receive thorough feedback on all aspects of their work to help them build core lawyering skills, learn from their experiences, and mature professionally. Informal feedback is part of each participants daily experience. Formal feedback is given both at mid-semester and end of term. Student Attorneys meet in a weekly seminar to examine their work closely. Practical, strategic, legal, ethical and interpersonal tensions are the focus of discussion aimed at deriving deepened understanding of the joys and challenges of civil litigation practice.

Criminal Justice Reform

Eisenberg, Avlana

Spring 2025

While the United States continues to incarcerate more individuals per capita than any country in the world, there is also growing momentum around criminal justice reform. This course will highlight the roles and interests of key stakeholders in the criminal legal system including judges, prosecutors, police, sheriffs, and correctional officers, as well as advocates for criminal defendants and incarcerated persons to assess prospects for and resistance to reform. We will also consider a broader, comparative frame, situating the U.S. criminal legal system in a global context. Readings will include case law, social science literature, and comparative law texts.

The Cradle to Prison Pipeline

Blitzman, Jay D

Spring 2025

In 2012, the DOJ's Civil Rights Division formally accused the city of Meridian, Mississippi and the state's departments of youth & human services of operating "a school-to-prison pipeline". While it is rare that such explicit practices are alleged, the reality of the school to prison pipeline is well documented. However, the realities of systemic practices & policies that have fueled what Marian Write Edleman & others have characterized as the cradle to prison pipeline are now being scrutinized. The BBA's Cradle to Prison Pipeline Committee describes the process as the mechanism by which disparities in a wide range of arenas--including economic, health care, mental health, housing, child welfare & juvenile justice factors--"funnel" people of color, the poor, the LGBTQ+ community, & youth with disabilities into the system of mass incarceration. "Unpacking" this phenomena entails examining critical issues of race, class, geographical & educational segregation & implicates consideration of the larger frames that affect families in & out of courtrooms. As Jill Lepore notes in *Baby Doe: A Political Tragedy*, between 2010-12, 72% of the youth committed to the MA DYS had been involved with DCF & over half of that number has been the subject of abuse & neglect petitions. In exploring this terrain this course will consider the evolution of child welfare & juvenile justice systems, de facto v. de jure segregation & to encourage students to think about ways to chart a different course.

Taxation I (Individual Income Taxation)

Repetti, James R

Spring 2025

Taxation I is the basic introductory course in federal income taxation. In contrast to courses in the first year, it is principally a statutory course, dealing with the Internal Revenue Code and the Regulations. The focus of the course is divided between mastery of the technical tax principles and understanding of the basic policy judgments which are implicit in those principles. For a student who takes no additional tax courses, Taxation I should provide an overall understanding of how the federal income taxation system functions. For students desiring to continue their studies of tax, Taxation I develops the themes which will be recurring in later courses and forms the basis on which the subsequent tax courses build.

LAWS994101

Antitrust Law in a Global Context

Olson, David S

Spring 2025

Antitrust law governs much more than just mergers and acquisitions. Businesses must be aware of antitrust law when contemplating numerous business activities including joint ventures, contracts with suppliers and distributors, how to deal with competitors, what conditions can be attached to the sale or lease of goods and services, and what actions they may take as part of trade organizations. Moreover, as business becomes evermore global, lawyers need to know not just the law in the United States, but also approaches to antitrust law in other parts of the world, like the European Union. Accordingly, while the bulk of the course will cover U.S. law, the course will also cover select areas of antitrust law in foreign jurisdictions. No prior understanding of economics or trade regulation is required. Students will be taught the basic economics needed to analyze and practice antitrust law.

Criminal Procedure

Rangaviz, David R

Spring 2025

This course will focus on constitutional limitations on police practices. The 4th, 5th, and 6th Amendments are examined as they affect the warrant process, searches and seizures, interrogations, confessions and identification. The course considers in depth the exclusionary rule and other legal controls on police conduct. The course presents a unique opportunity to explore and contrast various judicial philosophies within the Supreme Court regarding criminal procedural protection. Teaching methodology is a combination of lecture, discussion, videos, and Socratic dialogue.

Jessup Moot Court

Semivan, Jeanne D

Spring 2025

This is for a 5th member of the Jessup Moot Court, who will be responsible for research, writing, and support to 3L oralists. Specifically, this team member will draft the facts section for the memorials (briefs), research points of law for use in the memorials, help edit the memorials, draft a bench memo that will be used to prepare practice round judges, update the bench memo weekly throughout the preparation for the competition, participate in practice rounds as an additional judge for the oralists, and serve as table counsel for the oralists during the 2023 competition. In the event that one of the 3L oralists becomes unable to participate in the spring semester, the role may be converted to an oralist position.

Neurobiology of Stress and Resilience in the Life Course

Fletcher, April J

Summer 2024

Elective This course examines the ways in which stress poses risk to healthy biological, psychological and social development. Using life course perspective and ecological systems theory (micro through macro), the course also highlights the characteristics, relationships, and contexts that increase resilience at each life stage (in utero through end of life). Circumstances relevant to social work (including but not limited to prenatal stress, trauma, bullying, violence, poverty and homelessness) are examined through the dual lenses of stress and resilience. Neuroscientific, genetic and related biological research is emphasized in the course, however no background in biological sciences is required as a prerequisite.

Summer 2024

Elective. This course explores how families are impacted by military service (FIMS) emphasizing the effects of military culture within which military families function. Stressors such as deployment, and the protective factors associated with military communities will be discussed. Attachment theory will be explored as it pertains to the loss and separation involved in long-term and sometimes repetitive deployment cycles. Substance use, anxiety, avoidance behaviors, and risk-taking behaviors will be discussed in terms of their impact on family life and family system functioning. Resiliency theory will be highlighted in terms of preventing or ameliorating post-deployment difficulties in families impacted by military service.

Substance Use Disorders

Schechter, Julia A

Summer 2024

Elective This course is designed to provide students with the fundamentals for understanding the use and misuse of alcohol and other drugs, and a basic understanding of evidenced-based treatment methods. One evidence-based treatment, Motivational Interviewing, will receive in-depth attention. Primary content includes an examination of the epidemiology and basic pharmacology of various substances, established theoretical frameworks for understanding etiology, and clinical practices across an array of populations.

Working with LGBTQ Youth, Families, and Adults

Wyman Battalen, Adeline

Summer 2024

Elective This course blends macro and clinical practice in order to service LGBTQ people most effectively. Students will learn about policies, laws and societal narratives that impact LGBTQ people in both positive and negative ways. The course focuses on the integration of macro and clinical issues and best practice that respects all people regardless of gender identity and sexual orientation. Particular attention will focus on developmental models of gender identity and sexual orientation.

Frameworks and Tools for Global Practice

McMahan, Lyndsey D

Summer 2024

Required for, and restricted to, Global Practice Field-of-Practice An advanced course that prepares students for effective practice in a global context and covers three broad areas: a framework for the rights-based perspective; rights-based programming with reference to vulnerable groups; and building sustainable systems. Students will be exposed to rights-based approaches to social work practice mainly in countries of the global south. Areas of focus include working with vulnerable populations such as children in a variety of settings, gender issues, migration as well as working with various NGOs, governmental and United Nations systems. Emphasis will be placed on working with diverse client populations in each practice setting.

Trauma Informed Psychosocial Interventions

Loughry, Maryanne

Summer 2024

Elective This course provides a foundation for understanding and implementing mental health and psychosocial perspectives in adverse and low resource settings and among culturally diverse populations in the United States and abroad. The interventions explored are trauma-informed and designed for settings of adversity such as immigrant detention centers, juvenile justice settings, child welfare settings, and places and populations affected by community violence, forced and irregular migration, war, and pandemics. The course will use a biopsychosocial approach to understand how interventions work to improve outcomes for beneficiaries at the individual, family, and community levels. Throughout the course, consideration is given to how a clinical as well as a macroperspective can inform traumainformedpsychosocial interventions. Emphasis will be placed on clinical interventions for individuals, communities and groups that are supported by current and emerging research evidence about effective practice. The psychosocialinterventions explored in course are relevant for both domestic and global settings, the course will focus on best practices and international standards and guidelines for psychosocial and mental health work in humanitarian settings, these standards include the Interagency Standing Committee (IASC) guidelines as well as those of WHO, UNHCR, UNICEF and SAMHSA. The course will focus on frameworks and policy interventions that strengthen community resilience.

SCWK882201

Child and Adolescent Trauma: Clinical Assessment & Treatment

Fitzgerald, Zane M

Summer 2024

Elective This course is an introduction to trauma theory and practice with children and adolescents. Theory is framed within a developmental perspective to understand neurobiology, brain development and attachment and their role in response to trauma and stress on children. Diversified definitions of trauma are considered, including single event versus complex trauma, attachment based/relational trauma, and structural violence and oppression. Skills for management of vicarious trauma are also explored. The latter half of the course examines selected modalities in the treatment of trauma, including TF-CBT, ARC and TST with a goal to understanding the theoretical approach of each modality, differential application and development of clinical skills for practice. Treatments are also examined within developmental context. Special consideration is given to the impact of separation from caregivers for youth placed in foster care, congregate care settings, and refugee youth experiencing family separation and immigration detention. The role of advocacy and resistance of youth movements in response to structural violence, oppression and historical and intergenerational trauma are also examined.

Dying, Grief, and Bereavement

Franchitto, John D

Summer 2024

Elective Beginning with an overview of the social phenomena of death and how social attitudes and practices influence the environmental context in which death takes place in contemporary society, the course explores the influence of cultural diversity in the way death is experienced by diverse groups. The tasks of mourning following a person's death and the bereavement process present complex socio-emotional challenges for family and friends throughout the lifespan. Issues in self-reflection and self-care are presented to offer practitioners ways to grow personally and professionally through the process of their clients' losses.

Theories of Design Thinking for Social Change

Rakhilin, Marina

Summer 2024

Design thinking is a non-linear, iterative process that organizations use to understand users (e.g., clients, families, communities), redefine complex problems, and create innovative solutions to prototype and test. It is increasingly present in organizations striving to increase equity. This course, relevant to clinical- and macro-oriented students, will focus on theories and approaches to understand the context of program and policy development as well as fieldwork research. Topics include behavioral health frameworks, stakeholder engagement, co-design, user interviews, community advisory boards, trauma-informed approaches, and more. This material will prepare students for success in the capstone course, Practicing Design Thinking for Social Change.

Advanced Clinical Practice with Latinx Populations

Izquier Bermudez, Maria C

Summer 2024

Elective This course prepares students for effective clinical practice with Latinx populations living in the United States. There are three units within this course meant to address the inherent needs and complexities of the Latinx community. The first unit examines the intersection of clinical social work and Latinx culture through themes of identity, family systems, and attitudes toward mental health. The second unit focuses on clinical social work and immigration by exploring experiences of migration, generational differences within families, and feelings of guilt and stress related to immigration status. The third unit is centered on the varied experiences of trauma in Latinx communities and how social workers can empathically engage these experiences in culturally relevant capacities. In each of these units we will explore (1) diagnosis, misdiagnosis, and depathologization; (2) evidenced based practices and interventions; and (3) strengths, protective factors, and resilience. This course will be taught in Spanish.

Clinical Practice with Children and Families: Assessment, Intervention, and Evidence-Based Practice

Sandoe, Elisabeth M

Summer 2024

Required of Clinical Social Work students. An advanced clinical course intended to prepare students for effective practice with children, adolescents, and families. Building on foundation content, the course provides a comprehensive review of child and family development, reviews major theories and research literature concerning the evaluation and treatment of children and families, and examines how clinical social workers may effectively utilize evidence-based treatments to help youth and their families achieve their goals. Students will learn practice techniques of various evidence-based interventions.

Clinical Practice with Adults: Assessment, Intervention, and Evidence-Based Practice

Loiselle, Yelana N

Summer 2024

Required of Clinical Social Work students. An advanced course focusing on effective interventions with common adult psychosocial disorders. Intervention methods, drawn from current practice evaluation literature, encompass a contemporary eclectic model incorporating cognitive-behavioral, psychodynamic and other relational thinking, practice wisdom, and empirical evidence in determining the most suitable intervention. Special attention is given to recognition of individual and demographic factors influencing clients, as well as their expectations and input concerning the selective invention. Class discussion draws on students' reading and field experience. Through the use of case studies, the course addresses strategies for practice evaluation.

Group Therapy for Children and Adolescents

Romano, Carolyn

Summer 2024

Elective This course will prepare students to design and facilitate experiential skills-based groups with both children and adolescents. Building on first-year foundational content this course prepares students to learn how to facilitate skills-based group therapy with youth. Several guiding theories, including (Cognitive Behavior Therapy, Dialectical Behavior Therapy, Solution Focused Therapy, Narrative Therapy, and Motivational Interviewing), will be integrated with multiple experiential activities as vehicles for the engagement in the interventions. Each guiding theory dominates a minimum of two weeks in the syllabus to ensure depth of learning and exploration of possibilities for theory into practice. The experiential activities will include music, adventure, bibliotherapy, art therapy, and technology to assist in the engagement of clients in the learning process and will be utilized throughout the course. Assignments challenge students to develop two innovative original experiential group sessions and demonstrate competence in facilitating both of their group sessions.

SCWK888601**Financial Management and Resource Development****Zimmerman, Meir Simcha****Summer 2024**

Elective This Elective course prepares students to develop and manage appropriate resources for creating, supporting, and sustaining effective human service organizations. Managers must understand an organizations financials to exercise fiduciary responsibility. In order to meet the mission, agencies also depend on effective and efficient direct care staff, supervisors and managers. If there is no money, there is no mission; and if there is not sufficient and motivated staff to perform their functions, human service organizations cannot be successful. This course concentrates on these two core aspects of human services management: understanding organizational finances and human resources management and development.

SCWK996501

Advanced Quantitative Methods for Social Work Research

Saran, Indrani

Summer 2024

This course provides students with an introduction to quantitative approaches for assessing the impacts of policies and programs. The focus is on understanding these methods intuitively and applying them, rather than delving deeply into their mathematical foundations. Students will explore the practical application, strengths, and limitations of randomized experiments and quasi-experimental designs through analysis and critique of examples from social work and health-related literature. The goal is to build students skills as both consumers and producers of applied empirical research. Additionally, the course includes hands-on experience with Stata, covering tasks such as data cleaning, management, and analysis of quantitative data. Prerequisites: At least one semester, but preferably one year, of graduate-level statistics, with experience in linear and logistic regression analysis. Stata statistical software will be used in the course.

Doctoral Group Independent Study

Dept

Summer 2024

This elective offers students the opportunity for an in-depth examination of a substantive topic that is not comprehensively addressed by other required or elective doctoral courses. The topic is considered from either a theoretical, policy and/or research perspective. The topic area should have direct and substantial relevance to social work research, social work education, evidence-based practice, and/or social policy analysis. A course syllabus should be submitted to the Doctoral Program Director prior to registration.

Social Work Courses: Fall 2024

SCWK660201

Macro Independent Study

Dept, Assigned

Fall 2024

Elective. An opportunity for Macro students to investigate one aspect of social work practice with groups or communities in-depth. In addition to being of interest to the individual student, the area of investigation must be of substantive import to the field and of clear significance to contemporary community organization and social planning practice. Any student who has successfully completed the first year program of Macro studies is eligible to pursue an independent study in the fall and/or spring semester of the second year.

SCWK661001

Global Humanitarian Practice

Loughry, Maryanne

Fall 2024

This asynchronous course provides foundational knowledge for those working in humanitarian crisis contexts both within and outside of the U.S. This course will enhance student awareness of protection issues, how to engage with diverse communities in crisis, and the importance of cross-sectoral collaboration. Students will complete a series of four online modules: Community-Based Mental Health and Psychosocial Support, Introduction to International Child Protection, Gender-Based Violence, and Public Health in Emergencies. Students will analyze these modules through weekly discussion boards and oral and written assignments. This course is intended for global social workers but also for any student who wants to understand and engage in global humanitarian contexts.

Immigration and Refugee Issues

Kulkarni, Aniruddha

Fall 2024

Elective An overview of the prominent theories, major issues, and controversies in immigration policy is presented. While immigration has become a crucial concern of the American social welfare system as well as an issue of global urgency, immigration controls the fate of growing numbers of asylum seekers. The course will discuss the special needs and problems faced by immigrant and refugee clients and communities; adaptation and coping with a new culture; refugee experience; the impact of relocation on individuals, families, and communities; and a range of world view perspectives including acculturation & assimilation, biculturalism, marginality, and traditional ethnic identities.

Re-thinking Diversity: Systems of Oppression and Privilege

Williams, ED-DEE

Fall 2024

The course provides a critical perspective on current issues and problems in American racism, sexism, heterosexism, ablism, and ageism. These issues and problems are studied in the context of the dynamics of social process, historical and anthropological perspectives, and theories of prejudice and social change. Social work's responsibility to contribute to solutions is emphasized. Different models for examining the issues of race, sex, sexual orientation, age, and ability are presented.

Neuroscience of Human Relationships and Development

Black, Jessica M

Fall 2024

Elective Following human development from conception to end of life, the course provides students with an introduction to key neurobiological aspects (such as brain development and genetics) of the life course. Special attention is paid to examining the association between neurobiology and the nested layers and relationships in which development unfolds, including family, school, community and wider society/policy. Concepts important to social work (including but not limited to attachment, trauma, stress, social relationships, emotions, health and mental health) are addressed within various stages of development. No background in the biological sciences is required.

SCWK772901**Public Health Social Work****Hawkins, Summer S;Mulkern, Patrick J****Fall 2024**

Elective Public health social work (PHSW) emphasizes health promotion and prevention as well as targeting populations through population-based strategies. The course integrates research on health topics, populations, and settings to learn about the field of PHSW and application of skills to real-world problems. A life course perspective is used to discuss health behaviors and outcomes through all stages of development and across a range of settings. The aim of the course is to provide students a unique perspective on social work from the field of public health by focusing on health promotion, prevention, and reducing disparities at the population-level.

Global Policy Issues and Implications

Loughry, Maryanne

Fall 2024

Required for, and restricted to, Global Practice Field-of-Practice. An advanced policy course that introduces approaches, issues, and competencies of global social work policy interventions. This course focuses on policy analysis in the context of world-wide poverty, underdevelopment, and sustainable development. In the context of social justice, equality, universal human rights and international collaboration (partnerships), it perceives global systems and their policies as both a challenge for a sustainable planet and for the growth of its interdependent national/local communities.

Child and Adolescent Trauma: Clinical Assessment & Treatment

Flanagan Blanchard, Aine M

Fall 2024

Elective This course is an introduction to trauma theory and practice with children and adolescents. Theory is framed within a developmental perspective to understand neurobiology, brain development and attachment and their role in response to trauma and stress on children. Diversified definitions of trauma are considered, including single event versus complex trauma, attachment based/relational trauma, and structural violence and oppression. Skills for management of vicarious trauma are also explored. The latter half of the course examines selected modalities in the treatment of trauma, including TF-CBT, ARC and TST with a goal to understanding the theoretical approach of each modality, differential application and development of clinical skills for practice. Treatments are also examined within developmental context. Special consideration is given to the impact of separation from caregivers for youth placed in foster care, congregate care settings, and refugee youth experiencing family separation and immigration detention. The role of advocacy and resistance of youth movements in response to structural violence, oppression and historical and intergenerational trauma are also examined.

Practice in Health and Mental Health Settings with Older Adults

Bullock, Karen

Fall 2024

Elective An advanced course designed to develop micro and macro practice skills in working with older adults and their families in health and mental health settings. The course explores the biopsychosocial knowledge base required to develop effective interventions with specific foci on the physical and mental health considerations facing older adults and their families. Substance abuse issues and the special challenges of reaching a client population often invisible to service providers are discussed. The role of spirituality in older adults' lives and the challenges of death, dying, and bereavement facing the older adults are also covered.

Dying, Grief, and Bereavement

Franchitto, John D

Fall 2024

Elective Beginning with an overview of the social phenomena of death and how social attitudes and practices influence the environmental context in which death takes place in contemporary society, the course explores the influence of cultural diversity in the way death is experienced by diverse groups. The tasks of mourning following a person's death and the bereavement process present complex socio-emotional challenges for family and friends throughout the lifespan. Issues in self-reflection and self-care are presented to offer practitioners ways to grow personally and professionally through the process of their clients' losses.

Psychodynamic Theories of Individual Development

Kovarsky, Marina E

Fall 2024

Elective An advanced course that provides an overview of the psychodynamic theories that best explicate individual psychological development over the life cycle from a biopsychosocial perspective, with attention given to sources of development of individual strength and resilience. These theories include drive theory, ego psychology, object relations, self psychology, and intersubjectivity theory. Students will begin to learn to critique and compare theories for their applications to, and usefulness for, social work practice as they reflect particular sets of values and intersect with ethnicity, social class, gender, sexual orientation, religion, age, disability, and other forms of diversity.

SCWK884401

History of Activism in Black Communities

Taylor, Darrel

Fall 2024

Black communities in continental Africa, the Caribbean, Latin America, and the United States have had a significant influence on the development of the world throughout history. Historically, Black people have been providing mutual aid long before their efforts would later be defined as "social work" and have often done so as a response to a profession that did not help them and to a profession that did not know how to help them. This course will explore the cultures, histories, advocacies, and activism that frame a universal context and the many diverse experiences of people of African descent. The goal of this course is for students to understand how policy (de facto or de jure) influenced the engagement of advocacy and activism of Black people. This historical and global context will frame their activism and see connections with how it evolved in our current climate.

SCWK884601

Advanced Practice in Afrocentric Social Work

Robinson Findlay, Melanie E

Fall 2024

Required of students in the Black Leadership in Social Work Field-of-Practice; electives for others. As part of a holistic approach, the content of the course is directed towards a critical examination of social work from an African-centered perspective. The Afrocentric perspective is an orientation to data that places African people as participants and agents in shaping their life chances and experiences. We will explore implementing an Afrocentric perspective across developmental stages with Black communities, families, groups, and organizations. We will discuss the connection between intersectionality and anti-racism with the Afrocentric perspective; lastly, we will explore ways to implement the Ubuntu model and Hip Hop in clinical and macro social work practice. Thus, the course is intended to be descriptive, theoretical, practice focused, experiential, provocative, and emancipatory.

SCWK884701

Creating the Inclusive Workplace: Concepts in Organizational Justice

Bradley, Samuel L

Fall 2024

Organizational justice is the philosophy that a fair workplace produces better employees and better moral and business outcomes for organizations. Some important overall topics in organizational justice include employee fair pay, benefits, labor rights, trauma, marginalized identities in the workplace, and aging. This course will review these concepts and highlight ethical business practices that are innovative, cost-effective, and just. Students will be asked to engage in regular online dialogue, engage with case studies, and creative problem solving around difficult issues of justice and workplace fairness. Special emphasis will be placed on leadership, creativity, and sustaining lasting change. Both clinical and macro students are highly encouraged to consider this course. Top leaders from diverse industries will be featured as guest speakers.

SCWK884801

Practicing Design Thinking for Social Change

Rakhilin, Marina

Fall 2024

In this course, students will practice methods connected to the theories and approaches introduced in Theories of Design Thinking for Social Change. Design thinking refers to a non-linear, iterative process that organizations use to understand users, challenge assumptions, redefine complex problems, and create innovative solutions to prototype and test. Design thinking processes are becoming increasingly present in organizations striving to increase equity or push for social change and when done well are notable for their inclusion of users throughout the design process. Through a combination of teaching methods, including didactic classroom lectures, structured role-playing, and other classroom exercises, students will become well-versed in how design thinking methods are applicable to a wide variety of work environments (e.g., those focused on education, healthcare, research, legislation, community organizing, and others in both clinical and macro roles). Major topics covered include prototyping, interviewing, usability testing, measuring impact, and planning for sustainability as well as scalability.

Global Humanitarian Practice

Loughry, Maryanne

Fall 2024

This asynchronous course provides foundational knowledge for those working in humanitarian crisis contexts both within and outside of the U.S. This course will enhance student awareness of protection issues, how to engage with diverse communities in crisis, and the importance of cross-sectoral collaboration. Students will complete a series of four online modules: Community-Based Mental Health and Psychosocial Support, Introduction to International Child Protection, Gender-Based Violence, and Public Health in Emergencies. Students will analyze these modules through weekly discussion boards and oral and written assignments. This course is intended for global social workers but also for any student who wants to understand and engage in global humanitarian contexts.

Cross-Cultural Social Work Practice

Flinton, Kathleen M

Fall 2024

Elective This advanced clinical practice course examines effective assessment and intervention with persons of diverse cultural backgrounds. Recognizing that culture is always a salient factor in social work practice, special attention is given to the need for practitioners to have an approach that ensures practitioners' awareness of culture, and incorporation of culture into practice skills, while supporting the cultural identity of the client. Understanding culture and the dynamics of power as contextual factors determining people's realities - and consequently the values and behavioral adaptations they develop - the course focuses on the helping relationship and issues in assessment and intervention. The course is designed to increase students' knowledge of their own and clients cultural background and awareness of the values and beliefs they hold about understandings of self, family, community, mental health and well-being. Skills necessary to integrate cross-cultural issues into social work practice will be explored in the areas of assessment, intervention, case conceptualization and application of treatment approaches, in a culturally responsive frame.

Internal Family Systems Therapy: A Contemporary Approach for Working with Individuals, Couples, Families, and Groups

Warsh, Robin

Fall 2024

Elective This advanced clinical course focuses on the Internal Family Systems Model (IFS) into a comprehensive approach that includes guidelines for working with individuals, couples, families and groups. The IFS Model is a new synthesis of two already existing paradigms: systems thinking and the multiplicity of minds. One major and unique contribution of IFS is the concept that it is the connection of the Self to the Parts that brings healing. The IFS Model offers a non-pathologizing approach to identifying and unburdening the faulty beliefs people carry from childhood trauma and troubling patterns of interaction and replacing them with Self-led resources.

Advanced Clinical Interventions with Children, Youth, and Families

Romano, Carolyn

Fall 2024

Required of Clinical Social Work students in the Children, Youth and Families Field-of-Practice; elective for others. An advanced clinical course focused on the development of specific intervention skills utilized with children and their families. Clinical practice skills in individual, family, and group treatments highlight prevention and intervention strategies that promote self-efficacy and resiliency. Specific skills include parent management training, parent-child interaction therapy, solution-focused therapy with children, adolescents, and their families, trauma-focused cognitive behavioral therapy, and group therapy with children. Course structure will utilize experiential skills labs to promote student skill acquisition.

The Integration of Behavioral Health and Medical Care Practice

Romano, Justine V

Fall 2024

Required of Clinical Social Work students in the Health Field-of-Practice; elective for others. An advanced course that utilizes the biopsychosocial model of assessment of individual and family response to illness. In addition, the course will address issues in behavioral and complementary and alternative medicine. The effect of race, ethnicity, gender, sexual orientation and socioeconomic status on health, health care treatments, and health care availability to diverse populations will also be addressed. Finally, the importance of social work contributions to research in health care will be examined.

Adult Psychological Trauma: Assessment and Treatment

Manalili, Michael Mookie C

Fall 2024

Required of Clinical Social Work students in the Mental Health Field-of-Practice; elective for others. An advanced clinical course focusing on adults exposed to acute or chronic psychological trauma. Theoretical constructs stress an interactive approach: person, environment, situation. Emphasis is on the interconnections of intrapsychic, interpersonal, cognitive, and behavioral sequelae to catastrophic life events, with attention to socio-economic and cultural factors which influence an individual's differential response to trauma. Various methods are evaluated with the goal of multi-model treatment integration. Clinical presentations on specialized populations (e.g., combat veterans, victims of abusive violence, traumatic loss, disasters, people with AIDS, and the homeless) are used to integrate theory, research designs and strategies, and practice skills.

Solution Focused Therapy

Romano, Carolyn

Fall 2024

Elective An advanced clinical course focusing on time-effective treatments with individuals, families and groups. The course focuses primarily on Solution Focused Therapy. Primary concepts include the paradigm shift from problem to possibility, the role of an active intentional clinician, and the careful use of language. Emphasis is given to the evaluation as key to the process, which involves building rapport, identifying a goal, and understanding the client's relationship to that goal. The course examines pivotal treatment strategies, including language, task setting, and creating hope in clients through our interventions.

Social Work Practice in Child Welfare

Rheaume, Pamela

Fall 2024

Elective An advanced course designed to provide practice knowledge and skills for micro and macro interventions. Throughout the course the issues of poverty, diversity, and services for children of color are considered. Stressing the importance of providing services to children and families so that the family unit is preserved, issues related to family preservation, foster care, family reunification, adoption, legal issues, and emerging trends will be explored. The central focus will be on developing a solid foundation in child welfare policy and practice as a means to promoting a more responsive service delivery system.

School Social Work: Program Development and Educational Policies

Connolly Benitez, Amanda

Fall 2024

Elective An advanced course that provides a comprehensive overview of the history, theory, practice and policy of social work in an educational setting. Beginning with a historical perspective, this course is rooted in school social work principles that emphasize collaborative work with families, and school and community personnel, professional standards, and diverse practice roles. This course provides a comprehensive overview of education policy and the legal rights of students and their families. Special issues in school social work practice related to health, child abuse, school safety and violence, trauma, substance abuse, and high risk behavior are addressed.

Planning for Health and Mental Health Services

Pecoraro, Matthew J

Fall 2024

Required of Macro students in Health and Mental Health Field-of-Practice; elective for others. A course designed to introduce program planning, strategic planning, proposal writing, and state-of-the-art service delivery models. Significant emphasis will be placed on developing practical skills in the area of proposal development and program design through applying class material to practice through a major planning assignment. Skills to analyze critical issues in mental health and health care delivery, including system design and financing, are emphasized. Critical issues of access to health care, the crisis in health care, and managed care will be discussed and analyzed. Models of service delivery will be critically reviewed.

Survey of Research Methods in Social and Behavioral Science

Taylor, Catherine A

Fall 2024

Required for all Doctoral Students The course surveys research methods in the social and behavioral sciences, including theoretical and conceptual approaches to research problem formulation; research design, including experimental, comparative, and survey; sampling; statistical methods; and methods of observation and common techniques of data analysis. The course provides a framework for evaluating social science research codifying methods for gathering scientific evidence, explicating criteria by which to evaluate scientific evidence, and developing techniques for evaluating scientific evidence in the published literature. These tools will be applied to a group of case examples of research in social and behavioral science.

Introduction to Statistics and Data Analysis

Mendez Campos, Barbara;Saran, Indrani

Fall 2024

This course introduces basic statistics and practical applications of data analysis in social work research and evaluation. The course aims to teach students pragmatic tools for assessing basic statistical analyses. Students will learn: (1) descriptive statistics including measures of central tendency and variability; (2) hypothesis testing using chi-square, t-tests, one way ANOVA, correlation, and simple regression; (3) presenting and interpreting statistical results, and (4) using SPSS statistical package for data analysis. Other topics will be covered are data acquisition/management, data cleaning, data transformation, and introduction to SAS and Stata statistical packages. Upon completion of this course, students should be able to think critically about data and apply standard statistical to describe the data and to draw conclusions from such analyses.

Doctoral Group Independent Study

Dept;Teixeira, Samantha

Fall 2024

This elective offers students the opportunity for an in-depth examination of a substantive topic that is not comprehensively addressed by other required or elective doctoral courses. The topic is considered from either a theoretical, policy and/or research perspective. The topic area should have direct and substantial relevance to social work research, social work education, evidence-based practice, and/or social policy analysis. A course syllabus should be submitted to the Doctoral Program Director prior to registration.

Systematic Reviews and Introduction to Meta-Analysis

Sabbath, Erika L

Fall 2024

This doctoral-level course focuses on the principles and tools of conducting and writing systematic reviews of social work and related social sciences literature. The course also provides an introduction to the quantitative tools of meta-analysis. Students will also read and critique multiple systematic reviews over the course of the semester. As a semester-long assignment, students will plan, undertake, and complete a limited systematic review in their area of research interest. This course is open to all graduate students. Students outside social work must receive instructor permission before contacting the SSW doctoral program to register.

Theories and Methods of Teaching in Professional Education

Black, Jessica M

Fall 2024

Required for all Doctoral Students. Effective teaching in social work education requires an understanding of the components of curriculum building and professional practice skills required by the Council on Social Work Education. Based on a strong theoretical base in the principles of adult learning, this course is designed to introduce the student to the theory and methods of professional social work education with a concentrated focus on course design and classroom execution. A broad range of specific teaching techniques are presented along with the means by which to evaluate student performance and learning.

SCWK660201

Macro Independent Study

Olayo Mendez, Jaime Alejandro, SJ

Spring 2025

Elective. An opportunity for Macro students to investigate one aspect of social work practice with groups or communities in-depth. In addition to being of interest to the individual student, the area of investigation must be of substantive import to the field and of clear significance to contemporary community organization and social planning practice. Any student who has successfully completed the first year program of Macro studies is eligible to pursue an independent study in the fall and/or spring semester of the second year.

Introduction to Social Work

Ryan, Sarah E

Spring 2025

This is a Social Work course available to undergraduate students Starting with a discussion of its history and the relevance of values and ethics to its practice, the course takes up the various social work methods of dealing with individuals, groups, and communities and their problems. In addition to a discussion of the theories of human behavior that apply to social work interventions, the course examines the current policies and programs, issues, and trends of the major settings in which social work is practiced.

Interdisciplinary Approaches to Borderlands and Human Mobility

Olayo Mendez, Jaime Alejandro, SJ

Spring 2025

This course will analyze borderlands dynamics, their impact on international human mobility, and different disciplinary approaches to create effective interventions and/or regional analysis. Recently, global border regions have taken front and center in discussions of migration and forced migration. Emerging nationalistic sentiments have fostered policies and dynamics to increase surveillance, control, and conflict along border regions. The "Remain in Mexico" and Title 42 policies are some examples of how the United States government externalizes its borders and enforces policies that impact peoples' lives at different levels. Furthermore, border regions remain lively, as local and foreign populations interact and try to navigate the unfolding dynamics of human mobility. This course offers the opportunity to understand and analyze different contexts in border regions, as well as the opportunity to interact with students from different disciplinary backgrounds. It also allows students to identify vulnerable populations in these settings, and to reflect on the impact their particular discipline has in understanding and participating in borderland dynamics. This course is a travel course that requires the completion of two on-line modules, participation in two on-line sessions before departure, 8 days of immersion during the Spring Break in the San Diego, U.S.-Tijuana, Mexico region, and one additional session upon return. Participants will need to cover their transportation costs and the course fee. NOTE: The days for the immersion will comprise different sessions and encounters with organizations on the ground. Due to the current pandemic, some sessions may have to be online while either in San Diego or Tijuana. Participants need to have a current passport and required visas to travel.

Independent Study: Practice Sequence

Taylor, Catherine A

Spring 2025

Elective for M.S.W. students. A course offering the student an opportunity to examine in more depth a subject area that is not included in the school curriculum. The extent of that examination should be equal to the depth that is characteristic of a typical course. The subject must be of significance to the field of social work practice, transcending the distinction between macro and clinical social work.

The Social Welfare System

McFadgion, Akosoa L

Spring 2025

Prerequisite for all other Policy courses. Required of all M.S.W. students. The course explores current social welfare issues in the context of history and underlying political rationale and societal values. The course is designed to provide students with an understanding of the relationship between contemporary social welfare policy and social work practice. The course focuses on the historical, political, economic and other social conditions that influence policy development in the United States. Models of social welfare are presented and critiqued. Policy issues and programs that impact specific populations are explored with an emphasis on social and economic justice. The course content will be framed through the lens of distributive equity and social justice. Understanding how policy influences practice and how social workers can influence social welfare policy are examined.

The course is designed to provide students with an understanding of the relationship between contemporary social welfare policy and social work practice. The course focuses on the historical, political, economic and other social conditions that influence policy development in the United States. Models of social welfare are presented and critiqued. Policy issues and programs that impact specific populations are explored with an emphasis on social and economic justice. The course content will be framed through the lens of distributive equity and social justice. Understanding how policy influences practice and how social workers can influence social welfare policy are examined.

Social Determinants of Health and Mental Health

Sabbath, Erika L

Spring 2025

This course will build clinical and macro social work students understanding of how social factors like racism, the built environment, and access to care shape the health of populations and produce disparities in health and well-being. We begin by introducing the public health approach and encouraging students to expand their thinking about what contributes to disease or disorder in an individual client (a social work approach), to incorporate an understanding of why certain populations have worse health than others (the public health approach). With that foundation, each week we first build knowledge of the ways that a given element of the social environment (e.g. workplaces, neighborhoods, homophobia and transphobia) impacts population health. We then move from observation to action through discussing the ways that social workers can improve the health of populations they serve through a) intervening directly on that social determinant of health, and b) mitigating the impact of that determinant on the health of clients and communities. Assignments and in-class case studies build students ability to critically analyze the specific elements of their clients and communities social experiences that contribute to patterns of health and well-being.

Services to Migrants: A Border Perspective

Calvo Vilches, Maria Rocio

Spring 2025

Elective The right to migrate, sovereign nations' economic interests, and widespread anti-immigrant sentiments, have created an ongoing crisis at the US border with Mexico. This field-based immersion in the realities of the border will seek a comprehensive understanding of the crisis and the community based responses in Tucson, Arizona. Hosted by BorderLinks, students will learn through dynamic educational experiences about the impact of the border and immigration policies, and about actions for social transformation.

SCWK880201**Policy for an Aging Society: Issues and Options****Mendez Campos, Barbara****Spring 2025**

One of 4 courses that meets advanced policy requirement. This advanced policy course provides an opportunity to examine how historical and contemporary forces and demographic change shape the perceived problems of the elderly, the politics of aging, and public policy responses. New questions are being raised about the cost of public and private retirement and health care commitments directed at the old and about the responsibilities of older Americans. The implications of the diversity (ethnic, racial, gender, health and economic status) of current and future cohorts of elders need to be understood to adequately plan service and policy responses to the aging of America.

Global Migration and Forced Displacement : Debates and Responses

Olayo Mendez, Jaime Alejandro, SJ

Spring 2025

This online course provides an overview of contemporary global migration and forced displacement, as well as emergent issues and responses to migration. Students will complete a series of four modules: Migrants and Refugees in the Global Landscape; Basics of Refugee Determination; Climate Change, Displacement and Human Rights; and Education in Emergencies. These modules are informed by social work perspectives of person-in-environment and biopsychosocial frameworks and were created by subject experts, emphasizing the need for collaboration, interdisciplinarity, and transdisciplinary approaches to addressing complex social problems. Students will engage in online discussion based on the readings, media extracts, experiences of professionals in the field of humanitarian assistance and current global events affecting vulnerable populations in a global context. This course is not just for global social workers but for all students who want to understand and engage in global humanitarian contexts.

Wraparound Systems of Care for Youth and Families

Chin, Elizabeth

Spring 2025

Elective The purpose of this course is to enhance student exposure and understanding of macro and clinical interventions available for youth and families, with a close examination of systems across the Commonwealth. With an understanding of the history of why Massachusetts offers the services that it does, as well as a deep dive into the details of this work, students will leave the course feeling better prepared for the workforce. Topics covered include theoretical underpinnings of our systems of care, safety planning, wraparound services, and in-home therapy. Students will investigate multi-levels of care, all while imagining better and thinking creatively about what that might look like. Each session will explore services and care through a diversity lens, aligning goals and ideals with race, equity, and inclusion.

Social Work and Spirituality

Franchitto, John D

Spring 2025

Elective This course explores spirituality as a core dimension of human development and as a necessary area of concern for social workers including non-religious expressions of spirituality as well as spirituality shaped by religious traditions. We will explore how spirituality contributes to optimal human development and, in particular, the power of spirituality to advance psychosocial competence, coping, and well-being. Although all students will explore common questions and topics students have freedom to responsibly shape their learning experience to advance their specific professional objectives.

Dying, Grief, and Bereavement

Moment, Amanda

Spring 2025

Elective Beginning with an overview of the social phenomena of death and how social attitudes and practices influence the environmental context in which death takes place in contemporary society, the course explores the influence of cultural diversity in the way death is experienced by diverse groups. The tasks of mourning following a person's death and the bereavement process present complex socio-emotional challenges for family and friends throughout the lifespan. Issues in self-reflection and self-care are presented to offer practitioners ways to grow personally and professionally through the process of their clients' losses.

Baum, Jonathan

Spring 2025

Required of Macro Social Work students An overview of general principles of management, this course provide students with a broad understanding of theories of organizational functioning combined with a focus on leadership for change in organizations. The role of leader-manager is explored in three theoretical perspectives of organizations: the structure of human service organizations and requisite management skills; the human resource perspective and promoting the recruitment and development of people as a vital component of organizational functioning; and organizational change with emphasis on advocating for and sustaining change within human service organizations.

Dismantling Organizational Bias

Marzilli, Teresa A

Spring 2025

Elective This advanced skills course will build on the foundation of the first year diversity course. Drawing from research in social work, business, psychology, and other interdisciplinary fields of practice students will have an opportunity to increase their leadership skillsets. Anticipated outcomes will be to give MSW student's meaningful skillsets in facilitating difficult dialogue, identifying and managing conflict, analyzing and assessing team dynamics, and coaching diverse teams to success. Dismantling Organizational Bias is a course for first social workers interested in developing leadership skills with the goal of learning how to assess, analyze, and respond to institutional oppression in public service agencies, nonprofits, and for-profit settings. Both clinical and macro social work students are encouraged to participate.

HBSE Independent Study

Dept, Assigned

Spring 2025

Elective. An opportunity to pursue an in-depth study of some aspect of human behavior theory or knowledge. The study must be designed so that it contributes to the student's understanding of the individual, group, organizational, institutional, or cultural context within which human behavior is expressed and by which it is significantly influenced. The area of investigation must be of clear significance to the contemporary practice of social work. Any student who has successfully completed the foundation course in Human Behavior and the Social Environment is eligible to pursue independent study.

Global Mental Health Group Independent Study

Betancourt, Theresa

Spring 2025

Students in the Global Mental Health Group Independent Study will be exposed to core concepts and readings in global mental health, cross-cultural mental health services research and policy and translation of core ideas to practice and policy. Students will complete readings and lead classroom discussion of critical topics in global mental health with particular attention to children, youth and families. Course content will include attention to mixed methods (qualitative and quantitative) research and translation to policy in diverse multicultural and low-resource settings both in low- and middle-income countries and in the U.S. This weekly spring group independent study will 1) create a space for students to connect with one another on shared interests in global mental health and social work, 2) provide an opportunity for trainees to deepen their research expertise and engage in exchange with students at both graduate and undergraduate levels at Boston College. Students will also actively participate in mutual learning and discussion by attending bi-monthly Grants and Sponsored Research Initiative (GRIT) webinars/seminars hosted by the Research Program on Children and Adversity, and 3) expose students to meaningful work and macro skills in the field of social work and public health. The Global Mental Health Group Independent Study will be open to all undergraduate, masters, and doctoral students and Boston College schools, including Social Work, Nursing and the Lynch Graduate School of Education. This group independent study will take place over the spring quarter and will meet on a weekly basis for 10 weeks on Wednesdays 10am-1pm. The group independent study will be taught by Dr. Theresa S. Betancourt, Salem Professor in Global Practice and Director of the RPCA at Boston College School of Social Work.

Afrocentric Organizations

Milton, Lujana E

Spring 2025

Elective The Afrocentric theory applies many African philosophies to administration, policy analysis, leadership and democracy. This class will explore Afrocentric organizations and infuse important concepts in applied techniques in community-based systems dynamics, design thinking, DEI practice and future(s) thinking to supervision and management of a social service agency. The history of significant Black-led social service organizations such as the National Urban League and the National Advancement for the Advancement of Colored People (NAACP) will be explored. Course work will focus on developing leadership skills in Black communities and organizations responsive to combating racism, developing activist agendas, and building capacity within the Black communities.

Clinical Practice with Adults: Assessment, Intervention, and Evidence-Based Practice

Sullivan, SuMing Chin

Spring 2025

Required of Clinical Social Work students. An advanced course focusing on effective interventions with common adult psychosocial disorders. Intervention methods, drawn from current practice evaluation literature, encompass a contemporary eclectic model incorporating cognitive-behavioral, psychodynamic and other relational thinking, practice wisdom, and empirical evidence in determining the most suitable intervention. Special attention is given to recognition of individual and demographic factors influencing clients, as well as their expectations and input concerning the selective invention. Class discussion draws on students' reading and field experience. Through the use of case studies, the course addresses strategies for practice evaluation.

Clinical Practice in Schools

Kuehn, Francis

Spring 2025

Elective An advanced clinical course that provides a comprehensive overview of the necessary skills to prepare students for effective communication with teachers and school personnel as well as with diverse families on issues related to assessment, building family partnerships, family-based treatment, and multicultural issues. The course reviews assessment and use of state-of-the-art diagnostic testing instruments. Given the relationship between school social work and special education, students will be exposed to the diverse populations served in schools and learn how to engage in practice with children with a variety of issues, including learning, physical, behavioral, developmental, neurological, and emotional disabilities.

Couples Therapy

Pilowa, Emily

Spring 2025

Elective An advanced course examining and analyzing theories, research, and interventions with couples. The use of cognitive, behavioral, emotion-focused, brief treatment, and skills-training approaches are critically evaluated. Research on their empirical bases is examined. Emphases include working with couples from diverse cultural backgrounds, practice with same-sex couples, and special issues such as living with chronic illness, poverty and economic stress, facing divorce, infidelity, interpersonal violence, and sexual dysfunctions. The course will describe how to adapt couple-based assessments and interventions to various settings, such as acute medical, psychiatric, and child-focused settings.

Family Therapy

Healey, Thomas J

Spring 2025

Elective An advanced course designed to integrate family therapy theories of practice and intervention techniques. Throughout the course critical issues relative to power, gender, and race will be interwoven with outcome effectiveness, research, and evaluation. Emphasis will be placed on the adaptation of the family process to the stressors of chronic illness, aging, addictions, and interpersonal violence. The strengths and problems of minority families, families living in poverty, blended families, adoptive families, and families of same sex parents will be reviewed.

Internal Family Systems Therapy: A Contemporary Approach for Working with Individuals, Couples, Families, and Groups

Lingren, Kathleen M

Spring 2025

Elective This advanced clinical course focuses on the Internal Family Systems Model (IFS) into a comprehensive approach that includes guidelines for working with individuals, couples, families and groups. The IFS Model is a new synthesis of two already existing paradigms: systems thinking and the multiplicity of minds. One major and unique contribution of IFS is the concept that it is the connection of the Self to the Parts that brings healing. The IFS Model offers a non-pathologizing approach to identifying and unburdening the faulty beliefs people carry from childhood trauma and troubling patterns of interaction and replacing them with Self-led resources.

Advanced Trauma Theory and Treatment Modalities

Vigil, Kathryn I

Spring 2025

Elective This course builds on the introduction to trauma theory and practice of SCWK8874 Adult Trauma and SCWK8822 Child and Adolescent Trauma to provide students with an advanced understanding of trauma theory and development of specific skills for clinical practice. The course is designed to utilize a deepened level of trauma theory to understanding the mechanisms of change of selected modalities and differential application of these mechanisms in clinical practice. This course takes an experiential approach to trauma practice, with in class exercises and practice integrated throughout the course. Evidence-based and emerging practices are examined within the context of socio-cultural identity of clients and communities, and the in-practice application of a trauma skill set in micro, mezzo, and macro perspective. Special areas of focus include memory systems, Polyvagal theory, sleep, shame, and developing a stance as a social justice trauma practitioners. Through assignments, students will have the opportunity to explore the wide range of practices in the field of trauma, and are encouraged to engage with the diverse and ever evolving trauma practice landscape. Students are strongly encouraged to have taken SCWK8874 or 8822 prior to this course, or to have significant background in trauma practice and familiarity with all theories and material covered in one of these courses. Foundational material will not be repeated for those without prior course experience in trauma.

Social Innovation

Kumar, Praveen

Spring 2025

Required of Macro Social Work students. Elective for others. Designed to prepare students with the skills to develop transformational responses to social problems through learning concepts related to innovation, needs assessment, and grant development, this course provides students with knowledge about how to create new, innovative responses to social problems and put these ideas into action. Students study examples of social entrepreneurship, learn how to assess social need, and develop new programmatic responses through grant-writing. Participation in the Social Innovation Lab allows students a first-hand look at innovation in action in existing non-profits and at how the redesign process promotes and supports new thinking.
