

CLINICAL AESTHETICS: ADVANCED NEUROTOXINS

LEX[®]
RX

Designed for the advanced beginner injector, a clinician who has completed an introductory neurotoxins training. This 1-hour lecture and 3-hour hands-on experience expands your neurotoxin injection skills to lower face injections including masseter (jawline), chin (mentalis), depressor septi nasi (nose), perioral lines, lip flip, and Depressor Anguli Oris (DAO) under the direct supervision of LexRx NP injectors.

We highly recommend that students invite their own models: 3 models per 3 hour session. All models should send an email to models@lexrx.co to sign up and be assigned a time slot.

This course includes:

- A review of all FDA approved brands, including BOTOX® Cosmetic, Dysport®, Jeuveau®, Xeomin®
- A refresher of anatomy and physiology, indications and contraindications for treatment, as well as guidelines for safe, evidence-based practice
- Discussion and demonstration of safe dosing and injection techniques for treatment of advanced neurotoxin areas
- Supervised injection experience on live models

Who is eligible to participate?:

- APRNs
- RNs
- BSN students who have clinical experience
- PAs
- MDs
- DOs
- DDSs
- DMDs

***Prerequisite: Completion of a Neurotoxins Training Course**

At the conclusion of this program, participants will be able to:

- Identify FDA approved brands for neurotoxin injection treatments
- Describe the safe steps for selecting clients and prepping for lower face injections
- Demonstrate safe, quality lower face injection process for advanced treatment with neurotoxins
- Describe post-treatment client instructions, adverse reactions and complications, as well as need for follow-up appointments

To receive a Certificate of Completion you must complete the Zoom lecture, attend the advanced hands-on training class with a demonstrated understanding of advanced practice and safe injection techniques, and submit an evaluation form.
