ENGL108021

Literature Core

Dept, E

Fall 2024

In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres. For course descriptions of the individual sections please see:www.bc.edu/literaturecore

ENGL109301

An Introduction to Modern Irish I

Cahill, Sean R

Fall 2024

This course continues in second semester as ENGL1094 This course offers beginners an enjoyable introduction to the language and culture of Ireland. We'll learn how to speak Gaelic and read modern Irish texts and poetry. And we'll examine major themes in Irish history and culture associated with the rise and fall of the language over its long history. This course counts towards your Irish Studies minor, and one towards your English major. In the spring semester, you can build on what you've gained and, if you wish, satisfy the Morrissey College of Arts and Sciences language proficiency requirement by completing the four-course cycle the following year.

ENGL118001

Lit Core: From Slavery to Mass Incarceration

DeRosa, Marla C

Fall 2024

This section of Literature Core will focus on narratives that speak to questions of slavery, incarceration, and freedom--both literal and metaphorical. The current pandemic along with the mass demonstrations against systemic racial injustices will provide a particular backdrop and context from which to consider these questions and issues. The course will start with historical and political writings about slavery from the 1800s and the social contexts in which these writings were produced and consumed. We will then move on to historical and contemporary fiction and film that informs and challenges our historical understanding of slavery and the relationship between slavery and our current system of incarceration. Course texts may include Homegoing (Yaa Gaysi), The Narrative of the Life of Frederick Douglass, David Walker's Appeal, Beloved (Toni Morrison), Kindred (Octavia Butler), The Nickel Boys (Colson Whitehead), and Just Mercy (Bryan Stevenson).

ENGL118401

Lit Core: Literature, Testimony, Justice

Harrison-Kahan, Lori

Fall 2024

This section of Literature Core will explore how literary texts bear witness to historical events and address social issues. Through the study of poetry, fiction, drama, and autobiography, we will examine how writers have used a variety of literary genres and forms to transform traumatic memories and the experiences of displacement and oppression into art. Topics include slavery and the Holocaust. Texts may include Herman Melville's Benito Cereno, Narrative of the Life of Frederick Douglass, Toni Morrison's Beloved, Art Spiegelman's Maus, Tommy Orange's There There, and The Laramie Project.

ENGL171201

Roots and Routes: Reading Identity, Migration, and Culture

Graver, Elizabeth

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take ENGL1713 with this course. How does migration in today's world shape questions of identity, borders, and belonging and lead to a reimagining of home? In these paired courses, students will read a range of fiction, nonfiction, and poetry (including spoken word poems) by authors whose migration stories to the United States offer multiple ways to think about what it means to be an outsider and build a new life and home. They will explore their own migration stories, the routes that brought them here, and the ways in which their family roots shape their identities. Some of the questions students will consider include: What are the gifts and challenges of making a home across cultures? Of being multilingual? What do you know, and what don't you know, about your own family's migration story, whether recent or more removed? How might that story intersect with the topics we encounter in our texts? How does the writer Chimamanda Ngozi Adichie's TED Talk on the danger of the single story invite us to ask questions about power, memory, silence, and voice? What does it mean to migrate in a globalized, wired, yet often divided world? Reflection sessions will include an author talk, a museum visit, creative writing, and several shared meals.

ENGL172101

Finding the Animal: Beasts and Boundaries in Literature

Stanton, Robert G

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take PSYC1092 with this course. What is a human and who is an animal? What is a human and who is an animal? Humanism has questionably attributed reason, morality, speech, ritual, and the capacity to imagine future worlds to humans alone. All major philosophies and religions try to separate humans from animals. For instance, in Genesis, God distinguishes Adam and Eve from the beasts, then instructs Adam to name them. Humans still grapple with the ethics of eating, wearing, and experimenting on animals, as well as with understanding how various mental abilities are represented across species. These courses use comparative psychology and literary study to interrogate the blurry and problematic boundaries between human and non-human animals.

Exchange and Values: Stories and Measures of Inequality

Seshadri, Kalpana R

Fall 2024

This is a Complex Problem course and is open to FRESHMEN only. You must take ECON1503 with this course. This course explores inequality through a blend of literature and economics, providing a rich, interdisciplinary perspective. By examining real world cases, literary narratives, and economic data, students will understand different forms of inequality in society. The course is organized around five key themes and includes interactive lectures and labs for in-depth analysis. It is designed to foster critical thinking about social justice, encouraging students to reflect on their values and aspirations in relation to societal inequities. This engaging course aims to deepen students' awareness and understanding of the economic and social aspects of inequality.

ENGL174101

Utopian Imaginings: Literary Texts

Danforth, Deanna M

Fall 2024

This is an Enduring Question course and open to FRESHMEN only. You must take both ENGL1741 and UNAS1736. How do we create a just society? Utopia, a word derived from Greek and literally translating to no place, has, since the sixteenth century, come to mean an ideal, perfect society. While utopias thus may seem to exist only as imaginary spaces, separatist groups throughout history have experimented with turning them into realities, communalizing land and resources. In these paired courses, students will examine the contexts, motivating ideologies, and social structures of a series of these attempts as well as literary texts that spawned and responded to them. Following reflection on the successes and failures of these endeavors as ways of life, social experimentation, and lasting legacies, students will exercise collective imagination in envisioning a just and hopeful future by designing their own utopian communities.

ENGL209703

Intermediate Modern Irish I

Nugent, Joseph G

Fall 2024

This is a continuing course in modern Irish for those with a basic knowledge of the language. We will emphasize the ability to read contemporary literature in various genres. Texts from a variety of authors and historical periods allow students to taste different writing styles: contemporary fiction, journalism, literary criticism, historical and cultural texts, while we enjoy Irish-language short films and videos.

ENGL212501

Introduction to Feminisms

Barko, Emily B

Fall 2024

This course may be used to satisfy one of four electives required within the Communication major. Fulfills Women Writer's requirement for ENGL/LSOE majors. This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race, and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

ENGL215401

Introduction to Adolescent Fiction

Rudner, Bonnie

Fall 2024

First of all, what is a young adult? And second of all, what is a hero? We will be delving into both of these issues, as well as the relationship between them. We will be looking at heroes who function in real worlds and some who function in fantasy worlds. We will attempt to assess the impact of heroes in contemporary life, especially in relation to the young adults who need them. And are there any more heroes for our young adults? In what ways do female heroes differ from male heroes?

ENGL219901

Introduction to Caribbean Writers

Frederick, Rhonda

Fall 2024

The Caribbean, merely viewed through the lens of colonial history, often does not reflect the diversity and complexity of the region. From a colonial perspective, therefore, the Caribbean is both "known" and "unknown." Our work for this course compares and contrasts versions of the region by examining colonial histories and current literary traditions. We will pay particular attention to the ways oppositional cultures and identifies manifest in Caribbean literature. Themes of this course include: colonialism, History/histories, gender, geography ation, sexuality, class, and culture. Varied texts and media will assist in our interpretations of the Caribbean and its diaspora.

ENGL220201

Beast Literature

Polt, Christopher B

Fall 2024

From Aesop's fables to animated films, philosophical dialogues to furry graphic novels, we often imagine animals speaking as humans do. But what are we saying when we use animals to talk with and about one another and ourselves? And what do cultural products featuring articulate beasts say about our attitudes towards humans and animals and the lines that we draw between them? This course examines animal anthropomorphism as a mode of thought and expression in ancient Greece and Rome, Medieval Europe, and the modern world. Please contact Prof. Polt (polt@bc.edu) directly for permission to enroll in this course.

ENGL220301

Introducing Ireland through Stage and Screen

Nugent, Joseph G

Fall 2024

This course will examine and analyze representations of Ireland in the theatre and on the screen up to the present. Tracing depictions of the rural and the urban through the lenses of film makers and dramatists, we'll consider how Irishness was made known to the world through the eyes of the homebound and the diaspora. Cinema subjects will range from the early-twentieth-century silent movies through the works of John Ford to Lenny Abrahamson; theatre will begin with the stereotypes of the nineteenth-century through the renaissance led by the Abbey, to the urgent works of today's young playwrights.

ENGL221001

Madmen, Hysterics, and Criminals: Inventing Deviance

Bowles, Daniel J

Fall 2024

Conducted in English. Counts toward German major, German minor, and German Studies minor.. In this seminar we address three major questions, guided by a broad selection of readings from German, French, British, and American literature and theory from 1800 to the present: How do we as readers define the abnormal and the deviant? What aesthetic practices does literature employ to represent these threshold experiences, and what is their history? How might we rethink our own notions of normality when faced with their artificiality? Literary, theoretical, and musical texts by Balzac, Bernhard, Büchner, Freud, Genet, Kracht, Plath, Stevenson, and others help us establish a history both of abnormality and our own cultural self-understanding.

ENGL222001

Classical Mythology

Eisenfeld, Hanne E

Fall 2024

This course explores the mythology of ancient Greece, Rome, and the Near East within its cultural, political, historical, and religious contexts. You will meet (or renew your acquaintance with) mythical figures like Zeus, Gilgamesh, Medusa, and Helen as they appear in multiple literary genres and other artistic media. In order to analyze and interrogate these myths we will use ancient and modern frameworks for thinking about what mythology is and what it does. What can a myth tell us about the civilization that created, adopted, or adapted it? What do our uses of Classical mythology--and our creations of our own myths--tell us about ourselves?

ENGL224601

Introduction to Asian American Literature

Puente, Lorenzo A

Fall 2024

This course is a broad introduction to Asian American literature, criticism, and culture. This means that we will read at least one book-length work from each of the following ethnic groups: Filipino, Japanese, Chinese, Korean, South Asian, and Vietnamese. Together, the readings provide us with an opportunity to reflect on the long sweep of Asians in America struggling to give expression to their experiences.

Discussion will often touch on many sensitive topics, so I wish to emphasize the importance of keeping an open mind, being respectful of others' opinions, and keeping up with the reading.

The Classics of Literary Journalism

Nanos, Janelle M

Fall 2024

Note to Journalism minors: this course satisfies the requirement for an elective with a craft" orientation. The craft of writing "narrative journalism" requires many of the same storytelling methods used by the world's great fiction writers. But telling true stories comes with its own skill set. In this class, we'll examine the methods used by some of journalism's finest writers to unravel how these stories come to life. This seminar will explore different genres, with a focus on how journalists experiment with reporting techniques, develop a "voice," and use various methods of structuring a story. We'll read the works of writers like Nelly Bly, Joan Dideon, Tom Wolfe, Janet Malcolm, Hunter Thompson, Katherine Boo, Sheri Fink, David Grann, and Eli Saslow.

ENGL227801

American Culture: Engaging Difference and Justice

Harrison-Kahan, Lori

Fall 2024

This course offers an introduction to the interdisciplinary study of American culture with an emphasis on questions of difference, justice, and power. We will concentrate on approaches, methods, and themes of interest as we assemble critical skills for making interpretive arguments about aspects of culture in their historical moment. While assembling a toolkit of interpretive moves we can make on American culture and working to build stronger analyses, we will also consider how American society and culture have been defined by differences of race, class, gender, sexuality, dis/ability, religion, and other socio-cultural categories. We will consider how American Studies scholars have combined theory and praxis in order to expose injustice in the nations past and present; form communities based on principles of inclusion and solidarity; and create just conditions for citizenship and humanity. The materials we analyze will include examples from film, television, music, literature, theater, comics, photography, advertising, among others. Each unit will be organized around a question that generates further questions, analysis, and discussion. The questions include, for instance, Why is Indigenous Studies central to American Studies?, What does visual culture tell us about race in modern America?, and How do we see race and religion after 9/11? During the semester, we will also attend a number of events sponsored by American Studies, AADS, and other interdisciplinary departments, centers, and programs that represent a variety of interests, subjects, and approaches. This course satisfies the university Cultural Diversity requirement. For English majors this course also satisfies the Literature Across Worlds requirement. Note for American Studies Minors: Students can take either ENGL2278 or or ENGL 2277: Introduction to American Studies to satisfy the introductory course requirement. (Students cannot receive credit for both courses.)

ENGL230101

Journalism on Drugs

O'Connor, John

Fall 2024

Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. The biggest public health crisis during the war on drugs was over legal drugs opioids which have killed over a million Americans. Drug policies, driven by irrationality and fear, have ruined countless lives. Journalists, wittingly or not, were partisans in this war, and often (though not always) ahead of the curve in advocating for change with regards to drugs, and to vice more generally. In this class we take a close look at the practice and tradition of drug journalism at a watershed moment in American history. Readings will include works by Chris Kraus, Hunter S. Thompson, Susan Orlean, Lawrence Osborne, Yvonne Adhiambo Owuor, Geoff Dyer, and others.

ENGL247001

Black and Popular: Speculative Fictions by Black Writers

Frederick, Rhonda

Fall 2024

This course asks: what do discussions of contemporary social issues look like when depicted in popular literatures written by writers of African descent? What is the benefit of fictionalizing these issues in genre literatures? Students address these questions by examining the forms of "speculative fictions" (specifically thriller, science fiction/fantasy, and mystery/detective) as well as urban romance to determine how each represents concerns of twentieth/twenty-first century black peoples in the U.S., Canada, Jamaica, and Martinique. Our focus on these genres' explorations of race, class, culture, incest, social engineering, and intimate relationships is complemented by socio-historical studies of these issues and countries.

ENGL248301

Introduction to African American Literature

Curseen, Allison S

Fall 2024

This course surveys African American literature from its early-American beginnings to its present. While different semesters may organize around different motifs, the course endeavors to introduce students to a variety of key periods, players, themes, and conventions in African American literature. In addition to foregrounding a range of literary genres, the course will also highlight other types of relevant historical and cultural texts (ex. music, art, newspaper articles, etc.). The purpose of doing so is to emphasize African American literature as interdisciplinary and inseparable from the history and culture of both a dynamic black diaspora and a diverse and complicated America.

ENGL288001

Advanced Pleasure Reading

Wilwerding, Lauren

Fall 2024

Attitudes toward reading are full of contradictions. Reading can be considered edifying and tawdry, an essential skill and a leisure pursuit, an individual experience and a way to participate in culture and develop empathy. This course will examine these contradictions by taking an intensive, "advanced," look at what makes reading enjoyable, from historical, theoretical, and personal perspectives. Students will have the opportunity to consider large questions like, "Why study literature?" and "What unique types of knowledge can fiction offer?" and to develop personal understanding. What's your identity as a reader? How do you define pleasure reading? What role does it have in your life? Texts may include works by William Thackeray, Salman Rushdie, Toni Morrison, Zadie Smith, and Eleanor Catton, as well as student-selected texts.

Reporting Human Rights

Kahyana, Sylvester Danson

Fall 2024

In this course, we examine different creative forms of human rights reporting and evaluate their effectiveness in communicating the significance of human rights violations. As we do, we will think together about the challenges of reporting on such sensitive matters. To help us appreciate the range of effective reporting, we shall focus on at least one text in the following categories: print journalism, the literary arts, the performing arts, the cinematic arts, the visual arts, and what we shall call the social media arts (for instance, an online exhibition). The course will deploy a range of approaches and assignments, such as lectures, guest lectures by famous human rights scholars/activists, museum visits, and projects.

Uganda and the World: Literature, Culture, and History

Kahyana, Sylvester Danson

Fall 2024

This course examines the literature, and culture of Uganda, a nation whose rich history and cultural production offer a lens through which to explore contemporary global issues. We examine Uganda's interactions with the world with an emphasis on her contribution to world 'projects' (for distance, refugee crises and the war against terror) and debates (for instance, local approaches to combating epidemics, postcoloniality/decoloniality, and sexualities). We shall also examine global imaginaries of Uganda, her responses to these imaginaries, and the evolution and experiences of the Ugandan diaspora. Finally, we will think together about the challenges of discussing Uganda in the global context. The course will deploy a range of approaches and assignments, such as lectures, guest lectures by famous Ugandans and Ugandanists, exhibitions, and projects.

ENGL333801

Americanization and the Rhetorics of Citizenship

Portillo, Vincent

Fall 2024

In this course, we will explore how race, ethnicity and social class influence thinking about normative ideals of citizenship. We will turn our attention toward underrepresented communities including migrants, racialized and gendered individuals and others labeled unfit that have navigated the needs of citizenship, while balancing heritage languages and identities as a foundation of community knowledge and values. Throughout the semester, we will work collaboratively, reading, researching and writing about evolving questions and concerns. At the start of the semester, we will engage shared readings, largely non-fiction, from across disciplines, including American Studies, Disability Studies, and Cultural Rhetorics. These readings will explore the ways in which the individual and national bodies are described rhetorically, with an emphasis on citizenship as a nativist cure for unfit individuals. Next, we will turn to the archives where we will engage a number of primary materials that explore the contribution of marginalized communities to conversations on citizenship with an emphasis on heritage language, as well as community knowledge and values. For a culminating research project, students may seek to intervene in ongoing conversations on citizenship, advocating for the ways in which citizenship may be enacted and embodied within a community of their choice. Potential topics, for example, may include representations of citizenship during BLM protests at public monuments, or voting rights, race and citizenship schools. This course satisfies the Literature Across Worlds requirement for English majors.

Pottroff, Christy L

Fall 2024

Fulfills the pre-1900 requirement. This course considers three landmark nineteenth-century American novels: *The Coquette* (1797), *Moby-Dick* (1851), and *Clotel* (1853) and their relationship to the true stories that drive their plots. Each novel was inspired by a ripped-from-the-headlines event: *The Coquette* is based on the scandalous life and death of Elizabeth Whitman; *Moby-Dick* was inspired by the sinking of the whale ship *Essex*, the most notorious maritime disaster of the nineteenth century; and *Clotel* articulates the relationship between Thomas Jefferson and Sally Hemmings, a woman he enslaved. Before reading the novels, we will first explore primary documents, court transcripts, police reports, diaries, and letters surrounding the historical events. Then, we will read a wide range of contemporary multimedia responses to the events, including newspaper articles, pamphlets, songs, poetry, and short fiction. With a thorough understanding of the events' historical context, we will then read the novel. By situating these novels and historical events within their media landscapes, we will explore the central question of literary studies: what can novels do that other written forms cannot?

ENGL340101

Science Fiction

Kaplan-Maxfield, Thomas

Fall 2024

This is a course on the genre of literature known as "Science Fiction," "SF," or "scifi." Since this is a genre course, we will spend a bit of time discussing the definition of scifi, how there are many definitions that are not agreed upon, and what that tells us about the type of literature. We'll set the genre within the historical context of Enlightenment Rationalism and Romanticism's response to it, early nineteenth century Industrialism and the rise of machines. Class will consist of a bit of lecture followed mainly by discussions of the stories and books, within the terms set out above. We will read stories from Wells and Verne and novels from Asimov to Butler to see what scifi tells us about ourselves and where we are going. Three papers required plus a midterm and final.

ENGL352701

General Linguistics

Geissler, Christopher

Fall 2024

An introduction to linguistics—the scientific study of human language and contemporary linguistic theory. Linguists use mathematical systems (often called formal systems) to develop precise theories that help us understand the rich cognitive processes that support our use of language to communicate, to conduct internal monologues, and much more. The course focuses on the major subfields within linguistics: phonetics, phonology, morphology, syntax, and semantics: how do linguists create and manipulate representations of language phenomena, and how do they analyze linguistic data? Our primary data will be from English, but we will also employ data from other languages. No previous exposure to the field is presupposed.

ENGL381401

The Series: From Victorian Novels to Streaming TV

McAleavey, Maia M

Fall 2024

Fulfills the pre-1900 requirement. This course explores a form popularized in the nineteenth-century but familiar to us today: the series. Most Victorian novels were published in weekly or monthly parts over long stretches of time, and Victorian readers kept track of long novels over a period of years in addition to reading completed works in a single sitting. Serialized television and bingeable shows will help us contextualize the series in our contemporary moment. Cliffhangers, recurring characters, marketing, and the reader and viewers relationship to the fictional world will be some of our objects of study as we look closely at the form of the fictional series across media.

ENGL381501

Normalcy and Deviancy in American Sexualities

Woolsey, Troy A

Fall 2024

Over the last century, an explosion of new sexual orientations has emerged that moves beyond the binary of heterosexual versus homosexual. In this class, we will use American literature and visual media as a cultural grounding to explore how sexual practices become transformed into socially significant identities in American society, and how these identities engage and are shaped by concepts of normalcy and deviancy. Potential novels to be considered include classics of queer literature like Patricia Highsmith's *The Price of Salt* (the basis for the 2015 movie *Carol*), James Baldwin's *Giovanni's Room*, and David Wojnarowicz's memoir *Close to the Knives*, while also more contemporary texts like Jackie Ess's *Darryl*. Films to be considered include the documentary *The Celluloid Closet* (1996) and Jamie Babbit's *But I'm a Cheerleader* (1999).

ENGL381601

Contemporary Women Writers and the Media

Allen, Cassidy L

Fall 2024

Ever since women began publishing, women authors have faced extra scrutiny from literary critics and the media due to their gender. With the rise of social and electronic media, authors and writers are more in the public eye than ever before. What does this mean for contemporary women writers? How does being a woman writer affect social media presence and treatment? This course will examine different cases of women writers and how they intersect with a variety of media (popular critics, academic critics, Twitter, etc.). Students will have the opportunity to consider large questions like "What can literary media tell us about society more broadly?" and "How can the study of literature help address larger social issues and questions?" and develop a sense of how literary media works. Texts may include works by Edna O'Brien, Sally Rooney, and Chimamanda Ngozi Adichie, and a multitude of short reviews, interviews, and articles focused on contemporary women writers.

ENGL381701

Comic Novels from 1700 to the Present

Petracca, Andrew G

Fall 2024

This course fulfills the pre-1900 requirement. In A Christmas Carol, Charles Dickens writes, "there is nothing in the world so irresistibly contagious as laughter and good-humour." What makes humor contagious, and what does this contagion mean for literature? What exactly makes a novel funny? Is a funny novel necessarily a good novel? Why do some types of comedy age better than others? What is the opposite of comedy? In this course, we will consider these questions and many more as we traverse from the satirical brilliance of 18th-century pioneers like Laurence Sterne to the contemporary wit of Zadie Smith. We will seek to foster a nuanced understanding of the comic novel's development, its responsiveness to social dynamics, and its enduring significance within literary history. We will hone critical thinking skills through scholarly discourse, positioning ourselves to appreciate and analyze the diverse forms of humor manifested in enduring literary works. Texts may include works by Laurence Sterne, Jane Austen, Charles Dickens, Flann O'Brien, and Zadie Smith among others.

Fortunes, Failures, and Frauds: Business Stories

Hunt, Aeron P

Fall 2024

Formerly titled: Business Stories: Fortunes, Failures, and Frauds. In our economic, political, and personal lives, business stories exercise an extraordinary influence. This course examines the ways narratives shape commercial life, within ourselves and our communities. Spanning genres and national traditions from the nineteenth century to the present, the course addresses questions of ethics, value, and identity in novels, plays, films, and nonfiction prose. We read texts that focus on recent periods of commercial exuberance and economic crisis, technological innovation and identity-based tension. And we explore how literary arts and film have responded to the powerful ideologies and practices of modern capitalism in both collaborative and critical ways.

Science Writing

Sutton, Sarah C

Fall 2024

From driverless cars to gene therapy to cryptocurrency, the latest scientific and technological breakthroughs promise to transform life as we know it. When science moves from the laboratory, to corporate boardrooms, to news headlines, and into our daily lives, writing is involved in every step along the way. In this course, we will read works created by and about scientists, and explore how science circulates through society via social media and blog posts, traditional media, and government policy making. We'll also examine how companies communicate with the public via press releases, the media, and advertisements. In written and oral assignments, students will practice the skills essential for success in writing about science--researching and reporting, interviewing scientists, pitching new ideas, understanding audience expectations, and clearly communicating essential knowledge. Students will have multiple opportunities to conceive, draft, revise, and complete writing projects tailored to diverse audiences. This course aims to help students understand and explore science writing as a career--including opportunities in media, research labs, university news offices, museums, science and technology focused companies, and many other venues.

How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History

Newmark, Kevin

Fall 2024

Conducted in English: Undergraduate Elective. Cross listed with English and Philosophy "Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatism." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

Environmental Colonialism and Irish Writing, 1600-1900

Taylor, Colleen B

Fall 2024

Fulfills the pre-1900 requirement. This course bridges the theories of the environmental humanities and ecocriticism with the study of Irish literature from 1600 to 1900. We will analyze critical theory of the environment in relation to Irish novels, plays, and poems written during the height of British colonialism in Ireland - by authors like Jonathan Swift, Maria Edgeworth, William Carleton, J.M. Synge, Emily Lawless, and W.B. Yeats. Our readings will cover environmental events and colonial systems, such as the deforestation of Ireland, shipwrecks and rebellions, tenant farming, the Irish Famine, and island ecosystems. We will read Irish literature not just for plot, character, and style, but also for the environmental narratives it contains, exploring how each one illuminates the other.

Writing Workshop: Poetry

Matson, Suzanne M

Fall 2024

The course will provide an introduction to poetry writing as a discipline and craft by encouraging students to practice writing in a variety of modes. Students' own poems, from both open and directed writing assignments, will become the main text for this workshop, in addition to some models provided by the instructor for discussion of prosody and technique. The workshop critiques will focus on strategies for revising early drafts, and a chapbook of finished poems will be due from each student at the end of the semester. No application process.

Writing Workshop: Fiction

Graver, Elizabeth

Fall 2024

Enrollment limited to 15.. This course provides encouragement, practice, and criticism for students seriously interested in writing short fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to others' writing and to expose one's own work to such reactions is an essential prerequisite. Individual conferences with the instructor supplement the workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester. Narrative preferences from the traditional to the experimental are welcome.

Seminar: Scientific Imaginaries in Nineteenth Century British Literature

Vachali, Krithika

Fall 2024

Fulfills the pre-1900 requirement & Seminar requirement. What is the relationship between literature and scientific inquiry in the British empire in the nineteenth century? In this period, scientific disciplines like psychology, geology, botany, bacteriology and more are developed alongside the expansion of the British empire and a growing reading public. In this class, we will look at how writers engaged with the science of their time to produce scientific imaginaries in literature. By engaging with both scientific and literary texts, we will trace how forms of scientific inquiry and literary innovation are mutually constituted and have significant impacts on issues like race, empire, class, gender, sexuality, disability, and more.

American Studies Senior Seminar

Harrison-Kahan, Lori

Fall 2024

This seminar, based on instructor expertise, will focus on particular topics in American Studies.

Credits: 3**Room and Schedule:** Stokes Hall 207S W 09:00AM-11:25AM**Satisfies Core Requirement:** None**Prerequisites:** None**Corequisites:** None**Cross-listed with:** None**Frequency:** Periodically in the Spring**Student Level:** Undergraduate**Comments:** None**Status:** Offered**ENGL601001****Seminar: Shakespeare: Truth and Lies****Crane, Mary T****Fall 2024**

Fulfills the pre-1700 requirement for undergrads. Also fulfills the Seminar requirement. Undergrad/Grad Level: Restricted to Juniors, Seniors, and Graduate Students. Shakespeare lived and wrote at a time when the ideas about what was true, and how to determine what was true, were changing. The Protestant reformation, invention of the printing press, humanist education, exploration and colonialism, and the beginnings of the scientific revolution all motivated people to focus on questions of truth, falsehood, and epistemology. Although newspapers were just beginning to be invented near the end of Shakespeare's life, his plays are obsessed with fake news, how to tell if people are lying, how to figure out what is true. In this course we will read a selection of Shakespeare's comedies, histories, tragedies, and romances with a focus on how truth and lies are represented. We will also consider the history of various conspiracy theories that have tried to establish that William Shakespeare did not write the plays attributed to him.

ENGL601801**Seminar: Intimate Narratives****Tanner, Laura E****Fall 2024**

How does literature invite us into the intimate and sometimes messy emotional dynamics of human relationships? This seminar will explore the depiction of family dynamics and romantic bonds in narratives of the last century, including *To the Lighthouse*, *As I Lay Dying*, *White Noise*, and *Fun Home*. We will consider how intimate relationships are shaped by consumerism, disaster, grief, violence, poverty, race, aging, romantic ideals, and domestic space. In-class presentations will focus on film and television portrayals of family relationships. Final projects will analyze a literary or visual narrative and reimagine its portrayal of intimacy in a short literary or video scene. This seminar is open to juniors and seniors, especially those fascinated by the way that stories probe the depths of human character and shape our assumptions about how we relate to one another.

ENGL603301**Seminar: Eighteenth-Century Prose Fiction****Mitsein, Rebekah K****Fall 2024**

Studies of the novel have sought the genres rise in eighteenth-century Britain when, as one old story goes, a new middle class with time on their hands and money in their pockets developed a sudden taste for literary realism and character interiority. Yet, what we think of as the novel was only a fraction of the eras prose fiction. The literary marketplace proliferated with what booksellers called romances, secret histories, adventures, narratives, and tales moral, oriental, and gothic. Eighteenth-century readers (and writers!) read them all. In this class, we will consider the eighteenth-century novels usual suspects (by Daniel Defoe, Samuel Richardson, Henry Fielding, Laurence Sterne, and Jane Austen) alongside works that challenge the novel as a tidy category (by Penelope Aubin, Eliza Haywood, Sarah Fielding, Samuel Johnson, and Charlotte Lennox). How does broadening the way we understand eighteenth-century reading culture change our ideas about where novels came from, how narrative works, and what fiction can do?

Seminar: Archives in Action

Pauszek, Jessica M

Fall 2024

This course is about archival methods and methodologies in action. We will read exigent work in Writing Studies and Critical Archival Studies to learn about what archival work entails and how it happens how are archives created? Sorted? Indexed? Digitized? And what are the power dynamics associated with these tasks? In other words, we will consider who gets deemed archivable, how, and by whom, and we will explore the sustainability of such work. Students can expect to gain tangible experience exploring multiple archives (both print and digital) in order to see how to build a research project out of this work. The course fulfills the Seminar requirement for undergraduates. The course counts towards the DH certificate for graduate students.

Aesthetics: Philosophy, Politics, Art

Lehman, Robert S

Fall 2024

Fulfills the graduate theory requirement. This course will be a discussion-driven survey of aesthetics--that subdiscipline of critical thought that attempts to answer the fundamental questions of what art is and what role it plays in our lives. Over the course of the semester, we will likely read texts by philosophers and critics including Immanuel Kant, Paul de Man, Arthur Danto, Stanley Cavell, and Jacques Rancire; and we will consider works by writers and visual artists such as Marcel Duchamp, Andy Warhol, Alexander Kluge, and Ben Lerner. Specific topics to be addressed will include: the relationship between subjective and objective claims about beauty; the connection of aesthetic experience to political activity; the challenge of modernism to classical standards of taste; and the so-called end of art. This class should be of interest to students of literature, music, visual art, and philosophy.

ENGL703401

Reading the Past in an Uncertain Present: The Lessons of Early Modern Ireland and the

MACMORRIS DH Project

Palmer, Patricia

Fall 2024

Early modern Ireland is one of the places where modernity is trialled. The extreme violence of the Tudor and Stuart conquest, the settlement of English and Scots in the plantations which followed, the displacement of native elites by an incoming Protestant ascendancy create a template for English/British colonisation in North America and beyond. At the same time, colonial approaches to the land and its resources made Ireland a laboratory for extractive practices which, in time, lead to the Anthropocene. But the fascination of early modern Ireland is that colonial perspectives did not go unchallenged. Irish writers offered very different perspectives on violence, property, the built environment, and the natural world. Those unfamiliar perspectives still have the power to challenge orientations to the world which are as destructive as they are hegemonic. MACMORRIS, a decolonial DH project led by Prof Palmer, brings the work figures like Edmund Spenser, Sir Walter Raleigh, Thomas Herriot together with less familiar voices from early modern Ireland, writing in Irish, Spanish, Latin, and Italian (and available in translation on the website). This course will explore the potential of DH to decolonise the archive and it will explore how that more inclusive and polyphonic record might help us to think not only about the past but the present. For more on the MACMORRIS project, see <https://macmorris.maynoothuniversity.ie/> or listen to Pat Palmer talking about it here: <https://podcasts.apple.com/ie/podcast/history-hub/id464561881?i=1000632037706>

English Language Training for Graduate Level Students: Focus on Writing

Anderson, Lynne C

Fall 2024

Designed for those whose first language is not English, this course offers students practice writing in a range of academic modes including reflection, summary, analysis, and critique. Early in the semester, students will explore the composition process from brainstorming to drafting to revision to editing. Grammar is taught in the context of student writing. Several classes will be devoted to e-mail, reference letter, and proposal writing. Non-credit, offered free of charge by GSAS to its students during the spring. Department permission required. Students who enroll in the course are expected to attend all classes and complete short writing assignments weekly. The course is restricted to students in the Morrissey Graduate School of Arts and Sciences. If space permits, students from other schools will be considered. Admission to the course is by application and permission of the instructor.

ENGL773201

Contemporary Irish Fiction

Smith, James M

Fall 2024

Mary Robinson, in her inaugural speech in 1990, hoped that her presidency of Ireland would "promote the telling of stories, stories of celebration through the arts and stories of conscience and of social justice." Concentrating on contemporary fiction, this course examines the confluence of "stories" representing Irish society since the late-1980s. We will consider the (re)-emergence in the 1990s of the novel as Ireland's dominant cultural form and question what that means in terms of cultural aesthetics. We will examine how the texts represent significant cultural shifts and attempt answers to ongoing cultural questions including: the relationship between tradition and innovation; national identity in an era of globalization; the uses of memory, history, and the past; representations of trauma and survival; economic boom, bust and austerity; the "family cell" and eroding shame; girlhood/toxic masculinity; and gender, sexuality, ethnicity and race in the "new Ireland." Authors include Roddy Doyle, Seamus Deane, Eilis Ní Dhuibhne (Burns Visiting Scholar, F'20), Colum McCann, Colm Tóibín, Anne Enright, Emma Donoghue, Sebastian Barry, Kevin Barry, Eimear McBride, Donal Ryan, Sara Baume, Lisa McInerney, Mike McCormack, Anna Burns, Sally Rooney, and Claire Kilroy.

ENGL778201

Issues and Methods in American Studies

Klein, Christina

Fall 2024

This course offers an introduction to the field of American Studies, which focuses on the interdisciplinary study of American culture. We will read a range of recent scholarship, exploring diverse approaches, methods, and issues of interest. In the process, we will assemble a "tool kit" of critical skills for making interpretive arguments about works of culture in their historical moments. The cultural forms we analyze may include popular fiction, film, music, painting, and material cultures. Students write a research paper on a cultural artifact of their own choosing.

Bodies and Souls: Visions, Mystics, and Medieval Devotion

Stanton, Robert G

Fall 2024

Writings about mystical experience make up the most intense, most emotional, and most controversial genre of medieval literature. Mystics lived inner lives that distinguished them sharply from their fellow humans and outer lives that often threatened the religious and secular institutions of their day. In this course we will read five English mystics: Richard Rolle (d. 1349); Walter Hilton (d. 1396); the anonymous author of *The Cloud of Unknowing*; Julian of Norwich (d. 1414); and Margery Kempe (d. 1440). All texts will be read in Middle English, but no previous knowledge is required.

ENGL888701

Introduction to Advanced Research

Ohi, Kevin J

Fall 2024

This course will acquaint you with the resources to carry out the central tasks of literary scholarship. Bibliography (studying the production, dissemination, collection, location, and identification of literary artifacts and versions) forms the dynamic basis for scholarship and criticism of all kinds, just as critical sensibility guides our choice of what to look for. You will be guided through the reference works and databases in the Boston College library and elsewhere, discuss the goals, purposes, and future of the field of literary studies, explore the phenomenon of digital humanities, and produce an original project based on archival sources.

PhD Seminar: Performance and Representation

Sofer, Andrew

Fall 2024

In this introduction to the interdisciplinary field of Performance Studies (PS), topics may include the politics of representation; performing race/performing gender; performance and performativity; performance ethnography; queer performance; performance historiography; and digital performance. Likely critical readings include Jacques Derrida, J. L. Austin, Judith Butler, Joseph Roach, Diana Taylor, Tina Post, and others. Readings will be paired with one or more cultural performances (play, film, video, performance art, etc.). As well as writing a seminar paper, seminar members are encouraged to apply PS concepts and methods to their own field(s) of interest toward a conference paper or publishable book review.

ENGL101001

First Year Writing Seminar

Dai, Julie G

Spring 2025

Limited to 15 students. Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.

ENGL101025

First Year Writing Seminar

Grasso, Chelsey

Spring 2025

Limited to 15 students. Designed as a workshop in which each student develops a portfolio of personal and academic writing, the seminar follows a semester-long process. Students write and rewrite essays continuously, discuss their works-in-progress in class, and receive feedback during individual and small group conferences with the instructor. Students read a wide range of texts, including various forms of non-fiction prose. In addition to regular conferences, the class meets two hours per week to discuss the writing process, the relationship between reading and writing, conventional and innovative ways of doing research, and evolving drafts of class members.

ENGL107901

Literature Core for Multilingual Students

Bowman Arndt, Megan Jane

Spring 2025

This course, the second half of a year-long sequence of core English courses, is designed for students whose first language is something other than English. It may be taken in place of ENGL 1080: Literature Core and satisfies the literature core requirement. Students will have ample opportunity to participate in group discussions as they explore a variety of literary genres from short fiction to poetry to drama, with a focus on American literature. Support for language issues including those related to writing is an important component of the course. Seats are prioritized for students who have been recommended for targeted language support. Students place into this course based on BC's English Writing Assessment taken during the summer prior to freshmen year or in consultation with the director of the program, lynne.anderson@bc.edu

Credits: 3

ENGL108001

Literature Core

Hunt, Aeron P

Spring 2025

In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres. For course descriptions of the individual sections please see:www.bc.edu/literaturecore

ENGL108003

Literature Core

Pauszek, Jessica M

Spring 2025

In Literature Core, students explore the principal motives which prompt people to read literature: to assemble and assess the shape and values of one's own culture, to discover alternative ways of looking at the world, to gain insight into issues of permanent human importance as well as issues of contemporary urgency, and to enjoy the linguistic and formal satisfactions of literary art. Literature Core will strive to develop the student's capacity to read and write with clarity and engagement, to allow for that dialogue between the past and present we call history, and to provide an introduction to literary genres. For course descriptions of the individual sections please see:www.bc.edu/literaturecore

ENGL109401

An Introduction to Modern Irish II

Cahill, Sean R

Spring 2025

Following on from ENGL1093, this course offers a continuing introduction to the Irish language for American students. This semester we will learn the past, future and imperative tenses. We will examine the history of English and British policy toward the language, up to the controversy over the Irish Language Act today. We will continue to learn songs, and examine simple poetry and drama in Irish. Through this exploration you will enlarge your understanding of the cultural heritage out of which the language emerged, and which is accessible through Irish Gaeilc. Completion of this and Continuing Modern Irish I and II will fulfill the Morrissey College of Arts and Sciences language proficiency requirement.

Credits: 3

ENGL111001

First Year Writing Seminar: From Slavery to Mass Incarceration

DeRosa, Marla C

Spring 2025

Formerly Titled: First Year Writing Seminar: Power, Race and Inequality in the Criminal Justice System. This section of the First-Year Writing Seminar is centered around a book called Just Mercy by Bryan Stevenson. The book focuses on Stevenson's work with the criminal justice system and the organization he founded called the Equal Justice Initiative. The book raises questions about power, race, equality, justice, and the common good within the U.S. legal system for which there are no easy answers. Students will identify one of these issues/questions from the book and delve more deeply into that question. Students will start with an oral history/interview of a person who can shed light on their question from a personal or professional perspective. They will then review the academic research literature on the question and research what the media says about the issue. Finally, students will write and present (to a non-academic audience) an informed argument of their own about how to address issues of power and inequality.

ENGL118401

Lit Core: Literature, Testimony, Justice

Harrison-Kahan, Lori

Spring 2025

This section of Literature Core will explore how literary texts bear witness to historical events and address social issues. Through the study of poetry, fiction, drama, and autobiography, we will examine how writers have used a variety of literary genres and forms to transform traumatic memories and the experiences of displacement and oppression into art. Topics include slavery and the Holocaust. Texts may include Herman Melville's *Benito Cereno*, *Narrative of the Life of Frederick Douglass*, Toni Morrison's *Beloved*, Art Spiegelman's *Maus*, Tommy Orange's *There There*, and *The Laramie Project*.

ENGL118702**Lit Core: Narratives of Slavery****Dept, Dept****Spring 2025**

Featuring film, visual art, and popular fiction, this course explores histories and legacies of slavery in the United States. In addition to looking at how our range of creative forms narrate US slavery, we will consider how creative depictions of the institution allow us to think differently and more critically about the racial and gendered identities defined and refined in US slavery as well as intra-/inter-racial relationships that derive from them. In Narratives of Slavery, students will examine how whiteness and white privilege were defined, then organized to empower and serve the master class; how whiteness as a racial/class category made blackness, and how the resulting power/privilege dynamic is visible in our primary texts, and reflected in our current social and political contexts. By the end of the semester, students will hone the following skills: read and interpret different types of creative narratives, debate and test ideas in class discussion and in written essays, make use of secondary sources to interpret primary narratives, and identify how legacies of slavery manifest in 21st century US. Assignments include short response papers, one longer essay (developed from a response paper), and a take-home midterm exam.

This is an Enduring Question course and is open to FRESHMEN only. You must take both COMM1701 and ENGL1725. What role do literature and popular culture play in shaping our views and decisions about social and political matters? These paired courses investigate different aspects of Disney. In one course, students will explore the history of folk tales and their movement around the world. Source material will include Grimm, Perrault, Anderson, and others, and students will focus on the ways tales have been altered by Disney for their movies. In the other course, students will examine how Disney influences society's view of acceptable and preferable social constructs. By analyzing Disney's media and other cultural products, students will assess the implications and global impact of their persuasive messages.

Crafting Alternative Futures: Imagined Worlds in Literature

Vachali, Krithika

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both COMM2205 and ENGL1739. How can we harness the power of imagination to build alternative societies? These transformative paired courses invite students to explore the power of public imagination as a tool for constructing alternative societies. By working with critical, media, and communication theories alongside literature and film about speculative future worlds, students will interrogate existing systems and envision futures that challenge the status quo. Students will be encouraged to take agency in the process of creating new futures by collaborating on projects and crafting narratives and blueprints for societies that prioritize sustainability, equity, and the common good. Through the course, students will develop the tools to critically examine scholarship and literature in social, political, intellectual, and literary contexts while learning to use persuasion to mobilize communities and take an active role in shaping the future.

ENGL174203

From Charity to Justice: Transforming Approaches to Poverty in Literature

Goel, Gayathri

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both UNAS1737 and ENGL1742. Why does poverty persist and how can we remedy it? In an individualistic society such as ours, poverty is often framed as a personal failing. In these paired courses, however, we will look at some of the systemic factors, notably capitalism, as mechanisms that create and sustain a poorer class of people. We will also consider how poverty complicates narratives of markets as fostering progress and individual freedom. If freedom for some requires the regimentation and exclusion of the many, is it genuine progress? By examining enduring accounts of poverty, we will explore its origins as a mass phenomenon, consequences for civic bonds, and influence on political participation. In addition to making poverty visible, literary texts will also demystify the complex nexus of factors that produce poverty and inhibit true progress. Understanding what causes poverty is the first step in alleviating the suffering of the poor, so that everyone has the right to a life of dignity and fulfillment.

Introduction to Feminisms

Barko, Emily B

Spring 2025

This course may be used to satisfy one of four electives required within the Communication major. Fulfills Women Writer's requirement for ENGL/LSOE majors. This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race, and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

American Literary History I

DeRosa, Marla C

Spring 2025

Students need not take these courses in chronological order. Fulfills the pre-1900 requirement. American Literary History 1 follows the development of American literary history from the landing of the Mayflower to the tumultuous decade of the 1850s, moving from such early writers as Bradstreet, Rowlandson and Taylor through such writers of the Revolution and Early Republic as Equiano, Franklin, and Rowson to such antebellum writers as Child, Thoreau, Hawthorne, Poe, Douglass, Whitman, and Melville. Course assignments include regular participation in class discussions, mid-semester and final examinations, and either one ten-page or two five-page essay(s). Students considering careers in secondary English education will be given the option of writing about approaches to teaching course texts.

ENGL220001

The Underground Press

Ards, Angela

Spring 2025

Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. Note to all students: This course is included in CORE - Engaging Differences and Justice. The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like "The Village Voice" and the Berkeley "Barb" to specialized periodicals representing the Black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

ENGL221201

Introduction to Medical Humanities

Vachali, Krithika

Spring 2025

This course will use contemporary literature as a springboard to consider the psychological, social, ethical, and experiential dimensions of sickness and health. In addition to exploring questions of illness and the body, we will address topics including disability, aging, pregnancy, pain, medical space, illness and culture, and care giving. Through the analysis of novels, poems, short stories and non-fiction, we will consider the way that bodily experiences, material conditions, and cultural constructions of normalcy shape our understanding of identity in sickness and in health.

ENGL222201

Introduction to Creative Writing for Multilingual Students

Anderson, Lynne C

Spring 2025

Are you a speaker of another language (or languages) in addition to English? Have you always wanted to write creatively but never had the time? In this beginning-level creative writing workshop, participants will embark on their own personal, artistic journeys and gain confidence as writers of English. You will consider the languages, family rituals, and stories that have shaped you by writing deeply personal essays and spoken-word poems that explore your identity as a writer and storyteller. You will write weekly, both in and out of class, and learn to listen carefully to your peers and the stories they have to share. We'll discuss your classmates' drafts throughout the semester and you will learn to provide thoughtful feedback to help one another build confidence and find joy in writing. In addition to reading the work of students in our workshop, we'll read texts by multicultural storytellers including Sandra Cisneros, Jhumpa Lahiri, and Chang Rae Lee and explore the way language and cultural rituals shape identity. We will encourage one another to write boldly and freely and be creative with form, looking to spoken word poets, such as G Yamazawa who writes from the lens of the cultural outsider, for inspiration. We'll experiment with language mixing, code-switching, play with sentence structure, and learn to abandon the rules of English grammar in early drafts in order to free ourselves to explore our personal stories more deeply. All levels of writers are encouraged to register.

Telling Truths II: Depth Writing as Service

Rizzuto, Alexis A

Spring 2025

This PULSE elective will focus on the power of story-telling to achieve justice and social liberation. We will read theoretical and narrative accounts of the role of story, examine the use of story-telling among marginal populations as a means of participating in their own solutions. We will explore the benefits and liabilities of social media in emerging change movements. Students will engage in story gathering, telling, and analysis, through their PULSE placements and class discussion, producing a collection of original writings. A four-hour per week (plus travel time) service commitment is a requirement for this course.

ENGL227801

American Culture: Engaging Difference and Justice

Pottroff, Christy L

Spring 2025

This course offers an introduction to the interdisciplinary study of American culture with an emphasis on questions of difference, justice, and power. We will concentrate on approaches, methods, and themes of interest as we assemble critical skills for making interpretive arguments about aspects of culture in their historical moment. While assembling a toolkit of interpretive moves we can make on American culture and working to build stronger analyses, we will also consider how American society and culture have been defined by differences of race, class, gender, sexuality, dis/ability, religion, and other socio-cultural categories. We will consider how American Studies scholars have combined theory and praxis in order to expose injustice in the nations past and present; form communities based on principles of inclusion and solidarity; and create just conditions for citizenship and humanity. The materials we analyze will include examples from film, television, music, literature, theater, comics, photography, advertising, among others. Each unit will be organized around a question that generates further questions, analysis, and discussion. The questions include, for instance, Why is Indigenous Studies central to American Studies?, What does visual culture tell us about race in modern America?, and How do we see race and religion after 9/11? During the semester, we will also attend a number of events sponsored by American Studies, AADS, and other interdisciplinary departments, centers, and programs that represent a variety of interests, subjects, and approaches. This course satisfies the university Cultural Diversity requirement. For English majors this course also satisfies the Literature Across Worlds requirement. Note for American Studies Minors: Students can take either ENGL2278 or or ENGL 2277: Introduction to American Studies to satisfy the introductory course requirement. (Students cannot receive credit for both courses.)

ENGL230101**Journalism on Drugs****O'Connor, John****Spring 2025**

Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. The biggest public health crisis during the war on drugs was over legal drugs opioids which have killed over a million Americans. Drug policies, driven by irrationality and fear, have ruined countless lives. Journalists, wittingly or not, were partisans in this war, and often (though not always) ahead of the curve in advocating for change with regards to drugs, and to vice more generally. In this class we take a close look at the practice and tradition of drug journalism at a watershed moment in American history. Readings will include works by Chris Kraus, Hunter S. Thompson, Susan Orlean, Lawrence Osborne, Yvonne Adhiambo Owuor, Geoff Dyer, and others.

Victorian Abnormalities: Disability and Illness in Victorian Literature and Culture

Clay, Hannah L

Spring 2025

What does it mean to be "normal"? How are sick and disabled bodies constructed as "abnormal"? What are the social and cultural consequences of being abnormal? This course will examine the construction of norms and embodied abnormality in Victorian literature and culture. We will track Victorian literature's engagement with normality and explore how Victorian conceptions of sickness and disability became caught up with concepts of race, gender, criminality, class, sexuality, and morality. Readings will include Bram Stoker's *Dracula*, Charles Dickens's *A Christmas Carol*, William Dodd's *A Narrative of the Experience and Sufferings of William Dodd, a Factory Cripple*, as well as a variety of theoretical texts.

ENGL288401

Queering Shakespeare

Glasgow, Kelley K

Spring 2025

William Shakespeare is more myth than man in today's popular culture, a figure associated with everything from high art to raunchy comedy and countless figures of speech. But placed in his own time, Shakespeare also provides a useful lens through which to examine the fascinating sexual dynamics of the Renaissance world. Cross-dressing, same-sex love, and sexuality in general are all cornerstones of Renaissance literary culture. This course will explore Shakespearean drama, poetry, and culture with the goal of understanding how they interact with the idea of queerness in the Renaissance, as well as how this has informed queer culture in our modern day. To think about these connections, we will read texts such as *Twelfth Night* and *As You Like It*, as well as analyzing films like *Romeo + Juliet* and *She's the Man*. These different types of media will help us understand questions such as: what did queerness look like in Shakespeare's time? And: how has modern queer culture been shaped by the omnipresent literary influence of William Shakespeare?

ENGL288501

London Underworlds, 1750-1900

Tetzlaff, Abigail E

Spring 2025

London is the subject of so many literary works because it houses so many secrets. Some of those secrets are openly visible if we know how to see them; others are hidden away in back alleys, dark rooms, and behind closed doors. In plays, novels, and other cultural materials, we will explore subterranean tunnels and take a literary tour of the East End, among other adventures, as a way to think about how London literature uses secret or deviant spaces (and people it deems deviant) to tell its stories. In addition, we will examine the social and political conditions tied to representing London's underworlds in literature. Does literature hope to solve the problem of deviance in London, or does subversiveness thrive in the interstices between literature and real life? Texts will likely include works by Robert Louis Stevenson, Arthur Morrison, Henry Mayhew, and Margaret Harkness, among others.

ENGL288601

Ecohorror: Terrifying Nature in the Age of Extinction

Goel, Gayathri

Spring 2025

Nature is beautiful but also terrifying. Ecohorror as a genre unravels the existential fear that nature is trying to kill us. How does ecohorror reflect our anxieties about mortality? About climate change? Is nature fighting back after decades of environmental exploitation by humans? We will study literary narratives and popular horror films to explore our fears about nature. Examining ecohorror, thrillers, and mysteries, such as Frankenstein, Mexican Gothic, The Moon of the Crusted Snow, and movies like Snowpiercer, 2012, and The Shape of Water, we will attempt to articulate if horror as a framework offers mere catharsis or a genuine way to mend our relationship with nature -- an act that is urgently needed now more than ever.

ENGL335701

American Bestsellers and Undersellers

Franzino, Jean L

Spring 2025

Focusing on the long nineteenth century, we will consider formative American texts that were wildly popular in their time, as well as others that were overlooked for a variety of historical, social, and aesthetic reasons. We will ask what cultural factors contributed to a books popularity, enduring appeal, or dismissal. We will further explore how these texts confirmed or challenged dominant ideologies, and how reading them now can allow us to reflect on the desires, fears, and struggles of our own historical moment.

Possible texts include: Hannah Webster Fosters *The Coquette*, Benjamin Franklins *Autobiography*, Lydia Maria Childs *Hobomok*, Frederick Douglasss *Narrative of the Life of Frederick Douglass*, Harriet Jacobs *Incidents in the Life of a Slave Girl*, Harriet Wilsons *Our Nig*, Herman Melvilles *Moby Dick*; Harriet Beecher Stowes *Uncle Toms Cabin*, Mark Twains *Adventures of Huckleberry Finn*, and Upton Sinclairs *The Jungle*.

Medieval Arthurian Literature

Stanton, Robert G

Spring 2025

Satisfies Pre-1700 requirement for English.. Myth, legend, and history conspired to make the most popular and enduring set of characters in medieval literature: King Arthur, Guinevere, Machiavellian sorcerer Merlin, lustful Uther, Sirs Gawain, Lancelot, Perceval, and the other Knights of the Round Table. We will dig at the Celtic roots of the Arthurian tales, revel in the golden age of French romance, take a detour to medieval Iceland, and examine the transformative influence the tradition had on the mainstream of English literature. All texts will be read in Modern English translation except the Middle English ones, but no previous Middle English knowledge is required.

Staging the American Family in Theatre and Film

Sofer, Andrew

Spring 2025

What makes an American family? In this course we will study plays and films that stage the American family at key points in its history as we attempt to understand it as an evolving social institution embedded in historical circumstances. We will investigate how family values, together with our very notion of what constitutes a family, have shifted in response to changing social, economic, and sexual mores. Works may include *The Octoroon*; *You Can't Take It With You*; *Long Days Journey Into Night*; *Fences*; and *The Kids Are All Right*.

The Classics of Social Justice Writing

Kahyana, Sylvester Danson

Spring 2025

In this course, we shall examine the classics of social justice writing from different disciplinary perspectives--philosophical, theological, environmental, pedagogical, literary, journalistic, and cinematic--to appreciate core social justice principles and practices across regions and epochs. Using sample texts, we will pay attention to how particular locations have produced unique locutions on the subject, and the challenges of discussing social justice in an increasingly volatile world faced with several crises, for instance global warming, transnational crime, rising totalitarianisms, and contested identities. We will also examine how advances in digital technologies and artificial intelligence are impacting social justice theory and action.

Sporting Rhetorics: Language, Games, and Culture

Portillo, Vincent

Spring 2025

Sports can be one of the most important formative elements in our lives, teaching us individual discipline, the spirit of collaboration, and aspirational goals of excellence. Even more, through sports, we also encounter themes of nationalism, social class, gender, sexuality, history, and so on. Drawing on critical approaches from rhetoric, archival studies, American history, in this class we examine the role of sports in our individual lives and American culture at large. Students will learn key theoretical approaches to the study of sport, games, and play and will engage in a research project on a particular aspect of sports and culture. Learning Objectives include: 1) Students will master theories of sport and sports communication 2) Students will apply those concepts in a research project. The course will also incorporate outside-of-the-classroom activities in and around campus and the City of Boston into the course curriculum.

Writing Workshop: Writing Young Adult Fiction in a Global Context

Kahyana, Sylvester Danson

Spring 2025

In this course, we shall work together to create fiction for young adults in a global context. We will identify the key characteristics of young adult fiction as well as the key issues of global reach that interest young adults and then build fictional stories around them. We will pay attention to elements of a good story like characterization, point of view and setting as we explore myriad plot lines to work with. Drawing inspiration from sample young adult fiction which we will examine in considerable detail, we will create our own fiction (however short it will be) in a workshop environment.

Transatlantic Passages in Eighteenth-Century Literature

Mitsein, Rebekah K

Spring 2025

In 1776, a cartoon was published in England that personifies Britain and America as female combatants, slinging insults at one another as they face off in a fistfight. But their literary relationship was not always so adversarial, even after they parted ways following the American Revolution. In this class, we will examine the ways different kinds of Atlantic crossings shaped Anglophone texts on both sides of the ocean. The reading list may include fiction by Samuel Richardson, Penelope Aubin, and Royall Tyler, life writing by Mary Rowlandson and Mary Prince, and poetry by Phyllis Wheatley and James Grangier. Fulfills EITHER the pre-1900 OR the Race, Blackness, and Language requirement for English majors. Also fulfills the University Cultural Diversity Requirement (under EDJ).

ENGL400401

Boom, Bust, Austerity

Smith, James M

Spring 2025

Ireland, in recent decades, has experienced the highs and lows of globalization and monetary crisis. The Celtic Tiger economy was the "fastest growing ... in Europe" from 1995-2005. Three years later, the country entered recession, ultimately requiring an 85 billion Euro "bailout" from the EU and IMF. Before long, international news outlets lauded Ireland as "the poster-child for implementing austerity programs." Is this the typical trajectory for a postcolonial nation still carving out its economic position in the new Europe and beyond? This course focuses on recent Irish writers who engage these boom and bust years. It considers how literature represents a period of unprecedented economic, social and cultural transformation? It evaluates the creative and/or imaginative arts' contribution to helping a society survive economic austerity? It examines representations of unemployment, emigration, bankruptcy, depression, as well as resiliency, entrepreneurial spirit, and community rebuilding.

ENGL402101

Unrequited Love

Ohi, Kevin J

Spring 2025

Fulfills the pre-1900 requirement. In unrequited love, one confronts, in a deprivation as primal, almost, as hunger, the limits of one's power to shape the world, discovers the radically alien nature of others' desires and minds. This course will explore the many complexities of that painful mismatch, and the ways its unresolved contradictions--one is at once singular and replaceable, for instance, trapped in a place at once fated and contingent--leads one to large, intractable literary and aesthetic questions (character, psychology, social embeddedness, ethics). Readings will include texts from many historical periods, fields, and genres: philosophy, psychoanalysis, novels, poems, opera, film, for example.

ENGL420201

Writing for Health and Medicine

Sutton, Sarah C

Spring 2025

Like most scientists, healthcare practitioners often publish their research in academic journals. However, they also must communicate complex science to the patients they are treating, and often to the public at large. Writing for Health and Medicine is a writing workshop focused on helping students develop the storytelling skills needed to communicate health care, medical, or scientific perspectives and messages to a variety of audiences and through multiple mediums. Over the course of the semester, we will explore a range of writings by physicians and other health care practitioners, and also by patients and journalists. We will cover every step in the writing process, from brainstorming to researching to writing to revising as well as the steps needed to pitch and publish an article or essay. Assignments will include reviews of articles and books, podcasts, social media, op eds, and narrative writing. This course is designed for students who wish to pursue a career in the health and medical fields; however, it is appropriate for anyone with an interest in the health sciences who wishes to improve their writing skills.

ENGL442401

Middle English Alliterative Poetry

Weiskott, Eric B

Spring 2025

Fulfills the pre-1700 requirement. In the fourteenth century, there were two ways of writing poetry in English. Chaucer's rhyming, syllable-counting iambic pentameter exemplifies one tradition. This course makes a survey of the other tradition, known today as alliterative poetry. Among the poems we will read are tales of King Arthur's court, the story of a resurrected corpse discovered in London, and a wild allegorical dream vision starring such characters as Bribery and Truth. We ask how this poetry is formally organized and why medieval English writers chose to use it in a variety of literary genres. No prior knowledge of Middle English required.

Topics in Creative Nonfiction: Writing Mental Health

Roberts, Susan A

Spring 2025

Topics in CNF: Writing Mental Health: "Much madness is divinest sense/to a discerning eye" so begins one of Emily Dickinson's most famous poems. How do writers treat mental health as a subject? What are the issues and questions that arise when contemplating such a large and complex area? In this workshop students will write their own essays in a variety of non-fiction styles (reportage, opinion, profile, narrative, memoir) to address issues of mental health such as mental illness, addiction, neurology and neuropsychology, behavior, and medical history. We'll read short works from a wide selection of writers across disciplines that may include: TaNehisi Coates, Oliver Sacks, Elizabeth Wurtzel, William Styron, Mary Karr, Sigmund Freud, Carl Jung, Alice Miller, Leslie Jamison, and poems of Theodore Roethke, Sylvia Plath and Ted Hughes, documentary, and photographic work of Dior Vargas.

ENGL456201

Marx, Marxism, and Modern Culture

Lehman, Robert S

Spring 2025

This course will introduce students to Marxism, both as a revolutionary practice and as a theory of modern culture. We will start out by spending a couple of weeks familiarizing ourselves with Marx's own writings, getting a handle on some of his most important concepts (e.g., the dialectic, ideology, materialism, the commodity, class struggle, and so on). Then we'll try to answer the question of how Marxism, initially a theory of political economy, became in the twentieth century a means of analyzing culture. Here, we will read critics and theorists including Walter Benjamin, Fredric Jameson, Slavoj Žižek, Silvia Federici, and Walter Benn Michaels. Along the way, we'll test Marxism's claims by looking at works of literature (Kafka, Brecht), film (Eisenstein, Godard), and painting (Surrealism, Pop Art). This class should be of interest to students of literature, visual art, and philosophy.

ENGL456301

Black Memoir Matters

Ards, Angela

Spring 2025

This course explores what an engagement with life writing by black Americans teaches us about the United States and its quest for democracy. We will situate contemporary writers within a larger literary tradition, beginning with James Baldwin's *The Fire Next Time*, a quintessential civil rights movement text, followed by *Between the World & Me* by Ta-Nehisi Coates, whom Nobel laureate Toni Morrison called the Baldwin of the Black Lives Matter era. We will also consider how various forms of memoir--as open letter (Imani Perry's *Breathe* and Kiese Laymon's *Heavy*), as interconnected essays (Emily Bernard's *Black Is the Body*), as literary criticism (Farah Jasmine Griffin's *Read Until You Understand*) meditate upon fundamental questions of citizenship, truth-telling, and fullest human blossoming. Note: Students who have taken the Seminar version of this course (ENGL 6036) may not take this version of the course.

ENGL456401

Race in the Renaissance: Spenser, Marlowe, Milton

Yargo, John

Spring 2025

This course investigates the rich, sometimes-hostile, sometimes-appreciative relationship between critical race theory and early modern poetry. Early modern poetry has been a key resource for historicizing the contingent, fitful development of race-thinking in English culture and language, even as the mythology of the "Renaissance" has been leveraged to reinforce racial inequities throughout the English-speaking world since the seventeenth century. This course focuses on three poets: Edmund Spenser, Christopher Marlowe, and John Milton who worked in a range of forms (epic, lyric, elegy, sonnet) and wrote extensively on contemporary politics, education, culture, and society. Although these authors did not often write about race, their literary works shaped the language and narratives around racial similarity and difference that we continue to live with in 2025. Over the course of the semester, we will read premodern critical race studies and twentieth and twenty-first century critical race theory, exploring how this scholarship can inform our interpretation of Milton's *Paradise Lost*, Marlowe's *Hero and Leander*, and Spenser's *Faerie Queene*. Note: The course satisfies EITHER the pre-1700 or the Race, Blackness and Language requirement for English majors

Writing Workshop: Fiction

Boucher, Christopher G

Spring 2025

Enrollment limited to 15.. This course provides encouragement, practice, and criticism for students seriously interested in writing short fiction. The workshop format demands self-motivation and universal participation. Since students' stories are texts for class discussion, a generous willingness to respond to others' writing and to expose one's own work to such reactions is an essential prerequisite. Individual conferences with the instructor supplement the workshop discussions. Students are expected to produce a steady stream of new and revised fiction throughout the semester. Narrative preferences from the traditional to the experimental are welcome.

Capstone: Into the Woods

Rudner, Bonnie

Spring 2025

All readers, young and old, share the wonder in fairy tales. This serves a deeper purpose: to experiment and learn our boundaries and responsibilities. There are dangers in woods, but Red Riding Hood learns a lot, frees herself, and embarks upon life. The symbolic journey into the woods allows seniors to leaves the "woods of BC" with optimism and commitment. How will you negotiate transitions into society with the wisdom from your journey here?

ENGL491701

Advanced Poetry Workshop

Matson, Suzanne M

Spring 2025

Admission to this course is by permission of the instructor. Graduate/Undergraduate Level. Restricted to Graduate Students, Seniors, Juniors and Sophomores. This is a workshop for those who already have some experience writing poetry, and who wish to work intensively on matters of craft and revision. Students will produce roughly two poems a week, responding to each others drafts in workshop discussion. Though the bulk of class discussion will be about student writing, some class time will be devoted to a discussion of useful models and what they can teach us about strategy and craft. Short in-class exercises will be given weekly as prompts to begin the writing process. In ongoing consultation with the instructor about which poets might interest them most, students will devise their own reading list of contemporary poets and keep a response journal. In at least two half-hour conferences over the semester, each student will be given individual feedback on revisions. The final project will be a chapbook of at least 12 revised poems produced over the semester, culled from around 25 drafts produced in and out of class. Admission is by writing sample. Please email the instructor for application instructions.

Seminar: Welty and Faulkner: Style and the Conflictual Histories of America and the South

Ohi, Kevin J

Spring 2025

Eudora Welty and William Faulkner were born in Mississippi just over a decade apart. In readings of their major texts, we will explore the formal and stylistic complexities of writers who, inimitably local in subject matter, paint the South, and beyond it, America itself, with unsparing rigor. Few writers are as lucid about the fractures of the nations bloody and conflictual history; few writers are more illuminating, even in their obfuscations, about categories such as race, class, and gender. We will attempt to do justice to the conceptual challenges and stylistic beauty of two of the twentieth century's greatest writers.

Capstone: Love and Indoctrination

Kaplan-Maxfield, Thomas

Spring 2025

Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Seniors only. In our world of political spin and fake news, the surveillance state and social media, the pressure to separate what's real and valuable from what's fake and mere propaganda (another way of saying lies) is paramount, and critical for figuring out how to live, practically, spiritually, intellectually and psychologically. In George Orwell's 1984, the affair of Winston Smith and Julia threatens the entire structure of Big Brother. Why? What is it about love that threatens large systems based on indoctrination? In this course we will explore and develop working definitions of both love and indoctrination in order to differentiate them.

ENGL552201

Capstone: Creativity and Self

Roberts, Susan A

Spring 2025

Capstone classes are for seniors only and may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. Creativity is the act of bringing that which does not exist into existence, of bringing forward that which has previously never lived. It is the remarkable experience of bringing something out of nothing. In order to bring something new into the world, you must be willing to go into the unknown. Just as the poet might listen inwardly and stay open for the next word and just as the artist might pay attention to the images that arise from within, creativity asks that we have one foot in what is known, or existence, and one foot in what is not-known, or non-existence. This requires an ability to be still, to look both inward and outward, and then to record the resulting art-making or in life. In this Capstone course, students will attend to two areas: the meaning of art and mindfulness, and their own history of making (or lack thereof) and how they would like to build artistic sensibility, creativity and creation into their lives. We will investigate the spiritual roots of creativity, and the ways in which creativity and appreciation of art and art-making can contribute meaningfully to the development of one as a full citizen of the world. You do not have to have any experience in art-making to take this course. Texts include: Creativity: Where the Divine and Human Meet, by Matthew Fox and Art and Fear: Observations on the Perils (and Rewards) of Artmaking, by David Bayles and Ted Orland, Start Where You Are: A Journal for Self-Exploration, by Meera Lee Patel (you should write in this every week; you'll be presenting it in your "exit interview" at semester's end)

Topics in Creative Non-Fiction (CNF): Writing Place

Matson, Suzanne M

Spring 2025

Through the reading and writing of creative nonfiction essays, we will use place as a lens through which to explore the human relationship to natural and built environments, as well as to ideas of home, travel, exile, place and displacement in our complex contemporary world. Students will write three essays (Home/Insider Essay; Place/Displacement Essay; Reported Place Profile) over the course of the semester and extensively revise and polish two of them. Readings may include work by Wendell Berry, Joan Didion, Ocean Vuong, Anne Dillard, Sarah Broom, Terry Tempest Williams, Natasha Tretheway, Rick Bass, Elizabeth Kolbert, John Seabrook, Carlo Rotella, Robin Wall Kimmerer, and Jamaica Kincaid. Admission to this course is by permission of the instructor. Graduate/Undergraduate Level. Restricted to Graduate Students, Seniors, Juniors and Sophomores. Students should send up to 8 double-spaced pages of creative writing or place-based journalism to <suzanne.matson@bc.edu>by 11/6/24. Ideally, the writing sample will be nonfiction, but if your strongest writing is in fiction, poetry or drama, that is also acceptable. Include your email address. Late applications will be considered on a rolling basis as space permits.

ENGL602501

Seminar: Race, Place, and Black Atlanta

Curseen, Allison S

Spring 2025

From Booker T. Washington and W.E.B. Du Bois to OutKast and Donald Glover's hit series, Atlanta is an enduring geographic/political site of black cultural imagining. Nevertheless the city often receives second or third billing in courses examining black literary and cultural production. While acknowledging the networks between Atlanta and more frequently highlighted places like New York and Paris, this course posits Atlanta as a rich geographic, cultural, and political site from which we can trace, if not also reimagine, a history of reading the complex relationship between race and blackness in the U.S. Paying particular attention to issues of gender, body, and mobility, the course will foreground a diversity of texts across mediums, genre, and time. This class is designed as a hybrid graduate/undergraduate course. To that end it will include different tracks for the final project. Students taking the course at the graduate level will be responsible for composing at least one position paper based on a critical secondary text and facilitating a class discussion around that paper. Fulfills BOTH the Seminar and the Race, Blackness, and Language requirements for English majors.

ENGL604101

Seminar: Game of Thrones: Medieval English Political Poetry

Weiskott, Eric B

Spring 2025

Before House Stark and House Lannister came the House of York and the House of Lancaster. The fourteenth and fifteenth centuries in England witnessed a series of social and political upheavals, from the Black Death and the Peasants Revolt to the Wars of the Roses. English poetry responds to and intervenes in these events. Political writing influenced the decisions of kings, shaped public perception of national politics, and landed people in prison (or worse). This course makes a survey of political poetry from England, 1300-1500, with focus on William Langland's *Piers Plowman* and the poetry of John Gower. We read canonical authors such as Chaucer, Gower, and Langland alongside little-known texts from manuscript archives. Topics include multilingualism, the relationship between literature and politics, and the histories of poetic forms. No prior knowledge of Middle English required. Gower's French and Latin poetry is read in translation. Note: Students may not receive credit for both this course and the graduate version, ENGL 7003 *Game of Thrones*

ENGL630701

Seminar: Literature and Contagion

Boesky, Amy

Spring 2025

This seminar explores the representation of contagion through a cluster of novels and essays from the 17th century to the present. Our focus is not on individual illness/suffering, but instead on wider issues evoked by illness on a large (even massive) scale prior to and after Covid-19. How do issues of class, ethnicity, gender, political or national affiliation impact the way we understand these issues? How do borders and affiliations get drawn through imagining (and curtailing) epidemics? Literary texts depict contagion in ways that can confirm as well as challenge historical and sociological studies. Our focus is on the literary; we will explore the heroes and anti-heroes of plague narratives; the relationship these texts draw between emerging states and individuals around questions of disease; the rise (and limits) to biopower; and the survival of humanity after pandemic in recent science fiction.

ENGL630801

Seminar: Yeats: Work, Thoughts, Contexts

Howes, Marjorie E

Spring 2025

W. B. Yeats, who won the Nobel Prize for Literature in 1923, was arguably the most important Irish poet ever to write in English. This course will include Yeats as a dramatist, a prose writer, and a thinker, but the major emphasis will be on his poetry. We will consider his work in its various social, political, and historical contexts, which include the cultural nationalism of the Irish Literary Revival, the Easter Rising of 1916, the Anglo-Irish War, the establishment of the Irish Free State in 1922, and the political turmoil as the Europe of the 1930s moved towards war. We will also engage with a range of contemporary scholarship on Yeats.

Experimental Writing for Scholars

Rotella, Carlo

Spring 2025

Research and the field knowledge doesn't always have to lead to writing the usual scholarly papers and articles. In this workshop-style graduate seminar, we try out alternative forms presented by journalism, the essay, and other traditions: magazine feature, op-ed, interview, explainer piece, reported essay, memoir, obituary, digital forms, and more. Our objective is to expand our writerly repertoires and audiences. We write and workshop every week, and analyze examples of the genres we study. We also have class visits from colleagues who offer their own perspective on the rich variety of forms available to the experimentally ambitious scholarly writer.

Inhabiting Narrative

Tanner, Laura E

Spring 2025

This class will explore the way that different narrative forms, including the novel, the short story, film, photography and graphic memoir, capture the rhythms of consciousness, emotion, habit, spatial orientation and embodiment. Focusing on the tension between everyday experience and heightened moments of crisis or insight, we will consider how narrative captures the elusive and complex dynamics of embodied subjectivity through voice, image and form. We will focus on narratives of the last century, including literature by Faulkner, Hemingway, Morrison, Robinson, and DeLillo, films including *Lost in Translation*, *Rachel Getting Married* and *What Maisie Knew*, and photography collections by Shelburne Thurber, Nicholas Nixon and Andrew Moore. We will contextualize these works with snippets of narrative theory, phenomenology, and everyday life theory.

Ireland and the Blue Humanities

Taylor, Colleen B

Spring 2025

In the wake of the environmental turn in the humanities, the blue or oceanic humanities is drawing increased attention from critics. This course introduces theories of the blue humanities by writers such as Steve Mentz, Melody Jue, and Astrida Neimanis alongside the study of Irelands island literary culture. Together, we will delve into this very new field of the blue humanities and learn its lessons about human humility, oceanic intelligence, and environmental crisis. At the same time, we will read Irish writing about the sea and consider its relationship to colonialism and imperial ideology. Primary texts include Swifts *Gullivers Travels*, Harriet Martineaus *Ireland*, Emily Lawlesss *Grania*, J.M. Synges *Riders to the Sea*, and John Banvilles *The Sea*. Satisfies the MA Theory requirement.

Historical Fiction

McAleavey, Maia M

Spring 2025

What is at stake in reimagining history through fiction? In this course, we consider the development of historical fiction from the eighteenth century to the present. We will investigate important settings for historical novels, likely including: the Middle Ages as seen through Arthurian legend, the Jacobite uprisings in the Scottish Highlands, the French Revolution, and American slavery. Topics will include: the claims of realism and the powers of fantasy, the relationship of space to time, the rise of nationalism, and the power of fiction itself to shape history. Theories of genre, historicism, and historiography will guide our conversation.

ENGL703701

Zizek

Restuccia, Frances

Spring 2025

This graduate course will focus on major works of Slavoj Zizek, from *Looking Awry* (in which he offers a very useful way of distinguishing between modernism and postmodernism, through their relation to the Real) to his most recent book *Christian Atheism: How to Be a Real Materialist* (in which he concentrates on the meaning of Christ on the cross, sacrifice, Buddhism, quantum mechanics, Antigone, Ukraine, true dialectical materialism, etc.). We will also take up *The Sublime Object of Ideology*, *Sex and the Failed Absolute*, along with at least excerpts from many other works. Given that Zizek considers himself a Marxist Hegelian as well as a Lacanian, we will also study works that will help us understand his philosophical/psychoanalytic bases. There is no need for students to have prior knowledge of such material. The course will be a solid introduction to Lacanian theory read awry through the lens of Zizek, who has evolved into a psychoanalytic theorist and philosopher in his own right; he has brought psychoanalysis into the socio-political realm as well as famously shown how to read film and popular culture psychoanalytically.

English Language Training for Graduate Level Students: Focus on Speech and Presentation Skills

Dept, Dept

Spring 2025

Designed for students whose first language is not English, this course will emphasize the oral/aural language skills required for success in graduate work. It will provide students the opportunity to hone their speaking and listening skills through group discussions, presentations, and targeted practice in pronunciation, stress, and intonation through the reading of poetry and tongue twisters. The course may be particularly beneficial to those with teaching responsibilities at BC. Non-credit and offered free of charge by GSAS to its students during the fall semester. Students who enroll in the course are expected to attend all classes throughout the semester. The course is restricted to students in the Morrissey Graduate School of Arts and Sciences. If space permits, students from other schools will be considered. Admission to the course is by application and permission of the instructor.

ENGL775301

Reading Jacques Derrida

Newmark, Kevin

Spring 2025

This course will examine some of the fundamental ways that the work of Jacques Derrida has contributed to altering the context in which the humanities can be understood and studied within the modern university. It will take examples from Derrida's repeated interventions in such disciplines as literature, philosophy, theology, and history. By situating Derrida's work at the margins where accepted demarcations between the disciplines begin to blur, the course will suggest new possibilities for conducting interdisciplinary work in the future.

Capstone: Digital Humanities as Public Scholarship

LoPiano, Antonio

Spring 2025

Many schools across the United States teach different versions of survey classes for which instructors have to reach outside their own focuses. To do so, those instructors often search for visualizations of historical change, literary development, and examinations of religious networks, depending on the field and course. In this capstone, graduate students will develop projects within their areas of specializations to produce digestible digital exhibits, visualizations, and more that can be made freely available to scholars across the world. The goal would be to promote the free exchange of high quality information and digital sources available in the public domain. Furthermore, through the capstone, students should understand the process of a project from conception to presentation. They should have developed skills engaging metadata, transcription, the process of digitization, and more. Students can bring their own research data from their dissertation project or from previous coursework, or they can be provided with a historical or literary dataset from the Boston College Libraries to utilize over the semester. There are four phases to the class, beginning with performing an environmental scan and writing a proposal for their project. In Phase II and III, students will implement and carry out their projects. Finally in Phase IV, students will engage in peer consulting and prepare their work for online publication.

Composition Theory and the Teaching of Writing

Mathieu, Paula

Spring 2025

This course is designed to (1) prepare graduate students to teach introductory, college-level writing courses; (2) introduce students to central issues, problems, and theories in composition studies; and (3) encourage students to examine the interanimating relationship between critical theory, practical writing experience, and the teaching of Composition/Rhetoric. Though the emphasis is on central, nuts-and-bolts tasks in the teaching of writing (e.g., designing assignments; responding to student essays; selecting texts for discussion; etc.), this is not a prescriptive "how to" course; students are asked to consider pedagogical issues and choices in composition studies from a variety of personal and theoretical perspectives.

PhD Seminar: Tripping the Dark Fantastic: African Diaspora in/and Genre Fictions

Frederick, Rhonda

Spring 2025

Refracted through the lens of popular fiction written by black writers, we will journey through the field of African Diaspora Studies (ADS) to explore a variety of thematic preoccupations. Tripping the Dark Fantastic asks: what do contemporary discussions of identities, race, gender, class, place, and diaspora look like when depicted in popular literature written by black writers? What critical work can readers do with these extra-literary themes imagined in popular fiction? We address this question by examining contemporary genre literatures specifically horror, science fiction, fantasy, thriller, detective/mystery, as well as urban romances to determine how each form represents concerns of 20th/21st century black peoples in Africa, the Caribbean, US, and Canada. Our focus on these literatures explorations of ADS concerns is complemented by historical and sociological studies of these countries. This class explores social, historical, creative, and ADS themes depicted in works by Steven Barnes (US, thriller), Patrick Chamoiseau (Martinique, police procedural), Colin Channer (Jamaican, urban romance), Tananarive Due (US, horror/mystery), Nalo Hopkinson (Canadian, sci-fi/fantasy), NK Jemisin (US, epic fantasy), Barbara Neely (US, mystery), and Nnedi Okorafor (Nigerian-American, science fiction).

Ideas and Practices in Environmental Studies

Burns, Jennifer L

Fall 2024

An introduction to the history, ideas, and practices of the field of environmental studies for new ENVS majors. This interactive course will draw on cross- and inter-disciplinary perspectives from the natural sciences, social sciences, and humanities to explore different ways of thinking about complex environmental topics. Case studies of contemporary environmental challenges will be paired with discussion of significant texts within the field to showcase how our understanding of the environment and our relationship to it - is always evolving.

This Land is Your Land: U. S. Environmental History

Valencius, Conevery B

Fall 2024

Fulfills the US History requirement for Majors How have different environments, places, and resources shaped American history? We will survey main themes and events in the environmental history of the United States. We move from colonial-era differences in land use through contemporary environmental debates. We ask how American communities have used, defined, and fought over places and natural resources, from bison herds to nuclear stockpiles. We investigate intriguing aspects of our local Massachusetts environment: the Emerald Necklace of parks, the brass hoof prints of Harvard Square, even our nearby reservoir. No background in history is necessary to thrive in this class. Students in the sciences are welcome.

The State of Affordable Housing in the States

Price, David W

Fall 2024

Course offered for Sophomores only.. How does housing affect the lives of Americans? Where you live determines your access to schools, quality of healthcare, fresh food, clean air, parks and recreation, affordable credit, and even how long you are likely to live. This course explores concepts of housing policy and planning at the national, state, and local levels. It examines programs and policies used to subsidize housing for millions of Americans and help them gain access to a decent place to live. Topics will be considered from multiple perspectives including housing finance, design, community planning, inequality, operations management, and sustainability. We will explore the historical and economic context of U.S. housing and discuss the barriers that low-income families face that affects their access to decent housing. The course will be divided into three sections: history, policies, and today's issues. Students will explore some of the most recently developed programs and how they fit into effective community revitalization. These programs will be evaluated in class discussions and group presentations.

Ecologies of Power

Swann-Quinn, Jesse

Fall 2024

An exploration of intersections between power and our environments. Political ecology applies social and political theory, culturally-informed methods, and social justice commitments to better understand complex nature-society entanglements. Students apply multiple social science lenses, including political economy, geography, anthropology, and history, to better understand how our relations with the material world shape broader systems and networks of power. Together we read, discuss, and engage in project-based learning to explore challenging cases both international and domestic. Topics include the political dimensions of resource management, food systems, post-colonial environments, industrial and chemical ecologies, wildlife conservation, and international development, among others.

Environment and Public Health

Garrett, Kimberly

Fall 2024

This course is designed as a seminar to give students an introduction to the field of environmental public health. The course will explore current and fundamental literature of environmental health (EH) science. We will also discuss the disproportionate burden of EH problems on vulnerable communities in the U.S. and around the world. Major topics will include air and water pollution, global sanitation and waste, toxicology, pesticides, food security, and climate change. The course has a strong emphasis on environmental justice and on the global health impacts of our environmental footprints. Students will learn about the debates and issues foregrounding the need to view ecology and human society as a whole in order to understand and prepare for these changes. The course emphasizes evidence-based approaches for arriving at program strategies and policy recommendations to improve environment health response for the most vulnerable. A significant thrust of the course will be to enable students to think of policy and programmatic approaches to communities vulnerable to environmental and climate variability.

Wildlife and Society

Kurz, David

Fall 2024

This course focuses on the profound, multi-layered relationships between humans and wildlife. For millennia and across the globe, human societies and wildlife have been linked through contexts such as hunting and fishing, cultural practices and inspiration, and environmental management. In this class, we will explore how these links have endured, and how human-wildlife relationships are shifting in a complex, rapidly changing world. We will explore topics such as Indigenous stewardship, hunting and fisheries regulation, predator reintroductions, human-wildlife conflict, wildlife & art, urban ecology, international policy agreements, and environmental values. Through discussions and assignments, students will apply principles in support of thriving, resilient social-ecological systems.

Sustainable Cities

Bolin, Jessica L

Fall 2024

About 4.2 billion people around the world live in cities today, with this figure expected to double by 2050. Improvement of the urban environment is therefore crucial to a sustainable planetary future. In this course, students will examine current best practices for urban sustainability and resilience in areas such as restoration of watershed health, mitigation of air pollution and soil toxicity, management of solid waste, reduction of the urban heat island effect, improvement of mass transit and infrastructure, support of urban agriculture alongside a variety of other environmental justice efforts, and preparation for sea level rise, extreme weather events, and rising temperatures.

Seminar in Environmental Law

Fowley, Jeffry T

Fall 2024

This is a seminar intended for undergraduates (both pre-law and non pre-law) interested in environmental law and policy. It covers selected topics in depth and thus is a good supplement to the introductory Environmental Law and Policy course, although the introductory course is not a required pre-requisite. Topics covered include: (1) the Clean Water Act and the Boston Harbor cleanup; (2) the RCRA hazardous waste regulations (3) contaminated (both superfund and brownfield) site cleanups; and (4) sustainability/toxic use reduction efforts by businesses. This course will emphasize the practical aspects of environmental law and policy including learning how to read and understand environmental regulations and permits, and will include several written exercises (in lieu of exams). This course is open to seniors and juniors. Sophomores may be admitted, but only with the permission of the instructor.

ENVS356201

Environmental Sociology I

DiDonato, Sandra J

Fall 2024

This is an upper-division seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of empirical research that are national, international, and global in scope, and with particular attention given to how large-scale social institutions and organizational forms impact the environment. We will focus on the social dimensions of environmental impacts, the anthropogenic drivers of environmental impacts, and sociological research on solutions to environmental crises. A key takeaway of the course is the necessity in taking a structural approach to the study of socioenvironmental relationships. Attention will also be given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science. The course is required for all Environmental Studies majors.

Seminar: Scientific Imaginaries in Nineteenth Century British Literature

Vachali, Krithika

Fall 2024

Fulfills the pre-1900 requirement & Seminar requirement. What is the relationship between literature and scientific inquiry in the British empire in the nineteenth century? In this period, scientific disciplines like psychology, geology, botany, bacteriology and more are developed alongside the expansion of the British empire and a growing reading public. In this class, we will look at how writers engaged with the science of their time to produce scientific imaginaries in literature. By engaging with both scientific and literary texts, we will trace how forms of scientific inquiry and literary innovation are mutually constituted and have significant impacts on issues like race, empire, class, gender, sexuality, disability, and more.

History of Scientific Illustration

Wunsch, Oliver M

Fall 2024

What role do images play in the production of scientific knowledge? This course explores the different ways artists, scientists, and philosophers have answered this question from the Scientific Revolution to the present. We will adopt a broad definition of scientific illustration, looking at examples that range from seventeenth-century paintings of monstrous oddities to twenty-first-century brain scans. Major topics will include the relationship between art and science, the aesthetics of the diagram, the concept of visual objectivity, and the history of data visualization. We will examine the use and abuse of images in scientific rhetoric, from the visual foundations of scientific racism to contemporary depictions of climate change. Through historical case studies, students will learn how aesthetic conventions and design innovations have been used to manipulate information. By the end of the semester, students will have the ability to interpret images with a more discerning eye, critically analyzing how knowledge is constructed through representation.

Environmental Studies Courses: Spring 2025

ENVS173701

The Just City: Understanding Environmental Problems and Solutions

Humphries, Courtney

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both HIST1722 and ENVS1737. How can we create just cities? In an urbanizing world, contemporary cities are characterized by the production and reproduction of social and environmental inequalities. While cities are uneven landscapes, they are also laboratories for social and environmental justice. But how do urban inequalities work? What makes a more just city? These paired courses investigate these questions from social, global, and environmental perspectives. We will discuss how city-building and suburbanization are mediated through natural resources and infrastructural systems that shape structures of race, ethnicity, gender, class, and age. Students will cultivate their own interdisciplinary frameworks of social and environmental justice as a step toward becoming informed global citizens.

ENVS173702**The Just City: Understanding Environmental Problems and Solutions****Humphries, Courtney****Spring 2025**

This is an Enduring Question course and is open to FRESHMEN only. You must take both HIST1722 and ENVS1737. How can we create just cities? In an urbanizing world, contemporary cities are characterized by the production and reproduction of social and environmental inequalities. While cities are uneven landscapes, they are also laboratories for social and environmental justice. But how do urban inequalities work? What makes a more just city? These paired courses investigate these questions from social, global, and environmental perspectives. We will discuss how city-building and suburbanization are mediated through natural resources and infrastructural systems that shape structures of race, ethnicity, gender, class, and age. Students will cultivate their own interdisciplinary frameworks of social and environmental justice as a step toward becoming informed global citizens.

ENVS223001

Geographies of Nature and the Environment

Getzoff, Joseph

Spring 2025

The study of the environment is urgently important in an era of global climatic change. Geography and other social sciences have long offered critical ways to understand the entangled relationship of humans and their physical environment. This course is an introduction to the many ways to think critically about this relationship, drawing from a robust body of scholarly debate. The course will engage with many topics that explore the significance of the environment in relation to human societies: we will look at the construction of nature as a foundational idea in human cultures, the intersection of economies and ecologies, the histories and legacies of colonial environments, political ecology and conflicts over resources, the shaping of the non-human animal, the science and politics of climate change, and engage with critical questions of environmental justice in an ever changing and globalized world. We will not focus on any one region, instead opting for a global survey of cases that will allow us to critically interrogate the meaning of nature and the environment in relation to human societies past, present, and future.

ENVS224101

U.S. Partisanship and Climate Policy

Kurz, David

Spring 2025

Most Americans from both major political parties believe in climate change, yet bipartisan climate action is fairly uncommon why? To understand how we got here, this interactive class will explore partisanship, climate policy delay, and the history of the environmental movement in the United States. Students will then apply this knowledge to analyze legislation and advocate for bipartisan climate solutions amidst a bitterly divided socio-political environment. Seminar-style policy discussions will cover topics such as renewable energy, emissions cuts, infrastructure, terrestrial and marine conservation, and other current U.S. climate policy challenges.

Environmental Law and Policy

McLaughlin, Kevin H;Tierney, Michael P;Welsh, Tyler H

Spring 2025

This is the introductory survey course for undergraduates interested in environmental law and policy, including both pre-law and non-pre-law students. The course is team taught by law students, under the supervision of BC Law Professor Jeffry Fowley. Several sections of this course are offered each spring term. The course covers the major environmental protection areas, and current issues, such as air and water pollution, climate change, regulation of toxic wastes, cleanup of contaminated sites, environmental justice, and ecosystem and endangered species protections. It also introduces students to the American legal system by covering a range of environmental legal actions, including both common law lawsuits by private persons, and governmental regulation and enforcement under the major environmental statutes.

Health and the Environment: People, Policy and Technology

Severnini, Edson R

Spring 2025

This course examines the relationship between health and the environment, focusing on how pollution, climate change, and ecosystem changes influence human health. Students will learn how these environmental factors impact public health and explore the roles of public response, policy, and technology in reducing health risks. The course is structured around three main components: Pollution and Health, Climate Change and Health, and Ecosystem Changes and Health. Through an interdisciplinary approach, students will engage with scientific research, real-world examples, and policy discussions to develop a comprehensive understanding of the links between health and the environment and address complex environmental health challenges.

ENVS331501

Sustainable Agriculture

Bell, Winnie Fay F

Spring 2025

Over the past 50 years, the industrial agriculture complex has led to amazing increases in grain yields which has met the basic calorie needs of much of the world's population. However intensive production practices have come at a high environmental and social cost and climate change now presents many new challenges to farmers. A new approach to food production is needed one that not only restores the ecosystem services on farmland and reduces fossil fuel inputs, but also one that supports farm families, builds communities of cooperation, and promotes human health. This course explores the historical basis of agriculture, the concept of sustainability, the agricultural practices that lead to improved ecosystem services, and alternative marketing approaches and cultural relationships. Students will come away from this course with an in-depth understanding of what sustainable agriculture is and how it can be applied to various situations in the world.

Conservation Science

Kurz, David

Spring 2025

This course will survey topics in the broad, interdisciplinary, and rapidly developing field of conservation science. Among other topics, the course will explore wildlife reintroductions, community-based conservation, parks and protected areas, ecological monitoring, conservation mapping and prioritization, and Indigenous stewardship. The class will consider holistic conservation challenges and approaches in a variety of systems, including coastal areas, tropical rainforests, rangelands, and the high seas. Students will explore content by reading scientific articles, engaging in interactive lectures, and applying concepts in group activities and discussions.

ENVS334001

Alternative Energy

Swann-Quinn, Jesse

Spring 2025

Modern society relies upon energy to support nearly all aspects of social and economic activity. Historically, this energy has come from fossil fuels (coal, oil, natural gas). Important questions concerning these energy sources' availability, along with their social and environmental impacts, contribute to increasing interest in developing alternative energy technologies (e.g., solar, wind, geothermal, tidal, etc.) Through interdisciplinary lenses, this course explores the dynamics and tensions of our current energy transitions, giving particular focus to sustainable energy resources. Students will investigate the social and environmental relationships, processes, and impacts comprising these challenges, and their possible solutions.

ENVS334101

Environmental Politics of the Middle East

Getzoff, Joseph

Spring 2025

This course will critically explore the contemporary and historical environmental issues associated with the Middle East and North Africa (MENA) in order to understand the relationship between nature, politics, colonialism, culture, and geography. First, the course will interrogate the geographic label, Middle East, to understand how American and European literature, politics, and culture created different bodies of knowledge and replicated popular discourses that justify intervention in West/Southwest Asia and North Africa. Understanding the Middle East as a geographical construction also allows us to critically think through how environmental issues are interconnected with the global and localized histories of colonialism, imperialism, and empire. Students will read and discuss scholarship on development, postcolonial theory, environmental history, and political ecology. Throughout the semester, students will complete a project on a topic of their choosing, developing it from start to finish with instructor and peer feedback.

Environmental Justice

El Tinay, Hassan

Spring 2025

This course examines challenges and controversies associated with the unequal distribution of environmental hazards across communities. Students will explore the social, industrial, and government forces that create inequitable burdens of environmental pollution as well as movements to reduce such burdens. While a majority of the course will focus on the United States, readings will include cases from around the world. Students will be expected to actively contribute to class discussions and to complete a pilot research project on the environmental justice implications of an area of everyday consumption such as food, clothing, cleaning, transportation, or technology.

Sustainable Cities

Bolin, Jessica L

Spring 2025

About 4.2 billion people around the world live in cities today, with this figure expected to double by 2050. Improvement of the urban environment is therefore crucial to a sustainable planetary future. In this course, students will examine current best practices for urban sustainability and resilience in areas such as restoration of watershed health, mitigation of air pollution and soil toxicity, management of solid waste, reduction of the urban heat island effect, improvement of mass transit and infrastructure, support of urban agriculture alongside a variety of other environmental justice efforts, and preparation for sea level rise, extreme weather events, and rising temperatures.

ENVS335701

To Recycle is Not Enough: Political Economies of Waste

Tupelo, Ethan

Spring 2025

Tossing something in the trash is an almost thoughtless, automatic part of our daily existence. How are our habits, practices, systems, and institutions around waste tied in with domination and social inequality? Who does the dirty work, and how is this related to inequalities around class, gender, and race? How have historical changes in materials and waste systems shaped our contemporary understanding of ourselves, and our relations with each other? What social assumptions allow waste relations to be seen as an acceptable and inevitable part of contemporary life? Where is this away to which we throw, and what are the lives of the people like there? Focusing on waste connects local actions to global systems, encompassing dirty and dangerous work, environmental racism, and ecological devastation. In addition to thinking broadly about these themes, students will also examine their own waste practices, campus and regional waste infrastructures, and our ethical and political entanglements with these systems, tying all these themes together in a collective blog.

Geospatial Data Analysis for Environmental Sustainability

Pan, Shufen

Spring 2025

Geospatial data and technologies permeate every aspect of our lives, from the navigation apps on our smartphones to the intricate management of city infrastructure and natural resources. This course introduces the fundamental principles and methodologies in geospatial analysis. Students acquire essential knowledge and skills in GIS, remote sensing, statistical modeling, AI, and more. Real-world case studies provide practical applications for how geospatial approaches can tackle challenges such as climate change, food and water security, and public health. Learning geospatial data quantitative analysis is imperative for effective environmental analysis, management, and communication, empowering students to contribute meaningfully to a sustainable future.

Environmental Sociology I

DiDonato, Sandra J

Spring 2025

This is an upper-division seminar that provides an overview of theoretical and empirical work in environmental sociology. After a brief introduction to the origins of the field, the seminar will cover topics that are representative of what is current in the area, especially bodies of empirical research that are national, international, and global in scope, and with particular attention given to how large-scale social institutions and organizational forms impact the environment. We will focus on the social dimensions of environmental impacts, the anthropogenic drivers of environmental impacts, and sociological research on solutions to environmental crises. A key takeaway of the course is the necessity in taking a structural approach to the study of socioenvironmental relationships. Attention will also be given to how environmental sociology makes fundamental contributions to interdisciplinary research in environmental studies and sustainability science. The course is required for all Environmental Studies majors.

Place-making for a Net-Zero Future: Sustainable Architecture and Landscape Design

Burns, Jennifer L

Spring 2025

Since the rise of steam power in the nineteenth century, the American way of life has been premised upon ever-increasing consumption of fossil fuels in all aspects of our economy, from agriculture and manufacturing, trade and transportation, to communications and computing. In this course, we focus on a single aspect of this carbon-reliant economy, one that centrally and intimately shapes our patterns of life, our energy use, and our expectations of comfort. Focusing on architecture and landscape design, we review the dominant patterns of building and dwelling from before and during the Industrial Revolution in the U.S. We then examine a substantial series of alternative, sustainable strategies for constructing our shelters and their surrounding landscapes.

Film Courses: Summer 2024

FILM227802

Film, Literature and Law

Michalczyk, John;Michalczyk, Susan A

Summer 2024

Interest in the rapport between film and literature as it relates to the law intrigues us as much today as ever. Literature captures the drama of a legal trial or an investigation into a brutal, racial murder. Film then takes this rich material and shapes it into a compelling form with dynamic visuals and other narrative techniques. The course explores the power of story-telling and the impact of film to embody and inhabit law and its relationship to ideas about inferiority, liberty, citizenry, race, justice, crime, punishment, and social order. Film adaptations from short stories, plays, and novellas will comprise the body of the curriculum.

Why Do the Wicked Prosper?: Portraits of Good and Evil in Film

Michalczyk, John

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take UNAS1728 with this course. Why do the wicked prosper? At the heart of so many stories told through the centuries is the question, Why do the wicked prosper? It remains without an answer, as authors and artists offer endless interpretations -- lessons with or without morals -- to an audience eager for explanations. Students will have opportunities to study narratives of heroes and villains and reflect upon the ways in which writers influence how we think about good and evil in the world, how we react to the unfairness we see happening around us, and how we come to terms with our own choices and understanding of the complexities of human nature.

Memory and Media

Pastel, Renee L

Fall 2024

This course may be used to satisfy one of four electives required within the Communication major. This course focuses on the relationship between memory and moving images. How can film, television, and online video capture and reproduce memory? What role can moving images play in shaping memory, both on an individual and collective level? What claims does the medium make about accurately presenting the past? Through close analysis of film, television, and digital media, we will practice making textually-grounded arguments about specific works while thinking about the broader implications for understanding media and memory. Drawing on material from a variety of time periods and genres, we will use moving images to explore how remembering (and forgetting) shapes a narrative, both on and off the screen.

FILM228201

Political Fiction Film

Michalczyk, John

Fall 2024

Political fiction film has often served as a dramatic means to deliver an ideological message. Its roots go back to Griffith's Civil War epic *Birth of a Nation* (1915). During World War II with such popular films as *Casablanca*, Hollywood directors offered patriotic messages to an American audience with its recent history of isolationism. More recently, Costa-Gavras' *Z* (1969) combined thriller elements with a non-conventional political perspective. Through readings, screenings, and discussion of these and other works, we are able to analyze the dual components of drama and politics in a chronological manner.

FILM300501

Italian Cinema: Passion, Politics, and Pain

Michalczyk, Susan A

Fall 2024

Social issues dominate Italian cinema from the post-WWII era to the present, as filmmakers interpret individual historical moments, literary works, and cultural events, bringing a collective experience of the human condition onto the screen. Visconti establishes the foundation that Fellini, Bertolucci, Rosi, and other directors build upon, creating visual images that evolve from Giovanni Verga, and his written portraits of verismo. Exploring what is true and real, questioning the complexity of the human condition in moments of comedy and tragedy, these films depict socio-economic, philosophical, and political issues, always revolving around the vulnerability and struggles of relationships. Films include: La Terra Trema, Ossessione, Open City, Bicycle Thieves, La Strada, Il Conformista, Tree of Wooden Clogs, Bread and Chocolate, Life is Beautiful, Tre Fratelli, Cinema Paradiso, Bread and Tulips, Gomorrah.

Advanced Screenwriting

Conroy, Mary K

Fall 2024

Limited to 15 students. This course is for students interested in writing for film, applying the knowledge gained in FILM3301 toward their efforts at writing their own screenplays. In the early part of the class, students will select an idea for a film and transform that idea into a story suitable for the screen. From there, in a round-table setting, students will complete a series of exercises to help them focus their stories, eventually moving on to writing a finished first act (28-30 pages) by the semester's end.

FILM332101

Law in Film: Crimes and Punishments

Michalczyk, Susan A

Fall 2024

Courtroom drama, blind justice, encounters with the law, all hold tremendous interest for filmmakers and audiences alike. This genre of film recounts real events, as well as fictional accounts to capture the drama of both crimes and punishments, by adapting written accounts into compelling and dynamic visual representations. Law in Film explores the ways in which cinema built upon legal issues continues to capture the audience's attention, whether in re-telling of brutal crimes or cruel injustices, through all aspects of the narrative (the tensions and problems of the crime and all involved in the process of seeking justice). The course covers feature films and documentaries from classic to contemporary, including Twelve Angry Men, Central Park Five, The Verdict, and On The Basis of Sex.

Film Theory and Criticism

Pastel, Renee L

Fall 2024

Satisfies the required theory course in the Communication major This course is structured around the question of how visual media convey and influence the world in which they are created. By surveying some of the major questions raised by theorists from the beginnings of film as a medium to the present, students will gain critical lenses through which to historically and theoretically engage visual media. We will cover topics including: film aesthetics; Marxist, psychoanalytic, feminist, critical race, and queer theoretical approaches to film criticism; television studies; and new media theories. Students will learn how to analyze film on a formal level, taking into account how form creates meaning, and to think historically and theoretically about how film as art and commerce has contributed to shaping "smaller screen" media forms and understandings.

FILM338901

American Directors Series

Chopra, Gautam

Fall 2024

This series will concentrate on several directors who have chosen to work on the East Coast rather than in the Hollywood mainstream, such as Martin Scorsese, Spike Lee, Sidney Lumet, Elia Kazan and Woody Allen. Many have roots in New York and use the City not only as a setting for their narratives but as a metaphor for the human condition they explore. This school of Urban Realism has enriched American film with a gritty documentary strain that stands in strong contrast to the polished Hollywood style.

Spring 2025

This course may be used to satisfy one of four electives required within the Communication major. This course focuses on the relationship between memory and moving images. How can film, television, and online video capture and reproduce memory? What role can moving images play in shaping memory, both on an individual and collective level? What claims does the medium make about accurately presenting the past? Through close analysis of film, television, and digital media, we will practice making textually-grounded arguments about specific works while thinking about the broader implications for understanding media and memory. Drawing on material from a variety of time periods and genres, we will use moving images to explore how remembering (and forgetting) shapes a narrative, both on and off the screen.

FILM301001

Laughter and Tears in Film

Michalczyk, Susan A

Spring 2025

What makes us laugh or cry? And how do filmmakers bring together individual stories of laughter and tears to recreate a common shared experience of heartache and joy? Comedy blended with tragedy, films that portray life's bittersweet reality can inspire and guide us as we try to understand ourselves and others. Our course explores films that reveal both comedic and tragic aspects of life from across the decades and across the globe. Films include: Death at a Funeral (British version), Life is Beautiful, BlackKlansman, MASH, Waking Ned Devine, The Ladykillers and Analyze This.

FILM302801

Terrorism on the Screen and on the Streets

Michalczyk, John

Spring 2025

Terror is waged by individuals or movements who often seek political or monetary gain through armed violence, ransom, bombings, hijacking, and other evolving forms, including cyber-terrorism. Cinema has captured the narratives of terrorism usually against soft targets and can be expressed in films such as Battle of Algiers, Michael Collins, United 93, Captain Phillips, The Siege Air Force One and others. The course is designed to understand its root causes, motivation of operatives, and sociopolitical results.

Screenwriter

Rolincik, Kylie M

Spring 2025

This course will explore the role of the screenwriter in the film making process, from original idea to the finished screenplay and film. Students will also learn how the screenwriter adapts source material such as plays, novels, and real life events. Along the way, students will learn about each of the elements of screenwriting including: structure, character, dialogue, theme, genre and breaking rules. Both individually and as a classroom project, students will read screenplays and analyze the resulting films to gain a better understanding of how those elements work in combination and contribute to the finished product.

FILM331901

Advanced Digital Media, Moving-Image Projects

Friedman, J Georgie

Spring 2025

This class is for advanced digital-media art and film students working in any moving-image medium (video art, experimental film, animation, programming-based imagery, video and performance, etc.) to refine and develop their ideas, skills, and presentation methods. This class is highly recommended for all Art Majors/Minors who want to incorporate moving-image elements into their thesis work. Though a variety of advanced techniques in Adobe Premiere, After Effects, and other programs will be demonstrated, students are REQUIRED to be proficient with the equipment and programs used in their type of moving-image production. Based on individual goals set in the beginning of the semester, students are expected to complete 3-4 short to medium pieces, or one larger piece over the semester. Students are asked to investigate methods for moving-image presentation and viewer experience/interaction beyond the traditional "movie" screen or monitor, including: multi-channel works; object-based or site-specific video installations; interactive pieces (triggered by motion, sound, or physical inputs); or mobile based pieces that utilize geo-location or augmented reality; etc. Based on a student's goals, independent research and skill building may be required. Class sessions will be a mix of screenings, reading discussions, technical demonstrations, in-class work time, peer workshopping, and class critiques of students' projects. Artist talks or exhibition visits may be assigned, based on local event programming. The goal of this class is for students to refine their concepts, polish their formal and technical skills, and make deliberate presentation choices, so all elements add meaning to their moving-image works.

FILM332201

A Lament for Justice: Good and Evil in Film

Michalczyk, Susan A

Spring 2025

Throughout the course, we will interpret encounters with good and evil, through analyses of film-making techniques and adaptations of narrative in a range of films from tragic to comic. As laments for justice, these films memorialize our fascination of good and evil, the bittersweet twists of fate and the flaws of human nature. We easily identify with the forces of good, while separating ourselves from the forces of evil, counting ourselves among the righteous, yet remaining intrigued by the triumphs of the wicked. How do filmmakers approach this conflict in our nature, in order to manipulate our emotions, and leave us asking questions about our own choices, decisions, and responsibilities? Including classic and contemporary films, such as *The Godfather*, *Apocalypse Now*, and *The Invention of Lying*.

FILM332301

Portraits of Women in Film

Michalczyk, Susan A

Spring 2025

Portraits of women, salvific or satanic, appear throughout centuries of artistic interpretation, with symbolic representation that often over-simplifies or distorts the real-life complexity of her role. From Eve to the Virgin Mary, the creative muse or the conniving femme-fatale, filmmakers recreate the profound relationships and roles that society sometimes demands, sometimes condemns, and always finds intriguing. Portraits of Women in Film will explore a range of traditional and contemporary films, tragic and comedic, that present glimpses, though often incomplete of the challenges, inspirations, rewards, and punishments that define or attempt to define women through the ages. Films include *Dangerous Beauty*, *Little Miss Sunshine*, *Moonstruck*, *Miss Representation*, *Autumn Sonata*, *Volver*, *A League of Their Own*, *Double Indemnity*, *Belle*, and *The French Lieutenants Woman*.

FILM333101

Independent American Film

Chopra, Gautam

Spring 2025

How might contemporary independent cinema be seen as both an alternative and a response to mainstream Hollywood fare? How has the acquisition of indie studios, such as Miramax and New Line Cinema, transformed the industry? Has the affordability of technology and accessibility of audiences truly created a democratization of film? This course emphasizes critical examination of contemporary American Independent film from the 1980s films of John Cassavetes, Steven Soderbergh, Spike Lee through the 1990s and 2000s with features from Kevin Smith, Allison Anders, Richard Linklater, Quentin Tarantino; shorts from Wes Anderson and Jane Campion; and current festival hits.

Documentary Film Production

Rossi, Michael A

Spring 2025

This advanced filmmaking course focuses on student production of short-form documentary films. Modeled after industry-standard techniques in non-fiction filmmaking, students embark on progressive, hands-on learning of the various components required in producing an 8-10 minute documentary. In a supportive and collaborative environment, students explore, define, and refine their own cinematic voices; screen and analyze documentary films; research and develop a written proposal for their film project; complete technical workshops to help refine production skills; learn and apply the technical, aesthetic, ethical, and historical components related to contemporary documentary films; and work to complete and present a final film.

Advanced Screenwriting II

Conroy, Mary K

Spring 2025

Limited to 12 students.. In a round-table setting, students will continue to work on the script they began in Advanced Screenwriting. The course will feature more exercises and outlining, leading to the writing of the remainder of their script. As in Advanced Screenwriting, students will critically examine each other's exercises and writing under the guidance of the professor. It is anticipated that students will complete a finished first draft of a full length feature film (100-120 pages) by the semester's end.

French Courses: Summer 2024

FREN106501

Intensive Reading in French

Bold, Stephen

Summer 2024

The course objectives are (1) to develop the ability to read French readily and accurately through the study of grammatical structures and vocabulary; (2) to develop techniques for the reading of French-language material; and (3) to provide practice in the translation of French texts in general and of texts related to the students' major fields of study and research. This course may be taken for a grade, for pass/fail, or audited (as a registered auditor). Students desiring a pass/fail grade must file this grading preference with the Graduate School of Arts and Sciences. This is a 12 week course and meets for the entire summer session.

Narrative and Identity: The Story You Tell Yourself

Newmark, Kevin

Fall 2024

Conducted in French

Fulfills one of the 3000-level requirements for the French major. Satisfies Foreign Language Proficiency core requirement.. This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.

FREN331501

Madmen, Hysterics, and Criminals: Inventing Deviance

Bowles, Daniel J

Fall 2024

Conducted in English. Counts toward German major, German minor, and German Studies minor.. In this seminar we address three major questions, guided by a broad selection of readings from German, French, British, and American literature and theory from 1800 to the present: How do we as readers define the abnormal and the deviant? What aesthetic practices does literature employ to represent these threshold experiences, and what is their history? How might we rethink our own notions of normality when faced with their artificiality? Literary, theoretical, and musical texts by Balzac, Bernhard, Büchner, Freud, Genet, Kracht, Plath, Stevenson, and others help us establish a history both of abnormality and our own cultural self-understanding.

Life at the Limit: Narratives of Transformation

Kearney, Anne D

Fall 2024

This course is conducted in English.. This course is conducted in English. This course will consider texts that follow the path of a person making a journey from alienation, loss, or hardship through a turning point. We will read stories of people who, caught in a major life crisis, still manage to keep a deep connection with themselves and the world, people who ultimately survive to share their experience with others in writing. Students will read correspondence between Theo and Vincent Van Gogh, a short story by Fyodor Dostoevsky, excerpts from Les Misérables, a memoir by Primo Levi, and various texts by Albert Camus and several other authors. How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History

Newmark, Kevin

Fall 2024

Conducted in English: Undergraduate Elective. Cross listed with English and Philosophy "Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatism." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

FREN442201

The Death of the Author

Celestino Montenegro, Ana Cristina

Fall 2024

Since the appearance of Roland Barthes' article, "The Death of the Author" (1968), this eye-catching phrase has received much attention. But if the author is dead, then who does the writing? This course covers a period of 20th century French literature and criticism during which the traditional figure of the literary author fades, and a new kind of literature appears, one that seeks to be mechanical, impersonal, and based on objective rules. What did this literature look like? It was playful but rigorous, and it was based on constraints that were specific to a given author or group. This course will consider a variety of works including films and visual arts that address these issues. We will also trace the way the so-called "death of author" may have helped prepare a return of the subject and history into literature and criticism. Our ultimate goal will be to understand better what is the most "alive" in the literary and social questions we face today. Conducted in French.

Styles of Literature and Science in France

Abele, Célia

Fall 2024

Course is conducted in French and Fulfills one of the 4000 level requirements for French majors or minors. Is literature a "science"? Can science be "literature"? This class reads literary, scientific, and philosophical texts from the Enlightenment and nineteenth century from the lens of both history of science and literature. Our focus will be France, though we will also look at scientific voyages beyond Europe. Other than published "works," we will engage with the rich material culture of drafts, notebooks, botanical specimens, illustrations, and research of all kinds. Sources include the FrenchEncyclopedie, the botanical practice and writings of Jean-Jacques Rousseau as well as the travel diaries and writings of Alexander von Humboldt and Louis-Antoine de Bougainville. We will also examine the connections between the work of natural scientists including Georges Cuvier and Claude Bernard and novelists like Honore de Balzac and Emile Zola. Our aim will be to deepen our understanding of the complex interrelations of practice and thought among literature, philosophy, and the sciences.

Conversational Approach to Contemporary France

Brigitte, Melissa Martine

Spring 2025

This course is designed to familiarize students with the political and social features of contemporary France while helping them to develop oral communication skills in French. Using authentic documents (television, videos, films, songs, newspapers, and magazines), we will discuss current events and socio-political issues. Students will develop their vocabulary, increase their knowledge of idiomatic expressions, and further their command of spoken French by engaging in structured dialogues based upon real-life situations.

Narrative and Identity: The Story You Tell Yourself

Abele, Celia

Spring 2025

Conducted in French

Fulfills one of the 3000-level requirements for the French major. Satisfies Foreign Language Proficiency core requirement.. This course is designed to help students with a good background in French to progress to the next level. Students in this course will continue to solidify their mastery of French grammar through structural exercises tied to readings, discussion, and written analysis of selected short stories, novels, and narrative film. The stories have been chosen and presented to allow students to progress substantially both in their basic reading skills in French and in their awareness of critical aspects of storytelling such as narrative voice, point of view, and plot structure.

Artists and their Writings

Kearney, Anne D

Spring 2025

Conducted in French. In this course, students will study French culture through some key artists of the turn of the nineteenth century. The course will explore the rapport between their visual work, their writings (or writings about them) and their lives. The artists studied will be Van Gogh, Gauguin, Matisse, Picasso, Rodin, Camille Claudel, Cézanne. We will look at the evolution of their work in conjunction with their biographies, reading extracts from their letters or pronouncements on art and life.

FREN443701

No Man is an Island: The Origins of Inequality

Abele, Celia

Spring 2025

Conducted in French and Fulfills one of the 4000-level requirements for French majors. The early modern period, from the sixteenth through the eighteenth centuries, saw a profusion of accounts of travels to what Europeans thought of as new lands. Islands in particular served as a laboratory for re-envisaging the basic social and natural relationships that shaped human life. These travel narratives fueled European thinking about both politics and nature, re-making the relationship between them, as well as that between literature and politics, perhaps most famously in Jean-Jacques Rousseau's *Discourse on the Origins of Inequality*. That text will be the centerpiece of this class: we will study it in detail together with extracts from the many travel writings to which it refers. We will attend to how these texts present indigenous perspectives and study archival materials that highlight the absences of genuine indigenous perspectives from these dialogues. We will ask to what extent such writings necessarily established or destabilized relationships of inequality between humans and nature, among humans, and between Europeans and Indigenous peoples. But we will also be attentive to how the island encounter between nature and the political has played out in much more recent times, whether in twentieth-century theoretical writings on Rousseau, Cesaire's *Notebook of a Return to my Native Land*, or Graeber & Wengrow's bestseller from 2021, *The Dawn of Everything*.

Credits: 3

Room and Schedule: Higgins Hall 225 W 04:30PM-06:50PM

Satisfies Core Requirement: Cultural Diversity

FREN443901

Painters of Modernity: Baudelaire and Flaubert

Newmark, Kevin

Spring 2025

Conducted in French. Elective for French majors or minors. Two of the greatest masterpieces of French literature were published in the spring of 1857: Baudelaire's collection of lyric poetry, *Les Fleurs Du Mal* and Flaubert's novel, *Madame Bovary*. This course will read these texts carefully in order to determine how and why the modernity that has been attributed to them has not ceased to function as a provocative question for literary, philosophical, and historical reflection.

FREN775001

Reading Jacques Derrida

Newmark, Kevin

Spring 2025

This course will examine some of the fundamental ways that the work of Jacques Derrida has contributed to altering the context in which the humanities can be understood and studied within the modern university. It will take examples from Derrida's repeated interventions in such disciplines as literature, philosophy, theology, and history. By situating Derrida's work at the margins where accepted demarcations between the disciplines begin to blur, the course will suggest new possibilities for conducting interdisciplinary work in the future.

GERM220501

Vienna Art & Architecture

Block, Nicholas

Summer 2024

Must apply through the Office of Global Education This summer study abroad course on location in Vienna, Austria centers on the city and the cultural achievements of key protagonists from the fields of fine art, applied art, and architecture. After developing a base knowledge of Gothic and Baroque architecture, the course draws a line from Historicism, the style prevailing in the second half of the 19th century, to Art Nouveau, the style of the young, and provides an outlook on the Austrian type of Expressionism and modernism in architecture. Vienna will serve as an example of the movement of artistic movements between the European centers: Baroque from Rome to Vienna, Art Nouveau in Paris and Vienna, Wiener Werksttte to Weimar Germany Bauhaus, and Expressionism between Vienna and Berlin. Students will submit written reflections and a photographic typology as a final project. Taught in English.

GERM220301

Representing the Holocaust

Block, Nicholas

Fall 2024

This course examines representations of the Holocaust from different national contexts around the world. Students will engage with a wide range of representational sources, including cinematic, literary, and memorialization efforts. Class time will also introduce historical debates around the Holocaust. There will be a field excursion to Boston's local Holocaust monument.

Madmen, Hysterics, and Criminals: Inventing Deviance

Bowles, Daniel J

Fall 2024

Conducted in English. Counts toward German major, German minor, and German Studies minor.. In this seminar we address three major questions, guided by a broad selection of readings from German, French, British, and American literature and theory from 1800 to the present: How do we as readers define the abnormal and the deviant? What aesthetic practices does literature employ to represent these threshold experiences, and what is their history? How might we rethink our own notions of normality when faced with their artificiality? Literary, theoretical, and musical texts by Balzac, Bernhard, Büchner, Freud, Genet, Kracht, Plath, Stevenson, and others help us establish a history both of abnormality and our own cultural self-understanding.

Germany Divided and Reunited

Bowles, Daniel J

Fall 2024

Conducted in English.

Required for the German Studies minor.

Counts toward German major and German minor.

. This course provides a multi-dimensional look at post-war Germany, East and West. Politics, social and economic structure (East versus West), music, art, literature, philosophy (Critical Theory), the crisis and reform of the West German university system, the young generation, and Americanization will be discussed. Other topics include radicalism/extremism/protest movements (including terrorism), coping with the past (National Socialism), the Revolution of November 1989, and the legal ramifications and unsolved problems deriving from reunification.

Runen zu Ruinen: Literarische Kultur

Holt, Alexander

Fall 2024

Conducted in German. A survey of German literary culture from inscriptions written in the rune alphabet through the Middle Ages to the ruins of 20th-century wars and exilic texts. Students will go on a field trip to the library and archives to exam manuscripts and book culture. Selected works will be analyzed against the background of historical events and European literary movements. Review of advanced grammar points, vocabulary building exercises, short writing assignments, and oral reports help students improve their overall proficiency in German.

GERM201301**Klagen, Jammern, Meckern: The German Art of Complaint****Holt, Alexander****Spring 2025**

According to some, Americans are currently living through an age of grievance (Frank Bruni), a period in which civility and common ground have been supplanted by unappeasable protest and dissent. There is, however, a long and rich history of grievance and complaint that spans the globe, though exhibiting a great deal of variation from one epoch or region to the next. In this German-language course, we will survey this history as it pertains to the German-speaking world specifically, beginning with baroque elegies (Klagelieder) of the seventeenth century and ending with works of contemporary dissidence by literary and artistic activists. In tracing this history, we will attempt to delineate various forms, genres, and styles of complaining while also considering the social, psychological, and political functions of complaints and the factors that prompt them. Moreover, students will have the opportunity to activate this knowledge by voicing various complaints of their own, real or invented, by drawing on this canon of complaint and its stockpile of rhetorical gestures.

Credits: 3**Room and Schedule:** Lyons Hall 208 MWF 10:00AM-10:50AM**Satisfies Core Requirement:** None**Prerequisites:** GERM1051 or equivalent**Corequisites:** None**Cross-listed with:** None**Frequency:** Periodically**Student Level:** Undergraduate**Comments:** None**Status:** Offered**GERM212001****Black Deutschland: Germany and the African Diaspora****Holt, Alexander****Spring 2025**

Though Germany has long conceived of itself as a white nation, it has been a temporary and permanent home for people of African descent since the Middle Ages. And white Germanophone authors from Franz Kafka to Gnter Grass have celebrated and appropriated elements of Black popular culture in their work. Focusing on the period between 1945 and the present day, this course will treat the contemporary legacies of German colonialism, transformations of discussions about race and racism following World War II and the Holocaust, and conceptions of multiculturalism and Europeanism. East German homages to Black activists and political leaders like Angela Davis and Nelson Mandela and West German claims of the utopic potential of African American culture will provide material for discussions of internationalist solidarity and cultural appropriation. Moreover, students will engage with the works of Black German and Afro-German writers and artists who critique Germanys self-conception as white, as well as texts by thinkers from the African diaspora (e.g., W.E.B. Du Bois and Audre Lorde) for whom experiences in Germany served as sources of intellectual and artistic stimulation.

GERM220001

The German Literary Legacy

Block, Nicholas

Spring 2025

A survey of German literature in translation from the late 18th century to the present. Representative texts in the German language from different literary periods and countries will be brought into dialogue with each other to examine distinctive literary styles and thematic preoccupations of German literature. We will investigate the representation of shifting societal values, conceptions of nature and identity, figures on the margins of society, and intergenerational conflict. Assignments and class discussion will be in English. Authors will vary according to instructor, but we focus on Nobel Prize winners and books that made a cultural splash in the German-speaking world.

Hispanic Studies Courses: Summer 2024

SPAN101501

Elementary Spanish I

Falconi, Silvana

Summer 2024

Conducted in Spanish This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator

Credits: 3

Room and Schedule: On-line Asynchronous

Satisfies Core Requirement: None

SPAN101601

Elementary Spanish II

Falconi, Silvana

Summer 2024

Conducted in Spanish Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

SPAN111501

Intermediate Spanish I

Ramos Orta, Yuliana M

Summer 2024

Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Spanish Conversation, Composition, and Reading I

Gil Berrio, Yohana M

Summer 2024

Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement. The main objective of this course is to consolidate students skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

Intermediate Spanish I

Mirete Hernandez, Marta

Fall 2024

Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Spanish Conversation, Composition, and Reading I

McIntosh, Sheila E

Fall 2024

Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement. The main objective of this course is to consolidate students skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

SPAN221505

Spanish Conversation, Composition, and Reading I

Daggett, Karen

Fall 2024

Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement. The main objective of this course is to consolidate students skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

Advanced Oral Proficiency in Spanish Practicum

Gil Berrio, Yohana M

Fall 2024

This one-credit workshop is designed to advance students oral Spanish using Hispanic social contexts and texts. Course materials will help students improve their speaking fluency, pronunciation, and expand their knowledge of vocabulary in the context of correct grammatical expression. Special attention is given to advanced areas of Spanish grammar appropriate for argumentation. Course materials will treat current issues and include films, newspaper articles, interviews, paintings, as well as literary or historical readings. Students will be assessed based on the progress they make in their linguistic proficiency. Enrollment preference will be given to Hispanic Studies majors and minors.

SPAN661401

The Colonial Imagination: History and Identity in Spanish America

Beckjord, Sarah

Fall 2024

Conducted in Spanish

Fulfills Latin American pre-1900 major requirement

Satisfies Cultural Diversity Requirement. This course provides an overview of texts written from the colonial period to the nineteenth century and their connections to contemporary works. We will focus on the representation of historical actors (conquerors, captives, others) as well as geographical spaces (city, jungle, pampa) as imaginary regions where history and identity are forged. Readings will be drawn from a variety of genres (historiography, novel, short story, essay, poetry) and will include selections by authors such as Bernal Daz, Cabeza de Vaca, El Inca Garcilaso, Rodriguez Freile, Sarmiento, Palma, Gorriti, Paz, Borges, and Garro.

SPAN662601

New Argentine Narrative

Kulez, Ali

Fall 2024

Course is taught in Spanish and fulfills the Post-1900 Latin American requirement for Hispanic Studies majors. This course will focus on twenty-first century fiction from Argentina recently dubbed as la nueva narrativa argentina (Drucaroff). Examining stories and novels from authors such as Dolores Reyes, Samantha Schweblin, Mariana Enriquez, and Agustina Bazterrica, we will trace the common points between their diverse styles, as well as the links to earlier periods of Argentine and Latin American fiction. Among other topics, we will explore their gender politics, environmental consciousness, as well as novel forms of engagement with the last dictatorship (1976-83).

Living on the Margins of Society: Picaros, Rouges, Rascals, Thieves and Hustlers

Cruz Gonzalez, Gerardo

Fall 2024

Conducted in Spanish. Fulfills the Pre-1800 Peninsular requirement for majors in Hispanic Studies The "picaro" and other subjects living on society's margins emerged during modernity in parallel with the Spanish Golden Age. These subjects personify critical discourses of society and the promise of social mobility. In this course, we will read works where these figures have been used to question the social, political, and economic structures that have marginalized them. We will cover canonical works of Spanish literature, their adoption in Latin America, some contemporary uses, and their presence in cinema and the arts.

Haunting Modernity: The Fantastic Short Story in Nineteenth-Century Spain

Tang, Wan S

Fall 2024

This course examines the fantastic short fiction of canonical nineteenth-century Spanish writers as reflective of turn-of-the-century socio-historical concerns, particularly as related to the struggle for modernity. Aside from examining the stories within their historical moment, we will place these works in dialogue with fantastic narratives from other periods and literary traditions, striving for a more complete appreciation for the evolution of the literary fantastic.

SPAN668301

On the Verge of the World. Hispanic Migrants and the Arts

Cruz Gonzalez, Gerardo

Fall 2024

Course is taught in Spanish and fulfills the Post-1900 Latin American requirement for Hispanic Studies majors. What is the experience of the migrant journey when talking about children, women, or families? How does this transit and arrival into a territory impact people? This course will explore canonical and emerging works of literature, cinema, and the arts to listen to the voices and know the faces of migrants from the Hispanic world. This exploration will allow us to observe historical moments of displacement and the current humanitarian crisis that migration represents. To understand this phenomenon, this course will map the inter- and trans-continental cartographies and trajectories involved and focus on the affected subjects' individual experiences.

Hispanic Studies Courses: Spring 2025

SPAN101501

Elementary Spanish I

Fitzsimmons Christensen, Iris L

Spring 2025

Conducted in Spanish This introductory course is designed for students with no prior Spanish experience as well as those who have had some high school Spanish. Elementary Spanish I provides a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when real-world information becomes the focus of student activities. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of basic communicative tasks. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator

Credits: 3

Room and Schedule: Stokes Hall 363S MWF 11:00AM-11:50AM

SPAN101610

Elementary Spanish II

Zhu, Can

Spring 2025

Conducted in Spanish Elementary Spanish II is the second course in the first-year Elementary Spanish I and II sequence. It continues to provide a strong foundation in speaking, listening comprehension, reading and writing as well as exploring the products, practices and perspectives that are unique to Hispanic cultures. This course follows a communicative approach, which springs from the idea that languages are best learned when student activities involve critical thinking about real-world information. Students will interact in Spanish with the instructor and with classmates. By the end of this course, students should be able to successfully handle in Spanish a significant number of communicative and writing tasks in different time frames. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Intermediate Spanish I

Ioannou, Vasilis

Spring 2025

Conducted in Spanish. Intermediate Spanish I is the first course in the second-year sequence. It continues to develop and strengthen students proficiency in the Spanish language as well as to increase their cultural understanding. Emphasis remains on the four skills and on critical thinking. Throughout the course, students will develop fluency and accuracy, and focus on communication. They will expand the vocabulary and enhance their understanding of essential Spanish grammar concepts. Short literary texts, cultural readings and audiovisual materials will provide opportunities to learn to appreciate cultural differences and impart authentic insight into the Hispanic world. By the end of this course, students should be able to successfully discuss in Spanish topics of importance to the twenty-first century, with emphasis on the development of critical thinking skills in addition to the refinement of the four basic language skills. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

Sargent, Barbara

Spring 2025

Conducted in Spanish. Intermediate Spanish II is the second course in the second-year sequence with a continued emphasis on the four skills and on critical thinking. This course focuses on vocabulary building, the examination of some of the finer grammar points, and moving students towards a more complex level of comprehension and expression. Students will continue to work with short literary texts, cultural readings and audiovisual materials. After successful completion of this course, the foreign language requirement will be fulfilled for schools that require a 4th-semester proficiency. Important note: Students who place into this course through the Spanish Placement Test may not enroll at a different level course without the explicit and prior permission of the coordinator.

SPAN221501

Spanish Conversation, Composition, and Reading I

Gil Berrio, Yohana M

Spring 2025

Conducted in Spanish. Satisfies Foreign Language Proficiency core requirement. The main objective of this course is to consolidate students skills so that upon successful completion of the sequence (CCR1 and CCR2) they will have acquired a proficient level of Spanish. Students will acquire discursive fluency and accuracy by working on the following skills: listening and reading comprehension, writing, speaking and oral interaction. The course focuses on complex grammar topics and extensive vocabulary, as well as on expanding students knowledge of cultural and historical aspects of Spanish speaking countries. Likewise, the course will foster students analytical, critical, and creative skills in the target language through the use of a variety of authentic materials such as literary texts, newspaper texts, and audiovisual materials.

SPAN339001

Advanced Oral Proficiency in Spanish Practicum

Gil Berrio, Yohana M

Spring 2025

This one-credit workshop is designed to advance students oral Spanish using Hispanic social contexts and texts. Course materials will help students improve their speaking fluency, pronunciation, and expand their knowledge of vocabulary in the context of correct grammatical expression. Special attention is given to advanced areas of Spanish grammar appropriate for argumentation. Course materials will treat current issues and include films, newspaper articles, interviews, paintings, as well as literary or historical readings. Students will be assessed based on the progress they make in their linguistic proficiency. Enrollment preference will be given to Hispanic Studies majors and minors.

SPAN339301

Spanish-American Philosophy

Gurtler, Gary, SJ

Spring 2025

This course is designed to give the student an opportunity to look at some fundamental philosophical issues regarding human nature and the origins and development of human thought from a fresh perspective. Unamuno's Tragic Sense of Life presents a critique of the rationalism of modern European thought by focusing on human life as dream, theater, and struggle in line with Don Quijote. Paz's The Labyrinth of Solitude explores the meaning of human existence through the lens, or perhaps the mask, of the Mexican quest for identity. Ortega y Gasset and Zubiri represent the contemporary Spanish interaction with European phenomenology.

Indigeneity in Latin American Literature and Culture

Kulez, Ali

Spring 2025

Conducted in Spanish and fulfills the Post 1900-Latin American Literature and Culture requirement for HS majors. This course will look at the emblematic uses of indigeneity in Latin American literature and culture from the late 1920s to the present. We will begin with avant-garde movements and their use of Indigenous peoples as a mark of difference; trace mid-century narratives of mestizaje and indigenismo; continue with translated and bilingual poetry by Indigenous authors; and end by looking at recent examples of neo-indigenismo in science fiction.

SPAN661701

Food and Identity in Latin/o American Literature and Culture

Kulez, Ali

Spring 2025

Conducted in Spanish and fulfills the Post-1900 Latin American literature and culture requirement for HS majors. This course examines how images of food and eating mediate questions of identity in Latin American and U.S. Latino cultures from the late 1920s to the present. Studying a diverse range of materials including essays, stories, manifestos, performances, and visual art, we will reflect on the ways in which such scenes intervene in discussions of identity, cosmopolitanism, and national sovereignty. The students will have the chance to meet chefs, food justice activists, and restaurateurs to reflect further on contemporary issues around consumption.

SPAN663201

Don Juan on stage, page, and screen

Tang, Wan S

Spring 2025

Conducted in Spanish and fulfills the Post-1800 Peninsular requirement for HS majors. Where does the myth of Don Juan come from, why does it endure in the popular imagination, and what does it tell us about evolving Spanish culture? This course follows the figure of Don Juan from his earliest appearance in the 17th-century Spanish theater through recent experiments in literature and film. Throughout the semester, we will examine how changes in the conceptualization of and attitude towards Don Juan respond to differing artistic and sociohistorical contexts, engaging with questions of gender and sexuality, social class, and Spanish national identity.

SPAN664801

Borderlands: the Literature of Hispanic Migration in the US

Beckjord, Sarah

Spring 2025

Focusing on works by Hispanic authors written in and about the territory we know today as the US, we will read works by travelers, colonists, immigrants and exiles who explore themes of language and identity-- belonging and difference--and examine cultural and spacial borderlands. Readings will span the colonial to modern periods, including representative texts in chronicle, fiction, essay, poetry, music and film.

Conducted in Spanish and satisfies the Pre-1900 Latin American distribution requirement for HS Majors.

SPAN667801**Early Spanish American Women Writers****Beckjord, Sarah****Spring 2025**

Conducted in Spanish. Fulfills pre-1900 requirement in Latin American literature for Hispanic Studies Majors; elective for Minors in Hispanic Studies, Latin American Studies, and Women's Studies. Early Spanish-American society offered both unique opportunities and constraints for women writers. From women who participated in military campaigns to others who wrote from the convent or in the context of the literary circle, these authors reflect on the position of women in society, as well as on questions of love, marriage, family, work, and the public role of the female thinker and writer. Readings in a variety of genres by major writers from the sixteenth to the nineteenth century, and connections to representative twentieth-century works.

SPAN669701

Blackness in Conflict. Afro-Latin American Literature, Cinema and the Arts

Cruz Gonzalez, Gerardo

Spring 2025

Conducted in Spanish. Fulfills Post-1900 Latin American requirement for majors and Elective for HS majors or minors. Do Afro-Mexicans and Afro-Argentines exist? Some countries have a recognized Black population but in others this population has been systematically rendered invisible and marginalized as a part of a project enacted by the nation-state. In this course we will compare literary works, films and contemporary art that express blackness and its politics. Our approach to these works will illuminate individual or collective narratives and counternarratives that will allow us to access a postcolonial, transhistorical, and transnational understanding of the Black condition in Latin America.

Piecuch, Anna J

Summer 2024

This course is Part II of the History Core.. This course is a taught in a hybrid format. This course covers several centuries of time (1800 and after) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST140101

History of the Italian Mediterranean: Una Faccia, Una Razza

Shlala, Elizabeth H

Summer 2024

Today, the Mediterranean Sea, which once appeared to be the cradle of cosmopolitan civilizations, has become the twenty-first century's largest mass grave. The region that served as the heart of a world system for centuries, is now a heavily policed crossroads that divides more than it unites. Levantine has become a derogatory word. Venice is under water, losing her cultural heritage inch by watery inch due to climate change. In this course, we will use primary historical sources to analyze the continuities and changes of the Italian Mediterranean with Venice as our geographical, historical, and architectural center. It is an opportunity for first-hand intellectual exploration that we will not have for much longer.

HIST260101

Food, Power, and Politics

Nakazato, Hiroshi

Summer 2024

This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

HIST285601**Contentious History and the Politics of Contemporary Korea****Hwang, Ingu****Summer 2024**

This introductory immersion course surveys the contentious intersection between history and politics in contemporary Korea. Students will explore the following questions: What were the critical historical experiences and issues that became part of the public discourse and catalyzed political contestations in local and international/global communities? Why did these issues become contentious and for whom? What actions and counteractions did they inspire? In critically examining these questions, students will address four topics: postcolonial disputes, national division, economic development and social justice, and (post-)democratization protests. To facilitate in-class discussions, students need to engage critically with textual and media sources. They are also required to actively participate in the historical and cultural immersion/excursion programs, including the National Museum of Korean Contemporary History, the DMZ tour, and the Kim Dae-jung Presidential Library and Museum.

Credits: 3**Room and Schedule:** By Arrangement; See Office of Global Education website for details**Satisfies Core Requirement:** History II, Cultural Diversity**Prerequisites:** None**Corequisites:** None**Cross-listed with:** INTL2856**Frequency:** Periodically in the Summer**Student Level:** Undergraduate**Comments:** None**Status:** Offered**HIST780401****Colloquium: American Slavery****Lyerly, Cynthia L****Summer 2024**

No field in American history has been more dynamic and more debated than the history of slavery in the United States. This course covers a broad range of critical questions and historical debates about slavery in the United States, including the evolution of slavery over time, slavery and gender roles, the position of free blacks in a slave society, slave religion, and the impact of slavery on the nation. From a few of the classic texts on slavery to the most recent and acclaimed scholarship, we will explore some of the more controversial, innovative, and provocative works in the field.

HIST781501

Topics in World History

Pendas, Devin O

Summer 2024

In recent years, history has taken what many are calling a "global turn." This involves both looking at old topics in new ways and investigating new topics that were previously neglected. This course will examine some key themes in recent global history, including economic, political, and cultural transformations. We will ask about the birth of the modern world and the relationship among various regions in the age of empire, discovery, colonialism, and globalization.

HIST107701

Globalization I

Cole, Emily

Fall 2024

The course explores the connections that are diminishing the significance of traditional geographical, cultural, and political boundaries. Global connections have increased rapidly in the past half-century, but global convergence has been a powerful force during the eight centuries covered by this survey. The year-long course examines three kinds of globalization: commercial, cultural, and political. While recognizing the Western world's expansiveness as a key force for globalization, the course gives extensive attention to how people from other continents have also been major agents in initiating, promoting, and resisting globalizing forces.

Fall 2024

This course is the second half of the History Core. Offered in the fall semester of the academic year. Fulfills Core History II. . This course covers several centuries of time (1800 and after) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST111301

The African Diaspora and the World I

Lal, Priya

Fall 2024

This course is the first of a two-course sequence that explores the African diaspora and its relationship to the world. By African diaspora, we are referring to both the continent and the communities of people of African descent that have formed in the Americas, in Europe, and in Asia as the result of forced and voluntary migrations over the last five hundred years. The course seeks to foster a fuller understanding of the African diasporas role in the development of the modern world and the experiences of African-descended peoples from a global perspective.

HIST150501**Planet in Peril: The History and Future of Human Impacts on the Planet****Parthasarathi, Prasannan****Fall 2024**

This is a Complex Problem course and is open to FRESHMEN only. You must take SOCY1509 with this course. The 21st century opened with crises of climate, biodiversity, and ecosystem functioning. In this course, we address ecological overshoot from the perspectives of sociology and history, emphasizing the role of inequality, the state, and power. The course combines contemporary analyses with a long historical record of human impact, considering both the familiar and the novel in the realm of ecological challenges. We devote substantial attention not only to causes but also to solutions. Topics to be covered include the Columbian exchange, forests, agriculture, water, climate change, toxics, and population. Solutions include state policy, social movements, individual action, and social innovation.

HIST162701

Making the Modern World: Design, Ethics & Engineering

Tonn, Jenna A

Fall 2024

This is a Complex Problem course and is open to FRESHMEN only. You must take ENGR1801 with this course. Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters, balance financial, technological, and regulatory pressures associated with complex socio-technical problems, and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this course, students will explore the social, cultural, and institutional history of engineering, learn foundational skills in quantitative analysis of real-world engineering designs, and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world. Students will collaborate on group design projects based on human-centered engineering.

This is a Complex Problem course and is open to FRESHMEN only. You must take ENGR1801 with this course. Together we will consider how engineers and other stakeholders navigate risks related to industrial and environmental disasters, balance financial, technological, and regulatory pressures associated with complex socio-technical problems, and negotiate technical and political liabilities surrounding artificial intelligence, surveillance, and climate adaptation. Engineering systems present pressing technical, ethical, and moral problems that we must grapple with as engaged global citizens. In this course, students will explore the social, cultural, and institutional history of engineering, learn foundational skills in quantitative analysis of real-world engineering designs, and understand the political, environmental, economic, and ethical tradeoffs associated with building the modern world. Students will collaborate on group design projects based on human-centered engineering.

HIST182201

Core Topics: Europe from the Outside In

Matus, Zachary A

Fall 2024

The story of how Europe emerged as a cultural-political entity is inextricably intertwined with the groups of people it feared, persecuted, and ridiculed. In this course, we will examine the history of Europe from the perspective of Jews, women, Muslims, heretics, the poor and disabled before moving to peoples encountered during European exploration. In so doing we will investigate the deep roots of contemporary hate and prejudice and ask uncomfortable questions about the basis of Western society. Students will learn to work with primary source documents and to question dominant narratives about Western civilization.

HIST184101

Core Topics: When Worlds Collide: From Contact to the Constitution

Lyerly, Cynthia L

Fall 2024

This course will examine North American history from the perspective of the collision and exchange of cultures and peoples. From the Mississippian Indian civilization at Cahokia to the Illinois, Iroquois, Algonkian, and other Native American peoples, we will see how Indians resisted, adapted, and interacted with French, English, Spanish, and Dutch Europeans. African peoples were another key part of this cultural collision, as hundreds of thousands were brought to North America in the slave trade. The course ends with the consolidation of white European power in the creation of the United States. Major themes in the course are race, power, and religion.

HIST220201

Greeks and Barbarians

Thatcher, Mark R

Fall 2024

In "Greeks and Barbarians," we'll use a combination of written sources, archaeological evidence, and even visual art to investigate the fascinating history of relationships and conflicts between Greeks, Persians, Egyptians, Carthaginians, and more. We'll read a variety of literature in English, such as the histories of Herodotus and Xenophon, the tragedies of Aeschylus and Euripides, and more, to help us figure out what Greeks really thought about barbarians - and about themselves.

HIST220301

Greco-Roman Egypt

Sapsford, Thomas D

Fall 2024

Under rule by the Ptolemaic dynasty, Egypt became the cultural hub of the ancient Mediterranean; when governed by Rome, it provided natural resources to a vast empire. But what of its multiethnic and multilingual population (the indigenous Egyptians, Nubians, Jews, Romans, Greeks, Arabs who inhabited it) and how did Egypt in this period relate to the rest of Africa and neighboring ancient civilizations? By studying literary, documentary, and visual sources, we will examine several fascinating historical figures such as Alexander the Great, Ptolemy Philadelphus, and perhaps the most notorious woman in antiquity, Cleopatra VII. Students will also encounter first-hand evidence of daily life in this region through letters, contracts, petitions, and arrest warrants recorded on potsherds and papyri and preserved for millennia by the desert sands.

HIST225401

A Social History of Money in the World

Ismay, Penelope G

Fall 2024

Money, they say, makes the world go round. But what is it? How does it acquire value? Who or what says how much it is worth? This question has been answered in very different ways throughout time and throughout the world. Even today the meaning of money varies greatly. This course will explore the meaning of money mostly in ancient, medieval, modern Europe and America but we will also explore the meaning of money in non-Western parts of the world, as well.

HIST225901

When Women Ruled the British World: From Tudor England to Stuart Britain

Rafferty, Oliver P, SJ

Fall 2024

The period 1458-1714 shaped modern Britain religiously, politically and commercially. We shall examine how the Tudors came to power, and their failure to establish an enduring dynasty. With the advent of the Stuarts in 1603 "Britain" begins to emerge as one of the great European powers, a status it would keep well into the 20th century. In an era often dominated by ruthless men, four women would rule in England, although in Mary II's case jointly with her husband William of Orange.

Germany Divided and Reunited

Bowles, Daniel J

Fall 2024

Conducted in English.

Required for the German Studies minor.

Counts toward German major and German minor.

. This course provides a multi-dimensional look at post-war Germany, East and West. Politics, social and economic structure (East versus West), music, art, literature, philosophy (Critical Theory), the crisis and reform of the West German university system, the young generation, and Americanization will be discussed. Other topics include radicalism/extremism/protest movements (including terrorism), coping with the past (National Socialism), the Revolution of November 1989, and the legal ramifications and unsolved problems deriving from reunification.

Modern Latin America

Picone, Maria de los Angeles

Fall 2024

Fulfills the Non-Western Requirement for the History Major. This course will survey the history of Latin America and the Caribbean post-1800. It will provide a strong foundation of the major historical developments of the past two hundred years across the region. Although we will move chronologically, our discussions will swirl around five major themes: freedom and citizenship; modernity; resistance, rebellion, and repression; migrations; and the environment.

HIST240101

U.S. History I

Murphy, Thomas, SJ

Fall 2024

Fulfills the US History requirement for Majors. Followed in spring semester by HIST2402. This course is an introduction to United States History from the pre-Columbian Era to the end of the Civil War. The principal text will be the first volume of the textbook edition of Jill Lepore's *We Hold These Truths*. After considering the Indigenous settlement of North America, we will proceed through the era of European encounter with and settlement of the continent. Particular attention will be paid to the rise of the Trans-Atlantic Slave Trade, the emergence of American slaveholding, settler treatment of the Indigenous, and the consequences of the rivalries among European colonizing powers. Study of the English settlers struggle to obtain their rights within the British Empire will lead us into the American Revolution, the writing and implementation of the Constitution, and the struggles of the early American Republic to define itself, struggles which finally led to the fragmentation of the Union followed by its reunification by force of arms in 1865. This course is particularly suitable for students associated with the Lynch School of Education, but all are welcome.

HIST240601

This Land is Your Land: U. S. Environmental History

Valencius, Conevery B

Fall 2024

Fulfills the US History requirement for Majors How have different environments, places, and resources shaped American history? We will survey main themes and events in the environmental history of the United States. We move from colonial-era differences in land use through contemporary environmental debates. We ask how American communities have used, defined, and fought over places and natural resources, from bison herds to nuclear stockpiles. We investigate intriguing aspects of our local Massachusetts environment: the Emerald Necklace of parks, the brass hoof prints of Harvard Square, even our nearby reservoir. No background in history is necessary to thrive in this class. Students in the sciences are welcome.

HIST246301

We Gon' Be Alright: A Pop History of America

Bonilla, Eddie

Fall 2024

Fulfills US History requirement for History Majors. This course explores U.S. history via the development of popular culture. Students will study the creation and evolution of sports, music, television, and film industries to analyze how underground cultures such as hip hop and LGBT+ ballroom culture moved toward mainstream acceptance. Students will analyze a variety of sources including fashion, dance, cartoons, and radio. Course readings and assignments will also feature songs by musical artists such as Kendrick Lamar and television shows such as RuPaul's Drag Race. Students will gain an understanding of how race, gender, class, and sexuality shape the production and consumption of U.S. culture and vice versa.

HIST248101

African American History I

Conner, Mycah

Fall 2024

Fulfills the U.S. History requirement for History Majors. This course introduces undergraduates to African American history from the Middle Passage to the Civil War. Lectures, readings, and class discussions will call on students to analyze central topics in the field, including the meanings of African ancestry, shifting identifications, and the creation of a people; the intertwining of slavery and freedom in the colonial period; everyday life in the early republic; continuities and discontinuities in battles for freedom; and political organizing and resistance. Through a consideration of intellectual, labor, political, and social histories, the course invites students to examine and reinterpret narratives of black history "from slavery to freedom."

Introduction to Feminisms

Barko, Emily B

Fall 2024

This course may be used to satisfy one of four electives required within the Communication major. Fulfills Women Writer's requirement for ENGL/LSOE majors. This introductory course offers both an overview and a foundation for understanding the various movements that make up what has come to be called the feminist movement in the U.S. Because systems of privilege and disadvantage shape women's and men's identities and social positions in multiple and unique ways, Introduction to Feminisms analyzes gender from an interdisciplinary approach and applies numerous academic disciplinary methods to the study of gender, including history, literature, psychology, and sociology, and explores women's and men's experiences within various cultural contexts, including socioeconomic class, race, and ethnicity, religion and spirituality, nations of citizenship, origin, and generation.

HIST250801

Saints, Scoundrels, and Sinners: Popes and their Histories from St. Peter to Pope Francis

Rafferty, Oliver P, SJ

Fall 2024

This course will exam the evolution of one of the most enduring institutions in human history: the papacy. What were its origins, why it settled in Rome, how did it develop from its simple beginnings to become one of the most powerful organizations in medieval Europe and how did it lose its power? What was the relationship between popes and other powerful figures in history? More importantly we will exam the character, personality, and intellectual dispositions of the men who held the office of pope. We shall also investigate how the pope became infallible and the extent of papal corruption.

HIST251301

Global Black French Studies

Semley, Lorelle

Fall 2024

Since the era of the Atlantic slave trade, people of color in France's colonies spanning Africa, the Americas, and Asia have challenged what it has meant to be a part of and apart from French imaginings of nation and empire. Focusing on historical documents, memoirs, and visual media featuring people of African descent primarily in the Americas (including the Caribbean) and Africa (including North Africa), this course examines how the sociopolitical activity, artistic creation, and intellectual work by women and men from these regions have transformed France and a wider world. Fulfills the LAMA requirement for History Majors and Minors. Fulfills the PSI and BAC requirements for AADS Majors and BAC requirements for AADS Minors.

HIST270301

Is All Commerce Capitalism? Global Histories of Production, Exchange, and Power

Kent, Stacie A

Fall 2024

Fulfills the LAMA Requirement for History Majors Adam Smith famously wrote of "a certain propensity in human nature...to truck, barter, and exchange." Less than a century later Karl Marx observed that capitalism "cannot exist without constantly revolutionizing...the whole relations of society." This course examines both these propositions, asking what role exchange has played in human societies and in what sense capitalism is revolutionary. We study a global range of ancient, medieval, and modern trade networks, modes of production, and social meanings in and around exchange. We investigate connections trade fostered and where power inhered in the production, distribution, and consumption of goods.

Why New England is not Canada: Northern Borderlands to 1867

Murphy, Thomas, SJ

Fall 2024

Fulfills the U.S. requirement for History Majors. This course will examine the question of how the boundaries between the New England States and the eastern provinces of Canada were formed during the period between 1604 and 1814. Topics to be examined include the indigenous cultures of Northeastern North America, explorations of French and English adventurers along the Atlantic Coasts and in the interior, English and French patterns of settlement and relationships with the Indigenous, colonial warfare, the British conquest of New France, the American Revolution and the War of 1812. Particular attention will be paid to tensions over the North Atlantic Fisheries and to New England's dissent from the War of 1812.

The U.S. Presidency

Murphy, Thomas, SJ

Fall 2024

Fulfills US History requirement for History Majors. This course will provide a survey of the Presidency of the United States from its invention at the Constitutional Convention of 1787 to the present day. We will proceed chronologically through all the Presidents and their Administrations, with particular focus on Presidents who are traditionally regarded as less than successful. From this basis we will also spend considerable time on the issue of how all Presidents reputations tend to fluctuate over time. We will also discuss issues such as the expectations Americans traditionally place on Presidents and whether those are realistic. Each student will produce a final project on a particular President whose reputation and its ups and downs interest them.

HIST282401

Metropolitan America: Cities and Suburbs in the Twentieth Century

Glass, Michael

Fall 2024

Fulfills the US History requirement for History Majors. In 1920, a majority of Americans lived in cities for the first time. By 1990, a majority lived in suburbs. These dramatic shifts influenced every facet of life, from politics to economics, labor to culture. This course surveys these transformations in metropolitan America during the twentieth century. We will examine the history of the built environment; analyze changes in housing, business, work, and consumption; follow the movement of people, capital, and ideas; and assess how various institutions shaped the fate of urban and suburban communities.

Human Rights in East Asia

Hwang, Ingu

Fall 2024

This course introduces students to the post-1945 development of global human rights talk, activism, and politics from an East Asian perspective. Through an examination of specific conflicts over self-determination and sovereignty, economic development and disparity, democratization, the legacies of decolonization, and global justice and environment, the course delves into how and why actors in China, Japan, Hong Kong, Taiwan, South Korea, and North Korea translated local struggles into international human rights agendas that gained attention on the global stage. In exploring this process of translation and appropriation, we will also analyze how these local conflicts transformed international human rights issues. Fulfills the LAMA requirement for History Majors and Minors.

HIST302901

Study and Writing of History: Hiroshima in History and Memory

Seraphim, Franziska

Fall 2024

History Major Standing The atomic bombings of Hiroshima and Nagasaki in August 1945 affected Japan profoundly with repercussions around the world. In an effort to get beyond the U.S.-specific debate surrounding the decision to drop the bomb, this course offers opportunities to investigate, through original research, the social, political, and cultural history of memory that has unfolded since, in Japan and elsewhere. In the company of other new History majors, you learn how to formulate a historical research topic, collect and organize a variety of materials, analyze and interpret historical sources, and produce a piece of original historical writing.

HIST328101

Study and Writing of History: Gender and Genocide in Europe

Eaton, Nicole M

Fall 2024

History Major Standing. This course introduces students to the practice of history through intensive reading, research, and writing about the ways in which the concept of gender can be used to understand genocide and other mass violence. By focusing on case studies in twentieth-century Europe, students will explore how masculine and feminine roles shape women and men as victims, perpetrators, and bystanders. Through reading historians' interpretations and primary source documents, students will develop an independent research project and produce a 25 page paper based on original research.

HIST350201

Study and Writing of History: Jesuits and Indians

Stanwood, Owen C

Fall 2024

History Major Standing. This Study and Writing Course follows French Jesuit missionaries in their voyages around North America in the seventeenth and eighteenth centuries. Our topic will be less the Jesuits themselves than the world they encountered--and wrote about, in great detail, in a set of sources known as the Jesuit Relations. The Relations tell us not just about Jesuits, but about the Indians they attempted to convert, about French and English colonial societies, and about the North American environment. Students will use these rich sources to conduct their own original research.

China and the West: Law, Power, and Fantasy

Kent, Stacie A

Fall 2024

In this course students will study the history of diplomatic relations between China and dominant Euroamerican powers (Great Britain, the United States) from the 17th century to today. We will pay particular attention to the role of Euroamerican images of China and the Chinese people in shaping/distorting Euroamerican knowledge of China and the role that such images have played in the construction of state policies and geopolitical power dynamics.

HIST422101

The Vikings

Fleming, Robin

Fall 2024

This course will begin with an examination of fabled Norse cosmogony and then explore the "Old Sagas" and the "Icelandic Family Sagas," the former largely dedicated to heroic and epic/fantastic deeds, and the latter representative of life on a remote, often inclement, island. One primary goal is to explore how reliable sources are - annalistic, literary, and archeological. The course will also question how the Vikings influenced the world - from North America to Byzantium. It will close with an examination of "Viking assimilation," paying particular attention to the Anglo-Danish regnum, embodied in Cnut I, the "Viking" king of England.

HIST422201

Animals

Matus, Zachary A

Fall 2024

Animals--as pets, food, victims, endangered species or exhibits--traditionally have been defined by their relationship to human beings. Those relationships, however, change over time and do not always presuppose the animal's biological reality. Hence people put pigs on trial for murder, kept weasels to control the population of basilisks, and made a dog into a saint. This course examines the history of animals until the cusp of the modern age through four themes: the science of animals, the utility or danger of animals in agrarian life, laws pertaining to animals, and the religious symbolism and power of animals.

HIST422501

The Witch, the Church, and the Law

Reinburg, Virginia

Fall 2024

During the sixteenth and seventeenth centuries a convergence of political, social, and religious movements produced thousands of trials for crimes of witchcraft, sorcery, and superstition throughout Europe and in North America. This course explores these trials, particularly emphasizing their legal and ecclesiastical aspects. Related issues of popular belief in sorcery, magic, and diabolical activity will also be considered. Attention will be devoted to the question of why women were so frequently among the accused.

HIST423001

The Age of the Renaissance

Ross, Sarah

Fall 2024

During the late fourteenth century, Europe was attacked by the Four Horsemen of the apocalypse: Disease, War, Famine, and Death. In the face of widespread catastrophe, men and women began to seek stability and truth in new ways, within and beyond the confines of state and church. The sum of the many solutions they found is what we call the Renaissance (1350-1650). This course introduces students to cultural and intellectual developments in Italy and Northern Europe, as well as European encounters with the New World.

Read All About It!: British & Irish Press History

Scheopner, Erin Kate

Fall 2024

This course surveys the history of the British and Irish press in the twentieth century. It considers the political and commercial power of the press, the producers and consumers of the news, and the role of the press in reporting and deciding what is newsworthy. Together we will develop our critical understanding of the British and Irish press and the wider significance of the news media in historic and contemporary terms.

HIST426801

Brave New Worlds: Communist Utopias and Dystopias

Eaton, Nicole M

Fall 2024

Previously titled Socialist Techno-Utopias In the decades following the Russian Revolution, the Soviet state attempted to transform human society and the human species to bring about utopia. Soviet and other socialist scientists carried out numerous experiments in visionary biology, studying reproduction, immunity, and heredity in order to build proletarian new men and women; others sought to breed tame foxes, grow crops in winter, or explore the cosmos. This course explores socialist utopian visions through the social and cultural history of the experiments and their ideological and geopolitical underpinnings. The course focuses especially on their representations in film and fiction.

HIST440601**When France Ruled the World****Stanwood, Owen C****Fall 2024**

This course will examine the French experience in the Atlantic world from the sixteenth century through the Age of Revolution. We will examine the first attempts to explore and colonize the Americas, both north and south, the establishment of colonies in Canada and Louisiana, and the development of the slave trade and plantation colonies in the Caribbean. We will end with an examination of the global consequences of the French Revolution, especially in the establishment of the Republic of Haiti, the second independent nation in the western hemisphere.

Not open to students who have taken HIST4457. Fulfills the US History requirement for History Majors. How does gender shape immigration and migration? How does it influence the lived experiences of migrants in the workplaces, families and communities? How does it shape migrants' perceptions and assimilation into U.S. society? How does it intersect with transnational practices and imaginaries? We will consider these questions through a study of migration to and within the United States from the late-19th-century to the present. The class considers a broad range of racial and ethnic groups while also attending to certain categories of migrants in an effort to understand the role of gender, race, and class in migration.

HIST446601

Adoption and Kinship in America

Oh, Arissa H

Fall 2024

Fulfills the US History requirement for History Majors. In this class we will examine ideas of family and kinship by studying the history of adoption and family-making in the United States. How have Americans defined and enacted family and kinship? What is the relationship between these ideas and concepts of race, culture, class, gender, nation, rights, citizenship and identity? What do American practices of adoption tell us about how these concepts have changed over time? This course covers the period from the late 19th century to the late 20th century and examines policies, cultural representations, experiences and controversies through a variety of sources.

HIST448401

Gender and Sexuality in African American History

Summers, Martin A

Fall 2024

This course examines the intersections of gender and sexuality as both categories of identity and modes of power in the shaping of the historical experiences of African Americans. Through readings and lecture, we will explore three broad and interconnecting themes: how cultural understandings of race have impacted cultural understandings of gender and sexuality (and vice versa); how dominant cultural notions of gender and sexuality have underpinned relations of power between blacks and whites; and how gender and sexuality have shaped relationships within African American communities.

HIST460401

Revolutionaries, Diplomatic Theology, and Catholic Missionaries: Challenges in Twentieth-Century China

Carbonneau, Robert Edward

Fall 2024

This is a survey course. Each of these three groups challenged the witness of Catholicism in China since 1900. Understand how American ambassadors, business and military interests responded to Chinese political and social change. Learn how they then enabled zealous and adventurous Catholic missionaries to balance their dual identity as American citizens as well representatives of the Pope in Rome to preach the Gospel and provide social relief as China quested stability amid decades of war. Discover how the Nationalists led by Chiang Kai-shek and the Communists inspired by Mao Zedong responded to and tested the resolve of these missionary foreigners. After 1949, the focus shifts to see how the U.S., the Holy See, and international Chinese Catholics have had to renegotiate their participation pertaining to religious freedom and human rights in China till the present day. No background on Chinese history is required. Theology, history, political science and international relation students are welcome.

HIST540701

Senior Colloquium: Reading Reconstruction

Conner, Mycah

Fall 2024

Fulfills Senior Colloquium requirement for History Majors. This course offers senior History majors an opportunity to delve into the historiography of the wartime destruction of slavery and Reconstruction in the United States. By reading a selection of both classic and recent books and articles on the era, students will investigate how historians' interpretations have changed over time--paying close attention to their sources, their engagement with the work of other historians, periodization, regional focus, narrative scope, and approaches to central themes (like freedom, labor, land, capitalism, racism, citizenship, gender, the revolutionary character of the period vs. enduring or changing battles for freedom during and after Reconstruction's end).

HIST551201

Making History Public: Latinx Labor History

Bonilla, Eddie

Fall 2024

Fulfills the Senior Colloquium requirement for History Majors. Latinx workers are often invisible in our everyday lives, yet we are experiencing a resurgent labor movement that is making their exploitation visible. Students will engage with the contributions of Latinx workers in the steel, automobile, agriculture, and service industries, where they have historically provided critical labor power. Students will create community-engaged projects to analyze the industries where Latinx people are employed in Boston by working with community partners. This course features field trips and guest lectures as we focus on Latinx workers in New England, which continues to be a destination for people from different parts of Latin America.

HIST731301

Graduate Colloquium: Race, Culture and Power

Lal, Priya

Fall 2024

This course examines a wide variety of literature on race, culture, and identity. It will introduce students to major theories of race and provide an overview of the historiography of race through a selection of case studies from across the world. In particular, we will aim to make sense of how the category of race operates in relation to broader configurations of power within such social, political, and economic formations as empires, nations, and capitalism during the nineteenth and twentieth centuries. In doing so, we will pay close attention to intersecting forms of identity, such as gender, class, and religion.

HIST740001

Graduate Seminar: Thinking History Globally

Seraphim, Franziska

Fall 2024

This seminar provides guidance and community to students of modern history writing a chapter-length research paper on a topic of their choice. Our common quest is to explore, together and individually, how to think history globally whether in terms of connections, comparisons, concepts, or contexts. To the historian's preoccupation with temporality we bring an intentional focus on space, place, and scale, or the siting of our projects in their physical, social, or intellectual environs. Experimentation with the writing process is as important an objective as improving structure and argument of the written text, and non-textual sources are encouraged.

HIST770501

Reading the Past in an Uncertain Present: The Lessons of Early Modern Ireland and the MACMORRIS DH Project

Palmer, Patricia

Fall 2024

Early modern Ireland is one of the places where modernity is trialled. The extreme violence of the Tudor and Stuart conquest, the settlement of English and Scots in the plantations which followed, the displacement of native elites by an incoming Protestant ascendancy create a template for English/British colonisation in North America and beyond. At the same time, colonial approaches to the land and its resources made Ireland a laboratory for extractive practices which, in time, lead to the Anthropocene. But the fascination of early modern Ireland is that colonial perspectives did not go unchallenged. Irish writers offered very different perspectives on violence, property, the built environment, and the natural world. Those unfamiliar perspectives still have the power to challenge orientations to the world which are as destructive as they are hegemonic. MACMORRIS, a decolonial DH project led by Prof Palmer, brings the work figures like Edmund Spenser, Sir Walter Raleigh, Thomas Herriot together with less familiar voices from early modern Ireland, writing in Irish, Spanish, Latin, and Italian (and available in translation on the website). This course will explore the potential of DH to decolonise the archive and it will explore how that more inclusive and polyphonic record might help us to think not only about the past but the present. For more on the MACMORRIS project, see <https://macmorris.maynoothuniversity.ie/> or listen to Pat Palmer talking about it here: <https://podcasts.apple.com/ie/podcast/history-hub/id464561881?i=1000632037706>

Fall 2024

This graduate colloquium is required for first year masters students in history. In it, we will explore the basics of a career as a professional historian, exploring the concepts of history, historiography and theory, and practicing how to conduct research, write a variety of historical pieces, teach, design courses, and create museum exhibits. We will also look at how to apply the skills used in graduate school to finding a future either in the academy or an academic career.

HIST80001

Colloquium: Introduction to Doctoral Studies

Pendas, Devin O

Fall 2024

This graduate colloquium is required for and limited to first-year doctoral students in history. The course will explore a range of theoretical and methodological approaches to the study of the past. Exemplary works from a range of regional historiographies will constitute a significant portion of the course reading. The course aims to introduce entering students to central traditions and debates in the discipline.

HIST821001

Graduate Seminar: Medieval History

Fleming, Robin

Fall 2024

Students in this seminar will write original research papers on some topic in medieval social, economic or political history. The topic will be one upon which the student and professor have agreed, and will be based primarily on original sources. Students will not only be required to write a paper, but to read and critique all papers written in the seminar. The final paper will be a polished and rewritten piece incorporating the critiques of the professor and other graduate students in the seminar.

History Courses: Spring 2025

HIST100601

Asia in the World II

Seraphim, Franziska

Spring 2025

This course examines Asia in the shaping of the modern world, from competing definitions of empires circa 1800 to the rise of the notion of the twenty-first century as a "Pacific Century." It investigates the definition(s) of Asia as a world region, explores transnational interactions, and emphasizes Asians as historical actors via written, visual, and aural sources. Events are placed in the context of key historical paradigms, including varying definitions of modernity, the rise of the nation-state, the birth of mass politics, new mechanisms of war, the language of self-determination, changing views of gender, shifting types of media/consumption, etc.

HIST101101

Atlantic Worlds I

Stanwood, Owen C

Spring 2025

Fulfills the History Core I Requirement This course surveys the history of the Atlantic world between the arrival of the Black Death in Europe in the mid-fourteenth century and the French Revolution at the end of the eighteenth century. We will pay particular attention to the ways in which the often violent encounters between people in this region of the world produced new social, cultural, and economic forms. Among these were ideas about gender, race, and the relationship between communities and individuals; notions of equality; and the emergence of a global system of trade.

This class explores the creation of modern America in a global context. We will trace how the United States, the wealthiest and most powerful global hegemon in history, grew out of collisions, at home and abroad, of and among people, ideas, institutions, and cultures. The United States cannot be understood without consideration of its debts to, engagement with, and all-too-often hostility toward the inhabitants of other nations. We will accordingly pay close attention to exchanges with Europe, Africa, and especially the Middle East and Asia.

This course is the first half of the History Core. Offered in the spring semester of the academic year. Fulfills the Core History I requirement.. This course covers several centuries of time (prior to 1800) and traces the political, social, economic, and cultural changes that created the modern world. Depending on the expertise of the instructor, different parts of the world may serve as focal points for examining the complex historical processes behind modern-day transnational relationships, values, and ideas. As part of the Core Curriculum, this course seeks to broaden students' intellectual horizons by exposing them to new places, periods, and perspectives.

HIST162101

The "Other" Americans: Representation and Reality in Asian America

Oh, Arissa H

Spring 2025

This is a Complex Problem course and is open to FRESHMEN only. You must take both HIST1621 and UNAS1729. Asian American history is American history. It is simply not possible to understand why the United States looks the way it does today without understanding the roles American interactions with Asian nations and people have played in the development of U.S. society. Despite being key figures in immigration, trade, and foreign policies and domestic contests around race, class, gender, and sexuality, Asians in America are continuously (un)seen as the Other Americans. This course will explore the history and mediated representations of Asians in the U.S. to understand how U.S. society has constructed Asians in America and how Asian Americans have sought to speak for themselves. By analyzing primary sources, films, television, and digital media - as well as producing their own media based on historical materials - students will critically engage with U.S. history as both historians and media producers to examine the complex ways Asian Americans have shaped America itself.

HIST171701

Consumer Culture: Past, Present, and the Fate of the Planet

Fleming, Robin

Spring 2025

This is a Complex Problem course and is open to FRESHMEN only. You must take both SOCY1714 and HIST1717. Although we are increasingly aware that our habits of consumption affect the environment, it is hard to imagine that consuming patterns can be changed. In this course, students will learn that practices of consumption are both socially and historically constructed, that they change dramatically over time, and that there are (and always have been) urgent moral issues connected to these ways of life. We will explore the global, social, and environmental dimensions of consumption, studying things like the 1897 Sears catalog, 1950s television shows, Canada Goose jackets, DIY manuals and makerspaces, and hippy cookbooks of the 1960s.

HIST171801

How Sports Explain America: The History of Sports in the United States

Mogan, Thomas

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both HIST1718 and SOCY1718. How have sports served to define and illustrate the essence of American society and culture throughout history and in contemporary times? These paired courses will explore the complex relationship between sports and society. Through an interdisciplinary approach to history and sociology, students will analyze the evolution of sports, assess how they mirror the changing dynamics of American society and culture, and investigate the multifaceted roles sports have played and continue to play in shaping our society. By the end of these courses, students will understand how sports serve as a microcosm of American society and a platform for social change, fostering critical thinking and a deep appreciation of the nation's cultural fabric.

HIST172201

The Just City: Global Perspectives on Power and Social Difference

Guadarrama Dominguez, Luis Andrei

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both HIST1722 and ENVS1737. How can we create just cities? In an urbanizing world, contemporary cities are characterized by the production and reproduction of social and environmental inequalities. While cities are uneven landscapes, they are also laboratories for social and environmental justice. But how do urban inequalities work? What makes a more just city? These paired courses investigate these questions from social, global, and environmental perspectives. We will discuss how city-building and suburbanization are mediated through natural resources and infrastructural systems that shape structures of race, ethnicity, gender, class, and age. Students will cultivate their own interdisciplinary frameworks of social and environmental justice as a step toward becoming informed global citizens.

HIST172301

Imperial Designs: Colonizing History

Shlala, Elizabeth H

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both ARTH1110 and HIST1723. Who owns the past and its artifacts? In this course pairing, we will examine the enduring ideas of empires and their challengers through the present day. These courses interrogate an enduring facet of the attitude of the imperial center toward places, spaces, and peoples: the impulse to chart, divide, name, claim, and portray. Using historical maps as our point of departure, we will investigate how these imperial impulses, made manifest in shifting constructs of ownership and otherness, extended beyond physical territories to encompass - to colonize - bodies and minds. Probing the visual, material, and embodied legacies of conquest in the Mediterranean context affords insight into the borders and boundaries still imposed today.

HIST172701

War and Peace: History and Literary Truths

Eaton, Nicole M

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both HIST1727 and UNAS1715. How does War and Peace speak through its historical context and as a description of a perennial human situation? War and Peace is a great and massive novel. Its primary subject, the effect of the Napoleonic Wars on Russia, may seem distant from our contemporary concerns. Yet its fundamental questions - "How shall I live and what is worth dying for? Is war a necessary evil, or something greater, or different? How does our social-historical experience construct our identity?" - are as relevant today as ever. Approaching these and other questions from our separate disciplines, we will attend both to the historical and literary context in which War and Peace was written and to the ways it speaks to us today.

HIST180101

The Age of Revolutions

Reinburg, Virginia

Spring 2025

This course explores the intertwined histories of three revolutions that changed the world: the French, Haitian, and American revolutions. We will learn about old regime societies and states in Europe, empires and colonization, politics, social movements, the slave trade, racism, and the role of ideas in sparking revolutions and carrying them forward into the future. Throughout the course we will examine large scale social, material, and political forces, as well as the individuals and communities that created or resisted revolutionary change.

Core Topics: Colonial Latin America

Sellers-Garcia, Sylvia M

Spring 2025

Anchored in close readings of primary sources, particularly the first-person accounts of contemporaries, this course considers the history of Latin America from the pre-contact period to roughly 1800. It follows the individual, communal, institutional, and national stories of transformation in order to understand how people in this region became "Latin American."

Early to Feudal Japan: Peasants, Nobles, & Shoguns

Ucerler, M Antoni J, SJ

Spring 2025

Fulfills the LAMA Requirement for the History Major. This course is an introductory survey of ancient, medieval, and premodern Japanese history, from the earliest records to the beginning of the Edo shogunate in 1603. From early Jomon settlements thousands of years ago, the introduction of Chinese Buddhism through Korea ca. 552, and the worlds first novel (and science fiction story) composed in the tenth century, to the artistic and literary splendor of the Heian Court in medieval Kyoto and the drama of its Samurai military heritage all of which inspired contemporary manga and anime Japans complex past continues to intrigue and capture the imagination of the present age.

Greek History

Thatcher, Mark R

Spring 2025

A study of the history of Greece from the Bronze Age in the second millennium BCE to the preeminence of Alexander of Macedon in the 4th century. The course will focus on such broad topics as the development of Greek social and political institutions, notions of justice, freedom, and Greek identity, relations among Greek city-states and with foreign nations, imperialism, the golden age of Greek literature, and the rise of Macedonian monarchy. Emphasis will be on the study of the ancient sources: literary, historiographic, archaeological, and epigraphic.

HIST221001

The Secrets of Venice, from Global Player to Tourist Trap

Ross, Sarah

Spring 2025

How did a strange collection of buildings perched in an Adriatic lagoon become a major player in global economics, politics, and culture during the Renaissance era? How could a self-proclaimed "republic" justify imperial projects? How could a Catholic state devoted to the Virgin Mary also harbor bawdy theater, prostitution, and heresy? How did the city of Venice survive as a tourist trap after Napoleon dissolved the Republic in 1797? This course answers these questions, tracing itineraries not only through the main waterways but also through the narrow canals of Venice's often murky (and mucky) history.

HIST223001**Science before the Scientific Revolution****Matus, Zachary A****Spring 2025**

The advent of modern science in the western world was never a necessary outcome of Western intellectual activity. Yet histories of science frequently spin a tale of intellectual progress leading inexorably to scientific thinking (and hint at brighter futures to come). This course examines the technologies and philosophical tools that would give rise to science, but with an eye to their historical contexts and their many non-scientific aspects. We especially will focus on how pre-modern medicine, astronomy, and alchemy relate, or do not, to their modern counterparts.

HIST225101

The Credit Nexus: The Secret History of the Economy in Britain, 1600s-1900s

Ismay, Penelope G

Spring 2025

In his "Wealth of Nations," Adam Smith pointed to the shift from barter to cash as the critical turning point from a feudal to a modern economy in Britain. Unlike barter, cash was capable of facilitating anonymous exchange between strangers, greatly increasing the scope for economic growth. Recently, however, scholars have discovered that the vast majority of economic exchanges in Britain in Smith's era were conducted on the basis of credit rather than cash. And this credit was largely personal, connecting thousands of individuals in networks of trust. This course will examine this new social history of the British economy.

The British Empire: Its Rise and Fall

Rafferty, Oliver P, SJ

Spring 2025

How did a relatively small country at the edge of Europe come to acquire the largest empire in history? At its height it covered 24% of the earth's surface. How was it built up? What sustained it? What were the political, diplomatic, and military accomplishments of this empire "o'er which the sun never set?" Beginning with Colonial America this course will trace the history of the empire, and the men and women who shaped it, from the loss of the American colonies in 1781 to the handover of Hong Kong to China in 1997.

U.S. Political History since 1968

Glass, Michael

Spring 2025

Fulfills the U.S. History requirement for History Majors. This course explores the significant political developments that shaped the past fifty years of U.S. history, an era notable for declining faith in government, new rights claims by marginalized citizens, growing partisan polarization, and widening inequality. In addition to tracing the transformation of political parties and their ideological coalitions, we will also ask how social, economic, and cultural changes have influenced political life. Topics include the evolution of 1960s social movements, the rise of the religious Right, the War on Drugs and the carceral state, the AIDS crisis, the politics of globalization, the 2008 financial crisis, and the gig economy.

HIST251201

The Jesuits: A Secret History

Murphy, Thomas, SJ; Rafferty, Oliver P, SJ

Spring 2025

Boston College is a Jesuit university. But who exactly are the Jesuits. How did they come by their reputation as intellectual leaders in the Catholic Church? Admired and reviled in equal measure they were abolished in 1773 only to be restored in 1814. Although Jesuits take a special oath of loyalty to the pope, many popes distrusted them. They built a great missionary empire in the East and in the West, which engendered political opposition to the order. Regarded as hyper-reactionary for most of the 19th and 20th centuries, they now have a reputation for liberalism. How did this come about? These and other questions touching on the nature and constitution of the order will be examined in the course of the semester.

HIST280401

Irish America

Murphy, Thomas, SJ

Spring 2025

Fulfills US History requirement for History Majors. This course will focus on the history of the Irish Diaspora to America from the beginning of the colonial period to the creation of the Irish Free State in 1922 and the end of the Irish Civil War the following year. The course will begin with consideration of English intervention in Ireland during the Tudor and Stuart periods, with special emphasis on how colonization and conquest in Ireland set templates for the English colonization of what became the original thirteen United States. Attention will then shift to the first wave of Ulster migration to America during the Pre-Revolutionary War period. The focus will next include Irish political refugees to the United States following the failed rebellion of 1798, and then the issue of mass immigration during the Famine of 1845-1850 and beyond. The course will conclude with the interaction between Irish Americans and Irish Nationalism during the period leading to the Easter Uprising and its aftermath. Issues to be addressed will include Irish immigrant involvement in American politics, the devotional revolution in the Roman Catholic Church, the labor movement, the women's rights movement, Irish American support for radical politics and independence in Ireland itself, and Irish American interaction with other oppressed and marginalized groups in American society.

HIST325601

Study and Writing of History: Odd Women to the New Women

Ismay, Penelope G

Spring 2025

History Major Standing In the second half of the nineteenth century in Britain, it was discovered that 30% of women of marriageable age remained unmarried. Contemporary observers were alarmed, dubbing it the "redundant woman problem." They proposed shipping these "odd women" off to male-rich colonies. But in addition to proposals for emigration, a number of women started organizations to train these women in occupations that were respectable and could enable them to live independently. In this class, we will use women's magazines to explore why being single in this period was considered so dangerous and how this problem ultimately produced the "new woman."

HIST336401

Study and Writing of History: Space before Google Maps: Geography and Power

Picone, Maria de los Angeles

Spring 2025

History Major Standing. The omnipresence of Google Maps in our lives has homogenized the way we think about space, or at least the way we find places in space. This course will look at how past societies visualized space and, particularly, what geographical space can tell us about power structures. Through a number of case studies from around the world, we will explore how historians incorporate geographical space to historical analysis, the sources they use, and the methodological questions they raise. After examining case studies from the last two centuries, students will produce a research paper on a topic of their choice.

HIST343401

The Study and Writing of History: Union in Crisis: Newspapers and the Coming of the Civil War

Lyerly, Cynthia L

Spring 2025

History Major Standing. Newspapers in the 1850s were fiercely partisan and intensely sectional. Editors disagreed vehemently with one another about the meaning and importance of events such as the Compromise of 1850, Bleeding Kansas, the Dred Scott decision, and the caning of Charles Sumner, and they also often disagreed about what actually happened. In this seminar, students will write major research papers analyzing some aspect of newspapers' partisan and sectional coverage of the events leading to the Civil War. The course is designed to teach students how historians research, develop a thesis, organize their findings, and write their analysis from start to finish.

Korean War: Conflict, Security, and Peace

Hwang, Ingu

Spring 2025

The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace. This course fulfills the LAMA requirement for History majors.

HIST413301

Mid-East Nationalisms Compared: Arab-Turkish-Jewish

Braude, Benjamin

Spring 2025

Fulfills the LAMA requirement for History Majors and Minors. Nationalisms in the Middle East developed in a distinctive way. In contrast to Europe, religion was more important than language. In contrast to Africa, they emerged prior to the rise of anti-colonialism. Although nationalisms in the Middle East have spawned conflicts within themselves and with each other, they have displayed remarkable similarities to each other. One consistent similarity is their fraught attempts to distinguish the so-called nation from the religious traditions out of which it emerged. This course will address these questions through comparing Arab, Jewish and Turkish nationalism in the 19th and 20th centuries.

HIST416101**Sex and Society in African History****Semley, Lorelle****Spring 2025**

Fulfills LAMA requirement for History Majors and Minors. Common images of African women and men paint a confusing picture. Sometimes African women are portrayed as vulnerable and in need. In other examples, African women are seen as bold and innovative in a changing African landscape. Gender histories elucidate the African past and present in new ways. Key themes include enslavement, state-building, colonialism, nationalism, apartheid, and democratization. Theoretical pieces, interviews, memoir, fiction, and film cover the major regions of the continent. Moving beyond simple stereotypes in African contexts helps us think differently about relationships between people and society, more globally.

HIST421101

Roman Religion

Eshleman, Kendra J

Spring 2025

The Romans lived in a world full of gods; religion affected every part of Roman life, from politics to warfare to entertainment. Christianity took shape within this world, and Roman religion, especially the mystery cults, has often been regarded as a model for the early church. Yet the Roman concept of 'religion' has very little in common with modern, Judeo-Christian-influenced notions. In this class we will explore the theory and practice of religion in the ancient Roman world, as reflected in ancient literary texts, as well as in epigraphic and archaeological evidence. Themes include the nature of Roman worship, from state cult to magic and mysteries, the interplay between religion and politics, and the development of Christianity in its pagan context.

The Inquisition in Spain and Spanish America

Sellers-Garcia, Sylvia M

Spring 2025

Fulfills the LAMA requirement for History Majors and Minors. This lecture and discussion course for advanced students will consider the development of the Spanish Inquisition from its medieval roots to its early nineteenth-century demise. Divided roughly between Spain and the Americas, we will consider the following topics: the medieval co-existence of Jews, Muslims, and Christians in Spain; the "re-conquest" of the Iberian peninsula in the 15th century and the formation of the inquisition; the theological debates of the 16th century that determined the scope of heresy. Our focus will be on using the Inquisition as an insight into early modern culture in both Spain and the Americas.

HIST441601

Slavery and Emancipation in the U.S.

Conner, Mycah

Spring 2025

Fulfills the US History Requirement for Majors This course examines histories of slavery and abolition in the United States from the transatlantic slave trade through the Civil War. It attends to confrontations and transformations across scale and context--rural and urban; north and south; regional and national. Topics include the everyday lives, toil, and strategies of enslaved people, and their battles with slaveholders; the expansion of slavery and the domestic trade; the centrality of slavery and battles over it in American politics and daily life; anti-slavery and/vs. abolitionist movements; slavery and gender; slavery and capitalism; the wartime destruction of slavery; the post-war expectations and demands of freedpeople.

HIST442701

Early Medieval Art in Ireland and Britain

Netzer, Nancy D

Spring 2025

The course will examine the development of art in Ireland and Britain in the Early Medieval period and the production of Irish and English missionaries on the Continent. Emphasis will be placed on the following: 1. manuscripts, sculpture, and metalwork of the sixth to ninth century 2. understanding works of art in their historical contexts 3. sources of the works in the Celtic, Germanic and Mediterranean worlds 4. circumstances under which artists and scribes worked 5. the complex problem of defining local styles 6. complexities of dating works of art 7. evidence yielded through excavation of principal archaeological sites 8. de-constructing the scholarship in the field over the last two centuries. 9. placing new archaeological finds in the art historical narrative 10. the role of Irish manuscripts, metalwork, and sculpture in the Celtic Revival and as national monuments 11. misappropriations of Celtic and Anglo-Saxon symbols (i.e. Celtic Cross and Runes) by white supremacists

HIST444301

America in the 1990s

Glass, Michael

Spring 2025

Fulfills the U.S. requirement for History Majors. The 1990s is popularly remembered as the decade of baggy jeans, reality television, Beanie Babies, flip phones, and neon colors. But the 1990s witnessed dramatic transformations in America and the world. The Cold War ended, the welfare state retracted, political parties became more polarized, immigration diversified, mass incarceration expanded, the AIDS crisis persisted, and the Internet became commonplace. In this seminar we will examine these changes in American politics and society, as well as analyze the cultural texts (songs, films, fashion, and other phenomena) that reflected and shaped the period.

HIST447701

Drugs and Money

Kent, Stacie A

Spring 2025

Fulfills the LAMA Requirement for History Majors Amidst the current U.S. opioid epidemic, this course investigates how the pursuit of profit has intersected with constructions of health, illness, and social vice. Where and how have states and societies supported or tolerated widespread narcotic use? By the same token, what social, economic, and political processes transform use into social shame or criminal behavior? The course will look at the centuries-long opium trade between British India and China, the early history of commercial opioids around the world, and compare two U.S. epidemics in their global and local dimensions crack cocaine in the 1980s and opioids in the 2000s.

HIST451301

Neurodiversity Past and Present

Lal, Priya

Spring 2025

In recent years, growing rates of diagnosis of conditions like ADHD and autism have produced a burgeoning social movement to celebrate neurodiversity and demand social supports for neurodivergent individuals. While scientists advance our understanding of neurodivergences biological mechanisms, and popular awareness of neurodiversity increases, historians have yet to take a meaningful neurodiversity turn. This class draws on interdisciplinary scholarship to ask: how has neurodiversity been understood by doctors, educators, and the broader public in the past? How has invisible neurodivergence shaped human experience historically? How does neurodiversity relate to other categories of difference like race, class, and gender?

HIST455101

American Hate

Lyerly, Cynthia L

Spring 2025

Fulfills the US History requirement for History Majors Racism is, unfortunately, as American as apple pie and baseball. This course explores the roots of racial hatred and the changes in American racism over time. In addition to studying the ideas that buttress racism, this course will examine case studies of racism in practice, such as the Tuskegee syphilis experiment, convict leasing, segregated recreation, the Trail of Tears and Japanese internment.

HIST470501

In the Eye of the Hurricane: An Environmental History of Latin America

Picone, Maria de los Angeles

Spring 2025

Fulfills the LAMA requirement for History Majors and Minors How did mosquitoes shape empires? How did bananas topple regimes? How did an ocean current change a countrys diet? These are some of the questions we will address in this course, weaving together two threads of inquiry. We will study historical ideas about nature, science, extraction, and technology, as they appeared embedded in specific power structures. On the other, we will examine the impact of the physical environment on human history in the form of weather events, crop diseases, or topographies. Discussions will also highlight issues around the commodification of nature, climate change, and environmental justice.

HIST480201

History of Christianity in China

Mariani, Paul

Spring 2025

Fulfills the LAMA requirement for History Majors and Minors. The history of Christianity in China from the seventh century to the present. We will explore the earliest evidence of Christianity in China, the Franciscan missions to the Mongols, the arrival of the Jesuits, the Chinese rites controversy, the persecution of Christianity, the rise of Protestant missions, and the explosive growth of Christianity in China today. We will also explore issues of church-state conflict, religious debate and conversion, and the complex interplay between foreign missions and Chinese developments. We end with a discussion of the current surveillance and control of Christianity in China.

HIST483101

Protest & Politics in Thatcher's Britain & Northern Ireland, 1979-1990

Young, Rachael A

Spring 2025

Considered one of the most tumultuous times in post-war Britain, this course examines the period from 1979-1990 when Margaret Thatcher was Prime Minister of Great Britain and Northern Ireland. With increased cuts in public spending, accusations of racial inequality, a continuation of Northern Ireland's Troubles, and the steady decline of the global empire, vocal and violent opposition to Thatcher's policies grew throughout the 1980s. This course examines the politics of Thatcher and the politics of communities who protested against her. The class also analyzes the music, poetry, art, and film created during the 1980s to understand the culture of community protests created to combat Thatcher's neo-liberal policies.

HIST483501

The Irish Revolution: Living, Fighting and Dying in Ireland, 1916-1923

Nic Dhaibheid, Caoimhe

Spring 2025

This course explores Ireland's revolution, including the rise of Irish republicanism and the partition of the island amidst bloody sectarian and political violence. Among the issues examined are the paramilitarisation of political culture, the nature and dynamics of revolutionary violence, and the entrenchment of divisions. Above all, the sense of what it was like to live through a revolution, as a rebel, a policeman, a soldier or a civilian, is a key unifying theme of this course. Together we shall explore the rich primary sources of the period, including personal correspondence, diaries, propaganda, witness statements, newspapers and police/army reports.

HIST527601

Senior Colloquium: Remembering 1968

Savage, Robert J, Jr.

Spring 2025

Senior History Major Standing. This interdisciplinary colloquium will use 1968 to explore the intersection of memory, popular culture, history and radical politics. We address political and social unrest during that year in the United States, Northern Ireland/Britain and Czechoslovakia. This will be done by addressing the Black Civil Rights movement and anti-Vietnam protests in the United States, the campaign for Civil Rights and outbreak of the Troubles in Northern Ireland and the attempt by Czechoslovakia to embrace political reform and socialism with a human face. Students will read autobiography and commentary by figures including Tim O'Brien, Bernadette Devlin, Angela Davis and Vaclav Havel.

Credits: 3

HIST540401

Senior Colloquium: Energy History

Valencius, Conevery B

Spring 2025

Daily lives depend on oil, gas, and electricity, and yet many of us know little of how energy arrives at homes and businesses or why our energy systems function as they do. This Senior Colloquium focuses on the history of energy sources and technologies, the networks that transport power, and the diverse communities and sprawling companies that purchase, use, and fight over energy supplies. We will anchor in US history but reach out to histories of other countries. We will read and discuss recent exciting books and articles. Students will compose several short analysis papers and write a final comparative analysis involving two books of their own choosing. Main skills: keen writing, sharp analysis, clear oral presentation, useful collaboration, efficient research.

HIST730301

Colloquium: Gender History and the Scholar's Craft Today

Ross, Sarah

Spring 2025

Familiarity with the issues and concepts of gender history constitutes essential preparation for graduate students entering the historical profession today. This course offers an introduction to the theories, methods and sources of gender history. Engaging scholarship from the 1980s to the present, we will examine gender history's divergence from social and women's history, convergence with post-structuralism and the linguistic turn and impact upon new lines of inquiry the history of sexuality, transnational and global history. The final component of the course is a tailored practicum: students will assess recent applications of gender analysis in their own research field.

Graduate Colloquium: Early America in an Atlantic World

Stanwood, Owen C

Spring 2025

This colloquium will survey some of the greatest works, both classic and recent, in the history of North America before around 1850. More than that, we will put that continent in an Atlantic context, connecting its story with Europe, Africa, Latin America, and the Caribbean. We will pay particular attention to processes of enslaved and free migration, the formation of empires, and the transatlantic movement of ideas and political movements. Students will have the option of writing a seminar paper based on original research.

Graduate Seminar: U.S. Before 1900

Conner, Mycah

Spring 2025

This graduate seminar studies key questions, debates, and transformations in the field(s) of U.S. history from the colonial period through the Gilded Age, entering the Progressive Era (or the Nadir). Students will read a selection of both recent and classic writings across subfields, including social, labor, political, and intellectual histories. Students will analyze historians' methods, their selection and interpretation of sources, and matters of storytelling and craft. Students will write original research papers on a topic of their choosing, with the goal of presenting at an academic conference, or transforming their papers into articles for publication in a scholarly journal.

HIST827501

Capstone: Digital Humanities as Public Scholarship

LoPiano, Antonio

Spring 2025

Many schools across the United States teach different versions of survey classes for which instructors have to reach outside their own focuses. To do so, those instructors often search for visualizations of historical change, literary development, and examinations of religious networks, depending on the field and course. In this capstone, graduate students will develop projects within their areas of specializations to produce digestible digital exhibits, visualizations, and more that can be made freely available to scholars across the world. The goal would be to promote the free exchange of high quality information and digital sources available in the public domain. Furthermore, through the capstone, students should understand the process of a project from conception to presentation. They should have developed skills engaging metadata, transcription, the process of digitization, and more. Students can bring their own research data from their dissertation project or from previous coursework, or they can be provided with a historical or literary dataset from the Boston College Libraries to utilize over the semester. There are four phases to the class, beginning with performing an environmental scan and writing a proposal for their project. In Phase II and III, students will implement and carry out their projects. Finally in Phase IV, students will engage in peer consulting and prepare their work for online publication.

International Studies Courses: Summer 2024

INTL225101

Food, Power, and Politics

Nakazato, Hiroshi

Summer 2024

This course will seek to provide an intellectual and analytical-driven framework around the question of food as an integral part of any human experience, but particularly our experience with food through across cultures. We each have a unique opportunity to understand better the role of food in each of our lives as we move through this summer program by examining our own cultural and political assumptions and those of others from a new point of view. We can appreciate the lenses brought by other individuals, cultures and places to the acts of eating and producing food. Finally, we can express the human experience of food in ways that represent our understandings, experiences and vision for a healthy, just and pleasurable relationship to food in ways that can be shared and appreciated by others. In eating and producing food, we exist simultaneously in a deeply personal and communal place, a place of the present, past and future in which we are never more and less than human.

Aspects of Economic Growth

Ozkara, Yusuf

Summer 2024

This course aims at providing both the theory and empirics of modern economic growth theories. In addition to Classical and Neoclassical economic growth approaches, current views such as endogenous growth theory will be discussed. Emphasis will be placed on why some countries lag behind others and ways to solve this problem. The factors that are affecting economic growth such as technology, capital accumulation, change in employment, education, human capital, saving, energy consumption, democracy are studied in detail. The course also addresses the role of financial markets and policy formulation of economic growth.

Contentious History and the Politics of Contemporary Korea

Hwang, Ingu

Summer 2024

This introductory immersion course surveys the contentious intersection between history and politics in contemporary Korea. Students will explore the following questions: What were the critical historical experiences and issues that became part of the public discourse and catalyzed political contestations in local and international/global communities? Why did these issues become contentious and for whom? What actions and counteractions did they inspire? In critically examining these questions, students will address four topics: postcolonial disputes, national division, economic development and social justice, and (post-)democratization protests. To facilitate in-class discussions, students need to engage critically with textual and media sources. They are also required to actively participate in the historical and cultural immersion/excursion programs, including the National Museum of Korean Contemporary History, the DMZ tour, and the Kim Dae-jung Presidential Library and Museum.

INTL354101

Research Methods in Political Science

Krause, Peter J

Summer 2024

Rigorous, systematic research methods are at the foundation of quality scholarship for students and professors alike, but many students find research methods scary and/or boring to learn. This class will introduce students to a wide array of research methods in an engaging, accessible way. Students will get hands-on training in how to ask good question, generate their own original arguments, define and measure their concepts, and set up and carry out sophisticated research designs. Along the way, students will learn the basics of archival research, interviews, surveys, case studies, and statistical analysis. The course focuses on applied methods using scholarship and examples from political science, international studies, history, psychology, and sociology. The course is designed for students to write the best paper they have ever written. Every week, student assignments are learning and applying one of these skills to their paper project, so that by the end of the semester they have a well-written, original research paper with an engaging question, well framed arguments, and in-depth comparative case study analysis. This is a great course for students thinking about writing a thesis, pursuing a research-focused career, or for those who simply want to supercharge their analytical skills, in this class and in others.

Where on Earth: Foundations in Global History

Grube, Eric B

Fall 2024

International Studies majors, rising Sophomores (Class of 2025) for AY 2021-2022 This course will introduce International Studies majors to a range of contemporary global issues and their historical genealogies. Issues to be covered will include global capitalism, colonialism, nationalism, global governance, migration, and climate change.

Credits: 3**Room and Schedule:** 245 Beacon Street Room 107 MW 04:30PM-05:45PM**Satisfies Core Requirement:** History II,Cultural Diversity**Prerequisites:** None**Corequisites:** INTL2204**Cross-listed with:** None**Frequency:** Every Fall**Student Level:** Undergraduate**Comments:** None**Status:** Offered**INTL220401****Where on Earth: Foundations in Global Culture & Political Geography****Getzoff, Joseph****Fall 2024**

Restricted for rising sophomores, International Studies Majors

Where on Earth introduces you to the International Studies Program, offering you different approaches to analyzing geographic and historic phenomena in order to understand our current world. Where on Earth: Foundations in Political Geography and Global Cultures draws from the way that the discipline of Geography and the other social sciences understand the production of politics and culture as both locally and globally contingent that is, no phenomena are discretely produced within the bounds of the nation-state, while simultaneously they reflect localized histories, cultures, and political-economy. We will engage with many themes and topics that explore the structural and interconnected causes of global issues: we will look at histories of colonialism and how they reverberate into the present, at the institutions of borders and nation-states, how economic systems shape our world, how different ideas about race, gender, and class are intertwined with local and global cultural and social forces, developmental policy and debate, the science and politics of climate change, and engage with critical questions of environmental and social justice in an ever changing and globalized world. We will not focus on any one region, instead opting for a global survey of cases that will allow us to critically interrogate the uneven production of space and strive to understand different approaches to addressing global inequality. Students will complete a number of reading reflections and two exams, and work with their peers on collaborative assignments.

Concepts, Cases, and Contexts of Nationalism

Prodromou, Elizabeth

Fall 2024

The phenomenon of nationalism has changed the course of world history and continues to shape current patterns of international relations. This course explores the foundations of nationalismits European origins, global dissemination, local expressions; its inclusivist expressions giving pride of place to human dignity, freedom, and equality before the law, and its exclusivist expressions built on ascriptive categories of race and ethnicity; its drivers of violence in ending and reconsolidating empires; and its connections to religion, memory, and heritage. The course covers a broad range of cases, drawing on inter-disciplinary literatures, engagement with guest experts, and contemporary media analyses.

Political Geography and Geopolitics

Nakazato, Hiroshi

Fall 2024

This course provides an understanding of the fields of political geography and geopolitics, which are the study of how politics organizes space and how space influence politics. We will discuss key political geographic concepts including territory, sovereignty, borders, and place, and their history and changing relevance in the face of capitalist globalization and the transition from empires to nation-states. We will also explore three major facets of geopolitics: classic geopolitics, critical geopolitics, and urban geopolitics and their relevance in the contemporary world. Finally, we will explore geographies of peace and conflict and the rise of non-state actors and non-state sovereignty.

World Politics: Conflict and Cooperation

Molles, Elitsa V

Fall 2024

This course examines the principle sources of the behavior of countries in international politics, including the nature of the international system and the decision-making process within states. It examines such issues as the sources of power, the causes and implications of the security dilemma, the dynamics of alliances, the causes of war, international political economy, and the dilemmas of world order.

INTL270301**Is All Commerce Capitalism? Global Histories of Production, Exchange, and Power****Kent, Stacie A****Fall 2024**

Fulfills the LAMA Requirement for History Majors Adam Smith famously wrote of "a certain propensity in human nature...to truck, barter, and exchange." Less than a century later Karl Marx observed that capitalism "cannot exist without constantly revolutionizing...the whole relations of society." This course examines both these propositions, asking what role exchange has played in human societies and in what sense capitalism is revolutionary. We study a global range of ancient, medieval, and modern trade networks, modes of production, and social meanings in and around exchange. We investigate connections trade fostered and where power inhered in the production, distribution, and consumption of goods.

INTL271301**Global Horizons beyond Boston College: Integrating Ethics, Economics, and the Common Good****Erbil, Can****Fall 2024**

This seminar is ideal for seniors in the Economics and International Studies programs, aiming to apply their accumulated academic knowledge and their Boston College experience in a complex global context. "Global Horizons" invites students to explore the intricate interplay between global economic systems and ethical considerations, emphasizing a multidisciplinary approach that integrates insights from environmental science, public policy, sociology, psychology, and more. The course will emphasize the Common Good, social well-being and the pursuit of a just society. Throughout the course, students will engage with advanced economic theories and models, applying them to analyze and propose solutions to pressing global issues such as international trade, labor practices, and sustainable development. The course challenges students to consider the ethical dimensions of economic policies and practices, connecting their entire academic journey to Boston College's commitment to moral discernment and the Common Good, one last time before they graduate and start to make their own mark in the world beyond The Heights.

Human Rights in East Asia

Hwang, Ingu

Fall 2024

This course introduces students to the post-1945 development of global human rights talk, activism, and politics from an East Asian perspective. Through an examination of specific conflicts over self-determination and sovereignty, economic development and disparity, democratization, the legacies of decolonization, and global justice and environment, the course delves into how and why actors in China, Japan, Hong Kong, Taiwan, South Korea, and North Korea translated local struggles into international human rights agendas that gained attention on the global stage. In exploring this process of translation and appropriation, we will also analyze how these local conflicts transformed international human rights issues. Fulfills the LAMA requirement for History Majors and Minors.

Comparative Economic Systems

Medlin, Aaron M

Fall 2024

Capitalism is not a monolithic system but varies significantly across space and time due to distinct historical, cultural, and institutional contingencies. By understanding these variances, students gain a nuanced view of capitalism beyond its liberal market-centered instantiation in the U.S. This course explores the diverse forms of capitalism and other economic systems (e.g., socialistic command economies in the former Soviet Union, the state-centric model of China, etc.) from a comparative perspective. Students will engage with key concepts in comparative political economy, institutional economics, and economic sociology. The course provides a comprehensive understanding of how politics, culture, and historical evolution shape national economic systems in the global economy.

INTL345001**Research Methods in International Studies****Getzoff, Joseph****Fall 2024**

Rigorous, systematic research methods are at the foundation of quality scholarship for students and professors alike, but many students find research methods scary and/or boring to learn. This class will introduce students to a wide array of research methods in an engaging, accessible way. Students will get hands-on training in how to ask good question, generate their own original arguments, define and measure their concepts, and set up and carry out sophisticated research designs. Along the way, students will learn the basics of archival research, interviews, surveys, case studies, and statistical analysis. The course focuses on applied methods using scholarship and examples from political science, international studies, history, psychology, and sociology. The course is designed for students to write the best paper they have ever written. Every week, student assignments are learning and applying one of these skills to their paper project, so that by the end of the semester they have a well-written, original research paper with an engaging question, well framed arguments, and in-depth comparative case study analysis. This is a great course for students thinking about writing a thesis, pursuing a research-focused career, or for those who simply want to supercharge their analytical skills, in this class and in others.

Wars and Revolutions in the Middle East

Kadivar, Mohammad Ali

Fall 2024

Embark on a gripping exploration with 'Wars and Revolutions in the Middle East', a course that delves into the pivotal events that have shaped one of the world's most dynamic regions. This journey begins with the colonial conflicts of the early 20th century, tracing the emergence of national borders and the profound disputes that continue to resonate today. Engage with a diverse curriculum that spans political science, history, international relations, and sociology offering a window into the transformative wars and revolutions that have defined the Middle East. From the Algerian war for independence to the influential Iranian, Egyptian, Tunisian, and Sudanese revolutions, and the persistent Kurdish insurgency in Turkey, you will examine the forces that have forged nations and ignited global discourse. This course not only charts a historical timeline but also challenges you to dissect the major theories of revolution and conflict. By analyzing the nuanced layers of the ongoing struggles, such as those in Palestine, you'll develop a multifaceted perspective on the socio-political undercurrents that continue to shape the Middle East. 'Wars and Revolutions in the Middle East' is more than a course it's an intellectual odyssey that sharpens your ability to think critically about complex global issues. It promises to leave you with a profound understanding of the narratives that have driven the Middle East's past and are still crafting its future.

International Law

Nakazato, Hiroshi

Fall 2024

This course examines the role of international public law (the "law of nations") in the world today. It takes as its starting point the academic (and practical) debate about the utility of international law in world politics. From there, we consider the philosophical foundations of law, the sources of international law, and the application of international law in different arenas. In particular, the course will focus on how international law deals with a number of issues, including the connection between domestic and international law and the laws on territory, jurisdiction, human rights, and security, as well as other relevant topics.

INTL357001

The Arab-Israeli Conflict

Krause, Peter J

Fall 2024

This course is class-restricted to sophomores, juniors, and seniors. The Hamas attacks on October 7, 2023 and the subsequent Israeli invasion of Gaza are only the latest tragic chapters in the ongoing Israeli-Palestinian conflict. The broader struggle, which involves not just Israelis and Palestinians, but also regional states like Egypt, Syria, Jordan, and Saudi Arabia, has been at the core of Middle East politics over the past century. But the character and outcomes of this conflict have varied significantly across time and space. This course will address the origins, dynamics, and effectiveness of Zionism and Palestinian nationalism, the causes of war and peace, and changes in territorial and political control of the region from the early 1900s to the present. Students will learn and analyze the perspectives and behaviors of state and non-state actors on all sides to gain a greater appreciation for a struggle that continues to drive regional dynamics and U.S. foreign policy in the Middle East. By the conclusion of the course, students will emerge not only with a far richer understanding of the region, its people, and its politics, but also as more sophisticated consumers, analysts, and producers of knowledge.

International Studies Courses: Spring 2025

INTL220701**The Global Economy****Medlin, Aaron M****Spring 2025**

This course aims to deepen your understanding of real world economic issues, while providing you with a stronger analytical base. We will focus on international trade theory and policy, and issues in international finance.

Credits: 3**Room and Schedule:** O'Neill Library 253 M 06:00PM-08:45PM**Satisfies Core Requirement:** None**Prerequisites:** ECON1101**Corequisites:** None**Cross-listed with:** ECON2207**Frequency:** Every Spring**Student Level:** Undergraduate**Comments:** None**Status:** Offered**INTL223001****Geographies of Nature and the Environment****Getzoff, Joseph****Spring 2025**

The study of the environment is urgently important in an era of global climatic change. Geography and other social sciences have long offered critical ways to understand the entangled relationship of humans and their physical environment. This course is an introduction to the many ways to think critically about this relationship, drawing from a robust body of scholarly debate. The course will engage with many topics that explore the significance of the environment in relation to human societies: we will look at the construction of nature as a foundational idea in human cultures, the intersection of economies and ecologies, the histories and legacies of colonial environments, political ecology and conflicts over resources, the shaping of the non-human animal, the science and politics of climate change, and engage with critical questions of environmental justice in an ever changing and globalized world. We will not focus on any one region, instead opting for a global survey of cases that will allow us to critically interrogate the meaning of nature and the environment in relation to human societies past, present, and future.

Democratization in the Middle East

Prodromou, Elizabeth

Spring 2025

This course is an introduction to democratization in the Middle East, using social science literatures on regime type (e.g. democratic, authoritarian, totalitarian, hybrid) to explore how history, geopolitics, and leadership shape comparative experiences of democratization in the region. The course considers democratization patterns shaped by disputes over tradeoffs between security versus pluralism and equality before the state, tensions between economic equity and growth, and competition between religious versus secular forms of nationalism. Through case studies (e.g. Egypt, Turkey, Israel, Palestine, Iran, Syria) and engagement with regional and international scholar-practitioners, the course situates the region within current debates about democracy worldwide.

Comparative Politics of Populism and Migration in Europe

Molles, Elitsa V

Spring 2025

Have all European polities and societies become liberal after post-communist transitions? How have populist parties across the Continent transformed discourses, politics, and individual identities? How do race and exclusion of ethnic, religious, or other minorities figure into Europeans' everyday lives? How has migration uprooted social realities across Europe? The course will answer these questions and more through the lens of identity politics. It will trace and analyze the multiple transformations in Western and Eastern European politics and societies in the contemporary period, through a mix of theoretical texts, current case studies, and non-academic sources.

Economics of International Migration

Medlin, Aaron M

Spring 2025

This course offers an introduction to the economics of immigration, exploring motives for migration, its effects on the destination and origin economies, including the impact on labor and product markets, economic growth, income inequality, urban environments, fiscal policy, and the macroeconomy. While the course will heavily rely on theory from introductory micro, we will go beyond the conventional partial equilibrium labor supply and demand model, learn to scrutinize empirical evidence, and evaluation the ramifications of diverse immigration policies.

INTL285401**Colonial Korea and its Legacies****Hwang, Ingu****Spring 2025**

This course explores Korea's experience under Japanese colonial rule (1910-1945) as well as how this experience was remembered and represented in the post-colonial era. Students will explore the three phases of Japanese rule: military rule (1910-1919); cultural rule (1919-1931), and wartime mobilization (1931-1945) and how each of these phases have shaped and continue to shape Korean national identity and politics, socioeconomic development, and memory culture. The course draws on historical and literary texts as well as film and other visual sources. This course combines lecture with active student discussion and presentations. Fulfills the LAMA requirement for History Majors

Credits: 3**Room and Schedule:** Gasson Hall 207 TuTh 01:30PM-02:45PM**Satisfies Core Requirement:** None**Prerequisites:** None**Corequisites:** None**Cross-listed with:** HIST2854**Frequency:** Every Spring**Student Level:** Undergraduate**Comments:** None**Status:** Offered**INTL287501****Development and Social Justice in Korea****Hwang, Ingu****Spring 2025**

This course introduces students to the political and economic changes that South Korea experienced from the 1960s to the present and explores how these changes contributed to social unrest, to demands for greater democracy, and to other social justice issues. In doing so, it will address how South Korea's economic and political trajectory was informed by pressures at the international, national, and sub-national level and compare the South Korean case to that of other Asian nations. Fulfills the LAMA requirement for History Majors

INTL334001

Environmental Politics of the Middle East

Getzoff, Joseph

Spring 2025

This course will critically explore the contemporary and historical environmental issues associated with the Middle East and North Africa (MENA) in order to understand the relationship between nature, politics, colonialism, culture, and geography. First, the course will interrogate the geographic label, Middle East, to understand how American and European literature, politics, and culture created different bodies of knowledge and replicated popular discourses that justify intervention in West/Southwest Asia and North Africa. Understanding the Middle East as a geographical construction also allows us to critically think through how environmental issues are interconnected with the global and localized histories of colonialism, imperialism, and empire. Students will read and discuss scholarship on development, postcolonial theory, environmental history, and political ecology. Throughout the semester, students will complete a project on a topic of their choosing, developing it from start to finish with instructor and peer feedback.

INTL337601

International Economic Relations

Anderson, James

Spring 2025

Not open to students who have taken ECON3371 or ECON3372.. This course introduces the study of economic relations among countries. It combines material contained in ECON3371 and ECON3372, and substitutes for both those courses. Primarily designed for international studies majors, it is also appropriate for economics and other social science majors, with the proviso that the comprehensive coverage of the course implies that the workload is heavy and expectations for students are high. Topics include the determinants of trade in goods, services, and capital; the economic policies that nations use to influence such trade; the theory and practice of international macroeconomics; and problems of coordinating macroeconomic policies among countries. The course features the usefulness (and limitations) of game theory for explaining international economic interactions.

Comparative Revolutions

Kadivar, Mohammad Ali

Spring 2025

What are revolutions? Why do they happen? How do they happen? What are their consequences? This course critically engages with these questions, and reviews the main answers presented in the social scientific literature on the revolutions. In addition to a theoretical understanding of the revolutionary processes, the course also presents case studies of some of the classic examples of revolutions such as the Haitian and Russian revolution, as well as more recent revolutions such as the uprisings in the Arab World. Through reviewing the literature and case studies, we also examine how the meanings and dynamics of the revolutions have changed from the early 20th century to the 21st century.

Korean War: Conflict, Security, and Peace

Hwang, Ingu

Spring 2025

The Korean War (1950-1953) began as a civil war but became a global conflict against the backdrop of the emerging Cold War era. Known as "the Forgotten War" in the U.S., this conflict resulted in 5 million deaths and left an indelible imprint on the world. Seven decades later the Korean peninsula remains divided, and the contentious international security mechanisms engendered by this conflict still shape East Asian relations and U.S. foreign policy. Through engagement with recent historical works, this seminar course will explore the origins and legacies of this conflict, security options and limitations, and conditions and visions of peace. This course fulfills the LAMA requirement for History majors.

Research Methods in International Studies

Kent, Stacie A

Spring 2025

Rigorous, systematic research methods are at the foundation of quality scholarship for students and professors alike. This class will introduce students to a wide array of research methods in an engaging, accessible way. Students will get hands-on training in how to ask good questions, generate their own original arguments, define and measure their concepts, and set up and carry out sophisticated research designs. Along the way, students will learn the basics of a variety of research methods. More information about the specific approach of each professor/section can be found on the Academics > Courses pages of the IS Program web site.

Pandemics and Global Health Diplomacy

Rodrigues, Miguel C

Spring 2025

This course reviews successive outbreaks of infectious diseases on the scale of epidemics and pandemics, from BSE (Mad Cow Disease), SARS, Avian and Pandemic Influenza, and MERS-Cov, to Ebola, Zika, and the recently contained Covid-19 pandemic, with the view toward analyzing the political and public health responses, the expansions in global health response capacity, the development and implementation of the International Health Regulations, and global health diplomacy efforts such as the Global Health Security Agenda (GHSA) that helped countries prevent and respond to infectious disease outbreaks. The course will end with a discussion on the international Pandemic Agreement currently under negotiation, which is struggling to balance pathogen sample access and benefits sharing, two objectives of critical importance to the Industrialized West and the Global South respectively.

A History of Food Globalization

Nakazato, Hiroshi

Spring 2025

This seminar examines the connections between food and power, and explores how social explanations work. Humanity's quest for food has shaped the development of societies in many ways, influencing population growth and urban expansion, dictated economic and political theories, expanded the horizons of commerce, inspired wars of conquest, and the discovery of new worlds. We look at how the acquisition, preparation, and consumption of food affects relations within and across societies, from the beginning of recorded time to today.

War and Genocide

Pendas, Devin O

Spring 2025

Genocide has been one of the most tragic and disturbing global phenomena of the twentieth century. It has been truly global in scope, striking Asia, Africa, the Americas and Europe. In this course, we will explore the history of genocide and its relationship to war in global perspective, from the colonial genocides of the 19th century, the Armenian genocide in WW I, the Holocaust in WWII and the postcolonial genocides since 1945. We will also ask what might be done on an international level to combat genocide - either through military intervention or through legal prosecution.

Drugs and Money

Kent, Stacie A

Spring 2025

Fulfills the LAMA Requirement for History Majors Amidst the current U.S. opioid epidemic, this course investigates how the pursuit of profit has intersected with constructions of health, illness, and social vice. Where and how have states and societies supported or tolerated widespread narcotic use? By the same token, what social, economic, and political processes transform use into social shame or criminal behavior? The course will look at the centuries-long opium trade between British India and China, the early history of commercial opioids around the world, and compare two U.S. epidemics in their global and local dimensions crack cocaine in the 1980s and opioids in the 2000s.

Islam and Liberal Democracy

DiPasquale, David M

Fall 2024

We will take advantage of current geopolitical controversies in order to unearth the theoretical core of the debate between Islam and the West. Materials related to the Islamic heritage will be placed next to arguments made on behalf of the West in relation to certain key issues, such as rights versus duties; religion and freedom; and democracy and progress. Modern, pre-modern, sacred, and secular texts will be studied. How can the secular world defend itself against a critique that begins from a position of faith and emphasizes virtue, God, and justice?

Women and Gender in Islam

DeLong-Bas, Natana J

Fall 2024

This course explores women and gender roles in Islamic history, civilization, and societies, beginning with the pre-Islamic period and continuing through the present. The goal is to present women and womens issues as central to the main narrative of Islamic history, rather than as a side story. This course explores questions related to both historical and contemporary religious interpretation and practice, Sunni, Shia and Sufi, as well as the impact of religion and gender constructs on womens access to the public sphere, positions of leadership, and legal status.

Democratization in the Middle East

Prodromou, Elizabeth

Spring 2025

This course is an introduction to democratization in the Middle East, using social science literatures on regime type (e.g. democratic, authoritarian, totalitarian, hybrid) to explore how history, geopolitics, and leadership shape comparative experiences of democratization in the region. The course considers democratization patterns shaped by disputes over tradeoffs between security versus pluralism and equality before the state, tensions between economic equity and growth, and competition between religious versus secular forms of nationalism. Through case studies (e.g. Egypt, Turkey, Israel, Palestine, Iran, Syria) and engagement with regional and international scholar-practitioners, the course situates the region within current debates about democracy worldwide.

Islamic Political Philosophy

DiPasquale, David M

Spring 2025

This course is restricted to sophomores, juniors, and seniors, only.. What is the relationship between philosophy and Islam? Does the divine law (Shari'a) need to be supplemented with purely rational reflections on the nature and purpose of political life? What is the place of toleration and individual rights in the Islamic legal and philosophic tradition? We will explore these and similar questions by focusing on two particularly fertile periods of Islamic thought: the encounter of Islam with Greek philosophy in the classical period and its encounter with the modern secular west in late modernity.

Engaging Interreligious Leadership

DeLong-Bas, Natana J

Spring 2025

This course engages the quest for meaning, purpose, and practical skills in interreligious engagement, building upon material learned in one of the Core courses that brings Christianity into dialogue with another tradition toward the goal of developing models of ethical interaction between religious traditions, people and experiences. Rooted in recognition that engaging religious diversity is a necessary component of training for global citizenship in the contemporary world, the course offers multiple perspectives on interreligious encounters in a variety of fields that can serve as opportunities for collective engagement toward common goals and purposes, as well as a source of conflict and violence when managed poorly, particularly in the context of other political and socio-economic concerns. The course provides theoretical background in framing interreligious engagement within the field of interreligious studies, followed by identification of best practices and community-based initiatives rooted in case studies recorded in print literature, the media, and films, and concludes with students formulating their own case studies. Topics addressed include: strategies for crafting and facilitating interreligious meeting spaces, including in education, medicine, the business world, and the public square; the role of religious identities, gender dynamics, race and racism in interreligious environments; interreligious encounters in culture and the fine arts; developments in interreligious dialogue; interreligious cooperation in addressing environmental and social justice concerns; and engagement of religions as tools for conflict resolution.

Islam and Modernity: The Turkish Experience

Akyol, Mustafa**Spring 2025**

Located on the Western edge of the Islamic civilization, the Ottoman empire and later Republican Turkey faced modernity early on. New ideas such as constitutionalism, equal citizenship for all (including women and non-Muslims), nationalism, secularism, and democracy had both deep impacts and complex reactions. This course will present an overview of this history beginning with the Tanzimat (Reform) era of the 19th century, to the secularist foundations of the Turkish Republic, to the post-secular New Turkey of today. Focus will be on Islamic ideas, which, throughout this turbulent history, took various forms: progressive or reactionary, moderate or militant, liberal or authoritarian.

Christians Reading the Qur'an

Welle, Jason

Spring 2025

This course examines various trends and methodological approaches by which Christians have interpreted the Qurn. The semester begins by surveying premodern trends, including Qurn translations, privileging primary sources when possible. Most of the course concentrates on 20 th and 21 st century engagement with Islams sacred text, including debates about orientalism and postcolonial theory. Theological questions include general discussions of whether and how Christians may consider the Qurn revealed and/or inspired along with focused discussions of particular passages of pertinence to Christian comparative theology. Knowledge of Arabic beneficial but not necessary; all required readings exist in English translation. Cross-listed in ICSP.

ITAL221301

Italian Conversation, Composition, and Reading I

Costanzo, Maria Sole

Fall 2024

Conducted in Italian

Elective for major and minor in Italian. Satisfies Foreign Language Proficiency core requirement.. The course topic, "Italian through Fiction and Films", allows development of oral and written language skills. Centered on the analysis of short stories and films related to contemporary Italian society, attention will be paid to analytical and lexical enrichment. Other sources (articles from the Italian Press, audio-visual programs, and the Internet) will provide additional avenues of interpretation.

ITAL557101

Intro to Italian Cinema

Acetoso, Mattia

Fall 2024

Conducted in Italian Italian cinema left an everlasting footprint on Hollywood and cinema worldwide. Generations of filmmakers have recognized their debt towards Italian directors such as Roberto Rossellini, Federico Fellini, Michelangelo Antonioni, and many more. This course follows the footsteps of these masters of Italian cinema. From postwar cinema to today's experimentations, Italian directors have recorded and influenced the cultural evolution of a country that emerged from postwar poverty and became a global symbol of elegance, history and art.

ITAL558101

Renaissance Women Voices

Costanzo, Maria Sole

Fall 2024

Course is conducted in Italian. In this course we will explore the fascinating lives, ambitions, and enterprises, private and public, of the women of the Italian Renaissance, as revealed by the writings they themselves have left to posterity. The texts in question span a wide range of genre including letters, essays, diaries, and poetry and come from women occupying a wide range of socio-economic status, from patricians to nuns to artists. The topics of their concern are still those of today: identity and education, the complexities of motherhood and marriage, women's involvement in the workplace, and the pervasive issue of violence against women. Hearing these women's voices will enable us to arrive at a more complete, more accurate picture of this history-changing moment in Western civilization.

ITAL881001

Lyric Poetry from Giacomo da Lentini to Petrarca

Costanzo, Maria Sole

Fall 2024

Conducted in Italian This seminar will survey Italian lyric poetry, the most dynamic and prestigious genre of the medieval period in which the literary language was being formulated. The course will cover the development of lyric poetry from the thirteenth-century Scuola Siciliana to the sixteenth-century petrarchisti, but the principal focus of the course is the Canzoniere of Francesco Petrarca. Discussions will include orality and manuscript/print transmission of poetry, the complex relation of the individual poet to the tradition, the theory of imitation, and literary Neoplatonism.

ITAL885501

Italian Authorial Cinema

Acetoso, Mattia

Fall 2024

Conducted in Italian. This course will offer graduate students the opportunity to explore directors, films, and movements of Italian cinema from Postwar to the New Millennium. A central focus will be the definition of authorship in the study of Italian cinema. From Neorealism to Comedy "Italian Style," from the art films of the 1960s to contemporary experimentation, Italian directors have shaped the Italian cinematic universe and consolidated its relevance worldwide. The ultimate goal is to provide graduate students with the critical tools to analyze cinema and acquire methods for both teaching and writing on this subject.

ITAL100401

Elementary Italian II

Bradley, Benjamin Paul

Spring 2025

Conducted in Italian Admitted by placement test, consent of instructor, or completion of ITAL1003 This course is a continuation of ITAL1003 and further develops the goals of the first semester. Special attention is given this to the production of more complex speech, the expression of personal opinion, and a deeper knowledge of contemporary Italian culture. More formal writing exercises and reading of authentic texts aid students in reinforcing language skills. A group final project at the end of the course attempts to bring together the themes and experiences from previous study.

ITAL111404

Intermediate Italian II

Gonnelli, Paolo

Spring 2025

Conducted in Italian The prime objective of the course is to improve reading and writing skills, to continue building oral proficiency, and to provide a lively and current cultural background of contemporary Italy. A review of the elements of language will be supplemented by the reading of selected texts, oral practice, and individual research, all presented within the context of contemporary Italian society and classic Italian culture. Students will develop their ability to satisfy basic survival needs and to engage in conversation on a fairly complex level.

ITAL221401**Italian Conversation, Composition, and Reading II****Costanzo, Maria Sole****Spring 2025**

Conducted In Italian

Elective for Italian major or minor. Satisfies Foreign Language Proficiency core requirement.. In this course students will continue to strengthen and expand their language skills through oral and written practice. The analysis of a contemporary novel and its cinematographic adaptation will be the basis for class discussion, written assignments, and oral presentations. Both ITAL2213 and ITAL2214 are strongly recommended for students who intend to use Italian to enrich their study experiences at home and abroad.

Credits: 3**Room and Schedule:** Gasson Hall 201 MWF 12:00 Noon-12:50PM**Satisfies Core Requirement:** None**Prerequisites:** Consent of instructor or completion of ITAL2213.**Corequisites:** None**Cross-listed with:** None**Frequency:** Every Spring**Student Level:** Undergraduate**Comments:** None**Status:** Offered**ITAL552501****Calvino's Worlds****Acetoso, Mattia****Spring 2025**

Conducted in Italian. An international literary celebrity at the time of his death, Italo Calvino (1923-1985) was one of the most imaginative writers of the twentieth century. A prolific author of best-selling and widely translated novels, short stories, and essays, he delighted audiences world-wide with his entertaining tales of fable and fantasy and whimsical perspective on modern life. In doing so, he redefined the idea of writing and storytelling, both in Italy and internationally. This course surveys the varieties of Calvino's fiction, exploring his narrative style and masterful use of the Italian language.

ITAL553001

Italian Epic: Ariosto and Tasso

Costanzo, Maria Sole

Spring 2025

Conducted in Italian. In this course, we will enter the captivating world of Italian epic literature, as embodied by the two absolute masterpieces of the genre: Ludovico Ariosto's *Orlando furioso* and Torquato Tasso's *Gerusalemme liberata*. Designed by their authors to delight their readers with tall tales of adventure and the supernatural, as well as tender romance and theatrical melodrama, these epics at the same time explore serious themes concerning religious and cultural identity, power politics, and the struggle between good and evil.

ITAL883001

Bernini and the Baroque

Mormando, Franco A

Spring 2025

Open to both graduate and undergraduate students. An interdisciplinary study of the art, literature and culture of the Baroque age (ca. 1600-1680), focusing on its epicenter, the city of Rome, and on the one artist who more than any other defined and disseminated that style, Gian Lorenzo Bernini. Against the backdrop of the political and institutional crises and social-religious metamorphoses of the period, we will explore the fertile and intimate inter-relationship between the arts (sculpture, architecture, theater, music) and the other forms of cultural expression.

ITAL883501

Leon Battista Alberti and the Languages of the Italian Renaissance

Costanzo, Maria Sole

Spring 2025

Conducted in Italian Leon Battista Alberti is a unique protagonist of the Italian Renaissance. While best known for his architectural accomplishments, Alberti penned a variety of literary works, including scientific treatises, satirical novels, and the first manual ever of European vernacular. This course explores Alberti's ambition to acquire literary leadership to influence the powerful humanists in Florence and overcome his own illegitimate origins. Throughout the semester, students will discuss central ideas of Medieval and Early Modern Italian culture (the construction of the self, the role of virtue, the condition of exile, etc.), within the context of major theoretical debates of the time.

Jesuit Studies Courses: Summer 2024

JESU715701

In the Footsteps of Leaders

Beaumier, Casey, SJ

Summer 2024

This course considers the historical, spiritual, and pedagogical foundations of Jesuit leadership by situating them in their historical and geographic context. The course begins with two weeks of online coursework, followed by twelve days of experiential learning in Spain and Rome where students immerse themselves in the key places that became the roots of the Society of Jesus using primary sources to critically examine the decisions and actions of the early Jesuits. Students will consider contemporary topics such as the challenges and opportunities experienced by administrators and teachers at secondary and higher education schools. Coursework features selected readings, workshops, presentations, and projects to be completed both individually and in small groups. Through this course, students will gain an understanding of the Jesuits' early vision of apostolic effectiveness and of the ways that vision has remained constant while adapting to various circumstances along the way.

Jesuit Studies Courses: Fall 2024

JESU715901

A History of The Jesuits

Colombo, Emanuele

Fall 2024

This is a Graduate-level on-line course.. For nearly five centuries, the Society of Jesus has been one of the most successful and, at times, most controversial religious orders in the Catholic Church. A History of the Jesuits offers an introductory survey to this rich and varied past with particular attention, following the Jesuits' suppression in 1773, to various enterprises and enterprisers in the Americas. The course seeks to answer these questions: What have been the characteristics of the Society of Jesus and its associated works? And how and why have those characteristics remained the same or changed? Complementing the other courses in the Certificate program, the course traces the development, expansion, suppression, restoration, and recent developments of the Society of Jesus by closely examining the historical contributions of significant Jesuits.

Discernment and Prayer in the Spiritual Exercises of St. Ignatius

Geger, Barton T, SJ

Spring 2025

This is a Graduate level online course. . A study of the spiritual doctrine of St. Ignatius Loyola as articulated in the text of the Spiritual Exercises, but with reference to other texts such as Ignatius' Testament, letters, and the Constitutions of the Society of Jesus. The focus is how Ignatius' treatment of prayer, discernment of spirits, and discernment of God's will, work together to form a "contemplative in action."

JESU715801

Jesuit Pedagogy

Casalini, Cristiano

Spring 2025

This is an online course.. This three-credit, graduate-level online course examines the distinctiveness of the Jesuits' approaches to teaching and of their philosophy of education that have propelled their schools to unprecedented success over the centuries. One key to the unprecedented success of Jesuit education has been the tension between the recognizable mark of uniformity that long distinguished the methods, contents, and practices of Jesuit schools and their ability to adapt to different contexts and times. Both aspects-the uniformity and the adaptability-were explicitly supported by the "Ratio studiorum," the Jesuits' foundational plan of studies issued in 1599, which, despite the schools' many variations and complexities, has retained some influence over time. With the "Ratio" discarded, Jesuit schools had to clarify what made them distinctively Jesuit, reconciling their mission with the contemporary world. This three-credit, graduate-level class sketches the developments of Jesuit educational endeavors by focusing on both the permanent and changing traits of its distinctive pedagogy.

Writing About Popular Music

Johnston, Maura K

Summer 2024

Note to Journalism minors: this course satisfies the requirement for an elective with a craft" orientation."

Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stoke their passion.

Sports, Media, Culture

Serazio, Michael J

Fall 2024

This course may be used to satisfy one of four electives required within the Communication major. Sports have long played a vital yet complex role in culture and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance and deconstruct the hype that accompanies modern sports.

Feature Writing

Marcus, Jon P

Fall 2024

Students must already have taken JOUR2000 Introduction to Journalism" in order to enroll. Note to Journalism minors: This course satisfies the requirement for an elective with a "craft" orientation." The best feature writing invites readers into the moments, ideas, causes, and personalities that animate our world. Through dogged reporting and crisp, lyrical prose, feature writers bring to life stories that move us, inspire us, and entertain us from arts and culture to science, business, sports, and more. In this course, students will learn how to identify engaging topics and how to research and report them (including online); how to conduct compelling, in-depth interviews; how to write reviews and critiques; and how to pitch and sell their pieces. Each student will receive personalized edits on their work from the instructor, just as in a professional newsroom. The skills covered in this course will serve journalism minors and non-minors alike.

Multimedia Journalism

Helman, Scott W

Fall 2024

Note to Journalism minors: this course satisfies the requirement for an elective with a craft" orientation. This class will explore multimedia storytelling as both an evolving genre and professional practice. We'll do plenty of hands-on work, but we'll also spend time pondering the theories behind our technical and creative decisions. What skills must modern storytellers possess to thrive in an increasingly digital world? How do we pick the right tool for the job? What principles of journalistic storytelling might be applicable to journalism-adjacent digital content? This is a survey course, which means we'll touch on various modes of digital journalism, including audio and video storytelling two skills integral to modern newsrooms.

The Classics of Literary Journalism

Nanos, Janelle M

Fall 2024

Note to Journalism minors: this course satisfies the requirement for an elective with a craft" orientation. The craft of writing "narrative journalism" requires many of the same storytelling methods used by the world's great fiction writers. But telling true stories comes with its own skill set. In this class, we'll examine the methods used by some of journalism's finest writers to unravel how these stories come to life. This seminar will explore different genres, with a focus on how journalists experiment with reporting techniques, develop a "voice," and use various methods of structuring a story. We'll read the works of writers like Nelly Bly, Joan Dideon, Tom Wolfe, Janet Malcolm, Hunter Thompson, Katherine Boo, Sheri Fink, David Grann, and Eli Saslow.

Journalism on Drugs

O'Connor, John

Fall 2024

Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. The biggest public health crisis during the war on drugs was over legal drugs opioids which have killed over a million Americans. Drug policies, driven by irrationality and fear, have ruined countless lives. Journalists, wittingly or not, were partisans in this war, and often (though not always) ahead of the curve in advocating for change with regards to drugs, and to vice more generally. In this class we take a close look at the practice and tradition of drug journalism at a watershed moment in American history. Readings will include works by Chris Kraus, Hunter S. Thompson, Susan Orlean, Lawrence Osborne, Yvonne Adhiambo Owuor, Geoff Dyer, and others.

Reporting Human Rights

Kahyana, Sylvester Danson

Fall 2024

In this course, we examine different creative forms of human rights reporting and evaluate their effectiveness in communicating the significance of human rights violations. As we do, we will think together about the challenges of reporting on such sensitive matters. To help us appreciate the range of effective reporting, we shall focus on at least one text in the following categories: print journalism, the literary arts, the performing arts, the cinematic arts, the visual arts, and what we shall call the social media arts (for instance, an online exhibition). The course will deploy a range of approaches and assignments, such as lectures, guest lectures by famous human rights scholars/activists, museum visits, and projects.

Journalism Courses: Spring 2025

JOUR200001**Introduction to Journalism****Marcus, Jon P****Spring 2025**

Senior Journalism minors only - required Journalism course. To be taken in Freshman, Sophomore, or Junior year. Organized like a professional newsroom, this course will give students interested in journalism a taste of its various facets, including topic-generation, reporting, interviewing, and editing, for print, broadcast, and online media. It will cover basic newswriting, beat reporting, investigative journalism, feature writing, and writing for the web, and provide an introduction to media law and ethics and the business and history of journalism. Students will produce a feature-length final project and will also work in teams to formulate, report, and write investigative stories. Student should expect to meet deadlines and high standards of grammar, style, punctuation, and factual accuracy.

Sports, Media, Culture

Kim, Kyoung-yim

Spring 2025

This course may be used to satisfy one of four electives required within the Communication major. Sports have long played a vital yet complex role in culture and this course examines that intersection of sports, the mass media, and society. We will appraise and debate the ways in which sports are functional or problematic in their impact on and relationship to players, fans, journalists, co-cultural groups, and nations. Students will read both scholarly and journalistic reflections, view popular and documentary film, and analyze fan experiences, mediated presentations, and critical social issues. In short, we will go beyond the box score to understand the importance and deconstruct the hype that accompanies modern sports.

The Underground Press

Ards, Angela

Spring 2025

Note to Journalism minors: this course satisfies the requirement for an elective with a "critical" orientation. Note to all students: This course is included in CORE - Engaging Differences and Justice. The underground press was a vast network of loosely affiliated newspapers that emerged in the 1950s and 60s when young people asked very hard questions about the meaning of power and the role of the press. The outsider outlets spread through hundreds of communities throughout the nation, ranging from big city weeklies like "The Village Voice" and the Berkeley "Barb" to specialized periodicals representing the Black press, as well as other ethnic newspapers, progressive weeklies, and various conservative perspectives. This course examines the factors that helped pave the way for this journalism of dissent and how this history affects alternative media today.

Journalism and New Media

Johnston, Maura K

Spring 2025

Note to Journalism minors: this course satisfies the requirement for an elective with a craft" orientation." The rise of the internet as a news delivery system has changed the face of the news business, for better or worse, in the 21st century. This one semester seminar will trace the history of new medias relationship with journalism while preparing students for the leaner online world. Students will learn about practical matters (storytelling for the web, condensing complex narratives into 140-character missives) while grappling with larger concerns affecting the industry and readers (traffic-based journalism, slippery sourcing) as they report and write on the world around them.

Writing About Popular Music

Johnston, Maura K

Spring 2025

Note to Journalism minors: this course satisfies the requirement for an elective with a craft" orientation."

Reporting on popular music is a keenly effective way to take a snapshot of culture as it's happening. In this discussion-intensive class, students will get hands-on tips on how to write about music effectively, hone their critical thinking skills, and examine the ways that the business struggles experienced by both music and publishing have affected the way pop writing is disseminated and consumed. Guest speakers from the music writing world will provide further insights on their career paths, their views on where music is now, and the artists and songs that stoke their passion.

Feature Writing

Marcus, Jon P

Spring 2025

Students must already have taken "JOUR2000 Introduction to Journalism" in order to enroll. Note to Journalism minors: This course satisfies the requirement for an elective with a "craft" orientation." The best feature writing invites readers into the moments, ideas, causes, and personalities that animate our world. Through dogged reporting and crisp, lyrical prose, feature writers bring to life stories that move us, inspire us, and entertain us from arts and culture to science, business, sports, and more. In this course, students will learn how to identify engaging topics and how to research and report them (including online); how to conduct compelling, in-depth interviews; how to write reviews and critiques; and how to pitch and sell their pieces. Each student will receive personalized edits on their work from the instructor, just as in a professional newsroom. The skills covered in this course will serve journalism minors and non-minors alike.

JOUR223501

Writing about Sports

Golen, Jimmy E

Spring 2025

Note to Journalism minors: this course satisfies the requirement for an elective with a "craft" orientation." Sports writing has long been the home of some of the best writing in journalism, and it's easy to see why: In sporting events, we have drama and conflict, compelling characters and settings, winners and losers, and sometimes even good and evil. And what's more, the stakes are high enough to grip our attention but not -- in spite of how it might sometimes seem -- a life-or-death matter. In this class, we will take sports as a lens for honing our writing skills, using clear and engaging writing to tell stories that not just sports fans want to read. Guest speakers from the industry will visit to discuss their careers and their craft. The class will also include discussions relevant to journalists, from media contraction to clickbait. You will learn what makes a good story and how to construct one, with the goal of becoming proficient in sports writing, from story idea to final draft.

Mastering the Art of Food Writing

O'Connor, John

Spring 2025

Note to Journalism minors: this course satisfies the requirement for an elective with a craft" orientation."

This class examines the practice and tradition of food journalism, introducing students to works that have shaped the genre. We'll discuss the clichés of food writing Boston's 10 Hottest Ramen Joints being a particular nonstarter while developing original ideas in the realms of eating and drinking. We'll also be doing in-class eating/writing assignments (plus a field trip) and addressing age-old questions of journalistic ethics: namely, is it possible to write reported essays about living-breathing people (including the amoral monsters called chefs) without leaving a trail of enemies in your wake? Readings include works from M.F.K. Fisher, David Foster Wallace, Gabrielle Hamilton, and others.

Photojournalism

Burns, Christopher G F

Spring 2025

Note to Journalism minors: this course satisfies the requirement for an elective with a craft" orientation." This course will provide students with an introduction to producing high-quality photographs and videos as journalism; to considering photography as a form of visual communication, focusing on light, composition, and context; and to understanding the ethics of photojournalism and the implications of photographic truth. Through a number of different class structures, including traditional classroom lectures, group walkabouts, lab time, and independent / team-based classes, we will ask the fundamental question: Are photographs real? Are photographs true? A DSLR camera is suggested but not necessary. A simple smartphone will be more than sufficient.

JOUR230901

Telling Difficult Stories

Caswell, Christine A

Spring 2025

Note to Journalism minors only: This course satisfies the requirement for an elective with a "critical" orientation. The journalist is offered a unique and personal lens on events that most people can only experience as consumers of media. While many stories are exhilarating to cover, just as many are painful, horrifying, heartbreaking, and extremely difficult to tell. These include such high profile tragedies as the coronavirus pandemic, 9/11, and the Boston Marathon bombing--but also more personal tragedies involving people in our own communities. This course takes a critical look at covering and telling those difficult stories. We will hear from some of the journalists (including but not limited to the instructor) who will share their professional insight into covering the most traumatic stories of their careers, as well as from some of the families and/or victims of these difficult events. Additionally, we will examine the PTSD that often affects journalists and is not limited to first responders and victims. Students should be aware that this course will deal with difficult material including homicide, abduction, suicide, illness, and crime.

The Classics of Social Justice Writing

Kahyana, Sylvester Danson

Spring 2025

In this course, we shall examine the classics of social justice writing from different disciplinary perspectives--philosophical, theological, environmental, pedagogical, literary, journalistic, and cinematic--to appreciate core social justice principles and practices across regions and epochs. Using sample texts, we will pay attention to how particular locations have produced unique locutions on the subject, and the challenges of discussing social justice in an increasingly volatile world faced with several crises, for instance global warming, transnational crime, rising totalitarianisms, and contested identities. We will also examine how advances in digital technologies and artificial intelligence are impacting social justice theory and action.

LING235501

Writing Systems of the World

Geissler, Christopher

Fall 2024

This course surveys the range of ways that different speech communities have materialized their language in writing: what, if anything, do they have in common? How different can writing systems get from each other? How have speakers of different languages invented means of capturing the subtle properties of their languages on paper (or papyrus, stone, clay, as tactile dots (as in Braille) etc.)? Can language X be written in the orthography of language Y? What are the cognitive and social consequences of creating a writing system for a language that previously was not written down? There are no prerequisites for the course, and early linguistics majors and minors are welcome to enroll in it as a Topics course.

LING310101

General Linguistics

Geissler, Christopher

Fall 2024

An introduction to linguistics—the scientific study of human language and contemporary linguistic theory. Linguists use mathematical systems (often called formal systems) to develop precise theories that help us understand the rich cognitive processes that support our use of language to communicate, to conduct internal monologues, and much more. The course focuses on the major subfields within linguistics: phonetics, phonology, morphology, syntax, and semantics: how do linguists create and manipulate representations of language phenomena, and how do they analyze linguistic data? Our primary data will be from English, but we will also employ data from other languages. No previous exposure to the field is presupposed.

LING325301**Introduction to Comparative Slavic Linguistics****Woolhiser, Curt F****Fall 2024**

An introduction to the history and linguistic typology of the Slavic languages. We will begin with a brief survey of the reconstructed Common Slavic proto-language and its relationship to the other branches of the Indo-European language family. We will examine the disintegration of Late Common Slavic into three main subgroups: East, South, and West Slavic. Our survey of the modern Slavic languages will focus on the most important similarities and differences with regard to their writing, sound, nominal and verbal systems. Using a variety of modern Slavic languages as examples, we will also address topics of current interest to linguists worldwide: language, ethnic identity, and political borders; language ideology and standardization; the role of language contact in linguistic evolution, and language endangerment and language revitalization.

Linguistics Courses: Spring 2025

LING237901

Language and Ethnicity

Thomas, Margaret

Spring 2025

An examination of how we use language to regulate power relations among social groups and of how individuals define personal identity through speech. Case studies include: the linguistic representation of social class membership, dialect geography, Native Americans and U.S. language policy, the Ebonics controversy, and arguments for and against maintaining public language standards. Emphasis on the status of language and ethnicity in the United States, viewed in cross-cultural perspective.

Credits: 3

Room and Schedule: Lyons Hall 202 TuTh 01:30PM-02:45PM

Satisfies Core Requirement: Cultural Diversity

Prerequisites: None

Corequisites: None

Cross-listed with: ENGL2123,SOCY2379

Frequency: Biannually

Student Level: Undergraduate

Comments: None

Status: Offered

LING310201

Syntax and Semantics

Foley, Claire A

Spring 2025

An introduction to the concepts and operations of modern generative grammar and related models, as well as linguistic theories of meaning.

Credits: 3

Room and Schedule: Lyons Hall 315 TuTh 03:00PM-04:15PM

Satisfies Core Requirement: None

Prerequisites: LING3101 or equivalent.

Corequisites: None

Cross-listed with: ENGL3392

Frequency: Every Spring

Student Level: Both

Comments: None

Status: Offered

LING332501

Historical Linguistics

Geissler, Christopher

Spring 2025

The phenomenon of language change and of languages, dialects, and linguistic affinities as examined through the methods of comparative linguistics and internal reconstruction.

Credits: 3

Room and Schedule: Higgins Hall 275 MWF 10:00AM-10:50AM

Satisfies Core Requirement: None

Prerequisites: LING3101/ENGL3527 or equivalent, and familiarity with an inflected language.

Corequisites: None

Cross-listed with: ENGL3528

Frequency: Every Spring

Student Level: Both

Comments: None

Status: Offered

LING332901

The Linguistic Structure of Tibetan

Geissler, Christopher

Spring 2025

How does a language develop-and lose-tone? When are two dialects different enough to be considered distinct languages? What happens when a clause becomes a noun? How can a sentence cite its sources? In this course, students will conduct hands-on analysis of the Tibetan language to answer these questions. Tibetan is a Sino-Tibetan language spoken by around six million people in China, Nepal, India, Bhutan, and Pakistan, as well as diaspora communities worldwide. As a result of its association with the Buddhist and Bn religions, it is historically significant across Central Asia and remains a liturgical language in Mongolia and parts of Russia. Students will examine the phonology, morphology, and syntax of Tibetan, along with its relationship with other languages. Some topics well examine in depth include evidentiality, the ergative/absolute case system, clausal nominalization, and the interaction between tonal and laryngeal phonology. Along the way, we will look at the historical divergence of Tibetan varieties, the broader history of the Sino-Tibetan family, and the mutual influence of Tibetan varieties on each other and with other languages.

Credits: 3

Room and Schedule: Stokes Hall 261S MWF 12:00 Noon-12:50PM

Satisfies Core Requirement: None

Prerequisites: LING3101/ENGL3527 and LING3102/ENGL3392 or LING3103/ENGL2127 or LING4337

Corequisites: None

LING335601

Classics in Linguistics

Thomas, Margaret

Spring 2025

A seminar on the history of linguistics, organized chronologically from ancient India to the present day. Our emphasis is on the development of the language sciences in cultures with historical roots in Europe, but there is some treatment of language study in non-Western societies. Close readings of primary and secondary sources. The course presupposes exposure to the major subfields, analytic tools, and conceptual vocabulary of the modern discipline.

Credits: 3

Room and Schedule: Lyons Hall 208 TuTh 10:30AM-11:45AM

Satisfies Core Requirement: None

Prerequisites: A course in General Linguistics and at least one additional Linguistics elective.

Corequisites: None

Cross-listed with: None

Frequency: Periodically

Student Level: Both

Comments: None

Status: Offered

LING433701

Phonetics and Phonology

Geissler, Christopher

Spring 2025

This course offers a comprehensive introduction to the phonetics and phonology of human languages. Phonetics is a field of study that examines the production (articulatory) and perception (acoustic) of sounds across various languages. In comparison, phonology is concerned with understanding how these sounds are classified, differentiated, and arranged into more extensive structures that conform to language-specific patterns.

Mathematics Courses: Summer 2024

MATH100403

Finite Probability and Applications

Geist, Nathan T

Summer 2024

Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).. This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3

Room and Schedule: On-line Asynchronous

MATH100601

Thinking Like a Mathematician

Belding, Juliana V;Ward, Erika;Zhang, Liyang

Summer 2024

This course is designed for students with a desire to expand their problem-solving skills and strategies. Students will develop a flexible and transferable collection of skills and strategies for tackling unfamiliar problems in Mathematics and beyond, which will be helpful for quantitative aspects of STEM majors. In addition, students will work with select mathematics topics commonly used in General Chemistry, including rational expressions, exponential and logarithmic functions, dimensional analysis, and working with parameters.

MATH110001

Calculus I

Gerraughty, Lorin E

Summer 2024

MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

MATH100201

Functions and Differential Calculus

Goldstein, Ellen J

Fall 2024

This course is intended for students who are required to take Calculus I (either MATH1100 or MATH1102) but whose backgrounds necessitate additional preparation. Topics include the real line and coordinate plane; linear and quadratic functions; higher degree polynomials and rational functions; trigonometry, emphasizing the trigonometric functions; and exponential and logarithmic functions. Note: This course does not satisfy the University Core Requirement in Mathematics. Department permission is required: see the Assistant Chair for Undergraduates.

Calculus I

Yavuz, Cemre

Fall 2024

MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

MATH1101 is a second course in the calculus of one variable intended for students studying life or social sciences, such as biology, neuroscience, economics, management and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. There are three main topics: integration (definition of integration, basic techniques for integration, and select applications); an introduction to differential equations (with applications to population modeling and other contexts); an introduction to multivariable functions and partial derivatives (with application to optimization in economics and other contexts).

MATH110201

Calculus I (Mathematics/Science Majors)

Slyman, Katherine

Fall 2024

Not open to students who have completed a calculus course at the college level.. MATH1102 is a first course in the calculus of one variable intended for Chemistry, Computer Science/B.S., Geology, Geophysics, Mathematics, and Physics majors. It is open to others who are qualified and desire a more rigorous calculus course than MATH1100. Topics covered include the algebraic and analytic properties of the real number system, functions, limits, derivatives, and an introduction to integration.

MATH119001

Fundamentals of Mathematics I

Goldstein, Ellen J

Fall 2024

Restricted to Lynch School of Education students.. MATH1190-1191 is a course sequence designed for those who plan to teach mathematics in grades K-8. The emphasis is on building conceptual understanding of the mathematics present in the emerging K-8 curriculum and on deepening content knowledge. Number and number systems through the real number system will be studied; functions and the structure of algebra will be developed. Problem solving and reasoning, applications and making connections will be featured.

MATH221604

Introduction to Abstract Mathematics

Biringer, Ian P

Fall 2024

This course is designed to develop the student's ability to do abstract mathematics through the presentation and development of the basic notions of logic and proof. Topics include elementary set theory, mappings, integers, rings, complex numbers, and polynomials.

Credits: 3

Room and Schedule: Gasson Hall 202 MWF 09:00AM-09:50AM

MATH225001

Mathematical Foundations of Data Science

Zhang, Liyang

Fall 2024

Introduction to the mathematical foundations of data science, including calculus, linear algebra and probability. The first part of the course covers linear algebra, including matrices, systems of linear equations, vector spaces, and eigenvalues and eigenvectors. The second part of the course introduces random variables and provides an introduction to calculus based probability. The third part of the course introduces optimization techniques used in data science. Prerequisite:Math 1101 or Math 1103 or equivalent Calculus 2 background.

MATH331001

Introduction to Abstract Algebra

Boninger, Joseph

Fall 2024

Students may not take both MATH3310 and MATH3311.. This course studies four fundamental algebraic structures: groups, including subgroups, cyclic groups, permutation groups, symmetry groups, and Lagrange's Theorem; rings, including sub-rings, integral domains, and unique factorization domains; polynomials, including a discussion of unique factorization and methods for finding roots; and fields, introducing the basic ideas of field extensions and ruler and compass constructions.

Credits: 3

Room and Schedule: Gasson Hall 209 MWF 12:00 Noon-12:50PM

Satisfies Core Requirement: None

Prerequisites: MATH2216 and MATH2210/ADMT2210 or Permission of Department

MATH331101

Algebra I

Madapusi, Keerthi S

Fall 2024

Students may not take both MATH3310 and MATH3311.. This course, with MATH3312, studies the basic structures of abstract algebra. Topics include groups, subgroups, factor groups, Lagrange's Theorem, the Sylow Theorems, rings, ideal theory, integral domains, field extensions, and Galois theory.

Credits: 3

Room and Schedule: Gasson Hall 205 MWF 11:00AM-11:50AM

MATH332001

Introduction to Analysis

Cheung, Chi-Keung

Fall 2024

Students may not take both MATH3320 and MATH3321.. This course gives students the theoretical foundations for the topics taught in Calculus. It covers algebraic and order properties of the real numbers, the least upper bound axiom, limits, continuity, differentiation, the Riemann integral, sequences, and series. Definitions and proofs will be stressed throughout the course.

Credits: 3

Room and Schedule: Gasson Hall 210 MWF 12:00 Noon-12:50PM

Satisfies Core Requirement: None

MATH332101

Analysis I

Reeder, Mark

Fall 2024

Students may not take both MATH3320 and MATH3321.. This course, with MATH3322, studies the basic structure of the real numbers. Topics include the least upper bound principle, compactness of closed intervals (the Heine-Borel theorem), sequences, convergence, the Bolzano-Weierstrass theorem, continuous functions, boundedness and intermediate value theorems, uniform continuity, differentiable functions, the mean value theorem, construction of the Riemann integral, the fundamental theorem of calculus, sequences and series of functions, uniform convergence, the Weierstrass approximation theorem, special functions (exponential and trig), and Fourier series.

MATH431201

Logic for Mathematicians and for Computer Scientists

Straubing, Howard

Fall 2024

A course in mathematical logic for both mathematics and computer science majors. There will be an emphasis on applications in computer science, alongside traditional subject matter. Topics covered include propositional and predicate logic, first-order arithmetic, completeness and incompleteness theorems, computability, automated proof assistants, and satisfiability solvers.

Credits: 3

Room and Schedule: Fulton Hall 250 TuTh 12:00 Noon-01:15PM

Satisfies Core Requirement: None

Prerequisites: CSCI1101 or Some experience and comfort reading and writing mathematical proofs: MATH2216 Introduction to Abstract Mathematics or CSCI2243 Logic and Computations should provide the basics. Strongly recommended: CSCI1101 Computer Science 1, or the equivalent

MATH445501

Mathematical Problem Solving

Lehmann, Brian T

Fall 2024

This course is designed to deepen students' mathematical knowledge through solving, explaining and extending challenging and interesting problems. Students will work both individually and in groups on problems chosen from polynomials, trigonometry, analytic geometry, pre-calculus, one-variable calculus, probability and numerical algorithms. The course will emphasize explanations and generalizations rather than formal proofs and abstract properties. Some pedagogical issues, such as composing good problems and expected points of confusion in explaining various topics, will come up, but the primary goal is mathematical insight. The course will be of particular use to future secondary math teachers.

Credits: 3

Room and Schedule: Stokes Hall 111S MWF 11:00AM-11:50AM

Satisfies Core Requirement: None

Prerequisites: MATH2210/ADMT2210 and MATH2216 and MATH2202 or Permission of the instructor required for students outside the Lynch School of Education.

MATH446001

Complex Variables

Treumann, David L

Fall 2024

This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well-prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.

MATH447001

Mathematical Modeling

Slyman, Katherine**Fall 2024**

This course introduces students to methods of mathematical modeling. The emphasis is on ways to analytically represent and study today's complex modeling problems, with cases from the natural and social sciences. Topics include the model building process, mathematical models of systems, and modeling data to discover properties and hidden characteristics. The calculus of finite differences and solutions to classes of difference equations will serve as the core mathematical theory taught in this course. The dynamics of certain linear and nonlinear models will be explored from various domains (e.g., population models, economic models, Markov models). The course will conclude with an introduction to mathematical graph theory and its application to modeling interacting and interdependent systems and networks.

MATH991101

Doctoral Continuation

Bridgeman, Martin

Fall 2024

All students who have been admitted to candidacy for the Ph.D. degree are required to register and pay the fee (tuition credits can be used for this) for doctoral continuation during each semester of their candidacy when they are taking no other courses. Doctoral Continuation requires a commitment of at least 20 hours per week working on the dissertation

MATH100402

Finite Probability and Applications

Doherty, Amy L

Spring 2025

Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson (except for Psychology majors completing their second mathematics corequisite).. This course, for students in the humanities, the social sciences, School of Education, and School of Nursing, is an introduction to finite combinatorics and probability, emphasizing applications. Topics include finite sets and partitions, enumeration, probability, expectation, and random variables.

Credits: 3

Room and Schedule: Gasson Hall 205 MWF 11:00AM-11:50AM

Satisfies Core Requirement: Mathematics

Prerequisites: Permission of Department

Ideas in Mathematics

Ward, Erika

Spring 2025

Not open to students who have completed their Mathematics Core Curriculum Requirement without permission of the Department Chairperson. This course is designed to introduce the student to the spirit, beauty, and vitality of mathematics. The emphasis is on development of ideas rather than problem solving skills. Topics vary, but are typically chosen from diverse areas such as geometry, number theory, computation, and graph theory.

Credits: 3

MATH110001

Calculus I

Yavuz, Cemre

Spring 2025

MATH1100 is not open to students who have completed a calculus course at the college level. Students contemplating majors in Chemistry, Computer Science/B.S., Environmental Geosciences, Geological Sciences, Mathematics, or Physics should enroll in MATH1102. For further information about selecting your Math courses given your background, please see this link to the BC Math Department. MATH1100 is a first course in the calculus of one variable intended for biology, computer science, economics, management, and premedical students. It is open to others who are qualified and desire a more rigorous mathematics course at the core level. Topics include a brief review of polynomials and trigonometric, exponential, and logarithmic functions, followed by discussion of limits, derivatives, and applications of differential calculus to real-world problem areas. The course concludes with an introduction to integration.

MATH431101

Formal Methods

McTague, Carl S

Spring 2025

Complex programs often have bugs, sometimes with serious consequences. Although testing can help root them out, it is impossible to test all possible behaviors of complex programs. To complement testing, one can construct mathematical proofs that programs are correct. This technique, called formal verification, can be done using a tool for writing and automatically checking such proofs. This course introduces formal verification with one such proof checking system called Coq. Students will write precise specifications of how programs should behave, and then carry out proofs in Coq showing that those specifications are met.

MATH441001

Differential Equations

Treumann, David L

Spring 2025

This course is a junior-senior elective intended primarily for students interested in applications of mathematics. Topics include first order linear equations, higher order linear equations with constant coefficients, linear systems, qualitative analysis of non-linear systems, and an introduction to stability and bifurcations.

Credits: 3

Room and Schedule: Gasson Hall 210 MWF 11:00AM-11:50AM

Satisfies Core Requirement: None

Prerequisites: MATH2210/ADMT2210 and MATH2202

Corequisites: None

MATH442601

Probability

Gross, Robert

Spring 2025

This course provides a general introduction to modern probability theory. Topics include probability spaces, discrete and continuous random variables, joint and conditional distributions, mathematical expectation, the central limit theorem, and the weak law of large numbers. Applications to real data will be stressed, and we will use the computer to explore many concepts.

MATH444001

Dynamical Systems

Slyman, Katherine

Spring 2025

This course is an introduction to nonlinear dynamics and their applications, emphasizing qualitative methods for differential equations. Topics include fixed and periodic points, stability, linearization, parameterized families and bifurcations, and existence and nonexistence theorems for closed orbits in the plane. The final part of the course is an introduction to chaotic systems and fractals, including the Lorenz system and the quadratic map.

MATH445301

Euclid's *Elements*

Goldstein, Ellen J

Spring 2025

This course is a close reading of Euclid's *Elements* in seminar style, with careful attention to axiomatic reasoning and mathematical constructions that build on one another in a sequence of logical arguments. We will also emphasize clear and creative communication on mathematical ideas, with some attention to the cultural background of the *Elements* and its place in a modern education.

MATH446001**Complex Variables****Friedberg, Solomon****Spring 2025**

This course gives an introduction to the theory of functions of a complex variable, a fundamental and central area of mathematics. It is intended for mathematics majors and well-prepared science majors. Topics covered include complex numbers and their properties, analytic functions and the Cauchy-Riemann equations, the logarithm and other elementary functions of a complex variable, integration of complex functions, the Cauchy integral theorem and its consequences, power series representation of analytic functions, and the residue theorem and applications to definite integrals.

Credits: 3**Room and Schedule:** Campion Hall 302 MW 03:00PM-04:15PM**Satisfies Core Requirement:** None**Prerequisites:** MATH2202 and MATH2210/ADMT2210**Corequisites:** None**Cross-listed with:** None**Frequency:** Every Fall, Every Spring**Student Level:** Undergraduate**Comments:** None**Status:** Offered**MATH446201****Topology****Boninger, Joseph****Spring 2025**

This course is an introduction to point-set topology. Topics include topological spaces, continuous functions, connectedness, compactness, metric spaces, the Urysohn Metrization Theorem, manifolds, the fundamental group and the classification of surfaces. We will also discuss applications of these concepts to problems in science and engineering.

Credits: 3**Room and Schedule:** 245 Beacon Street Room 214 MWF 11:00AM-11:50AM**Satisfies Core Requirement:** None**Prerequisites:** MATH2216**Corequisites:** MATH3320 or MATH3321 is recommended as a pre/corequisite.**Cross-listed with:** None**Frequency:** Every Fall**Student Level:** Undergraduate

MATH446501

Advanced Data Analysis

Cheung, Chi-Keung

Spring 2025

In this course, we will explore various popular statistical methods used in data science. The course will be both theoretical (mathematical) and applied (data- analytic). The mathematical theorems and proofs are an essential part of the course. Part I: Standard Advanced Statistics topics Bayesian Analysis, Analysis of Variance, Bootstrap (Parametric and Non-Parametric), Generalized Linear Regressions, Generalized additive model etc. Part II: Statistical Methods for the 21st century data analysis Principal Component Analysis, Large Scale Hypothesis Testing, Ridge and Lasso Regressions, Random Forest, Support Vector Machines etc.

Music Academic Courses: Summer 2024

MUSA110001

Fundamentals of Music Theory

Kosch, Leah F

Summer 2024

An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper-level study in music theory and will begin to question broader issues concerning the meaning and use of music. Training in Keyboard Skills is required in the accompanying Lab

Music Academic Courses: Fall 2024

MUSA109001

Ear Training/Sight-Singing Lab

Carey, Julia S

Fall 2024

For music majors. In meetings twice a week students learn to sing melodies by sight through a solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors & minors. Usually taken concurrently with MUSA 2100 Harmony or MUSA 3100 Chromatic Harmony.

MUSA132001

Introduction to Musics of the World

Daly Berman, Amanda E

Fall 2024

This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindustani; Karnatak; Javanese; and Japanese musics. Musical training and background are not required and are not presumed. Fulfills World Music requirement in Major; fulfills x-cultural requirement in Minor

Aesthetic Exercises: Engagement, Empathy, Ethics

Callahan, Daniel

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take THEO1701 with this course. How might we train for encounters with beauty and the sacred? One objective of these linked courses is to help students realize that their own personal experiences can be the departing point for -- and even the subject of -- scholarly inquiry, that theology, the arts, and philosophy are not mere disciplines to be learned but practices that are indispensable to being alive and serving the common good. Another aim is for students to realize that deeply meaningful experiences -- whether of the true, the beautiful, and the good, or the divine in the world and in ones self -- often don't just happen. Instead, such experiences are usually the result of being situated in the right place and time with the right preparation and mindset; in other words, they are usually the result of a certain type of exercise.

MUSA230701

Musics of Asia

Dineen, Douglass

Fall 2024

This course offers an approach to Asian culture focusing on music and the performing arts. Case studies from India, Tibet, China, Japan, Korea, and Indonesia highlight the profound richness of musical experience seen throughout Asia while providing the foundation for a broader analysis of music-as-culture. Examining how music is deployed--in religious expression, political and social strategies, identity formation, and entertainment--reveals both continuities in musical uses/meanings and diversity in its cultural, social, and personal dimensions. This course locates contemporary Asian performing arts in their historical contexts, considers the transformations that take place as music flows across borders, and examines the interplay between global information networks and local forms and representations.

Few recent artworks have grabbed hold of the American public consciousness like Hamilton: An American Musical. Lin-Manuel Miranda's show is deeply rooted in the conventions of American music theater, which since the mid-nineteenth century has been a site for exploring racial representation, cultural exchange, and national identity. Fueled by the vibrant musical language of hip hop, rooted in Black resistance, Hamilton also seemed to meet and reflect a volatile moment of racial reckoning in America. In this course, open to music majors and non-majors, students will examine the political, cultural, and musical resonances of Hamilton within these rich historical contexts. Fulfills popular music in Music Major, cross-cultural course in Music Minor.

MUSA310001

Chromatic Harmony

Lee, Thomas O

Fall 2024

This course covers the basic principles of chromatic progression. The proper use of secondary dominants, diminished seventh chords, and augmented triads precedes an in-depth study of the harmonization of Bach chorales, the concept of modulation using modal exchange, and the introduction of Neapolitan sixth and augmented sixth chords. We will study via harmonic and form analysis the works of great composers including Bach, Haydn, Mozart, Beethoven, Schubert, Schumann, Chopin, Brahms, Wolf, Mahler, and Wagner. Training in Keyboard Skills is required in the accompanying Lab.

Jazz Harmony and Improvisation

Lee, Thomas O

Fall 2024

This music theory course will focus on the study of chord structures, chord substitutions, chord scales, composition, and improvisation as they have been codified by contemporary jazz musicians. The technical innovations in the music of Sonny Rollins, Thelonius Monk, Charlie Parker, and Miles Davis will be analyzed and discussed. Special attention will be placed on learning how to improvise on the great standards of the jazz repertory. Additional studies will include the following: piano lead sheet arrangements; ii-V-I keyboard harmony, re-harmonization, and composing original tunes based on chord structures of standards by Berlin, Kern, Gershwin; rhythm changes; and the blues.

Tonal Composition

Gawlick, Ralf Y

Fall 2024

Students enrolled in this course will complete three composition projects: (1) a three-part fugue in the Baroque style of J.S Bach, (2) a Sonata-Allegro first movement in the Classical style of Haydn or Mozart, and (3) a Rondo or Scherzo movement in the Romantic style of Beethoven, Mendelssohn, Schubert, or Schumann. We will examine representative works of these composers in these genres to serve as models for the student compositions.

Opera

McGrann, Jeremiah W

Fall 2024

In this course we will look at how text and music combine to relate a drama, concentrating on five representative masters of the seventeenth through nineteenth centuries--Monteverdi, Handel, Mozart, Verdi, and Wagner. This course will take excursions into other works--the operas created for the court of Louis XIV, the vocal pyrotechnics of the Italian golden age of singing, the spectacle of French grand opera, and the operatic qualities of the modern Broadway musical.

Senior Seminar

Noone, Michael J

Fall 2024

For music majors in their senior year (exception only by special permission). Through supervised reading, research, writing, discussion, and performance, this seminar will help majors develop a framework for synthesizing their various courses into a coherent whole, with special emphasis in the area of strongest interest (theory, composition, history, cross-cultural studies, or performance). It will also help prepare students for examinations in listening repertoire and ear-training (see major requirements).

Music Academic Courses: Spring 2025

MUSA109001

Ear Training/Sight-Singing Lab

Carey, Julia S

Spring 2025

For music majors. In meetings twice a week students learn to sing melodies by sight through a solfege system of drilling scales and intervals (sight-singing) and learn to notate melodic, rhythmic, and harmonic patterns (ear-training). The course principally helps students pass the Ear Training/Sight Singing requirement for the major but can benefit individuals in singing groups or those who wish to improve their practical musical skills. Preference given to majors & minors. Usually taken concurrently with MUSA 2100 Harmony or MUSA 3100 Chromatic Harmony.

Fundamentals of Music Theory

Gawlick, Barbara S

Spring 2025

An introductory music theory course designed for students with a strong interest in music. As a Core course it includes speculations on how musical discourse informs our perception and understanding of the world around us. Students learn to acquire skills in music notation and transcription. The following theoretical concepts will be extensively covered: notation of pitch and rhythm, scales, intervals, chords, and harmonic progression. Students leave the course prepared for upper-level study in music theory and will begin to question broader issues concerning the meaning and use of music. Training in Keyboard Skills is required in the accompanying Lab

History of Popular Music

McCool, Jason

Spring 2025

From the blues to country, jazz to rock, our nation's political, social, and economic history has been mirrored and influenced by the styles of popular music developed in our cultural melting pot. This course will provide an overall history of popular music in America, with emphasis upon mainstream popular music since 1954. Its focus will be on the independence and interdependence of black and white musical cultures in America. Students will learn stylistic developments in popular music and acquire interpretive strategies, including methods of aural analysis that will view popular songs as historical texts and as autonomous works of art.

Introduction to Musics of the World

Daly Berman, Amanda E

Spring 2025

This course provides an introduction to selected musical traditions from around the world, in their cultural contexts. Our main goals are to study the connections between music and other cultural features and institutions, to become familiar with the features of major musical styles from the cultures studied, and with basic concepts in ethnomusicology and comparative musicology. Case studies include Native North and South American; Western, Central, and Southern African; Arabic; Persian; Hindustani; Karnatak; Javanese; and Japanese musics. Musical training and background are not required and are not presumed. Fulfills World Music requirement in Major; fulfills x-cultural requirement in Minor

Spring 2025

This is a course in general education, especially appropriate for majors and minors in education and music. The objectives of this course are to equip prospective teachers with strategies and methods of teaching and integrating music within the PreK -12 curriculum and to develop basic music competencies and understanding to engage a student's artistic, emotional, cognitive, physical, and psychological faculties. These objectives will be addressed through a variety of experiences: assigned readings, writings and research projects on topics of music philosophy and aesthetics, theories of children's musical development/learning, teaching methodologies and materials, hands-on activities, and in-class teaching opportunities.

MUSA220101

Medieval/Renaissance

Restrepo, Margarita

Spring 2025

A study of the development of Western Music from the first stages of musical notation in the Middle Ages through the polyphonic music of the sixteenth century. Both sacred and secular traditions will be considered, including Gregorian chant, the polyphonic Mass and motet, the chanson, and the madrigal of the 16th century. Although most of the literature of this period is vocal, a study of the instruments and instrumental literature will be included. Fulfills Music Period course in Major and Minor

MUSA230401

Musics of India

Dineen, Douglass

Spring 2025

This course will introduce students to the rich and varied musical arts of India. Students will delve into the ubiquitous songs of Bollywood and Tamil film, karnatak and hindustani art musics, temple musics, as well as the music (and dance) of bharatanatyam, bhangra, and other regional genres. Lectures will focus on situating Indian musics in their cultural and historic contexts while exploring issues of identity formation, regional and transnational movements, and the changing meanings of music and the arts in India. Students will also study performance practices--including basic exercises for South Indian melody (raga), rhythm (tala), and dance--which will provide engaged (and embodied) learning supplements to the lectures. There are no academic or music-skills prerequisites for this course.

MUSA233401**Hip Hop in American Culture****Mangin, Timothy R****Spring 2025**

This course is an historical and ethnomusicological review of hip hop. We will examine the roots of hip hop in African expressive culture, the emergence of the hip hop genre in the United States, and hip hop's impact in other places around the globe. The course requires active listening, readings, and use of multimedia.

This course will investigate different presentations of music and performance practice across the Celtic region, including its diasporas. We will consider the influence of political events on contemporary music, using such artists as Kneecap, the Cranberries, and U2. The presence of linguistic and cultural revival through educational and music programs will be discussed, such as with Coliste Lurgan and Gaelic-language immersion schools, as well as the presence of English language. The use of Celtic instruments will be examined as we analyze what can be considered "traditional." We will further address how Celtic identity is performed both at home and in the diaspora by collecting examples of material and digital culture and taking a class visit to a local session (e.g., the Irish Cultural Center). Guest artists both from on campus and the greater Boston area will supplement the course with lecture-demonstrations.

Chromatic Harmony

Gawlick, Ralf Y

Spring 2025

This course covers the basic principles of chromatic progression. The proper use of secondary dominants, diminished seventh chords, and augmented triads precedes an in-depth study of the harmonization of Bach chorales, the concept of modulation using modal exchange, and the introduction of Neapolitan sixth and augmented sixth chords. We will study via harmonic and form analysis the works of great composers including Bach, Haydn, Mozart, Beethoven, Schubert, Schumann, Chopin, Brahms, Wolf, Mahler, and Wagner. Training in Keyboard Skills is required in the accompanying Lab.

Seminar in Composition

Lee, Thomas O

Spring 2025

The course will be conducted in two parts. One: class will meet once a month. Works in both tonal and twentieth century idioms will be discussed and used as models for student compositions. Two: each student will meet once a week with the instructor for a private studio composition lesson. The student will complete, by the end of the semester, three original compositions: theme and variations, a movement for string quartet, and a song cycle for voice and piano. The purchase of Finale music software, created by Coda Music Technology, Mac or PC version, is required for this course.

The Beatles: From "Yesterday" to "Tomorrow Never Knows"

McCool, Jason

Spring 2025

Everyone loves the Beatles. In this class, we explore why that is the case. We will chart the rapidly changing idiom of popular music in the 1960s and outline its interaction with various social, political and cultural movements, such as "Beatlemania" and psychedelia. The primary source material for this class is the established canon of Beatles songs, albums and films, which we will supplement with secondary articles, reviews and interviews. This course will challenge you to listen critically to, and think deeply about, one of the most influential bands in the twentieth century.

MUSP162001

Traditional Irish Dance

Haggan, Caitlin M

Fall 2024

This course will introduce students to the traditional dances of Ireland, including solo step dance footwork and group set and cil dances. The class will include warm-ups, technique, and choreography, as well as occasional short readings, video viewings, and music listening exercises. Students will gain an understanding of Irish traditional musical rhythms, while physically embodying their intrinsic connection to the dance patterns. An uplifting and invigorating class. All levels welcome.

MUSP167001

Waaw Waaw Sabar: BC West African Music Ensemble

Mangin, Timothy R;Toure, Amadou L

Fall 2024

This course specializes in sabar, a drumming and dance style of the Wolof people from Senegal. Performed in many contexts, the sabar is heard at baptisms, weddings, wrestling matches, political and community gatherings, the Black Panther soundtrack, and the urban dance music called mbalax. Students will learn the repertoire performed at these events in weekly classes taught by A. Lamine Toure, a master drummer from one of Senegals oldest griot families. We welcome musicians, non-musicians, students, faculty, staff, African music fans, and members of the Boston community. We provide the drums. The ensemble is inspired by the Wolof expression "waaw waaw," a positive affirmation meaning "Yes!!!", "That's Right," Good Job, and "Excellent." Our classes encourage collective participation, fun, and a deeper understanding of a millennia-old drumming tradition that continues to evolve as new technologies and musical styles emerge.

Introduction to Improvisation

Kniffin, Eric L

Fall 2024

Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.

Gospel Music Workshop

Jacob Dorman, Shannon D

Fall 2024

This class will examine Black gospel music with an emphasis on choral music and oral traditions that capture the Black experience in America from a historical, socio-political and multicultural standpoint. The syllabus and repertoire is reflective of the great faith tradition that is an integral part of black culture; in that it includes the breadth of musical expression in the Black worship experience. Students will analyze the importance of Black gospel music and its vital role in shaping global music trends. Spirituals, traditional gospel, contemporary gospel, as well as religious music of the European tradition will be reviewed closely from a historical and musical standpoint. The class will comprise of equal parts lecture and practicum (Voices of Imani Gospel Choir). The latter half comprising of the practicum (VOI) will help students engage in practical learning of songs explored in the lecture, consequently accomplishing the age-old institution of oral tradition in Black history.

The University Chorale of Boston College

Pietilainen-Caffrey, Riikka

Fall 2024

The University Chorale of Boston College comprises 90-120 singers and performs four programs per semester, including Pops on the Heights and Christmas on the Heights. Members can join the annual performance tour during spring break. The Chorale explores repertoire from all over the world and all stylistic periods, medieval to modern, and works both a cappella and with orchestral accompaniment. Membership is by audition and open to students, faculty and staff. For audition information, see the Music Department website or choralebc.com. Auditions, which will consist of vocal exercises and a song excerpt, will happen during the first two weeks of classes each semester.

Waaw Waaw Sabar: BC West African Music Ensemble

Mangin, Timothy R;Toure, Amadou L

Spring 2025

This course specializes in sabar, a drumming and dance style of the Wolof people from Senegal. Performed in many contexts, the sabar is heard at baptisms, weddings, wrestling matches, political and community gatherings, the Black Panther soundtrack, and the urban dance music called mbalax. Students will learn the repertoire performed at these events in weekly classes taught by A. Lamine Toure, a master drummer from one of Senegals oldest griot families. We welcome musicians, non-musicians, students, faculty, staff, African music fans, and members of the Boston community. We provide the drums. The ensemble is inspired by the Wolof expression "waaw waaw," a positive affirmation meaning "Yes!!!", "That's Right," Good Job, and "Excellent." Our classes encourage collective participation, fun, and a deeper understanding of a millennia-old drumming tradition that continues to evolve as new technologies and musical styles emerge.

Introduction to Improvisation

Kniffin, Eric L

Spring 2025

Improvisation is a central feature of many Western musical styles. This course offers students the opportunity to learn how to improvise in jazz, blues and rock. In a hands-on manner, students are introduced to the fundamental concepts of improvising. No prior experience is necessary, and there is no prerequisite, but you should have at least some experience playing an instrument or singing. In addition to extensive in-class performance, accompaniment recordings are provided for practice outside class.

Gospel Music Workshop

Jacob Dorman, Shannon D

Spring 2025

This class will examine Black gospel music with an emphasis on choral music and oral traditions that capture the Black experience in America from a historical, socio-political and multicultural standpoint. The syllabus and repertoire is reflective of the great faith tradition that is an integral part of black culture; in that it includes the breadth of musical expression in the Black worship experience. Students will analyze the importance of Black gospel music and its vital role in shaping global music trends. Spirituals, traditional gospel, contemporary gospel, as well as religious music of the European tradition will be reviewed closely from a historical and musical standpoint. The class will comprise of equal parts lecture and practicum (Voices of Imani Gospel Choir). The latter half comprising of the practicum (VOI) will help students engage in practical learning of songs explored in the lecture, consequently accomplishing the age-old institution of oral tradition in Black history.

Audition required The University Wind Ensemble is a select ensemble of 46 woodwind, brass and percussion instrumentalists whose membership is determined by competitive audition or by invitation of the conductor. Members are highly skilled and highly motivated student musicians for whom making music is a personal priority. The ensemble performs wind literature of the highest quality and challenge. The University Wind Ensemble serves as the parent group for the performance of a wide variety of chamber music. The University Wind Ensemble is a full-year commitment.

The University Chorale of Boston College

Pietilainen-Caffrey, Riikka

Spring 2025

The University Chorale of Boston College comprises 90-120 singers and performs four programs per semester, including Pops on the Heights and Christmas on the Heights. Members can join the annual performance tour during spring break. The Chorale explores repertoire from all over the world and all stylistic periods, medieval to modern, and works both a cappella and with orchestral accompaniment. Membership is by audition and open to students, faculty and staff. For audition information, see the Music Department website or choralebc.com. Auditions, which will consist of vocal exercises and a song excerpt, will happen during the first two weeks of classes each semester.

Practical Logic

Boessenkool, Anna D

Summer 2024

A course not in the "new logic" (symbolic, or mathematical, logic) but in the "old logic" (ordinary language logic) invented by Aristotle and used for 2300 years in all the humanities. Includes such topics as definition, contradiction, syllogisms, implied premises, induction, and analogy. The course includes the commonsensical philosophical bases for this logic and also many practical applications to reading, interpreting, evaluating, and inventing arguments, especially in dialogs.

PHIL327501

Ethics of Migration

Sweeney, Eileen C

Summer 2024

The course deals with migration as a topic for philosophical and theological reflection. We will consider key concepts related to migration--e.g., citizen, migrant, human rights, nation. We will examine debates over whether limits on migration are justifiable. We will also pay special attention to rights and duties concerning refugees. The course will be take place in Mexico, first in Mexico City and then in Tijuana, just a few miles from the U.S.-Mexico border. We will use the Mexican context--including both Mexican history and present realities--as a way of making concrete the philosophical and theological discussion of migration. For millennia, Mexico has been a place of migration and settlement by different peoples. And each year, hundreds of thousands of people move in and out of Mexico for a variety of reasons. Moreover, the U.S.-Mexico border is an issue of intense debate in both the U.S. and Mexico. Thus Mexico provides an excellent context for thinking about: (1) the big picture of migration as a human phenomenon, (2) the historical forces that have shaped, and continue to shape, patterns of migration, and (3) the contemporary situation of migrants and contemporary policies toward migration. Our goal is to combine philosophical/theological reflection with cultural immersion in a mutually illuminating way. The Mexican context will help make our philosophical/theological discussions of migration more vivid, nuanced, and realistic.

New Scientific Visions I/Perspectives IV

Vandewall, Holly R

Fall 2024

Can the study of modern mathematics and the natural sciences prove to be a genuine liberation of the human spirit? This unusual question will form the central theme of this course. The course will explore major developments in the fields of mathematics, biology, physics, chemistry, and the earth and space sciences from ancient Greece, through the modern scientific revolutions of the seventeenth century, and into the twentieth century achievements and paradoxes of modern number theory, the discovery of DNA, relativity theories, quantum mechanics, and contemporary cosmologies.

PHIL116001

The Challenge of Justice

Pope, Stephen J

Fall 2024

This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

PHIL160101**Perspectives on Art I: Crisis, Courage, and Creativity****Rumble, Vanessa P****Fall 2024**

Ways of thinking, and ways of doing philosophy, have arisen, again and again, in response to historical and intellectual crises. In the attempt to glimpse and conceptualize what is real, philosophy has elaborated and embraced new ways to see and understand the reality (metaphysical and socio-political) around us and the human life that we must live. Understood in this way, philosophy is always a call to courage and creativity. In this year-long course in philosophy, paired with courses on art and literature offered by Professors Burns and Epstein, we will study the history of western philosophy, keeping an eye on the way in which philosophy comports itself in relation to the bodily and the sensual and, in the second semester, more and more explicitly and thematically, in relation to art and beauty. Fall semester will focus on Greek tragedy, the classical philosophy of Plato and Aristotle, St. Augustine's attempt to echo rhetorically the notion of a Truth that concerns itself with time, and political theorists (Machiavelli, Locke and Rousseau) who usher us to the threshold of the Romantic era, where our second semester commences. The pair course structure and the evening reflections allow us the space and time to pursue this intellectual work within a community.

PHIL172701

The Self and its Limits: Classical and Contemporary Perspectives

Moran, Dermot

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take CLAS1706 with this course. What is the relationship between the individual self and its social roles? These paired courses examine what factors make us free individuals and how that freedom has historically been removed from certain people. One course will explore the nature of the self in historical and contemporary perspectives from East and West to look at the nature of self-consciousness and personhood. The other will investigate how ancient Greeks and Romans justified the enslavement of individuals for material gain and how ancient slavery influenced American society both in terms of its use of slave-labor and in the arguments made for abolition.

A Life of Virtue: The Wisdom of the Ancient Greek Tradition

DeChiara-Quenzer, Deborah

Fall 2024

This is an Enduring Question course and is open to FRESHMEN only. You must take THEO1729 with this course. What does it mean to be virtuous and why does it matter? These courses will consider what it means to be virtuous and how that contributes to living a flourishing life. Both courses begin with ancient texts -- the Bible and writings of Plato and Aristotle -- and introduce students to foundational ethical and religious notions of virtue. Each course, in its own distinctive manner, will invite students to think about how notions of virtue relate either to famous literary figures (Philosophy course) or to the works of later philosophers and theologians (Theology course). The texts of Plato and Aristotle will serve as a point of connection between the two courses.

PHIL229101

Philosophy and Theology of Community I

Sweeney, Meghan T

Fall 2024

This seminar explores the nature of community, with particular focus on community in the American context. Some of the central historical, cultural, political and religious forces that have shaped both American community and the American understanding of community are examined. These questions are initially approached from an historical perspective with an assessment of philosophical ideas which were dominant in the political thinking of the American founders. The seminar then considers the historical development of those ideas in light of the way they are concretized in political practice, arriving at an assessment of contemporary American thinking on community. As a course in the PULSE program, service is required for this course. Satisfies the following distribution requirement(s) for Philosophy: Ethics & Values.

PHIL400101

Feminisms and Philosophies of Difference

McGill, Cherie

Fall 2024

What does it mean to call oneself (or someone else) a 'feminist'? In attempting an answer to this question, we will consider efforts to reveal, unravel, and remedy the conceptual, psychological, and economic dimensions of the oppression of women. We will discuss a variety of feminisms--liberal, existential, radical--and their differing approaches to such 'feminist' issues as marriage and domestic violence, reproduction and pregnancy, work and sexual harassment, and the science of gender and gender difference. We will examine the relationship of sexism to racism, heterosexism, and class exploitation, and investigate the role of the concept of difference in creating and maintaining structural inequalities.

PHIL421201

Comparative Philosophy and the Idea of the Self

Johnson, David W

Fall 2024

This course examines two ideas that seem fundamentally opposed to one another: the reality of the self and the doctrine of no-self. We explore this issue by comparing the ideas of Nishida Kitar and Kimura Bin two modern Japanese philosophers whose work has been shaped by Buddhist thought with the work of Western theorists of the self such as Ulric Neisser, Dan Zahavi, Shaun Gallagher, Evan Thompson, and Dorothe Legrand. Through these comparisons we consider the question of whether it may be possible to reconcile claims about the reality of the self with a particular account of the ontology of selfless states. Satisfies the following distribution requirement(s) for Philosophy: Ethics & Values, Knowledge & Reality.

How to Begin Thinking: Aftermaths of Twentieth-Century Literature, Philosophy, History

Newmark, Kevin

Fall 2024

Conducted in English: Undergraduate Elective. Cross listed with English and Philosophy "Thinking," the French philosopher Emmanuel Levinas once suggested, "probably begins through traumatism." This course will study a series of disruptive and transformative events that have indelibly marked the twentieth century. What is the task of thinking for a European tradition displaced internally by the Holocaust and externally by the end of colonial expansions into other continents? Authors will include Levinas, Derrida, Nancy, Saussure, Barthes, Duras (in English translation from French); Borges and Dorfman (in English and English translation from Spanish); Calvino (in English translation from Italian); and Descartes (in English translation from Latin). A German component (in English translation) will consider Husserl and Heidegger as a counterpoint to the European tradition of Romance languages, literatures, and cultures.

PHIL441901

Friendship

Gurtler, Gary, SJ

Fall 2024

The renewed interest among philosophers about friendship indicates a break from the suspicion of the last several centuries. The lack of interest can be traced to an understanding of human nature where each individual is a self-contained unit. Ethical reflection emphasized equality so much that friendship appeared hard to justify, as based on preferring one individual over another. This has not always been the case, since Greek and Medieval thinkers regarded friendship rather highly as indicating what is best in human nature and essential to happiness. We will try to understand why different cultural perspectives evaluate friendship in different ways.

Freud and Philosophy

Rumble, Vanessa P

Fall 2024

The course is designed to acquaint students with the scope and evolution of Freud's thinking and with significant developments in psychoanalysis since his time. Students will study and assess Freud's and Breuer's first formulation of the nature of hysteria; Freud's groundbreaking work in dream interpretation and the nature of unconscious processes; Freud's attempt to apply his novel theory of unconscious mechanisms to cultural anthropology as well as individual psychology; and the implications of the ongoing revisions in Freud's classification of the drives. Above all, we'll focus on Freud's attempt, over the course of many years, to account for the origin of human morality and guilt, and his ongoing assessment of the role of Judaism in his life and in his culture.

PHIL449401

Introduction to Schopenhauerian Pessimism

Rivera Castro, Juan C, Society of Jesus

Fall 2024

Is this world set up to make us miserable? Is this the worst of all possible worlds? Does any good that we experience compensate for any evil suffered? Can any philosophical account of reality be worth our time if it does not address the unspeakable sufferings of mankind? These are some of the questions that this course will explore. This introduction to Schopenhauers pessimism aims to familiarize the students with Schopenhauers argument for philosophical pessimism, their scope, limitations and how they provide a philosophical answer to important existential questions regarding suffering, guilt, death, and holiness. Schopenhauerian pessimism, this course argues, is not a depressed description of reality, but a deep source of liberation, a medicine against apathy and boredom. We will read all the major sections of The World as Will and Representation, Parerga and Paralipomena and Manuscript Remains dedicated to the different elements that form Schopenhauerian pessimism. As preparation to engage Schopenhauers texts, we will read chapters from Frederick Beisers Weltschmerz: Pessimism in German Philosophy, 1800-1900 to familiarize the student with some key elements from Schopenhauers epistemology and metaphysics. At the end of the course, the student will be able to present the major arguments for Schopenhauerian pessimism, apply it to different existential situations and discern what elements of it can be retained. Satisfies the following distribution requirement(s) for Philosophy: History of Philosophy, Knowledge & Reality.

Mahayana Buddhism: Thought and Practice

Vale, Matthew

Fall 2024

This course explores Mahayana Buddhist thought, meditation practice, narrative, and ritual practice across Asia. We consider texts ancient and modern. After a basic introduction to Buddhism, we take up topics ranging from meditation, to compassion, nirvana, emptiness, Buddha nature, Zen, and Mahayana Buddhist ethics. Our focus is on fundamental theological questions: What are the causes of suffering? How can meditation and ethical practices illuminate sufferings causes, and put an end to them? What is the state of unconditioned awareness, freedom, and joy that lies beyond suffering? Most importantly, what does this all have to do with me? No background in Buddhism is required.

Modern Philosophy

Solere, Jean-Luc

Fall 2024

From the early 17th to the end of the 18th century, reason asserted its autonomy and triumphed in the Age of Enlightenment, but at the same time reflected on its own limits. Through a series of themes and problems, the course presents the major philosophies (roughly, from Descartes to Kant) that have accompanied the development of scientific knowledge, the rise of the modern mind, and the transformation of Western societies. This comprehensive survey covers metaphysics, epistemology, ethics, and political philosophy, paying attention to the interconnection between ideas in these different domains (with for instance the centrality of the notion of law: laws of nature, political laws, moral law). It particularly highlights the logical development in the succession of questions and answers that characterize the evolution of philosophy in the modern times. The course will provide you with the central concepts of modern thought, so as to grasp the bases of today's understanding of the world and of ourselves. Analysis of representative texts, class discussions, and writing assignments are designed to develop rigorous argumentation and expression skills. (NB: This course was previously offered as PHIL 4406; you cannot take it if you took PHIL 4406)

PHIL550001

Philosophy of Law

Berger, Christopher D

Fall 2024

This course aims to provide an overview of a number of core debates in contemporary philosophy of law. The primary concern will be to examine the relation between legal validity and the moral normativity of the law, that is, answers to the questions 'What is the law?' and 'Is there a (moral) duty to obey the law?' In addition to these more general questions, we will focus on several more specific questions pertaining to constitutionalism, including 'What is the relationship between a constitution and the rule of law?', 'What is the ground of judicial review?' and 'What connection, if any, is there between questions of legal theory and broader debates in contemporary political philosophy?'

PHIL552701

Philosophy of Language

Sweeney, Eileen C

Fall 2024

This course will consider major texts and movements in twentieth century philosophy of language in both the analytic and continental traditions, reading the work of Russell, Wittgenstein, J. L. Austin, Quine, and Davidson as well as Ricoeur and Derrida. Our goal will be to bring together these very different approaches to what has been a central concern of philosophy in the twentieth century.

PHIL552901

Metaphysics

Gurtler, Gary, SJ

Fall 2024

The course begins with classical modern philosophers. Their problems concern the relation of mind and body, the possibility of objective knowledge, and cause and effect. Their method is that of science, combining both empirical and logical elements. After these modern thinkers, giving our cultural assumptions, we turn to Ancient and Medieval philosophers. Their problems concern the relation of spirit and matter, the analogy of being and truth, and causal explanation. Their method is one of dialogue. With this different set of problems and method, we will be able to evaluate the relative strengths of these different philosophical positions. Satisfies the following distribution requirement(s) for Philosophy: Knowledge & Reality, History of Philosophy, Ancient, Medieval.

Capstone: Desire and Discernment

Muldoon, Timothy P

Fall 2024

Seniors only. Capstone classes may NOT be taken Pass/Fail. You may take only ONE Capstone class before graduation. First, the course will involve careful reflection on the sifting and pruning of desires. It will introduce philosophical reflection on desire from ancient Greece to modern philosophy, paying particular attention to the Ignatian tradition of discernment of spirits. Second, it will invite particular reflection on our relationships, and the desires that we have for the relationships we seek to cultivate over the course of our lives. Third, it will invite students to reflect on their experiences of work and preparation for a career, asking how their Boston College education has formed them. Fourth, we will reflect on our citizenship within communities: family, local community, society, nation, and world.

PHIL553401

Environmental Ethics: Value of Nature/Nature of Value

McCoy, Marina B

Fall 2024

This course has theoretical and practical sides. Theoretically, it is an inquiry into value theory in general, and the value of (nonhuman) nature in particular. We will examine positions on the moral standing of nonhumans, such as anthropocentrism, animal rights and welfare, biocentrism, and ecocentrism. Practically, we will explore the social, political, economic, and ethical dimensions of environmental issues such as food, consumerism, climate change, energy, and sustainability. Our animating questions are: What are our duties to the natural world? How would our civilization have to change to meet these duties?

PHIL556001

Aristotle on Action, Virtue, and Happiness

Culbreth, Andrew J

Fall 2024

This course examines Aristotle's ethics and his account of happiness by considering his views on natural and practical teleology, his theory of the human soul, and his account of excellent activity and character. Readings thus draw from Aristotle's theoretical writings (especially the Physics, Metaphysics, and De Anima, among others) to make sense of his account of the human good (in the ethical treatises and the Politics). Central themes include: the nature of practical reason, philosophy of action, natural teleology, moral psychology, happiness, the nature of virtue, practical wisdom and political wisdom, friendship, pleasure, and contemplation. Satisfies the following distribution requirement(s) for Philosophy: Ancient (G), History of Philosophy (UG).

PHIL558901

Karl Jaspers Reading the Great Philosophers

Basile, Giovanni Pietro, Society of Jesus

Fall 2024

In 1957, Karl Jaspers published *Die groen Philosophen*, a work collecting his interpretation of some of the foremost thinkers of all time. The book was translated into English in 1962 under the title *The Great Philosophers*, edited by Hannah Arendt. Taking this work as a starting point, but also referring to other writings by Jaspers, the seminar aims to analyze the Jaspersian interpretation of the thought of the following authors: Plato, Plotinus, Agustin, Anselm, Cusano, Descartes, and Spinoza. The intent is, moreover, to highlight the influence of these thinkers on Karl Jaspers' philosophy of existence and metaphysics. Satisfies the following distribution requirement(s) for Philosophy: History of Philosophy.

PHIL589901

The Concept of the Tragic in 20th Century Philosophy

Basile, Giovanni Pietro, SJ

Fall 2024

The course aims to explore the notion of the tragic as a philosophical concept. While ancient tragedy is characterized by the compassion aroused by the suffering of the tragic hero and the fear aroused by tragic theology, the idea of a wicked god disappears quite early. In contemporary philosophy, the notion of the tragic will be increasingly linked to the drama of freedom, the finitude and absurdity of the human condition, and the pessimistic worldview. The course will take place in the form of a seminar and will especially deal with the philosophy of the 20th Century. The following authors (and texts) will be read: Unamuno (The Tragic Sense of Life), Scheler (On the Tragic), Camus ("On the Future of Tragedy", The Myth of Sisyphus and The Rebel), Benjamin (The Origin of German Tragic Drama), C. Schmitt (Hamlet or Hecuba: The Intrusion of Time into the Play), Jaspers (Tragedy is not enough), Ricur ("The Wicked God and the Tragic Vision of Existence").

PHIL598701

The Problem of Suffering

Bloechl, Jeffrey

Fall 2024

This course approaches the theme of suffering as a challenge to phenomenology and Christian theology. Suffering is distinguished from pain, and explored in relation to various modes of meaning-giving. Extended attention is given to the possibility of meaningless suffering, with reference to medical literature and the testimony of victims of the Shoah. The theme of meaningless suffering resists phenomenological interpretation and challenges Christian theodicy. Authors studied will include the book of Job, Augustine, Leibniz, Nietzsche, Husserl, Levinas, and P. Levi.

PHIL666001

Foundations of Western Law

Kohler, Thomas C

Fall 2024

This seminar will place students into a conversation with some of the key thinkers who have shaped our modern Western legal traditions. In addition to Plato and Aristotle, the readings will be drawn from 17th, 18th, and 19th century English, French and German political philosophers. Themes include: how these authors influenced common and civil law systems; the relation among religion, law and morality and the problem of human knowing; the concepts of "law", "reason", "human nature" and the foundations of rights theory; the shift from the good to legitimacy; the rise of individualism and the problem of community.

Technology and Culture

Griffith, William

Fall 2024

This interdisciplinary course will first investigate the social, political, psychological, ethical, and spiritual aspects of the Western cultural development with a special emphasis on scientific and technological metaphors and narratives. We will then focus on the contemporary world, examining the impact of our various technological creations on cultural directions, democratic process, the world of work, quality of life, and especially on the emergent meanings for the terms "citizen" and "ethics" in contemporary society. Students will explore technologies in four broad and interrelated domains: (1) computer, media, communications, and information technologies, (2) biotechnology, (3) globalization, and (4) environmental issues.

PHIL722401

Medieval Christian Mystical Philosophy: Eriugena, Eckhart, Cusanus

Moran, Dermot

Fall 2024

In this course, I plan to read key texts in the Christian Neoplatonic mystical tradition, focusing in particular on Johannes Scottus Eriugena (c. 800-877), Meister Eckhart of Hochheim (1260-1328), and Nicholas of Cusa (1401-1464). The class will begin with readings from St. Augustine and Dionysius the Areopagite, the two most influential figures for medieval Christian Platonism. We shall then read sections of Eriugena's Periphyseon and Homily on the Prologue to St. John's Gospel, selections from Eckhart's sermons and tracts, and parts of Nicholas of Cusa's On Learned Ignorance and De li non aliud (On God as Not Other). The course will consider the Neoplatonic context, affirmative and negative theology, and the nature of the human being in the context of the dialectics of knowledge and ignorance, immanence, and transcendence.

PHIL750901

Plato and Socrates

Wians, William R

Fall 2024

In having Socrates declare, The unexamined life is not worth living (Apology38a5-6), Plato presents his teacher as an example for others to follow, not just in what he thought and said, but in how he lived and even in how he died. But following Socrates example proves difficult and not just in facing death. Many dialogues feature characters who try in various ways to imitate Socrates but who enjoy limited success at best. Some of these failures are comic, certainly all are instructive. But what lessons does Plato teach about a man who claimed to teach nothing? Put differently, what would an examined life look like? How does one live an examined life in practice? To begin to answer these questions questions that should be urgent for anyone hoping to lead a good life we can do no better than to look at Socrates own activities as recorded by Plato (Socrates himself wrote nothing). Students will encounter Socrates primarily through a series of philosophical dialogues, including seemingly inconclusive dialogues along with several Platonic masterpieces.

Ancient to Renaissance Views of the Passions

Sweeney, Eileen C

Fall 2024

In this course we will consider the Ancient and Renaissance philosophy of the passions and their relationship to sin and vice. Thinkers considered include: Plato, Aristotle, the Stoics, Cicero, Seneca, Cassiodorus, Augustine, Church fathers, and Renaissance appropriations of ancient thought in Marsilio Ficino, Lorenzo Valla, Erasmus, and Montaigne. We will consider the spiritual tradition of the deadly sins, Christian appropriation and criticism of Stoicism and Renaissance appropriations of Platonic views and texts. Satisfies the following distribution requirement(s) for Philosophy: Ancient.

PHIL772101

Medieval Ontology

Solere, Jean-Luc

Fall 2024

We will study how Neo-Platonism and Aristotelism dialogued, argued, merged, parted in medieval metaphysics, especially in Aquinas's, Scotus's and Ockham's thought, during the 13th and 14th centuries. We will analyze fundamental concepts such as being, form and matter, substance and accident, essence and existence, individuation, participation, creation, etc. The class is especially designed for giving graduate students a strong and in-depth presentation of medieval thought, an essential moment of the development of western philosophy.

Phenomenology of Religion

Kearney, Richard

Fall 2024

This seminar discusses the phenomenological approach to religion in two parts. The first analyses the application of phenomenology to the God question in Husserl, Heidegger, Levinas and Ricoeur. The second engages the famous 'theological turn in phenomenology' manifest in the work of Derrida, Caputo and Kristeva and issuing in the atheist-anatheist debate.

Philosophy Courses: Spring 2025

PHIL107001

Philosophy of the Person I

Maryanovich, Daniel J

Spring 2025

This course introduces students to philosophical reflection and to its history through the presentation and discussion of the writings of major thinkers from ancient, medieval, modern, and contemporary periods. The course is designed to show how fundamental and enduring questions about the universe and about human beings recur in different historical contexts. Emphasis is given to ethical themes, such as the nature of the human person, the foundation of human rights and corresponding responsibilities, and the problems of social justice.

PHIL108901

Person and Social Responsibility II

Troxell, Mary S

Spring 2025

Enrollment limited to freshmen, sophomores, and juniors The course requirements include ten to twelve hours per week of community service. In light of classic philosophical and theological texts, students in this course address the relationship of self and society, the nature of community, the mystery of suffering and the practical difficulties of developing a just society. PULSE students are challenged to investigate the insights offered by their readings in relationship to their service work. Places in the course are very limited.

PHIL109101

Perspectives on Western Culture II/Perspectives II

Cronin, Kerry M

Spring 2025

Freshmen only This course pursues the enduring and foundational questions of life into the modern world. It considers the new and renewed understandings of faith, reason, justice, nature and the human person that emerge in the works of writers such as Machiavelli, Descartes, Luther, Rousseau, and Nietzsche. Modern perspectives will be appraised in light of the pre-modern perspectives encountered in the first semester of the course, allowing students to consider important contemporary questions in more attentive, reflective and responsible ways.

PHIL116001

The Challenge of Justice

Snyder, Joshua R

Spring 2025

This course introduces the student to the principal understandings of justice that have developed in the Western philosophical and theological traditions. Care is taken to relate the theories to concrete, practical and political problems, and to develop good reasons for choosing one way of justice rather than another. The relationship of justice to the complementary notion of peace will also be examined. Special attention is paid to the contribution of Catholic theology in the contemporary public conversation about justice and peace. Problems discussed may include human rights, hunger and poverty, and ecological justice.

PHIL160201

Perspectives on Art II: Crisis, Courage, and Creativity

Rumble, Vanessa P

Spring 2025

In the attempt to think through what is real, and in response to social and intellectual crises, philosophy elaborates ever new ways to see and understand our world. Philosophy, then, is always a call to courage and creativity. In this year-long course on philosophy, we study the history of western philosophy, keeping an eye on the way in which philosophy comports itself in relation to the bodily and the sensual and in relation to art and beauty. We begin the spring semester with a study of Immanuel Kant's ethics, turning then to his theory of art. What is the feeling of beauty all about? Is aesthetic taste wholly subjective, or just the opposite? Afterwards, we look at Hegel's and Goethe's bold attempts to overcome the alienation between appearances and ultimate reality that was posited by Kant. We close by asking whether art has the power to change not only how we see, but also how we live, both individually and in community. James Baldwin and Toni Morrison bring these issues home.

PHIL171101

The American Divide: The Philosophy of Inequality

McGill, Cherie

Spring 2025

This is an Enduring Question course and is open to FRESHMEN only. You must take both ECON1703 and PHIL1711. How should we interpret our nation's persistent inequalities when our founding documents assert the equality of all? Concern over inequality in the U.S. has shown itself in movements like Occupy Wall Street, the Fight for a Fifteen Dollar Minimum Wage, and Black Lives Matter, and has become even more of a focus since the COVID-19 pandemic. These paired courses will examine the meaning, causes, and consequences of inequality from the perspectives of economics and philosophy. Providing a broad picture of the current state of the U.S. economy and analyzing the role of economic policy in determining opportunities and outcomes, these courses will prepare students to develop their own views about how past economic choices have shaped current economic realities and how we might create a more equitable future.

PHIL225901

Perspectives on War, Aggression, and Conflict Resolution I

Johnson, Spencer K

Spring 2025

The Faith, Peace, and Justice Program at Boston College sponsors this course as an introduction to the field of Peace Studies.. This course asks: Is it ever ethical to go to war? Is it possible to be ethical in war? And, what does ethical conflict resolution look like? This course investigates these questions primarily using the resources of the Christian theological tradition and the social sciences, as well as engaging with philosophy and film. Special attention will be paid to issues in contemporary warfare and the challenges and promises of peacebuilding.

Rizzuto, Alexis A

Spring 2025

This PULSE elective will focus on the power of story-telling to achieve justice and social liberation. We will read theoretical and narrative accounts of the role of story, examine the use of story-telling among marginal populations as a means of participating in their own solutions. We will explore the benefits and liabilities of social media in emerging change movements. Students will engage in story gathering, telling, and analysis, through their PULSE placements and class discussion, producing a collection of original writings. A four-hour per week (plus travel time) service commitment is a requirement for this course.

PHIL229201

Philosophy and Theology of Community II

Sweeney, Meghan T

Spring 2025

This course is a continuation of the themes of Philosophy of Community I which further explores the themes of that course: the nature of community, particularly in the American context; the historical, cultural, political, and religious forces that have shaped American community and the American understanding of community.

PHIL310401

Do Robots Have Souls?

Kruger, Matthew C

Spring 2025

Do robots have souls? Probably not. But this course thinks its a good question, and therefore explores our fundamental thinking of technology and the ways in which it overlaps with religious and philosophical thinking of animal, inanimate object, technical object, and human. The philosophic core is found in the work of Gilbert Simondon, Martin Heidegger, and Nishida Kitaro, focusing particularly on Simondons re-envisioning of the relationship between religion and technology through art and philosophy. After this core, we turn to art, movies, and novels, to explore transhumanism, posthumanism, the threat of AI, and the possibility of human and machine harmony.

PHIL326701

Asian Philosophy II

Johnson, David W

Spring 2025

This course looks at the ways in which twentieth-century thinkers--especially figures associated with the Kyoto School such as Nishida Kitaro, Watsuji Tetsuro, and Kimura Bin--appropriated and transformed the intellectual heritage of premodern Asian philosophy by articulating classical metaphysical and ontological positions in novel ways and by developing creative responses to questions about ethical life and about the nature of the self. Satisfies the following distribution requirement(s) for Philosophy: Ethics & Values, Knowledge & Reality, History of Philosophy.

PHIL369201

Medieval Women Philosophers

Boor Mulcahey, Kelsey

Spring 2025

This course studies the philosophical thought of medieval women (e.g. Hildegard of Bingen, Catherine of Siena, Julian of Norwich, Christine de Pizan, etc.). While usually not labeled "philosophers," their thought contributes to and enriches perennial philosophical conversations. Although many of these writers are contemporaries of more famous medieval thinkers, their backgrounds, educations, audiences, and modes of discourse are often quite different. Studying them gives us a broader grasp and a deeper understanding of the medieval perspective. By the end of this course students will understand the views of important medieval women on self-knowledge, reason, love, persons, and immortality. Satisfies the following distribution requirement(s) for Philosophy: Ethics & Values, History of Philosophy.

PHIL430701

Happiness in a Commercial Society

Evans, Jeremy A;Smith, Michael J

Spring 2025

The aim of this course is to introduce students to the interdisciplinary study of human well-being as it applies to the domains of contemporary business and commercial life. The course will include philosophical, psychological, and social scientific inquiries into human flourishing, as well as the nature of meaningful work, the relationship between wealth and happiness, and the application of well-being measures to thriving economic and political institutions.

PHIL430901

Everybody's Working for the Weekend: Ambition and Alienation

Rojcewicz, Christine

Spring 2025

This course will propose an answer to the following question: Why does it seem like some people are more ambitious than others? On the surface, those with what appears to be a natural drive to succeed seem to become more affluent. That is to say, some people appear to embrace hustle culture, or the idea that any time spent not making money is wasted time, while others are drawn toward a trend identified around 2021 as quiet quitting, that is to say, they refuse to devote more time and energy to their work than is absolutely necessary to avoid losing their jobs. Why is this apparent lack of ambition and motivation so prevalent? Can we blame mere laziness? This question will be answered with a resounding no. Rather, this class will show that there are indeed systematic measures in place that cause some to not appear as motivated as others. In order to work through this answer, this class will look at alienation and capitalism. This course will address the effects of systemic racism, automation and AI, environmental concerns, generational trends, and the COVID-19 pandemic on ones ambition to succeed in the workforce. This course will combine philosophical readings from Marx, Weber, Arendt, and others with contemporary business case studies.

PHIL440501

Greek Philosophy

Byers, Sarah C

Spring 2025

This course is organized around the central philosophical questions asked and answered by philosophers in the ancient Greek-speaking world. Topics include theories of material bodies, change and time, elemental physics, and entities and their predicates; whether anything immaterial or immutable exists and, if so, its relation to the changing cosmos; the existence and nature of God or gods; the existence and nature of the human soul and its relation to the human body; the criterion of truth and the nature of language; the criterion of ethics; theories of animal and human cognition and motivation. We will consider Plato, Aristotle, and, more briefly, some pre-Socratic and post-Aristotelian authors such as Plutarch, Epictetus, and Plotinus.
